The information contained herein is subject to change without notice. No part of the document may be photocopied, reproduced, or translated to another language without the prior written consent of Hewlett-Packard Company.

Notice

The only warranties for HP products and services are set forth in the express warranty statements accompanying such products and services. Nothing herein should be construed as constituting and additional warranty. HP shall not be liable for technical or editorial errors or omissions contained herein.

The Hewlett-Packard Company shall not be liable for incidental or consequential damages in connection with, or arising out of the furnishing, performance, or use of this document and program material which it describes.

Note: Regulatory information can be found in the Specification section of this guide.

WARNING! To prevent fire or shock hazard, do not expose this product to rain or any type of moisture.

Always follow basic safety precautions when using this product to reduce risk of injury from fire or electric shock.

WARNING! Potential shock hazard

• Read and understand all instructions in the setup poster.
• Telephone lines can develop hazardous voltages. To avoid electrical shock, do not touch the contacts on the end of the cord, or any of the sockets on the HP Fax. Replace damaged cords immediately.
• Never install telephone wiring during a lightening storm.
• Use only a grounded electrical outlet when connecting the device to a power source. If you do not know whether the outlet is grounded, check with a qualified electrician.
• Observe all warnings and instructions marked on the product.
• Unplug this product from wall outlets and telephone jacks before cleaning.
• Do not install or use this product near water or when you are wet.
• Install the product securely on a stable surface.
• Install the product in a protected location where no one can step on or trip over the line cord, and where the line cord will not be damaged.
• If the product does not operate normally, see the Troubleshooting section of this user guide.
• No operator-serviceable parts inside. Refer servicing to qualified service personnel.
• Use in a well ventilated area.

It is not lawful in many places to make copies of the following items. When in doubt, check with a legal representative first.

• Governmental paper or documents
  - Passports
  - Immigration papers
  - Selective service papers
  - Identification badges, cards or insignias
• Governmental stamps:
  - Postage stamps
  - Food stamps
• Checks or drafts drawn on Governmental agencies
• Paper currency, traveler’s checks, or money orders
• Certificates of deposit
• Copyrighted works

- Regulatory notices 76
Quick start

This chapter gives you a quick introduction to the basic functions of your new fax machine. Please refer to the later chapters for detailed instructions.

1 The “arrow buttons” located under the Menu button on the control panel are designated by ◄ ► in the instructions.

Load paper

You can load up to 50 sheets of plain paper in the input tray. Before loading the paper, make sure the paper size is set correctly in the Basic FAX menu. For more information, see Paper Size on page 13.

The HP Fax is designed to work with a variety of plain papers (cotton bond 75–90 g/m² (20–24 lb.)) in A4, Letter, and Legal sizes.

TIP: Some papers have a side that’s been conditioned for printing. The “print side” is indicated on the paper’s packaging. Always load with the print side facing you.

1 Slide the Paper Guide to Ltr or A4 paper width. Be sure not to bind the paper stack.

2 Pull the Paper Tray Cover toward you to open it.

NOTE: You must open the Paper Tray Cover to properly insert the paper.
Load documents to fax or copy

You can load up to 10 pages in the document feeder. Load the documents face down (printed side toward the machine).

Send a fax

1. Place the document to be sent (up to 10 pages) in the document feeder.
2. Dial the number by using one of these methods:
   • Entering the number and pressing Start/Enter.
   • Lifting the handset, entering the number, and pressing Start/Enter.
   • Using the Loudspeaker or Speakerphone button to listen as you dial, then pressing Start/Enter.
   • Pressing and holding a One Touch button. For more information, see One-touch dialing on page 24.
   • Pressing the Speed Dial button, entering a speed dial code and pressing Start/Enter. For more information, see Dial from the phone book on page 24.

NOTE: One touch and speed dial codes must have been previously programmed. For more information, see Store a number in the phone book on page 23.
Receive a fax

How faxes are received depends on how the Answer Mode/Receive Mode is set. For more information, see Set rings to answer on page 27.

**FAX or TAM answer mode**
The fax machine will answer the telephone, automatically detect fax tones, and receive a fax.

**TIP:** If you answer the telephone and hear fax tones, press the Start/Enter button to receive the fax.

**AUTO answer mode**
In AUTO mode the telephone rings for a certain number of rings (see Set rings to answer on page 27), then switches to FAX receiving.

**TEL answer mode**
If the answer Mode is set to TEL, you must manually receive faxes.

1. Answer the telephone.
2. If you hear fax tones, press the Start/Enter button.
3. Once you hear fax tones from both machines (this may take several seconds), you should hang up the telephone.

Make a copy

You can make multiple copies of a 10 page document.

**Single copy—default settings**
1. Turn the page face down and insert it into the document feeder.
2. Press Copy twice.

**Multiple copies or copies with options/settings**
1. Turn the page face down and insert it into the document feeder.
2. Press Copy.
   
   Number of Copies then 01 [01-50] will display.

**TIP:** The maximum number of copies depends on the model you purchased.

3. If you want more than one copy, use the phone pad to enter the number of copies.
4. Press Copy to start copying or press Start/Enter to go to the next option.
   
   Zoom Rate then 97% will display.
5. Press ‹ † ‡ to select the reduction or enlargement percentage you want (50 –125).

**TIP:** The maximum enlargement percent depends on the model you purchased.

6. Press **Copy** to start copying or press **Start/Enter** to go to the next option.
   
   Collate then **Off** will display.

7. Press ‹ † ‡ to select **On** if you want the copies collated.
   
   If Collate is **Off**, pressing either **Copy** or **Start/Enter** will start copying.

8. If Collate is **On**, press **Copy** to start copying or press **Start/Enter** to go to the next option.
   
   Print Order then **Normal** will display.

9. Press ‹ † ‡ to select **Reverse** if you want the last page printed first.
   
   Printing the copies in reverse order will cause the first page to be on top when the copy is complete.

10. Pressing either **Copy** or **Start/Enter** will start copying.

---

**Make a telephone call**

Use one of the following methods:

- Pick up the handset and dial the number.
- Press and hold a One Touch number. This turns on the speaker. When you are connected, pick up the handset (HP 1050 Fax does not have to pick up handset since it has a speakerphone.) For more information, see One-touch dialing on page 24.
- Press the **Speed Dial** button, enter a speed dial code and press **Start/Enter**. This turns on the speaker. When you are connected, pick up the handset (HP 1050 Fax does not have to pick up handset as it has a speakerphone.) For more information, see Dial from the phone book on page 24.
- HP 1050 Fax: Press the **Speakerphone** button and dial the number.

**NOTE:** One touch and speed dial codes must have already been entered before you can use them. For more information, see Store a number in the phone book on page 23.
This chapter lists the basic features of your new HP Fax and introduces you to the machine. For detailed instructions, refer to the later chapters.

The HP Fax features
The HP Fax offers the following features:

- 100 page fax memory
- 50 page paper tray
- 10 page document feeder
- Scan & Fax capability: Scan the entire document into memory before sending (see page 29).
- 80 to 100 (depends on model) speed dialing locations (including 10 One-Touch speed dials) (see page 23).
- Distinctive Ring (DRPD) capability: Multiple numbers on the same phone line that are differentiated by ring pattern (this feature only is available in certain areas) (see page 30).
- Broadcasting: Send the same document to multiple destinations (see page 43).
- Fax forwarding: Forward documents to another fax machine (see page 47).
- Delayed fax: Send the document at a later time (see page 44).
- Send/Receive Polling: Retrieve a waiting fax or hold a fax to be picked up (see page 45).
- Caller ID (see page 28).
- Last 10 number redial (see page 54).
- Junk fax blocking (with Caller ID) (see page 28).
- Reports to help you manage your work (see page 51).

The HP 1050 Fax only
The HP 1050 Fax also offers a Digital Message Center with these features:

- 30 minutes of incoming message memory
- 30 second greeting
- Message paging: Calls you when you have received a message.
- Remote access
- Toll saver
- Speakerphone
The HP Fax 1040/1050

1. Power cord socket
1 Connect handset to the HANDSET port.
2 Connect telephone line to the LINE port.
3 HP 1040 only: Connect answering machine or extension phone to the EXT. port.

Control Panel of HP FAX

Figure 2-4 Control panel of HP 1040 Fax
**Figure 2-5** Control panel of HP 1050 Fax

**Figure 2-6** HP 1040 & HP 1050 Fax control panel—Left side

1 **Scan & Fax Mode**: When Scan & Fax mode is turned on, the device scans all pages before starting to send the fax. The button is lit when Scan & Fax Mode is turned on.

2 **Silent Mode**: Will mute most sounds made by the device. To do this automatically at certain hours, see *Adjust volume* on page 28 for instructions on using the menu. The button is lit when Silent Mode is turned on.

3 **Report/Help**: Prints status reports or the Help file, which will provide information on using your HP Fax.

4 **Access Cartridge**: Moves the print cartridge to the center so it can easily be replaced.

5 **Resolution**: Improves the clarity of a document that you are faxing or copying.
**Figure 2-7** HP 1040 & HP 1050 Fax control panel—Middle

6 *Space*: [The 1 key]. Enters a space between words when entering a name in a text field.

7 *Display*: Displays menu items and messages from the HP Fax.

8 *Key pad*: Dials telephone and fax numbers and enters letters and symbols in text fields. The phone key pad is also used for one-touch dialing.

9 *Symbols*: [The 0 key]. Used to enter special characters when entering a name in a text field.

10 *Speed Dial*: [The # key]. Stores and dials 80 or 100 (varies by model) telephone/fax numbers.

**Figure 2-8** HP 1040 & HP 1050 Fax control panel—Right side upper

11 *Menu*: Displays the options available for your HP Fax.

12 *Scroll/Volume*:
   - When you are entering numbers or text, moves the cursor to the digit or character to be edited.
   - When *Menu* has been pressed, displays the next and previous menu options. Referred to as the arrow keys in text and are designated by: ◀ ▶.
   - When no other button has been pressed, adjusts the ringer volume.
   - If the handset is off hook, adjusts the handset volume.
   - When *Loudspeaker* or *Speakerphone* has been pressed, adjusts the speaker volume.
Figure 2-9 HP 1040 & HP 1050 Fax control panel—Right side lower

13 Copy:
- Press twice to copy a document with the default copy settings.
- Press once then set options. Press Start/Enter between options. Press Copy to copy the document.

14 Start/Enter:
- Starts a fax or printing a report.
- Accepts the selection shown in the display.

15 Cancel:
- In a Menu, stops an operation and returns to Ready mode.
- When entering text or numbers:
  - Press once to backspace delete numbers or letters when editing.
  - Hold down to delete entire field.
  - Press again after holding down to return to Ready mode.

Figure 2-10 HP 1040 Fax only control panel—Right middle

16 Mute/Search:
- Mutes the telephone during a telephone call.
- Search for a number stored in memory.

17 Loudspeaker: Allows you to listen to the telephone while dialing or accessing voice mail without lifting the handset. Allows you to listen only. There is no speakerphone capability.

