

AD SPECS

Compaq iPAQ Connection Point CP-2W Wireless Broadband Gateway

Secure networking in a connected world.

Actual size
4.45" x 2.13" x .21" (1.1 lbs.)

Using the latest technologies, the Compaq *iPAQ*™ Connection Point CP-2W Wireless Broadband Gateway makes it easy and affordable to set up a secure broadband network for your home or small office multi-PC environment. The *iPAQ* Connection Point CP-2W Wireless Broadband Gateway comes cable/DSL-ready and serves both Ethernet and wireless high-speed networks, through which you can share the Internet, files, programs, digital music and more. Having broadband Internet service doesn't have to mean undermined security. The Compaq *iPAQ* CP-2W Wireless Broadband Gateway packs a powerful combination of security features, like the built-in firewall, wireless encryption, VPN pass-through and more. And whether you're an experienced user or you're just getting started, the *iPAQ* CP-2W Wireless Broadband Gateway is easily installed and operated – a sure way to simplify your life and connect your world.

Selling Points

- > *Install and operate with ease – Anyone can set up and configure the iPAQ Connection Point CP-2W Wireless Broadband Gateway in just minutes.*
- > *Share a single cable or DSL Internet connection – Network Address Translation (NAT) allows you to share one, broadband IP address among multiple PCs. Dynamic Host Control Protocol serves up to 253 Internet devices for hassle-free IP address acquisition and management. Also supports dynamic IP, static IP and PPPoE Internet access at speeds 50 times faster than a 56K modem.*
- > *Enjoy the freedom of wireless Internet – High-performance, industry-standard IEEE 802.11b wireless networking technology.*
- > *With a range up to 300 feet and Access Point Roaming capabilities, locate computers virtually anywhere you want and connect them wirelessly up to speeds of 11 Mbps.*
- > *Experience the power of Ethernet networking – Built-in 4-Port 10/100 Mbps Fast Ethernet Auto Sensing Switch allows up to 4 computers on the network without an additional hub and automatically configures optimum connection speeds to 100 Mbps.*
- > *Enhanced security and advanced management – Includes NAT firewall security, Internet protocol and port filtering, MAC address recognition, virtual private network pass-through, 64-bit and 128-bit wireless encryption capabilities, Web DMZ and Virtual Server.*

QUICK SPECS

Compaq iPAQ Connection Point CP-2W Wireless Broadband Gateway

Simplify Your Life, Connect Your World.

Setup Information*

Model: Compaq iPAQ™ Connection Point CP-2W Wireless Broadband Gateway
Compaq P/N: 241274-001
UPC: 720591857974

Dimensions & Weights

Unit: 4.45" x 2.13" x .21" (1.1 lbs.)
Unit Package: 13.39" x 7.40" x 2.56" (2.1 lbs.)

Standard Features

Share a Single High-Speed Internet Connection

- > Network Address Translation (NAT) allows a single public IP address to be shared across many devices
- > DHCP server automatically provides up to 253 IP addresses on the local area network
- > Supports dynamic IP, static IP and PPPoE connections via an external DSL or cable modem, providing high-speed Internet access (up to 50 times faster than a 56K modem)

802.11b Wireless Networking

- > 802.11b wireless is high-performance, industry-standard wireless networking for use with IEEE 802.11b-compatible networking cards
- > Range up to 300 feet, transmission rates up to 11 Mbps; high-speed coverage of most home or small office environments
- > Access point roaming to work in conjunction with other 802.11b access points, increasing coverage area

Ethernet Networking

- > Built-in 4-port Fast Ethernet Switch connects up to four PCs with Ethernet cables for high-speed data transmission (up to 11 Mbps), enhancing gaming and audio/video streaming
- > Auto-sensing 10/100 ports automatically configure to 10 Mbps or 100 Mbps Ethernet transmissions
- > Auto-sensing MDI/MDI-X cabling automatically configures for use with normal or crossover Ethernet cables
- > Ethernet to wireless bridging automatically combines an 802.11b wireless network and an Ethernet network into one local area network

Security and Advanced Management

- > NAT firewall hides local PCs from external hackers by translating IP addresses from public to private local addresses
- > MAC address verification lets you block or allow network access based on the physical MAC address of a device
- > 64-bit and 128-bit WEP encryption delivers the highest available level of encryption technology for an 802.11b wireless network

- > Secure VPN pass-through allows users to tunnel into a corporate network from behind the Connection Point CP-2W firewall
- > Internet protocol and port filtering enable you to block or allow data based on individual protocols or ports
- > Web DMZ allows an IP address to be set up outside the firewall for Web page serving or other services
- > Virtual server enables a virtual port for such services as FTP, while the host device remains behind the firewall
- > Internal Web-based management pages allow you to manage and configure the Connection Point CP-2W through a Web browser for easy access and navigation

Target Market

- > Broadband, multiple-PC households
- > Home/small office environments
- > Notebook users desiring wireless Internet access

Warranty

- > 1-year U.S. Limited Warranty¹

Compaq Extra Mile Service and Support

- > The best approach to customer service, delivered just the way you want it. For the fastest path to the right answers, go FIRST to compaq.com/consumersupport
- > Technical support 24 hours a day, 7 days a week at 1-888-302-7358

System Requirements

- > Microsoft® Windows® 98, NT® 4.0, 2000, ME or higher
- > CD-ROM drive
- > External cable or DSL modem
- > Network adapter for each connected PC
- > Internet Explorer 4.0 or higher, Netscape Navigator 4.0 or higher, MSN® Explorer
- > 1 available USB port
- > Current Internet access account for Internet sharing
