**HP TouchSmart PC Quick Setup Guide**

### 1. Unpack Carefully
- **Getting Started**: Choose best location and prepare the space.
- **Carefully follow these instructions for quick setup**: Your new HP TouchSmart PC User’s Guide for advanced instructions.

### 2. Review Contents
- **Unpack PC**: Safely remove your new PC by lifting from the base, not the hinge or monitor. Remove protective covering from all parts.

### 3. Connect Power & Activate Accessories
- **AC Power**: Connect the AC power cord into the back of the PC as shown.
- **Remote**: Pull tab on back to activate batteries. Turn power to “On”.

### 4. Connect to Internet
- **Wired LAN Connection**: Standard TV signal.
- **Wireless Connection**: For standard TV reception, connect the coaxial cable to the TV signal source and to the PC as shown.

### 5. Optional Setup
- **Television - cable/antenna (optional)**: For information on connecting to setup boxes or other advanced TV setup, see the HP TouchSmart PC User’s Guide.
- **Printer (optional)**: For information on connecting to setup boxes or other advanced TV setup, see the HP TouchSmart PC User’s Guide.

### 6. Power on Your PC!
- **Press “On/Standby” to begin setup**: Do not press any “On/Standby” or “Power” buttons again until the setup is complete.
- **HP TouchSmart PC Initial Setup**: Press the “On/Standby” button to start the initial (powered) state of the PC. This takes approximately 20 minutes. You can use this time to review additional setup instructions in the HP TouchSmart PC User’s Guide. For additional setup information after setup, you can go to the “Getting Started” guide located on your hard disk drive (click Start, then Help & Support, then select “User’s Guides”).