18 Redial/Pause:
- Automatically redials the last number or allows you to select one of the last 10 numbers to redial.
- Adds a pause while entering a speed dial number.

19 R or Flash: Switches between telephone functions; for example, call waiting. Contact your local telephone company for information. The name of this button varies by country.

20 Ans. Mode/Contrast:
- When no document is loaded, pressing this button changes the Answer Mode. See Answer/receive mode on page 31.
- When a document is loaded, pressing this button changes the contrast for faxing and copying.
16 **Mute/Search:**
- Mutes the telephone during a telephone call.
- Search for a number stored in memory.

17 **Speakerphone:** The HP 1050 provides a fully functional speaker phone.

18 **Redial/Pause:**
- Automatically redials the last number or allows you to select one of the last 10 numbers to redial.
- Adds a pause while entering a speed dial number.

19 **R or Flash:** Switches between telephone functions; for example, call waiting. Contact your local telephone company for information. *The name of this button varies by country.*

20 **Rcv. Mode/Contrast:**
- When no document is loaded, pressing this button changes the Receive Mode. See *Answer/receive mode* on page 31.
- When a document is loaded, pressing this button changes the contrast for faxing and copying.

21 **Greeting:** Press and hold to record the greeting for the Digital Messaging Center. Press again to stop the recording.

22 **Play/Rec:** Use to play answering machine messages or to record messages.

23 **Erase:**
- Press during a message to delete that message.
- Press and hold to delete all messages.

24 **Answer:** Turns the answering machine on and off. Button is lit when the answering machine is on.

25 **Microphone:** This icon shows the location of the microphone used for the Speakerphone and to record the answering machine greeting.
Overview of menu options

Your fax machine has settings that you can change. To find out how the options are currently set, print the System Data report (see Print reports on page 51.)

To change these settings, see Navigate the menus on page 17.

The tables below shows the options for a menu in the left column and their setting choices in the right column.

### BASIC FAX menu

<table>
<thead>
<tr>
<th>Option</th>
<th>Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rings To Answer</td>
<td>You can select the number of rings before answering an incoming call. If you are using your machine as both a telephone and a fax machine (AUTO or TAM mode), we suggest you set the ring count to at least 4 (HP 1040) or 2 (HP 1050 with Toll Saver turned on) to give you time to answer. The number of rings can be 2 to 7.</td>
</tr>
<tr>
<td>Caller ID</td>
<td>You can see the number of the person calling you. Before using this feature, Caller ID service must be installed on your telephone line by the telephone company. The settings are On, On w/ Junk Fax, and Off. For more information, see Use Caller ID on page 28.</td>
</tr>
<tr>
<td>Set Junk Fax No.</td>
<td>If you have Caller ID set to On w/ Junk Fax, you can block faxes from particular numbers. You must have received a fax from that number to block it. Even though you have added junk fax numbers, if you turned off the Caller ID option above, the Junk Fax protection will be removed. The settings are Add and Delete.</td>
</tr>
<tr>
<td>Print Quality</td>
<td>Allows you to set the print quality to Normal or Draft.</td>
</tr>
<tr>
<td>Paper Size</td>
<td>A4, Letter and Legal are the paper sizes you can use to receive faxes and copy.</td>
</tr>
<tr>
<td>Sending Confirm</td>
<td>A confirmation report shows whether the transmission was successful or not, how many pages were sent, etc. ON: prints a confirmation report automatically each time you send a fax. OFF: never prints a confirmation report (You can print one manually using the Report/Help button (see Print reports on page 51). ERROR: prints only when an error occurs. Note that this report can include the Image TCR (see Image TCR on page 29).</td>
</tr>
<tr>
<td>Image TCR</td>
<td>Image TCR prints a sending confirm page with a miniature image of the first page of the fax.</td>
</tr>
<tr>
<td>Auto Reduction</td>
<td>When receiving a document as long as or longer than the paper loaded, the machine can reduce the data to fit your paper. If the fax machine cannot fit the data into one page with the feature enabled, the data is divided and printed in actual size on two or more sheets. The settings are On and Off.</td>
</tr>
</tbody>
</table>
Overview of menu options

<table>
<thead>
<tr>
<th>Option</th>
<th>Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Fax Log</strong></td>
<td>The Fax Log shows the specific information concerning transmission or reception activities, the time and date of most recent 40 transmissions or receptions. The settings are <strong>On</strong> and <strong>Off</strong>.</td>
</tr>
<tr>
<td><strong>Resolution</strong></td>
<td>Sets the default resolution when copying and faxing. The settings are: <strong>Standard</strong>, <strong>Fine</strong>, and <strong>Superfine</strong>. For more information, see Set document resolution and contrast for a single copy on page 26.</td>
</tr>
<tr>
<td><strong>Contrast</strong></td>
<td>Sets the default contrast when copying and faxing. The settings are: <strong>Normal</strong>, <strong>Lighten</strong>, <strong>Photo</strong>, and <strong>Darken</strong>. For more information, see Set document resolution and contrast for a single copy on page 26.</td>

</tbody>
</table>
Loudspeaker—HP 1040 Fax

You do not need to pick up the handset to make a phone call. When dialing, just press the Loudspeaker button and enter the numbers. When your party answers, pick up the handset to talk to them. This feature is especially useful for checking voicemail messages.

NOTE: Your HP 1040 Fax does not have speakerphone capabilities. The loudspeaker enables you to hear calls but you must speak using the handset.

TIP: If you want to share the conversation with somebody beside you, pick up the handset and press Loudspeaker. The line is still connected and everybody can listen to the conversation.

While you are using Loudspeaker, do not place the handset beside the speaker, as this may result in howling.

Speakerphone—HP 1050 Fax

The HP 1050 Fax has full speakerphone capabilities. You never have to lift the handset if you do not want to. Press Speakerphone to make and receive calls as well as listening to your answering machine messages.

While you are using the Speakerphone, do not place the handset beside the speaker, as this may result in howling.

<table>
<thead>

Navigate the menus

Ready mode

Whenever the HP Fax is ready for faxing and copying (called Ready mode), it will display the date, time, and answer mode. For example, **OCT-05 02:23PM FX**

Menu buttons

Use the Menu buttons to navigate the menu items.

1. Press the **Menu** button to access the menu system.
2. Use the ← → buttons to scroll through the options on a particular level.
3. Press **Start/Enter** to select a particular menu option.
4. Press **Cancel** to return to Ready mode.

**Example** To change the default Resolution setting to Fine, you would take the following steps.

1. Press the **Menu** button repeatedly until **BASIC FAX** displays.
2. Press **Start/Enter**.
   
   **Rings to Answer** will display.
3. Use the ← → to scroll until **Resolution** displays.
4. Press **Start/Enter**.
   
   **Standard** will display.
5. Use the ← → to scroll until **Fine** displays.
6. Press **Start/Enter**.
7. Press **Cancel** to return to Ready mode.
Enter dates, times, text, and telephone numbers

Use these buttons when menu items ask you to enter dates, time or text.

- If the date format seems unfamiliar, check that you selected the correct one for your country when setting up your HP Fax (see Set the date and time on page 49).

- Some items on the display will show up with the blinking cursor under the item to change. Simply press the key for the new character or number or use the \( \rightarrow \) to move to the one you want to change.

- To enter a pause in a telephone number, press Redial/Pause. A \( \text{P} \) will appear in the display. Press the button multiple times for a longer pause.

- When entering text, press the phone pad button repeatedly to scroll through the characters. Use the following table for reference.

Most text fields

The letters and numbers scroll as shown next to each button for text fields such as the phone book. Press the 2 to display an A and wait briefly for the cursor to advance before pressing 3 to select D. If you want a B, press 2 twice in rapid succession.

**Table 2-1** Keys to enter text and numbers

Fax header telephone number

For most telephone numbers you can only enter the numbers (for example, 1234567890). For the fax header that prints on all your faxes (see Set the fax header information on page 50), you can enter some punctuation in the number.

To punctuate the telephone number in the fax header, use these keys.

**Table 2-2** Keys to punctuate the fax header telephone number

Speed dialing

Your HP Fax has a built-in phone book that allows you to enter up to 80 or 100 (varies by model) names and numbers for faxing or telephone use. Once entered, you can dial the number by any of these methods.

- One-Touch (first 10 numbers)
- Speed dial code
- Searching the phone book

All numbers must be stored in the phone book before use.

Store a number in the phone book

Once in the phone book these numbers can be dialed using one touch buttons, speed dial codes, or by searching the phone book.

1. Hold the Speed Dial button for about two seconds.
   The display shows Speed [00-80]##.

**NOTE:** The number of available speed dial codes varies by model.

2. Enter a two-digit number and press Start/Enter.
   Numbers from 00 to 09 will be used for One-Touch dialing, and the numbers 10 and up will be used for Speed dialing.

3. Enter the telephone/fax number you want to store (up to 40 digits) and press Start/Enter.
   - If you want a pause between numbers (for example, when entering an access code where you need to wait for a second dial tone), press Redial/Pause. A P appears in the display. For a longer pause, simply press Redial/Pause again.
   - If you make a mistake while entering a number, use ! to move the cursor under the digit, then enter the correct digit.
     - **Cancel** will backspace delete in the field.
     - Holding down **Cancel** will clear the whole field.

4. Enter the name (up to 20 characters) and press Start/Enter.
   If you do not want a name, just skip this step by pressing Start/Enter.

**TIP:** If you have subscribed to a Caller ID service, we recommend that you enter a name.

5. Press **Cancel** to exit.
Speed dialing

Print the phone book
2. Press ▲ until Phonebook displays and press Start/Enter.

Dial from the phone book
Dialing works the same for both faxes and telephone calls. If a document is loaded, the HP Fax sends the fax.

One-touch dialing
▲ Press and hold the number (0 through 9) on the phone pad.

You can refer to the number assigned to each code by printing the phone book. See Print the phone book on page 22.

TIP: You can also dial these numbers using the speed dial code as described below.

Speed dialing
1. Press Speed Dial.
2. Enter a two-digit speed dial code.
   You can refer to the number assigned to each code by printing the phone book. See Print the phone book on page 22.
3. Press Start/Enter.

Phone book dialing
You can search the entire phone book to find the number you want to dial.

Search sequentially through the phone book
1. Press Mute/Search.
2. Press ▲ ▼ to move upward or downward through the directory until you find the number you want.
3. When the number you want appears in the display, press Start/Enter to dial.

Search for a particular first letter
1. Press Mute/Search.
2. Press the phone pad button labelled with the letter you want to find.
   • For example, if you want to find the name ‘NEW YORK’, press the 6 button, which is labelled with ‘MNO’.
   • The machine finds the closest entry.
   • If the machine cannot find a name that begins with the given letter, the machine shows the message Not Found.
3. When the name and number you want appears in the display, press Start/Enter.
Paper types and sizes

The HP Fax is designed to work optimally with plain paper (cotton bond: 20 lb., 75 g/m²) in the following sizes: A4, Letter, and Legal.

