Important Information

Restoring your audio device settings

When you install the HP Premium Travel Phone on the computer, Windows automatically makes it the default audio device. All sounds, such as music, Windows, and game sounds play through the HP Premium Travel Phone and not the computer speakers. To play these sounds through the computer speakers, you need to change a few settings in the Windows Control Panel.

NOTE: Changing the settings to allow sounds to play through the computer speakers does not affect the functionality of the HP Premium Travel Phone.

Windows XP and Windows 2000

1 The Sounds and Audio Devices Properties are displayed automatically at the end of the software installation. To access these settings at a later date, click the Windows Start Button > Control Panel > Sounds and Audio Devices.
2 Click the Audio tab. (Notice that HP Premium Travel Phone or USB Audio Device is the default device for both Sound playback and Sound recording.)
3 Select your sound card from the Sound playback drop-down list.
4 Select your sound card from the Sound recording drop-down list.

In our example, the sound card is Realtek AC97 Audio; yours might be different.
5 Click **OK** to play all music, Windows, and game sounds through the computer speakers.

**Windows Vista**

1 The Sound properties are displayed automatically at the end of the software installation. To access these settings at a later date, click the **Windows Start Button > Control Panel > Sound**. (Notice that **HP Premium Travel Phone** is the default device for both Playback and Recording.)

![Sound Properties](image)

2. Click the **Playback** tab, click your sound card, and then click **Set Default**.
3 Click the **Recording** tab, click your sound card, and then click **Set Default**. In our example, the sound card is Realtek AC97 Audio; yours might be different.

4 Click **OK** to play all music, Windows, and game sounds through the computer speakers.

**Antivirus software warnings**

The first time you start Skype, you may see some warnings from your antivirus software similar to the ones shown here. If you see an antivirus warning, select the option to allow connections so that the software can function properly.
Another program wants to use Skype

The first time you sign into Skype with the HP Travel Phone application running, you must authorize the connection by selecting **Allow this program to use Skype**, and then clicking **OK**.

**NOTE:** If you do not allow Skype access, then the HP Premium Travel Phone does not function with Skype and the HP Travel Phone icon in the system tray is orange. To make the HP Premium Travel Phone work as intended, click **Skype > Tools > Options > Advanced > Manage other programs' access to Skype**. Highlight **HP Travel Phone.exe**, click **Change**, select **Allow this program to use Skype**, and then click **OK**. You should now see the following screen:

Click **OK** to accept the new setting. The HP Travel Phone icon in the system tray should now turn green and the software should function properly.
