Setting Up To Record TV Programs

To record programs from a television signal source, such as an antenna, cable TV, or satellite system, you need to set up your TV Tuner card:

- Connect the TV Tuner to a television video source.
- Set up the remote control.
- Install InterVideo WinDVR.

Connecting the TV Tuner

Connectors and cables for TVs vary. You may need to purchase the appropriate adapter, splitter, A/B switch, or combiner to complete the setup of your TV tuner card.

1. Disconnect the television signal source from your TV or VCR system.
2. Reconnect this cable to the TV Tuner card Cable/Antenna Connector on the back of your PC.

Setting Up the Remote Control

1. Open the back cover of the remote control and insert two AAA batteries (alkaline batteries are recommended).
2. Connect the remote control receiver to the USB port on your computer.

Note: When using the remote control, make sure that there is nothing blocking the path between the remote control and the receiver unit.

Installing InterVideo WinDVR

1. Insert the InterVideo WinDVR installation CD into the PC optical drive.
2. Follow the instructions provided with the CD.
3. After installation is complete, open InterVideo WinDVR.
4. Follow the WinDVR configuration wizard to enter properties, such as screen size, signal input source, and channels.
