HP Photosmart Software Help
Accessibility
Your HP printer provides a number of features that make it accessible for people with disabilities.

Visual
The printer software is accessible for users with visual impairments or low vision through the use of Windows accessibility options and features. It also supports most assistive technology such as screen readers, Braille readers, and voice-to-text applications. For users who are color blind, colored buttons and tabs used in the software and on the HP printer have simple text or icon labels that convey the appropriate action.

Mobility
For users with mobility impairments, the printer software functions can be executed through keyboard commands. The software also supports Windows accessibility options such as StickyKeys, ToggleKeys, FilterKeys, and MouseKeys. The printer doors, buttons, paper trays, and paper guides can be operated by users with limited strength and reach.

Support
For more details about the accessibility of this product and HP's commitment to product accessibility, visit HP's Web site at: www.hp.com/accessibility.

Terms and conventions
The following terms and conventions are used in this user's guide.

Terms
The HP Deskjet printer is also referred to as the HP Deskjet, HP printer, or printer.

Cautions and warnings
A Caution indicates possible damage to the HP Deskjet printer or to other equipment. For example:

Caution  Do not touch the print cartridge ink nozzles or copper contacts. Touching these parts will result in clogs, ink failure, and bad electrical connections.

A Warning indicates possible harm to you or to others. For example:

Warning Keep both new and used print cartridges out of the reach of children.

Congratulations! You have purchased an HP Deskjet printer that is equipped with several exciting features:

- **User friendly**: Easy to install and operate.
- **Borderless printing**: Print 4 x 6 inch photos to the edges of the paper by using the borderless printing feature.
- **Ink level indicator**: Know the approximate ink level of each print cartridge with the onscreen Ink Status window. For information, see View estimated ink levels Ink Status window.
- **Ink-backup mode**: Continue printing with one print cartridge when the other print cartridge has run out of ink. For information, see Ink-backup mode.
3 Get started

- Printer at a glance
- Power button and light
- Paper tray
- Print cartridges
- Ink-backup mode

Printer at a glance

Click the links below to learn about the printer features.

Power button and light

Use the Power button to turn the printer on and off. It can take a few seconds for the printer to turn on after you press the Power button.

The Power light flashes when the printer is processing.

⚠️ Caution   Always use the Power button to turn the printer on and off. Using a power strip, surge protector, or a wall-mounted switch to turn the printer on and off might cause printer failure.

Paper tray

The fold-out paper tray holds paper and other media to be printed. Unfold the paper tray before printing.

- Unfold the paper tray
- Use the paper tray
Unfold the paper tray

To unfold the paper tray
1. Raise the printer cover.
2. Lower the paper tray.
3. Fold out the tray extension.
4. Lower the printer cover.
Use the paper tray

Print on different sizes of media by sliding the paper guide to the right or to the left. The printer deposits printed pages on the top of the paper tray.

Print cartridges

Two print cartridges can be used with the printer.

1 Tri-color print cartridge
2 Black print cartridge

Note Your printer might be packaged with only a tri-color print cartridge. For better results, install a black print cartridge in addition to the tri-color print cartridge. You can print without a black print cartridge but doing so can cause the printer to print more slowly and printed colors to differ from those you would see if a black print cartridge and a tri-color print cartridge were installed.

To order print cartridges, go to www.hp.com. Choose your country/region, and then click Buy or Online Shopping.

Replace print cartridges

When buying print cartridges, look for the print cartridge selection number.
You can find the selection number in three places:

- Selection number label: Look at the label on the print cartridge that you are replacing.

- Printer documentation: For a list of print cartridge selection numbers, see the reference guide that came with the printer.

- Print Cartridge Ordering Information dialog box: For a list of print cartridge selection numbers, open the printer Toolbox, click the Estimated Ink Level tab, and then click the Print Cartridge Information button.

If a print cartridge runs out of ink, the printer can operate in ink-backup mode. For more information, see Ink-backup mode.

For information about installing a replacement print cartridge, see Installation instructions.

**Ink-backup mode**

Use the ink-backup mode to operate the printer with only one print cartridge. The ink-backup mode is initiated when a print cartridge is removed from the print cartridge cradle.

**Note** When the printer operates in ink-backup mode, a message is displayed on screen. If the message is displayed and two print cartridges are installed in the printer, verify that the protective piece of plastic tape has been removed from each print cartridge. When plastic tape covers the print cartridge contacts, the printer cannot detect that the print cartridge is installed.

For more information about ink-backup mode, see the following topics:

- Ink-backup mode output
- Exit ink-backup mode

**Ink-backup mode output**

Printing in ink-backup mode slows the printer and affects the quality of printouts.
<table>
<thead>
<tr>
<th>Installed print cartridge</th>
<th>Result</th>
</tr>
</thead>
<tbody>
<tr>
<td>Black print cartridge</td>
<td>Colors print as grayscale.</td>
</tr>
<tr>
<td>Tri-color print cartridge</td>
<td>Colors print but black is grayed and is not a true black.</td>
</tr>
</tbody>
</table>

**Exit ink-backup mode**

Install two print cartridges in the printer to exit ink-backup mode.

For information about installing a print cartridge, see *Installation instructions*. 
4 Connect to the printer

- USB

**USB**

The printer connects to the computer with a universal serial bus (USB) cable. The computer must be running Windows 98 SE or later to use a USB cable.

*Note*  For best printing performance, use a USB 2.0 compatible cable.

For instructions about connecting the printer with a USB cable, see the setup poster that came with the printer.

*Note*  A USB cable might not be packaged with your printer.
5 Print photos

The printer software offers several features that make printing digital photos easier and improve photo quality.

Learn how to print photos

Print a borderless photo. Print a photo with a border.

Learn how to perform other photo printing tasks

- Use HP Real Life technologies to touch up photos. For more information, see HP Real Life Digital Photography options.
- Print an Exif Print-formatted photo if you have Exif Print-enabled software.
- Prevent photo paper from curling by following the photo paper storage and handling guidelines.
- Use HP Everyday Photo Paper to save money and ink when printing photos.

Print borderless photos

To print borderless photos, use 4 x 6 inch photo paper with a 0.5 inch tab (10 x 15 cm with 1.25 cm tab); the photo prints without borders on three sides and with a small border on the bottom edge that you tear off to make the photo completely borderless.

Guidelines

- Use 4 x 6 inch photo paper with a 0.5 inch tab (10 x 15 cm with 1.25 cm tab).
- Do not print borderless photos in ink-backup mode. Always have two print cartridges installed in the printer. For more information, see Ink-backup mode.
- Open the file in a software program such as HP Photosmart software and resize the photo. Ensure that the size corresponds to the paper size that you want to use.
- For maximum fade resistance, use HP Premium Plus Photo Paper.
- Verify that the photo paper that you are using is flat. For information about preventing photo paper from curling, see the photo paper storage instructions.
- Do not exceed the paper tray capacity: 15 sheets of photo paper.

Prepare to print

1. Slide the paper guide all the way to the left.
2. Verify that the photo paper is flat.
3. Place the photo paper in the right side of the tray. The side to be printed on should face down and the short edge should point towards the printer.
   If you are using photo paper that has a tear-off tab, verify that the tab is pointing away from the printer.
4. Push the paper into the printer until it stops.
5. Slide the paper guide firmly against the edge of the paper.

Print

Note  If your software program includes a photo printing feature, follow the instructions that are provided with the software program. Otherwise, follow these instructions.

1. Open the photo in a software program that allows editing, such as HP Photosmart software.
2. Open the Printer Properties dialog box.
3. Click the Printing Shortcuts tab.
4. In the What do you want to do? drop-down list, click Photo printing-borderless, and then select the following options:
   - Print quality: Normal or Best
     Note  For maximum dpi quality, go to the Paper/Quality tab, and then click Maximum dpi in the Print quality drop-down list.
   - Paper type: An appropriate photo paper type
   - Paper size: An appropriate borderless photo paper size
   - Orientation: Portrait or Landscape
5. Set the HP Real Life Digital Photography options as appropriate.
6. Click OK to print the photo.
   If you printed on photo paper with a tear-off tab, remove the tab to make the document completely borderless.

Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.
Print photos with a border

Guidelines
- For maximum fade resistance, use HP Premium Plus Photo Paper.
- Verify that the photo paper that you are using is flat. For information about preventing photo paper from curling, see the photo paper storage instructions.
- Do not exceed the paper tray capacity: 15 sheets of photo paper.

Prepare to print
1. Slide the paper guide all the way to the left.
2. Verify that the photo paper is flat.
3. Place the photo paper in the right side of the tray. The side to be printed on should face down and the short edge should point towards the printer.
4. Push the paper into the printer until it stops.
5. Slide the paper guide firmly against the edge of the paper.

Print
- Note If your software program includes a photo printing feature, follow the instructions that are provided with the software program. Otherwise, follow these instructions.