**TIP:** Some papers have a side that’s been conditioned for printing. The print side is usually indicated on the paper’s packaging. **Always load with the print side facing you.**

You can load up to 50 sheets of paper in the paper tray. Satisfactory print and receive quality can be obtained with many types of plain paper. Since the quality of plain paper varies widely, test the print quality before buying large quantities of paper. Your machine uses a variety of papers including:

- Copier paper
- Bond paper
- Dual-purpose paper

Because all paper varies in physical characteristics, you can receive mixed results from different packages of paper even though the packages contain the same type of paper. If you encounter undesirable results, try the other side of the paper, a different type, or another package of the same kind of paper.

Do not use the following types of paper with your machine:

- Continuous form feed paper
- Synthetic paper (Tyvek®, etc.)
- Thermal paper
- Multi-sheet forms and documents
- Chemically treated paper (pressure-sensitive paper, carbon-coated paper, etc.)
- Coated (glossy, photo, etc.)
- Papers with raised, embossed lettering

Document types and sizes

Acceptable document size depends on whether you are faxing a single sheet or multiple pages.

- The minimum document size is 148 mm (5.8 in.) wide by 128 mm (5 in.) long.
- The maximum size is 216 mm (8.5 in.) wide by 356 mm (14 in.) long.

Follow these tips to ensure worry-free faxing.

- Be sure that your document is dry and free of staples, paper clips, and other foreign objects.
- For more information on what kind of paper you can use for documents, see **Acceptable documents** on page 71.
Set document resolution and contrast for a single copy

- If you are sending more than one sheet, make sure the bottom sheet enters first. Insert the sheets with a slight push to ensure smooth feeding.
- For multiple sheets, all pages of the document must be the same size and paper type.
- If you are loading pages that are unusually thick or thin, feed one sheet at a time. If the document does not feed correctly, open the control panel, remove the document, and try loading it again.

**DO NOT try to send documents that are:**
- wet
- covered with wet ink or paste
- wrinkled, curled, or folded
- too thin (less than 0.07 mm (0.18 in.) thick—onionskin, airmail paper, etc.)
- too thick (more than 0.15 mm (0.38 in.) thick—index cards, file folders)
- chemically processed (pressure-sensitive paper, carbon-coated paper, etc.)
- coated (glossy, etc.)
- too small or short (such as a label, voucher, etc.)
- made of cloth or metal

To send these documents, use an office copier to make a photocopy first, and then send the copy.

---

**Set document resolution and contrast for a single copy**

Document resolution and contrast are set in the same manner for both faxes and copies. For most faxes and copies, default settings will work well.

If you need to send/copy a document with unusual contrast characteristics, including photographs, you can adjust the resolution and contrast for that document using the control panel buttons.

**TIP:** You can also change the default settings for all documents using the menu. See **BASIC FAX menu** on page 13.

We recommend you use documents printed using a high quality printer, felt tip pen, black ink, or typewriter. The paper should be white or very light, and of normal weight, not cardboard or onionskin.

Blue lines on a ruled pad don’t fax well. For more information on the types of paper you can use for documents, see **Document types and sizes** on page 23.

**NOTE:** You must set the resolution and contrast before dialing the number.
1. Turn the page face down and insert it into the document feeder. For more information, see Load documents to fax or copy on page 2.

2. Press Resolution repeatedly to select the option you want.
   • STANDARD works well for printed or typewritten originals with normal-sized characters.
   • FINE is good for documents containing a lot of detail.
   • SUPER FINE works well for documents containing extremely fine detail; for example, a map or engineering drawing. SUPER FINE only works if the remote machine also has the SUPER FINE feature.

   **TIP:** SUPER FINE mode is not used when sending documents scanned into memory (i.e., Broadcasting and Delayed Fax). If you are sending document using one of these methods, SUPER FINE will be changed back to FINE even though you selected SUPER FINE.

   If the Scan & Fax Mode light is on and SUPER FINE is chosen, the fax will be sent as if the light were off.

3. Press Ans.Mode/Contrast or Rcv.Mode/Contrast repeatedly to select the option you want.
   • NORMAL works well for normal handwritten, typed, or printed documents.
   • LIGHTEN works with very dark print.
   • DARKEN works with light print or faint pencil markings.
   • PHOTO is used when faxing photographs or other documents containing color or gray shades. When Photo is chosen, the resolution is automatically set to FINE.

4. Dial the number and press Start/Enter or press Copy.

When sending/copying is finished, resolution/contrast automatically returns to default.

**Adjust volume**

You can adjust the volume level for both the ringer and the speaker.

**Ringer volume**

▲ Press ‹ ‡ when the fax is in Ready mode to adjust the volume of the ringer.

- Whenever you press the button, it will increase or decrease the volume.
- The volume 0 indicates that the machine will not ring when a call is received.

**Speaker volume**

1. Press Loudspeaker (HP 1040) or Speakerphone (HP 1050).
2. Then press ‹ ‡ to adjust the volume of the speaker.
Automatic fax redial

When you send a fax, if the number you have dialed is busy or there is no answer, the machine will attempt to redial the number every three minutes up to two times.

Before redialing, the display shows To redial now, press Start/Enter.

If you want to redial the number immediately, press Start/Enter.

Or, press Cancel to stop redialing and the machine returns to Ready mode.

Receiving via an extension telephone (HP 1040 Fax only)

If you have an extension phone on the same line as your HP Fax you can remotely start receiving a fax.

1. Answer the call on the extension phone.
2. Press *9* (manual fax receive code) in sequence when you hear a fax tone.
   • Your fax machine detects the code and starts to receive the document.
   • The code is preset at the factory. You cannot change the asterisks but you can select any number between 0 and 9. For more information, see ADVANCED FAX menu on page 14.
3. Hang up the phone when your fax machine starts to receive.
3 Additional features

This chapter contains information on additional features you may want to set or change for your HP Fax.

- **Rings to answer**: Sets the number of rings before the HP Fax answers the phone.
- **Caller ID**: If you subscribe to Caller ID through your local phone company, you can use it with your HP Fax.
- **Block Junk Faxes**: In conjunction with Caller ID, you can block certain numbers from sending you a fax.
- **Scan & Fax Mode**:
  - **Image TCR**
  - **Distinctive Ring**
  - **Answer/Receive mode**: Determines how the HP Fax responds to incoming calls.

### Set rings to answer

You can select the number of rings that will occur before the fax answers an incoming call. If you are using your machine as both a telephone and a fax machine, we suggest you set the ring count to at least 4 to give you time to answer.

**TIP**: **HP 1050 Fax**: The Toll Saver function for the Digital Message Center interacts with Rings to Answer. See **Toll Saver** on page 40. If you have the HP 1050 Fax and have Toll Saver turned on, set the Rings to Answer to 2.

1. Press **Menu** repeatedly until **BASIC FAX** displays and press **Start/Enter**.
   
   **Rings to Answer** will display.

2. Press **Start/Enter**.

3. Enter the number of rings you want (2–7) and press **Start/Enter**.
   
   The HP Fax rings the set number of times and then answers. It then produces a different sounding ring to alert you to which type of call is incoming.
   
   - The additional ring may occur once for a fax call.

---

**1** The “arrow buttons” located under the **Menu** button on the control panel are designated by ◄ ► in the instructions.
Use Caller ID

- The additional ring occurs 5 times for a voice call. After the 5 additional rings, the answering machine will answer.

Use Caller ID

Many countries have the Caller ID system that enables the receiver to view the numbers or names of callers. Once you have subscribed to Caller ID services through your local phone company, your machine can display caller information.

Turn Caller ID on

1. Press Menu repeatedly until BASIC FAX displays and press Start/Enter.
2. Use the ▼ ▲ to scroll to Caller ID and press Start/Enter.
3. Use the ▼ ▲ to scroll to the desired option and press Start/Enter.
   - On: Activates the Caller ID feature.
   - On w/ Junk Fax: Activates Caller ID and ignores any fax registered as a junk fax (see Block junk fax numbers on page 28).
   - Off: Deactivates the Caller ID feature.

See who called with Caller ID

This function allows you to see who has called. You cannot dial these numbers.

1. Hold Redial/Pause for about two seconds.
2. Press ▼ ▲ until Caller ID displays and press Start/Enter.
3. Scroll through the numbers by pressing ▼ ▲.

Print a list of Caller ID numbers

2. Press ▼ ▲ until Caller ID displays and press Start/Enter.

Block junk fax numbers

If you subscribe to Caller ID through your local phone company, you can block future faxes from numbers on the Caller ID List. Before using this feature, you must set the Caller ID option to On w/ Junk Fax (see Use Caller ID on page 28.)

Add a junk fax number

1. Press Menu repeatedly until BASIC FAX appears and press Start/Enter.
2. Press ▼ ▲ until Set Junk Fax No. displays and press Start/Enter.
3. Press ▼ ▲ until Add displays and press Start/Enter.
   The machine shows the first Caller ID number.
4. Press ▼ ▲ to find the Caller ID number you want to register as a junk fax and press Start/Enter.
You can enter up to 20 numbers. Numbers which have already been entered as a junk number are marked by * at the end of the display.

**Delete a number**

1. Press **Menu** repeatedly until **BASIC FAX** appears and press **Start/Enter**.
2. Press ← → until **Set Junk Fax No.** displays and press **Start/Enter**.
3. Press ← → until **Delete** displays and press **Start/Enter**.
   The machine shows the first junk number.
4. Press ← → to scroll to the junk fax number you want to delete and press **Start/Enter**.

---

**Scan & Fax Mode**

Scan & Fax Mode causes the HP Fax to scan all the pages of the fax into memory before starting to send. This is useful for situations where the fax you are calling might be busy and need to be redialed. Several options automatically use Scan & Fax Mode; for example, Delayed Fax. You can also turn Scan & Fax Mode on for all tasks.

▲ Press the **Scan & Fax** button.

Scan & Fax Mode is on when the button is lit.

---

**Image TCR**

Image TCR (transmission confirmation report) is a valuable tool for keeping records of faxes you send. It prints a Sending Confirm page with a miniaturized image of the first page of the fax on it. See the following example.

![Sending Confirm](image)

- **Date**: 06-15-2002  SUN 11:25
- **Name**: PAT
- **Tel.**: 2234567890

**Phone**: 987654321
**Pages**: 1/1
**Start Time**: 03:15 11:24
**Elapsed Time**: 00'03''
**Mod**: ECM
**Result**: OK

First page of recent document transmitted...

33 Megs.

Here's a picture of our new fax machine. Let me know what you think.
Regards,
Pat

---

Additional features 29
To use image TCR, the **Scan & Fax Mode** light must be on (press the button if necessary) and you must set these Menu options to On: Image TCR and Sending Confirm. See **Scan & Fax Mode** on page 29. Follow these instructions to set the menu options:

1. Press the **Menu** button repeatedly until **BASIC FAX** displays and press **Start/Enter**.
2. Use the **← →** buttons to scroll to **Sending Confirm** and press **Start/Enter**.
3. Use the **← →** buttons to select **On** and press **Start/Enter**.
4. Use the **← →** buttons to scroll to **Image TCR** and press **Start/Enter**.
5. Use the **← →** buttons to select **On** and press **Start/Enter**.
6. Press **Cancel** to return to Ready mode.

