

SpySubtract®

Safely Remove Spyware

Spyware is the #1 privacy threat to PC users everywhere.

Spyware can easily hide on your computer and send valuable personal information over the Internet.

Credit card numbers, screenshots, chat sessions, Web browsing — almost anything that you do on your PC can be captured by spyware.

Use the SpySubtract software preinstalled on your PC to keep you safe from spyware (60-day trial).

Scan your PC often with SpySubtract. It is simple, quick, and your peace of mind is worth it.

Get Live weather on your new PC

WeatherBug Weather Monitoring software included on your new PC

WeatherBug provides true live streaming weather directly to your new PC for free. Receive live weather conditions, forecasts, and severe weather alerts for any city in the U.S. Plus, WeatherBug offers a host of community and other valuable features. When minimized, WeatherBug reports your live local temperature in your System tray. Activate WeatherBug to get your local weather free.

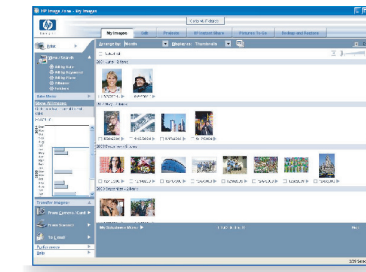

Valid in the U.S. only

HP Image Zone Plus software

Located in one, simple-to-use package is all the help you'll need to make working with your digital images and video clips fun and easy. HP Image Zone Plus software has integrated viewing, organizing, editing, printing, backup, and sharing capabilities.

Protect your precious memories

HP Image Zone Plus software automatically creates a digital negative of your pictures and saves them in a secure place on your hard drive. Delete a photo you want back later? No problem. Simply click the "revert to original" task, and your photo is as good as new.

Click  on your PC desktop