1. Open the photo in a software program that allows editing, such as HP Photosmart software.
2. Open the Printer Properties dialog box.
3. Click the Printing Shortcuts tab.
4. In the What do you want to do? drop-down list, click Photo printing-with white borders, and then select the following options:
   – Print quality: Normal or Best
   - Note For maximum dpi quality, go to the Paper/Quality tab, and then click Maximum dpi in the Print quality drop-down list.
   – Paper type: An appropriate photo paper type
   – Paper size: An appropriate photo paper size
   – Orientation: Portrait or Landscape
5. Set the HP Real Life Digital Photography options as appropriate.
6. Click OK to print the photo.

Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.

**HP Real Life Digital Photography options**

HP Real Life technologies make it easy for you to get better photos. Automatic red-eye removal and adaptive lighting to enhance detail in shadows are just a few of the technologies included.

Use the HP Real Life technologies dialog box to set these options:

- **Automatic red-eye removal**: Click On to automatically remove or reduce red-eye in the photo.
- **Photo brightening**: Automatically enhance colors and contrast for washed-out photos. Click Automatic to allow the printer software to intelligently brighten your photo, focusing only on areas that need adjustment.
- **Adaptive lighting**: Adjust the exposure in dark areas of photos to bring out detail. Click Automatic to allow the printer software to balance lightness and darkness automatically.
- **SmartFocus**: Enhance the image quality and clarity of low resolution images such as those downloaded from the Internet. Click On to allow the printer software to sharpen details in the image automatically.
- **Sharpness**: Adjust the image sharpness to your preference. Click Automatic to allow the printer software to set the level of sharpening for the image automatically.
- **Smoothing**: Soften an image. Click Automatic to allow the printer software to set the level of smoothing for the image automatically.

To open the HP Real Life Digital Photography dialog box

1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab, and then click the Real Life digital photography button.

**Exif Print**

Exif Print (Exchangeable Image File Format 2.2) is an international digital imaging standard that simplifies digital photography and enhances printed photos. When a photo is taken with an Exif Print-enabled digital camera, Exif Print captures information such as exposure time, type of flash, and color saturation, and stores it in the image file. The
printer software then uses this information to automatically perform image-specific enhancements to create outstanding photos.

To print Exif Print-enhanced photos, you must have the following items:

- A digital camera that supports Exif Print
- Exif Print-enabled photo software, such as HP Photosmart software

To print Exif Print-enhanced photos

1. Open the photo in an Exif Print-enabled software program that allows editing, such as HP Photosmart software.
2. Open the Printer Properties dialog box.
3. Click the **Paper/Quality** tab.
4. In the **Type is** drop-down list, select the appropriate photo paper type.
5. In the **Print Quality** drop-down list, click **Normal**, **Best**, or **Maximum dpi**.
6. Select any other print settings that you want, and then click **OK**.

   The printer software automatically optimizes the printed image.

### Store and handle photo paper

Follow these instructions to maintain the quality of HP brand photo paper.

#### Storage

- Keep unused photo paper in a plastic bag. Store the packaged photo paper on a flat surface in a cool place.
- When you are ready to print, remove only the paper that you plan to use immediately from the plastic bag. When you have finished printing, return any unused photo paper to the plastic bag.
- Do not leave unused photo paper in the paper tray. The paper might start to curl, which can reduce the quality of your photos.

#### Handling

- Always hold photo paper by its edges. Fingerprints on photo paper can reduce print quality.
- If the corners of the photo paper curl more than 10 mm (0.4 inch), flatten the paper by putting it in the storage bag, and then gently bending it in the opposite direction of the curl until the paper lies flat.

   Photo paper should be flat before it is printed on.

### Save money when printing photos

To save money and ink when printing photos, use HP Everyday Photo Paper and set the print quality to **Normal**.

HP Everyday Photo Paper is designed to create quality photos with less ink.

**Note** For higher-quality photos, use HP Premium Plus Photo Paper and set the print quality to **Best** or **Maximum dpi**.
Print other documents

**Printing tips**: Minimize your cost and effort while maximizing the quality of your printouts with **printing tips**.

**Printer software**: Learn about the **printer software**.

### Print e-mail

**Guidelines**
Do not exceed the paper tray capacity: 80 sheets of plain paper.

**Prepare to print**
1. Slide the paper guide all the way to the left.
2. Place plain paper in the right side of the tray. The side to be printed on should face down.
3. Push the paper into the printer until it stops.
4. Slide the paper guide firmly against the edge of the paper.

Print
1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab.
3. In the What do you want to do? drop-down list, click General everyday printing or Fast/Economical printing, and then specify the following print settings:
   - Paper type: Plain paper
   - Paper size: An appropriate paper size
4. Select any other print settings that you want, and then click OK.

Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.

Print documents

Guidelines
- For draft documents, use Fast/Economical printing.
- Save paper with two-sided printing.
- Do not exceed the paper tray capacity: 80 sheets of paper.

Prepare to print
1. Slide the paper guide all the way to the left.
2. Place plain paper in the right side of the tray. The side to be printed on should face down.
3. Push the paper into the printer until it stops.

   Note The paper will extend over the edge of the tray.

4. Slide the paper guide firmly against the edge of the paper.

Print
1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab.
3. In the What do you want to do? drop-down list, click General everyday printing, and then specify the following print settings:
   – Paper type: Plain paper
   – Paper size: An appropriate paper size
4. Select the following print settings:
   – Print quality if you want a print quality other than Normal.
   – Print on both sides if you want to print on both sides of the paper.
     For more information, see Two-sided printing.
5. Select any other print settings that you want, and then click OK.

Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.

Print letters

Guidelines
● For information about printing an envelope for your letter, see envelopes.
● Do not exceed the paper tray capacity: 80 sheets of paper.

Prepare to print
1. Slide the paper guide all the way to the left.
2. Place plain paper in the right side of the tray. The side to be printed on should face down.

   Note If you are using letterhead paper, the letterhead should face down and point toward the printer.
3. Push the paper into the printer until it stops.
4. Slide the paper guide firmly against the edge of the paper.

Print
1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab.
3. In the What do you want to do? drop-down list, click Presentation printing, and then specify the following print settings:
   - Paper type: Plain paper
   - Paper size: An appropriate paper size
4. Select any other print settings that you want, and then click OK.
Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.

Print envelopes

Guidelines
● Avoid using envelopes that have the following features:
  – Clasps or windows
  – Thick, irregular, or curled edges
  – Shiny or embossed coatings
  – Wrinkles, tears, or other damage
● You can print a single envelope or multiple envelopes.
● Align the envelope edges before inserting the envelopes in the paper tray.
● Do not exceed the paper tray capacity: 10 envelopes.

Prepare to print
1. Slide the paper guide all the way to the left.
2. Place the envelopes in the right side of the tray. The side to be printed on should face down. The flap should be on the left side.
3. Push the envelopes into the printer until they stop.
4. Slide the paper guide firmly against the edge of the envelopes.

Print

1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab, and then select the following print settings:
   – **Size is**: An appropriate envelope size
   – **Type is**: Plain paper
3. Select any other print settings that you want, and then click **OK**.

Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.

**Print postcards**

**Guidelines**

Do not exceed the paper tray capacity: 20 postcards.

**Prepare to print**

1. Slide the paper guide all the way to the left.
2. Place the cards in the right side of the tray. The side to be printed on should face down and the short edge should point toward the printer.
3. Push the cards into the printer until they stop.
4. Slide the paper guide firmly against the edge of the cards.

Print

1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab, and then specify the following print settings:
   – **Size is**: An appropriate card size
   – **Type is**: An appropriate card type
   – **Print quality**: Normal or Best
3. Select any other print settings that you want, and then click **OK**.
Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.

**Note** If an out-of-paper message is displayed, see Out of paper message for help in resolving the problem.

### Print index cards and other small media

**Guidelines**
Do not exceed the paper tray capacity: 20 cards.

**Prepare to print**
1. Slide the paper guide all the way to the left.
2. Place the cards in the right side of the tray. The side to be printed on should face down and the short edge should point toward the printer.
3. Push the cards into the printer until they stop.
4. Slide the paper guide firmly against the edge of the cards.

**Print**
1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab, and then specify the following print settings:
   - **Size is**: An appropriate card size
   - **Type is**: Plain paper
3. Select any other print settings that you want, and then click **OK**.

Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.

**Note** If an out-of-paper message is displayed, see Out of paper message for help in resolving the problem.

### Print labels

**Guidelines**
- Use only paper, plastic, or clear labels that are designed specifically for inkjet printers.
- Use only full sheets of labels.
Avoid using labels that are sticky, wrinkled, or pulling away from the protective backing.
Do not exceed the paper tray capacity: 15 sheets of labels (use only Letter or A4-size sheets).

Prepare to print
1. Slide the paper guide all the way to the left.
2. Fan the edges of the label sheets to separate them, and then align the edges.
3. Place the label sheets in the right side of the tray. The label side should face down.
4. Push the sheets into the printer until they stop.
5. Slide the paper guide firmly against the edge of the sheets.

Print
Note If your software program includes a label printing feature, follow the instructions that are provided with the software program. Otherwise, follow the instructions below.
1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab.
3. In the What do you want to do? drop-down list, click General everyday printing, and then specify the following print settings:
   – Paper type: Plain paper
   – Paper size: An appropriate paper size
4. Click OK.
Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.

Print CD/DVD tattoos
Note This feature might not be available in your country/region.