**TIP:** Image TCR is unavailable if the resolution is set to Super Fine.

---

**Distinctive ring (DRPD)**

Distinctive ring or distinctive ring pattern detection (DRPD) is a service offered by some telephone companies. When you subscribe to this service through your local phone company, you have different ring patterns; such as double ring and triple ring, that allow you to have different telephone numbers on one physical line. Your HP Fax works with distinctive ring service.

Use Distinctive Ring to set your HP Fax to answer one of your phone numbers as a fax only line. The phone number (ring pattern) that you teach the HP Fax will be answered as if the machine is in FAX mode. All other numbers on the same line will be answered if they are in AUTO mode (HP 1040 Fax) or TAM mode (HP 1050 Fax).

**NOTE:** HP 1050 Fax: If you use Distinctive Ring to establish one of your numbers as a fax only line you must turn the Answering Machine on or the HP Fax will not answer the phone on the other numbers. If you do not want to use the answering machine, do not set up distinctive ring with your HP Fax.

If you have this service follow **both** of these instructions **in this order** to set it up and use it.

**Step 1—Teach the HP Fax the ring pattern**

The HP Fax will learn the ring pattern when you call it from another telephone or fax machine.

1. Be ready to call the fax machine.
2. Press **Menu** repeatedly until **ADVANCED FAX** displays and press **Start/Enter**.
3. Use **← →** to scroll through the options until **Distinctive Ring** displays and press **Start/Enter**.
   
   Call this fax from another fax machine... Waiting Ring... **will display**.
4. Call the HP Fax.
Additional features

DRPD OK will display when the pattern has been learned and the HP Fax will return to Ready mode.

Step 2—Set up distinctive ring (DRPD) answer mode

Once you have activated distinctive ring, it becomes one of the answering modes you can select by pressing the Ans.Mode/Contrast or Rcv.Mode/Contrast button.

▲ Press Ans.Mode/Contrast or Rcv.Mode/Contrast repeatedly until DRPD Mode appears in the display.

- In Ready mode, DR appears in the right hand corner of the display.
- Now, the HP Fax will manage calls and faxes as if it were set to AUTO mode (see AUTO mode on page 32.)

TIP: Distinctive ring must be set up again if you reassign your fax number or connect the machine to another telephone line. Once set up again (that is, the fax machine has learned the ring pattern and the answering mode is correctly set), you should test the fax machine by calling the fax number and another number on the same line. The machine should respond appropriately to a call placed to the fax number with fax tones, and to a normal telephone call with the expected ring pattern.

Answer/receive mode

How the product receives faxes depends on the answer/receive mode you chose when you set up the product. You can send faxes in any answer/receive mode. The answer/receive mode setting determines how the device answers the incoming call and varies between the models.

HP1040 Fax

<table>

Answer/receive mode

▲ When no document is loaded, press the Ans.Mode/Contrast button until the desired option displays.

- **FAX mode**
  - In Ready mode, FX appears in the right hand corner of the display.
  - When you get a call, the machine answers and receives the fax automatically. When reception is complete, the machine returns to Ready mode.
  - If you want to change the number of rings before it answers, see Set rings to answer on page 27.

- **AUTO mode**
  - In Ready mode, AU appears in the right hand corner of the display.
  - When a call comes in, the machine answers it. If a fax is being sent, the device receives the fax. If the machine does not sense a fax signal, it will ring 5 times in a different tone to tell you it may be a regular telephone call. If you do not pick up the handset it will try again to receive a fax after several more rings.
  - If you want to change the number of rings before it answers, see Set rings to answer on page 27.

- **TAM mode**
  - You must have an answering machine attached to the EXT line socket located on the bottom of your HP Fax.
  - In Ready mode, TM appears in the right hand corner of the display.
  - When a call comes in, the answering machine answers and listens. If it detects fax tones, it receives the fax; otherwise, it records the caller’s message.
  - If you have set your machine to TAM Mode and your answering machine is switched off or the answering machine is not connected directly to your fax machine, the machine will automatically attempt to receive a fax after several rings.
  - If your answering machine allows you to set the number of rings before it answers the telephone, set the answering machine to answer an incoming call in less than 4 rings.
  - When your answering machine answers an incoming call, it records a fax tone until it realizes a fax is coming through. Due to this, your answering machine may tell you a voice message has been left, even when it is actually a fax.

- **TEL mode**
  - In Ready mode, TL appears in the right hand corner of the display.
  - Automatic fax reception is turned off. You can receive a fax only by lifting the handset and pressing Start/Enter.

### HP1050 Fax

<table>
<thead>
<tr>
<th>How are you going to use your HP Fax?</th>

</thead>
<tbody>
<tr>
<td>• Telephone and fax with the integrated answering machine in the Digital Message Center.</td>
<td>TAM</td>
</tr>
<tr>
<td>• Telephone and fax machine without the answering machine.</td>
<td>AUTO mode</td>
</tr>
</tbody>
</table>
When no document is loaded, press the Rcv.Mode/Contrast button until AUTO, FAX, or TEL displays. If you are going to use the answering machine, we recommend setting the Receive mode to AUTO.

**NOTE:** If you want to use Distinctive Ring service from your phone company, set it up and select it using the Rcv.Mode/Contrast button before turning on the answering machine. See “Distinctive ring (DRPD)” on page 30.

- **AUTO mode**
  - In Ready mode, AU appears in the right hand corner of the display.
  - When a call comes in, the machine answers it. If a fax is being sent, the device receives the fax. If the HP Fax does not sense a fax signal, it will ring in a different tone to tell you it may be a regular telephone call. If you do not pick up the handset it will again attempt to receive the fax after several more rings. If a greeting has been recorded the HP 1050 Fax will turn on the answering machine and attempt to record a message.
  - If you want to change the number of rings before it answers, see Set rings to answer on page 27.
Answer/receive mode

- **FAX mode**
  - In Ready mode, FX appears in the right hand corner of the display.
  - When you get a call, the machine answers after the second ring, and receives the fax automatically. When reception is complete, the machine returns to Ready mode.
  - If you want to change the number of rings before it answers, see Set rings to answer on page 27.

- **TEL mode**
  - In Ready mode, TL appears in the right hand corner of the display.
  - Automatic fax reception is turned off. You can receive a fax only by lifting the handset and pressing Start/Enter.

- **TAM mode**
  - In Ready mode, TM appears in the right hand corner of the display whenever the Digital Message Center is turned on (The Answer button will be lit.)
  - When a call comes in, the answering machine answers and records the caller’s message if they leave one. If the machine detects a fax signal, it goes into receive mode.
  - When your answering machine answers an incoming call, it records a fax tone until it realizes a fax is coming through. Due to this, your answering machine may tell you a voice message has been left, even when it is actually a fax.

▲ Press the Answer button. The button will light up. When the Answer button is on. TAM mode overrides any mode that was set with the Rcv.Mode/Contrast button.
Your HP Fax has a built-in digital messaging center that gives you full message capabilities.

- 30 minutes of digital message recording (includes incoming message and greeting)
- Default incoming message (ICM) length is 60 seconds
- In case of a power outage, your messages in memory will be retained for 30 minutes
- Announcement only setting (play the greeting without recording messages)
- Automatic paging to a forwarding number when you receive a message.
- Remote access to your messages and many message center features

NOTE: You cannot turn on the message center until you record a greeting. See “Record your greeting” on page 36.

If the message center is not turned on and the Receive mode is set to AUTO, the message center will automatically turn on and record a message (as long as a greeting has been recorded.)

Press the Answer button to turn on the Digital Message Center.

- The Answer button lights up.
- TM appears in the display.
Record your greeting

The greeting is an outgoing message (OGM) or announcement that plays whenever a call comes in and the device is in TAM mode (the Answer button is lit and TAM is displayed).

Your greeting can be between 3 and 30 seconds in length.

1. Press and hold the Greeting button until you hear a beep.
2. When Record displays on the control panel, speak into the microphone to record your greeting.
   The seconds are counted off on the display while you are recording.

   **NOTE:** You cannot use the handset to record your greeting. You must use the microphone.

   **TIP:** You should be about 12 in. (30 cm) from the microphone when speaking.

3. Press the Greeting button again to end the recording.
   Your greeting will play back.

Play your greeting

The greeting plays whenever the message center takes a call or when the answering machine is turned on. You can also play it at any time.

▲ Press the Greeting button.

   The display shows the date and time the greeting was recorded and counts down the seconds as it is played.
Screen or monitor your calls

The HP Fax allows you listen to messages being recorded so you can decide whether to answer them. To monitor your calls, you must turn call monitoring on in the menu.

1. Press the **Menu** button repeatedly until **SET UP TAM** displays and press **Start/Enter**.
2. Press ⬅️ ➔ until **Call Monitor** displays and press **Start/Enter**.
3. Press ⬅️ ➔ until **On** displays and press **Start/Enter**.

When call monitoring is turned on, you will hear the person recording the message. If you pick up the handset or press **Speakerphone**, the device stops recording and you can speak directly to the caller.

Announcement only

You can set your HP Fax to play a greeting without recording any messages; for example, you might want to announce store hours and location.

1. Press **Menu** repeatedly until **SET UP TAM** displays and press **Start/Enter**.
2. Press ⬅️ ➔ until **ICM Record Time** displays and press **Start/Enter**.
3. Press ⬅️ ➔ until **0sec** displays and press **Start/Enter**.

Play back messages

When you have new messages, the **Answer** button flashes and the number of messages is shown on the display. If you have messages that you have previously listened to but not erased, they will be shown also. For example, **New: 1 Old: 3** indicates that there are a total of 4 messages on the device—3 of them have been listened to previously and 1 is a new message.

Play back new messages only

▲ **Press** **Play/Record**.

The time the message was recorded displays briefly. While the message is being played, the number of seconds is counted down in the display.

Play back all messages

▲ **Press and hold** **Play/Record** until you hear a beep.

• The device plays all the messages in memory in the order they were received.
• **Press** **Cancel** to stop playing messages before they have all played.

Skip or repeat messages

.symbol:1 is the 1 key and symbol:3 is the 3 key on the keypad.

Repeating a message or skipping backwards

▲ **Press** symbol:1 while listening to the message.
Erase messages

- Press \( \# \) once replays this message.
- Press \( \# \) repeatedly skips back to previous messages.

Skipping a message

\( \text{Â}\) Press \( \# \) while listening to the message.

- Press \( \# \) once skips this message.
- Press \( \# \) repeatedly skips further messages.
- Press \( \# \) while the last message is playing will return the device to Ready mode.

---

Erase messages

Messages are not erased when you listen to them. If you do not periodically erase messages, the memory will become full. If the memory becomes full, the HP Fax will disconnect the current caller and fail to answer the phone until memory is made available by erasing messages.

Erase selected messages

\( \text{CAUTION:}\) Once you have erased a message, there is no way to recover it.

\( \text{Â}\) Press Erase while the message is playing.

