Using the HP MediaSmart Server as a server for iTunes

Configure your server to access your files and computers remotely over the Internet

Access your files and computers remotely over the Internet

Publish and share your photographs with others

You can use your HP MediaSmart Server as a media server to access your photos, music, videos, and documents on other computers on your home network. You can also share your media with other HP MediaSmart users on your home network.

To set up users and accounts:

1. Go to "Start" > "Control Panel" > "User Accounts" > "Add or Remove User Accounts".
2. Click "Add" to add a new user account.
3. Enter the user name and password.
4. Click "OK".

To configure your server as a media server:

1. Go to "Start" > "Control Panel" > "Hardware and Sound" > "MediaSmart Server".
2. Click "Add MediaSource".
3. Select the media source you want to add.
4. Click "OK".

To publish and share your photographs with others:

1. Go to "Start" > "Control Panel" > "Appearance and Personalization" > "Windows Explorer".
2. Click "Organize" > "Options".
3. Select the "View" tab and choose "Hidden files and folders".
4. Click "None" in the "Hidden files and folders" section.

To access your files and computers remotely over the Internet:

1. Go to "Start" > "Control Panel" > "Network and Sharing Center".
2. Click "Change advanced sharing settings".
3. Select the "Turn on advanced sharing" option.
4. Click "Apply".

To share your photographs with others:

1. Go to "Start" > "Control Panel" > "Appearance and Personalization" > "Windows Explorer".
2. Click "Organize" > "Options".
3. Select the "View" tab and choose "Hidden files and folders".
4. Click "None" in the "Hidden files and folders" section.
5. Click "OK".

To configure your server as a media server:

1. Go to "Start" > "Control Panel" > "Hardware and Sound" > "MediaSmart Server".
2. Click "Add MediaSource".
3. Select the media source you want to add.
4. Click "OK".

To publish and share your photographs with others:

1. Go to "Start" > "Control Panel" > "Appearance and Personalization" > "Windows Explorer".
2. Click "Organize" > "Options".
3. Select the "View" tab and choose "Hidden files and folders".
4. Click "None" in the "Hidden files and folders" section.
5. Click "OK".

To access your files and computers remotely over the Internet:

1. Go to "Start" > "Control Panel" > "Network and Sharing Center".
2. Click "Change advanced sharing settings".
3. Select the "Turn on advanced sharing" option.
4. Click "Apply".

To share your photographs with others:

1. Go to "Start" > "Control Panel" > "Appearance and Personalization" > "Windows Explorer".
2. Click "Organize" > "Options".
3. Select the "View" tab and choose "Hidden files and folders".