Guidelines
1. See the instructions that are included with the CD/DVD tattoo for the most current printing tips.
2. To avoid damaging the printer, do not feed a CD/DVD tattoo through the printer more than once.
● Make sure the CD/DVD tattoo covers the entire backing sheet with no exposed spaces. Separating any part of the CD/DVD tattoo from the protective backing sheet before printing could damage the printer.
● Avoid using a CD/DVD tattoo that is pulling away from the protective backing, or that is wrinkled, curled, or damaged in any way.
● Do not exceed the input tray capacity: 1 sheet of CD/DVD tattoo paper.

Prepare to print
1. Raise the output tray, and then remove all paper from the input tray.
2. Slide the paper guide all the way to the left.
3. Place one sheet of CD/DVD tattoo paper in the right side of the input tray. The side to be printed on should face down.
4. Push the paper into the printer until it stops.
5. Slide the paper guide firmly against the edge of the paper.

6. Lower the output tray.

Print
1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab, and then specify the following print settings:
   - Size is: 5x7in.
   - Type is: HP CD/DVD Tattoo
   - Print quality: Best
3. Select any other print settings that you want, and then click OK.

Use the What’s This? help to learn about the features that appear in the Printer Properties dialog box.

Print transparencies

Guidelines
● For great results, use HP Premium Inkjet Transparency Film.
● Do not exceed the paper tray capacity: 20 transparencies.

Prepare to print
1. Slide the paper guide all the way to the left.
2. Place the transparencies in the right side of the tray. The side to be printed should face down and the adhesive strip should face up and toward the printer.
3. Carefully push the transparencies into the printer until they stop, so that the adhesive strips do not catch on one another.
4. Slide the paper guide firmly against the edge of the transparencies.

Print
1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab.
3. In the What do you want to do? drop-down list, click Presentation printing, and then specify the following print settings:
   - Paper type: An appropriate transparency film
   - Paper size: An appropriate paper size
4. Select any other print settings that you want, and then click OK.

Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.

Print brochures

Guidelines
- Open the file in a software program and assign the brochure size. Ensure that the size corresponds to the paper size on which you want to print the brochure.
- Do not exceed the paper tray capacity: 30 sheets of brochure paper.

Prepare to print
1. Slide the paper guide all the way to the left.
2. Place the paper in the right side of the tray. The side to be printed on should face down.
3. Push the paper into the printer until it stops.
4. Slide the paper guide firmly against the edge of the paper.
Print
1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab.
3. Specify the following print settings:
   – **Size is**: An appropriate paper size
   – **Type is**: An appropriate HP inkjet paper or other paper type
   
   **Note**  Not all paper sizes and types are available for borderless printing.
4. Set the print quality to **Best**.
5. Click the Basics tab, and then set the orientation.
6. Click the Finishing tab, and then select **Print on both sides** to print on both sides of the paper.
   For more information, see Two-sided printing.
7. Click **OK** to print.

Use the **What's This? help** to learn about the features that appear in the Printer Properties dialog box.

Print greeting cards

**Greeting cards**
- Unfold prefolded cards, and then place them in the paper tray.
- For great results, use HP Greeting Card Paper.
- Do not exceed the paper tray capacity: 20 cards.

**Prepare to print**
1. Slide the paper guide all the way to the left.
2. Fan the edges of the greeting cards to separate them, and then align the edges.
3. Place the greeting cards in the right side of the tray. The side to be printed on should face down.
4. Push the cards into the printer until they stop.
5. Slide the paper guide firmly against the edge of the cards.
Print

- **Note** If your software program includes a greeting card printing feature, follow the instructions that are provided with the software program. Otherwise, follow the instructions below.

1. Open the **Printer Properties** dialog box.
2. Click the **Paper/Quality** tab, and then specify the following print settings.
   - **Size is**: An appropriate card size
   - **Type is**: An appropriate card type
   - **Print quality**: Normal
3. Select any other print settings that you want, and then click **OK**.

Use the **What's This? help** to learn about the features that appear in the Printer Properties dialog box.

Print booklets

Booklet printing automatically arranges and resizes the pages of a document so that when the document is folded into a booklet, the page order is correct.

For example, when a four-page booklet is printed on both sides of the paper, the pages are reordered and printed like this:

![Diagram of a four-page booklet]

**Guidelines**

Do not exceed the paper tray capacity: 80 sheets of paper.

**Prepare to print**

1. Slide the paper guide all the way to the left.
2. Place plain paper in the right side of the tray. The side to be printed on should face down.
3. Push the paper into the printer until it stops.
4. Slide the paper guide firmly against the edge of the paper.

Print
1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab.
3. In the What do you want to do? drop-down list, click Two-sided, Duplex, printing.
4. In the Booklet layout drop-down list, click one of the following binding options:
   – Left edge booklet
   – Right edge booklet
5. Select any other print settings that you want, and then click OK.
6. When prompted, reload the printed pages in the paper tray as shown below.

7. Click Continue to finish printing the booklet.

Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.
Print posters

Guidelines

- For poster printing, sections of the poster are automatically arranged on individual sheets that can be taped together. After the sections of a poster have been printed, trim the edges of the sheets and tape the sheets together.

- Do not exceed the paper tray capacity: 80 sheets of paper.

Prepare to print

1. Slide the paper guide all the way to the left.
2. Place plain paper in the right side of the tray. The side to be printed on should face down.
3. Push the paper into the printer until it stops.
4. Slide the paper guide firmly against the edge of the paper.

Print

1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab, and then specify the following print settings:
   - **Size is:** An appropriate paper size
   - **Type is:** Plain paper
3. Click the Finishing tab, and then select the number of sheets for the poster.
4. Click the Basics tab, and then specify the orientation.
5. Select any other print settings that you want, and then click **OK**.

Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.
Print iron-on transfers

Guidelines

● When printing a mirror image, the text and the pictures are horizontally reversed from what is displayed on the computer screen.

● Do not exceed the paper tray capacity: 10 iron-on transfers.

Prepare to print

1. Slide the paper guide all the way to the left.
2. Place the iron-on transfer paper in the right side of the tray. The side to be printed on should face down.
3. Push the paper into the printer until it stops.
4. Slide the paper guide firmly against the edge of the paper.

Print

Note If your software program includes an iron-on transfer printing feature, follow the instructions that are provided with the software program. Otherwise, follow the instructions below.

1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab, and then specify the following print settings:
   – **Size is**: An appropriate paper size
   – **Type is**: Other specialty paper
   – **Print quality**: Normal or Best
3. Click the Basics tab, and then set the orientation to Mirror image.

Note Some iron-on transfer software programs do not require you to print a mirror image.

4. Select any other print settings that you want, and then click OK.
Use the What's This? help to learn about the features that appear in the Printer Properties dialog box.
7 Printing tips

Save time
● Use the Printing Shortcuts tab.
● Set the order that the pages print.

Save money
● Use Fast/Economical printing.
● Print multiple pages on a single sheet of paper.
● Print in grayscale.
● Print a two-sided document.
● Use HP Everyday Photo Paper to save money and ink when printing photos.

Enhance the quality of printouts
● Preview the document before printing it.
● Print on a custom paper size.
● Select the correct paper type.
● Change the print speed and quality.
● View the print resolution.
● Achieve the highest printing resolution with Maximum dpi.
● Resize the document as needed.

Printing shortcuts
Use printing shortcuts to print with print settings that you use often. The printer software has several specially designed printing shortcuts that are available in the Printing Shortcuts list.

Note When you select a printing shortcut the appropriate printing options are automatically displayed. You can leave them as is or change them.

Printing shortcuts
Use the Printing Shortcuts tab for the following print tasks:
● General everyday printing
● Photo printing–borderless
● Photo printing–with white borders
● Fast/Economical printing
● Presentation printing
● Two-sided, duplex, printing

Fast/Economical printing
Use Fast/Economical printing to produce draft-quality printouts quickly.
To use Fast/Economical printing
1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab.
3. In the What do you want to do? drop-down list, click Fast/Economical printing.
4. Specify the print settings that you want, and then click OK.

General Everyday printing
Use General Everyday printing to print documents quickly.
- Documents
- E-mail

Presentation printing
Use Presentation printing to print high-quality documents, including:
- Letters
- Brochures
- Transparencies

Select a paper type
When printing a higher-quality document, HP recommends that you select a specific paper type.

To select a specific paper type
1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab.
3. In the Paper type drop-down list, select an appropriate paper type.
4. Select any other print settings that you want, and then click OK.

Change the print speed or quality
The HP Deskjet automatically chooses a print quality and speed setting depending on the paper type setting you select. You can also change the print quality setting to customize the speed and quality of the print process.

Print quality settings
- Fast Draft produces draft-quality output at the fastest printing speed, while using the least amount of ink.
- Fast Normal produces higher quality output than the Fast Draft setting and prints more quickly than the Normal setting.
- Normal provides the best balance between print quality and speed and is appropriate for most documents.
- **Best** provides the best balance between high quality and speed and can be used for high quality prints. For most documents, the Best setting prints more slowly than the Normal setting.
- **Maximum dpi** optimizes the dots per inch (dpi) that the HP Deskjet prints. Printing in maximum dpi takes longer than printing with other settings and requires a large amount of disk space. For more information, see Maximum dpi.

