Using Multi-Channel Audio Speakers

If your PC has multi-channel audio speakers, you can connect 4 channels for 4 speakers output or 6 channels for 5.1 speakers output.

Connecting and configuring a multi-channel speaker system

1. Turn off the PC.
2. Connect the three audio cable plugs from the speaker system to the connectors on the back of the PC.
3. Turn on the PC.
4. Turn on the speaker system.
5. Click Start on the taskbar.
6. Choose All Programs.
7. Double-click Multi-channel Sound Manager.
8. Click the Speaker Configuration tab.
9. Select the option for the number of speakers in your system, for example, 6 channels mode for 5.1 speakers output.
10. Click OK.

Configuring multi-channel audio output for the DVD player

1. Insert a DVD or start InterVideo WinDVD.
2. Right-click in the WinDVD window, and then click Properties.
3. Click the Audio tab.
4. Click the option for the number of speakers matching your multi-channel speaker system.
5. Click OK.

Note: If you want to play a stereo DVD, repeat steps 1 through 5 and change the audio properties for WinDVD to match the DVD output.
