# 1 Welcome

The HP Photosmart 6220 Digital Camera Dock allows you to easily download images to your computer, print images directly to a printer, and recharge the camera battery.

## Setting up the dock

1. Attach the dock insert to the top of the camera dock by snapping it into place. One or more clear plastic dock inserts came in the box with your dock. Each of these dock inserts has a sticker of a different shape and color on it. See Chapter 1 of your camera electronic User Guide to determine which dock insert to use.

2. Connect the AC power adapter and USB cable to the right-hand side of the dock.

If more than one power cord is in the box, use the cord that is appropriate for power outlets in your area. The AC power adapter for the dock is the same as the one used for your camera (part number L2056-60001). If no power adapter came with your dock, use the one that came with your camera.

3. Remove any cables that may be attached to your camera. Then, insert the camera into the camera dock as shown here. The Image Display side of the camera must point toward the edge of the dock with the HP logo.

**Note** If you are using Windows 98 or Me, you must install the software to transfer images.
