HP CM1015/1017MFP – Wireless connectivity

The CM1015/1017MFP does not support direct connected (USB) Jetdirect EX box wireless adapter, or other wireless network adapter devices for communication with this device in a wireless network environment.

Scanning and memory card access (CM1017MFP only) are not supported via a wireless network adapter connection.

Acceptable methods of connection are:

- 1) USB 1.0 or 2.0 direct to a PC
- 2) 10/100 base T network connection from the PC through a network device such as a wired hub, switch or router.
- 3) Direct connection from a PC via category 5 network cable.
- 4) Direct connection to a wireless router via category 5 network cable. The PC may be wirelessly connected through this same wireless router.
