软件安装疑难排除

Installation troubleshooting

如果打印机软件安装失败，或安装软件后打印机与计算机无法正常通信，请在此页寻找解决方案。如果仍需帮助，请查看打印机文档或联系客户服务中心。

请检查打印机与计算机之间的所有电缆连线，并确保所用的打印机软件为最新版本。

问题： 如果"发现新硬件向导"打开后未能识别打印机，则可能是在软件安装尚未完成时连接了 USB 电缆。

解决方案： 断开 USB 电缆，重新启动软件安装程序。在安装过程中显示相应提示时连接 USB 电缆。

问题： 如果在软件安装过程中计算机停止响应，可能是由于后台正在运行防病毒软件或其他软件程序，因此减慢了安装进度。

解决方案： 等待软件完成文件复制，此过程可能会占用几分钟。如果几分钟过后，计算机仍没有响应，请重新启动计算机，然后暂停或禁用所有运行中的防病毒软件，并退出其他所有软件程序，再依照第 6 页的指示重新安装打印机软件。**注意：** 计算机重启后，防病毒软件会自动重新打开。

问题： 如果安装期间出现"系统要求"对话框，表示计算机系统的某个组件不满足最低系统要求。

解决方案： 升级该组件，使之达到最低系统要求，然后重新安装打印机软件。

问题： 系统要求检查指出，计算机运行的 Internet Explorer 版本过旧。

解决方案： 按键盘上的 **Ctrl + Shift**，然后在"系统要求"对话框中单击**取消**，忽略该对话框提示并完成软件安装。安装 HP Photosmart 软件后必须立即更新 Internet Explorer，否则 HP 软件将不能正常工作。**注意：** 更新 Internet Explorer 后，不必重新安装 HP 软件。

问题： 计算机不能读取 HP Photosmart CD。

解决方案： 确保 CD 没有污迹或划痕。如果其他 CD 均能正常工作，只有 HP Photosmart CD 例外，则该 CD 可能已损坏。可以从 www.hp.com/support 下载打印机软件。如果其他 CD 也不能工作，则可能需要维修光驱。

If the printer software did not install successfully or if the printer and computer are not communicating properly after software installation, check this page for possible solutions. If you still need help, check the printer documentation or contact Customer Care.

Check all cable connections between the printer and computer, and ensure you are using the most recent version of the printer software.

Problem: If the Found New Hardware Wizard opens but doesn't recognize the printer, you may have connected the USB cable before completing the software installation.

Solution: Disconnect the USB cable and restart the software installation. Connect the USB cable when prompted during software installation.

Problem: If the computer stops responding during software installation, it may mean that virus protection software or another software program is running in the background and slowing down the installation process.

Solution: Wait while the software finishes copying files; this may take several minutes. If, after several minutes, the computer is still not responding, restart the computer, pause or disable any active virus protection software, quit all other software programs, and then reinstall the printer software using the instructions on page 6. **Note**: Your virus protection software will turn back on automatically when you restart the computer.

Problem: If the System Requirements dialog box appears during installation, it means a component of the computer system does not meet minimum system requirements.

Solution: Upgrade the component to the minimum system requirement and then reinstall the printer software.

Problem: The system requirements check indicates that the computer is running an outdated version of Internet Explorer.

Solution: Press **Ctrl + Shift** on the keyboard and click **Cancel** in the System Requirements dialog box to bypass the block and complete the software installation. You must update Internet Explorer immediately after installing the HP Photosmart software, or the HP software will not work properly. **Note:** You do not have to reinstall the HP software after updating Internet Explorer.

**Problem**: The computer could not read the HP Photosmart CD.

Solution: Make sure the CD isn't dirty or scratched. If other CDs work but the HP Photosmart CD does not, you may have a damaged CD. You can download the printer software from www.hp.com/support. If other CDs don't work, you may need to service the CD-ROM drive.
