Welcome

To find an answer to a question, select one of the following topics:

- Special features
- Get started
- Connect to the printer
- Print photos
- Print photos from a digital camera
- Print other documents
- Printing tips
- Printer software
- Maintenance
- Troubleshooting
- Optional accessories
- Supplies
- Specifications
- Environmental information
Congratulations! You have purchased an HP Deskjet printer that is equipped with several exciting features:

- **Built-in networking capabilities**: Connect to a wired network without using an external print server.
- **Ink-backup mode**: Use ink-backup mode to continue printing with one print cartridge when the other print cartridge has run out of ink.
- **Print Cancel button**: Cancel print jobs at the touch of a button.
- **Borderless printing**: Use the entire page surface when printing photos and brochures with the borderless printing feature.
- **Real Life technologies**: Get better photos easier with HP Real Life technologies. Automatic red-eye removal and adaptive lighting to enhance detail in shadows are just a few of the many technologies included.
- **Six-ink upgradeable printing**: Enhanced photo printing with a six-ink photo print cartridge (purchased separately). HP Vivera Inks deliver true-to-life photo quality and exceptional fade resistance resulting in vivid colors that last. HP Vivera Inks are specially-formulated and scientifically tested for quality, purity and fade resistance.
- **Printing from a digital camera**: Print photos directly from a PictBridge-compatible camera using the front USB port.
- **Automatic paper-type sensor**: Use the auto paper-type sensor to optimize print quality for various papers.
- **Quiet mode**: Use the Quiet mode feature when you require quieter printing, as when a baby is sleeping nearby, or when clients are in the office.
- **Photo/envelope feeder**: Use the photo/envelope feeder to conveniently print single envelopes, photos, or postcards.
- **Bluetooth printing**: Print images without a cable using Bluetooth. Use an optional HP Bluetooth Wireless Printer Adapter to print images from most Bluetooth devices to the printer without a cable connection.
- **Optional Automatic Two-Sided Printing Accessory**: Purchase an Automatic Two-Sided Printing Accessory to print two-sided documents automatically.
- **Optional Auto Two-Sided Print Accessory with Small Paper Tray**: Purchase an Auto Two-Sided Print Accessory with Small Paper Tray to print two-sided documents automatically and load small media from the back of the printer.
- **Optional 250-Sheet Plain Paper Tray Accessory**: Purchase a 250-Sheet Plain Paper Tray Accessory to expand the printer's paper-handling capability.
3 Get started

- Printer features
- Buttons and lights
- Paper trays
- Photo/envelope feeder
- Print cartridges
- Ink-backup mode
- Automatic paper-type sensor
- Quiet mode

For a description of the optional accessories, see the optional accessories page.

Printer features

The printer has several features to make printing easier and more efficient.

HP Deskjet 6940 series
1. **Print cartridges**
2. **Automatic paper-type sensor** *(not illustrated)*
3. **Ink-backup mode** *(not illustrated)*

---

1. **Rear USB port**
2. **Wired Ethernet port**

---

**Optional accessories**
Buttons and lights

Use the printer buttons to turn the printer on and off, cancel a print job, and restart a job. The printer lights give you visual cues about the status of the printer.

For a description of the following buttons and lights, click the appropriate option:

- Report Page button
- Network light

Power button and light

Use the Power button to turn the printer on and off. It can take a few seconds for the printer to turn on after you press the Power button.

The Power light flashes when the printer is processing.

⚠️ Caution  Always use the Power button to turn the printer on and off. Using a power strip, surge protector, or a wall-mounted switch to turn the printer on and off might cause printer failure.

The printer is designed with an auto-off feature that, when set, automatically places the printer into a low power mode when it has been idle for 30 minutes. In this mode, the printer continues to consume a maximum 3.0 watts of power and turns back on automatically when print jobs are sent to the printer. You can manually turn the printer off by pressing and holding the Power button for three seconds. When the printer is manually turned off, the printer uses less than one watt of power.
Note  Energy consumption can be prevented by turning the printer power off, and then disconnecting the end of the printer power cord from the electrical source.

Print Cancel button
Pressing the Print Cancel button cancels the current print job.

Resume button
The Resume light flashes when an action is required, such as loading paper or clearing a paper jam. When the problem is solved, press the Resume button to continue printing.

Print Cartridge Status lights
The Print Cartridge Status lights indicate the status of the print cartridges.
1. The left status light represents the tri-color print cartridge, which is installed in the left side of the print cartridge cradle.
   - The light is on and solid when the tri-color print cartridge is low on ink.
   - The light flashes when the tri-color print cartridge needs to be serviced.

2. The right status light represents the print cartridge that is installed on the right side of the print cartridge cradle. That print cartridge can be the black print cartridge, the photo print cartridge, or the gray photo print cartridge.
   - The light is on and solid when the black, photo, or gray photo print cartridge is low on ink.
   - The light flashes when the black, photo, or gray photo print cartridge needs to be serviced.

**PictBridge lights**

Plug a PictBridge-enabled camera into the front USB port using a digital camera USB cable to print digital photographs.

<table>
<thead>
<tr>
<th></th>
<th>Connection light</th>
<th>Error light</th>
</tr>
</thead>
</table>

When a PictBridge-compatible camera is connected correctly, the green Connection light is illuminated. The printer Power light flashes and the Connection light remains lit solid.
when printing from the camera. If the camera is not PictBridge-compatible or is not in PictBridge mode, the amber Error light flashes.

**Paper trays**

The printer has two paper trays:

**In tray**

The In tray holds paper or other media.

Slide the paper guides firmly against the edges of the media on which you are printing.

**Out tray**

Printed pages are deposited in the Out tray.
Use the photo/envelope feeder to print single envelopes, small photos, and cards. Raise the Out tray to load paper or other media. Lower the Out tray before printing.

To prevent paper from falling out of the Out tray, fully pull out the Out-tray extension. If you are printing in the Fast Draft mode, unfold the Out-tray extension stop. Do not unfold the Out-tray extension stop when printing on legal paper.

After the print job is complete, fold the Out-tray extension stop, and then push the Out-tray extension into the Out tray.
Photo/envelope feeder

Use the photo/envelope feeder to print a variety of media sizes including the following documents:

- Envelopes
- Photos
- Postcards

Envelopes

Follow these steps to use the photo/envelope feeder for single envelopes:

1. Insert the envelope into the photo/envelope feeder with the side to be printed on facing down and the flap to the left.

2. Push the envelope into the printer as far as it will go without bending.

3. Print the envelope.

Photos

Follow these steps to use the photo/envelope feeder to print a single photo:

1. Insert the photo paper into the photo/envelope feeder with the side to be printed on facing down.

2. Gently push the photo paper into the photo/envelope feeder as far as it will comfortably go.
3. Slide the photo/envelope feeder forward as far as it will go.

4. Print the photo.

**Postcards**

Follow these steps to use the photo/envelope feeder to print a single postcard:

1. Insert the postcard into the photo/envelope feeder with the side to be printed on facing down.
2. Gently push the postcard into the photo/envelope feeder as far as it will comfortably go.
3. Slide the photo/envelope feeder forward as far as it will go.

4. Print the postcard.

Print cartridges

Four print cartridges can be used with the printer.

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Black print cartridge</td>
</tr>
<tr>
<td>2</td>
<td>Tri-color print cartridge</td>
</tr>
<tr>
<td>3</td>
<td>Photo print cartridge</td>
</tr>
<tr>
<td>4</td>
<td>Gray photo print cartridge</td>
</tr>
</tbody>
</table>

Note The availability of print cartridges varies by country/region.

Use print cartridges

The print cartridges can be used in the following ways:

- **Everyday printing**: Use the black and tri-color print cartridges for everyday print jobs.
- **Quality color photos**: For more vibrant colors when printing color photographs or other special documents, remove the black print cartridge and install a photo print cartridge. The photo print cartridge, in combination with the tri-color print cartridge, provides you with virtually grain-free photos.
- **Quality black-and-white photos**: For outstanding black-and-white photographs, remove the black print cartridge and use a gray photo print cartridge in combination with the tri-color print cartridge.

Replace print cartridges

When buying print cartridges, look for the print cartridge selection number.
You can find the selection number in three places:

- **Selection number label**: Look at the label on the print cartridge that you are replacing.

- **Printer documentation**: For a list of print cartridge selection numbers, see the reference guide that came with the printer.

- **Print Cartridge Ordering Information dialog box**: For a list of print cartridge selection numbers, open the printer Toolbox, click the **Estimated Ink Level** tab, and then click the **Print Cartridge Information** button.

If a print cartridge runs out of ink, the printer can operate in **ink-backup mode**. For information about installing a replacement print cartridge, see the print cartridge installation page.

## Ink-backup mode

Use the ink-backup mode to operate the printer with only one print cartridge. The ink-backup mode is initiated when a print cartridge is removed from the print cartridge cradle.

### Ink-backup mode output

Printing in ink-backup mode slows the printer and affects the quality of printouts.

<table>
<thead>
<tr>
<th>Installed print cartridge</th>
<th>Result</th>
</tr>
</thead>
<tbody>
<tr>
<td>Black print cartridge</td>
<td>Colors print as grayscale.</td>
</tr>
<tr>
<td>Tri-color print cartridge</td>
<td>Colors print but black is grayed and is not a true black.</td>
</tr>
<tr>
<td>Photo print cartridge</td>
<td>Colors print as grayscale.</td>
</tr>
<tr>
<td>Gray photo print cartridge</td>
<td>Colors print as grayscale.</td>
</tr>
</tbody>
</table>

*Note*  HP does not recommend using the photo print cartridge or the gray photo print cartridge for ink-backup mode.
Exit ink-backup mode

Install two print cartridges in the printer to exit ink-backup mode.

For instructions about installing a print cartridge, see the print cartridge installation page.

Automatic paper-type sensor

The HP automatic paper-type sensor detects the paper in the printer, and then selects optimal print settings for that media. The result is fewer mouse clicks to start printing, and automatic optimal print quality on plain, photo, brochure and other high-quality papers. The sensor also checks the paper width to ensure it matches the size selected in the printer software. If the widths are different, the printer warns you so that you do not waste a sheet of paper.

When the auto paper-type sensor is engaged, the printer uses a red optical sensor light to scan the first page of a document and determine the best paper-type setting and check paper width. If the paper width is different from the printer software, the printer warns you and gives you the opportunity to stop printing. If the width matches, the printer determines the paper-type setting and the page is printed.

Note The Automatic Paper-Type Sensor is not available for documents that are printed from the 250-Sheet Plain Paper Tray Accessory or the Auto Two-Sided Print Accessory with Small Paper Tray.

For more information about using the automatic paper-type setting, see Select a paper type.

Caution Do not place the printer in direct sunlight. Direct sunlight can interfere with the auto paper-type sensor.

Quiet mode

Use the Quiet mode feature when you require quieter printing, such as when a baby is sleeping nearby, or when clients are in the office. To activate Quiet mode, open the Printer Properties dialog box, click the Paper/Quality tab, and then click Quiet Printing. By activating Quiet mode, the speed and sound level of the print job is reduced. To resume normal printing speed, click Quiet Printing again to clear this feature.

Quiet mode can be used in Normal, Fast Normal, and Draft print modes.
4 Connect to the printer

- Wired Ethernet networking
- Connecting a digital camera
- USB
- Bluetooth wireless printing

USB

The printer connects to the computer with a universal serial bus (USB) cable. The computer must be running Windows 98 SE or later to use a USB cable.

For instructions about connecting the printer with a USB cable, see the setup poster that came with the printer.

Note A USB cable might not be packaged with the printer.

To change a USB connection to an Ethernet connection

If you initially installed the printer as a standalone printer with a USB connection, and later decided to set up the printer on a network, you must change how the printer is accessed. If you already understand how to connect to a network, you can use the general instructions that follow. For more detailed instructions on connecting the printer to a network, see the setup poster.

1. Unplug the USB connection from the back of the printer.
2. Connect an Ethernet cable from the Ethernet port on the back of the printer to an available Ethernet port on the router, switch, or access point.
3. Insert the printer software CD in the computer CD-ROM drive. The Setup Wizard begins.
4. On the Connection Type screen, select Wired Network, and then click Next.
5. Follow the onscreen instructions to complete the network installation.
6. When the installation is complete, open Printers and Faxes in Control Panel and delete the printers for the USB installation.
Wired Ethernet networking

For setup information, click one of the following options:

- Ethernet basics
- What you need for a wired network
- Install the printer on an Ethernet network

For a description of the printer's Ethernet feature, click one of the following options:

- Ethernet lights
- Report Page button
- Network light
- Reports page
- Embedded Web server (EWS)

Other information:

- Resetting the printer to the factory default settings
- Troubleshooting
- Glossary

Ethernet basics

The printer's built-in Ethernet feature allows you to connect the printer directly to a 10/100 Base-T Ethernet network without the aid of an external print server.

To install the printer on an Ethernet network, follow the Ethernet installation instructions.

Hardware

Hubs, switches, and routers

On an Ethernet network, devices, such as computers and printers, are each connected to a network hub, switch, or router.

Hubs, switches, and routers can look similar, but there are important differences:

- Hubs are passive. Other devices on the network plug into the hub in order to communicate with one another. A hub does not manage the network.
- A switch allows devices on a network to communicate directly with one another in a smooth and efficient manner. A switch monitors and directs network traffic in order to allow each transmission the most possible bandwidth. By monitoring network traffic, a switch minimizes collisions and maximizes speed.
- Routers primarily connect different networks (for example, connecting a home network to the Internet). Routers are active. Routers have network administration tools, such as firewalls and DHCP. A router can act as a gateway, while a hub and a switch cannot.

Cables

Use a CAT-5 Ethernet cable to connect the printer to an Ethernet network. Ethernet cables have an RJ-45 plug.
Network communication

TCP/IP

Devices on a network communicate with one another using a "language" called a protocol. The printer is designed to operate on networks that use a popular protocol called TCP/IP.

IP address

Each device on a network identifies itself with a unique IP address. Most networks use a software tool, such as DHCP or AutoIP, to automatically assign IP addresses.

Internet connections

Networks might not be connected to the Internet.

If you place the printer on a network connected to the Internet, it is recommended that you use a gateway so that the printer's IP address is assigned through DHCP.

A gateway can either be a router or a Windows computer running Internet Connection Sharing (ICS). For more information about ICS, see the documentation that came with the Windows computer.

Ethernet network examples

To see some examples of Ethernet networks, see the Ethernet network examples page.

Printing

Computers on the network send print jobs directly to the printer, which prints them in the order received.

The printer can accept print jobs sent simultaneously from four users.

For example, if five users each send a print job to the printer at the same time, the printer accepts four of the print jobs and rejects the fifth. The user who sent the fifth print job should wait a few minutes and then resend the print job.

What you need for a wired network

To connect the printer to a wired network, you need the following:

- A functional Ethernet network that includes an Ethernet router, switch, or a wireless access point with Ethernet ports
- CAT-5 Ethernet cable

Although standard Ethernet cables look similar to standard telephone cables, they are not interchangeable. There is a different number of wires in each one and each
has a different connector. An Ethernet cable connector (also called an RJ-45 connector) is wider and thicker and always has eight contacts on the end. A phone connector has between two and six contacts.

- A desktop computer or laptop with either a wired or wireless connection to the router or access point.
- Broadband Internet access (recommended) such as cable or DSL.

**Ethernet network examples**

These are some common Ethernet network configurations:

**Shared Internet connection with a router acting as a gateway**

![Diagram of shared Internet connection with a router acting as a gateway]

In this example, a router manages the network connections and acts as a gateway between the network and the Internet.

**Shared Internet connection with a PC acting as a gateway**

![Diagram of shared Internet connection with a PC acting as a gateway]

In this example, the network devices are connected to a hub. A computer on the network acts as the gateway between the network and the Internet. The gateway computer uses Windows Internet Connection Sharing (ICS) to manage the network connections and provide Internet access to the other devices.

**DSL or cable Internet connection without a gateway**

![Diagram of DSL or cable Internet connection without a gateway]
This example looks similar to the first example. However, in this example, the network devices are connected to a **hub**, rather than a **router**. The hub is directly connected to the Internet.

⚠️ **Caution**  HP does not recommend this configuration. If possible, use a gateway to manage the network’s Internet access in order to limit exposure to viruses and guard against unwanted entry.

**Ethernet network without an Internet connection**

In this example, the network devices are connected to a **hub**. Devices use **AutoIP** to obtain IP addresses.

**Install the printer on an Ethernet network**

Installing the printer on an Ethernet network is a two-part process.

First you must connect the printer to the network. Then you must install the printer software on each computer that will use the printer.

- Connect the printer to an Ethernet network
- Install the printer software

**Connect the printer to an Ethernet network**

Follow these steps to connect the printer to an Ethernet network:

1. If necessary, set up the printer hardware.  
   For printer hardware setup instructions, see the setup poster that came with the printer.
2. Verify that the printer is powered on.
3. Connect the **Ethernet cable** to an available port on the network **hub** or **router**.
Note  Do not plug the Ethernet cable into a port labeled WAN, Uplink, or Internet.

4. Connect the Ethernet cable to the Ethernet port on the back of the printer.
5. Do one of the following:

<table>
<thead>
<tr>
<th>State of the Link light</th>
<th>Task</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>Go to step 6.</td>
</tr>
</tbody>
</table>
| Off                     | Repeat steps 2 through 4. If the lights are still off, verify the following items:  
  – The printer is powered on.  
  – The network hub or router is powered on.  
  – All cable connections are secure.  
  – You are using an Ethernet cable. |

7. Install the printer software on each computer that will use the printer.

Caution  It is recommended that the printer and the computers that use it be on the same subnet. Printer installation across subnets can be problematic depending on the type of router used.

Install the printer software

Before installing the printer software on a networked computer, verify the following items:

- The printer is set up and powered on.
- The network hub, switch, or router is powered on and functioning properly.
- All computers on the network are powered on and connected to the network.
- The printer is installed on the network.

Previous installations

If the printer software was previously installed on the computer, you must use the printer software CD to install an Ethernet version of the printer driver on the computer. Follow the steps below. The printer software installation wizard guides you through the installation process.

Caution  It is recommended that the printer and the computers that use it be on the same subnet. Printer installation across subnets can be problematic depending on the type of router used.
Software installation
Follow these steps to install the printer software on the computer:
1. Close all applications running on the computer.
2. Insert the printer software CD in the computer's CD-ROM drive.
3. Follow the onscreen instructions. On the Connection Type screen, select Wired Network.
4. After the installation has completed, follow the onscreen instructions to print a test page.

Ethernet lights
The printer's Ethernet lights indicate the status of the printer's Ethernet connection.

Link light
The Link light is solid when the printer is connected to an Ethernet network and powered on.

<table>
<thead>
<tr>
<th>State of the Link light</th>
<th>State of the printer</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>Connected to an Ethernet network and powered on.</td>
</tr>
<tr>

### HP Report page

The HP Report page supplies useful information about the printer's wired and front USB port connections.

#### Print an HP Report page

To print an HP Report page, verify that the printer is powered on and idle, and then press the Report Page button once.

If the printer has just been connected to a network, wait a few minutes before printing the HP Report page to allow the printer to obtain valid settings.
Select the language

The default language for the HP Report page is English. Follow these steps to print the page in another language:

1. Press the **Report Page** button to print the English version of the page.
2. On the lower portion of the page, find the language that you want.
3. To print the page in that language, follow the instructions that correspond to the language.
   
   For example, to print the page in French, press and hold down the **Report Page** button, press the **Resume** button twice, and then release the **Report Page** button.

