Remove the bright pink tape from the print cartridges. Do not touch the gold-colored contacts or retape the cartridges.

Lower the print-carriage access door. The print carriage slides to the middle.

Hold the black print cartridge with the large HP label and the raised markings on top. Slide the cartridge at a slight angle into the right side of the print carriage. Press firmly until the print cartridge snaps into place. Make sure that both print cartridges are secure.

Press the On/Resume button to turn on the HP PSC. Wait for it to finish initializing.

Press the Scan button. After the On light stops blinking, alignment is complete. Discard or recycle the alignment page.

Finish software installation

Hardware setup is now complete. Return to your computer.

Click Next on the screen with the green checkmark. Depending on your operating system, it may take 20 minutes or more to finish installing the software. If you are not sure if your computer and the Congratulations screen appear, you are ready to use your HP PSC. If you encounter problems during setup, see the Reference Guide.

When you restart your computer and the Congratulations screen appears, you are ready to use your HP PSC. If you encounter problems during setup, see the Reference Guide.
Macintosh users