The message is erased and Erasing... is displayed.

Erase all messages in memory

\( \text{CAUTION:}\) Once you have erased the messages, there is no way to recover them.

1. Press Erase when no message is playing.
   Erase all MSG.? will display.

2. Press Start/Enter to erase all the messages.
   The messages are erased and Erasing... is displayed.
   Press Cancel to save the messages and return to Ready mode.
Remote Access

You can access your messages and many of the message center functions from any Touch Tone phone.

Remote Password

To use the remote access functions, you will need to use the Remote Password. The default remote password is #139#. You can change the numbers, but the 3-digit password must start and end with #.

Follow these instructions to change the remote password.

1. Press **Menu** repeatedly until SET UP TAM displays and press **Start/Enter**.
2. Press ‹ † ‡ until Remote Password displays and press **Start/Enter**.
   
   #139# will display.
3. Change the numbers as desired and press **Start/Enter**.

Access the message center

1. Call the HP Fax from a Touch Tone phone.
2. Enter your remote password when the device answers the phone.
   
   You will hear 2 short beeps when the password is accepted.
3. Enter the remote command you want to use. Refer to the table below for a list of commands.

   **TIP:** You must enter a command within 15 seconds or the HP Fax will disconnect the line.

4. Press #0 to end the remote session.

**NOTE:** If you do not enter #0, it may take several minutes for the HP Fax to disconnect and release the phone line.

Toll Saver

Toll Saver allows you to tell whether or not there are new messages before the message center answers the phone. This feature allows you to hang up before incurring phone charges.

When Toll Saver is on and there are no new messages, the HP Fax adds two rings to the Rings to Answer setting. For example, if Rings to Answer is set to 4, the device will ring 6 times before answering if there are no new messages. (See Set rings to answer on page 27.)

Follow these instructions to turn Toll Saver on and off.

1. Press **Menu** repeatedly until **SET UP TAM** displays and press **Start/Enter**.
2. Press ◄ ► until **Toll Saver** displays and press **Start/Enter**.
3. Press ◄ ► until **On** displays and press **Start/Enter**.
Message paging

If you are out of the office, you can have the HP Fax call you when you receive a new message.

**TIP:** You should only turn paging on if you are going to be gone. There is a delay between receiving the message and the paging message going out. If you happen to answer an incoming call at the time the paging message is being sent, it will override your incoming call.

To use message paging follow these steps.

**Set up message paging**

1. Press **Menu** repeatedly until **SET UP TAM** displays and press **Start/Enter**.
2. Press **↓ ↑** until **Message Paging** displays and press **Start/Enter**.
3. Press **↓ ↑** until **On** displays and press **Start/Enter**.
4. Enter the telephone number you want called (for example, your mobile number) and press **Start/Enter**.
   - The device will ask you to record (or if you want to change) the Paging Greeting. The paging greeting will be played to you when you answer the phone at the forwarded number.
5. Press **Start/Enter** and speak into the microphone to create or change a Paging Greeting. When you are finished speaking, press **Greeting** to end the message.
   - Press **Cancel** to keep an existing paging greeting.

**Receive a message page**

When you answer the phone, your paging greeting will play repeatedly to let you know that you have a message. You can then enter your password and use the remote access codes to listen to your message.

See **Remote Access** on page 39 to learn how to access the message.

**Record a conversation**

**NOTE:** In many jurisdictions, there are legal issues surrounding the recording of telephone conversations. Verify your laws with your local legal authority.

If you are using the speakerphone, you can record a conversation up to 15 minutes in length. The recorded message will be treated as an incoming message.

1. Press **Play/Record** to start recording.
2. Press **Cancel** to end the recording.
Record a conversation
In this chapter, you will learn how to use the advanced fax features of your machine.

**Broadcasting**

With Broadcasting you can have your HP Fax send your fax to up to 15 (HP 1040 Fax) or 20 (HP 1050 Fax) fax numbers at once. The documents are automatically erased from memory when Broadcasting is finished.

1. Turn the document face down and feed it into the machine.
2. Press **Menu** repeated until **ADVANCED FAX** displays and press **Start/Enter**.
3. Select **Set Broadcasting** by pressing ← → and press **Start/Enter**.
4. Enter the fax number.
   - You can press **Speed Dial** and enter a speed dial code.
   - **TIP:** One touch buttons do not work in this area, you must use their speed dial code instead.
5. You can enter 15 or 20 (depending on model) fax numbers into one job.
6. Press **Start/Enter** when the correct number appears in the display.
   - If you have more destinations, select **Y** by using ← → and press **Start/Enter** when asked **Another? Y/N** and repeat steps from 4.
   - If you have finished entering all the numbers, answer **N** and press **Start/Enter**.
7. Press **Start/Enter**.

The document will be scanned into memory before transmission.
Delayed fax

You can set your machine to send a fax any time in the next 24 hours. For example, it is usually cheaper to send a fax at night because telephone rates are lower than they are during the day. To cancel a scheduled fax, see To cancel the scheduled job on page 46.

1. Turn the document face down and feed it into the machine.
2. Press Menu repeatedly until ADVANCED FAX appears and press Start/Enter.
3. Select Set Delayed Fax by pressing ← → and press Start/Enter.
4. Enter the fax number.
   • You can press Speed Dial and enter a speed dial code.

TIP: One touch buttons do not work in this area, you must use their speed dial code instead.

• You can enter 15 or 20 (depending on model) fax numbers into one job.
5. Press Start/Enter when the number appears in the display.
   • If you have more destinations, select Y by using ← → and press Start/Enter when asked Another? Y/N and repeat steps from 4.
   • If you have finished entering all the numbers, answer N and press Start/Enter.
6. Enter the name if you want to name the transmission.
   If not, skip this step.
7. Press Start/Enter.
8. Enter the time (in the next 24 hours) for the transmission to start.
9. Press Start/Enter when the time appears correctly in the display.

The document will be scanned into memory before transmission and be sent at the programmed time.
Polling

Polling enables you to set up a document so it can be retrieved at a later time. For example, you can place the document in your machine, and the other party can retrieve it when they are in the office or when their calling rates are lower.

Setting send polling

You can program your fax machine to send a document when it is requested by a remote fax machine.

**NOTE:** Your HP Fax allows you to set one poll job at a time and it can be retrieved once.

1. Turn the document face down and feed it into the machine.
2. Press **Menu** repeatedly until **ADVANCED FAX** appears and press **Start/Enter**.
3. Select **Set Polling Send** by pressing 🔽 ▼ and press **Start/Enter**.
   
   **Poll Code [0000]** will display.
4. Enter the poll code you want to use for this document and press **Start/Enter**.
   
   • The poll code is preset to 0000, which means that the receiver does not need to enter a poll code to receive the document.
   
   • The poll code is not static. You enter a new one for each document.
   
   • The poll code is used to prevent your document from being retrieved by an unauthorized caller.
   
   • Your machine starts scanning the document(s) into memory and shows **polling send** in the display. If the answer mode was TEL, the machine changes it to FAX mode automatically.
   
   • When it is polled, the page in memory will be deleted automatically. To cancel Send Polling, see **To cancel the scheduled job** on page 46.
Polling another fax to receive

You can dial another fax machine that has a document waiting and request it to be sent to your fax machine.

1. Dial the telephone number of the remote machine that is ready to be polled.

   **TIP:** One touch buttons do not work in this area, you must use their speed dial code instead.

2. Press `Menu` when you hear a fax tone from the remote machine.
   The display shows To poll documents press Start/Enter.

3. Press `Start/Enter`.

4. Enter the other fax’s Poll Code to retrieve the document, and press `Start/Enter`.

   **NOTE:** If the other fax machine does not have a poll code, enter 0000.

   The HP Fax receives and prints the polled document.

   **NOTE:** Not all fax machines have polling capability, and polling incompatibility sometimes occurs between fax machines made by different manufacturers.

To cancel the scheduled job

All scheduled jobs remain in memory after they have been set. To make more memory available, cancel unnecessary scheduled jobs.

1. Press `Menu` repeatedly ADVANCED FAX appears and press `Start/Enter`.

2. Select Cancel Schedule by pressing ← → and press `Start/Enter`.

3. Select the scheduled job you want to cancel by pressing ← →.

4. Press `Start/Enter` to cancel the selected schedule.
Forward faxes

While you are away from your home or office, you do not have to miss important faxes. Your machine can forward any faxes it receives to a fax machine at your current location, and if you choose, it can print a copy for you to review when you get back as well.

A Sending Confirm report will print for every fax that is forwarded.

1. Press Menu repeatedly until ADVANCED FAX appears and press Start/Enter.
2. Select Set Fax Forward by pressing ◀ ▶ and press Start/Enter.
3. Use ◀ ▶ to select the option you want and press Start/Enter.
   • Off: disables fax forwarding
   • Forward: forwards a fax to your new location
   • Forward & Print: prints a fax and also forwards it to your new location
4. If you selected Forward or Forward & Print, Tel: will display.
   a. Enter the fax number and press Start/Enter.
      Start Date&Time will display.
   b. Press Start/Enter.
      The current date and time will display.
   c. Enter the start time and press Start/Enter.
      End Date&Time will display.
   d. Press Start/Enter.
   e. Enter the end time and press Start/Enter.
      • The machine returns to Ready mode and FW will appear in the display at the start time and every fax will be forwarded to your new location till the end time.
      • HP 1040: During forwarding time, the answer mode temporarily changes to FX.
      • HP 1050: During forwarding time, the answer mode continues to say FW. The machine will receive and forward faxes and answer and record voice messages.

TIP: HP 1050: This procedure only forwards faxes, if you also want to be notified about voice messages, see “Message paging” on page 41.
Forward faxes
6 Feature reference

This chapter contains instructions for other features of the HP Fax that you may want to use from time to time.

The “arrow buttons” located under the Menu button on the control panel are designated by ← → in the instructions.

Set the date and time

The current date and time are shown in the display when the machine is on and ready for use (Ready mode). The date and time will be printed on all faxes you send.

1. Press Menu.
2. Press ← → to choose SET DATE & TIME and press Start/Enter.
3. Press Start/Enter when the display shows Date Format.
4. Press ← → to select either Europe (day month year) or USA (month day year) and press Start/Enter.
5. Press Start/Enter when the display shows Date & Time.
6. Set the date and time. You can move the cursor by pressing ← →.
7. Press Start/Enter when the date and time are correct.
   1–AM  2–PM will display.
8. Press 1 or 2.

Turn on and off sounds

You can turn on and off the sounds the HP Fax makes.

Alarm sounds

Alarm sounds include the fax tones and beeps.

1. Press Menu repeatedly until SET UP SOUND appears and press Start/Enter.
2. Press ← → to select Alarm Sound and press Start/Enter.
3. Select On or Off and press Start/Enter.
Set the fax header information

This information is required by law in many countries. The fax header prints your name and fax number on the top of every fax you send.