**To select a print quality and speed**
1. Open the **Printer Properties** dialog box.
2. Click the **Paper/Quality** tab.
3. In the **Type is** drop-down list, select the type of paper that you have loaded.
4. In the **Print quality** drop-down list, select the appropriate quality setting for your project.

**Print resolution**
The printer software displays the print resolution in dots per inch (dpi). The dpi varies according to the paper type and print quality that you select in the printer software.

**To view the print resolution**
1. Open the **Printer Properties** dialog box.
2. Click the **Paper/Quality** tab.
3. In the **Type is** drop-down list, select the type of paper that you have loaded.
4. In the **Print quality** drop-down list, select the appropriate print quality setting for your project.
   - The print resolution dpi is displayed beneath the Print quality drop-down list.

**Maximum dpi**
Use maximum dpi mode to print high-quality, sharp images.
To get the most benefit from maximum dpi mode, use it to print high-quality images such as digital photographs. When you select the maximum dpi setting, the printer software displays the optimized dots per inch (dpi) that the HP Deskjet will print.

Printing in maximum dpi takes longer than printing with other settings and requires a large amount of disk space.

**To print in Maximum dpi mode**
1. Open the **Printer Properties** dialog box.
2. Click the **Paper/Quality** tab.
3. In the **Type is** drop-down list, select the appropriate paper type.
4. In the **Print quality** drop-down list, click **Maximum dpi**.
   - The print resolution is displayed in maximum dpi beneath the print quality setting.
5. Select any other print settings that you want, and then click **OK**.
Print in grayscale

To print in grayscale
1. Open the Printer Properties dialog box.
2. Click the Color tab.
3. Select the Print in grayscale check box, and then select a grayscale option.
4. Select any other print settings that you want, and then click OK.

Set the page order

The page order determines the order in which your multipage documents print.

To set the page order
1. Open the Printer Properties dialog box.
2. Click the Basics tab.
3. Select one of the following options:
   - Front to back: The first page of the document will be on top when the document is finished printing. You do not have to reorder the printed pages.
   
   Note This option requires more time for printing.

   - Back to front: The last page of the document will be on top when the document is finished printing. You have to reorder the printed pages.
4. Select any other print settings that you want, and then click OK.

Set a custom paper size

Use the Custom Paper Size dialog box to print on a special paper size.

Note This feature is not available for all paper types.

To define a custom paper size
1. Open the Printer Properties dialog box.
2. Click the Paper/Quality tab.
3. Click the Custom button.
   The Custom paper size dialog box is displayed.
4. In the Name drop-down list, click a custom paper size name.
5. In the Width and Length boxes, type the dimensions of the custom paper size.
   The minimum and maximum dimensions are displayed beneath each of the boxes.
6. Click the unit of measurement: Inches or Millimeters.
7. Click Save to save the custom paper size.
8. Click OK to exit the Custom paper size dialog box.
9. To use the custom paper size, select its name in the Size is drop-down list.
Print multiple pages on a single sheet of paper

Use the printer software to print multiple pages of a document on a single sheet of paper. The printer software automatically resizes the document text and images to fit on the printed page.

To print multiple pages on a single sheet of paper
1. Open the Printer Properties dialog box.
2. Click the Finishing tab.
3. In the Pages per sheet drop-down list, select the number of pages that you want to appear on each sheet of paper.
4. If you want a border to appear around each page image that is printed on the sheet of paper, select the Print page borders check box.
5. In the Page order is drop-down list, select a layout for the pages.
   A preview of the page order is displayed at the top of the Finishing tab.
6. Select any other print settings that you want, and then click OK.

Resize a document

Use the printer software to print a document that is formatted for one paper size on another paper size. Doing this can be useful if you do not have the correct paper size available.

For example, if you have created a document that is formatted for letter-size paper, but you do not have any letter-size paper available, you can print the document on another paper size that is available.

To resize a document for a different paper size
1. Open the Printer Properties dialog box.
2. Click the Effects tab.
3. Select the Print document on check box, and then select the target paper size in the drop-down list.
   The target paper size is the size of the paper on which you are printing, not the size for which the document was formatted.
4. Select the Scale to fit check box.
5. Select any other print settings that you want, and then click OK.

Print preview

Use the print preview function to view a printout on your computer before printing a document. If the printout does not look correct, you can cancel the print job and adjust the print settings as needed.

To preview a printed document
1. Open the Printer Properties dialog box.
2. Click the Basics tab.
3. Select the Show print preview check box.
4. Select any other print settings that you want, and then click OK. Before the document prints, a preview is displayed.

5. Do one of the following:
   – Click OK to print the document.
   – Click Cancel to cancel the print job. Adjust the print settings as needed before printing the document.

Two-sided printing

Use two-sided printing, also called duplexing, to print on both sides of the paper. Printing on both sides of the paper is not only economical, but environmentally conscious as well.

To print a two-sided document
1. Open the Printer Properties dialog box.
2. Click the Printing Shortcuts tab.
3. In the What do you want to do? drop-down list, click Two-sided, duplex printing.
4. In the Print on both sides drop-down list, click Manually.
5. Select any other print settings that you want, and then click OK.
   The printer prints the odd-numbered pages first.
6. After the odd-numbered pages have been printed, reload the printed pages with the printed side facing up.

7. Click Continue to print the even-numbered pages.

To create a two-sided document with a binding, see Bound two-sided documents.

Bound two-sided documents

If you want to bind printed pages into a book, you can adjust the print settings to accommodate the binding.

Bound two-sided documents can have a book binding (binding on the side) or a tablet binding (binding at the top). Book binding is the most common type of binding.

To print a two-sided document with a book binding
➔ Follow the instructions for basic two-sided printing.

To print a two-sided document with a tablet binding
1. Open the Printer Properties dialog box.
2. Click the Finishing tab.
3. Select the following check boxes:
   – Print on both sides
   – Flip pages up
4. Select any other print settings that you want, and then click OK.
   The printer prints the odd-numbered pages first.
5. After the odd-numbered pages have been printed, reload the printed pages, with the
   printed side facing up according to the document orientation, portrait or landscape.

6. Click **Continue** to print the even-numbered pages.
8 Printer software

- Make the HP Deskjet the default printer.
- Set the default print settings for all documents.
- Use the Printer Properties dialog box to select printing options.
- Use the What's This? help to learn more about specific print settings.
- View the Ink Status window for the approximate ink level of each print cartridge.
- Download printer software updates for the latest features and improvements.

Make the HP Deskjet the default printer

You can set the HP Deskjet as the default printer to use from any software program. This means that the HP Deskjet is automatically selected in the printer drop-down list when you click Print from the File menu in a software program.

To set the default printer
1. On the Windows taskbar, click Start, point to Settings, and then click Printers.
2. Right-click the HP Deskjet icon, and then click Set as Default Printer.

Set default print settings

The HP Deskjet uses default print settings for all documents unless you specify other settings.
To save time when printing, set the default print settings to options that you use often. That way, you do not have to specify the options every time you use the printer.

To change the default print settings
1. Double-click the HP Digital Imaging Monitor icon on the right side of the Windows taskbar.

The HP Solution Center is displayed.
2. In the HP Solution Center, click **Settings**, point to **Print Settings**, and then click **Printer Settings**.
3. Make changes to the print settings, and then click **OK**.

**Printer Properties dialog box**

The printer is controlled by software that is installed on your computer. Use the printer software, also known as the printer driver, to change the print settings for a document. To change the print settings, open the Printer Properties dialog box.

Note    The Printer Properties dialog box is also referred to as the Printing Preferences dialog box.

To open the Printer Properties dialog box
1. Open the file that you want to print.
2. Click **File**, click **Print**, and then click **Properties** or **Preferences**.
   The Printer Properties dialog box is displayed.

Note    The path to the Printer Properties dialog box can vary depending on the software program you are using.
What's This? help

Use the What's This? help to learn about the features that you see on the Printer Properties dialog box.

What's This? help

Use What's This? help to learn more about the available printing options.

To use What's This? help

1. Move the cursor over the feature that you want to learn more about.
2. Click the right mouse button.
   The What's This box is displayed.
3. Move the cursor over the What's This? box, and then click the left mouse button.
   An explanation of the feature is displayed.

Ink Status window

The Ink Status window is displayed each time the printer prints a file. The window displays the approximate ink level of each print cartridge. To close the Ink Status window, click Close.

Note This feature might not be available in your operating environment.

Print cartridge information and ordering

For print cartridge information and to link to HP’s Web site for ordering print cartridges, click the Print Cartridge Information button.

Displaying the Ink Status window

If you do not want the Ink Status window to appear when you print, select the Do not show this again check box in the lower-left corner of the window.

If you previously chose not to show the Ink Status window but now want it to appear when you print, follow these steps:

1. Open the printer Toolbox.
2. Click the Configuration tab.
3. Select the Display Ink Status Window check box.
4. Click Apply, and then click OK.
Download printer software updates

Download the latest printer software update every few months to ensure you have the latest features and improvements.