Understand the HP Report page

The HP Report page lists the following information that you might frequently need to know:

General information

General information applies to Ethernet networks:

<table>
<thead>
<tr>
<th>Item</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Network Status</td>
<td>The printer's network status:</td>
</tr>
<tr>
<td></td>
<td>- <strong>Ready</strong>: The printer is ready to print.</td>
</tr>

</tr>
</tbody>
</table>
**Item** | **Meaning**
---|---
**DNS Server** | The IP address of the printer's domain name server. Not Specified means that no IP address has been set. This setting does not apply to the printer.

**mDNS** | The printer's mDNS service name on the network. This name is used by Apple Rendezvous to identify the printer on Mac OS X v10.2.3 and higher.

**Admin Password** | Indicates whether the printer’s embedded Web server is password protected.
- **Set**: A password is required.
- **Not Set**: A password is not required.

**Link Config** | The network link configuration:
- 10T-Full
- 10T-Half
- 100TX-Full
- 100TX-Half

**802.11 wireless**
The 802.11 wireless information does not apply to the HP Deskjet 6940 series printer.

**Miscellaneous**
The Miscellaneous section contains information that applies to Ethernet and PictBridge connections:

**Item** | **Meaning**
---|---
**Total Packets Transmitted** | Number of packets sent without error. This item might be requested by HP Service and Support.

**Total Packets Received** | Number of packets received without error. This item might be requested by HP Service and Support.

**PictBridge Status** | **Connected**: The printer is connected to a digital camera. **Error**: Something is wrong with the PictBridge connection.

**PictBridge Last Error** | The last known error to occur in the printer PictBridge function since the printer was last turned on.

**Embedded Web server (EWS)**
The embedded Web server (EWS) provides a simple way to manage the printer on a network.

Use the printer's EWS to do the following:
- Check the printer's status.
- Adjust the printer's network configuration.
Check estimated ink levels in the print cartridges.
- View network statistics.
- Configure Bluetooth settings.
- Visit HP's Web site for support information and to purchase supplies.

Caution  It is recommended that the printer and the computers that use it be on the same subnet. Printer installation across subnets can be problematic depending on the type of router used.

Before using the printer's internal Web page, verify that the printer and the computer are powered on and connected to the network.

Open the embedded Web server
Follow these steps to open the printer's internal Web page:
1. Launch the Internet browser.
   Use Microsoft Internet Explorer 5.0 or higher or Netscape 4.75 or higher.
2. Enter either the printer's IP address or host name in the browser's address box.

   Note  If the printer is on a different subnet than the computer, enter the printer's IP address (for example: http://192.168.1.1) in the browser's address box to open the embedded Web server. Also, if the computer uses a proxy server to access the Internet, you might need to configure the browser to by-pass the proxy server in order to access the EWS.

If you do not know the printer IP address or host name, print an HP Report page.

Caution  Use caution when changing the print server's wireless network settings; you can lose the connection. If you lose the connection, you might need to use the new settings to reconnect. If the printer loses its network connection, you might need to reset it to its factory default settings and reinstall the software.

Configure Bluetooth settings on a network printer
The following table describes the Bluetooth settings you can configure on the Bluetooth tab of the printer's embedded Web server (EWS) if the printer is connected to the network with an Ethernet cable:

   Note  If your printer is not connected to a network, connect a USB cable from your computer to the rear USB port on the printer and open the printer Toolbox to configure the Bluetooth settings.
<table>
<thead>
<tr>

<tr>
<td></td>
<td>- Yes, reset Bluetooth: Resets Bluetooth to factory default settings.</td>
</tr>
<tr>
<td></td>
<td>- No: Settings remain as they are.</td>
</tr>
</tbody>
</table>

**Reset the printer to the factory default settings**

After the printer is configured for a network, its configuration settings are saved in its memory.

Resetting the printer to its factory default settings will clear all the settings from the printer's memory for the network. This should only be done as a last resort when troubleshooting the printer.

Also, resetting the printer to its factory default settings erases the embedded Web server (EWS) administrator password.

Resetting the printer to its factory default settings might require you to reinstall the printer software. Additionally, you will also have to reconfigure the printer's security settings.

Follow these steps to reset the printer to the factory default settings:

1. Verify that the printer is powered on.
2. Press and hold down the Report Page button.
3. While holding down the Report Page button, press the Cancel button three times.
Networking glossary

numbers

10/100 Base-T: A technical term for Ethernet. 10/100 refers to the speed at which the Ethernet network functions. 10 indicates 10 megabits per second (Mb/s) for normal Ethernet, and 100 indicates 100 Mb/s for Fast Ethernet.

a

AutoIP: A process by which a device on a network automatically assigns an IP address to itself.

b

BOOTP: Bootstrap Protocol (BOOTP) is an Internet protocol that enables a device to discover its own IP address, the IP address of a BOOTP server on the network, and a file to be loaded into memory to boot the machine. This enables the device to boot without requiring a hard or floppy disk drive.

Broadcast packet: A packet sent from one device on a network to all devices on the network.

c
d

DHCP (Dynamic Host Configuration Protocol): A protocol used to automatically assign an IP address to each device on a network.

e

EAP: Extensible Authentication Protocol (EAP) is a general protocol for authentication that also supports multiple authentication methods, such as token cards, one-time passwords, certificates, and public key authentication.

Ethernet: A popular form of wired computer networking for Local Area Networks.

Ethernet cable: There are two types of Ethernet cables. A straight-through cable is the most common and is used to connect devices on a network to a hub or router. A crossover cable is used to connect two devices that have Ethernet ports but that are not hubs or routers. Use a CAT-5 cable with an RJ-45 plug to connect the printer to an Ethernet network.

f

Firewall: A combination of hardware and software tools that protects a network from unwanted entry.

g

Gateway: A dedicated device (router or computer) that connects two different networks. For example, a computer on an Ethernet network can act as a gateway between the network and the Internet.
**Host Name**: The name by which the printer identifies itself on the network. The printer's host name is displayed on the HP Report page. Use the host name to open the printer's embedded Web server (EWS).

**Hub**: A simple device that acts as the center of an Ethernet network. Other devices on the network are connected to the hub.

**ICS (Internet Connection Sharing)**: A Windows program that allows a computer to act as a gateway between the Internet and a network. ICS uses DHCP to assign IP addresses. For more information about ICS, see the Windows documentation.

**Internet Sharing**: A Macintosh OSX program that allows a computer to act as a gateway between the Internet and a network. For more information about Internet Sharing, see the Macintosh documentation.

**IP address (Internet Protocol address)**: A unique number that identifies a device on a network. The IP address is often automatically assigned by DHCP or AutoIP. However, a device can be manually assigned a static IP address.

**LAN (Local Area Network)**: A high-speed type of computer network that connects devices that are a relatively short distance from one another. An Ethernet network is one type of LAN.

**MAC address (Media Access Control address)**: The hardware address for a device on a network. The printer's MAC address is displayed on the HP Report page.

**Mb/s (megabits per second)**: The measure for the rate at which a network functions. For example, 1 Mb/s equals 1,000,000 bits per second (or 125,000 bytes per second).

**mDNS**: As an alternative to a Domain Name Server, a device issues a Multicast Domain Name Server (mDNS) notification to provide information regarding its service. The notification includes the type of service (such as printing), the name of the service (such as "your printer"), IP and port addresses, and other necessary information. Each device on the network receives the notification and stores the information in a personal DNS server.
**Packet**: A message sent from one device on a network to other devices on the network.

**Protocol**: A language that devices on a network use to communicate with each other. A popular network protocol is TCP/IP.

**RJ-45**: The type of plug at the end of an Ethernet cable.

**Router**: A complex networking device that directs packets from one network to another network. A router can act as a gateway between a LAN and the Internet.

**Static IP address**: An IP address that is manually assigned to a device on a network. A static IP address remains fixed until changed manually. Alternative methods for assigning IP address are DHCP and AutoIP.

**Subnet**: A small network that acts as part of a large network. It is recommended that the printer and the computers that use the printer all be on the same subnet.

**Subnet mask**: A number that identifies the IP addresses that belong to a subnet.

**Switch**: A network device that manages network traffic in order to minimize collisions and maximize speed.

**TCP/IP**: Transmission Control Protocol/Internet Protocol (TCP/IP) is the network communication protocol used on the Internet. The printer's built-in networking feature supports LANs that use TCP/IP.

**Unicast packet**: A packet sent from one device on a network to another device on the network.
Bluetooth wireless printing

Use an optional HP Bluetooth Wireless Printer Adapter to print images from most Bluetooth devices to the printer without a cable connection. Simply insert the Bluetooth adapter (also known as a *dongle*) into the front USB port of the printer and print from a Bluetooth device such as a PDA, camera phone, or computer. For more information, see the documentation included with the adapter.

**Configure the Bluetooth settings on the printer** by using either the printer's embedded Web server (EWS) or the printer Toolbox, depending on whether the printer is connected to a network.

The basic procedure for printing from any device with Bluetooth wireless technology is the same:

1. Have the device search for available Bluetooth printers.
2. Select the printer when it is displayed on the device.
3. Send the print job.

Check the documentation that came with the device for detailed instructions.

**Connect the HP Bluetooth Wireless Printer Adapter**

1. Insert the HP Bluetooth Wireless Printer Adapter into the front USB port of the printer.

![Front USB port](image)

2. Some Bluetooth devices exchange device addresses when they communicate with each other and establish a connection. Also, some Bluetooth devices display the name of the printer when connected.

**If the Bluetooth device requires the address of the printer**

a. Print an **HP Report page**.
   The device address of the Bluetooth printer adapter is listed in the Bluetooth settings.

b. Enter the device address into the Bluetooth device, following the instructions that came with the Bluetooth device.

**If the Bluetooth device displays the name of the printer**

Follow the instructions that came with the Bluetooth device to select the printer for printing or to change the name that is displayed for the printer.
Configure Bluetooth settings

The method to configure Bluetooth settings for the printer depends on whether the printer is connected to a network.

If your printer is not connected to a network

Note If your printer is not connected to a network, you will need a USB cable to configure the Bluetooth settings.

1. Connect a USB cable from your computer to the rear USB port on the printer.
2. Open the printer Toolbox.
3. Click the Configure Bluetooth Settings tab.
4. Configure the settings you want, and then click Apply.

If your printer is connected by Ethernet cable to a network

1. Open the printer’s embedded Web server (EWS).
2. Click the Bluetooth tab.
3. Configure the settings you want, and then click Apply.

The following table describes the Bluetooth settings:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Device Address</td>
<td>The MAC address of your Bluetooth wireless printer adapter.</td>
</tr>
<tr>
<td>Device Name</td>
<td>The device name assigned to the printer so that other Bluetooth devices can identify it.</td>
</tr>
<tr>
<td>Passkey</td>
<td>The 4-digit number you must enter before you can print using Bluetooth. The default passkey is 0000.</td>
</tr>
</tbody>
</table>

To change the Passkey

- Toolbox: Click Change Passkey, and then enter a new 4-digit number.
- EWS: Enter a new 4-digit number.

<table>
<thead>
<tr>
<th>Reset Bluetooth</th>
<th>To reset Bluetooth to factory default settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>Toolbox</td>
<td>Click Reset Device Access.</td>
</tr>
<tr>
<td>EWS</td>
<td>Click Yes, reset Bluetooth.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Visibility</th>
<th>To select the printer’s visibility to other Bluetooth devices</th>
</tr>
</thead>
<tbody>
<tr>
<td>Toolbox</td>
<td>Click the Make device visible to other Bluetooth devices check box to allow any Bluetooth device within range to discover and use the printer. If not</td>
</tr>
</tbody>
</table>
selected, only sending devices that have stored the printer’s Bluetooth device address can discover and use the printer.

- **EWS**: Select one of the following options:
  - **Visible to All**: Any Bluetooth device within range can print to the printer.
  - **Not Visible**: Only Bluetooth devices that have stored the device address of the printer can print to it.

<table>
<thead>
<tr>
<th>Security Level</th>

</tr>
</tbody>
</table>

### HP iPAQ Bluetooth printing

To print a file wirelessly using Bluetooth from the HP iPAQ Pocket PC, complete the following steps:

#### Step 1: Install Mobile Printing

Install HP Mobile Printing from a desktop computer to the Pocket PC through Microsoft ActiveSync.

1. Save the installer program (`hpmobileprinting.exe`) from [www.hp.com/go/pocketpcprint_software](http://www.hp.com/go/pocketpcprint_software) to a desktop computer.
2. Connect a Pocket PC to the desktop computer by using the ActiveSync cradle. To properly install this software, the Pocket PC must be in the ActiveSync cradle. If you need help connecting with ActiveSync, see the Pocket PC user guide.
3. Double-click `hpmobileprinting.exe` on the desktop computer. The installer program copies the necessary files to the Pocket PC.

#### Step 2: Add the printer to the printer list

1. Insert the Bluetooth wireless printer adapter into printer and press the Report Page button on the printer to print an HP Report Page.

   **Note** The printer’s default Bluetooth device name is **Deskjet 6940 series**.

2. In the iPAQ’s HP Mobile Printing program, tap **Tools**, and then tap **Print Config**.
3. Select the **Printers** tab, and then tap **Add**.
4. In the Add Printer screen, select **Network**, and then tap **Next**.
5. In the Add Bluetooth Printer screen, select **Search for a Bluetooth printer near me** to perform a search of the available local Bluetooth devices.
6. After the search has completed, select the printer by its Bluetooth name and tap **Next**.
7. Select a manufacturer and model.
8. As appropriate, select from the following check boxes:
   – **Enable raw file type**: Sends an unprocessed file (such as .PDF) directly to the printer.
   – **Set as default printer**: Sets the current printer as the default printer.
9. Tap **Finish**. The Configuration screen is displayed.
10. Tap **OK** on the Configuration screen. The My Printers screen is displayed with the added printer.

**Step 3: Print a file**

![Note] See [www.hp.com/go/pocketpcprint](http://www.hp.com/go/pocketpcprint) for supported file types.

1. Open HP Mobile Printing and tap the **File View** icon on the command bar.
2. Do one of the following tasks:
   – **To display the files on the Pocket PC**: Tap the **My Device** icon on the command bar.
   – **To display the files on the network**: Tap the **Network** icon on the command bar, type the path name, and then tap **OK**. You might be prompted to enter a user name and password.
3. Select the file to print.
4. Tap **Print**.
5. Select the printer from the printer list, and then tap **Print**.
Print photos

The printer software offers several features that make printing digital photos easier and improve photo quality.

Learn how to perform the following tasks:

- Print a borderless photo.
- Print a photo with a border.
- Use HP Real Life technologies to touch up photos.
- Use the photo print cartridge for great colors and virtually grain-free photos.
- Use the gray photo print cartridge for outstanding black-and-white photos.
- Achieve the highest printing resolution with maximum dpi.
- Improve printed colors with the following software options:
  - Advanced color settings
  - Color management
- Print an Exif Print-formatted photo if you have Exif Print-enabled software.
- Prevent photo paper from curling by following the photo paper storage and handling guidelines.
- Use HP Everyday Photo Paper to save money and ink when printing photos.

Print borderless photos

Use borderless printing to print to the edges of certain paper types and to print on a range of paper sizes—from 3 x 5 inch photo paper to a 210 x 594 mm (8.5 x 23.4 inch) custom photo size.

Guidelines

- For high-quality results, use a photo print cartridge in combination with the tri-color print cartridge.
- Do not print borderless photos in ink-backup mode. Always have two print cartridges installed in the printer.
- Open the file in a software program such as HP Photosmart Software or Adobe Photoshop and assign the photo size. Ensure that the size corresponds to the paper size on which you want to print the photo.
- If you installed HP Photosmart Software, you can use it to stitch together panoramic digital photos before printing them.
- For maximum fade resistance, use HP Premium Plus Photo Paper.
- Verify that the photo paper that you are using is flat. For information about preventing photo paper from curling, see the photo paper storage instructions.
- Do not exceed the In tray capacity: 25 sheets of photo paper.

Prepare to print

To print a single small photo, use the photo/envelope feeder.
To print larger or multiple photos, follow these steps:

1. Verify that the printer is turned on.
2. For small photos, remove the Out tray. For large photos, raise the Out tray. Remove all of the paper from the In tray.
3. Slide the paper-width guide all the way to the left, and then pull out the paper-length guide.
4. Verify that the photo paper is flat.
5. Place the photo paper in the In tray, with the side to be printed on facing down. If you are using photo paper with a tear-off tab, verify that the tab is pointing away from the printer.
6. Slide the paper guides firmly against the paper.
7. For small photos, replace the Out tray. For large photos, lower the Out tray.

Print

- **Note** If the software program includes a photo printing feature, follow the instructions that are provided with the software program. Otherwise, follow these instructions.

1. Open the photo in an application that allows editing, such as HP Photosmart Software or Adobe Photoshop.
2. Open the **Printer Properties** dialog box.
3. Click the **Printing Shortcuts** tab.
4. In the What do you want to do? drop-down list, click Photo Printing-
Borderless, and then select the following options:
   – Print Quality: Normal or Best.
      
      Note For maximum dpi quality, go to the Paper/Quality tab, and then click Maximum dpi in the Print Quality drop-down list.
   – Paper Type: An appropriate photo paper type
   – Paper Size: An appropriate borderless photo paper size
   – Orientation: Portrait or Landscape
5. Set the HP Real Life technologies as appropriate.
6. Click OK to print the photo.
   If you printed on photo paper with a tear-off tab, remove the tab to make the
document completely borderless.

Use the What's This? help to learn about the features that appear in the Printer Properties
dialog box.

Print photos with a border

Follow these instructions to print photos with a white border.

Guidelines

● For high-quality results, use a photo print cartridge in combination with the tri-color print cartridge.
● For maximum fade resistance, use HP Premium Plus Photo Paper.
● Open the file in a software program such as HP Photosmart Software or Adobe Photoshop and assign the photo size. Ensure that the size corresponds to the paper size on which you want to print the photo.
● If you installed HP Photosmart Software, you can use it to stitch together panoramic digital photos before printing them.
● Verify that the photo paper that you are using is flat. For information about preventing photo paper from curling, see the photo paper storage instructions.
● Do not exceed the In tray capacity: 25 sheets of photo paper.

Prepare to print

To print a single small photo, use the photo/envelope feeder.

To print larger or multiple photos, follow these steps:
1. Verify that the printer is turned on.
2. For small photos, remove the Out tray. For large photos, raise the Out tray. Remove all of the paper from the In tray.
3. Slide the paper-width guide all the way to the left, and then pull out the paper-length guide.
4. Verify that the photo paper is flat.
5. Place the photo paper in the In tray with the side to be printed on facing down.
6. Slide the paper guides firmly against the paper.
Note Some panoramic paper sizes might extend beyond the edge of the In tray.

7. For small photos, replace the Out tray. For large photos, lower the Out tray.

Print

Note If the software program includes a photo printing feature, follow the instructions that are provided with the software program. Otherwise, follow these instructions.

1. Open the photo in an application that allows editing, such as HP Photosmart Software or Adobe Photoshop.
2. Open the Printer Properties dialog box.
3. Click the Printing Shortcuts tab.
4. In the What do you want to do? drop-down list, click Photo printing-with white borders, and then select the following options:
   - **Print Quality**: Normal or Best
     - Note For maximum dpi quality, go to the Paper/Quality tab, and then click Maximum dpi in the Print Quality drop-down list.
   - **Paper Type**: An appropriate photo paper type
   - **Paper Size**: An appropriate photo paper size
   - **Orientation**: Portrait or Landscape
5. Set the **HP Real Life technologies** as appropriate.
6. Click **OK** to print the photo.

Use the **What's This? help** to learn about the features that appear in the Printer Properties dialog box.

### HP Real Life technologies

HP Real Life technologies make it easy for you to get better photos. Automatic red-eye removal and adaptive lighting to enhance detail in shadows are just a few of the technologies included.