1. Press Menu repeatedly until SET FAX HEADER displays and press Start/Enter.
2. Press to select Fax Number and press Start/Enter.
3. Enter the fax number to which your machine is connected.
   - You can enter up to 20 digits, and include special characters (space, plus sign, etc.). For more information, see Fax header telephone number on page 19.
   - To enter a space, press 1 twice.
   - To enter parentheses ( ), press * multiple times until you see the symbol you want.
   - To enter hyphen –, press #.
   - If you enter a wrong number, use to move to the number and correct it.
4. Press Start/Enter when finished.
5. Press Start/Enter when the display shows Fax Name.
6. Enter the fax name (up to 40 characters) by using the number keypad.
   - You can include special characters (space, plus sign, etc.). For more information, see Enter dates, times, text, and telephone numbers on page 18.
7. Press Start/Enter when the name in the display is correct.
Print reports

Your fax machine can print many reports for your use.

Automatic reports

These reports print automatically.

<table>
<thead>
<tr>
<th>Report name</th>
<th>Content</th>
</tr>
</thead>
<tbody>
<tr>
<td>Multi-Communication</td>
<td>This report prints automatically if you have faxed documents to more than one location by using Broadcasting.</td>
</tr>
<tr>
<td>Power Fail Report</td>
<td>If you have a scheduled job (such as, delayed fax and send poll) and there is a power failure, this report is printed automatically when power is restored.</td>
</tr>
</tbody>
</table>

Reports you can print

You can print these reports whenever you need to. Some of these reports can be set to print automatically also.

2. Choose the report you want by using << >>.
3. Press Start/Enter when the desired report is displayed.
4. The selected report will be printed. The available reports are shown below:

<table>
<thead>
<tr>
<th>Report name</th>
<th>Content</th>
</tr>
</thead>
<tbody>
<tr>
<td>Help List</td>
<td>This report covers the machine’s basic functions and commands. It can also be used as a quick reference guide.</td>
</tr>
<tr>
<td>Sent Journal</td>
<td>These reports show information concerning the transmission and reception activities. They can be printed on command. Or if the machine is set to do so, they will automatically print after every 40 transmissions or receptions. For more information, see Fax Log under the “BASIC FAX menu” on page 13</td>
</tr>
<tr>
<td>Received Journal</td>
<td>These reports show information concerning the transmission and reception activities. They can be printed on command. Or if the machine is set to do so, they will automatically print after every 40 transmissions or receptions. For more information, see Fax Log under the “BASIC FAX menu” on page 13</td>
</tr>
<tr>
<td>Phonebook</td>
<td>This report shows all of the numbers currently stored in the fax machine’s memory as One-Touch Dial and Speed Dial.</td>
</tr>
<tr>
<td>Sending Confirm</td>
<td>This report shows the fax number, the number of pages, elapsed time of the operation, the communication mode, and the communication results. To set up your machine to automatically print, see Sending Confirm under the “BASIC FAX menu” on page 13</td>
</tr>
<tr>
<td>Schedule Inform</td>
<td>This report shows the document currently stored for Delayed FAX and Send Polling along with the fax number, starting time and type of scheduled event.</td>
</tr>
</tbody>
</table>
Reprinting faxes

You may sometimes need to reprint a received fax. Your machine stores the most recently received faxes in memory (approximately 100 pages). As this memory is filled, old faxes that have been printed will be erased to make room for new faxes.

NOTE: HP 1040 Fax: Unplugging the fax machine power cord and plugging it back in again clears the memory including all unprinted or unsent faxes. A power outage also clears the fax machine memory.

NOTE: HP 1050 Fax: The device has 30 minutes of backup memory. If the power is off longer than that, the faxes will be cleared.

2. Press ▼ ▲ to choose Print Fax and press Start/Enter.
   - If there are only old faxes, the machine will automatically print all of them and return to Ready mode without moving to the next step.
   - If there are no faxes in memory, the machine will inform you by displaying Memory Empty.
   - If there are both old faxes and unprinted faxes in memory, the machine will go to step 3.
3. Select between Print New Fax or Reprint Old Fax and press Start/Enter.
   - Print New Fax: The machine prints all new faxes which have never been printed.
   - Reprint Old Fax: The machine prints all faxes regardless of new or old.
Clearing memory

You can selectively clear information stored in your machine’s memory.

1. Press Menu repeatedly until MEMORY CLEAR appears, and press Start/Enter.
   The display shows the type of information you can clear from memory.
2. Select what you want to delete by pressing ← → and press Start/Enter.
3. Select Y and press Start/Enter when the machine asks if you are sure.

The types of information you can clear are:

<table>
<thead>
<tr>
<th>Item</th>
<th>It will</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fax Header</td>
<td>Delete the name and phone number from your fax header information.</td>
</tr>
<tr>
<td>Dial/Schedule</td>
<td>Clear the stored numbers in the phone book. In addition, all the scheduled jobs are also cancelled.</td>
</tr>
<tr>
<td>Fax Log</td>
<td>Clear all records of transmissions and receptions.</td>
</tr>
<tr>
<td>Faxes in Memory</td>
<td>Clears all faxes in memory.</td>
</tr>
</tbody>
</table>

Loudspeaker—HP 1040 Fax

You do not need to pick up the handset to make a phone call. When dialing, just press the Loudspeaker button and enter the numbers. When your party answers, pick up the handset to talk to them. This feature is especially useful for checking voicemail messages.

**NOTE:** Your HP 1040 Fax does not have speakerphone capabilities. The loudspeaker enables you to hear calls but you must speak using the handset.

**TIP:** If you want to share the conversation with somebody beside you, pick up the handset and press Loudspeaker. The line is still connected and everybody can listen to the conversation.

While you are using Loudspeaker, do not place the handset beside the speaker, as this may result in howling.

Speakerphone—HP 1050 Fax

The HP 1050 Fax has full speakerphone capabilities. Press Speakerphone to make and receive calls as well as listening to your answering machine messages.

While you are using Speakerphone, do not place the handset beside the speaker, as this may result in howling.
Redial a number in memory

These steps allow you to dial one of the last 10 numbers called that is in memory.

1. Hold **Redial/Pause** for about two seconds.
2. Press ← → until **Recent Numbers** displays and press **Start/Enter**.
3. Press ← → to find the number you want to dial.
4. Press **Start/Enter** when the correct number appears.

If a document is loaded, the machine automatically begins to send.
This chapter contains information about changing print cartridges, maintaining your HP Fax, the menu settings, error messages, and troubleshooting.

Print cartridge information

The print cartridge life is very sensitive to the content of received faxes or copies you make. To increase its life, we recommend you follow the instructions below:

- Always use the HP 20 (C6614) ink cartridge.

**NOTE:** Your HP Fax was shipped with a starter ink cartridge. Replace it with the HP 20 cartridge.

- DO NOT unpack the cartridge until you are ready to use it.
- Store it in the same environment as the fax machine.
- If you have unpacked the cartridge but are not using it, store it in an airtight plastic bag.
- DO NOT leave it exposed for an extended period.
- DO NOT refill the cartridge. The warranty will not cover damage caused by using refilled cartridges.

View ink level

When using the 28ml print cartridge, your machine allows you to check the amount of ink remaining. To view the current ink level:

1. Press **Menu** repeatedly until **TOOLS** appears and press **Start/Enter**.
2. Scroll to **View Ink Level** by pressing ⬅ ⬆ and press **Start/Enter**.

The machine displays a fractional number. For examples, 1/8 means that ink is low and you need to replace the cartridge. 8/8 means that a new cartridge is installed.
Print the self test

When you want to test if the machine is working correctly, you can check it by printing the self test.

1. Press Menu repeatedly until TOOLS appears and press Start/Enter.
2. Scroll to Self Test by pressing ▼ ▶ and press Start/Enter.

The machine runs self test and prints a report which shows the current status of the machine.

Replace the print cartridge

When you notice that the print becomes light or ink low or when install new ink cartridge appears in the display, replace the print cartridge. The part number for replacement cartridges is HP 20.

1. Take out a cartridge from its packaging and carefully remove the tape covering the printhead.
   Hold the cartridge by the colored top or black areas only. Do not touch the copper area.

2. Press the Access Cartridge button on the control panel.

The cartridge carrier moves to the install position.
3. Open the control panel and cartridge compartment cover (it will click and remain open).

4. Pull the cartridge toward you and remove it.

3. To load the cartridge insert the cartridge as shown below. When the cartridge is pushed to the back of the cartridge carrier, push the top of the cartridge until it clicks into place.

   If the cartridge moves loosely in the carrier, it has not clicked into place. Repeat this step.

5. Close the cartridge compartment cover and control panel.
Clear jammed documents and paper

Document jams during transmission

If a document jams during transmission or copying, Remove jammed document appears in the display. DO NOT pull the document out of the slot. Doing so could harm your machine.

To clear document jam:
1. Open the control panel.
2. Carefully remove the jammed document.
3. Close the control panel firmly until it clicks into place.

Paper jams during printing

If the fax paper jams while you are receiving or printing, Remove jammed paper and press Cancel appears in the message.

If the paper is jammed in the printing area
1. Remove the jammed paper by pulling it out smoothly in the direction of the arrow as shown.
   If the paper tears when it is being removed check to ensure that no small pieces have been left inside the machine.
2. Press Cancel.
3. If this was a fax, reprint the fax. For more information, see Reprinting faxes on page 52.
If the paper is jammed in the paper feed area
1. Remove the jammed paper as shown.
   If the paper tears when it is being removed check to ensure that no small pieces have been left inside the machine.
2. Reload new paper with the print side facing toward you.
3. Press Cancel when finished.
4. If this was a fax, reprint the fax. For more information, see Reprinting faxes on page 52.

Maintain the print cartridge

To maintain good printing quality, we recommend you occasionally maintain the print cartridge and its associated parts:

Clean the print cartridge nozzles
If characters are not printing completely or white streaks appear in your text, you may have clogged nozzles. Clean the print cartridge as described below:

1. Press Menu repeatedly until TOOLS appears and press Start/Enter.
2. Scroll to Clean Cartridge by pressing and press Start/Enter.
3. Examine the printed test pattern.
   • If print quality does not improve, reinstall the cartridge and repeat these steps.
   • If the line is still broken, wipe the nozzles and contacts. For more information, see Wipe the print nozzles and contacts on page 59.

Wipe the print nozzles and contacts
If cleaning the print cartridge nozzles as discussed above does not help and you are certain the cartridge has plenty of ink, the problem may be caused by dried ink on the print cartridge nozzles and contacts or the print cartridge carrier contacts. Follow these two sets of instructions for manual cleaning.

Clean the nozzles
1. Press Access Cartridge.
2. Open the control panel and cartridge compartment cover and remove the cartridge. See Replace the print cartridge on page 56.
3. Gently blot and wipe the contacts and nozzles dry.
   • Use a clean cloth dampened with water to gently clean the entire copper-colored area, including the nozzles and contacts.
   • To dissolve any dried ink, hold the damp cloth against the nozzles for about three seconds.
4. Reinstall the cartridge and close the cover and panel.

If you spend a long time cleaning the cartridge, the cartridge carrier may have moved back to the original position. If so, press **Access Cartridge** again to move the carrier to the install position.

