Recovery, built-in

HP has **preinstalled** the System Recovery software on the hard drive in case you need to recover the original software that came with your PC.

- There are **no CDs to lose** — it's on your hard drive.
- It's **faster** than traditional CD Recovery methods.
- It's **easy**. Just use Software Repair Wizard to begin.

If you would still like a set of Recovery CDs, you can use this tool to create your own for future use.

See your **user documentation** for complete instructions.