#### Open HP Real Life technologies

Follow these steps to open the HP Real Life technologies dialog box:

1. Open the **Printer Properties** dialog box.
2. Click the **Paper/Quality** tab, and then click the **Real Life Digital Photography** button.

#### Use HP Real Life technologies

Use the HP Real Life technologies dialog box to set these options:

1. **Automatic Red-Eye Removal**: Click **On** to automatically remove or reduce red-eye in the photo.
2. **Photo Brightening**: Automatically enhance colors and contrast for washed-out photos. Click **Automatic** to allow the printer software to intelligently brighten the photo, focusing only on areas that need adjustment.
3. **Adaptive Lighting**: Adjust the exposure in dark areas of photos to bring out detail. Click **Automatic** to allow the printer software to balance lightness and darkness automatically.
4. **SmartFocus**: Enhance the image quality and clarity of low resolution images such as those downloaded from the Internet. Click **On** to allow the printer software to sharpen details in the image automatically.
5. **Sharpness**: Adjust the image sharpness to your preference. Click **Automatic** to allow the printer software to set the level of sharpening for the image automatically.
6. **Smoothing**: Soften an image. Click **Automatic** to allow the printer software to set the level of smoothing for the image automatically.

**Note** If you installed HP Photosmart Software, you can use it to edit and further enhance digital photos.

### Photo print cartridge

The photo print cartridge, when used in conjunction with the tri-color print cartridge, provides virtually grain-free photos. It offers exceptional fade resistance for photos that are printed on HP Premium Plus Photo Paper.
The photo print cartridge can be purchased separately if it is not included with the printer.

**Install the photo print cartridge**

To install the photo print cartridge, remove the black print cartridge from the printer, and then install the photo print cartridge in the right side of the print cartridge cradle.

*Note* To protect a print cartridge when it is not in the printer, follow these storage guidelines.

**Use the photo print cartridge**

1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab.
3. In the What do you want to do? drop-down list, click either Photo Printing-borderless or Photo Printing-with white borders.
4. In the Print Quality drop-down list, click Normal or Best.

*Note* For maximum dpi quality, on the Paper/Quality tab, click Maximum dpi in the Print Quality drop-down list.

5. In the Paper Type drop-down list, click the appropriate photo paper type.
6. Select any other print settings that you want, and then click OK.

**Store the photo print cartridge**

Follow these guidelines when storing the photo print cartridge.

---

### Maximum dpi

The maximum dpi print quality setting offers 4800 x 1200 optimized dots per inch (dpi) printing.

The 4800 x 1200 optimized dpi is the highest quality resolution for this printer. When 4800 x 1200 optimized dpi is selected in the printer software, the tri-color print cartridge prints in the 4800 x 1200 optimized dpi mode (up to 4800 x 1200 optimized dpi color and 1200-input dpi).

If a photo print cartridge is also installed, the print quality is enhanced. A photo print cartridge can be purchased separately if it is not included with the printer.

*Note* Using maximum dpi increases the printing time and requires a large amount of disk space.

Follow these steps to print in the 4800 x 1200 optimized dpi mode:

1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab.
3. In the Type is drop-down list, click More, and then select the appropriate photo paper type.
4. In the Print Quality drop-down list, click Maximum dpi.
5. Select any other print settings that you want, and then click OK.
Note  Use an HP premium photo paper when printing in the maximum dpi mode to enhance color matching and detail in the photo.

Advanced color settings

Use the Advanced color settings dialog box to adjust how printed colors appear in the photos.

Adjusting these settings causes the printed colors to differ from the colors that appear on the computer monitor.

To specify advanced color settings, follow these steps:

1. Open the Printer Properties dialog box.
2. Click the Color tab, and then click the Advanced Color Settings button. The Advanced Color Settings dialog box is displayed.
3. You can adjust the following settings:
   - **Advanced color settings**: Adjust the Saturation, Brightness, and Color Tone to affect how overall colors are printed.
   - **Specific color settings**: Adjust the Cyan, Magenta, Yellow, and Black sliders to specify the level of each color that is used in printing.

   Note  When you adjust color settings, the changes are reflected in the Preview box.

4. After specifying the color settings, click OK.
5. Select any other print settings that you want, and then click OK.

Color management

Color management defines the range of colors that can be printed. The printer software translates the colors of the photo from the current color settings to the color management option that is selected.

Follow these steps to select a color management option:

1. Open the Printer Properties dialog box.
2. Click the Color tab.
3. Click one of the following options in the Color Management drop-down list:
   - **ColorSmart/sRGB**: ColorSmart/sRGB is an appropriate option for most print jobs. It is used for most Web-based documents and current imaging devices.
   - **AdobeRGB**: When using AdobeRGB to print from a professional software program, turn off the color management in the program and allow the printer software to manage the color space. Use the AdobeRGB setting for photos that were originally created in the AdobeRGB color space.
   - **Managed by Application**: Use this option to allow the program from which you are printing to manage the color of the photo.
   - **ICM (Image Color Management)**: ICM is a Microsoft technology that helps ensure that a color image, graphic or text object is printed as close as possible to its original color and helps keep its colors consistent and accurate.

4. Select any other print settings that you want, and then click OK.
Gray photo print cartridge

The gray photo print cartridge, used in conjunction with the tri-color print cartridge, prints high-quality black-and-white photographs.

The gray photo print cartridge can be purchased separately if it is not included with the product.

Install the gray photo print cartridge
To install the gray photo print cartridge, remove the black print cartridge from the printer, and then install the gray photo print cartridge in the compartment on the right of the print cartridge cradle.
For more information, see the print cartridge installation page.

Use the gray photo print cartridge
To use the gray photo print cartridge, follow the steps to print a black-and-white photo.

Store the gray photo print cartridge
To maintain the health of the print cartridge, follow the print cartridge storage guidelines.

Exif Print

Exif Print (Exchangeable Image File Format 2.2) is an international digital imaging standard that simplifies digital photography and enhances printed photos. When a photo is taken with an Exif Print-enabled digital camera, Exif Print captures information such as exposure time, type of flash, and color saturation, and stores it in the image file. The HP Deskjet printer software then uses this information to automatically perform image-specific enhancements to create outstanding photos.

To print Exif Print-enhanced photos, you must have the following items:

● A digital camera that supports Exif Print
● Exif Print-enabled photo software

Follow these steps to print Exif Print-enhanced photos:
1. Open the photo in an application that allows editing, such as HP Photosmart Software or Adobe Photoshop.
2. Open the Printer Properties dialog box.
3. Click the Paper/Quality tab.
4. In the Type is drop-down list, click More, and then select the appropriate photo paper type.
5. In the **Print Quality** drop-down list, click **Normal**, **Best**, or **Maximum dpi**.

6. Select any other print settings that you want, and then click **OK**.

The printer software automatically optimizes the printed image.

### Store and handle photo paper

Follow these instructions to maintain the quality of HP brand photo paper.

**Storage**

- Keep unused photo paper in a plastic bag. Store the packaged photo paper on a flat surface in a cool place.
- When you are ready to print, remove only the paper that you plan to use immediately from the plastic bag. When you have finished printing, return any unused photo paper to the plastic bag.
- Do not leave unused photo paper in the paper tray. The paper might start to curl, which can reduce the quality of the photos.

**Handling**

- Always hold photo paper by its edges. Fingerprints on photo paper can reduce print quality.
- If the corners of the photo paper curl more than 10 mm (0.4 inch), flatten the paper by putting it in the storage bag, and then gently bending it in the opposite direction of the curl until the paper lies flat.

Photo paper should be flat before it is printed on.

### Save money when printing photos

To save money and ink when printing photos, use HP Everyday Photo Paper and set the **print quality** to **Normal**.

HP Everyday Photo Paper is designed to create quality photos with less ink.

**Note**  For higher-quality photos, use HP Premium Plus Photo Paper and set the print quality to **Best** or **Maximum dpi**.

### Other photo projects

HP Photosmart Software coordinates the functions of HP imaging devices: scanners, cameras, printers, and all-in-one devices. Depending on the devices you have installed and their capabilities, you can quickly and easily organize, edit, and share digital images.

**Organize, edit, and share digital images in creative ways**

If you performed the default typical installation of the printer software, you also installed HP Photosmart Software. Use HP Photosmart Software to easily:

- Print photos and digital images
- Transfer images from a camera or memory card
- View images as a slide show
- Edit images
Create photo album pages and flyers
Share photos with friends and family

Share photos with friends and family

If you performed the default typical installation of the printer software, you also installed HP Photosmart Software. If you have installed HP Photosmart Software, see the HP Photosmart Software help to learn about how you can use the software to easily select and share images by e-mail without the use of large file attachments.
6 Print photos from a digital camera

Learn how to print photos directly from a digital camera.

- Use a PictBridge camera
- Use a Bluetooth camera phone

Use a PictBridge camera

With a PictBridge-enabled camera, you do not need a computer to print digital photographs. Just plug the camera into the printer's front USB port.

Note Other than PictBridge-compatible cameras and Bluetooth dongles, do not plug other USB devices into the front USB port.

When a PictBridge-enabled camera is connected to the front USB port, the default printer settings will print a 4 x 6 inch borderless photo with portrait orientation. For detailed information on printing from the camera, see the documentation that came with the camera.

PictBridge printing

In order to print photos directly from a digital camera, you need the following items:

- A PictBridge-compatible camera
- A digital camera USB cable
Check the documentation that came with the camera to ensure that the camera supports PictBridge.

Follow these steps to print photos from a PictBridge-compatible camera:

1. Verify that the printer is turned on.
2. For small photos, remove the Out tray. For large photos, raise the Out tray. Remove all of the paper from the In tray.
3. Slide the paper-width guide all the way to the left, and then pull out the paper-length guide.
4. Place the photo paper in the In tray, with the side to be printed on facing down.
5. Slide the paper guides firmly against the paper.
6. For small photos, replace the Out tray. For large photos, lower the Out tray.
7. Connect the camera to the front USB port on the printer using the USB cable supplied with the camera.
8. Turn on the camera, and then set it to PictBridge mode.
   If you do not know how to set the camera to PictBridge mode, see the documentation that came with the camera.

   \textbf{Note} When the camera is connected correctly, the Connection light is illuminated. The Connection light blinks green when printing from the camera. If the camera is not PictBridge-compatible or is not in PictBridge mode, the Error light flashes.

---

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Connection light</td>
</tr>
<tr>
<td>2</td>
<td>Error light</td>
</tr>
</tbody>
</table>

After you successfully connect the camera to the printer, you can print the photos. Be sure the size of the paper loaded in the printer matches the setting on the camera. See the documentation that came with the camera for detailed information on printing from the camera.

**Use a Bluetooth camera phone**

If you have a camera phone with Bluetooth wireless technology, you can purchase an \textit{optional HP Bluetooth Wireless Printer Adapter} and print from the camera phone using a Bluetooth wireless connection.
**Print photos from a Bluetooth camera phone**

1. Verify that the printer is turned on.
2. For small photos, remove the Out tray. For large photos, raise the Out tray. Remove all of the paper from the In tray.
3. Slide the paper-width guide all the way to the left, and then pull out the paper-length guide.
4. Place the photo paper in the In tray, with the side to be printed on facing down. If you are using photo paper with a tear-off tab, verify that the tab is pointing away from the printer.
5. Slide the paper guides firmly against the paper.
6. For small photos, replace the Out tray. For large photos, lower the Out tray.
7. Insert the HP Bluetooth Wireless Printer Adapter into the front USB port of the printer.

![Front USB port](image)

The light on the adapter indicates its status:

<table>
<thead>
<tr>
<th>Display</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Double-blinking once a second</td>
<td>The device is installed and has power.</td>
</tr>
<tr>
<td>Rapid blinking</td>
<td>A sending device is discovering the HP wireless printer adapter.</td>
</tr>
<tr>
<td>On steady</td>
<td>The HP wireless printer adapter is receiving data.</td>
</tr>
</tbody>
</table>

8. Follow the instructions in the documentation that came with the digital camera to send photos to the printer.
Print other documents

E-mail  Letters  Documents  Envelopes
Brochures  Greeting cards  Postcards  Transparencies
Labels  Index cards  Booklets  Posters
Banners  Iron-on transfers  CD/DVD tattoos

**Printing tips:** Minimize the cost and effort while maximizing the quality of the printouts with printing tips.

**Printer software:** Learn about the printer software.

**E-mail**

**Guidelines**
Do not exceed the In tray capacity: 150 sheets of plain paper.

**Prepare to print**
1. Verify that the printer is turned on.
2. Raise the Out tray.
3. Slide the paper-width guide all the way to the left, and then pull out the paper-length guide.
4. Place plain paper in the In tray, pushing the paper into the printer until it stops.
5. Slide the paper guides firmly against the paper.
6. Lower the Out tray.

**Print**
1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab.
3. In the What do you want to do? drop-down list, click General Everyday Printing or Fast/Economical Printing, and then specify the following print settings:
   - Paper Type: Automatic or Plain paper
   - Paper Size: An appropriate paper size
4. Select the following print settings as appropriate:
   - Print Quality
   - Paper Source
   - Print In Grayscale
5. Select any other print settings that you want, and then click OK.

Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.

**Letters**

**Guidelines**
- Learn how to add a watermark to the letter.
- For help printing on an envelope, see envelopes.
- Do not exceed the In tray capacity: 150 sheets of paper.

**Prepare to print**
1. Verify that the printer is turned on.
2.Raise the Out tray.
3. Slide the paper-width guide all the way to the left, and then pull out the paper-length guide.
4. Place the paper in the In tray, pushing the paper into the printer until it stops.
   
   **Note** If you are using letterhead paper, verify that the letterhead is facing down and toward the interior of the printer.
5. Slide the paper guides firmly against the paper.
6. Lower the Out tray.
   Do not extend the Out-tray extension stop when printing on legal paper.

Print
1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab.
3. In the What do you want to do? drop-down list, click Presentation Printing, and then specify the following print settings:
   - Paper Type: Automatic or Plain paper
   - Paper Size: An appropriate paper size
4. Select the following print settings as appropriate:
   - Print Quality
   - Paper Source
5. Select any other print settings that you want, and then click OK.

Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.

Documents

Guidelines
● For draft documents, use Fast/economical printing.
● Save paper with two-sided printing.
● Learn how to add a watermark to the document.
● Do not exceed the In tray capacity: 150 sheets of paper.

Prepare to print
1. Verify that the printer is turned on.
2. Raise the Out tray.
3. Slide the paper-width guide all the way to the left, and then pull out the paper-length guide.
4. Place plain paper in the In tray, pushing the paper into the printer until it stops.
5. Slide the paper guides firmly against the paper.
6. Lower the Out tray. Do not extend the Out-tray extension stop when printing on legal paper.

**Print**
1. Open the Printer Properties box.
2. Click the Printing Shortcuts tab.
3. In the What do you want to do? drop-down list, click General Everyday Printing or Presentation Printing, and then specify the following print settings:
   - Paper Type: Automatic or Plain paper
   - Paper Size: An appropriate paper size
4. Select the following print settings:
   - Print Quality
   - Paper Source
   - Print On Both Sides if you want to print on both sides of the paper
5. Select any other print settings that you want, and then click OK.

Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.

**Envelopes**
Guidelines

- Avoid using envelopes that have the following features:
  - Clasps or windows
  - Thick, irregular, or curled edges
  - Shiny or embossed coatings
  - Wrinkles, tears, or other damage
- Align the envelope edges before inserting the envelopes in the In tray.
- Do not exceed the In tray capacity: 20 envelopes.

Prepare to print

To print a single envelope, use the photo/envelope feeder.

To print multiple envelopes, follow these steps:

1. Verify that the printer is turned on.
2. Remove the Out tray, and then remove all paper from the In tray.
3. Slide the paper-width guide all the way to the left, and then pull out the paper-length guide.
4. Place the envelopes in the In tray, as far to the right as possible.
   - The side to be printed on should face down and the flap should be on the left.
5. Push the envelopes into the printer until they stop.
6. Slide the paper guides firmly against the envelopes.
7. Replace the Out tray.

Print

1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab, and then select the following print settings:
   - Size is: An appropriate envelope size
   - Type is: Automatic or Plain paper
3. Select any other print settings that you want, and then click OK.

Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.

Brochures
Guidelines

- Do not print borderless documents in ink-backup mode. Always have two print cartridges installed in the printer.
- Open the file in a software program and assign the brochure size. Ensure that the size corresponds to the paper size on which you want to print the brochure.
- Do not exceed the In tray capacity: 25 sheets of brochure paper.

Prepare to print

1. Verify that the printer is turned on.
2. Raise the Out tray.
3. Slide the paper-width guide all the way to the left, and then pull out the paper-length guide.
4. Place brochure paper in the In tray, pushing the paper into the printer until it stops.
5. Slide the paper guides firmly against the paper.
6. Lower the Out tray.

Print borderless brochures

1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab, and then specify the following print settings:
   - **Size is**: An appropriate paper size
   - **Type is**: Click More, and then select an appropriate brochure paper or other paper type.
     Do not select Automatic.

   ![Printer](image)

   Note Not all paper sizes and types are available for borderless printing.

3. Select the Borderless Printing check box.
4. Set the print quality to Best.
5. Click the Finishing tab, set the orientation, and then select Print on both sides to print on both sides of the paper.
   For more information, see Two-sided printing.
6. Click OK to print.

Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.
Print brochures with borders
1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab.
3. In the What do you want to do? drop-down list, click Presentation Printing, and then specify the following print settings:
   – **Paper Type**: An appropriate brochure paper. Do not select Automatic.
   – **Paper Size**: An appropriate paper size
4. Select the following print settings as appropriate:
   – Print Quality
   – Print In Grayscale
   – Print On Both Sides
5. Select any other print settings that you want, and then click OK.

Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.

Greeting cards

**Guidelines**
- Unfold prefolded cards, and then place them in the In tray.
- Do not exceed the In tray capacity: 30 cards.

Prepare to print
1. Verify that the printer is turned on.
2. Raise the Out tray, and then remove all paper from the In tray.
3. Slide the paper-width guide all the way to the left, and then pull out the paper-length guide.
4. Fan the edges of the greeting cards to separate them, and then align the edges.
5. Place the greeting cards in the In tray, with the side to be printed on facing down.
6. Push the cards into the printer until they stop.
7. Slide the paper guides firmly against the paper.
8. Lower the Out tray.
Print

Note If the software program includes a greeting card printing feature, follow the instructions that are provided with the software program. Otherwise, follow the instructions below.

1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab, and then specify the following print settings.
   - Size is: An appropriate card size
   - Source is: Upper tray
   - Type is: Click More, and then select an appropriate card type.
   - Print Quality: Normal
3. Select any other print settings that you want, and then click OK.

Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.

Postcards

If the optional Auto Two-Sided Print Accessory with Small Paper Tray is attached to the printer, follow the steps for printing postcards with the Auto Two-Sided Print Accessory with Small Paper Tray.

Guidelines

- Use only cards that meet the paper size specifications for the printer. For specifications, see the reference guide that came with the printer.
- Do not exceed the In tray capacity: 60 cards.

Prepare to print

To print a single card, use the photo/envelope feeder.

To print multiple cards, follow these steps:

1. Verify that the printer is turned on.
2. Remove the Out tray, and then remove all paper from the In tray.
3. Slide the paper-width guide all the way to the left, and then pull out the paper-length guide.
4. Place the cards in the In tray, as far to the right as possible.
   The side to be printed on should face down and the short edge should point toward the printer.
5. Push the cards into the printer until they stop.
6. Slide the paper guides firmly against the edge of the cards.
7. Replace the Out tray.

**Print**

1. Open the **Printer Properties** dialog box.
2. Click the **Paper/Quality** tab, and then specify the following print settings:
   - **Size is**: An appropriate card size
   - **Type is**: **Automatic** or click **More**, and then select an appropriate card type
   - **Source is**: **Upper tray**
   - **Print Quality**: **Normal** or **Best**
3. Select any other print settings that you want, and then click **OK**.

Use the **What's This? help** to learn about the features that appear in the Printer Properties dialog box.

**Transparencies**

**Guidelines**

Do not exceed the In tray capacity: 30 transparencies.

**Prepare to print**

1. Verify that the printer is turned on.
2. Raise the Out tray, and then remove all paper from the In tray.
3. Slide the paper-width guide all the way to the left, and then pull out the paper-length guide.
4. Place the transparencies in the In tray.
   - The side to be printed on should face down and the adhesive strip should face up and toward the printer.
5. Carefully push the transparencies into the printer until they stop, so that none of the adhesive strips catch on one another.
6. Slide the paper guides firmly against the transparencies.
7. Lower the Out tray.

**Print**

1. Open the **Printer Properties** dialog box.
2. Click the **Printing Shortcuts** tab.
3. In the **What do you want to do?** drop-down list, click **Presentation Printing**, and then specify the following print settings:
   - **Paper Type**: Automatic or click **More**, and then select an appropriate transparency film.
   - **Paper Size**: An appropriate paper size
   - **Paper Source**: Upper Tray

4. Select the following print settings as appropriate:
   - Print Quality
   - Print In Grayscale

5. Select any other print settings that you want, and then click **OK**.

Use the **What's This? help** to learn about the features that appear on the Printer Properties dialog box.

---

### Labels

**Guidelines**

- Use only paper, plastic, or clear labels that are designed specifically for inkjet printers.
- Use only full sheets of labels.
- Avoid using labels that are sticky, wrinkled, or pulling away from the protective backing.
- Do not exceed the In tray capacity: 30 sheets of labels (use only Letter or A4-size sheets).

**Prepare to print**

1. Verify that the printer is turned on.
2. Raise the Out tray, and then remove all paper from the In tray.
3. Slide the paper-width guide all the way to the left, and then pull out the paper-length guide.
4. Fan the edges of the label sheets to separate them, and then align the edges.
5. Place the label sheets in the In tray with the label side facing down.
6. Push the sheets into the printer until they stop.
7. Slide the paper guides firmly against the sheets.

8. Lower the Out tray.
Print

Note If the software program includes a label printing feature, follow the instructions that are provided with the software program. Otherwise, follow the instructions below.

1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab.
3. In the What do you want to do? drop-down list, click General Everyday Printing, and then specify the following print settings:
   – Paper Type: Automatic or Plain paper
   – Paper Size: An appropriate paper size
   – Paper Source: Upper Tray
4. Select the following print settings as appropriate:
   – Print Quality
   – Print In Grayscale
5. Select any other print settings that you want, and then click OK.
Use the What's This help to learn about the features that appear in the Printer Properties dialog box.

Index cards and other small media

If the optional Auto Two-Sided Print Accessory with Small Paper Tray is attached to the printer, follow the small media printing steps for the Auto Two-Sided Print Accessory with Small Paper Tray.

Guidelines

● Use only cards and small media that meet the paper size specifications for the printer. For specifications, see the reference guide that came with the printer.
● Do not exceed the In tray capacity: 60 cards.

Prepare to print

1. Verify that the printer is turned on.
2. Remove the Out tray, and then remove all paper from the In tray.
3. Slide the paper-width guide all the way to the left, and then pull out the paper-length guide.
4. Place the cards in the In tray, as far to the right as possible.
   The side to be printed on should face down and the short edge should point toward the printer.
5. Push the cards into the printer until they stop.
6. Slide the paper guides firmly against the cards.
7. Replace the Out tray.

Print
1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab, and then specify the following print settings:
   – **Size is**: An appropriate card size
   – **Type is**: Click More, and then select an appropriate card type.
   – **Source is**: Upper tray
3. Select any other print settings that you want, and then click **OK**.

Use the What's This? help to learn about the features that appear on the Printer Properties dialog box.

**Booklets**

If an optional two-sided printing accessory is attached to the printer, follow the steps to print a booklet automatically.

Booklet printing automatically arranges and resizes the pages of a document so that when the document is folded into a booklet, the page order is correct. For example, when a four-page booklet is printed on both sides of the paper, the pages are reordered and printed like this:

**Guidelines**

Do not exceed the In tray capacity: 150 sheets of paper.

**Prepare to print**
1. Verify that the printer is turned on.
2. Raise the Out tray.
3. Slide the paper-width guide all the way to the left, and then pull out the paper-length guide.
4. Place plain paper in the In tray, pushing the paper into the printer until it stops.
5. Slide the paper guides firmly against the paper.

6. Lower the Out tray.

**Print**
1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab.
3. In the What do you want to do? drop-down list, click Booklet Printing.
4. In the Print On Both Sides drop-down list, click one of the following binding options:
   - Left Edge Booklet
   - Right Edge Booklet
5. Select any other print settings that you want, and then click OK.
6. When prompted, reload the printed pages in the In tray as shown below.

7. Click Continue to finish printing the booklet.

Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.

**Posters**
Guidelines

- After the sections of a poster have been printed, trim the edges of the sheets and tape the sheets together.

- Do not exceed the In tray capacity: 150 sheets of paper.

Prepare to print

1. Verify that the printer is turned on.
2. Raise the Out tray.
3. Slide the paper-width guide all the way to the left, and then pull out the paper-length guide.
4. Place plain paper in the In tray, pushing the paper into the printer until it stops.
5. Slide the paper guides firmly against the paper.
6. Lower the Out tray.

Print

1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab, and then specify the following print settings:
   - **Size is**: An appropriate paper size
   - **Source is**: Upper tray
   - **Type is**: Automatic or Plain paper
3. Click the Finishing tab, and then specify the following print settings:
   – Pages Per Sheet and Posters: Poster 2 x 2, Poster 3 x 3, Poster 4 x 4, or Poster 5 x 5
   – Orientation: Portrait or Landscape
4. Select any other print settings that you want, and then click OK.

Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.

Iron-on transfers

Guidelines
● When printing a mirror image, the text and the pictures are horizontally reversed from what is displayed on the computer screen.

● Do not exceed the In tray capacity: 20 iron-on transfers.

Prepare to print
1. Verify that the printer is turned on.
2. Raise the Out tray, and then remove all paper from the In tray.
3. Slide the paper-width guide all the way to the left, and then pull out the paper-length guide.
4. Place the iron-on transfer paper in the In tray, with the side to be printed on facing down.
5. Push the paper into the printer until it stops.
6. Slide the paper guides firmly against the paper.

7. Lower the Out tray.
Print

Note If the software program includes an iron-on transfer printing feature, follow the instructions that are provided with the software program. Otherwise, follow the instructions below.

1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab, and then specify the following print settings:
   – **Size is**: An appropriate paper size
   – **Type is**: Click More, and then select **HP Iron-on Transfer**.
   – **Source is**: Upper tray
   – **Print Quality**: Normal or Best
3. Click the Finishing tab.
4. Select the **Mirror Image** check box.

Note Some iron-on transfer software programs do not require you to print a mirror image.

5. Select any other print settings that you want, and then click **OK**.
Use the **What's This? help** to learn about the features that appear in the Printer Properties dialog box.

Banners

Guidelines

- Remove any perforated strips from the banner paper before loading it in the In tray.

- Do not exceed the In-tray capacity: 20 sheets.

Prepare to print

1. Verify that the printer is turned on.
2. Remove the Out tray, and then remove all paper from the In tray.
3. Slide the paper width-guide all the way to the left, and then pull out the paper-length guide.
4. Place the banner paper in the In tray so that the unattached edge is on top of the paper stack and pointing toward the printer.
5. Slide the paper-width guide firmly against the paper.

Note Leave the Out tray off of the printer when printing a banner.

Print
1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab, and then specify the following print settings:
   - **Size is:** Letter or A4
   - **Source is:** Upper tray
   - **Type is:** HP Banner Paper
3. Select any other print settings that you want, and then click **OK**.

Use the What's This? help to learn about the features that you see in the Printer Properties dialog box.

**CD/DVD tattoos**

**Guidelines**
- Refer to the instructions that are included with the media for the most current printing tips.
- To avoid damage to the printer, do not feed a sheet of tattoos through the printer more than once.
- Separating any part of the tattoo from the protective backing sheet before printing could harm the printer. Be sure that the tattoo covers the entire backing sheet with no exposed spaces.
- Do not use tattoos that are separating from the backing sheet, or that are wrinkled, curled, or damaged in any way.
- If the tattoo sheets do not easily feed through the printer, try one of the following suggestions:
  - Do not load the In tray to capacity.
  - Fan the stack of tattoos.
  - Feed the tattoos one sheet at a time.
Prepare to print
1. Verify that the printer is turned on.
2. Remove the Out tray, and then remove all paper from the In tray.
3. Slide the paper-width guide all the way to the left, and then pull out the paper-length guide.
4. Insert one sheet, pushing it all the way into the printer until it stops.
5. Slide the paper guides firmly against the sheet.
6. Replace the Out tray.

Print

Note Before printing a tattoo, print a practice page to test the layout of the design. The design might need to be adjusted slightly.

1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab, and then specify the following print settings:
   – Size is: Letter or A4
   – Source is: Upper tray
   – Type is: HP CD/DVD Tattoo

   Note Selecting this paper type automatically results in a mirrored image.

3. Select any other print settings that you want, and then click OK.
8 Printing tips

Save time
● Use the Printing Shortcuts tab.
● Create print task quick sets for documents that you often print.
● Use the 250-Sheet Plain Paper Tray Accessory to reload the printer less often.
● Set the order that the pages print.

Save money
● Use Fast/economical printing.
● Print multiple pages on a single sheet of paper.
● Print a two-sided document either automatically or manually.
● Use HP Everyday Photo Paper to save money and ink when printing photos.

Enhance the quality of printouts
● Preview the document before printing it.
● Print on a custom paper size.
● Select the correct paper type.
● Select the correct print quality.
● Resize the document as needed.
● Add a watermark.
● Print a borderless brochure.

Printing shortcuts
The Printing Shortcuts tab makes it easy to set the printing options for the documents that you want to print.

Use the Printing Shortcuts tab for the following print tasks:
● General everyday printing
● Photo printing–borderless
● Photo printing–with white borders
● Fast/economical printing
● Presentation printing
● Two-sided, duplex, printing
● Postcard printing

Fast/economical printing
Use Fast/economical printing to produce draft-quality printouts quickly.

Follow these steps to use Fast/economical printing:
1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab.
3. In the What do you want to do? drop-down list, click Fast/Economical Printing.
4. Specify the print settings that you want.
5. Click OK.

Use the What's This? help to learn about the features you see on the Printer Properties dialog box.

**General everyday printing**

Use General everyday printing to print documents quickly.

- **Documents**
- **E-mail**

**Presentation printing**

Use Presentation printing to print high-quality documents, including:

- **Letters**
- **Brochures**
- **Transparencies**

**Print in grayscale**

Follow these steps to print in grayscale:

1. Open the Printer Properties dialog box.
2. Click the **Color** tab.
3. Click the **Print In Grayscale** check box, and then click one of the following:
   - **High Quality**: Use this option for photos and other high-quality printouts.
   - **Black Print Cartridge Only**: Use this option for fast, economical printing.
4. Select any other print settings that you want, and then click OK.

**Select a print quality**

Follow these steps to select a print quality:

1. Open the Printer Properties dialog box.
2. Click the **Printing Shortcuts** tab.
3. Click one of the following options in the **Print quality** drop-down list:
   - **Fast Draft**: Prints at the fastest printing speed while using the least amount of ink.
   - **Fast Normal**: Prints more quickly than Normal mode and at a higher print quality than Fast Draft.
   - **Normal**: Provides the best balance between print quality and speed. This is the appropriate setting for most documents.
   - **Best**: Provides high-quality printing.
   - **Maximum dpi**: Provides the highest quality printing, but requires longer to print than **Best** and requires a large amount of disk space.
Note Maximum dpi is available on the Paper/Quality tab.

4. Select any other print settings that you want, and then click OK.

Note The print quality options that are available on the Printing Shortcuts tab vary depending on the type of document that you are printing.

Set the page order
The page order determines the order in which the multipage documents print.

To set the page order, follow these steps:
1. Open the Printer Properties dialog box.
2. Click the Advanced tab.
3. Click Document Options, and then click Layout Options.
4. Select one of the following Page Order options:
   – Front to back: Prints the first page of the document last. This setting saves time because you do not have to reorder the printed pages. It is the appropriate setting for most print jobs.
   – Back to front: Prints the last page of the document last.
5. Select any other print settings that you want, and then click OK.

Print multiple pages on a single sheet of paper
Use the printer software to print multiple pages of a document on a single sheet of paper. The printer software automatically resizes the document text and images to fit on the printed page.

Follow these steps to print multiple pages of a document on a single sheet of paper:
1. Open the Printer Properties dialog box.
2. Click the Finishing tab.
3. In the Pages Per Sheet and Posters drop-down list, click the number of pages that you want to appear on each sheet of paper.
4. If you want a border to appear around each page image that is printed on the sheet of paper, select the Print Page Borders check box.
5. In the Page Order drop-down list, click a layout for each sheet of paper.
6. Select any other print settings that you want, and then click OK.

Print preview
Use the print preview function to view a printout on the computer before printing a document. If the printout does not look correct, you can cancel the print job and adjust the print settings as needed.

To preview a printed document, follow these steps:
1. Open the Printer Properties dialog box.
2. Click the Finishing tab.
3. Select the Show Print Preview check box.
4. Select any other print settings that you want, and then click OK.
Before the document prints, a preview is displayed.
5. Do one of the following:
   - Click File and then click Print to HP Deskjet to print the document.
   - Click File and then click Cancel Printing to cancel the print job. Adjust the print settings as needed before trying to print the document again.

Set a custom paper size

Use the Custom paper size dialog box to print on a special paper size.

Note This feature is not available for all paper types.

Follow these steps to define a custom paper size:
1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab.
3. Click the Custom button.
   The Custom paper size dialog box is displayed.
4. In the Name drop-down list, click a custom paper size name.
5. Type the paper dimensions in the Width and Length boxes.
   The minimum and maximum dimensions appear beneath each of the boxes.
6. Click the unit of measurement: Inches or Millimeters.
7. Click Save to save the custom paper size.
8. Click OK to exit the Custom Paper Size dialog box.

Select a paper type

To determine the paper type used for a printing job, select Automatic to use the automatic paper-type sensor or select a specific paper type.

Use the automatic paper-type sensor

Automatic is the default paper-type setting. When it is used, the auto paper-type sensor automatically selects the print settings that are appropriate for the media that you are printing, particularly when HP paper and media are used.

Note The Automatic Paper-Type Sensor cannot be used for documents that are printed from the 250-Sheet Plain Paper Tray Accessory.

Follow these steps to use the auto paper-type sensor:
1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab.
3. In the Paper type drop-down list, click Automatic.
4. Select any other print settings that you want, and then click OK.

Note Do not use the Automatic setting for high-quality printouts. Instead, select a specific paper type.

Select a specific paper type

When printing a higher-quality document, HP recommends that you select a specific paper type.
Follow these steps to select a specific paper type:

1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab.
3. In the Paper Type drop-down list, click an appropriate paper type.
4. Select any other print settings that you want, and then click OK.

Select a paper source

The printer offers three sources for paper:

- In tray
- 250-Sheet Plain Paper Tray Accessory
- Auto Two-Sided Print Accessory with Small Paper Tray

Follow these steps to select a paper source:

1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab or the Paper/Quality tab.
3. Find the appropriate drop-down list:

<table>
<thead>
<tr>
<th>Tab</th>
<th>Drop-down list</th>
</tr>
</thead>
<tbody>
<tr>
<td>Printing Shortcuts</td>
<td>Paper source</td>
</tr>
<tr>
<td>Paper/Quality</td>
<td>Source is</td>
</tr>
</tbody>
</table>

Select any other print settings that you want, and then click OK.

4. Select one of the following options in the drop-down list:
   - Upper tray: Prints from the In tray.
   - Lower tray: Prints from the 250-Sheet Plain Paper Tray Accessory.
   - Upper, then lower: Prints from the In tray. If the In tray is empty, the printer prints from the 250-Sheet Plain Paper Tray Accessory.
   - Lower, then upper: Prints from the 250-Sheet Plain Paper Tray Accessory. If the accessory is empty, the printer prints from the In tray.
   - Rear tray: Prints from the Auto Two-Sided Print Accessory with Small Paper Tray. This option is displayed only if the accessory is attached to the printer.

Print task quick sets

Use print task quick sets to print with or save print settings that you use often.

If you frequently print on envelopes, for example, you can create a print task that contains the paper size, print quality, and orientation setting that you normally use for envelopes. After creating the print task, simply select it when printing on envelopes rather than setting each of the print settings separately.
Note The printer software can save up to 25 print task quick sets.

Create a print task or use the specially designed print tasks that are available in the Print Task Quick Sets drop-down list.

Use a print task quick set
Follow these steps to use a print task quick set:
1. Open the Printer Properties dialog box. A Print Task Quick Sets drop-down list is displayed at the top of most tabs.
2. Go to Print Task Quick Sets on any tab where it is displayed.
3. In the drop-down list, click the print task that you want to use.
4. Click OK.

Note To restore default print settings, click Default Print Settings in the Print Task Quick Sets drop-down list, and then click OK.

Create a print task quick set
Follow these steps to create a print task quick set:
1. Open the Printer Properties dialog box.
2. Select the options that you want to include in the new print task.
3. Go to Print Task Quick Sets on any tab where it is displayed.
4. Type a name for the new print task in the Print Task Quick Sets drop-down list, and then click Save.
   The print task quick set is added to the drop-down list.

Note If you add more options to the print task, rename the print task and then click OK.

Delete a print task quick set
Follow these steps to delete a print task quick set:
1. Open the Printer Properties dialog box. A Print Task Quick Sets drop-down list is displayed at the top of most tabs.
2. Go to Print Task Quick Sets on any tab where it is displayed.
3. In the drop-down list, click the print task that you want to delete and then click Delete.

Note Some print task quick sets cannot be deleted.

Automatic two-sided printing
To print a two-sided document automatically, one of the following accessories must be attached to the printer:
The two-sided printing accessories only support certain paper types. For a list of supported paper types, see the documentation that came with the accessory.

If a two-sided printing accessory is not attached to the printer or you are printing on an unsupported paper type, use manual two-sided printing.

**Binding type**

Select the type of binding that you want for the two-sided document, and then follow the steps for that binding:

- **Book binding**
- **Tablet binding**

**Note**  Book binding is the most common type of binding.

**Book binding**

Follow these steps to print a two-sided document with a book binding:

1. Open the Printer Properties dialog box.
2. Click the **Printing Shortcuts** tab, and then click **Two-sided (Duplex) Printing** in the drop-down list.
3. In the **Print on both sides** drop-down list, click **Automatically**.
4. Select any other print settings that you want, and then click **OK**.

After the first side of the page is printed, the printer pauses while the ink dries. When the ink is dry, the paper is pulled back into the duplexer and the reverse side of the page is printed.

**Note**  Do not remove the paper from the printer until both sides of the page have been printed.

**Tablet binding**

Follow these steps to print a two-sided document with a tablet binding:
1. Open the Printer Properties dialog box.
2. Click the Finishing tab.
3. Select the Print on both sides check box.
4. Select the Use auto-duplex unit check box.
5. Select the Preserve layout check box.
6. Select the Flip pages up check box.
7. Select any other print settings that you want, and then click OK.

After the first side of the page is printed, the printer pauses while the ink dries. When the ink is dry, the paper is pulled back into the duplexer and the reverse side of the page is printed.

Do not remove the paper from the printer until both sides of the page have been printed.

**Manual two-sided printing**

If an optional two-sided printing accessory is attached to the printer, follow the automatic two-sided printing instructions.

Use two-sided printing, also called *duplexing*, to print on both sides of the paper. Printing on both sides of the paper is not only economical, but environmentally conscious as well.

**Print a two-sided document**

To print a two-sided document, follow these steps:

1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab.
3. In the What do you want to do? drop-down list, click Two-sided (Duplex) Printing.
4. In the Print On Both Sides drop-down list, click Manually.
5. Select any other print settings that you want, and then click OK.

The printer prints the odd-numbered pages first.

6. After the odd-numbered pages have been printed, reload the printed pages with the printed side facing up.
7. Click **Continue** to print the even-numbered pages.

**Create a bound two-sided document**

Select the type of binding that you want for the two-sided document, and then follow the steps for that binding.

- **Book binding**
- **Tablet binding**

**Note** Book binding is the most common type of binding.

**Book binding**

Follow these steps to print a two-sided document with a book binding:

1. Open the **Printer Properties** dialog box.
2. Click the **Printing Shortcuts** tab.
3. In the **What do you want to do?** drop-down list, click **Two-sided (Duplex) Printing**.
4. In the **Print On Both Sides** drop-down list, click **Manually**.
5. Select any other print settings that you want, and then click **OK**.
   The printer prints the odd-numbered pages first.
6. After the odd-numbered pages have been printed, reload the printed pages with the printed side facing up.

7. Click **Continue** to print the even-numbered pages.

**Tablet binding**

Follow these steps to print a two-sided document with a tablet binding:
1. Open the **Printer Properties** dialog box.
2. Click the **Finishing** tab.
3. Select the following check boxes:
   - **Print On Both Sides (Manually)**
   - **Preserve Layout**
   - **Flip Pages Up**
4. Select any other print settings that you want, and then click **OK**. The printer prints the odd-numbered pages first.
5. After the odd-numbered pages have been printed, reload the printed pages, with the printed side facing up according to the document orientation, portrait or landscape.
6. Click **Continue** to print the even-numbered pages.
Resize a document

Use the printer software for either of these tasks:

- Print a document on a paper size different from the size for which it is formatted.
- Shrink or enlarge text and graphics on the printed page.

Print on a different paper size

Use this feature to print a document that is formatted for one paper size on another paper size. Doing this can be useful if you do not have the correct paper size available.

For example, if you have created a document that is formatted for letter-size paper, but you do not have any letter-size paper available, you can print the document on another paper size that is available.

Follow these steps to resize the document for a different paper size:

1. Open the Printer Properties dialog box.
2. Click the Effects tab.
3. Select the Print document on check box, and then click the target paper size in the drop-down list.
   The target paper size is the size of the paper on which you are printing, not the size for which the document was formatted.
4. Do one of the following:

<table>
<thead>
<tr>
<th>Objective</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Shrink or enlarge the document to fit on the target paper size.</td>
<td>Select the Scale to Fit check box.</td>
</tr>
<tr>
<td>Print the document at its original size on the selected paper size.</td>
<td>Do not select the Scale to Fit check box.</td>
</tr>
</tbody>
</table>

5. Select any other print settings that you want, and then click OK.

Shrink or enlarge text and graphics

Use this feature to shrink or enlarge printed text and graphics without changing the paper size.

Follow these steps to shrink or enlarge text and graphics:

1. Open the Printer Properties dialog box.
2. Click the Effects tab.
3. In the % of normal size box, type the percentage by which you want to shrink or enlarge the text and graphics.
   One hundred percent represents the actual size of the text and graphics. Type a number less than 100 to shrink the text and graphics. Type a number greater than 100 to enlarge the text and graphics.
4. Select any other print settings that you want, and then click OK.

Watermarks

Watermarks appear as background printing on documents.
Apply an existing watermark

Follow these steps to apply an existing watermark to a document:

1. Open the Printer Properties dialog box.
2. Click the Effects tab.
3. Click a watermark in the Watermarks drop-down list. If you do not want to use one of the listed watermarks, create a new watermark.
4. Choose one of the following actions:
   – If you want the watermark to appear on the first page only, select the First Page Only check box.
   – If you want the watermark to appear on all printed pages, leave the First Page Only check box clear.
5. Print the document according to the instructions for the paper type.

Create or change a watermark

Follow these steps to create or change a watermark:

1. Open the Printer Properties dialog box.
2. Click the Effects tab.
3. Click the Edit button. The Watermark Details dialog box is displayed.
4. Choose one of the following actions:
   – Click the New button.
   – Select an existing watermark to change.
5. Type the watermark message, and then select the message angle and the font attributes.
6. After you have set the watermark details, click OK.

For instructions about applying watermarks, follow the steps for applying an existing watermark to a document.

Use the What's This? help to learn about the features that you see on the Printer Properties dialog box.
9 Printer software

- Use the Printer Properties dialog box to select printing options.
- Use the What's This? help to learn more about specific print settings.
- Use the Printing Shortcuts tab to specify print settings quickly.
- View the Ink Status window for the approximate ink level of each print cartridge.
- Download printer software updates for the latest features and improvements.

Printer Properties dialog box

The printer is controlled by software that is installed on the computer. Use the printer software, also known as the printer driver, to change the print settings for a document. To change the print settings, open the Printer Properties dialog box.

Note The Printer Properties dialog box is also referred to as the Printing Preferences dialog box.

Open the Printer Properties dialog box

Follow these steps to open the Printer Properties dialog box:
1. Open the file that you want to print.
2. Click File, click Print, and then click Properties or Preferences.
   The Printer Properties dialog box is displayed.

Note The path to the Printer Properties dialog box can vary depending on the software program you are using.

What's This? help

Use the What's This? help to learn about the features that you see on the Printer Properties dialog box.

What's This? help

Use What's This? help to learn more about the available printing options.
1. Move the cursor over the feature that you want to learn more about.
2. Click the right mouse button.
   The What's This box is displayed.
3. Move the cursor over the What's This? box, and then click the left mouse button.
   An explanation of the feature is displayed.

Ink Status window

The Ink Status window is displayed each time the printer prints a file. The window displays the approximate ink level of each print cartridge. To close the Ink Status window, click Close.
Note  The Ink Status window may not display if the printer is operating over a non-Microsoft configuration.

Print cartridge information and ordering
For print cartridge information and to link to HP’s Web site for ordering print cartridges, click the Print Cartridge Information button.

Display the Ink Status window
If you do not want the Ink Status window to appear when you print, select the Do not show this again check box in the lower-left corner of the window.

If you previously chose not to show the Ink Status window but now want it to appear when you print, follow these steps:
1. For Windows 2000, click Start, and then click Settings. For Windows XP, click Start, and then click Printers and Faxes. A list that includes the printers installed on the computer is displayed.
2. Highlight the printer name, and then right-click to display a list of options.
3. Click Properties. The Printer Properties dialog box is displayed.
4. Click the Device Settings tab.
5. For Display Ink Status Window, click On, and then click OK.

Download printer software updates
Download the latest printer software update every few months to ensure you have the latest features and improvements:
1. Make sure you are connected to the Internet.
2. For Windows 2000, click Start, click Programs, click HP, and then click HP Software Update. For Windows XP, click Start, click All Programs, click HP, and then click HP Software Update. The HP Software Update window is displayed.
3. Click Next. HP Software Update searches the HP Web site for printer software updates.
   - If the computer has the most recent version of the printer software installed, No updates are available for your system at this time is displayed in the HP Software Update window.
   - If the computer does not have the most recent version of the printer software installed, a software update is displayed in the HP Software Update window.
4. If a software update is available, select the check box beside the update name.
5. Click Install.
6. Follow the onscreen instructions.

Download HP Photosmart Software
Installing the printer software update you download from the HP Web site does not update HP Photosmart Software you might have installed on the computer. For information about updating HP Photosmart Software, see the HP Photosmart Software Help.
10 Maintenance

- Install print cartridges
- Set the auto-off feature
- Align the print cartridges
- Calibrate color
- Automatically clean print cartridges
- Print a test page
- View estimated ink levels
- Maintain the printer body
- Remove ink from your skin and clothing
- Manually clean print cartridges
- Maintain print cartridges
- Printer Toolbox

Install print cartridges

When you need to replace print cartridges, make sure you have the correct print cartridges for the printer, and then install them in the print cartridge cradle.

Print cartridge combinations

For printing most documents, use the tri-color print cartridge and the black print cartridge. When printing photos, use the photo print cartridge along with the tri-color print cartridge. For printing high-quality black-and-white photographs, use the gray photo print cartridge in conjunction with the tri-color print cartridge.

Always install the tri-color print cartridge in the left side of the print cartridge cradle. Install the black, photo print cartridge, or the gray photo print cartridge in the right side of the print cartridge cradle.

Note To easily identify the correct side of the cradle in which to install the print cartridge, match the symbol on the print cartridge label with the symbol above the print cartridge cradle.

Selection numbers

When buying replacement print cartridges, look for the print cartridge selection number. You can find the selection number in three places:

- Selection number label: Look at the label on the print cartridge that you are replacing.
Printer documentation: For a list of print cartridge selection numbers, see the reference guide that came with the printer.

Print Cartridge Information dialog box: For a list of print cartridge selection numbers, open the printer Toolbox, click the Estimated Ink Level tab, and then click the Print Cartridge Information button.

Ink-backup mode
The printer can operate with only one print cartridge installed. For more information, see Ink-backup mode.

Installation instructions
Follow these steps to install a print cartridge:
1. Verify that the printer is turned on.
2. Load Letter or A4 plain, white paper in the In tray.
3. Open the printer cover.
4. Wait until the print cartridge cradle moves to the right side of the printer and is idle and silent, and then lift the print cartridge latch to the open position.
5. Slide the print cartridge out of the print cartridge cradle.
6. Remove the replacement print cartridge from its packaging and carefully remove the plastic tape. Hold the print cartridge so that the copper strips are on the bottom and facing toward the printer.

1. Remove plastic tape

Caution  Do not touch the print cartridge ink nozzles or copper contacts. Touching these parts will result in clogs, ink failure, and bad electrical connections. Do not remove the copper strips. They are required electrical contacts.

7. Hold the print cartridge so that the copper strips are on the bottom and facing toward the printer, and then slide the print cartridge into the cradle as shown.
8. Push down on the print cartridge latch until it snaps closed.

9. Close the printer cover.
   The printer automatically prints a calibration page.

For information about storing print cartridges, see Maintain print cartridges.
For information about recycling empty print cartridges, see Print cartridge recovery.

⚠️ Warning  Keep both new and used print cartridges out of the reach of children.

Set the auto-off feature

The printer is designed with an auto-off feature that automatically places the printer into a low power mode when it has been idle for 30 minutes. In this mode, the printer continues to consume a maximum 3.0 watts of power and turns back on automatically when print jobs are sent to the printer. You can manually turn the printer off by pressing and holding the Power button for three seconds. When the printer is manually turned off, the printer uses less than one watt of power. Manually powering off the printer is recommended if the printer causes interference with other wireless devices, or if you do not plan to use the printer for a long period of time.

Selecting auto-off cancels the FEMP energy savings mode.

Energy consumption can be prevented by turning the printer power off, and then disconnecting the end of the printer power cord from the electrical source.

Follow these steps to activate the auto-off feature:

1. For Windows 2000, click Start, click Settings, and then click Printers. For Windows XP, click Start, and then click Printers and Faxes.
   A list that includes the printers installed on the computer is displayed.
2. Highlight the printer name, and then right-click to display a list of options.
3. Click Properties.
   The Printer Properties dialog box is displayed.
4. Click the Device Settings tab.
5. To Activate the Hardware Auto-off feature, click On, and then click OK.
Align the print cartridges

The printer automatically aligns the print cartridges after a new print cartridge is installed. You can also align the print cartridges at other times to ensure optimal print quality.

To align print cartridges:
1. Load Letter or A4 plain, white paper in the In tray.
2. Open the printer Toolbox.
3. Click Align the Print Cartridges.
4. Click Align, and then follow the onscreen instructions.

Calibrate color

Perform a color calibration if the colors in photos that are printed with the photo print cartridge consistently look incorrect.

Before performing a color calibration, align the print cartridges, and then reprint the photo. If the color is still incorrect, perform a color calibration.

To calibrate color:
1. Load Letter or A4 plain, white paper in the In tray.
2. Verify that both a tri-color print cartridge and a photo print cartridge are installed in the printer.
3. Open the printer Toolbox.
4. Click Calibrate Color.
5. Click Start, and then follow the onscreen instructions.

Automatically clean print cartridges

If the printed pages are missing lines or dots, or if they contain ink streaks, the print cartridges might be low on ink or might need to be cleaned.

If the print cartridges are not low on ink, follow these steps to clean the print cartridges automatically:
1. Open the printer Toolbox.
2. Click Clean the Print Cartridges.
3. Click Clean, and then follow the onscreen instructions.

If the documents are still missing lines or dots after cleaning, replace the print cartridges.

Caution. Clean print cartridges only when necessary. Unnecessary cleaning wastes ink and shortens the life of the cartridge.

Print a test page

Follow these instructions to print a test page:
1. Open the printer Toolbox.
2. Click the Print a Test Page button, and then follow the onscreen instructions.

View estimated ink levels

Follow these instructions to view the estimated ink levels of the print cartridges that are installed in the printer:
1. Open the printer Toolbox.
2. Click the **Estimated Ink Levels** tab.

**Note**  If the print cartridges were used before being installed in the printer, the estimated ink levels will not appear on the Estimated Ink Levels tab.

The Estimated Ink Level tab also contains print cartridge ordering information. To view this information, click the **Print Cartridge Information** button.

**Maintain the printer body**

Because the printer ejects ink onto the paper in a fine mist, ink smudges will eventually appear on the printer case and adjacent surfaces. To remove smudges, stains, or dried ink from the exterior of the printer, use a soft cloth moistened with water.

When cleaning the printer, keep these tips in mind:

- **Do not** clean the interior of the printer. Keep all fluids away from the interior.
- **Do not** use household cleaners or detergent. If a household cleaner or detergent has been used on the printer, wipe the exterior surfaces with a soft cloth moistened with water.
- **Do not** lubricate the support rod that the print cartridge cradle uses to slide back and forth. Noise is normal when the cradle moves back and forth.

**Remove ink from your skin and clothing**

Follow these instructions to remove ink from your skin and clothing:

<table>
<thead>
<tr>
<th>Surface</th>
<th>Remedy</th>
</tr>
</thead>
<tbody>
<tr>
<td>Skin</td>
<td>Wash the area with an abrasive soap.</td>
</tr>
<tr>
<td>White fabric</td>
<td>Wash the fabric in <strong>cold</strong> water and use chlorine bleach.</td>
</tr>
<tr>
<td>Color fabric</td>
<td>Wash the fabric in <strong>cold</strong> water and use sudsy ammonia.</td>
</tr>
</tbody>
</table>

⚠️ **Caution** Always use cold water to remove ink from fabric. Warm or hot water can set the ink into the fabric.

**Manually clean print cartridges**

If the printer is used in a dusty environment, a small amount of debris can accumulate on the print cartridge contacts.

**Gather cleaning supplies**

You need the following items to clean the print cartridges.

- Distilled water (tap water can contain contaminants that can damage the print cartridge)
- Cotton swabs or other soft, lint-free material that will not stick to the print cartridge

Be careful not to get **ink on your hands or clothing** as you clean.
Prepare to clean
1. Open the printer cover.
2. Wait until the print cartridge cradle moves to the right side of the printer and is idle and quiet.
3. Remove the print cartridges and place them on a piece of paper, with the copper strips facing up.

⚠️ Caution  Do not leave the print cartridges outside the printer for more than 30 minutes.

Cleaning instructions
1. Lightly moisten a cotton swab with distilled water and squeeze any excess water from the swab.
2. Wipe the print cartridge copper contacts with the cotton swab.

⚠️ Caution  Do not touch the print cartridge ink nozzles. Touching the ink nozzles will result in clogs, ink failure, and bad electrical connections.

3. Repeat this process until no ink residue or dust appears on the swab.
4. Insert the print cartridges in the printer, and then close the printer cover.

Maintain print cartridges
The following tips will help maintain HP print cartridges and ensure consistent print quality:
- Keep all print cartridges in their sealed packages until they are needed. Print cartridges should be stored at room temperatures (15° to 35° C or 59° to 95° F).
- Do not remove the plastic tape covering the ink nozzles until you are ready to install the print cartridge in the printer. If the plastic tape has been removed from the print cartridge, do not attempt to reattach it. Reattaching the tape damages the print cartridge.

Follow these instructions to store print cartridges.

Store print cartridges
When print cartridges are removed from the printer, store them in an airtight plastic container or in the print cartridge protector that comes with the photo print cartridge.
If you store the print cartridge in an airtight plastic container, make sure that the ink nozzles are face down but are not in contact with the container.

**Insert the print cartridge into the print cartridge protector**

Slide the print cartridge at a slight angle into the protector, and snap it securely in place.

**Remove the print cartridge from the print cartridge protector**

Press down and back on the top of the protector to release the print cartridge. Slide the print cartridge out of the protector.

⚠️ **Caution**

Do not drop the print cartridge. Dropping the print cartridge can damage it.

**Printer Toolbox**

The printer Toolbox contains a number of useful tools to enhance the performance of the printer.

Use the printer Toolbox to perform the following tasks:

- Set the auto-off function
- Align the print cartridges
- Calibrate color
- Clean the print cartridges
- Print a test page
- View estimated ink levels
- Configure Bluetooth settings (if the printer is connected to a computer by a USB cable)
Use the Toolbox

Follow these instructions to use the printer Toolbox:

1. Open the Printer Properties dialog box.
2. Click the Services tab, and then click the Service this device button.
11 Troubleshooting

- Ethernet problems
- Printer does not print
- Paper jam
- Paper problems
- Paper mismatch
- Printer is stalled
- Print cartridge problems
- Photos do not print correctly
- PictBridge problems
- Bluetooth printing problems
- Banners do not print correctly
- Print quality is poor
- Document is misprinted
- Problems with borderless documents
- Error messages
- Printer lights are on or flashing
- Document prints slowly
- If you continue to have problems
- HP support process

**Ethernet problems**

The following problems can occur with an Ethernet connection.

**Printer does not print**

Print an **HP Report page**.

If the HP Report page does not print, verify the following:

- The printer is set up and powered on.
- The print cartridges are installed correctly.
- The printer is on and the paper tray is loaded.
- The printer is free of paper jams.

**Link light**

If the printer still does not print, then look at the Link light on the back of the printer:

<table>
<thead>
<tr>
<th>State of the Link light</th>
<th>Task</th>
</tr>
</thead>
<tbody>
<tr>
<td>Flashing</td>
<td>Resend the document, then look at the Activity light.</td>
</tr>
</tbody>
</table>
(continued)

<table>
<thead>
<tr>
<th>State of the Link light</th>
<th>Task</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Image of printer](83x528 to 168x588)</td>
<td>![Image of printer](83x441 to 168x502)</td>
</tr>
<tr>
<td>Off</td>
<td>Verify the following:</td>
</tr>
<tr>
<td>![Image of printer](101x237 to 185x299)</td>
<td>![Image of printer](101x150 to 186x211)</td>
</tr>
<tr>
<td></td>
<td>● The Ethernet cable is securely connected to the printer.</td>
</tr>
<tr>
<td></td>
<td>● The network hub, switch, or router is on and working properly.</td>
</tr>
<tr>
<td></td>
<td>● The printer is connected to the network.</td>
</tr>
</tbody>
</table>

**Activity light**

Follow these steps if the Link light is on, but the printer does not print:

1. Wait until the printer is idle.
2. Try to reprint the document.
3. Look at the Activity light on the back of the printer.

<table>
<thead>
<tr>
<th>State of the Activity light</th>
<th>Task</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Image of printer](83x398 to 185x458)</td>
<td>![Image of printer](83x312 to 186x373)</td>
</tr>
<tr>
<td>Flashing</td>
<td>The Ethernet connection is operating correctly. Try these solutions again.</td>
</tr>
<tr>
<td>![Image of printer](101x336 to 186x397)</td>

<tr>
<td>Off</td>
<td>Verify the following:</td>
</tr>
<tr>
<td>![Image of printer](101x380 to 185x441)</td>
<td>![Image of printer](101x292 to 186x353)</td>
</tr>
<tr>
<td></td>
<td>● The printer is selected in the application from which you are trying to print.</td>
</tr>
<tr>
<td></td>
<td>● The computer is connected to the network.</td>
</tr>
<tr>
<td></td>
<td>● A personal software firewall might block communication between the printer and the computer. Follow these steps.</td>
</tr>
</tbody>
</table>

**Cannot open the printer's embedded web server (EWS)**

Verify the following:

- You are not using a phone cord to connect the printer to the network
- The Ethernet cable is securely connected to the printer
- The network hub, switch, or router is on and working properly
- The computer that you are using is connected to the network
If you still cannot access the printer's EWS, then follow these steps:

1. Print an **HP Report page**.
2. Find the printer's **IP address**.
3. Launch the Internet browser.

   **Note** Use Microsoft Internet Explorer 5.0 or higher or Netscape 4.75 or higher.

4. Enter the printer's IP address in the address box, then press **Enter**.

**A personal software firewall is blocking communication between the printer and the computer**

The personal software firewall is a security program that protects a computer from intrusion. However, the personal firewall might block communication between the computer and the printer.

If you cannot communicate with the printer, try disabling the personal firewall. If you are still unable to communicate with the printer, then re-enable the firewall.

If disabling the firewall allows you to communicate with the printer, you might want to assign the printer a static IP address and then re-enable the firewall. To assign the printer a static IP address, see the network guide that came with the printer.

**Printer does not print**

**Verify the following**

Verify the following conditions if the printer is not printing:

- The printer is connected to the power source.
- The cable connections are secure.
- The printer is turned on.
- The print cartridges are the **correct print cartridges** for the printer and are **properly installed**.
- The paper or other media is correctly loaded in the In tray.
- The printer cover is closed.
- The rear access door is attached.

**Check the printer lights**

The printer lights indicate the printer status and alert you to potential problems.

For more information, see **Printer lights are on or flashing**.
Check the printer cable connection

If your printer and computer are USB-connected and are not communicating with each other, try the following:

- Make sure the power cord is firmly connected to the printer and plugged into a power outlet.
- Check the USB cable. If you are using an older cable, it might not be working properly. If you experience problems, the USB cable might need to be replaced. Also verify that the cable does not exceed 3 meters (9.8 feet) in length.
- Check the connection from your printer to your computer. Verify that the USB cable is securely plugged into the USB port on the back of your printer. Make sure the other end of the USB cable is plugged into a USB port on your computer. After the cable is connected properly, turn your printer off and then on again.
- If you are connecting the through a USB hub, make sure the hub is turned on. If the hub is on, try connecting directly to your computer.
- Try connecting the USB cable to another USB port on your computer. After you check the connections, try restarting your computer. Turn your printer off and then on again.

Check the print queue

The printer will not print if a print job is stalled in the print queue. To resolve a print job that is stalled in the queue, complete the following steps:

1. For Windows 2000, click Start, click Settings, and then click Printers. For Windows XP, click Start, and then click Printers and Faxes.
2. Double-click the name of the HP Deskjet printer.
3. Click the Printer menu, and then click Pause Printing.
4. Click the Printer menu again, and then click Cancel all documents.
5. Click Yes.
6. Click the Printer menu, and then click Resume Printing.
7. If there are still documents in the list, restart the computer.
8. After restarting, if there are still documents in the list, repeat steps 1–6.

If the printer still does not print

1. Select the topic below that best describes the problem:
   - Paper jam
   - Out-of-paper message
   - Printer ejects paper
   - Printer is stalled
2. If the printer still does not print, shut down, and then restart the computer.

Paper jam

Follow these steps to remove a paper jam:

1. Press the Resume button.
   If the paper jam does not clear, then go to the next step.
2. Turn off the printer.
3. Push the two latch handles on the printer's rear access door toward each other, and then remove the door.

4. Remove any paper that is inside the printer by pulling it out from the back of the printer.
   If you are printing labels, verify that a label did not become detached from the label sheet while passing through the printer.
5. Replace the rear access door securely.

6. If the paper jam cannot be removed from the back of the printer, raise the printer cover, remove the paper jam from the front of the printer, and then lower the cover.
   Caution  Remove the paper jam carefully as it is possible to damage the printer when removing paper from the front.

7. Turn on the printer, and then press the Resume button.
8. Reprint the document.

Note  If paper jams occur frequently, try using a heavier paper. See the reference guide for paper weight specifications.

Accessories?

If the Two-Sided Printing Accessory is attached to the printer, follow these steps to clear a paper jam from the Two-Sided Printing Accessory.
If the Auto Two-Sided Print Accessory with Small Paper Tray is attached to the printer, follow these steps to clear a paper jam Auto Two-Sided Print Accessory with Small Paper Tray.

Paper problems

**Printer does not feed paper**

Try one or more of the following solutions:
- Reduce the number of sheets in the In tray.
- Remove the paper from the In tray, and then reload it.
- Use a different type of paper.

**Printer ejects paper**

If the printer ejects the paper, try one of the following solutions:
- Move the printer away from direct sunlight. The printer might have been placed in direct sunlight, which can affect the Automatic Paper-Type Sensor.
- Select a paper type other than Automatic.
- If you are performing a color calibration, install both the tri-color and the photo print cartridges.
- If you are printing a borderless document and the Resume and Print Cartridge Status lights are flashing, follow the borderless printing guidelines.
- Verify that the protective piece of plastic tape has been removed from the print cartridges.
- If you are printing a borderless document and the Resume light and a Print Cartridge Status light are flashing, you might be trying to print a borderless document with only the black print cartridge installed. When printing a borderless document, always have the tri-color print cartridge and a black or photo print cartridge installed.

**Out-of-paper message**

If an out-of-paper message is displayed, follow these guidelines.

**Paper jam**

For information about clearing a paper jam, see the paper jam page.

**Printer prints on multiple sheets at once**

If the printer prints on multiple sheets at once, follow these guidelines.

**Printer prints on multiple sheets at once**

If the printer prints on multiple sheets at once, check the following:
Paper weight

The printer might print on multiple sheets of paper at once if the paper is under the recommended paper weight. Use paper that is within the recommended specifications. For paper weight specifications, see the reference guide that came with the printer.

Paper might be loaded improperly

The printer might print on multiple sheets of paper at once if the paper is loaded too far toward the back of the printer or if the paper guide is not positioned firmly against the paper. Reload the paper into the In tray, pushing the paper until you feel resistance, and then slide the paper guide firmly against the edge of the paper stack.

The printer might also print on multiple sheets at once if different paper types are loaded in the In tray. For example, photo paper might be mixed with plain paper. Empty the In tray and load only the paper type that is appropriate for the document that you are printing.

Paper mismatch

If you receive an error message about a paper mismatch, it indicates that the paper size or type selected in the software program or in the printer software does not match the paper in the In tray.

You can continue printing with the mismatched paper by pressing the Resume button. To cancel printing, press the Cancel button.

To correct the paper mismatch, change the paper size and type selections in the software program or the printer software, or change the paper in the In tray.

In the software program, follow these steps:
1. Press the Cancel button.
2. Open the File menu, and then click Page Setup.
3. On the Page Setup screen, verify the selected paper size and type.
   - If the paper size and type match the paper in the In tray, proceed to step 2 below.
   - If the size and type do not match, select the matching paper size and type or change the paper in the In tray.
4. Press the Resume button to continue printing.

In the printer software, follow these steps:
1. Press the Cancel button.
2. Open the Printer Properties dialog box.
3. On the Paper/Quality tab, verify that the selected paper size and type match the paper in the In tray.
   - If the size and type do not match, select the matching paper size and type or change the paper in the In tray.
4. Press the Resume button to continue printing.

Printer is stalled

If the printer stalls while printing a document, press the Resume button. If the printer does not start printing again, raise the printer cover, and then disconnect the power cable from the back of the printer.
Caution  First, check for any loose or broken parts in the printer. If you find loose or broken parts, go to www.hp.com/support or contact HP. Support phone numbers are listed in the reference guide that came with the printer or at www.hp.com/support.

If there are no loose or broken parts, follow these steps:
1. Check for and remove any obstacles, such as packing tape or materials, that prevent the print cartridges from moving back and forth.
2. Make sure the print cartridges are installed securely in the print cartridge cradle.
3. Make sure the tri-color print cartridge is installed in the left side of the cradle and the black or photo print cartridge is installed in the right side of the cradle.
4. Check for and clear any paper jam.
5. Lower the printer cover.
6. Connect the power cable to the back of the printer, and then turn on the printer.
   - If the Resume light is not flashing, continue printing the document.
   - If the Resume light is flashing, press the Resume button.
     If the light still flashes, repeat the steps.

Print cartridge problems

Incorrect print cartridge

The printer can only print when the correct print cartridges are installed. If you receive a print cartridge error message, one or both of the print cartridges cannot be used in the printer. A flashing Print Cartridge Status light indicates which print cartridge is incorrect.

To verify that you have the correct print cartridges:
1. Open the printer cover.
2. Read the selection number on the print cartridge label.

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Selection number</td>
</tr>
<tr>
<td>2</td>
<td>Warranty date</td>
</tr>
</tbody>
</table>

3. Check the list of print cartridges that can be used in the printer.
   a. Open the printer Toolbox.
   b. Click the Estimated Ink Level tab.
c. Click the **Print Cartridge Information** button and view the list of print cartridge selection numbers.

   The reference guide that came with the printer also shows the print cartridge selection numbers.

4. Check the warranty date on the print cartridge.

5. If the print cartridge has the wrong selection number, or if the warranty date has expired, **install a new print cartridge.**

6. Close the printer cover.
   - If the Print Cartridge Status light stops flashing, then the problem is fixed.
   - If the Print Cartridge Status light continues to flash, visit HP Technical Support at [www.hp.com/support](http://www.hp.com/support).

---

**Print cartridge problem message**

If you receive a message about a problem with one of the print cartridges, follow these steps:

1. Raise the printer cover and remove the print cartridge that was named in the error message.

2. **Reinstall** the print cartridge.
   - If the Print Cartridge Status light is not flashing, the problem is solved.
   - If the Print Cartridge Status light is flashing, go to the next step.

3. **Manually clean** the print cartridge.

4. Reinsert the print cartridge in the printer and close the printer cover.
   - If the Print Cartridge Status light is still flashing, the print cartridge is faulty and must be **replaced**.

   **Note** You can print with one print cartridge in **ink-backup mode** if you do not have a replacement print cartridge available.

5. If the Print Cartridge Status light continues to flash after replacing the print cartridge, visit HP Technical Support at [www.hp.com/support](http://www.hp.com/support).

---

"**Printing in ink-backup mode**" message

When the printer detects that only one print cartridge is installed, ink-backup mode is initiated. This printing mode lets you print with a single print cartridge, but it slows the printer and affects the quality of printouts.

If you receive the ink-backup mode message and two print cartridges are installed in the printer, verify that the plastic tape has been removed from each print cartridge. When the protective piece of plastic tape covers the print cartridge contacts, the printer cannot detect that the print cartridge is installed.
"Print cartridge is in the wrong slot" message

If you receive this error message, the print cartridge is installed in the wrong side of the print cartridge cradle.

Always install the tri-color print cartridge in the left print cartridge cradle compartment. Install the black or photo print cartridge in the right print cartridge cradle compartment.

Note To easily identify the correct side of the cradle in which to install the print cartridge, match the symbol on the print cartridge with the symbol above the print cartridge cradle.

Photos do not print correctly

Check the paper tray
1. Verify that the photo paper in the In tray with the side to be printed on facing down.
2. Verify that the photo paper is flat.
3. Slide the paper forward until it stops.
4. Slide the paper guides firmly against the edge of the paper.
   Do not press the guide so firmly against the paper that the paper bends or curls.

Check the printer properties
Open the Printer Properties dialog box and verify the following options:

<table>
<thead>
<tr>
<th>Tab</th>
<th>Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Paper/Quality</td>
<td><strong>Size is:</strong> An appropriate paper size</td>
</tr>
<tr>
<td></td>
<td><strong>Type is:</strong> An appropriate photo paper</td>
</tr>
<tr>
<td></td>
<td><strong>Print Quality:</strong> Best or Maximum dpi</td>
</tr>
</tbody>
</table>

Colors are tinted or incorrect
If colors in photos appear tinted or incorrect, follow these steps:
1. Verify that neither print cartridge is low on ink.
   If neither print cartridge is low on ink, proceed to step 2.
2. Align the print cartridges.
3. Reprint the photo.
4. If colors are still tinted or incorrect, calibrate the color.
Both a photo print cartridge and a tri-color print cartridge must be installed for color calibration.

5. Reprint the photo.
6. If colors continue to appear tinted or incorrect, open the Printer Properties dialog box, click the Color tab, and then click the Advanced Color Settings button.
7. Adjust the colors by using the Advanced Color Settings dialog box.

Horizontal lines appear on a photo

If light or dark horizontal lines appear on photos, follow this procedure:
1. Clean the print cartridges.
2. Reprint the photo.
3. If horizontal lines still occur, align the print cartridges.
4. Reprint the photo.

Part of the photo is faded
If part of the photo is faded, follow these guidelines.

Part of the photo is faded
Fading might occur on the edges or near the edges of a photo.

Fading occurs on the edges of a photo
Verify that the photo paper is not curled. If the photo paper is curled, place the paper in a plastic bag and gently bend it in the opposite direction of the curl until the paper lies flat. If the problem persists, then use photo paper that is not curled.

For instructions about preventing photo paper from curling, see Store and handle photo paper.

**Fading occurs near the edges of a photo**

If fading occurs approximately 25 to 63 mm (1.0 to 2.5 inches) from the edge of a photo, try the following solutions:

- Install a photo print cartridge and a tri-color print cartridge in the printer.
- Open the Printer Properties dialog box, click the Paper/Quality tab, and then set the Print Quality to Maximum dpi.
- Rotate the image 180°.

**PictBridge problems**

**Images in a connected digital camera do not print**

There are several reasons why images in a connected digital camera do not print:

- The digital camera is not PictBridge-compatible.
- The digital camera is not in PictBridge mode.
- The images are not in a supported format.
- You did not select any photos on the camera for printing.

Check the documentation that came with the camera to ensure it supports PictBridge. If the camera does support PictBridge, make sure the camera is set to PictBridge mode. For instructions on setting the camera to PictBridge mode, see the documentation that came with the camera.

Verify that the digital camera is saving photos in a file format that the PictBridge transfer feature supports:

- EXIF/JPEG
- JPEG

Before you connect the digital camera to the front USB port on the printer, select some photos on the camera for printing.
### PictBridge lights are flashing

<table>
<thead>
<tr>
<th>State of the lights</th>
<th>Task</th>
</tr>
</thead>
<tbody>
<tr>
<td>Connection light and the Error light are flashing</td>
<td>The printer has lost connection with the camera while printing. Check the USB connection.</td>
</tr>
<tr>
<td>Connection light is on and the Error light is flashing</td>
<td>The camera has lost power. Replace the camera batteries or connect it to a power supply.</td>
</tr>
<tr>
<td>Connection light is on and the Error light flashes twice</td>
<td>The camera has requested an unsupported command.</td>
</tr>
</tbody>
</table>

### Bluetooth printing problems

**Bluetooth device cannot find the printer**

Try one of the following solutions:
- Make sure the HP Bluetooth Wireless Printer Adapter is plugged into the camera port on the front of the printer. The light on the adapter double-blinks once a second when the adapter is ready to receive data.
- You might be too far from the printer. Move the device with Bluetooth wireless technology closer to the printer. The maximum recommended distance between the device with Bluetooth wireless technology and the printer is 10 meters (30 feet).

**No page came out of the printer**
The printer might not recognize the type of file sent by the device with Bluetooth wireless technology. Reformat the file to a supported file type and then resend.

**A blank page came out of the printer**
A blank page ejected from the printer signifies an unsupported file type or the file being printed is corrupted or too large.

**Print quality is poor**
The image you printed might be low resolution. For better results in the future, set the device to a higher resolution, if possible. Be aware that pictures taken with VGA-resolution cameras, such as those found in wireless phones, might not have high enough resolution to produce a high-quality print.

**The image printed with borders**
The printing application installed on the device with Bluetooth wireless technology might not support borderless printing. Contact the vendor of the device, or go to their support website to obtain the latest updates for the printing application.

**Bluetooth wireless printer adapter is not working**
If the Bluetooth wireless printer adapter does not seem to working, try the following troubleshooting tips:
- Remove the adapter from the printer for a few seconds, and then re-insert it.
- Turn off the printer with the Bluetooth wireless printer adapter still inserted in the printer, and then turn the printer on again.

Or try this sequence of steps:
1. Turn off the printer.
2. Disconnect the printer from its power source.
3. Insert the Bluetooth wireless printer adapter in the printer.
4. Reconnect power.
5. Turn the printer on.
Banners do not print correctly

Check the paper tray
- Unfold and refold the paper when several sheets feed into the printer at one time.
- Confirm that the unattached edge of the banner paper stack is on top and pointing into the printer.
- Verify that the correct paper for banner printing is in use.

Check the printer properties
Open the Printer Properties dialog box and verify the following settings:

<table>
<thead>
<tr>
<th>Tab</th>
<th>Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Paper/Quality</td>
<td>Size is: The appropriate banner size</td>
</tr>
<tr>
<td></td>
<td>Type is: HP Banner Paper</td>
</tr>
</tbody>
</table>

Check the software
- Verify that the software program that you are using prints banners. Not all software programs print banners.
- If gaps appear at the ends of the sheets, verify that the printer software is operating correctly.

Print quality is poor

Streaks and missing lines
If the printed pages are missing lines or dots or if streaks appear, the print cartridges might be low on ink or might need to be cleaned.

Print is faded
- Verify that neither of the print cartridges is low on ink.
  If a print cartridge is low on ink, consider replacing the print cartridge. For the correct part numbers, see the reference guide that came with the printer.
- Verify that a black print cartridge is installed.
  If the black text and images on the printouts are faded, you might be printing with only the tri-color print cartridge. Insert a black print cartridge, in addition to the tri-color print cartridge, for optimal black print quality.
- Verify that the protective piece of plastic tape has been removed from the print cartridges.
Remove plastic tape

- Consider selecting a higher print quality.

Blank pages print
- The protective piece of plastic tape might still be attached to the print cartridges. Verify that the plastic tape has been removed from the print cartridges.

Too much or too little ink appears on the page
- If too much or too little ink appears on the page, follow these instructions.

Too much or too little ink appears on the page
- If too much or too little ink appears on the page, try adjusting the ink volume and dry time or selecting a different paper type.

Adjust the ink volume and dry time
1. Open the Printer Properties dialog box.
2. Click the Advanced tab.
3. Click Document Options, and then click Printer Features.
4. Click Dry Time, then select Change in the drop-down list, and then click the Change button. A Dry Time slider is displayed.
5. Move the Dry Time slider toward Less or More.
6. Click OK.

7. Click Ink Volume, then select Change in the drop-down list, and then click the Change button. An Ink Volume slider is displayed.

8. Move the Ink Volume slider toward Light or Heavy.

   Note If you increase the ink volume, move the Dry time slider toward More to avoid smearing the ink.

9. Click OK, and then click OK again.

Select a specific paper type
1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab.
3. In the Type is drop-down list, click an appropriate paper type. Do not select Automatic.
4. Click OK, and then click OK again.

Document is misprinted

Text and images are misaligned
If the text and images on the printouts are misaligned, then align the print cartridges.

Document is printed off-center or at an angle
1. Verify that the paper is correctly placed in the In tray.
2. Verify that the paper guides fit firmly against the edge of the paper.
3. Reprint the document.

Parts of the document are missing or printed in the wrong place
Open the Printer Properties and confirm the following options:

<table>
<thead>
<tr>
<th>Tab</th>
<th>Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Finishing</td>
<td>Orientation: Verify the appropriate orientation.</td>
</tr>
<tr>
<td>Paper/Quality</td>
<td>Size is: Verify the appropriate paper size.</td>
</tr>
<tr>
<td>Effects</td>
<td>Scale to fit: Select this option to scale text and graphics to the paper.</td>
</tr>
<tr>
<td>Finishing</td>
<td>Poster printing: Verify that Off is selected.</td>
</tr>
</tbody>
</table>

If parts of the document are still missing, the printer settings might be overridden by the software program print settings. Select the appropriate print settings from within the software program.
Envelope is printed at an angle
1. Slide the flap inside the envelope before loading it in the printer.
2. Confirm that the paper guides fit firmly against the edge of the envelope.
3. Reprint the envelope.

**Document does not reflect the new print settings**
The printer settings might differ from the software program print settings. Select the appropriate print settings within the software program.

**Problems with borderless documents**

**Borderless printing guidelines**
When printing borderless photos or brochures, follow these guidelines:

- Verify that the paper size that is specified in the **Paper Size** drop-down list on the **Printing Shortcuts** tab matches the size of the paper that is loaded in the In tray.
- Select the appropriate paper type in the **Paper Type** drop-down list on the **Printing Shortcuts** tab.
- If printing in grayscale, select **Print in high quality grayscale** on the **Color Option** drop-down list on the **Printing Shortcuts** tab.
- Do not print borderless documents in **ink-backup mode**. Always have two print cartridges installed in the printer when printing borderless documents.

**Streaks appear in a light portion of a photo**

If streaks appear in a light portion of a photo, approximately 63 mm (2.5 inches) from one of the long edges of the photo, try the following solutions:

- Install a **photo print cartridge** in the printer.
- Rotate the image 180°.
- Open the **Printer Properties** dialog box, click the **Paper/Quality** tab, and then set the **Print Quality** to **Maximum dpi**.

**Horizontal lines appear on a photo**
If light or dark horizontal lines appear on photos:
1. **Clean** the print cartridges.
2. Reprint the photo.
3. If the lines still occur, **align** the print cartridges.
4. Reprint the photo.

**Image is printed at an angle**

Verify that no problem exists with the source image. For example, if you are printing a scanned image, verify that the image was not crooked when it was scanned.

If the problem is not caused by the source image, follow these steps:
1. Remove all paper from the In tray.
2. Load the paper correctly in the In tray.
3. Verify that the paper guides fit firmly against the edge of the paper.
4. Follow loading instructions for the paper type.

**Ink smears**

Follow these guidelines if ink smears appear on the back of the photos, or if the paper sticks together:

- Use an HP photo paper.
- Verify that the photo paper is not curled. If the photo paper is curled, place the paper in a plastic bag and gently bend it the opposite direction of the curl until the paper lies flat.

If the paper is not curled, then follow these steps:
1. Open the **Printer Properties** dialog box.
2. Click the **Advanced** tab.
3. Click **Document Options**, and then click **Printer Features**.
4. Click **Dry Time**, then select **Change** in the drop-down list, and then click the **Change** button. A **Dry Time** slider is displayed.
5. Move the **Dry Time** slider toward **More**, and then click **OK**.
6. Click **Ink Volume**, then select **Change** in the drop-down list, and then click the **Change** button. An **Ink Volume** slider is displayed.
7. Move the **Ink Volume** slider toward **Light**, and then click **OK**.
Note The colors in the image might become lighter.

8. Click OK.

If the problem persists, try the following steps:
1. Remove the photo paper, and then load plain paper in the In tray.
2. Press and hold down the Print Cancel button until the printer starts printing a self-test page, and then release the button.
3. Repeat step 2 until the self-test page contains no ink smears.

**Part of the photo is faded**
If part of the photo is faded, follow these guidelines.

**Photo has unwanted border**
If the photo has an unwanted border, follow these guidelines.

**Part of the photo is faded**
Fading can occur on different parts of a photo.

**Fading occurs on the edges of a printout**

Verify that photo paper is not curled. If the photo paper is curled, place the paper in a plastic bag and gently bend it in the opposite direction of the curl until the paper lies flat.
If the problem persists, then use photo paper that is not curled.
For instructions about preventing photo paper from curling, see Storing and handling photo paper.

**Fading occurs near the edges of a photo**
If fading occurs approximately 25 to 63 mm (1.0 to 2.5 inches) from the edge of a photo, try the following solutions:

- Install a photo print cartridge in the printer.
- Open the Printer Properties dialog box, click the Paper/Quality tab, and then set the Print Quality to Maximum dpi.
- Rotate the image 180°.

**Photo has an unwanted border**

The following conditions can create an unwanted border.

**For most paper types**

If the photo has an unwanted border, try one of the following solutions:

- **Align the print cartridges.**
- Open the Printer Properties dialog box, click the Paper/Quality tab, and then verify that the selected paper size matches both the paper size that the photo is formatted for and the size of the paper that is loaded in the In tray.
- Verify that no problem exists with the source image. For example, if you are printing a scanned image, verify that the image was not crooked when it was scanned.

**For photo paper with a tear-off tab**

If the border appears below the tear-off tab, remove the tab.
If the border appears above the tear-off tab:

- Align the print cartridges.
- Verify that no problem exists with the source image. For example, if you are printing a scanned image, verify that the image was not crooked when it was scanned.

Error messages

**Out of paper message**
If you receive an out of paper message, follow these guidelines.

"There was an error writing to USB port"
The printer might not be receiving correct data from another USB device or USB hub. Connect the printer directly to the USB port on the computer.

"Two-way communication cannot be established" or "Printer not responding"
The printer might not be able to communicate with the computer if the USB cable is too long.

If you receive this error message, make sure that the USB cable is not greater than 5 meters (approximately 16 feet, 5 inches) in length.

**Incorrect print cartridge message**
The printer can only print when the correct print cartridges are installed. If you receive an incorrect print cartridge message, follow these instructions.

**Print cartridge problem message**
If you receive a message stating there is a problem with the print cartridge, the print cartridge might be faulty. Follow these instructions to resolve the problem.

"Print cartridge carriage is stalled"
Follow these steps if the printer stalls while you are printing a document.
Paper detected does not match paper size or type selected"
If you receive an error message about a paper mismatch, it indicates that the paper size or type selected in the software program or in the printer software does not match the paper in the In tray. Follow these instructions to resolve the problem.

"Print cartridge is in the wrong slot"
If you receive this error message, the print cartridge is installed in the wrong side of the print cartridge cradle.
Always install the tri-color print cartridge in the left print cartridge cradle compartment. Install the black or photo print cartridge in the right print cartridge cradle compartment.

"Printing in ink-backup mode"
When the printer detects that only one print cartridge is installed, ink-backup mode is initiated. This printing mode lets you print with a single print cartridge, but it slows the printer and affects the quality of printouts.
If you receive the ink-backup mode message and two print cartridges are installed in the printer, verify that the protective piece of plastic tape has been removed from each print cartridge. When plastic tape covers the print cartridge contacts, the printer cannot detect that the print cartridge is installed.

Out-of-paper message
Follow the appropriate steps for the condition that exists.

If the In tray contains paper
1. Verify the following:
   – A sufficient amount of paper is in the In tray (at least ten sheets).
   – The In tray is not overly full.
   – The paper stack is touching the back of the In tray.
2. Slide the paper guides firmly against the edge of the paper.
3. Press the Resume button to continue printing.

If the In tray is empty
1. Load paper in the tray.
2. Press the Resume button to continue printing.

Printer lights are on or flashing
The printer lights indicate the printer status.

Power light is flashing
The light stops flashing when the printer has received all data.
The printer is preparing to print.

Resume light is flashing
If the Resume light is flashing, check the following conditions:
● The printer might be out of paper.
   Place paper in the In tray, and then press the Resume button.
● There might be a paper jam.
   Follow these instructions to clear a paper jam.
● The print cartridges are the correct print cartridges for the printer and are properly installed.
● The printer might be stalled.
   Follow these instructions to correct a stalled printer.

Print Cartridge Status light is on or flashing
The printer has two print cartridge status lights.

1. The left status light represents the tri-color print cartridge, which is installed in the left side of the print cartridge cradle.
2. The right status light represents the black or the photo print cartridge. One of these print cartridges is installed in the right side of the print cartridge cradle.

If the status light is on and not flashing
● Check to see if a print cartridge is low on ink.
  If a print cartridge is low on ink, consider replacing the print cartridge.
● If neither print cartridge is low on ink, press the Resume button. If the Print Cartridge Status light remains on, turn off, and then turn on the printer.

If the status light is on and flashing
Verify that the correct print cartridges are installed.
If you were printing a borderless document when the light started flashing, follow the borderless printing guidelines.
Otherwise, follow these steps:

1. Raise the printer cover, remove the print cartridge on the right, and then lower the cover.

2. Follow one of these steps:
   - If the light is flashing: Open the printer cover, replace the print cartridge that you removed, and then remove the other print cartridge. Proceed to step 3.
   - If the light is off: There is a problem with the print cartridge that you removed. Proceed to step 3.

3. **Manually clean** the print cartridge.
   After cleaning the print cartridge, reinsert it into the printer.
   If the light continues to flash, replace the print cartridge.

---

**All lights are flashing**

The printer might need to be restarted.

1. Press the **Power** button to turn off the printer, and then press the **Power** button to restart the printer.
   Proceed to step 2 if the lights continue to flash.

2. Press the **Power** button to turn off the printer.

3. Disconnect the printer power cord from the electrical outlet.

4. Reconnect the printer power cord to the electrical outlet.

5. Press the **Power** button to turn on the printer.

---

**Document prints slowly**

**Multiple software programs are open**

The computer resources are insufficient for the printer to print at its optimum speed.

To increase printer speed, close all unnecessary software programs when printing.

**Complex documents, graphics, or photos are printing**

Documents containing graphics or photos print more slowly than text documents.

**Best or maximum dpi print mode is selected**

The printer prints more slowly when Best or maximum dpi is selected as the print quality.

To increase the printer speed, select a different print quality mode.

**Printer is in ink-backup mode**

The printer might print more slowly if it is in **ink-backup mode**.

To increase the print speed, use two print cartridges in the printer.

**Printer software is outdated**

Outdated printer software might be installed.

For information about updating the printer software, see the **software update** page.
Computer does not meet system requirements
If the computer does not have enough RAM or a large amount of free space on the hard drive, the printer processing time will be longer.
1. Verify that the computer hard disk space, RAM, and processor speed meet the system requirements.
   The system requirements are listed in the reference guide that came with the printer.
2. Make space available on the hard drive by deleting unwanted files.

If you continue to have problems
If you continue to have problems after investigating the troubleshooting topics, shut down the computer and then restart it.
If you still have questions after restarting the computer, visit HP Technical Support at www.hp.com/support.

HP support process
   HP online service and support is always available to all HP customers for the life of their HP products. It is the fastest source for up-to-date product information and expert assistance, and includes the following features:
   – Fast access to qualified online support specialists
   – Software and printer-driver updates for your product
   – Valuable product and troubleshooting information for common problems
   – Proactive product updates, support alerts, and HP newsgrams that are available when you register your product
2. For Europe only: Contact your local point of purchase.
   If your printer has a hardware failure, you will be asked to bring it back to your local point of purchase. (Service is free during the printer limited-warranty period. After the warranty period, you will be quoted a service charge.)
3. Call HP support.
   For the appropriate telephone number, see the inside front cover of the reference guide that came with your printer. Information about the phone support process can be found in "HP support by phone" in the reference guide.

Support options and availability vary by product, country/region, and language.
12 Accessories

The following optional accessories are available to be used with the HP printer.

1. Automatic Two-Sided Printing Accessory
2. 250-Sheet Plain Paper Tray
3. Auto Two-Sided Print Accessory with Small Paper Tray

If an accessory is not included with the printer, it can be purchased separately from an authorized HP dealer.

For accessory part numbers, see the accessory supply list.

Note: The availability of accessories varies by country/region.

Automatic Two-Sided Printing Accessory (duplexer)
The duplexer is a special hardware device that enables the printer to automatically print on both sides of a page.

Using a duplexer with the printer has several advantages. It allows you to do the following tasks:

- Print on both sides of a page without manually reloading the page.
- Use less paper by printing on both sides of paper sheets.
- Create professional-looking brochures, reports, newsletters, and other special items.

If the duplexer is not packaged with the printer, it can be purchased separately from an authorized HP dealer.

Note: The duplexer is not available in all countries/regions.
The duplexer only supports certain paper types. For a list of supported paper types, see the documentation that came with the duplexer.

Install the duplexer

Follow these steps to attach the duplexer to the printer:

1. Push the two latch handles on the printer’s rear access door toward each other, and then remove the door.

![Image of printer with latch handles highlighted]

**Note** Do not discard the rear access door. In order to print, either the duplexer or the rear access door must be attached to the printer.

2. Insert the duplexer in the back of the printer until both sides snap into place.

![Image of duplexer inserted into the back of a printer]

**Note** Do not press the buttons on either side of the duplexer when installing it in the printer. Use the buttons only when removing the duplexer from the printer.

Enable the duplexer

Follow these steps to enable the duplexer:

1. Open the printer Toolbox.
2. Click the **Configuration** tab.
3. Click **Automatic Two-Sided Printing Module** or **Auto Two-Sided Print Accessory with small paper tray**, and then click **Apply**.
4. Click **OK** in the confirmation box that is displayed.
5. Click the **X** in the upper-right corner to close the screen.

   ![Note](image)
   
   After the duplexer is enabled, it is not necessary to re-enable it every time you print.

**Automatic two-sided printing**

To print a two-sided document automatically, one of the following accessories must be attached to the printer:

![Automatic Two-Sided Printing Accessory]

![Auto Two-Sided Print Accessory with Small Paper Tray]

The two-sided printing accessories only support certain paper types. For a list of supported paper types, see the documentation that came with the accessory.

If a two-sided printing accessory is not attached to the printer or you are printing on an unsupported paper type, use manual two-sided printing.

**Binding type**

Select the type of binding that you want for the two-sided document, and then follow the steps for that binding:

![Book binding]

![Tablet binding]

   ![Note](image)
   
   Book binding is the most common type of binding.

**Book binding**

Follow these steps to print a two-sided document with a book binding:
After the first side of the page is printed, the printer pauses while the ink dries. When the ink is dry, the paper is pulled back into the duplexer and the reverse side of the page is printed.

1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab, and then click Two-sided, duplex, printing in the drop-down list.
3. In the Print on both sides drop-down list, click Automatically.
4. Select any other print settings that you want, and then click OK.

Do not remove the paper from the printer until both sides of the page have been printed.

**Tablet binding**

Follow these steps to print a two-sided document with a tablet binding:

After the first side of the page is printed, the printer pauses while the ink dries. When the ink is dry, the paper is pulled back into the duplexer and the reverse side of the page is printed.

1. Open the Printer Properties dialog box.
2. Click the Finishing tab.
3. Select the Print on both sides check box.
4. Select the Preserve layout check box.
5. Select the Flip pages up check box.
6. Select any other print settings that you want, and then click OK.

Do not remove the paper from the printer until both sides of the page have been printed.

**Print a booklet automatically**

To print a booklet automatically, one of the following accessories must be attached to the printer:

- Automatic Two-Sided Printing Accessory
- Auto Two-Sided Print Accessory with Small Paper Tray

The two-sided printing accessories only support certain paper types. For a list of supported paper types, see the specifications for either the Automatic Two-Sided Printing Accessory or the Auto Two-Sided Print Accessory with Small Paper Tray.

If a two-sided printing accessory is not attached to the printer or you are printing on an unsupported paper type, use manual two-sided printing.

**Guidelines**

Do not exceed the In-tray capacity: 150 sheets.
Print
Load paper in the printer paper tray, and then follow these steps to print a booklet automatically:

1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab, and then select Two-sided, duplex, printing from the drop-down list.
3. From the Print on both sides drop-down list, select one of the following binding options:
   – Left edge booklet
   – Right edge booklet
4. Select any other print settings that you want, and then click OK.

After the first side of the page is printed, the printer pauses while the ink dries. When the ink is dry, the paper is pulled back into the duplexer and the reverse side of the page is printed.

Note Do not remove the paper from the printer until both sides of the page have been printed.

Automatic two-sided printing problems

Paper jam occurs inside the Automatic Two-Sided Printing Accessory
Follow these steps to remove a paper jam from the duplexer.

1. Turn off the printer.
2. Press the buttons on the left and right sides of the duplexer, and then remove it from the printer.

   Warning Remove the duplexer before opening it when clearing a paper jam.

3. Remove any paper inside the printer.
4. Open the duplexer.
5. Remove any paper from inside the duplexer.
6. Close the duplexer, and then re-attach the duplexer to the printer.

Option for two-sided printing cannot be selected

The printer driver cannot sense the duplexer until a print job is sent to the printer. Print a single-sided document, and then print the two-sided document. The option for using the duplexer will appear in the printer software.

If the option for the duplexer still does not appear, verify that the following conditions exist:

- The duplexer is attached to the printer.
- The duplexer is enabled in the printer software.
- The media type and size selected on the Paper/Quality tab are supported by the duplexer.

For a list of supported media types and sizes, see the specifications for the duplexer:

  – Automatic Two-Sided Printing Accessory
  – Auto Two-Sided Print Accessory with Small Paper Tray

Only one side of the page prints when the two-sided printing option is enabled

Verify that the following conditions exist:

- The correct print options are set in both the printer software and the software program that you are using.
- The photo paper is not curled, if you are printing on two-sided photo paper. Photo paper should be flat before printing. See storing and handling photo paper for more information.
- If the media type or size is not supported by the duplexer, you can print the document by using the manual two-sided printing instructions. The media type and size that is selected on the Paper/Quality tab are supported by the duplexer.

Note Do not try to print a two-sided document on single-sided paper, such as single-sided photo paper.
Binding margin is in the wrong place

1. Open the Printer Properties dialog box.
2. Click the Finishing tab.
3. Verify that the following conditions exist:
   – Flip pages up is not selected for binding along the side (book binding).
   – Flip pages up is selected for binding along the top (tablet binding).

For more information, see two-sided printing.

Paper size changes when the two-sided printing option is selected

The paper size is not supported by the duplexer.

Colors look faded

If the colors look faded, try printing the two-sided document by using the manual two-sided printing instructions.

Automatic Two-Sided Printing Accessory specifications

Dimensions when attached to printer

124.6 mm (4.9 in) tall x 320.5 mm (12.62 in) wide x 77.7 mm (3.06 in) deep

Skew (second side of printed page)

Plain paper: +/- .009 mm/mm (.009 in/in)
Cards: +/- .006 mm/mm (.006 in/in)
Envelopes: +/- .012 mm/mm (.012 in/in)

Media weight

Letter/A4: 60 to 90 g/m² (16 to 24 lb)
Cards: Up to 200 g/m² (110 lb index max)
Specialty paper: Up to 160 g/m² (44 lb bond)

Media sizes

Size range: 81 x 117 mm to 216 x 297 mm (3.2 x 4.6 in to 8.5 x 11 in)

Paper:
- U.S. Letter: 216 x 279 (8.5 x 11 in)
- Executive: 184 x 267 mm (7.25 x 10.5 in)
- A4: 210 x 297 mm
- A5: 148 x 210 mm
- B5: 182 x 257 mm

Cards:
- 127 x 203 mm (5 x 8 in)
- 102 x 152 mm (4 x 6 in)
- A6: 105 x 148.5 mm
Hagaki: 100 x 148 mm
L size: 89 x 127 mm

250-Sheet Plain Paper Tray

The 250-Sheet Plain Paper Tray Accessory expands the paper capacity of the printer to 400 sheets. It is useful for high-volume printing and for occasions when you want to use the In tray for special media such as letterhead paper, but still have plain paper readily available.

If the 250-Sheet Plain Paper Tray Accessory is not included with the printer, it can be purchased separately from an authorized HP dealer.

Note The 250-sheet Plain Paper Tray Accessory is not available in all countries/regions.

Install the 250-Sheet Plain Paper Tray Accessory

Follow these steps to install the 250-Sheet Plain Paper Tray Accessory:

1. Turn off the printer.
2. Select a location for the printer and place the 250-Sheet Plain Paper Tray Accessory in this location.
3. Carefully lift the printer and orient it above the paper tray.
4. Gently place the printer on top of the paper tray.
Load the 250-Sheet Plain Paper Tray Accessory

Follow these instructions to load the 250-Sheet Plain Paper Tray Accessory.

Two parts

The 250-Sheet Plain Paper Tray Accessory has two parts.

1 Base
2 Lower tray

The lower tray has three size adjusters.

1 Paper-width guide
2 Paper-width fence
3 Paper-length guide

Note When changing the paper size in the paper tray, you must set all three paper guides.

Set the paper size

When changing the paper size in the paper tray, all three paper guides must be set to the correct setting.
Follow these steps to set the paper size:

1. Remove the lower tray from the base.

2. Slide the paper-width guide until the arrow is even with the correct setting.

Note To print on legal-sized paper, set the paper-width guide to LTR.

3. Set the paper-width fence by carefully inserting it into the appropriate slots.
1. Tilt the fence forward
2. Insert the fence into the appropriate slots
3. Tilt the fence back until it locks into place

Note To print on legal-sized paper, set the paper-width guide to LTR.

4. Set the paper-length guide by pulling it until the arrow lines up with the paper size.

Note To print on legal-sized paper, pull the paper-length guide all the way out.

Load paper
Follow these steps to load paper:
1. Remove the lower tray from the base.
2. Verify that all three paper guides are set to the correct setting.
3. Insert the paper into the lower tray.
4. Insert the lower tray in the base until it locks into place.

Use the 250-Sheet Plain Paper Tray Accessory

If the 250-Sheet Plain Paper Tray Accessory is not installed on the printer, follow the installation steps.

Note The 250-Sheet Plain Paper Tray Accessory is not available in all countries/regions.

Follow these steps to use the 250-Sheet Plain Paper Tray Accessory:
1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab or the Paper/Quality tab.
3. Find the appropriate drop-down list:

<table>
<thead>
<tr>
<th>Tab</th>
<th>Drop-down list</th>
</tr>
</thead>
<tbody>
<tr>
<td>Printing Shortcuts</td>
<td>Paper source</td>
</tr>
<tr>
<td>Paper/Quality</td>
<td>Source is</td>
</tr>
</tbody>
</table>

Note You do not need to set the paper source on both tabs.

4. Select one of the following options in the drop-down list:
   - **Upper tray**: prints from the In tray.
   - **Lower tray**: prints from the 250-Sheet Plain Paper Tray Accessory.
   - **Upper, then lower**: prints from the In tray. If the In tray is empty, the printer prints from the 250-Sheet Plain Paper Tray Accessory.
   - **Lower, then upper**: prints from the 250-Sheet Plain Paper Tray Accessory. If the accessory is empty, the printer prints from the In tray.

250-Sheet Plain Paper Tray Accessory specifications

**Dimensions**

448 mm (17.64 in) wide x 65 mm (2.56 in) high x 384 (15.12 in) mm deep
**Weight**
1.99 kg (4.40 lb)

**Media weight**
Letter/A4 paper: 60 to 105 g/m² (16 to 28 lbs)

**Media sizes**
US Letter: 216 x 279 mm (8.5 x 11 in)
Executive: 184 x 267 mm (7.25 x 10.5 in)
A4: 210 x 297 mm
A5: 148 x 210 mm
B5: 182 x 257 mm

**Auto Two-Sided Print Accessory with Small Paper Tray**
The Auto Two-Sided Print Accessory with Small Paper Tray is a hardware device that contains a rear tray for small media and a duplexer for two-sided printing on both full-size and small media.

- Postcards and other small media can be printed on two sides automatically when they are fed from the rear tray.
- Photo paper and envelopes can be printed on one side by using the small paper tray.
- Print two-sided documents automatically.

If the Auto Two-Sided Print Accessory with Small Paper Tray is not included with the printer, it can be purchased separately from an authorized HP dealer.

> **Note**  The Auto Two-Sided Print Accessory with Small Paper Tray is not available in all countries/regions.
Install the Auto Two-Sided Print Accessory with Small Paper Tray
Use these steps to install the Auto Two-Sided Print Accessory with Small Paper Tray:
1. Push the two latch handles on the printer rear access door toward each other, and then remove the door.

Do not discard the rear access door. In order to print, the accessory or the rear access door must be attached to the printer.

2. Insert the accessory into the back of the printer until both sides snap into place.

Note Do not press the buttons on either side of the accessory when installing it into the printer. Use the buttons only when removing the accessory from the printer.

Enable the duplexer
Follow these step to enable the duplexer:
1. Open the printer Toolbox.
2. Click the Configuration tab.
3. Click Automatic Two-Sided Printing Module or Auto Two-Sided Print Accessory with small paper tray, and then click Apply.
4. Click OK in the confirmation box that is displayed.
5. Click the X in the upper-right corner to close the screen.
Note After the duplexer is enabled, it is not necessary to re-enable it every time you print.

Print postcards

Guidelines

- Use only cards that meet the specifications for the Auto Two-Sided Print Accessory with Small Paper Tray. For more information, see the Auto Two-Sided Print Accessory with Small Paper Tray specifications.
- When printing a large number of cards, remove the printed material from the printer's Out tray about halfway through the print job.
- Do not exceed the maximum capacity for the rear tray: 100 cards.

Prepare to print

1. Slide the paper-width guide to the left.
2. Pull the paper lever forward and insert the cards. The address side of the cards should face outward.

3. Release the paper lever.
4. Slide the paper-width guide against the edge of the cards.
Print

1. Open the Printer Properties dialog box.
2. On the Printing Shortcuts tab, click Postcard printing, and then specify the following print settings:
   - Paper Size: The appropriate paper size
   - Paper Type: Plain paper
   - Paper Source: Rear tray
3. Select any other print settings that you want, and then click OK.

Use the What's This? help to learn about the features that you see in the Printer Properties dialog box.

Use the Auto Two-Sided Print Accessory with Small Paper Tray when printing from a digital camera

In order to use the Auto Two-Sided Print Accessory with Small Paper Tray when printing directly from a digital camera, you might need to configure the printer to feed paper from the accessory rather than the In tray.

Configure the printer to feed paper from the accessory

Follow these steps to configure the printer to feed paper from the accessory:

1. Press and hold down the Report Page button.
2. While holding down the Report Page button, press the Cancel button twice.

After configuring the printer to feed paper from the accessory, load the photo paper into the accessory and then follow the PictBridge printing instructions.

Note: The printer only needs to be configured to print PictBridge photos from the Auto Two-Sided Print Accessory with Small Paper Tray once. After being configured, the printer will attempt to print from the accessory until the printer is configured to use the In tray for PictBridge photos.
Configure the printer to feed paper from the In tray

Follow these steps to configure the printer to feed paper from the In tray for PictBridge photos:

1. Press and hold down the Report Page button.
2. While holding down the Report Page button, press the Cancel button twice, and then press the Resume button once.

Print small photos

Guidelines

- For high-quality results, use a photo print cartridge in combination with the tri-color print cartridge.
- For maximum fade resistance, use HP Premium Plus Photo Paper and install a photo print cartridge in the printer.
- Learn how to use the available photo printing features.
- Use HP Everyday Photo Paper, Semi-gloss to save money and ink when printing photos.
- Verify that the photo paper that you are using is flat. For information about preventing photo paper from curling, see the photo paper storage instructions.
- Do not exceed the In-tray capacity: 80 sheets of photo paper.

Prepare to print

1. Slide the paper-width guide to the left.
2. Pull the paper lever forward and insert the photo paper.
   The side of the photo paper to be printed on should face outward.

   Note: If the photo paper has a tear-off tab, the tab must point up rather than leading into the printer.

3. Release the paper lever.
4. Slide the paper-width guide against the edge of the photo paper.
Print

1. Open the Printer Properties dialog box.
2. On the Printing Shortcuts tab, click Photo printing-borderless or Photo printing-with white borders as the type of document, and then select the following options:
   - Print quality: Normal, Best, or Max dpi
   - Paper size: The appropriate photo paper size
   - Paper source: Rear tray
   - Paper type: The appropriate photo paper type
   - Orientation: Portrait or Landscape
3. Set the following options as appropriate:
   - HP digital photography options
   - Advanced color settings
   - Color management
   - Grayscale quality
4. Click OK to print the photographs.

Use the What's This? help to learn about the features that you see in the Printer Properties dialog box.

Print envelopes

Guidelines

- Avoid using envelopes that have the following qualities:
  - Have clasps or windows
  - Have thick, irregular, or curled edges
  - Are shiny or embossed
  - Are wrinkled, torn, or otherwise damaged
- Align the envelope edges before inserting them in the rear tray.
- Do not exceed the maximum capacity of the rear tray capacity: 80 envelopes.

Prepare to print

1. Slide the paper-width guide to the left.
2. Pull the paper lever forward and insert the envelopes.
   Insert the envelopes with the address side facing outward and the flap to the left.
3. Release the paper lever.
4. Slide the paper-width guide against the edge of the envelopes.

**Print**

1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab, and then specify the following print settings:
   - **Size is**: The appropriate envelope size
   - **Type is**: The appropriate paper type
   - **Source is**: Rear tray
3. Select any other print settings that you want, and then click OK.

Use the What's This? help to learn about the features that you see in the Printer Properties dialog box.

**Problems with the Auto Two-Sided Print Accessory with Small Paper Tray**

**Paper jam**

Do not clear a paper jam from the front of the printer.
Follow these steps to remove a paper jam from the Auto Two-Sided Print Accessory with Small Paper Tray:

1. Turn off the printer.
2. Press the buttons on the left and right sides of the accessory, and then remove it from the printer.

⚠️ Warning  Remove the Auto Two-Sided Print Accessory with Small Paper Tray before opening it when clearing a paper jam.

3. Remove any paper that is inside the printer.
4. Lift the back lever on the accessory, and then unhook the Small Paper Tray.

5. Tilt the Small Paper Tray forward and open the lower door of the accessory.
1. Tilt the Small Paper Tray
2. Open the lower door

6. Remove any paper that is inside the accessory.
7. Close the accessory, and then secure the back lever to close the accessory.
8. Re-attach the accessory to the printer.

Option for two-sided printing cannot be selected

The printer driver cannot sense the duplexer until a print job is sent to the printer. Print a single-sided document, and then print the two-sided document. The option for using the duplexer will appear in the printer software.

If the option for the duplexer still does not appear, then verify that the following conditions exist:

- The duplexer is attached to the printer.
- The duplexer is enabled in the printer software.
- The media type and size selected on the Paper/Quality tab are supported by the duplexer.

For a list of supported media types and sizes, see the specifications for the duplexer:
- Automatic Two-Sided Printing Accessory
- Auto Two-Sided Print Accessory with Small Paper Tray

Paper size changes when the two-sided printing option is selected

The paper size is not supported by the duplexer.
Binding margin is in the wrong place
1. Open the Printer Properties dialog box.
2. Click the Finishing tab.
3. Verify that the following conditions exist:
   – Flip pages up is not selected for binding along the side (book binding).
   – Flip pages up is selected for binding along the top (tablet binding).
For more information, see two-sided printing.

Only one side of the page prints when the two-sided printing option is enabled
Verify that the following conditions exist:
• The correct print options are set in both the printer software and the software program that you are using.
• The photo paper is not curled, if you are printing on two-sided photo paper. Photo paper should be flat before printing. See storing and handling photo paper for more information.
• The media type and size that is selected on the Paper/Quality tab are supported by the duplexer.
    If the media type or size is not supported by the duplexer, you can print the document by using the manual two-sided printing instructions.

Note Do not try to print a two-sided document on single-sided paper, such as single-sided photo paper.

Colors look faded
If the colors look faded, try printing the two-sided document by using the manual two-sided printing instructions.

Auto Two-Sided Print Accessory with Small Paper Tray specifications

Dimensions when attached to printer
219.3 mm (8.63 in) tall x 320.5 mm (12.62 in) wide x 142.1 mm (5.6 in) deep

Duplexing specifications
For duplexing specifications, including skew, media weight, and media sizes for paper fed into the printer through the printer In tray, see the Automatic Two-Sided Printing Accessory specifications.

Small paper tray specifications
Media thickness: 7-12 mils
Media sizes:

- **Size range:**
  - Width: 81.3 to 106 mm (3.2 to 4.17 in)
  - Length: 116.8 to 304.8 mm (4.6 to 12 in)
- **Cards:**
  - 10x15 cm, 10x15 cm with tab
  - 4x6 in, 4x6 in with tab
  - A6, 105x148 mm
  - Index card, 4x6 in.
  - L, 89x127 mm
- **Photo paper:**
  - 10x15 cm, 10x15 cm with tab
  - 4x6 in, 4x6 in. with tab
  - A6, 105x148 mm
  - L, 89x127 mm, L, 89x127 mm with tab
  - Panoramic 4x10 in, 4x11 in, 4x12 in
- **Envelopes:**
  - No. 10 Envelope, 4.12x9.5 in
  - Japanese envelope No. 4, 90x205 mm
- **Hagaki:**
  Hagaki, 100x148 mm

Tray capacities:

- **Photo paper:**
  - 4x6, L size: Up to 80 sheets
  - Panoramic: Up to 5 sheets
- **Hagaki:**
  Photo: Up to 80 cards
- **Cards:**
  - 4x6: Up to 100
  - A6: Up to 100
- **Envelopes:**
  - No. 10: Up to 20
  - Japanese envelope No. 4: Up to 20
13 Supplies

- Paper
- USB cables
- Accessories
- Print cartridges

Note The availability of supplies and accessories varies by country/region.

Paper
To order media such as HP Premium Paper, HP Premium Inkjet Transparency Film, HP Iron-On Paper, or HP Greeting Cards, go to www.hp.com. Choose a country/region, and then select Buy or Shopping.

USB cables
C6518A HP USB A–B 2-meter cable

Accessories
If an accessory is not included with the printer, it can be purchased separately from an authorized HP dealer.

Note The availability of accessories varies by country/region.

14 Specifications

- Printer specifications

Printer specifications

See the reference guide that came with the printer for complete printer specifications, including this information:

- Types, sizes, and weights of paper and other printing media that can be used with the printer
- Print speeds and resolutions
- Power requirements
- Computer operating system requirements
15 Environmental information

- Environmental statement
- Print cartridge recovery

Environmental statement

Hewlett-Packard continuously improves the design processes of its deskjet printers to minimize the negative impact on the office environment and on the communities where printers are manufactured, shipped, and used.

Reduction and elimination

**Paper use:** The printer's **two-sided printing** capability reduces paper usage and the resulting demands on natural resources. In addition, the **Print Cancel button** allows the user to save paper by quickly canceling a print job as needed. This equipment is suitable for using recycled papers (in accordance with EN 12281:2002).

**Recycled paper:** All paper documentation for this printer is printed on recycled paper.

**Ozone:** Ozone-depleting chemicals such as CFCs have been eliminated from Hewlett-Packard's manufacturing processes.

Recycling

Design for recycling has been incorporated into this printer. The number of materials has been kept to a minimum while ensuring proper functionality and reliability. Dissimilar materials have been designed to separate easily. Fasteners and other connections are easy to locate, access, and remove using common tools. High priority parts have been designed to access quickly for efficient disassembly and repair.

**Printer packaging:** The packaging materials for this printer have been selected to provide maximum protection for the least cost possible, while attempting to minimize environmental impact and facilitate recycling. The rugged design of the HP Deskjet printer assists in minimizing both packaging materials and damage rates.

**Plastic parts:** All major plastics and plastic parts are marked according to international standards. All plastic parts used in the printer housing and chassis are technically recyclable and all use a single polymer.

**Product longevity:** To ensure the longevity of the HP Deskjet printer, HP provides the following:

- **Extended warranty:** Details can be found in the reference guide that came with the printer.
- **Replacement parts and consumables** are available for a limited period after production has stopped.
- **Product take-back:** To return this product to HP at the end of its useful life, go to www.hp.com/recycle. To return empty print cartridges to HP, see print cartridge recovery.

**Note** The extended warranty and product take-back options are not available in all countries/regions.
Recycling information for the European Union

Important recycling information for our customers in the European Union: To preserve the environment, this product must be recycled after its useful life as required by law. The symbol below indicates that this product may not be disposed in the general trash. Please return the product for proper recovery/disposal to the authorized collection location nearest to you. For more information regarding return and recycling of HP products generally, please visit www.hp.com/hpinfo/globalcitizenship/environment/recycle/index.html.

Energy consumption

This printer was designed with energy conservation in mind. Not only does this save natural resources, but it also saves money without affecting the high performance of the printer. The printer meets the Federal Energy Management Program (FEMP) requirements, the US government energy savings initiative aimed at reducing power when the printer is turned OFF.

This product qualifies for the ENERGY STAR® Program. ENERGY STAR is a voluntary program established to encourage the development of energy-efficient office products.

ENERGY STAR is a U.S. registered service mark of the U.S. Environmental Protection Agency. As an ENERGY STAR partner, Hewlett-Packard Company has determined that this product meets ENERGY STAR guidelines for energy efficiency.

Energy consumption in standby mode: See the reference guide for energy consumption specifications.

Energy consumption in off-mode: When the printer is off, an amount of energy is still being consumed. Energy consumption can be prevented by turning the printer power off, and then disconnecting the end of the printer power cord from the electrical source.

Print cartridge recovery

Customers interested in recycling their genuine HP print cartridges can participate in HP's Planet Partner's Program for inkjet cartridges. HP offers this program in more countries/regions than any other inkjet cartridge manufacturer in the world. This program is provided as a free service to HP customers as an environmentally sound solution for these products at end-of-life.
To participate, simply follow the directions provided on HP's Web site at this address: www.hp.com/recycle. This service is not available in all countries/regions. Customers may be asked for their name, phone number, and address.

Because HP's unique recycling processes are very sensitive to material contamination, we cannot take back and recycle cartridges from other manufacturers. The end products of the recycling process are used in the manufacture of new products, and HP must ensure the composition of the material is consistent. To do that, we recycle only HP original cartridges. This program does not extend to refilled cartridges.

Returned cartridges are separated for purification into raw materials for use in other industries to manufacture new products. Examples of products made from recycled HP print cartridge materials include automobile parts, trays used in microchip fabrication processes, copper wire, steel plates, and the precious materials used in electronics. Depending on the model, HP is able to recycle up to 65% of the print cartridge by weight. The remaining parts that cannot be recycled (ink, foam, and composite parts) are disposed of in an environmentally responsible manner.