To download a printer software update
1. Make sure you are connected to the Internet.
2. From the Windows Start menu, click Programs or All Programs, point to HP, and then click HP Software Update.
   The HP Software Update window is displayed.
3. Click Next.
   HP Software Update searches the HP Web site for printer software updates.
   – If the computer has the most recent version of the printer software installed, No updates are available for your system at this time is displayed in the HP Software Update window.
   – If the computer does not have the most recent version of the printer software installed, a software update is displayed in the HP Software Update window.
4. If a software update is available, select the check box beside the update name.
5. Click Install.
6. Follow the onscreen instructions.

Download HP Photosmart software
Installing the printer software update you download from the HP Web site does not update the HP Photosmart software you might have installed on the computer. For information about updating the HP Photosmart software, see the HP Photosmart Help.
9 Maintenance

- Install print cartridges
- Align the print cartridges
- Automatically clean print cartridges
- Print a test page
- View estimated ink levels
- Maintain the printer body
- Remove ink from your skin and clothing
- Manually clean print cartridges
- Maintain print cartridges
- Printer Toolbox

Install print cartridges

When you need to replace print cartridges, make sure you have the correct print cartridges for your printer, and then install them in the print cartridge cradle.

- Print cartridges
- Selection numbers
- Ink-backup mode
- Installation instructions

Print cartridges

Always install the tri-color print cartridge in the left side of the print cartridge cradle. Install the black print cartridge in the right side of the print cartridge cradle.

Note  Your printer might be packaged with only a tri-color print cartridge. For better results, install a black print cartridge in addition to the tri-color print cartridge. You can print without a black print cartridge but doing so can cause the printer to print more slowly and printed colors to differ from those you would see if a black print cartridge and a tri-color print cartridge were installed.

To order print cartridges, go to www.hp.com. Choose your country/region, and then click Buy or Online Shopping.

Selection numbers

When buying replacement print cartridges, look for the print cartridge selection number.
You can find the selection number in three places:

- Selection number label: Look at the label on the print cartridge that you are replacing.

![Selection number label](image)

- Printer documentation: For a list of print cartridge selection numbers, see the reference guide that came with the printer.
- Print Cartridge Information dialog box: For a list of print cartridge selection numbers, open the printer Toolbox, click the Estimated Ink Level tab, and then click the Print Cartridge Information button.

**Ink-backup mode**

The printer can operate with only one print cartridge installed. For more information, see Ink-backup mode.

**Installation instructions**

**To install a print cartridge**

1. Press the Power button to turn on the printer.
2. Open the printer cover.
   - The print cartridge cradle moves to the center of the printer.
3. Push down on the print cartridge.
4. Slide the print cartridge out of the cradle.

5. Remove the replacement print cartridge from its packaging and carefully remove the plastic tape. Hold the print cartridge so that the copper strip is on the bottom and facing toward the printer.

Caution  Do not touch the print cartridge ink nozzles or copper contacts. Touching these parts will result in clogs, ink failure, and bad electrical connections. Do not remove the copper strips. They are required electrical contacts.
6. Slide the print cartridge firmly into the cradle at a slight upward angle until you feel resistance.

7. Push the cartridge into the cradle. You hear a snap when the print cartridge is correctly positioned.

8. Close the printer cover.

9. Align the print cartridges for optimum print quality.

For information about storing print cartridges, see Maintain print cartridges.

For information about recycling empty print cartridges, see HP inkjet supplies recycling program.

⚠️ Warning  Keep both new and used print cartridges out of the reach of children.

Align the print cartridges

After installing a print cartridge, align the print cartridges to ensure the best print quality.

To align the printer
1. Load Letter or A4 unused plain white paper in the paper tray.
2. Open the printer Toolbox.
3. Click Align the Print Cartridges.
4. Click Align, and then follow the onscreen instructions.
   The HP Deskjet prints a test page, aligns the print cartridges, and calibrates the printer. Recycle or discard the test page.

Automatically clean print cartridges

If your printed pages are missing lines or dots, or if they contain ink streaks, the print cartridges might be low on ink or might need to be cleaned. For more information, see View estimated ink levels.

If the print cartridges are not low on ink, clean the print cartridges automatically.
To clean the print cartridges
1. Open the printer Toolbox.
2. Click Clean the Print Cartridges.
3. Click Clean, and then follow the onscreen instructions.

If your documents are still missing lines or dots after cleaning, manually clean the print cartridge contacts.

Caution  Clean print cartridges only when necessary. Unnecessary cleaning wastes ink and shortens the life of the cartridge.

Print a test page
You can print a test page to view the effects of any changes you have made to the print settings.

To print a test page
1. Open the printer Toolbox.
2. Click the Print a Test Page button, and then follow the onscreen instructions.

View estimated ink levels
Follow these instructions to view the estimated ink levels of the print cartridges that are installed in the printer:
1. Open the printer Toolbox.
2. Click the Estimated Ink Level tab.

Note  If the print cartridges were used before being installed in the printer, the estimated ink levels will not appear on the Estimated Ink Level tab.

The Estimated Ink Level tab also contains print cartridge ordering information. To view this information, click the Print Cartridge Information button.

Maintain the printer body
Because the HP Deskjet ejects ink onto the paper in a fine mist, ink smudges will eventually appear.

To remove smudges, stains, or dried ink from the exterior
1. Turn off the HP Deskjet, and then disconnect the power cord.
2. Wipe the outside of the HP Deskjet with a soft cloth that has been lightly moistened with water.

Caution  Do not use any type of cleaning solution. Household cleaners and detergents might damage the printer finish. Keep all fluids away from the interior. Do not lubricate the metal rod on which the print cartridge cradle slides. Noise is normal when the cradle moves back and forth.

Remove ink from your skin and clothing
Follow these instructions to remove ink from your skin and clothing:
### Surface | Remedy
---|---
Skin | Wash the area with an abrasive soap.
White fabric | Wash the fabric in cold water and use chlorine bleach.
Color fabric | Wash the fabric in cold water and use sudsy ammonia.

⚠️ **Caution** Always use cold water to remove ink from fabric. Warm or hot water can set the ink into the fabric.

### Manually clean print cartridges

If the HP Deskjet is used in a dusty environment, a small amount of debris can accumulate on the print cartridge contacts. This debris can cause ink streaks and missing lines on printed pages. The problem can be corrected by manually cleaning the print cartridge contacts.

You need the following items to clean the print cartridges:

- Distilled water (tap water can contain contaminants that can damage the print cartridge)
- Cotton swabs or other soft, lint-free material that will not stick to the print cartridge

Be careful not to get ink on your hands or clothing as you clean.

#### To prepare to clean

1. Open the HP Deskjet cover.
2. Wait until the print cartridge cradle moves to the center of the HP Deskjet and is idle and quiet.
3. Remove the print cartridges and place them on a piece of paper, with the copper strips facing up.

⚠️ **Caution** Do not leave the print cartridges outside the HP Deskjet for more than 30 minutes.
To manually clean print cartridge contacts
1. Lightly moisten a cotton swab with distilled water and squeeze any excess water from the swab.
2. Gently wipe the print cartridge copper contacts with the cotton swab.

⚠️ Caution Do not touch the print cartridge ink nozzles. Touching the ink nozzles will result in clogs, ink failure, and bad electrical connections.

3. Repeat this process until no ink residue or dust appears on the swab.
4. Insert the print cartridges in the HP Deskjet, and then close the cover. For more information, see Installation instructions.

Maintain print cartridges
Use these tips to maintain and store HP print cartridges and to ensure consistent print quality.

- Maintenance tips
- Storage tips

Maintenance tips
- Keep all print cartridges in their sealed packages until they are needed. Print cartridges should be stored at room temperatures (15° to 35° C or 59° to 95° F).
- Do not remove the plastic tape covering the ink nozzles until you are ready to install the print cartridge in the printer. If the plastic tape has been removed from the print cartridge, do not attempt to reattach it. Reattaching the tape damages the print cartridge.

Storage tips
- When you remove print cartridges from the printer, store them in an airtight plastic container.
- Make sure that the ink nozzles are face down but are not in contact with the container.
Printer Toolbox

The printer Toolbox contains a number of useful tools to enhance the performance of the printer.

Use the printer Toolbox to perform the following tasks:

● Align the print cartridges
● Clean the print cartridges
● Print a test page
● View estimated ink levels

To open the printer Toolbox

1. Open the Printer Properties dialog box.
2. Click the Services tab, and then click the Service this device button.
   The Toolbox is displayed.
10 Troubleshooting

- Installation problems
- Printer does not print
- Paper jam
- Paper problems
- Printer is stalled
- Print cartridge problems
- Photos do not print correctly
- Print quality is poor
- Document is misprinted
- Problems with borderless documents
- Error messages
- Power light is on or flashing
- Document prints slowly
- If you continue to have problems

Installation problems

If the software installation program stops or fails, check the following topics for more information:

- Installation program stops
- "Unknown Device" message displays
- Printer name does not appear

If you continue to have problems, visit HP Technical Support at www.hp.com/support.

Installation program stops

If the installation program stops when it looks for new hardware, one of the following issues is causing a communication problem:

- The USB cable is old or defective.
- Software, such as an antivirus program, is running.
- Another device, such as a scanner, is connected to the computer.

To resolve the problem

1. Make sure that no USB devices other than the printer, the keyboard, and the mouse are connected to the computer.
2. Disconnect and reconnect the USB cable.
3. Make sure that the printer is connected directly to a USB port on the computer (instead of through a USB hub).
4. If the installation program still does not locate the printer, replace the USB cable, and then continue to the next step.
5. Click Cancel, and then restart the computer.
6. Turn the printer off, and then disconnect the USB cable and power cord.
7. Quit any antivirus programs or other software programs that are running on the computer.

   Note To quit an antivirus program, follow the manufacturer's instructions.

8. Reinstall the printer software:
   a. Insert the printer software CD into the drive.
   b. Follow the onscreen instructions. When the installation program prompts you, connect the USB cable and the power cord to the printer, and then make sure that the printer is on.

      Note Do not connect the USB cable until you are told to do so.

   c. Follow the onscreen instructions to finish the installation.

9. Restart the antivirus program.

"Unknown Device" message displays

   During installation, an "Unknown Device" message might be displayed when you connect a USB cable between the printer and the computer. A possible cause might be a defective USB cable.

   Note This is not a problem if you are using Windows 2000. If you are using Windows 2000 and this message is displayed, you can continue with the software installation.

   To resolve the problem
   1. Disconnect the USB cable from the printer.
   2. Disconnect the power cord from the printer.
   3. Wait approximately 30 seconds.
   4. Reconnect the power cord to the printer.
   5. Reconnect the USB cable to the printer.
   6. If the "Unknown Device" message is still displayed, replace the USB cable.
Printer name does not appear

If the printer software seems to install correctly, but the printer name does not appear in the list of printers when you click **Print** on the **File** menu or in the Printers folder in Control Panel, try reinstalling the printer software.

**To reinstall the printer software**
1. Quit any antivirus programs or other software programs that are running on the computer.
   
   **Note** To quit an antivirus program, follow the manufacturer’s instructions.

2. Uninstall the printer software:
   a. Insert the printer software CD into the drive, and then follow the onscreen instructions.

   **Note** If the installation program does not start automatically, click your CD drive letter in Windows Explorer, then double-click the setup.exe file. For example, double-click D:\setup.exe.

   b. When prompted, click **Remove All**.

3. Reinstall the printer software:
   a. Insert the printer software CD into the drive.
   b. Follow the onscreen instructions to finish the installation.

4. Restart the antivirus program.

Printer does not print

- **Verify the following**
- Check the printer cable connection
- Clear the print queue
- If the printer still does not print

Verify the following

Verify the following conditions if the printer is not printing:

- The printer is connected to the power source.
- The cable connections are secure.
- The printer is turned on.
- The print cartridges are the correct print cartridges for the printer and are properly installed.
  
  For more information, see **Print cartridges** and **Installation instructions**.
- The paper or other media is correctly loaded in the paper tray.
- The printer cover is closed.
- The rear access door is attached.
Check the printer cable connection

If your printer and computer are connected with a USB cable and the devices are not communicating with each other, try the following:

- Make sure the power cord is firmly connected to the printer and plugged into a power outlet.
- Check the USB cable. If you are using an older cable, it might not be working properly. If you experience problems, the USB cable might need to be replaced. Also verify that the cable does not exceed 3 meters (9.8 feet) in length.
- Check the connection from your printer to your computer. Verify that the USB cable is securely plugged into the USB port on the back of your printer. Make sure the other end of the USB cable is plugged into a USB port on your computer. After the cable is connected properly, turn your printer off and then on again.
- If you are connecting the printer through a USB hub, make sure the hub is turned on. If the hub is on, try connecting the printer directly to your computer.
- Try connecting the USB cable to another USB port on your computer. After you check the connections, try restarting your computer. Turn your printer off and then on again.

Note For best printing performance, use a USB 2.0 compatible cable.

Clear the print queue

When you start a print job, it is sent to a list called the “print queue.” If the printer stops printing before the job is complete, the print job might be stalled in the print queue.

To resolve a print job that is stalled in the queue
1. Click Start, click Settings, and then click Printers.
2. Double-click the name of the HP Deskjet printer.
3. Click the Printer menu, and then click Pause Printing.
4. Click the Printer menu again, and then click Cancel All Documents.
5. Click Yes to confirm the cancellation.
6. Click the Printer menu, and then uncheck Pause Printing.
7. If there are still documents in the list, restart the computer.
8. After restarting, if there are still documents in the list, repeat steps 1 – 6.

If the printer still does not print
1. Select the topic below that best describes the problem:
   - Paper jam
   - Out of paper message
   - Printer is stalled
2. If the printer still does not print, shut down, and then restart your computer.
Paper jam

To clear a paper jam

1. Remove the paper from the paper tray.
2. If you are printing labels, verify that a label did not become detached from the label sheet while passing through the printer.
3. Turn off the printer.
4. Remove the rear access door. Press the handle to the right, and then pull out the door.

![Image of printer with rear access door opened]

5. Remove the paper jam from the back of the printer, and then replace the rear access door securely.

![Image of paper being removed from the back of the printer]

6. If the paper jam cannot be removed from the back of the printer, raise the printer cover, remove the paper jam from the front of the printer, and then lower the cover.

Caution Remove the paper jam carefully as it is possible to damage the printer when removing paper from the front.

7. Reload paper in the paper tray.
8. Turn on the printer.
9. Reprint the document.

Note If paper jams occur frequently, try using a heavier paper. See Printer specifications for paper weight specifications.

Paper problems

- Printer does not feed paper
- Out of paper message
- Printer prints on multiple sheets at once

Printer does not feed paper

Try one or more of the following solutions:
- Reduce the number of sheets in the paper tray.
- Remove the paper from the paper tray, and then reload it.
- Use a different type of paper.

Out of paper message

Follow the appropriate steps for the condition that exists.
- If the paper tray is loaded
- If the paper tray is empty

If the paper tray is loaded

1. Verify the following:
   - A sufficient amount of paper is loaded in the paper tray (at least ten sheets).
   - The paper tray is not overly full.
   - The paper stack is touching the back of the paper tray.
2. Slide the paper guide so that it fits firmly against the edge of the paper.
3. Click Continue to resume printing.

If the paper tray is empty

1. Load paper in the paper tray.
2. Push the paper forward until it stops.
3. Slide the paper guide so that it fits firmly against the edge of the paper.
4. Click Continue to resume printing.

Printer prints on multiple sheets at once

If the printer prints on multiple sheets at once, check the following:
- Paper weight
- Paper might be loaded improperly

Paper weight

The printer might print on multiple sheets of paper at once if the paper is under the recommended paper weight. Use paper that is within the recommended specifications.
Paper might be loaded improperly

The printer might print on multiple sheets of paper at once if the paper is loaded too far toward the back of the printer or if the paper guide is not positioned firmly against the paper. Reload the paper into the paper tray, pushing the paper until you feel resistance, and then slide the paper guide firmly against the edge of the paper stack.

The printer also might print on multiple sheets if different paper types are loaded in the printer. For example, photo paper might be mixed with plain paper. Empty the paper tray and load only the paper type that is appropriate for the document that you are printing.

Printer is stalled

If the printer stalls while printing a document, raise the printer cover, and then disconnect the power cable from the back of the printer.

⚠️ Caution 🔄 First, check for any loose or broken parts in the printer. If you find loose or broken parts, go to www.hp.com/support.

If there are no loose or broken parts, follow these steps:

1. Check for and remove any obstacles, such as packing tape or materials, that prevent the print cartridges from moving back and forth.
2. Make sure the print cartridges are installed securely in the print cartridge cradle. For more information, see Installation instructions.
3. Make sure the tri-color print cartridge is installed in the left side of the cradle and the black print cartridge is installed in the right side of the cradle.
4. Check for and clear any paper jam. For more information, see Paper jam.
5. Lower the printer cover.
6. Connect the power cable to the back of the printer, and then turn on the printer.

Print cartridge problems

- Incorrect print cartridge
- Print cartridge is faulty or not installed properly
- "Printing in ink-backup mode" message
- "Print cartridge is in the wrong slot" message
Incorrect print cartridge

The printer can only print when the correct print cartridges are installed.

To verify that you have the correct print cartridges
1. Open the printer cover.
2. Read the selection number on the print cartridge label.

<table>
<thead>
<tr>
<th></th>
<th>Warranty date</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>Selection number</td>
</tr>
</tbody>
</table>

3. Check the list of print cartridges that can be used in the printer.
   a. Open the printer Toolbox.
   b. Click the Estimated Ink Levels tab.
   c. Click the Print Cartridge Information button and view the list of print cartridge selection numbers.
      The reference guide that came with the printer also shows the print cartridge selection numbers.
4. Check the warranty date on the print cartridge.
5. If the print cartridge has the wrong selection number, or if the warranty has expired, install a new print cartridge. For more information, see Installation instructions.
6. Close the printer cover.
   If the Power light is not flashing, then the problem is fixed.
   If the Power light is flashing, go to step 4.

Print cartridge is faulty or not installed properly

The printer cannot print if the print cartridges are faulty, or if they are not installed properly.

To resolve the problem
1. Raise the printer cover.
2. Do one of the following:
   – If an error message is displayed on screen, remove the print cartridge that is named in the error message. Go to step 3.
   – If an error message is not displayed, remove and reinstall each print cartridge.
      If the Power light is not flashing, the problem is solved.
      If the Power light is flashing, go to step 4.
3. Reinstall the print cartridge. For more information, see Installation instructions.  
   If the Power light is not flashing, the problem is solved.  
   If the Power light is flashing, go to step 4.
4. Manually clean the print cartridge.
5. Reinsert the print cartridge in the printer and close the printer cover.  
   If the Power light is still flashing, the print cartridge is faulty and must be replaced.

   **Note**  You can print with one print cartridge in ink-backup mode if you do not  
   have a replacement print cartridge available. For more information, see Ink-  
   backup mode.
6. If the Power light continues to flash after replacing the print cartridge, visit HP  

"Printing in ink-backup mode" message

When the printer detects that only one print cartridge is installed, ink-backup mode is  
initiated. This printing mode lets you print with a single print cartridge, but it slows the  
printer and affects the quality of printouts.

If you receive the ink-backup mode message and two print cartridges are installed in the  
printer, verify that the protective piece of plastic tape has been removed from each print  
cartridge. When plastic tape covers the print cartridge contacts, the printer cannot detect  
that the print cartridge is installed.

"Print cartridge is in the wrong slot" message

If you receive this error message, the print cartridge is installed in the wrong side of the  
print cartridge cradle.

Always install the tri-color print cartridge in the left print cartridge cradle compartment.  
Install the black print cartridge in the right print cartridge cradle compartment.

Photos do not print correctly

- Check the paper tray
- Check the printer properties

**Check the paper tray**

1. Verify that the photo paper is placed in the paper tray with the side to be printed on  
   facing down.
2. Slide the paper forward until it stops.
3. Slide the paper guide firmly against the edge of the paper.  
   Do not press the guide so firmly against the edge of the paper that the paper bends or curls.

**Check the printer properties**

Open the Printer Properties dialog box and verify the following options:
<table>
<thead>
<tr>
<th>Tab</th>
<th>Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Size is:</td>
<td>An appropriate paper size</td>
</tr>
<tr>
<td>Type is:</td>
<td>An appropriate photo paper</td>
</tr>
<tr>
<td>Print quality:</td>
<td>Best or Maximum dpi</td>
</tr>
</tbody>
</table>

### Print quality is poor

- Streaks and missing lines
- Print is faded
- Blank pages print

#### Streaks and missing lines

If your printed pages are missing lines or dots or if streaks appear, the print cartridges might be low on ink or might need to be cleaned. For more information, see [View estimated ink levels](#) and [Automatically clean print cartridges](#).

#### Print is faded

- Verify that neither of the print cartridges is low on ink.
  For more information, see [View estimated ink levels](#). If a print cartridge is low on ink, consider replacing the print cartridge. For the correct part numbers, see the reference guide that came with the printer.
- Verify that a black print cartridge is installed.
  If the black text and images on your printouts are faded, you might be printing with only the tri-color print cartridge. Insert a black print cartridge, in addition to the tri-color print cartridge, for optimal black print quality.
- Verify that the protective piece of plastic tape has been removed from the print cartridges.

![Remove plastic tape](image)

- Consider selecting a higher print quality.
Blank pages print

- The protective piece of plastic tape might still be attached to the print cartridges. Verify that the plastic tape has been removed from the print cartridges.

![Remove plastic tape]

- The print cartridges might be out of ink. Replace one or both empty print cartridges. For more information, see View estimated ink levels.

Document is misprinted

- Text and images are misaligned
- Document is printed off-center or at an angle
- Parts of the document are missing or printed in the wrong place
- Envelope is printed at an angle
- Document does not reflect the new print settings

Text and images are misaligned

If the text and images on your printouts are misaligned, then align the print cartridges.

Document is printed off-center or at an angle

1. Verify that only one type of paper is placed in the paper tray, and that the paper has been placed in the tray correctly.
2. Verify that the paper guide fits firmly against the edge of paper.
3. Reprint the document.

Parts of the document are missing or printed in the wrong place

Open the Printer Properties dialog box and confirm the following options:

<table>
<thead>
<tr>
<th>Tab</th>
<th>Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basics</td>
<td><strong>Orientation</strong>: Verify the appropriate orientation.</td>
</tr>
<tr>
<td>Paper/Quality</td>
<td><strong>Size is</strong>: Verify the appropriate paper size.</td>
</tr>
<tr>
<td>Effects</td>
<td><strong>Scale to fit</strong>: Select this option to scale text and graphics to the paper.</td>
</tr>
<tr>
<td>Finishing</td>
<td><strong>Poster printing</strong>: Verify that <strong>Off</strong> is selected.</td>
</tr>
</tbody>
</table>
If parts of the document are still missing, the printer settings might be overridden by the software program print settings. Select the appropriate print settings from within the software program.

**Envelope is printed at an angle**

1. Slide the flap inside the envelope before loading it in the printer.
2. Confirm that the paper guide fits firmly against the edge of the envelope.
3. Reprint the envelope.

**Document does not reflect the new print settings**

The printer settings might differ from the software program print settings. Select the appropriate print settings within the software program.

**Problems with borderless documents**

- Borderless printing guidelines
- Image is printed at an angle
- Fading occurs on the edges of a photo
- Photo has an unwanted border

**Borderless printing guidelines**

When printing borderless photos or brochures, follow these guidelines:

- Verify that the paper size that is specified in the **Paper Size** drop-down list on the **Printing Shortcuts** tab matches the size of the paper that is loaded in the paper tray.
- Select the appropriate paper type in the **Paper Type** drop-down list on the **Printing Shortcuts** tab.
- If printing in grayscale, select **High Quality** under **Print in Grayscale** on the **Color** tab.
- Do not print borderless documents in ink-backup mode. Always have two print cartridges installed in the printer when printing borderless documents. For more information, see **Ink-backup mode**.

**Image is printed at an angle**
Verify that no problem exists with the source image. For example, if you are printing a scanned image, verify that the image was not crooked when it was scanned.

If the problem is not caused by the source image, follow these steps:

1. Remove all paper from the paper tray.
2. Load the photo paper correctly in the paper tray.
3. Verify that the paper guide fits firmly against the edge of the paper.
4. Follow loading instructions for the paper type.

**Fading occurs on the edges of a photo**

Verify that the photo paper is not curled. If the photo paper is curled, place the paper in a plastic bag and gently bend it in the opposite direction of the curl until the paper lies flat. If the problem persists, then use photo paper that is not curled.

For instructions about preventing photo paper from curling, see *Store and handle photo paper*.

**Photo has an unwanted border**

- For small photo paper
- For small photo paper with a tear-off tab

**For small photo paper**
If the printout has an unwanted border, try the following solutions:

- Align the print cartridges.
- Open the Printer Properties dialog box, click the Paper/Quality tab, and verify that the selected paper size matches both the paper size that the photo is formatted for and the size of the paper that is loaded in the printer.
- Open the Printer Properties dialog box, click the Paper/Quality tab, and then select the Borderless auto fit check box.
- Verify that the software application you are using supports borderless printing.
- Verify that no problem exists with the source image. For example, if you are printing a scanned image, verify that the image was not crooked when it was scanned.

For small photo paper with a tear-off tab

If the border appears below the tear-off tab, then remove the tab.

If the border appears above the tear-off tab, then align the print cartridges.

Error messages

- Print cartridge error messages
- Other error messages
Print cartridge error messages
If you receive a print cartridge error message, follow these directions.

Incorrect print cartridge message
The printer can only print when the correct print cartridges are installed. If you receive a print cartridge error message, one or both of the print cartridges cannot be used in the printer.
To resolve the problem, follow the instructions in Incorrect print cartridge.

Print cartridge problem message
The printer cannot print if the print cartridges are faulty, or if they are not installed properly.
If you receive a message stating there is a problem with a print cartridge, follow the instructions in Print cartridge is faulty or not installed properly to resolve the problem.

"Print cartridge carriage is stalled" message
If the printer stalls while you are printing a document, follow the instructions in Printer is stalled.

"Print cartridge is in the wrong slot" message
If you receive this error message, the print cartridge is installed in the wrong side of the print cartridge cradle. Follow the instructions in "Print cartridge is in the wrong slot" message to resolve the problem.

"Printing in ink-backup mode" message
If you receive this error message, follow these instructions.

Other error messages
If you receive an error message, follow these directions.

Out of paper message
If you receive an out of paper message, follow the guidelines in Out of paper message.

"There was an error writing to USB port" message
The printer might not be receiving correct data from another USB device or USB hub. Connect the printer directly to the USB port on the computer.

"Two-way communication cannot be established" or "Printer not responding" message
The printer might not be able to communicate with the computer if the USB cable is too long.
If you receive this error message, make sure that the USB cable is not greater than 3 meters (approximately 9.8 feet) in length.
Note  For best printing performance, use a USB 2.0 compatible cable.

General Protection Fault
A General Protection Fault, or GPF, is a Microsoft Windows error message that appears when a software program, or a device such as a printer, performs an action that Windows determines to be a problem.

There are many possible causes of a GPF. Try the following to resolve a GPF:
1. Restart your computer, and then try printing again.
2. Try printing using different settings or options.
3. If the problem still occurs:
   – Use a different software program, if available.
   – Check with the software program vendor for program updates.
   – Verify that your computer has sufficient RAM and hard disk space.
   – Delete any temporary files on your computer.

If you continue to experience problems, visit HP Technical Support at www.hp.com/support.

Power light is on or flashing

<table>
<thead>
<tr>
<th>Power light</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
</tr>
</tbody>
</table>

- If the Power light is **on**, the printer is either printing or ready to print.
- If the Power light is **off**, the printer is off.
- If the Power light is **flashing**, see the following information.

- What the flashing light means
- If an error message appears
- If no error message appears
What the flashing light means

The Power light can flash for several reasons:

- The printer cover is open.
- The printer is out of paper.
- A problem exists with the printer, such as a paper jam or a problem with a print cartridge.

For information about clearing a paper jam, see Paper jam.

If an error message appears

Read the error message that explains the problem and its solution.

If no error message appears

Check the status of the printer by using the printer tools. To gain access to the tools, open the Printer Properties dialog box, click the Services tab, and then click the Service this device button.

Use the printer tools to perform the following tasks:

- View estimated ink levels.
- Clean the print cartridges.
- Calibrate the printer.
- Print a test page.
- Perform other functions as needed.

Document prints slowly

Multiple software programs are open

The computer resources are insufficient for the printer to print at its optimum speed. To increase printer speed, close all unnecessary software programs when printing.

Complex documents, graphics, or photos are printing

Documents containing graphics or photos print more slowly than text documents.

Best or Maximum dpi print mode is selected

The printer prints more slowly when Best or Maximum dpi is selected as the print quality. To increase the printer speed, select a different print quality mode.

Printer is in ink-backup mode

The printer might print more slowly if it is in ink-backup mode. For more information, see Ink-backup mode. To increase the print speed, use two print cartridges in the printer.

Printer software is outdated

Outdated printer software might be installed.
For information about updating the printer software, see Download printer software updates.

**Computer does not meet system requirements**

If your computer does not have enough RAM or a large amount of free space on the hard drive, the printer processing time will be longer.

1. Verify that the computer hard disk space, RAM, and processor speed meet the system requirements.
   The system requirements are listed in the reference guide that came with the printer.
2. Make space available on the hard drive by deleting unwanted files.

**If you continue to have problems**

If you continue to have problems after investigating the troubleshooting topics, shut down your computer and then restart it.

If you still have questions after restarting your computer, visit HP Technical Support at www.hp.com/support.

For information about the support process, see HP support.
A HP support

- Support process
- HP support by phone

Support process

If you have a problem, follow these steps
1. Check the documentation that came with the HP Deskjet.
2. Visit the HP online support Web site at www.hp.com/support. HP online support is available to all HP customers. It is the fastest source for up-to-date device information and expert assistance and includes the following features:
   - Fast access to qualified online support specialists
   - Software and driver updates for your HP Deskjet
   - Valuable HP Deskjet and troubleshooting information for common problems
   - Proactive device updates, support alerts, and HP newsgrams that are available when you register your device
3. For Europe only: Contact your local point of purchase. If your device has a hardware failure, you will be asked to bring it back to your local point of purchase. (Service is provided at no charge during the device limited warranty period. After the warranty period, you will be quoted a service charge.)
4. Call HP support. Support options and availability vary by device, country/region, and language.

HP support by phone

- Phone support period
- Placing a call
- After the phone support period

Phone support period

One year of phone support is available in North America, Asia Pacific, and Latin America (including Mexico). To determine the duration of phone support in Europe, the Middle East, and Africa, go to www.hp.com/support. Standard phone company charges apply.

Placing a call

Call HP support while you are in front of the computer and the HP Deskjet. Be prepared to provide the following information:
- Device model number (located on the label on the front of the device)
- Device serial number (located on the back or bottom of the device)
- Messages that appear when the situation occurs
- Answers to these questions:
  - Has this situation happened before?
  - Can you re-create it?
  - Did you add any new hardware or software to your computer at about the time that this situation began?
  - Did anything else occur prior to this situation (such as a thunderstorm, device was moved, etc.)?
After the phone support period

After the phone support period, help is available from HP at an additional cost. Help may also be available at the HP online support Web site: www.hp.com/support. Contact your HP dealer or call the support phone number for your country/region to learn more about support options.
Supplies

Order the following supplies with your HP Deskjet.

**Paper**
To order media such as HP Premium Paper, HP Premium Inkjet Transparency Film, or HP Greeting Cards, go to [www.hp.com](http://www.hp.com).
Choose your country/region, and then click **Buy** or **Online Shopping**.

**USB cables**
C6518A HP USB A–B 2-meter cable
C Technical information

- Printer specifications
- Environmental product stewardship program
- Regulatory notices

Printer specifications
The HP Deskjet has the following specifications and requirements.

Physical specifications
Printer dimension (with the tray extended): 142 mm high x 422 mm wide x 346 mm deep (5.6 inches high x 16.6 inches wide x 13.62 inches deep)
Printer weight (without print cartridges): 2.04 kg (4.5 lbs)

Software compatibility
Windows compatible (98 SE, Me, 2000, and XP)

Memory
384 KB integrated memory

Minimum system requirements

<table>
<thead>
<tr>
<th>Operating system</th>
<th>Processor</th>
<th>RAM</th>
<th>Hard disk space</th>
</tr>
</thead>
<tbody>
<tr>
<td>Windows 98 SE, Me, 2000, XP</td>
<td>Pentium II or equivalent</td>
<td>64 MB</td>
<td>200 MB</td>
</tr>
</tbody>
</table>

Note For best printing performance, use a USB 2.0 compatible cable.

Paper tray capacity
Plain paper sheets: Up to 80

Paper size
For a complete list of supported media sizes, see the printer software.

Paper weights
Letter Paper: 65 to 90 g/m² (16 to 24 lb)
Legal Paper: 70 to 90 g/m² (20 to 24 lb)
Envelopes: 70 to 90 g/m² (20 to 24 lb)
Cards: Up to 200 g/m² (110-lb index maximum)
Photo Paper: Up to 280 g/m² (75-lb index maximum)

Environmental product stewardship program
Hewlett-Packard is committed to providing quality products in an environmentally sound manner. Design for recycling has been incorporated into this product. The number of materials has been kept to a minimum while ensuring proper functionality and reliability. Dissimilar materials have been designed to separate easily. Fasteners and other connections are easy to locate, access, and remove using common tools. High priority parts have been designed to access quickly for efficient disassembly and repair.
For more information, visit HP’s Commitment to the Environment Web site at:
www.hp.com/hpinfo/globalcitizenship/environment/index.html

This section contains the following topics:

- Paper use
- Plastics
- Material safety data sheets
- Recycling program
- HP inkjet supplies recycling program
- Energy consumption - Energy Star

**Paper use**

This product is suited for the use of recycled paper according to DIN 19309 and EN 12281:2002.

**Plastics**

Plastic parts over 25 grams are marked according to international standards that enhance the ability to identify plastics for recycling purposes at the end of product life.

**Material safety data sheets**

Material safety data sheets (MSDS) can be obtained from the HP Web site at:
www.hp.com/go/msds

**Recycling program**

HP offers an increasing number of product return and recycling programs in many countries/regions, and partners with some of the largest electronic recycling centers throughout the world. HP conserves resources by reselling some of its most popular products. For more information regarding recycling of HP products, please visit:
www.hp.com/hpinfo/globalcitizenship/environment/recycle/

**HP inkjet supplies recycling program**

HP is committed to protecting the environment. The HP Inkjet Supplies Recycling Program is available in many countries/regions, and lets you recycle used print cartridges and ink cartridges free of charge. For more information, go to the following Web site:
www.hp.com/hpinfo/globalcitizenship/environment/recycle/

**Energy consumption - Energy Star**

Energy usage drops significantly while in ENERGY STAR® mode, which saves natural resources, and saves money without affecting the high performance of this product.

This product qualifies for ENERGY STAR (MOU v.3.0), which is a voluntary program established to encourage the development of energy-efficient office products.

ENERGY STAR is a U.S. registered service mark of the U.S. EPA. As an ENERGY STAR partner, HP has determined that this product meets ENERGY STAR guidelines for energy efficiency.

For more information on ENERGY STAR guidelines, go to the following Web site:
www.energystar.gov
Regulatory notices

- FCC statement
- LED indicator statement
- Notice to users in Korea

FCC statement

The United States Federal Communications Commission (in 47 CFR 15.105) has specified that the following notice be brought to the attention of users of this product.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Modifications (part 15.21): The FCC requires the user to be notified that any changes or modifications made to this device that are not expressly approved by HP may void the user's authority to operate the equipment.

For further information, contact the Manager of Corporate Product Regulations, Hewlett-Packard Company, 3000 Hanover Street, Palo Alto, CA 94304, (650) 857-1501.

LED indicator statement

The display LEDs meet the requirements of EN 60825-1.