5. Press **Start/Enter**.

6. Press 1 for new cartridge or 2 for the old one.

### Clean the cartridge carrier contacts

Before cleaning these parts, there should be no scheduled job such as delayed fax, send polling, or faxes received into memory.

---

**CAUTION:** Once you have unplugged the power cord from the machine, all data in memory will be lost.

---

1. Press **Access Cartridge**.

2. Open the control panel and cartridge compartment cover and remove the cartridge. See **Replace the print cartridge** on page 56.

3. Remove the print cartridge.

4. Unplug the power cord from the electrical outlet of the rear of the machine.

---

**WARNING!** **Shock Hazard.** Be sure to unplug the power cord before proceeding.

---

5. Clean the cartridge carrier contacts with clean and cotton swab.

6. Plug in the power cord and reinstall the cartridge.
Clean the document scanner area

To keep your machine working properly, occasionally clean the white roller, document feeder rubber piece, and the scanning glass. If they are dirty, documents sent to another fax machine will not be clear.

**CAUTION:** When you turn the power off to clean the scanner, documents stored in memory will be lost.

1. Open the control panel.
2. Remove the white roller.
   a. At the right-hand end of the white roller there is a bushing that is secured with a small tab.
   b. Push the tab slightly inward, then rotate towards you. Then pull up the right-hand end of the roller to remove it.
3. Wipe the white roller surface and the driver roller surface with a soft cloth dampened with water.

1. White roller
2. Drive roller
3. White roller latch
4. Clean the document feeder rubber piece at the back of the control panel.

5. Carefully wipe the scanning glass with a soft, dry, lint free cloth.
   - If the glass is very dirty, first wipe it with a slightly dampened cloth, then with a dry one.
   - Be careful not to scratch the glass surface.

6. Replace the roller in reverse order, and then close the control panel firmly until it clicks into place.
Adjust the scanner

The scanner is adjusted at the factory. If, however, you drop your machine while moving it, we recommend you adjust scanner.

1. Press **Menu** repeatedly until **TOOLS** appears and press **Start/Enter**.
2. Scroll to **Adjust Scanner** by pressing ← → and press **Start/Enter**.
3. Load a plain WHITE sheet of paper (no writing or graphics) into the document feeder and press **Start/Enter**.
   - The machine starts to scan the document to adjust the scanner.
   - Printing quality may be unexpectedly worse if you do not use a plain WHITE paper for the adjustment.

LCD error messages

These are the error message that may display along with solutions for you.

Troubleshooting

Your problem may be listed in “LCD error messages” on page 63. The chart below shows other problems you can solve yourself. For problems you cannot resolve here, see Use Hewlett-Packard support services on page 79.

Fax problems

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The machine is not working, there is no display, and the buttons are not working.</td>
<td>Unplug the power cord and plug it in again. Check that your socket is live.</td>
</tr>
<tr>
<td>No dial tone.</td>
<td>Check that the phone line is connected properly to the port in the bottom of the fax. Unplug and replug it. Make sure it clicks. Check the phone socket in the wall by plugging in another phone.</td>
</tr>
<tr>
<td>Someone calls and gets a busy signal even though the fax is not busy.</td>
<td>This may rarely occur if the answer mode is set to AUTO, a voice call comes in and is hung up without being answered, and another call is immediately received. In AUTO mode the machine goes back to fax receive mode if the voice call is not answered. The line will appear busy until the machine resets.</td>
</tr>
<tr>
<td>The numbers stored in memory do not dial correctly.</td>
<td>Make sure the numbers are programmed correctly. To print a Phone book list, see Print reports on page 51.</td>
</tr>
<tr>
<td>The document does not feed into the machine.</td>
<td>Be sure the document is not wrinkled, and you are putting it in correctly. Check that the document is the right size and not too thick or too thin. See Document types and sizes on page 71.</td>
</tr>
<tr>
<td>You cannot receive faxes automatically.</td>
<td>Check if TEL appears on the right side of the display. In TEL mode, you cannot receive a fax automatically. Be sure the handset is seated on the cradle properly. If the ink is low, the fax will stop printing faxes. Replace the print cartridge. If the fax memory is full, the fax will stop answering the phone. Load paper and print the faxes in memory to clear out the memory.</td>
</tr>
<tr>
<td>The machine cannot receive faxes manually.</td>
<td>Do not hang up the handset before pressing Start/Enter to receive a fax.</td>
</tr>
<tr>
<td>The machine does not send anything.</td>
<td>Check that the document is loaded face down. Send should appear in the display after it dials. Check if the machine to which you are sending can receive your fax.</td>
</tr>
<tr>
<td>You cannot poll another machine.</td>
<td>The fax machine you are polling may be using a poll code (password).</td>
</tr>
<tr>
<td>The fax you received has blank bits on it.</td>
<td>The machine sending to you may be faulty. A noisy phone line can cause line errors. Check your machine by making a copy.</td>
</tr>

## Digital Message Center problems

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Paging message repeats</td>
<td>This is normal. The message repeats to give you time to enter the access code to retrieve your message.</td>
</tr>
<tr>
<td>Attempts to receive fax even when message center is turned off.</td>
<td>This is normal. The fax machine will attempt to receive a fax after several rings.</td>
</tr>
<tr>
<td>Does not record my messages.</td>
<td>The memory is full. Erase some messages to free up memory for more.</td>
</tr>
<tr>
<td>Paging message overrides phone calls when I happen to be home.</td>
<td>You should only turn paging on when you are not going to answer the phone. There is a delay between recording the message and the paging message going out. If you happen to answer an incoming call when the paging message is dialing out, it will override your incoming call.</td>
</tr>
</tbody>
</table>
8 Specifications and regulatory information

This chapter contains product and supplies specifications, ordering information, and regulatory statements.

Paper types and sizes

The HP Fax is designed to work optimally with plain cotton bond paper.

The following paper sizes and weight can be used with your machine:

<table>
<thead>
<tr>
<th>Paper size</th>
<th>Dimensions</th>
<th>Paper weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>A4</td>
<td>210mm x 297mm (8.3in x 11.7in)</td>
<td>75 – 90g/m²</td>
</tr>
<tr>
<td>Letter</td>
<td>216mm x 279mm (8.5in x 11.0in)</td>
<td>20 – 24lbs</td>
</tr>
<tr>
<td>Legal</td>
<td>216mm x 356mm (8.5in x 14.0in)</td>
<td></td>
</tr>
</tbody>
</table>

Document types and sizes

You can insert a document that is up to 10 pages long in the document feeder.

Acceptable documents

<table>
<thead>
<tr>
<th>Document size</th>
<th>Single sheet</th>
<th>2 or more sheets</th>
</tr>
</thead>
<tbody>
<tr>
<td>Max</td>
<td>216mm (W) x 356mm (L)(^a)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>8.5in (W) x 14in (L)</td>
<td></td>
</tr>
<tr>
<td>Min.</td>
<td>148mm (W) x 128mm (L)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>5.8in (W) x 5in (L)</td>
<td></td>
</tr>
<tr>
<td>Effective scanning width</td>
<td>210mm</td>
<td>8.27in</td>
</tr>
<tr>
<td>Number of sheets which can be loaded at a time</td>
<td>–</td>
<td>Up to 10</td>
</tr>
<tr>
<td>Thickness of document</td>
<td>0.07mm – 0.15mm</td>
<td>0.075mm – 0.12mm</td>
</tr>
<tr>
<td></td>
<td>0.018in – 0.038in</td>
<td>0.019in – 0.03in</td>
</tr>
<tr>
<td>Paper quality</td>
<td>Uncoated on both sides</td>
<td></td>
</tr>
</tbody>
</table>

\(^a\)When sending a document that is longer than A4 (297 mm/11.69 in.), you must immediately take out each sheet as soon as it has been scanned. Otherwise, the document may jam.
The HP Fax uses the following print cartridge.

Dr. P.N. Cundall
Mining Surveys Ltd.,
Holroyd Road,
Reading,
Berks.

Dear Pete,

Permit me to introduce you to the facility of facsimile transmission.

In facsimile a photocell is caused to perform a raster scan over the subject copy. The variations of print density on the document cause the photocell to generate an analogous electrical video signal. The signal is used to modulate a carrier, which is transmitted to a remote destination over a radio or cable communications line.

At the remote terminal, demodulation reconstructs the video signal, which is use dot modulate the density of print produced by a printing device. This device is scanning in a raster scan synchronised with that at the transmitting terminal. As a result, a facsimile copy of the subject document is produced.

Probably you have uses for this facility in your organisation.

Yours Sincerely,

Phil

P.J. CROSS
Group Leader - Facsimile Research
Environmental product stewardship program

Protecting the environment
Hewlett-Packard Company is committed to providing quality products in an environmentally sound manner. This product has been designed with several attributes to minimize impacts on our environment. For more information, visit HP Commitment to the Environment website at:

http://www.hp.com/go/environment

Ozone production
This product generates no appreciable ozone gas (O₃)

Energy consumption
Energy usage drops significantly while in ENERGY STAR® mode, which saves natural resources, and saves money without affecting the high performance of this product. This product qualifies for ENERGY STAR, which is a voluntary program established to encourage the development of energy-efficient office products.

ENERGY STAR is a U.S. registered service mark of the U.S. EPA. As an ENERGY STAR partner, HP has determined that this product meets ENERGY STAR guidelines for energy efficiency. For more information on ENERGY STAR guidelines, go to the following website:

http://www.energystar.gov

Paper use
This product is suited for the use of recycled paper according to DIN 19309.

Plastics
Plastic parts over 25 grams are marked according to international standards that enhance the ability to identify plastics for recycling purposes at the end of the product’s life.

Material safety data sheets
Material Safety Data Sheets (MSDS) can be obtained from the HP web site at:

Customers without Internet access should contact their local HP Customer Care Center.

Recycling program
HP offers an increasing number of product return and recycling programs in many countries, as well as partnering with some of the largest electronic recycling centers throughout the world. HP also conserves resources by refurbishing and reselling some of its most popular products.

This HP product contains the following materials that may require special handling at end-of-life:

• Mercury in the fluorescent lamp in the scanner (<2 mg)
• Lead in the solder
• A lithium battery

This product contains a small Lithium battery that must be removed and disposed of properly at the end of the product’s useful life. The battery is located on the main circuit board.

– Battery Part Number: Panasonic CR2032
– Battery Material: Lithium
– Battery Type: Button/Coin Cell Battery
– Quantity Per Product: 1
– Weight: approximately 3 grams
– Lithium Type: Solid
– Battery Manufacturer: Panasonic of Japan
Regulatory notices

The HP Fax meetings product requirements from regulatory agencies in your country/region.

Regulatory model identification number

For regulatory identification purposes, your product is assigned a Regulatory Model Number. The Regulatory Model Number for your product is SDGOB0403-01 or SDGOB0403-02. This regulatory number should not be confused with the marketing name (HP 1040/1050 Fax series) or product number (Q7200 series).

