1. CD

What do you want to do?

- Make a music CD.

- Copy an existing CD.

- Make a data CD the easiest way; by dragging and dropping files in Explorer or by choosing file, Save in any application. Choose this, for example, when you want to free up space on your hard drive or to transport work between home and office. This type of CD is not compatible with all CD-ROM drives, so try it out in the drive you want to read it in to see whether it will be compatible.

- Make a data CD that’s the most compatible with other CD-ROM drives. Choose this, for example, when you want to distribute your CD to a large number of people.

- Create disaster recovery floppies and CDs to use in the event of a system crash.

[Create a CD]
Please select the type of disc you wish to create:

Click here to create a data disc that will be accessible through a drive letter, i.e. as you would use a floppy drive.

Click here to create a data disc for distribution among different types of computers.

Click here to create an audio CD that will be playable in any CD player.

Click here to make a backup of your disc. Unauthorized duplication of a CD-ROM or audio CD may infringe with copyright law.

Test Before Writing

Why test before writing? This test will simulate the entire writing process to CD.

This is the most reliable test for determining if your entire system is fast enough to keep up with the writing process. You should perform this test the first few times you write to disc.

- Perform the test
- Do not perform the test

Ready to Create CD

Adaptec Easy CD Creator is ready to create your CD. What would you like to do?

- Create CD now
- Create CD later

If you select “Create CD Later,” you will be able to make changes to the CD layout before creating the CD. When you are ready to create the CD, select “Create CD” from the File menu.
Click on Finish to close the Easy CD Creator Wizard and proceed with creating the CD.

Adaptec DirectCD Wizard (Drive Y:) 3.0 (65)

Name Your Disc

Type a name for your disc:

[TextField]

(Maximum length: 11 characters)

Note: This name will help to distinguish between discs in the future to make finding your files easier.

[Image] [Buttons: Help, Cancel, Back, Next, Finish]

(5) CD, CD-R. [Image].
(6) Leave the disc as it is... Finish. Organize the disc... Finish.

Before ejecting the DirectCD disc, please decide if you want to continue using DirectCD to access it or if you want to read this disc from a standard CD-ROM drive.

- Leave the disc as it is so that it can be read and written through drive letter access in the future.
- Organize the disc so that it can be read in most standard CD-ROM drives under Windows 95 or Windows NT 4.0 Service Pack 3. Note: You will have to make this disc writable to add more files to it.
- Protect disc so it cannot be written to again.

Display this wizard next time I eject a DirectCD disc.

Disc Title and Artist Name

What is the disc title and the artist name you want to use for your audio CD?
This information is stored in a file used by Windows CD Player to recognize the title and the artist name when you insert the CD in your CD-ROM drive. This information will also appear in the Jewel Case Layout.

Disc title:
All Time Greatest Hits

Artist name:
louis armstrong's
