Connect to A/V Receiver and TV

1. Connect the Stereo Cable to the Compaq iPAQ Music Center audio output and to an available audio input on your A/V receiver* such as CD or tape.
2. Connect the Composite Video Cable to the iPAQ Music Center video output and to an available video input on your television.
3. Connect the Power Cable to the iPAQ Music Center and to a power outlet.

*For best audio performance, use S/PDIF digital audio connections (either optical or coaxial) instead of analog stereo. For best video performance, use S-Video connections instead of composite video where possible. Digital and S-Video Cables are not included.

For more information about other possible connections, see Chapter 2 in your Getting Started guide.

Using the Built-In Modem

1. Connect the Telephone Cable to the modem jack.
2. Connect the other end to a telephone wall jack.*

Note: If a telephone wall jack is not conveniently located near your Music Center, you may consider using a wireless telephone jack system.

Internet Connection

1. Connect the Stereo Cable to the Compaq iPAQ Music Center audio output and to an available audio input on your A/V receiver such as CD or tape.
2. Connect the Composite Video Cable to the iPAQ Music Center video output and to an available video input on your television.
3. Connect the Power Cable to the iPAQ Music Center and to a power outlet.

*For best audio performance, use S/PDIF digital audio connections (either optical or coaxial) instead of analog stereo. For best video performance, use S-Video connections instead of composite video where possible. Digital and S-Video Cables are not included.

For more information about other possible connections, see Chapter 2 in your Getting Started guide.

Power On

1. When the LED turns solid red, press the power button on the front of your iPAQ Music Center.
2. Turn on your A/V receiver and select the proper input mode, such as CD or tape.
3. Select the video input on your television that matches the input you used when connecting the iPAQ Music Center.

Welcome!

1. Internet Connection
2. When you've selected the correct input on your television, the Welcome screen will be displayed. In just a few moments, you will be able to start enjoying your iPAQ Music Center.

1. HPNA Setup
2. Connect the Telephone Cable (with a minimum length of 6 feet) to the HPNA network jack on the iPAQ Music Center.
3. Connect the other end to a telephone wall jack.*

Note: If a telephone wall jack is not conveniently located near your Music Center, you may consider using a wireless telephone jack system.

*Use the included telephone splitter if you also want to use a telephone at this location.