Notice to users of the U.S. telephone network: FCC requirements

This equipment complies with FCC rules, Part 68. On this equipment is a label that contains, among other information, the FCC Registration Number and Ringer Equivalent Number (REN) for this equipment. If requested, provide this information to your telephone company.

An FCC compliant telephone cord and modular plug is provided with this equipment. This equipment is designed to be connected to the telephone network or premises wiring using a compatible modular jack which is Part 68 compliant. This equipment connects to the telephone network through the following standard network interface jack: USOC RJ-11C.

The REN is useful to determine the quantity of devices you may connect to your telephone line and still have all of those devices ring when your number is called. Too many devices on one line may result in failure to ring in response to an incoming call. In most, but not all, areas the sum of the RENs of all devices should not exceed five (5). To be certain of the number of devices you may connect to your line, as determined by the REN, you should call your local telephone company to determine the maximum REN for your calling area.

If this equipment causes harm to the telephone network, your telephone company may discontinue your service temporarily. If possible, they will notify you in advance. If advance notice is not practical, you will be notified as soon as possible. You will also be advised of your right to file a complaint with the FCC. Your telephone company may make changes in its facilities, equipment, operations, or procedures that could affect the proper operation of your equipment. If they do, you will be given advance notice so you will have the opportunity to maintain uninterrupted service.

If you experience trouble with this equipment, please contact the manufacturer, or look elsewhere in this manual, for warranty or repair information. Your telephone company may ask you to disconnect this equipment from the network until the problem has been corrected or until you are sure that the equipment is not malfunctioning.

This equipment may not be used on coin service provided by the telephone company. Connection to party lines is subject to state tariffs. Contact your state’s public utility commission, public service commission, or corporation commission for more information.

This equipment includes automatic dialing capability. When programming and/or making test calls to emergency numbers:

• Remain on the line and explain to the dispatcher the reason for the call.
• Perform such activities in the off-peak hours, such as early morning or late evening.

Note: This equipment is hearing aid compatible.

The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device, including fax machines, to send any message unless such message clearly contains in a margin at the top or bottom of each transmitted page or on the first page of transmission, the date and time it is sent and an identification of the business, other entity, or other individual sending the message and the telephone number of the sending machine or such business, other entity, or individual. (The telephone number provided may not be a 900 number or any other number for which charges exceed local or long-distance transmission charges.) In order to program this information into your fax machine, you should complete the steps described in the software.

FCC statement

The United States Federal Communications Commission (in 47 CFR 15.105) has specified that the following notice be brought to the attention of users of this product.

Declaration of Conformity: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Class B limits are designed to provide reasonable protection...
against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

For more information contact the Product Regulations Manager, Hewlett-Packard Company, San Diego, 858-655-4100.

The user may find the following booklet prepared by the Federal Communications Commission helpful: How to Identify and Resolve Radio-TV Interference Problems. This booklet is available from the U.S. Government Printing Office, Washington DC, 20402. Stock No. 004-000-00345-4.

**CAUTION** Pursuant to Part 15.21 of the FCC Rules, any changes or modifications to this equipment not expressly approved by the Hewlett-Packard Company, may cause harmful interference and void the FCC authorization to operate this equipment.

**note à l’attention des utilisateurs du réseau téléphonique Canadien/notice to users of the Canadian telephone network**

Cet appareil est conforme aux spécifications techniques des équipements terminaux d’Industrie Canada. Le numéro d’enregistrement atteste de la conformité de l’appareil. L’abréviation IC qui précède le numéro d’enregistrement indique que l’enregistrement a été effectué dans le cadre d’une Déclaration de conformité stipulant que les spécifications techniques d’Industrie Canada ont été respectées. Néanmoins, cette abréviation ne signifie en aucun cas que l’appareil a été validé par Industrie Canada.

Pour leur propre sécurité, les utilisateurs doivent s’assurer que les prises électriques reliées à la terre de la source d’alimentation, des lignes téléphoniques et du circuit métallique d’alimentation en eau sont, le cas échéant, branchées les unes aux autres. Cette précaution est particulièrement importante dans les zones rurales.

Le numéro REN (Ringer Equivalence Number) attribué à chaque appareil terminal fournit une indication sur le nombre maximal de terminaux qui peuvent être connectés à une interface téléphonique. La terminaison d’une interface peut se composer de n’importe quelle combinaison d’appareils, à condition que le total des numéros REN ne dépasse pas 5.

Basé sur les résultats de tests FCC Partie 68, le numéro REN de ce produit est 0.5B.

This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation IC before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

Users should ensure for their own protection that the electrical ground connections of the power utility, telephone lines and internal metallic water pipe system, if present, are connected together. This precaution may be particularly important in rural areas.

The Ringer Equivalence Number (REN) assigned to each terminal device provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed 5.

The REN for this product is 0.5B, based on FCC Part 68 test results.

**note à l’attention des utilisateurs Canadiens/notice to users in Canada**

Le présent appareil numérique n’émet pas de bruit radioélectrique dépassant les limites applicables aux appareils numériques de la classe B prescrites dans le Règlement sur le brouillage radioélectrique édicté par le ministère des Communications du Canada.

This digital apparatus does not exceed the Class B limits for radio noise emissions from the digital apparatus set out in the Radio Interference Regulations of the Canadian Department of Communications.
For non-European customers

This product is approved for use only in the country in which it was purchased. Local country laws may prohibit the use of this product outside the country of purchase. It is strictly forbidden by law in virtually every country to connect nonapproved telecommunications equipment (fax machines) to public telephone networks.

Declaration of conformity

DECLARATION OF CONFORMITY
according to ISO/IEC Guide 22 and EN 45014

Manufacturer's Name: Hewlett-Packard Company
Manufacturer's Address: 16399 West Bernardo Drive
San Diego CA 92127, USA
declares, that the product
Regulatory Model Number: SDGOB-0403-01, -02
Product Name: HP Fax 1040 (Q7270A) Series (-01)
HP Fax 1050 (Q7278A) Series (-02)
Model Number(s): (-01) Q7270A, Q7271A, Q7272A, Q7273A, Q7274A
(-02) Q7278A, Q7279A, Q7280A, and Q7281A

conforms to the following Product Specifications:

NOM-019-SCFI: 1998
EMC: FCC Part 15 - Class B
ICES-003, Issue 2
Telecom: NOM-151-SCT1-1999

Supplementary Information:

1) This product was tested in a typical configuration.

Use Hewlett-Packard support services

www.hp.com/support

If you are unable to find the answer you need in the printed documentation supplied with your product or on the web, you can contact one of the HP support services listed in the following pages. If a support service number is not listed for your country, contact your nearest authorized HP dealer for help.

Before calling customer support

1 Make sure that
   • Your unit is plugged in and turned on.
   • The correct print cartridge is installed properly.
   • The recommended paper is loaded in the input tray.

2 Reset your unit by unplugging it and plugging it in again.

3 If you need to speak to an HP Customer Support Representative:
   • Have your serial number ready.
   • Print a Self-Test Report.
   • Be prepared to discuss your problem in detail.

4 Be near your unit when you call.

Prepare your unit for shipment

If you are requested to send in your unit for service, do the following:

• Remove the print cartridge and place it in an airtight bag so it will not dry out. Do not send the print cartridge with the unit unless asked to do so.

• If you do not have the original packing material, you can request a replacement package set from HP Customer Support. Shipping damage caused by improper packaging is not covered under the warranty.

• Include these items in the box:
   • A brief description of the symptoms (sample prints are helpful).
   • A copy of your sales slip or proof of purchase (to establish the warranty period)
   • Your name, address, and telephone number where you can be reached during the day.

Extent of limited warranty

Hewlett-Packard ("HP") warrants to the end-user customer that the HP products specified above will be free from defects in material and workmanship for the duration specified above, which begins on the date of purchase by the customer.

For each software product, HP's limited warranty applies only to a failure to execute programming instructions. HP does not warrant that the operation of any product shall be uninterrupted or error free.

HP's limited warranty covers only those defects which arise as a result of normal use of the product, and does not cover any other problems, including those which arise as a result of (a) Improper maintenance or modification, (b) Software, accessories, media, or supplies not provided or supported by HP, (c) Operation outside the product's specifications, or (d) Unauthorized modification or misuse.

For HP printing products, the use of a non-HP ink cartridge or a refilled ink cartridge does not affect either the warranty to the customer or any HP support contract with the customer. However, if product failure or damage is attributable to the use of a non-HP or refilled ink cartridge, HP will charge its standard labor and materials charges to service the product for the failure or damage.

If HP receives, during the applicable warranty period, notice of a defect in any product, HP shall either repair or replace the defective Product, at HP's option.

If HP is unable to repair or replace, as applicable, a defective product which is covered by HP's warranty, HP shall, within a reasonable time after being notified of the defect, refund the purchase price for the Product. HP shall have no obligation to repair, replace, or refund until the customer returns the defective product to HP.

Any replacement product may be either new or like-new, provided that it has functionality at least equal to that of the Product being replaced.

HP products may contain remanufactured parts, components, or materials equivalent to new in performance.

HP’s Limited Warranty Statement is valid in any country/region where the covered HP product is distributed by HP. Contracts for additional warranty services, such as on-site service, may be available from any authorized HP service facility in countries where the product is distributed by HP or by an authorized importer.

Limitations of warranty

TO THE EXTENT ALLOWED BY LOCAL LAW, NEITHER HP NOR ITS THIRD PARTY SUPPLIERS MAKE ANY OTHER WARRANTY OR CONDITION OF ANY KIND, WHETHER EXPRESS OR IMPLIED WARRANTIES OF MERCHANTABILITY, SATISFACTORY QUALITY, AND FITNESS FOR A PARTICULAR PURPOSE.

Limitation of liability

TO THE EXTENT ALLOWED BY LOCAL LAW, EXCEPT FOR THE OBLIGATIONS SPECIFICALLY SET FORTH IN THIS WARRANTY STATEMENT, IN NO EVENT SHALL HP OR ITS THIRD PARTY SUPPLIERS BE LIABLE FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER BASED ON CONTRACT, TORT, OR ANY OTHER LEGAL THEORY AND WHETHER ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Local law

Specifications and regulatory information  80
This Warranty Statement gives the customer specific legal rights. The customer may also have other rights which vary from state to state in the United States, from province to province in Canada, and from country to country elsewhere in the world.

To the extent this Warranty Statement is inconsistent with local law, this Warranty Statement shall be deemed modified to be consistent with such local law. Under such local law, certain disclaimers and limitations of this Statement may not apply to the customer. For example, some states in the United States, as well as some governments outside the United States (including provinces in Canada), may:

- Preclude the disclaimers and limitations in this Warranty Statement from limiting the statutory rights of a consumer (e.g. the United Kingdom);
- Otherwise restrict the ability of a manufacturer to enforce such disclaimers or limitations; or
- Grant the Customer additional warranty rights, specify the duration of implied warranties which the manufacturer cannot disclaim, or not allow limitations on the duration of implied warranties.

Complete the following information. It is necessary for contacts with the selling dealer or Hewlett-Packard Company:
