**NOTE:** If you are using the product with a Windows 2000 computer, some features may not be available. For more information, see Notice to Windows 2000 users.
The HP Deskjet F2200 All-in-One series is a versatile device that enables easy-to-use copying, scanning, and printing.

**Copy**

The HP All-in-One allows you to produce high-quality color and black-and-white copies on a variety of paper types. You can enlarge or reduce the size of an original to fit a specific paper size, adjust the copy quality, and make high-quality copies of photos.

**Scan**

Scanning is the process of converting text and pictures into an electronic format for your computer. You can scan almost anything (photos, magazine articles, and text documents) on the HP All-in-One.

**Print from your computer**

The HP All-in-One can be used with any software application that allows printing. You can print a range of projects, such as borderless images, newsletters, greeting cards, iron-on transfers, and posters.

</tbody>
</table>

The **On, Paper, and Check Print Cartridge** lights are blinking.

Scanner failure. For more information, see [Scan fails](#).

Turn off the HP All-in-One, then turn it on again. If the problem persists, contact HP Support.

---

**NOTE:** HP All-in-One will still operate as a printer.

All lights are blinking.

The HP All-in-One has a fatal error.

1. Turn the HP All-in-One off.
2. Unplug the power cord.
3. Wait a minute, then plug the power cord back in.
4. Turn the HP All-in-One back on.

If the problem persists, contact HP Support.

---

**Use the HP Photosmart software**

The HP Photosmart Software provides a fast and easy way to make prints of your photos. It also provides access to other basic HP imaging software features, such as saving and viewing your photos.

For more information on using the HP Photosmart Software:

- Check the **Contents** panel on the left. Look for the [HP Photosmart Software Help contents](#) book at the top.
- If you do not see the [HP Photosmart Software Help contents](#) book at the top of the **Contents** panel, access the software help through the HP Solution Center.

---

**NOTE:** The HP Photosmart software supports the following file formats: BMP, DCX, FPX, GIF, JPG, PCD, PCX, TIF, PICT, PSD, PCS, EPS, TGA, SGI, PDF, and PNG
3 Find more information

</tr>
<tr>
<td>Printer sharing</td>
<td>Up to five. The host computer must be on at all times in order to print from the other computers.</td>
<td>All features resident on the host computer are supported. Only printing is supported from the other computers.</td>
<td>Follow the instructions in Use printer sharing.</td>
</tr>
</tbody>
</table>

## Use printer sharing

If your computer is on a network, and another computer on the network has an HP All-in-One connected to it by a USB cable, you can print to that printer using printer sharing. The computer directly connected to the HP All-in-One acts as the **host** for the printer and has full software functionality. The other computer, which is referred to as a **client**, has access only to the print features. You must perform other functions from the host computer or from the control panel on the HP All-in-One.

**To enable printer sharing on a Windows computer**

▲ Refer to the user guide that came with your computer or see the Windows onscreen Help.
6 Load originals and load paper

You can load many different types and sizes of paper in the HP All-in-One, including letter or A4 paper, photo paper, transparencies, and envelopes.

This section contains the following topics:

- Load originals
- Choose papers for printing and copying
- Load paper

Load originals

You can copy or scan up to letter- or A4-size originals by loading them on the glass.

To load an original on the glass

1. Lift the lid on the HP All-in-One.
2. Place your original with the side you want to copy or scan face down on the left front corner of the glass.

⚠️ TIP: For more help on loading an original, refer to the engraved guides along the edge of the glass.

⚠️ TIP: To get the correct copy size, make sure that there is no tape or other foreign object on the glass.

3. Close the lid.

Choose papers for printing and copying

You can use different types and sizes of paper in the HP All-in-One. Review the following recommendations to get the best printing and copying quality. Whenever you change paper types, remember to change the paper type settings. For more information, see Set the paper type for printing.
This section contains the following topics:

- Recommended papers for printing and copying
- Recommended papers for printing only
- Papers to avoid

**Recommended papers for printing and copying**

If you want the best print quality, HP recommends using HP papers that are specifically designed for the type of project you are printing. If you are printing photos, for example, load HP Premium or HP Premium Plus photo paper in the input tray.

The following is a list of HP papers you can use for copying and printing. Depending on your country/region, some of these papers might not be available.

**NOTE:** To achieve a borderless print, you must use 10 x 15 cm (4 x 6 inch) paper with tab. The HP All-in-One prints to the edge of three sides of the paper. When you remove the tab from the fourth side, you have a borderless print.

**HP Premium Plus Photo Paper**

HP Premium Plus Photo Papers are the best HP photo papers, with image quality and fade resistance superior to store-processed photos. They are ideal for printing your high-resolution images for framing or including in a photo album. These papers are available in several sizes, including 10 x 15 cm (4 x 6 inch) (with or without tabs), A4, and 8.5 x 11 inch sizes for printing or copying photos from the product.

**HP Premium Photo Paper**

HP Premium Photo Papers are high-quality, glossy-finish or soft gloss-finish photo papers. They look and feel like store-processed photos and can be mounted under glass or in an album. These papers are available in several sizes, including 10 x 15 cm (4 x 6 inch) (with or without tabs), A4, and 8.5 x 11 inch sizes for printing or copying photos from the product.

**HP Premium Inkjet Transparency Film**

HP Premium Inkjet Transparency Film make your color presentations vivid and even more impressive. This film is easy to use and handle and dries quickly without smudging.

**HP Premium Inkjet Paper**

HP Premium Inkjet Paper is the ultimate coated paper for high-resolution usage. A smooth, matte finish makes it ideal for your highest-quality documents.

**HP Bright White Inkjet Paper**

HP Bright White Inkjet Paper delivers high-contrast colors and sharp text. It is opaque enough for two-sided color usage with no show-through, which makes it ideal for newsletters, reports, and flyers.
HP All-in-One Paper or HP Printing Paper

- HP All-in-One Paper is specifically designed for HP All-in-One products. It has an extra bright blue-white shade that produces sharper text and richer colors than ordinary multifunction papers.
- HP Printing Paper is a high-quality multifunction paper. It produces documents that look and feel more substantial than documents printed on standard multipurpose or copy paper.

To order HP papers and other supplies, go to www.hp.com/buy/supplies. If prompted, choose your country/region, follow the prompts to select your product, and then click one of the shopping links on the page.

NOTE: At this time, some portions of the HP Web site are available in English only.

Recommended papers for printing only

Certain papers are supported only when you start the print job from your computer. The following list provides information about these papers.

If you want the best print quality, HP recommends using HP papers. Using paper that is too thin or too thick, paper that has a slick texture, or paper that stretches easily can cause paper jams. Using paper that has a heavy texture or does not accept ink can cause printed images to smear, bleed, or not fill in completely.

Depending on your country/region, some of these papers might not be available.

HP Iron-On Transfers
HP Iron-On Transfers (for color fabrics or for light or white fabrics) are the ideal solution for creating custom T-shirts from your digital photos.

HP Brochure & Flyer Paper
HP Brochure & Flyer Paper (Gloss or Matte) is glossy-coated or matte-coated on both sides for two-sided use. They are the perfect choice for near-photographic reproductions and business graphics for report covers, special presentations, brochures, mailers, and calendars.

HP Premium Presentation Paper
HP Premium Presentation Paper gives your presentation a quality look and feel.

To order HP papers and other supplies, go to www.hp.com/buy/supplies. If prompted, choose your country/region, follow the prompts to select your product, and then click one of the shopping links on the page.

NOTE: At this time, some portions of the HP Web site are available in English only.

Papers to avoid

Using paper that is too thin or too thick, paper that has a slick texture, or paper that stretches easily can cause paper jams. Using paper that has a heavy texture or does not accept ink can cause printed images to smear, bleed, or not fill in completely.
NOTE: For a complete list of supported media sizes, see the printer software.

Papers to avoid for all print and copy jobs

- Any size paper other than those listed in the printer software.
- Paper with cutouts or perforations (unless specifically designed for use with HP inkjet devices).
- Highly textured stock, such as linen. It might not print evenly, and the ink can bleed into these papers.
- Extremely smooth, shiny, or coated papers not specifically designed for the HP All-in-One. They can jam the HP All-in-One or repel the ink.
- Multi-part forms, such as duplicate and triplicate forms. They can wrinkle or get stuck, and the ink is more likely to smear.
- Envelopes with clasps or windows. They can get stuck in the rollers and cause paper jams.
- Banner paper.

Additional papers to avoid when copying

- Envelopes.
- Transparency film other than HP Premium Inkjet Transparency Film or HP Premium Plus Inkjet Transparency Film.
- Iron-On Transfers.
- Greeting card paper.

Load paper

This section describes the procedure for loading different types and sizes of paper into the HP All-in-One for your copies or printouts.

TIP: To help prevent rips, wrinkles, and curled or bent edges, store all paper flat in a resealable bag. If the paper is not stored properly, extreme changes in temperature and humidity might result in curled paper that does not work well in the HP All-in-One.

This section contains the following topics:

- Load full-size paper
- Load 10 x 15 cm (4 x 6 inch) photo paper
- Load index cards
- Load envelopes
- Load other types of paper

Load full-size paper

You can load many types of letter or A4 paper into the input tray of the HP All-in-One.
To load full-size paper

1. Flip the tray extender up toward you.

![Image of printer with tray extender open]

**NOTE:** When you use legal-size paper, leave the tray extender closed.

2. Slide the paper-width guide to its outermost position.

![Image of printer with paper-width guide extended]

3. Tap a stack of paper on a flat surface to align the edges, and then check the paper for the following:
   - Make sure it is free of rips, dust, wrinkles, and curved or bent edges.
   - Make sure all the paper in the stack are the same size and type.
4. Insert the stack of paper into the input tray with the short edge forward. Ensure that the side you want to print on faces down. Slide the stack of paper toward the product until it stops.

⚠️ CAUTION: Make sure that the product is idle and silent when you load paper into the input tray. If the product is servicing the print cartridges or otherwise engaged in a task, you could push the paper too far forward, causing the product to eject blank pages.

💡 TIP: If you are using letterhead, insert the top of the page first with the side you want to print on facing down. For more help on loading full-size paper and letterhead, refer to the diagram engraved in the base of the input tray.

5. Slide the paper-width guide inward until it stops at the edge of the paper. Do not overload the input tray; make sure the stack of paper fits within the input tray and is no higher than the top of the paper-width guide.

Load 10 x 15 cm (4 x 6 inch) photo paper

You can load 10 x 15 cm (4 x 6 inch) photo paper into the input tray of the HP All-in-One. For the best results, use 10 x 15 cm (4 x 6 inch) HP Premium Plus Photo Paper or HP Premium Photo Paper with tab.

NOTE: For borderless printing, the HP All-in-One only supports 10 x 15 cm (4 x 6 inch) photo paper with a tear-off tab. You can automatically adjust the settings in the Properties dialog box to print a borderless 10 x 15 cm (4 x 6 inch) photo on HP Premium Plus Photo Paper. Click the Printing Shortcuts tab, and then, in the Printing Shortcuts list, select Photo printing-borderless.
TIP: To help prevent rips, wrinkles, and curled or bent edges, store all paper flat in a resealable bag. If the paper is not stored properly, extreme changes in temperature and humidity might result in curled paper that does not work well in the HP All-in-One.

To load photo paper in the input tray
1. Remove all paper from the input tray.
2. Insert the stack of photo paper into the far-right side of the input tray with the print side or glossy side down and short edge forward. Slide the stack of photo paper toward the product until it stops.
   If you are using photo paper that has a tear-off tab, verify that the tab is pointing away from the product.
   TIP: For more help on loading small-size photo paper, refer to the guides engraved in the base of the input tray for loading photo paper.
3. Slide the paper-width guide inward until it stops at the edge of the paper.
   Do not overload the input tray; make sure the stack of paper fits within the input tray and is no higher than the top of the paper-width guide.

For best results, set the paper type before copying or printing.

• Set the copy paper type

Load index cards
You can load index cards into the input tray of the HP All-in-One to print notes, recipes, and other text.

For best results, set the paper type before copying or printing.

NOTE: The HP All-in-One leaves a 1.2 cm (0.5 inch) border on one short edge. Before printing many cards, print one test card to make sure that the border does not crop your text.
To load index cards in the input tray

1. Remove all paper from the input tray.
2. Insert the stack of cards vertically (short edge facing outwards), with the side you want to print on facing down, into the far-right side of the input tray. Slide the stack of cards forward until it stops.
3. Slide the paper-width guide inward against the stack of cards until it stops. Do not overload the input tray; make sure the stack of cards fits within the input tray and is no higher than the top of the paper-width guide.

For best results, set the paper type before copying or printing.

Related topics

Load envelopes

You can load one or more envelopes into the input tray of the HP All-in-One. Do not use shiny or embossed envelopes or envelopes that have clasps or windows.

NOTE: For specific details on how to format text for printing on envelopes, consult the help files in your word processing software. For best results, consider using a label for the return address on envelopes.
To load envelopes

1. Remove all paper from the input tray.
2. Insert one or more envelopes into the far-right side of the input tray, with the envelope flaps on the left and facing up. Slide the stack of envelopes forward until it stops.

   TIP: To avoid paper jams, tuck the flap inside each envelope.

   TIP: For more help on loading envelopes, refer to the diagram engraved in the base of the input tray.

3. Slide the paper-width guide inward against the stack of envelopes until it stops. Do not overload the input tray; make sure the stack of envelopes fits within the input tray and is not higher than the top of the paper-width guide.

Load other types of paper

The following papers require extra attention to load them properly.

NOTE: Not all paper sizes and paper types are available with all the functions on the HP All-in-One. Some paper sizes and paper types can only be used if you are starting a print job from the Print dialog box in a software application. They are not available for copying. Papers that are only available for printing from a software application are indicated as such.

HP Premium Inkjet Transparency Film

Insert the film so that the white transparency strip (with arrows and the HP logo) is on top and is going into the input tray first.

NOTE: The HP All-in-One cannot automatically detect the paper type. For best results, set the paper type to transparency film in the software before printing onto transparency film.

HP Iron-On Transfers (for printing only)

1. Flatten the transfer sheet completely before using it; do not load curled sheets.

   TIP: To prevent curling, keep transfer sheets sealed in the original package until you are ready to use them.

2. Locate the blue stripe on the nonprinting side of the transfer paper and then manually feed one sheet at a time into the input tray with the blue stripe facing up.
Chapter 6

Related topics

• Load 10 x 15 cm (4 x 6 inch) photo paper
• Set the paper type for printing
• Set the copy paper type
The HP All-in-One can be used with any software application that allows printing. You can print a range of projects, such as borderless images, newsletters, greeting cards, iron-on transfers, and posters.

This section contains the following topics:

• Print from a software application
• Make the HP All-in-One the default printer
• Change the print settings for the current job
• Change the default print settings
• Printing shortcuts
• Perform special print jobs
• Stop a print job
• Resume a print job

Print from a software application

Most print settings are automatically handled by the software application. You need to change the settings manually only when you change print quality, print on specific types of paper or transparency film, or use special features.

To print from a software application

1. Make sure you have paper loaded in the input tray.
2. On the File menu in your software application, click Print.
3. Make sure the product is the selected printer.
4. If you need to change settings, click the button that opens the Properties dialog box. Depending on your software application, this button might be called Properties, Options, Printer Setup, Printer, or Preferences.

NOTE: When printing a photo, you must select options for the specific photo paper and photo enhancement.

5. Select the appropriate options for your print job by using the features available in the Advanced, Printing Shortcuts, Features, and Color tabs.

TIP: You can easily select the appropriate options for your print job by choosing one of the predefined print tasks on the Printing Shortcuts tab. Click a type of print task in the Printing Shortcuts list. The default settings for that type of print task are set and summarized on the Printing Shortcuts tab. If necessary, you can adjust the settings here and save your custom settings as a new printing shortcut. To save a custom printing shortcut, select the shortcut and click Save As. To delete a shortcut, select the shortcut and click Delete.

6. Click OK to close the Properties dialog box.
7. Click Print or OK to begin printing.
Make the HP All-in-One the default printer

You can set the HP All-in-One as the default printer to use from all software applications. This means that the HP All-in-One is automatically selected in the printer list when you select **Print** from the **File** menu in a software application. The default printer is automatically selected when you click the **Print** button in the toolbar of most software applications. For more information, see the Windows Help.

Change the print settings for the current job

You can customize the print settings of the HP All-in-One to handle nearly any print task.

This section contains the following topics:

- [Set the paper size](#)
- [Set the paper type for printing](#)
- [View the print resolution](#)
- [Change the print speed or quality](#)
- [Change the page orientation](#)
- [Scale the document size](#)
- [Preview your print job](#)

### Set the paper size

The paper size setting helps the HP All-in-One determine the printable area on the page. Some of the paper size choices have a borderless equivalent, which allows you to print to the top, bottom, and side edges of the paper.

Usually, you set the paper size in the software application you used to create your document or project. However, if you are using custom-size paper, or if you cannot set the paper size from your software application, you can change the paper size in the **Properties** dialog box before printing.

**To set the paper size**

1. Make sure you have paper loaded in the input tray.
2. On the **File** menu in your software application, click **Print**.
3. Make sure the product is the selected printer.
4. Click the button that opens the **Properties** dialog box. Depending on your software application, this button might be called **Properties**, **Options**, **Printer Setup**, **Printer**, or **Preferences**.
5. Click the **Features** tab.
6. In the **Resizing Options** area, click the appropriate paper size from the **Size** list. The following table lists the suggested paper size settings for the different types of paper you can load in the input tray. Make sure to look at the long list of choices in
the Size list to see if a defined paper size already exists for the type of paper you are using.

**Set the paper type for printing**

If you print on special papers, such as photo paper, transparency film, envelopes, or labels, or if you experience poor print quality, you can set the paper type manually.

**To set the paper type for printing**

1. Make sure you have paper loaded in the input tray.
2. On the File menu in your software application, click Print.
3. Make sure the product is the selected printer.
4. Click the button that opens the Properties dialog box. Depending on your software application, this button might be called Properties, Options, Printer Setup, Printer, or Preferences.
5. Click the Features tab.
6. In the Basic Options area, from the Paper Type drop-down list, select More.
7. Select the type of paper that you have loaded, and then click OK.

**View the print resolution**

The printer software displays the print resolution in dots per inch (dpi). The dpi varies according to the paper type and print quality that you select in the printer software.
To view the print resolution
1. Make sure you have paper loaded in the input tray.
2. On the File menu in your software application, click Print.
3. Make sure the product is the selected printer.
4. Click the button that opens the Properties dialog box.
   Depending on your software application, this button might be called Properties, Options, Printer Setup, Printer, or Preferences.
5. Click the Features tab.
6. In the Print Quality drop-down list, select the appropriate print quality setting for your project.
7. In the Paper Type drop-down list, select the type of paper that you have loaded.
8. Click the Resolution button to view the print resolution dpi.

Change the print speed or quality
The HP All-in-One automatically chooses a print quality and speed setting depending on the paper type setting you select. You can also change the print quality setting to customize the speed and quality of the print process.

To select a print speed or quality
1. Make sure you have paper loaded in the input tray.
2. On the File menu in your software application, click Print.
3. Make sure the product is the selected printer.
4. Click the button that opens the Properties dialog box.
   Depending on your software application, this button might be called Properties, Options, Printer Setup, Printer, or Preferences.
5. Click the Features tab.
6. In the Print Quality drop-down list, select the appropriate quality setting for your project.
7. In the Paper Type drop-down list, select the type of paper that you have loaded.

NOTE: To view the maximum dpi that the product will print, click Resolution.

8. Change the page orientation
The page orientation setting allows you to print your document vertically or horizontally on the page.

Usually, you set the page orientation in the software application you used to create your document or project. However, if you are using custom-size or special HP paper, or if you cannot set the page orientation from your software application, you can change the page orientation in the Properties dialog box before printing.

To change the page orientation
1. Make sure you have paper loaded in the input tray.
2. On the File menu in your software application, click Print.
3. Make sure the product is the selected printer.
4. Click the button that opens the Properties dialog box. Depending on your software application, this button might be called Properties, Options, Printer Setup, Printer, or Preferences.
5. Click the Features tab.
6. In the Basic Options area, do one of the following:
   • Click Portrait to print the document vertically on the page.
   • Click Landscape to print the document horizontally on the page.

Scale the document size
The HP All-in-One allows you to print the document at a different size than the original.

To scale the document size
1. Make sure you have paper loaded in the input tray.
2. On the File menu in your software application, click Print.
3. Make sure the product is the selected printer.
4. Click the button that opens the Properties dialog box. Depending on your software application, this button might be called Properties, Options, Printer Setup, Printer, or Preferences.
5. Click the Features tab.
6. In the Resizing options area, click Scale to paper size, and then click the appropriate paper size from the drop-down list.

Preview your print job
You can preview your print job before sending it to the HP All-in-One. This helps to prevent wasting paper and ink on projects that do not print as expected.

To preview your print job
1. Make sure you have paper loaded in the input tray.
2. On the File menu in your software application, click Print.
3. Make sure the product is the selected printer.
4. Click the button that opens the Properties dialog box. Depending on your software application, this button might be called Properties, Options, Printer Setup, Printer, or Preferences.
5. Select the print settings appropriate for your project on each of the tabs in the dialog box.
6. Click the Features tab.
7. Select the Show Preview Before Printing check box.
8. Click OK, and then click Print or OK in the Print dialog box. Your print job displays in the preview window.
9. In the HP preview window, do one of the following:
   • To print, click Start Printing.
   • To cancel, click Cancel Printing.
Change the default print settings

If there are settings that you frequently use for printing, you might want to make them the default print settings so they are already set when you open the Print dialog box from within your software application.

To change the default print settings
1. In the HP Solution Center, click Settings, point to Print Settings, and then click Printer Settings.
2. Make changes to the print settings, and click OK.

Printing shortcuts

Use printing shortcuts to print with print settings that you use often. The printer software has several specially designed printing shortcuts that are available in the Printing Shortcuts list.

NOTE: When you select a printing shortcut the appropriate printing options are automatically displayed. You can leave them as is or change them. You can also create a shortcut. For more information, see Create printing shortcuts.

Use the Printing Shortcuts tab for the following print tasks:

- **General Everyday Printing**: Print documents quickly.
- **Photo Printing–Borderless**: Print to the top, bottom, and side edges of 10 x 15 cm (4 x 6 inch) HP Premium Plus Photo Papers with a tear-off tab.
- **Photo Printing–With White Borders**: Print a photo with a white border around the edges.
- **Fast/Economical printing**: Produce draft-quality printouts quickly.
- **Presentation printing**: Print high-quality documents, including letters and transparencies.
- **Two-sided (Duplex) Printing**: Print two-sided pages with the HP All-in-One manually.

This section contains the following topics:

- **Create printing shortcuts**
- **Delete printing shortcuts**

Related topics

- [Print on both sides of the page](#)

Create printing shortcuts

In addition to the printing shortcuts that are available in the Printing Shortcuts list, you can create your own printing shortcuts.

If you frequently print on transparency film, for example, you can create a printing shortcut by selecting the Presentation Printing shortcut, changing the paper type to HP Premium...
Inkjet Transparency Film, and then saving the modified shortcut under a new name; for example, Transparency Presentations. After creating the printing shortcut, simply select it when printing on transparency film rather than changing the print settings each time.

To create a printing shortcut
1. On the File menu in your software application, click Print.
2. Make sure the product is the selected printer.
3. Click the button that opens the Properties dialog box. Depending on your software application, this button might be called Properties, Options, Printer Setup, Printer, or Preferences.
4. Click the Printing Shortcuts tab.
5. In the Printing Shortcuts list, click a printing shortcut. The print settings for the selected printing shortcut are displayed.
6. Change the print settings to those you want in the new printing shortcut.
7. Click Save as and type a name for the new printing shortcut, and then click Save. The printing shortcut is added to the list.

Delete printing shortcuts
You might want to delete printing shortcuts that you no longer use.

To delete a printing shortcut
1. On the File menu in your software application, click Print.
2. Make sure the product is the selected printer.
3. Click the button that opens the Properties dialog box. Depending on your software application, this button might be called Properties, Options, Printer Setup, Printer, or Preferences.
4. Click the Printing Shortcuts tab.
5. In the Printing Shortcuts list, click the printing shortcut that you want to delete.
6. Click Delete. The printing shortcut is removed from the list.

NOTE: Only the shortcuts that you have created can be deleted. The original HP shortcuts cannot be deleted.

Perform special print jobs
In addition to supporting standard print jobs, the HP All-in-One can perform special jobs such as printing borderless images, iron-on transfers, and posters.

This section contains the following topics:
• Print a borderless image
• Print a photo on photo paper
• Print using Maximum dpi
• Print on both sides of the page
• Print a multiple-page document as a booklet
• Print multiple pages on a single sheet
• Print a multiple-page document in reverse order
• Reverse an image for iron-on transfers
• Print on transparencies
• Print a group of addresses on labels or envelopes
• Print a poster
• Print a Web page

Print a borderless image

Borderless printing lets you print to the top, bottom, and side edges of 10 x 15 cm (4 x 6 inch) HP Premium Plus Photo Papers with a tear-off tab. When you remove the tear-off tab, the printed image is borderless and extends to the edges of the paper.

Tip: You can automatically adjust the settings in the Properties dialog box to print a borderless 10 x 15 cm (4 x 6 inch) photo on HP Premium Plus Photo Paper. Click the Printing Shortcuts tab, and then, in the Printing Shortcuts list, select Photo printing-borderless. You can also set the options manually as described in the following procedure.

To print a borderless image
1. Remove all paper from the input tray.
2. Place the photo paper, with the print side down and the short edge forward, on the right side of the input tray. Verify that the tear-off tab is pointing away from the product.
3. On the File menu in your software application, click Print.
4. Make sure the product is the selected printer.
5. Click the button that opens the Properties dialog box. Depending on your software application, this button might be called Properties, Options, Printer Setup, Printer, or Preferences.
6. Click the **Features** tab.

7. In the **Size** list, click the size of photo paper loaded in the input tray. If a borderless image can be printed on the specified size, the **Borderless printing** check box is enabled.

8. In the **Paper Type** drop-down list, click **More**, and then select the appropriate paper type.

   **NOTE:** You cannot print a borderless image if the paper type is set to **Plain paper** or to a type of paper other than a photo paper.

9. Select the **Borderless printing** check box if it is not already checked. If the borderless paper size and paper type are not compatible, the product software displays an alert and allows you to select a different type or size.

10. Click **OK**, and then click **Print** or **OK** in the **Print** dialog box.

   **NOTE:** Do not leave unused photo paper in the input tray. The paper might start to curl, which could reduce the quality of your printout. Photo paper should be flat before printing.

**Related topics**

- **Load 10 x 15 cm (4 x 6 inch) photo paper**

**Print a photo on photo paper**

To achieve the best print quality, HP recommends using HP papers that are specifically designed for the type of project you are printing along with genuine HP ink. HP papers and HP ink are specifically designed to work well together to provide high-quality output.

For photo printing, HP recommends that you use HP Premium Plus Photo Papers with the HP All-in-One.

**To print a photo on photo paper**

1. Remove all paper from the input tray, and then load the photo paper print side down.

2. On the **File** menu in your software application, click **Print**.

3. Make sure the product is the selected printer.

4. Click the button that opens the **Properties** dialog box. Depending on your software application, this button might be called **Properties**, **Options**, **Printer Setup**, **Printer**, or **Preferences**.

5. Click the **Features** tab.
6. In the Basic Options area, select the appropriate photo paper type from the Paper Type drop-down list.

7. In the Resizing Options area, click the appropriate paper size from the Size list. If the paper size and paper type are not compatible, the product software displays an alert and allows you to select a different type or size.

8. In the Basic Options area, select a high print quality, such as Best, from the Print Quality drop-down list.

**NOTE:** For maximum dpi resolution, go to the Advanced tab, and then select Enabled from the Maximum dpi drop-down list. For more information, see Print using Maximum dpi.

9. In the HP Real Life Technologies area, click the Photo fix drop-down list and select from the following options:
   - Off: applies no HP Real Life Technologies to the image.
   - Basic: enhances low-resolution images; moderately adjusts image sharpness.
   - Full: automatically adjusts brightness, contrast, and sharpness; enhances low-resolution images; automatically removes red-eye coloring in the photo.

**TIP:** You can remove red-eye coloring in the photo when using the Off or Basic mode by selecting the Remove red eye check box.

10. Click OK to return to the Properties dialog box.

11. (Optional) If you want to print the photo in black and white, click the Color tab and select the Print in grayscale check box. From the drop-down list, select one of the following options:
   - High Quality: uses all the available colors to print your photo in grayscale. This creates smooth and natural shades of gray.
   - Black Ink Only: uses black ink to print your photo in grayscale. The gray shading is created by varying patterns of black dots, which might result in a grainy image.

12. Click OK, and then click Print or OK in the Print dialog box.

**NOTE:** Do not leave unused photo paper in the input tray. The paper might start to curl, which could reduce the quality of your printout. Photo paper should be flat before printing.

---

**Print using Maximum dpi**

Use Maximum dpi mode to print high-quality, sharp images.

To get the most benefit from Maximum dpi mode, use it to print high-quality images such as digital photographs. When you select the Maximum dpi setting, the printer software displays the optimized dots per inch (dpi) that the HP All-in-One will print.

Printing in Maximum dpi takes longer than printing with other settings and requires a large amount of disk space.

**NOTE:** If a photo print cartridge is also installed, the print quality is enhanced. A photo print cartridge can be purchased separately if it is not included with the HP All-in-One. Photo print cartridges are not supported on all models of the product.
To print in Maximum dpi mode
1. Make sure you have paper loaded in the input tray.
2. On the File menu in your software application, click Print.
3. Make sure the product is the selected printer.
4. Click the button that opens the Properties dialog box.
   Depending on your software application, this button might be called Properties, Options, Printer Setup, Printer, or Preferences.
5. Click the Advanced tab.
6. In the Printer Features area, select Enabled from the Maximum dpi drop-down list.
7. Click the Features tab.
8. In the Paper Type drop-down list, click More, and then select the appropriate paper type.
9. In the Print Quality drop-down list, click Maximum dpi.

   NOTE: To view the maximum dpi that the product will print, click Resolution.
10. Select any other print settings that you want, and then click OK.

Related topics
Work with print cartridges

Print on both sides of the page
You can print two-sided pages with the HP All-in-One manually. When printing two-sided pages, make sure to use paper that is thick enough so that images do not show through to the other side.

To print on both sides of the page
1. Load paper into the input tray.
2. On the File menu in your software application, click Print.
3. Make sure the product is the selected printer.
4. Click the button that opens the Properties dialog box.
   Depending on your software application, this button might be called Properties, Options, Printer Setup, Printer, or Preferences.
5. Click the Features tab.
7. For binding, do one of the following:
   • For binding on the top like a notebook or calendar, select the **Flip Pages Up** check box.
     This causes the odd and even pages of your document to print opposite of each other top-to-bottom. This ensures that the top of the page is always at the top of the sheet when you flip the pages up in your bound document.
   • For binding on the side like a book or magazine, click to clear the **Flip Pages Up** check box.
     This causes the odd and even pages of your document to print opposite of each other left-to-right. This ensures that the top of the page is always at the top of the sheet when you turn the pages in your bound document.

8. Click **OK**, and then click **Print** or **OK** in the **Print** dialog box.
   The product begins printing. Wait until all the odd-numbered pages are printed before removing any of the printed pages from the output tray.
   A dialog box displays instructions on the screen when it is time to process the second side of your job.

9. Click **Continue** when done.

**Print a multiple-page document as a booklet**

The HP All-in-One allows you to print your document as a small booklet, which you can fold and then staple together.

For best results, design your document to fit on a multiple of four pages, such as an 8, 12, or 16-page program for a child's school play or for a wedding.
To print a multiple-page document as a booklet

1. Load paper into the input tray.
   The paper should be thick enough so that the images do not show through to the other side.

2. On the **File** menu in your software application, click **Print**.

3. Make sure the product is the selected printer.

4. Click the button that opens the **Properties** dialog box.
   Depending on your software application, this button might be called **Properties**, **Options**, **Printer Setup**, **Printer**, or **Preferences**.

5. Click the **Features** tab.

6. In the **Paper saving options** area, select **Manual** from the **Two-sided printing** drop-down list.

7. Select the binding edge from the **Booklet layout is** list, as appropriate for your language.
   - If your language reads left-to-right, click **Left edge binding**.
   - If your language reads right-to-left, click **Right edge binding**.
   The **Pages per sheet** box is automatically set to two pages per sheet.

8. Click **OK**, and then click **Print** or **OK** in the **Print** dialog box.
   The product begins printing.
   A dialog box displays instructions on the screen when it is time to process the second side of your job. Do not click **Continue** in the dialog box until you have reloaded the paper as instructed in the following steps.

9. Wait until the product has stopped printing for several seconds before removing any of the printed pages from the output tray.
   If you remove the pages while the document is still printing, the pages might get out of order.

10. Follow the instructions that appear on your screen for reloading the paper to print on the second side, and then click **Continue**.

11. When the entire document has finished printing, fold the stack of paper in half, so that the first page is on top, then staple the document along the crease.

   **TIP:** For best results, use a saddle stapler, or a heavy-duty stapler with a long reach to staple the booklet.
Figure 7-1 Left-edge binding for left-to-right languages

Figure 7-2 Right-edge binding for right-to-left languages
Print multiple pages on a single sheet

You can print up to 16 pages on a single sheet of paper.

To print multiple pages on a single sheet
1. Make sure you have paper loaded in the input tray.
2. On the File menu in your software application, click Print.
3. Make sure the product is the selected printer.
4. Click the button that opens the Properties dialog box. Depending on your software application, this button might be called Properties, Options, Printer Setup, Printer, or Preferences.
5. Click the Features tab.
6. In the Pages per sheet list, click 2, 4, 6, 9, or 16.
7. If you want a border to appear around each page image printed on the sheet of paper, select the Print page borders check box.
8. In the Page order list, click an appropriate page order option. The sample output graphic is numbered to show how the pages will be ordered if you select each option.
9. Click OK, and then click Print or OK in the Print dialog box.
Print a multiple-page document in reverse order

Because of the way the paper feeds through the HP All-in-One, the first page that prints is print side up at the bottom of the stack. Usually this means you need to put the printed pages in the correct order.

A better way is to print the document in reverse order so that the pages are stacked correctly.

💡 TIP: Set this option as a default setting so you do not have to remember to set it every time you print a multiple-page document.

To print a multiple-page document in reverse order
1. Make sure you have paper loaded in the input tray.
2. On the File menu in your software application, click Print.
3. Make sure the product is the selected printer.
4. Click the button that opens the Properties dialog box. Depending on your software application, this button might be called Properties, Options, Printer Setup, Printer, or Preferences.
5. Click the Advanced tab.
6. In the Layout Options area, select Front to Back in the Page Order option.

⚠️ NOTE: If you set your document to print on both sides of the page, the Front to Back option is not available. Your document will automatically print in the correct order.

7. Click OK, and then click Print or OK in the Print dialog box.

⚠️ NOTE: When you are printing multiple copies, each set is printed completely before the next set is printed.
Reverse an image for iron-on transfers

This feature reverses an image so you can use it for iron-on transfers. This feature is also useful for transparencies when you want to make notations on the back of the transparency without scratching the original.

To reverse an image for iron-on transfers
1. On the File menu in your software application, click Print.
2. Make sure the product is the selected printer.
3. Click the button that opens the Properties dialog box.
   Depending on your software application, this button might be called Properties, Options, Printer Setup, Printer, or Preferences.
4. Click the Features tab.
5. In the Paper Type drop-down list, click More, and then select HP Iron-on Transfer from the list.
6. If the selected size is not what you want, click an appropriate size in the Size list.
7. Click the Advanced tab.
8. In the Printer Features area, select On from the Mirror Image drop-down list.
9. Click OK, and then click Print or OK in the Print dialog box.

**NOTE:** To prevent jams, manually feed the iron-on transfer sheets into the input tray one sheet at a time.

Print on transparencies

For the best results, HP recommends you use HP transparency products with the HP All-in-One.

To print on transparencies
1. Load the transparency into the input tray.
2. On the File menu in your software application, click Print.
3. Make sure the product is the selected printer.
4. Click the button that opens the Properties dialog box.
   Depending on your software application, this button might be called Properties, Options, Printer Setup, Printer, or Preferences.
5. Click the Features tab.
6. In the **Basic Options** area, from the **Paper Type** drop-down list, select **More**. Then select the appropriate paper type.

🌟 **TIP:** If you want to make notations on the back of the transparencies and erase them later without scratching the original, click the **Advanced** tab, and select the **Mirror Image** check box.

7. In the **Resizing Options** area, from the **Size** drop-down list, select **More**. Then, select an appropriate size.

8. Click **OK**, and then click **Print** or **OK** in the **Print** dialog box.

⚠️ **NOTE:** The product automatically waits for transparencies to dry before releasing them. Ink dries slower on film than on plain paper. Make sure you allow enough time for the ink to dry before handling the transparency.

### Print a group of addresses on labels or envelopes

With the HP All-in-One, you can print on a single envelope, a group of envelopes, or label sheets designed for inkjet printers.

#### To print a group of addresses on labels or envelopes

1. Print a test page on plain paper first.
2. Place the test page on top of the label sheet or envelope, and hold both up to the light. Check the spacing for each block of text. Make adjustments as needed.
3. Load the labels or envelopes into the input tray.

⚠️ **CAUTION:** Do not use envelopes with clasps or windows. They can get stuck in the rollers and cause paper jams.

4. If you are printing on envelopes, do the following:
   a. Display the print settings, and click the **Features** tab.
   b. In the **Resizing Options** area, click the appropriate envelope size in the **Size** list.

5. Click **OK**, and then click **Print** or **OK** in the **Print** dialog box.

#### Related topics

- [Load envelopes](#)
Print a poster

You can create a poster by printing a document on multiple pages. The HP All-in-One prints dotted lines on some pages to indicate where to trim the pages before taping them together.

To print a poster
1. Make sure you have paper loaded in the input tray.
2. On the File menu in your software application, click Print.
3. Make sure the product is the selected printer.
4. Click the button that opens the Properties dialog box. Depending on your software application, this button might be called Properties, Options, Printer Setup, Printer, or Preferences.
5. Click the Advanced tab.
6. Expand Document Options, and then expand Printer Features.
7. In the Poster Printing drop-down list, click either 2x2 (4 sheets), 3x3 (9 sheets), 4x4 (16 sheets), or 5x5 (25 sheets).
This selection tells the product to enlarge your document so that it fits on 4, 9, 16, or 25 pages.
If your originals are of multiple pages, each of those pages will be printed on 4, 9, 16, or 25 pages. For example, if you have a one-page original and you select 3x3, you will get 9 pages; if you select 3x3 for a two-page original, 18 pages will print.
8. Click OK, and then click Print or OK in the Print dialog box.
9. After the poster has printed, trim the edges of the sheets and tape the sheets together.

Print a Web page

You can print a Web page from your Web browser on the HP All-in-One.
If you use Internet Explorer 6.0 or higher for Web browsing, you can use HP Smart Web Printing to ensure simple, predictable web printing with control over what you want and how you want it printed. You can access HP Smart Web Printing from the toolbar in Internet Explorer. For more information about HP Smart Web Printing, see the help file provided with it.
To print a Web page

1. Make sure you have paper loaded in the input tray.
2. On the File menu in your Web browser, click Print.

💡 TIP: For best results, select HP Smart Web Printing on the File menu. A check mark appears when it is selected.

The Print dialog box appears.
3. Make sure the product is the selected printer.
4. If your Web browser supports it, select the items on the Web page that you want to include in the printout.
   For example, in Internet Explorer, click the Options tab to select options such as As laid out on screen, Only the selected frame, and Print all linked documents.
5. Click Print or OK to print the Web page.

💡 TIP: To print Web pages correctly, you might need to set your print orientation to Landscape.

Stop a print job

Although you can stop a print job from either the HP All-in-One or the computer, HP recommends you stop it from the HP All-in-One for best results.

To stop a print job from the product

▲ Press Cancel. If the print job does not stop, press Cancel again.
   It can take a few moments for the print job to be cancelled.

To stop a print job from the computer (Windows Vista users)

1. On the Windows taskbar, click Start, and then click Control Panel.
2. Click Printers.
3. Double-click the product icon.

💡 TIP: You can also double-click the printer icon in the Windows taskbar.

4. Select the print job you want to cancel.
5. On the Document menu, click Cancel Printing or Cancel, or press the Delete key on your keyboard.
   It can take a few moments for the print job to be cancelled.

To stop a print job from the computer (Windows XP users)

1. On the Windows taskbar, click Start, and then click Control Panel.
2. Open the Printers and Faxes control panel.
3. Double-click the product icon.

💡 TIP: You can also double-click the printer icon in the Windows taskbar.
4. Select the print job you want to cancel.
5. On the Document menu, click Cancel Printing or Cancel, or press the Delete key on your keyboard.
   It can take a few moments for the print job to be cancelled.

To stop a print job from the computer (Windows 2000 users)
1. On the Windows taskbar, click Start, point to Settings, and then click Printers.
2. Double-click the product icon.
   
   TIP: You can also double-click the printer icon in the Windows taskbar.
3. Select the print job you want to cancel.
4. On the Document menu, click Cancel or press the Delete key on your keyboard.
   It can take a few moments for the print job to be cancelled.

Resume a print job

If an error occurs while printing, you may need to resume the job from the HP All-in-One or the computer after you address the error.

To resume a print job from the control panel
▲ On the control panel, press any button.

To resume a print job from the computer (Windows Vista users)
1. On the Windows taskbar, click Start, and then click Control Panel.
2. Click Printers.
3. Double-click the product icon.
   
   TIP: You can also double-click the printer icon in the Windows taskbar.
4. Select the print job you want to resume.
5. On the Document menu, click Resume Printing or Resume.
   It can take a few moments to resume the print job.

To resume a print job from the computer (Windows XP users)
1. On the Windows taskbar, click Start, and then click Control Panel.
2. Open the Printers and Faxes control panel.
3. Double-click the product icon.
   
   TIP: You can also double-click the printer icon in the Windows taskbar.
4. Select the print job you want to resume.
5. On the Document menu, click Resume Printing or Resume.
   It can take a few moments to resume the print job.
To resume a print job from the computer (Windows 2000 users)
1. On the Windows taskbar, click Start, point to Settings, and then click Printers.
2. Double-click the product icon.
   \(\text{TIP: You can also double-click the printer icon in the Windows taskbar.}\)
3. Select the print job you want to resume.
   It can take a few moments to resume the print job.

8 Use the copy features

The HP All-in-One allows you to produce high-quality color and black-and-white copies on a variety of paper types. You can enlarge or reduce the size of an original to fit a specific paper size, adjust the copy quality, and make high-quality copies of photos, including borderless copies.

**NOTE:** If you are using the product with a Windows 2000 computer, some features may not be available. For more information, see [Notice to Windows 2000 users](#).

This section contains the following topics:

- Make a copy
- Set the copy paper type
- Change copy speed
- Make multiple copies of the same original
- Copy a two-page black-and-white document
- Make a 10 x 15 cm (4 x 6 inch) borderless copy of a photo
- Stop copying

### Make a copy

You can make quality copies from the control panel.

**To make a copy from the control panel**
1. Make sure you have paper loaded in the input tray.
2. Place your original with the side you want to copy or scan face down on the left front corner of the glass.

   **TIP:** For quality copies, ensure that the scanner glass is clean and that there are no foreign materials adhering to it. For more information, see [Clean the glass](#).

3. Press the **Paper Type** button to set the paper type.
4. Press **Start Copy Black** or **Start Copy Color**.

**Related topics**

[Control panel buttons](#)

### Set the copy paper type

You can set the paper type for copying to either **Plain** or **Photo**.

**To set the paper type for copies**
1. Make sure you have paper loaded in the input tray.
2. Place your original with the side you want to copy or scan face down on the left front corner of the glass.
3. Press the **Paper Type** button to set the paper type. Copies made on photo paper are automatically made using Best quality. When **Photo Paper** is selected, the HP All-in-One enlarges or shrinks the original to fit within the copy margin of the detected paper size. Copies made on plain paper are automatically made using Normal quality. When the **Plain Paper** is selected, the HP All-in-One makes an exact copy of the original placed on the scanner glass.

**NOTE:** Ensure that the scanner glass is clean for the copy function to work properly.

4. Press **Start Copy Black** or **Start Copy Color**.

Refer to the following table to determine which paper type setting to choose based on the paper loaded in the input tray.

<table>

[Control panel buttons](#)

**Change copy speed**

Copies made from the control panel on regular, plain paper automatically use **Normal** quality.

You can make a Fast copy using the instructions below. Fast copies faster with comparable quality text, but the graphics quality might be lower. Fast copies use less ink and extend the life of your print cartridges.
NOTE: Fast or Normal are not available when the paper type is set to Photo.

To make a Fast copy
1. Make sure you have paper loaded in the input tray.
2. Place your original with the side you want to copy or scan face down on the left front corner of the glass.
   - **TIP:** For quality copies, ensure that the scanner glass is clean and that there are no foreign materials adhering to it. For more information, see Clean the glass.
3. Press the Paper Type button to set the paper type.
4. Press and hold down the Scan button, and then press either Start Copy Black or Start Copy Color.

Set the copy paper type

Make multiple copies of the same original

You can set the number of copies from the control panel or from the software that you installed with the HP All-in-One.

To make multiple copies of an original from the control panel
1. Make sure you have paper loaded in the input tray.
2. Place your original with the side you want to copy or scan face down on the left front corner of the glass.
   - **TIP:** For quality copies, ensure that the scanner glass is clean and that there are no foreign materials adhering to it. For more information, see Clean the glass.
3. Press the Paper Type button to set the paper type.
4. Press the Start Copy Black or Start Copy Color button to increase the number of copies up to a maximum of 9 (varies by model). The product starts the copy job after the last button press.
   - **TIP:** Use the software that you installed with the product to set the number of copies higher than 9.

In this example, the product makes six copies of the original 10 x 15 cm (4 x 6 inch) photo.
Copy a two-page black-and-white document

You can use the HP All-in-One to copy a single- or multiple-page document in color or black and white. In this example, the HP All-in-One is used to copy a two-page black-and-white original.

To copy a two-page document from the control panel

1. Make sure you have paper loaded in the input tray.
2. Place your original with the side you want to copy or scan face down on the left front corner of the glass.
3. Press the Paper Type button to set the paper type.
4. Press Start Copy Black.
5. Wait until the product has finished printing the first page. Remove the first page from the glass and load the second page.
6. Press Start Copy Black.

Make a 10 x 15 cm (4 x 6 inch) borderless copy of a photo

To make a borderless copy of a photo, use the 10 x 15 cm (4 x 6 inch) HP Premium Plus Photo Paper with a tear-off tab. When you remove the tear-off tab, the output is a borderless copy of the image that extends to the edges of the paper.
To make a borderless copy of a photo from the control panel

1. Load 10 x 15 cm (4 x 6 inch) tabbed photo paper in the input tray. Verify that the tab is pointing away from the product.

![Image of printer and photo paper]

**NOTE:** To make a borderless copy, you must use tabbed photo paper.

2. Load your original print side down on the left front corner of the glass.

3. Press **Paper Type** to select the Photo paper type.

**NOTE:** When the Photo paper type is selected, the HP All-in-One defaults to making a borderless copy with a 10 x 15 cm (4 x 6 inch) original.

4. Press **Start Copy Color**.

Remove the tab to make the copy completely borderless.

9 Use the scan features

Scanning is the process of converting text and pictures into an electronic format for your computer. You can scan almost anything (photos, magazine articles and text documents) on the HP All-in-One.

NOTE: When scanning, the HP Photosmart Software enables you to save an image in the following file formats: BMP, DCX, FPX, GIF, JPG, PCD, PCX, and TIF.

You can use the scanning features of the HP All-in-One to do the following:
• Scan text from an article into your word processor and quote it in a report.
• Print business cards and brochures by scanning a logo and using it in your publishing software.
• Send photos to friends and relatives by scanning your favorite prints and including them in e-mail messages.
• Create a photographic inventory of your house or office.
• Archive treasured photos in an electronic scrapbook.

NOTE: If you are using the product with a Windows 2000 computer, some features may not be available. For more information, see Notice to Windows 2000 users.

NOTE: If you are using the HP Photosmart Software, the Optical Character Recognition (OCR) software might not be installed on your computer. To install the OCR software, you must re-insert the software disk and select OCR under the Custom installation options.

This section contains the following topics:
• Scan an original
• Edit a scanned preview image
• Edit a scanned image
• Edit a scanned document
• Stop scanning

Scan an original

For original documents or images placed on the glass, you can start a scan from your computer or from the HP All-in-One. This section explains the second option: how to scan from the control panel of the HP All-in-One to a computer.

To use the scan features, the HP All-in-One and computer must be connected and turned on. The HP Photosmart Software must also be installed and running on your computer prior to scanning. To verify that the HP Photosmart Software is running on a Windows
computer, look for the **HP Digital Imaging Monitor** icon in the system tray at the lower right side of the screen, near the time.

**NOTE:** Closing the **HP Digital Imaging Monitor** icon in the Windows system tray can cause the HP All-in-One to lose some of its scan functionality. If this happens, you can restore full functionality by restarting your computer or by starting the HP Photosmart Software.

The HP Photosmart Software that you installed on your computer has many tools that you can use to edit and print your scanned image. You can improve the overall image quality by adjusting the brightness, sharpness, color tone, or saturation. You can also crop, straighten, rotate, or resize the image. When the scanned image looks just the way you want it, you can open it in another application, send it through e-mail, save it to a file, or print it.
To scan to a computer

1. Place your original with the side you want to copy or scan face down on the left front corner of the glass.

   ![TIP: For quality copies, ensure that the scanner glass is clean and that there are no foreign materials adhering to it. For more information, see Clean the glass.]

2. Press Scan.
   The product scans the original automatically. A preview image of the scan appears on your computer, where you can edit it. Any edits that you make apply to the current scan session only.
   The HP Photosmart Software has many tools that you can use to edit your scanned image. You can improve the overall image quality by adjusting the brightness, sharpness, color tone, or saturation. You can also crop, rotate, or resize the image.

3. Make any edits to the preview image, and then click Accept when you are finished.

   Related topics
   Control panel buttons

Edit a scanned preview image

You can use the tools in the HP Scanning software to modify a preview image. Any changes that you make, such as brightness, image type, resolution, and more apply only to this scan session.

You can make additional changes in the HP Photosmart software after the image is scanned.

   Related topics
   Use the HP Photosmart software

Edit a scanned image

You can edit a scanned image, such as a photo or graphic, using the software you installed with the HP All-in-One. Using this software, you can rotate or crop the image, as well as adjust the brightness, contrast, and color saturation.

   NOTE: If you are using the HP Photosmart Software, the Optical Character Recognition (OCR) software might not be installed on your computer. To install the OCR software, you must re-insert the software disk and select OCR under the Custom installation options.

   Related topics
   Use the HP Photosmart software

Edit a scanned document

You can edit a scanned document using your Optical Character Recognition (OCR) software. Scanning text using OCR software enables you to bring the content of magazine articles, books, and other printed matter into your favorite word processor and many other
applications as editable text. Learning to use OCR software correctly is important if you want to obtain the best results. Do not expect scanned text documents to be letter-perfect the first time you use your OCR software. Using OCR software is an art that takes time and practice to master.

NOTE: If you are using the HP Photosmart Software, the Optical Character Recognition (OCR) software might not be installed on your computer. To install the OCR software, you must re-insert the software disk and select OCR under the Custom installation options.

The HP All-in-One requires little maintenance. Sometimes you might want to clean the glass and lid backing to remove surface dust and ensure that your copies and scans remain clear. You will also need to replace, align, or clean your print cartridges from time to time. This section provides instructions for keeping the HP All-in-One in top working condition. Perform these simple maintenance procedures as necessary.

This section contains the following topics:

- Clean the HP All-in-One
- Print a self-test report
- Work with print cartridges

## Clean the HP All-in-One

To ensure that your copies and scans remain clear, you might need to clean the glass and lid backing. You might also want to dust the exterior of the HP All-in-One.

This section contains the following topics:

- Clean the exterior
- Clean the glass
- Clean the lid backing

### Clean the exterior

Use a soft cloth or slightly moistened sponge to wipe dust, smudges, and stains off the case. The interior of the HP All-in-One does not require cleaning. Keep fluids away from the control panel and the interior of the HP All-in-One.

⚠️ CAUTION: To avoid damage to the exterior of the HP All-in-One, do not use alcohol or alcohol-based cleaning products.

### Clean the glass

Fingerprints, smudges, hair, and dust on the main glass surface slow down performance and affect the accuracy of the copy and scan features.

**To clean the glass**

1. Turn off the product, unplug the power cord, and raise the lid.
2. Clean the glass with a soft cloth or sponge slightly moistened with a nonabrasive glass cleaner.

⚠️ CAUTION: Do not use abrasives, acetone, benzene, or carbon tetrachloride on the glass, since they can damage it. Do not place or spray liquid directly on the glass. The liquid might seep under the glass and damage the product.
3. Dry the glass with a dry, soft, lint-free cloth to prevent spotting.
4. Plug in the power cord, and then turn on the product.

**Clean the lid backing**

Minor debris can accumulate on the white document backing located underneath the lid of the HP All-in-One.

**To clean the lid backing**

1. Turn off the product, unplug the power cord, and raise the lid.
2. Clean the white document backing with a soft cloth or sponge slightly moistened with a mild soap and warm water.
   Wash the backing gently to loosen debris. Do not scrub the backing.

3. Dry the backing with a dry, soft, lint-free cloth.

⚠️ **CAUTION:** Do not use paper-based wipes, as these might scratch the backing.
4. If further cleaning is needed, repeat the previous steps using isopropyl (rubbing) alcohol, and wipe the backing thoroughly with a damp cloth to remove any residual alcohol.

⚠️ CAUTION: Be careful not to spill alcohol on the glass or exterior of the product, as this might damage it.

5. Plug in the power cord, and then turn on the product.

**Print a self-test report**

If you are experiencing problems with printing, print a self-test report before you replace the print cartridges. This report provides useful information on several aspects of your product, including your print cartridges.

**To print a self-test report**

1. Load letter or A4 unused plain white paper into the input tray.
2. Press and hold the **Cancel** button and then press the **Start Copy Color** button. The product prints a self-test report, which might indicate the source of the printing problem. A sample of the ink test area of the report is shown below.

![Sample of the ink test area of the report](image)

3. Make sure the test patterns show a complete grid and the thick color lines are complete.
   - If more than a few lines in a pattern are broken, this might indicate a problem with the nozzles. You might need to clean the print cartridges.
   - If the black line is missing, faded, streaked, or shows lines, this might indicate a problem with the black or photo print cartridge in the right slot.
   - If any of the color lines are missing, faded, streaked, or show lines, this might indicate a problem with the tri-color print cartridge in the left slot.

**Related topics**

- Clean the print cartridges
- Replace the print cartridges
- Control panel buttons

**Work with print cartridges**

To ensure the best print quality from the product, you will need to perform some simple maintenance procedures. This section provides guidelines for handling the print cartridges and instructions for replacing, aligning, and cleaning the print cartridges.

You might also need to check your print cartridges if the Check Print Cartridge light is on. This might mean that the print cartridges are not installed properly or are missing, the
plastic tape has not been removed from the print cartridges, the print cartridges are low on ink, or the print carriage is blocked.

This section contains the following topics:

- Handle the print cartridges
- Check the estimated ink levels
- Replace the print cartridges
- Use ink-backup mode
- Use a photo print cartridge
- Store the print cartridges
- Align the print cartridges
- Clean the print cartridges
- Clean the print cartridge contacts
- Clean the area around the ink nozzles
- Remove ink from your skin and clothing

Handle the print cartridges

Before you replace or clean a print cartridge, you should know the part names and how to handle the print cartridges.

![Image of print cartridge with labels]

<table>
<thead>
<tr>
<th></th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Copper-colored contacts</td>
</tr>
<tr>
<td>2</td>
<td>Plastic tape with pink pull tab (must be removed before installing)</td>
</tr>
<tr>
<td>3</td>
<td>Ink nozzles under tape</td>
</tr>
</tbody>
</table>

Hold the print cartridges by their black plastic sides, with the label on top. Do not touch the copper-colored contacts or the ink nozzles.
Handle the print cartridges carefully. Dropping or jarring cartridges can cause temporary printing problems, or even permanent damage.

Check the estimated ink levels

You can easily check the ink supply level to determine how soon you might need to replace a print cartridge. The ink supply level shows an estimate of the amount of ink remaining in the print cartridges. Actual ink levels may vary.

TIP: You can also print a self-test report to see if your print cartridges might need to be replaced.

NOTE: If the print cartridges were used before being installed in the product, or have been refilled, the estimated ink levels on the Estimated Ink levels tab may be inaccurate or unavailable.

NOTE: Ink from the cartridges is used in the printing process in a number of different ways, including in the initialization process, which prepares the product and cartridges for printing, and in print head servicing, which keeps print nozzles clear and ink flowing smoothly. In addition, some residual ink is left in the cartridge after it is used. For more information, see www.hp.com/go/inkusage.

To check the ink levels from the HP Photosmart Software

1. In the HP Solution Center, click Settings, point to Print Settings, and then click Printer Toolbox.

NOTE: You can also open the Printer Toolbox from the Print Properties dialog box. In the Print Properties dialog box, click the Features tab, and then click the Printer Services button.

The Printer Toolbox appears.

2. Click the Estimated Ink Level tab.

The estimated ink levels for the print cartridges appear.

Related topics

Print a self-test report

Replace the print cartridges

When the ink level for the print cartridge is low, a message appears on your computer screen. You can also check the ink levels by using the software installed with the HP All-in-One. Follow these instructions when the ink level is low.

NOTE: Ink level warnings and indicators provide estimates for planning purposes only. When you receive a low-ink warning message, consider having a replacement cartridge available to avoid possible printing delays. You do not need to replace the print cartridges until print quality becomes unacceptable.
To order print cartridges for the HP All-in-One, go to [www.hp.com/buy/supplies](http://www.hp.com/buy/supplies). If prompted, choose your country/region, follow the prompts to select your product, and then click one of the shopping links on the page.

**Choose the right cartridge combination**

Choose the best combination of cartridges for your print job:

- **Everyday printing:** Use a black cartridge along with a tri-color cartridge.
- **Color photos:** Use a photo cartridge along with a tri-color cartridge.

⚠️ **NOTE:** If a photo print cartridge is also installed, the print quality is enhanced. A photo print cartridge can be purchased separately if it is not included with the HP All-in-One. Photo print cartridges are not supported on all models of the product.

**To replace the print cartridges**

1. Make sure the product is on and you have letter or A4 unused plain white paper loaded in the input tray.

⚠️ **CAUTION:** If the product is turned off when you open the print cartridge door to access the print cartridges, it will not release the cartridges for changing. You might damage the product if the print cartridges are not docked safely when you try to remove them.

2. Open the print cartridge door.
   The print carriage should move to the center of the product. If the print carriage does not move to the center, turn the product off, and then on.

3. Wait until the print carriage is idle and silent, and then lightly press down on a print cartridge to release it.
   If you are replacing the tri-color print cartridge, remove the print cartridge from the slot on the left.
If you are replacing the black or photo print cartridge, remove the print cartridge from the slot on the right.

4. Pull the print cartridge toward you out of its slot.

5. If you are removing the black print cartridge in order to install the photo print cartridge, store the black print cartridge in the print cartridge protector or an airtight plastic container.

If you are disposing of the print cartridge, recycle the print cartridge. The HP Inkjet Supplies Recycling Program is available in many countries/regions, and lets you recycle used print cartridges free of charge. For more information, go to the following Web site:

www.hp.com/hpinfo/globalcitizenship/environment/recycle/inkjet.html

6. Remove the new print cartridge from its packaging, being careful to touch only the black plastic. Gently remove the plastic tape using the pink pull tab.

△ CAUTION: Do not touch the copper-colored contacts or ink nozzles. Touching these parts can result in clogs, ink failure, and bad electrical connections.
7. Slide the new print cartridge at a slight upward angle into the empty slot. Then gently push on the upper part of the print cartridge forward until it snaps into place. If you are installing the tri-color print cartridge, slide it into the left slot. If you are installing a black or photo print cartridge, slide it into the right slot.

8. Close the print cartridge door.

9. After the print cartridge alignment sheet prints, load it on the left front corner of the glass with the top of the page to the left.
10. Press the **Scan** button.  
   The product aligns the print cartridges. Recycle or discard the print cartridge alignment sheet.

**Related topics**
- [Check the estimated ink levels](#)
- [Control panel buttons](#)

**Use ink-backup mode**
Use the ink-backup mode to operate the HP All-in-One with only one print cartridge. The ink-backup mode is initiated when a print cartridge is removed from the print cartridge carriage. During ink-backup mode, the product can only print jobs from the computer. You cannot initiate a print job from the control panel (such as copying or scanning an original).

**NOTE:** When the HP All-in-One operates in ink-backup mode, a message is displayed on screen. If the message is displayed and two print cartridges are installed in the product, verify that the protective piece of plastic tape has been removed from each print cartridge. When plastic tape covers the print cartridge contacts, the product cannot detect that the print cartridge is installed.

For more information about ink-backup mode, see the following topics:
- [Ink-backup mode output](#)
- [Exit ink-backup mode](#)

**Ink-backup mode output**
Printing in ink-backup mode slows the HP All-in-One and affects the quality of printouts.

<table>

</tr>
<tr>
<td>Photo print cartridge</td>
<td>Colors print as grayscale.</td>
</tr>
</tbody>
</table>

**NOTE:** HP does not recommend using the photo print cartridge for ink-backup mode.

**Exit ink-backup mode**
Install two print cartridges in the HP All-in-One to exit ink-backup mode.
For information about installing a print cartridge, see [Replace the print cartridges](#).

**Use a photo print cartridge**
You can optimize the quality of the color photos you print and copy with the HP All-in-One by purchasing a photo print cartridge. Remove the black print cartridge and insert the photo print cartridge in its place. With the tri-color print cartridge and photo print cartridge installed, you have a six-ink system, which provides enhanced quality color photos.
When you want to print regular text documents, swap the black print cartridge back in. Use a print cartridge protector or an airtight plastic container to keep your print cartridge secure when it is not being used.

**NOTE:** If a photo print cartridge is also installed, the print quality is enhanced. A photo print cartridge can be purchased separately if it is not included with the HP All-in-One. Photo print cartridges are not supported on all models of the product.

**Related topics**
- Replace the print cartridges
- Control panel buttons

**Store the print cartridges**

Follow these guidelines to maintain and store HP print cartridges and to ensure consistent print quality.

- Print cartridge storage and handling
- Print cartridge protector

**Print cartridge storage and handling**

Follow these guidelines to help maintain HP print cartridges and ensure consistent print quality:

- When you remove a print cartridge from the device, store it in an airtight plastic container to prevent the ink from drying out. If you are storing a photo print cartridge, you can use a print cartridge protector. For more information, see Print cartridge protector.
- Keep all unused print cartridges in their original sealed packages until they are needed. Store print cartridges at room temperature (15–35 degrees C or 59–95 degrees F).
- Do not remove the plastic tape covering the ink nozzles until you are ready to install the print cartridge in the device. If the plastic tape has been removed from the print cartridge, do not attempt to reattach it. Reattaching the tape damages the print cartridge.

⚠️ **CAUTION:** Always turn the HP All-in-One off with the Power button before you unplug the power cord or turn off a power strip. This allows the device to store the print cartridges properly. When you store the HP All-in-One, always leave the active print cartridges inside the device.

**Print cartridge protector**

In some countries/regions, when you purchase a photo print cartridge (not supported on all models of the product), you might also receive a print cartridge protector. If a print cartridge protector is not available, you can use an airtight plastic container to protect your print cartridge.

The print cartridge protector is designed to keep a print cartridge secure and prevent it from drying out when it is not being used. Whenever you remove a print cartridge from the HP All-in-One with the intention of using it again later, store it in the print cartridge protector. For example, store the black print cartridge in a print cartridge protector if you
are removing it so you can print high-quality photos with the photo and tri-color print cartridges.

To insert a print cartridge into the print cartridge protector
▲ Place the print cartridge into the print cartridge protector at a slight angle and snap it securely into place.

To remove the print cartridge from the print cartridge protector
▲ Press down on the top of the print cartridge protector to release the print cartridge, and then gently remove the print cartridge out of the print cartridge protector.

Align the print cartridges
Aligning the print cartridges ensures high-quality output. The HP All-in-One prompts you to align and calibrate the print cartridges every time you install a new print cartridge. Make sure you align the print cartridges when prompted to ensure excellent print quality.

NOTE: If you remove and reinstall the same print cartridge, the HP All-in-One will not prompt you to align the print cartridges. The HP All-in-One remembers the alignment values for that print cartridge, so you do not need to realign the print cartridges.
To align newly installed print cartridges
1. Make sure you have letter or A4 unused plain white paper loaded in the input tray. The HP All-in-One prints a print cartridge alignment sheet.

 NOTE: If you have colored paper loaded in the input tray when you align the print cartridges, the alignment will fail. Load unused plain white paper into the input tray, and then try the alignment again.

 If the alignment fails again, you might have a defective sensor or print cartridge. Contact HP Support. Go to www.hp.com/support. If prompted, choose your country/region, and then click Contact HP for information on calling for technical support.

2. Load the print cartridge alignment sheet print side down on the left front corner of the glass with the top of the page to the left.
3. Press the Scan button. The HP All-in-One aligns the print cartridges. Recycle or discard the print cartridge alignment sheet.

To align the print cartridges from the HP Photosmart Software
1. Load letter or A4 unused plain white paper into the input tray.

 NOTE: If you have colored paper loaded in the input tray when you align the print cartridges, the alignment will fail. Load unused plain white paper into the input tray, and then try the alignment again.

2. In the HP Solution Center, click Settings, point to Print Settings, and then click Printer Toolbox.

 NOTE: You can also open the Printer Toolbox from the Print Properties dialog box. In the Print Properties dialog box, click the Features tab, and then click the Printer Services button.

 The Printer Toolbox appears.
3. Click the Device Services tab.
4. Click Align the Print Cartridges. The HP All-in-One prints a print cartridge alignment sheet.
5. Load the print cartridge alignment sheet print side down on the left front corner of the glass.
6. Press the Scan button. The HP All-in-One aligns the print cartridges. Recycle or discard the print cartridge alignment sheet.

Control panel buttons

Clean the print cartridges
Use this feature when the self-test report shows streaking, white lines through any of the lines of color or when a color is muddy after installing a print cartridge for the first time.
Do not clean print cartridges unnecessarily, as this wastes ink and shortens the life of the ink nozzles.

To clean the print cartridges from the HP Photosmart Software
1. Load letter, A4, or legal unused plain white paper into the input tray.
2. In the HP Solution Center, click Settings, point to Print Settings, and then click Printer Toolbox.

   NOTE: You can also open the Printer Toolbox from the Print Properties dialog box. In the Print Properties dialog box, click the Features tab, and then click the Printer Services button.

   The Printer Toolbox appears.
3. Click the Device Services tab.
4. Click Clean the Print Cartridges.
5. Follow the prompts until you are satisfied with the quality of the output, and then click Done.
   If print quality still seems poor after you clean the print cartridges, try cleaning the print cartridge contacts before replacing the affected print cartridge.

Related topics
• Clean the print cartridge contacts
• Replace the print cartridges

Clean the print cartridge contacts

⚠️ CAUTION: Do not clean the print cartridge contacts unless you are having a problem with print quality and other measures have not been successful. For more information, see Print quality troubleshooting.

Clean the print cartridge contacts if you get repeated messages on your computer screen prompting you to check a print cartridge after you already have cleaned or aligned the print cartridges, or if the Check Print Cartridge light is blinking.

Before cleaning the print cartridge contacts, remove the print cartridge and verify that nothing is covering the print cartridge contacts, then reinstall the print cartridge. If you continue to get messages to check the print cartridges, clean the print cartridge contacts.

Make sure you have the following materials available:
• Dry foam rubber swabs, lint-free cloth, or any soft material that will not come apart or leave fibers.

   TIP: Coffee filters are lint-free and work well for cleaning print cartridges.
• Distilled, filtered, or bottled water (tap water might contain contaminants that can damage the print cartridges).

⚠️ CAUTION: Do not use platen cleaners or alcohol to clean the print cartridge contacts. These can damage the print cartridge or the product.
To clean the print cartridge contacts

1. Turn on the product and open the print cartridge door. The print carriage moves to the center of the product.

2. Wait until the print carriage is idle and silent, and then unplug the power cord from the back of the product.

3. Lightly press down on the print cartridge to release it, and then pull it toward you out of the slot.

   **NOTE:** Do not remove both print cartridges at the same time. Remove and clean each print cartridge one at a time. Do not leave a print cartridge outside the HP All-in-One for more than 30 minutes.

4. Inspect the print cartridge contacts for ink and debris buildup.

5. Dip a clean foam rubber swab or lint-free cloth into distilled water, and squeeze any excess water from it.

6. Hold the print cartridge by its sides.

7. Clean only the copper-colored contacts. Allow the print cartridges to dry for approximately ten minutes before reinserting.
8. Hold the print cartridge with the HP logo on top, and insert the print cartridge back into the slot. Make sure you push the print cartridge in firmly until it snaps into place.

9. Repeat if necessary for the other print cartridge.
10. Gently close the print cartridge door and plug the power cord into the back of the product.

Related topics
- Clean the area around the ink nozzles
- Replace the print cartridges

Clean the area around the ink nozzles

If the HP All-in-One is used in a dusty environment, a small amount of debris might accumulate inside the device. This debris can include dust, hair, carpet, or clothing fibers. When debris gets on the print cartridges, it can cause ink streaks and smudges on printed pages. Ink streaking can be corrected by cleaning around the ink nozzles as described here.

**NOTE:** Clean the area around the ink nozzles only if you continue to see streaks and smudges on your printed pages after you have already cleaned the print cartridges by using the software you installed with the HP All-in-One.
Make sure you have the following materials available:

- Dry foam rubber swabs, lint-free cloth, or any soft material that will not come apart or leave fibers.

  **TIP:** Coffee filters are lint-free and work well for cleaning print cartridges.

- Distilled, filtered, or bottled water (tap water might contain contaminants that can damage the print cartridges).

  **CAUTION:** Do not touch the copper-colored contacts or ink nozzles. Touching these parts can result in clogs, ink failure, and bad electrical connections.

To clean the area around the ink nozzles

1. Turn on the product and open the print cartridge door. The print carriage moves to the center of the product.

2. Wait until the print carriage is idle and silent, and then unplug the power cord from the back of the product.

3. Lightly press down on the print cartridge to release it, and then pull it towards you out of the slot.

  **NOTE:** Do not remove both print cartridges at the same time. Remove and clean each print cartridge one at a time. Do not leave a print cartridge outside the product for more than 30 minutes.

4. Place the print cartridge on a piece of paper with the ink nozzles facing up.

5. Lightly moisten a clean foam rubber swab with distilled water.
6. Clean the face and edges around the ink nozzle area with the swab, as shown below.

![Diagram showing clean areas](image)

| 1 | Nozzle plate (do not clean) |
| 2 | Face and edges around the ink nozzle area |

⚠️ **CAUTION:** Do not clean the nozzle plate.

7. Hold the print cartridge with the HP logo on top, and insert the print cartridge back into the slot. Make sure you push the print cartridge in firmly until it snaps into place.

8. Repeat if necessary for the other print cartridge.

9. Gently close the print cartridge door and plug the power cord into the back of the product.

Remove ink from your skin and clothing

Follow these instructions to remove ink from your skin and clothing:

<table>
<thead>
<tr>
<th>Surface</th>
<th>Remedy</th>
</tr>
</thead>
<tbody>
<tr>
<td>Skin</td>
<td>Wash the area with an abrasive soap.</td>
</tr>
<tr>
<td>White fabric</td>
<td>Wash the fabric in cold water and use chlorine bleach.</td>
</tr>
<tr>
<td>Color fabric</td>
<td>Wash the fabric in cold water and use sudsy ammonia.</td>
</tr>
</tbody>
</table>

⚠️ CAUTION: Always use cold water to remove ink from fabric. Warm or hot water can set the ink into the fabric.
11 Shop for ink supplies

For a list of print cartridge numbers, see the printed documentation that came with the HP All-in-One. You can also use the software that came with the HP All-in-One to find out the reorder number for all the print cartridges. You can order print cartridges online from the HP Web site. Additionally, you can contact a local HP reseller to find out the correct print cartridge reorder numbers for your product and purchase print cartridges.

To order genuine HP supplies for the HP All-in-One, go to www.hp.com/buy/supplies. If prompted, choose your country/region, follow the prompts to select your product, and then click one of the shopping links on the page.

NOTE: Ordering print cartridges online is not supported in all countries/regions. If it is not supported in your country/region, contact a local HP reseller for information about purchasing print cartridges.

To order print cartridges from your desktop

▲ Click the Shop for HP Supplies icon on your desktop to connect to HP SureSupply. You will see a list of original HP printing supplies that are compatible with your device, as well as options to conveniently purchase the supplies you need (options vary by country/region).

If you deleted this icon from your desktop, click the Start menu, point to the HP folder, then click Shop for Supplies.

To order print cartridges through the HP Photosmart Software

1. In the HP Solution Center, click Settings, point to Print Settings, and then click Printer Toolbox.

   NOTE: You can also open the Printer Toolbox from the Print Properties dialog box. In the Print Properties dialog box, click the Features tab, and then click the Printer Services button.

2. Click the Estimated Ink Levels tab.

3. Click Print Cartridge Ordering Information.
   The print cartridge reorder numbers appear.

4. Click Order Online.
   HP sends detailed printer information, including model number, serial number, and ink supply levels, to an authorized online reseller. The supplies you need are preselected; you can change quantities, add or remove items, and then check out.

- View the Readme file
- Hardware setup troubleshooting
- Software installation troubleshooting
- Paper jams
- Print cartridge troubleshooting
- Print quality troubleshooting
- Print troubleshooting
- Copy troubleshooting
- Scan troubleshooting
- Errors

View the Readme file

You might want to refer to the Readme file for information on system requirements and possible installation problems.

You can access the Readme file by clicking Start, pointing to Programs or All Programs, pointing to HP, pointing to Deskjet F2200 All-In-One series, and then clicking Readme.

You can access the Readme file by double-clicking the icon located in the top-level folder of the HP All-in-One software CD-ROM.

Hardware setup troubleshooting

This section contains hardware troubleshooting information for the product.

Many issues are caused when the product is connected to the computer using a USB cable before the HP Photosmart software is installed on the computer. If you connected the product to your computer before the software installation screen prompts you to do so, you must follow these steps:

Troubleshooting common setup issues

1. Disconnect the USB cable from the computer.
2. Uninstall the software (if you have already installed it).
   For more information, see Uninstall and reinstall the software.
3. Restart your computer.
4. Turn off the product, wait one minute, then restart it.
5. Reinstall the HP Photosmart software.

⚠️ CAUTION: Do not connect the USB cable to the computer until prompted by the software installation screen.
This section contains the following topics:

- The product will not turn on
- I connected the USB cable, but I am having problems using the HP All-in-One with my computer
- After setting up the product, it does not print

The product will not turn on

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

- Solution 1: Make sure the power cord is connected
- Solution 2: Press the On button more slowly

Solution 1: Make sure the power cord is connected

Solution:

- Make sure the power cord is firmly connected to both the product and the power adapter. Plug the power cord into a power outlet, surge protector, or power strip.

  ![Diagram of power connections](image)

  **Diagram: Power connections**

  - **1. Power connection**
  - **2. Power cord and adapter**

- If you are using a power strip, make sure the power strip is on. Or, try plugging the product directly into a power outlet.
- Test the power outlet to make sure it is working. Plug in an appliance that you know works, and see if the appliance has power. If not, then there might be a problem with the power outlet.
- If you plugged the product into a switched outlet, make sure the outlet is switched on. If it is switched to on but still does not work, then there might be a problem with the power outlet.

**Cause:** The product was not properly connected to a power supply.
If this did not solve the issue, try the next solution.

Solution 2: Press the On button more slowly

**Solution:** The product might not respond if you press the **On** button too quickly. Press the **On** button once. It might take a few minutes for the product to turn on. If you press the **On** button again during this time, you might turn the product off.

⚠️ **CAUTION:** If the product still does not turn on, it might have a mechanical failure. Unplug the product from the power outlet.

Contact HP support for service.

Go to: [www.hp.com/support](http://www.hp.com/support). If prompted, choose your country/region, and then click **Contact HP** for information on calling for technical support.

**Cause:** You pressed the **On** button too quickly.

I connected the USB cable, but I am having problems using the HP All-in-One with my computer

**Solution:** You must first install the software that came with the product before connecting the USB cable. During installation, do not plug in the USB cable until prompted by the onscreen instructions.

Once you have installed the software, connecting your computer to the product with a USB cable is straightforward. Simply plug one end of the USB cable into the back of your computer and the other into the back of the product. You can connect to any USB port on the back of your computer.

If you installed the software, uninstall it and then reinstall it, connecting the USB cable only when prompted.
For more information on installing the software and connecting the USB cable, see the Setup Guide that came with the product.

**Cause:** The USB cable was connected before the software was installed. Connecting the USB cable before prompted can cause errors.

---

**After setting up the product, it does not print**

**Solution:**

- Look at the On button located on the product. If it is not lit, the product is turned off. Make sure the power cord is firmly connected to the product and plugged into a power outlet. Press the On button to turn on the product.
- Make sure the print cartridges are installed.
- Make sure you have paper loaded in the input tray.
- Make sure that the product does not have a paper jam.
- Check that the print carriage is not jammed. Open the print cartridge door to access the print carriage area. Remove any objects that are blocking the print carriage, including any packing materials. Turn the product off and then turn it on again.
- Print a test page to see if the product can print and is communicating with the computer. For more information, see [Print a self-test report](#).
- Make sure that the print queue is not paused. If it is, choose the appropriate setting to resume printing. For more information about accessing the print queue, see the documentation that came with the operating system installed on your computer.
- Check the USB cable. If you are using an older cable, it might not be working properly. Try connecting it to another product to see if the USB cable works. If you experience problems, the USB cable might need to be replaced. Also verify that the cable does not exceed 3 meters (9.8 feet) in length.
- Make sure your computer is USB ready and that you are using a supported operating system. For more information, see the Readme file.
- Check the connection from the product to your computer. Verify that the USB cable is securely plugged into the USB port on the back of the product. Make sure
the other end of the USB cable is plugged into a USB port on your computer. After the cable is connected properly, turn the product off and then on again.

- If you are connecting the product through a USB hub, make sure the hub is turned on. If the hub is on, try connecting directly to your computer.
- Check other printers or scanners. You might need to disconnect older products from your computer.
- Try connecting the USB cable to another USB port on your computer. After you check the connections, try restarting your computer. Turn the product off and then on again.
- After you check the connections, try restarting your computer. Turn the product off and then on again.
- If necessary, remove and then install the software you installed with the product again. For more information, see Uninstall and reinstall the software.

For more information on setting up the product and connecting it to your computer, see the Setup Guide that came with the product.

**Cause:** The product and computer were not communicating with each other.

---

**Software installation troubleshooting**

Use this section to solve any problems you might encounter while setting up the HP Photosmart software.

This section contains the following topics:
- When I insert the CD-ROM into my computer's CD-ROM drive, nothing happens
- The Minimum System Checks screen appears
- A red X appears on the USB connect prompt
- I received a message that an Unknown Error has occurred
- Some of the buttons are missing in the HP Solution Center

Software installation troubleshooting
• The registration screen does not appear
• The HP Digital Imaging Monitor does not appear in the system tray
• Uninstall and reinstall the software

When I insert the CD-ROM into my computer’s CD-ROM drive, nothing happens

Solution: If the installation does not run automatically, you can start it manually.

To start the installation from a Windows computer
1. From the Windows Start menu, click Run.
2. In the Run dialog box, enter d:\setup.exe, and then click OK.
   If your CD-ROM drive is not assigned to drive letter D, enter the appropriate drive letter.

Cause: The installation failed to run automatically.

The Minimum System Checks screen appears

Solution: Click Details to see what the specific problem is, and then correct the problem before attempting to install the software.

Cause: Your system did not meet the minimum requirements to install the software.

A red X appears on the USB connect prompt

Solution: Verify that the product is set up properly, and then try to re-establish the connection.

To retry the USB connection
1. Verify that the USB cable is set up properly as follows:
   • Unplug the USB cable and plug it in again or try plugging the USB cable into a different USB port.
   • Do not attach the USB cable to a keyboard.
   • Verify that the USB cable is 3 meters (9.8 feet) or less in length.
   • If you have several USB devices attached to your computer, you might want to unplug the other devices during the installation.
2. Unplug the product power cord, and then plug it in again.
3. Verify that the USB cable and power cord are plugged in.

4. Click Retry to retry the connection.

5. Continue with the installation and restart the computer when prompted.

Cause: Normally, a green check appears indicating that the plug and play was successful. A red X indicates that the plug and play failed.

I received a message that an Unknown Error has occurred

Solution: Try to continue with the installation. If that does not work, stop and then restart the installation, and follow the directions on the screen. If an error occurs, you might need to uninstall and then reinstall the software. Do not simply delete the product application files from your computer. Make sure to remove them properly using the uninstall utility provided when you installed the software that came with the product.

For more information, see:
Uninstall and reinstall the software

Cause: The source of the error is unknown.

Some of the buttons are missing in the HP Solution Center

Solution: If the appropriate icons and buttons for your product do not appear in the HP Solution Center, your installation might not be complete, and you might need to uninstall and then reinstall the software. Do not simply delete the product application files from your hard drive. Make sure to remove them properly using the uninstall utility provided in the HP All-in-One program group.

For more information, see:
Uninstall and reinstall the software
Cause: The installation might not be complete.

The registration screen does not appear

Solution: You can access the registration (Sign up now) screen from the Windows taskbar by clicking Start, pointing to Programs or All Programs, HP, Deskjet F2200 All-In-One series, and then clicking Product Registration.

Cause: The registration screen did not launch automatically.

The HP Digital Imaging Monitor does not appear in the system tray

Solution: If the HP Digital Imaging Monitor does not appear in the system tray (normally located at the lower-right corner of the desktop), start the HP Solution Center.

If the appropriate icons and buttons for your product do not appear in the HP Solution Center, your installation might not be complete, and you might need to uninstall and then reinstall the software. Do not simply delete the product application files from your hard drive. Make sure to remove them properly using the uninstall utility provided in the HP All-in-One program group.

For more information, see: Uninstall and reinstall the software

Cause: The installation might not be complete.

Uninstall and reinstall the software

If your installation is incomplete, or if you connected the USB cable to the computer before prompted by the software installation screen, you might need to uninstall and then reinstall the software. Do not simply delete the HP All-in-One application files from your
To verify that the software is properly installed, double-click the HP Solution Center icon on the desktop. If the HP Solution Center shows the essential icons (Scan Picture and Scan Document), the software has been properly installed.
Paper jams

To help avoid paper jams, follow these guidelines:

• Remove printed papers from the output tray frequently.
• Prevent curled or wrinkled paper by storing all unused paper flat in a resealable bag.
• Ensure that paper loaded in the input tray lays flat and the edges are not bent or torn.
• Do not combine different paper types and paper sizes in the input tray; the entire stack of paper in the input tray must be the same size and type.
• Adjust the paper-width guide in the input tray to fit snugly against all paper. Make sure the paper-width guide does not bend the paper in the input tray.
• Do not force paper too far forward in the input tray.
• Use paper types that are recommended for the product.

For more information, see the following topics:

• Clear paper jams
• Information on paper

Clear paper jams

Solution: Clear the paper jam through the rear access door.

To clear a paper jam from the rear access door

1. Press in the tab on the left side of the rear access door to release the door. Remove the door by pulling it away from the product.

⚠️ CAUTION: Trying to clear a paper jam from the front of the product can damage the print mechanism. Always access and clear paper jams through the rear access door.

2. Gently pull the paper out of the rollers.

⚠️ CAUTION: If the paper tears when you are removing it from the rollers, check the rollers and wheels for torn pieces of paper that might be remaining inside the product. If you do not remove all the pieces of paper from the product, more paper jams are likely to occur.
3. Replace the rear access door. Gently push the door forward until it snaps into place.

4. Press any button on the control panel to continue the current job.

**Cause:** Paper had jammed in the product.

---

**Information on paper**

The HP All-in-One is designed to work well with most paper types. Test a variety of paper types before buying a large quantity. Find a paper type that works well and is easy to purchase. HP Premium papers are designed for the best quality results. In addition, follow these tips:

- Do not use paper that is too thin, that has a slick texture, or that stretches easily. It can feed incorrectly through the paper path, causing paper jams.
- Store photo media in its original packaging inside a resealable plastic bag on a flat surface in a cool, dry place. When you are ready to print, remove only the paper you plan to use immediately. When you have finished printing, return any unused photo paper to the plastic bag.
- Do not leave unused photo paper in the input tray. The paper might start to curl, which might reduce the quality of your printouts. Curled paper can also cause paper jams.
- Always hold photo paper by the edges. Fingerprints on photo paper can reduce print quality.
- Do not use paper that is heavily textured. It can cause graphics or text to print improperly.
- Do not combine different paper types and paper sizes in the input tray; the entire stack of paper in the input tray must be the same size and type.
- Store printed photos under glass or in a storage book to prevent bleeding over time from high humidity. Use HP Premium Plus photo paper for maximum performance.

**Print cartridge troubleshooting**

If you are experiencing problems with printing, you might have a problem with one of the print cartridges. If you receive an error message about the print cartridges, see Print cartridge messages for more information.

Try the following:

- Information on print cartridges
- Resolving print cartridge problems
- Resolving print cartridge error messages
Information on print cartridges

For best results, use HP print cartridges. The following tips help maintain HP print cartridges and ensure consistent print quality.

- Keep all print cartridges in the original sealed packages until they are needed.
- Store print cartridges at room temperature (15.6°-26.6° C or 60°-78° F).
- Do not reattach the protective tape once it has been removed from the print cartridge. Reattaching the plastic tape might damage the print cartridge. Place the print cartridge in the product immediately after removing the plastic tape. If this is not possible, store it in a print cartridge protector or airtight plastic container.
- HP recommends that you do not remove the print cartridges from the product until you have replacement print cartridges available to install.
- Turn off the product from the control panel. Do not turn off the product by turning off a power strip or unplugging the power cord from the product. If you improperly turn off the product, the print carriage does not return to the correct position and the print cartridges can dry out.
- Do not open the print cartridge door unless necessary. This exposes the print cartridges to air, which reduces the life of the print cartridges.

**NOTE:** If you leave the print cartridge door open for a long period of time, the product will recap the print cartridges to protect them from exposure to air.

- It might be necessary to clean the print cartridges when you notice a significant decrease in print quality.

**TIP:** You might notice a decrease in print quality if the print cartridges have not been used for a long time.

- Do not clean the print cartridges unnecessarily. This wastes ink and shortens the life of the cartridges.
- Handle print cartridges carefully. Dropping, jarring, or rough handling during installation can cause temporary printing problems. If print quality is poor right after cartridge installation, allow half an hour for the print cartridge to recover.

For more information, see:

Print cartridge troubleshooting
Resolving print cartridge problems

Many problems can be resolved with the following procedures. If you receive a specific error message about the print cartridges, see Print cartridge messages for more information.

To troubleshoot the print cartridges

1. Remove and reinstall the print cartridges.
   For more information, see Replace the print cartridges.
   
   ✋ NOTE: Make sure the plastic tape has been removed. If it is still covering the ink nozzles, gently remove the plastic tape by using the pink pull tab.

2. If print quality is suffering, check the estimated ink levels.
   For more information, see Check the estimated ink levels.

3. Print a self-test report and review the test patterns.
   For more information, see Print a self-test report.

4. Clean the print cartridges:
   • First, try cleaning the print cartridges from the HP Photosmart Software. For more information, see Clean the print cartridges.
     
     ⚠️ CAUTION: Performing this procedure unnecessarily can waste ink and shorten the life of the cartridges.
   
   • If cleaning the print cartridges from the software did not help, you can try cleaning the print cartridge contacts. For more information, see Clean the print cartridge contacts.

5. If none of the previous procedures resolved the problem, replace the print cartridges.
   For more information, see Replace the print cartridges.

Resolving print cartridge error messages

After you install a print cartridge, one or both of the print cartridge status lights begin to blink. The printer will not print. One of the following messages may appear on your computer screen:

Print Cartridge Problem
Incorrect Print Cartridge(s)
Incorrectly Installed Cartridge(s)
Print Cartridge(s) Missing

Work through the following sections in order. When the print cartridge light stops blinking, you have solved the problem.
NOTE: In the procedures below, the problem cartridge is identified by the blinking light. The light on the left blinks when the tri-color print cartridge (on the left) is the problem, the light on the right blinks when the black or photo cartridge (on the right) is the problem, and both lights blink when both cartridges are the problem.

• Solution 1: Remove and reinstall the print cartridges
• Solution 2: Clean the print cartridge contacts
• Solution 3: Print in ink-backup mode

Solution 1: Remove and reinstall the print cartridges

Solution: The print cartridge may not have full electrical contact with the printer. Removing and reinstalling the cartridge may help.

NOTE: HP cannot guarantee the quality of remanufactured or refilled cartridges.

To verify and install the correct print cartridges

1. Make sure the product is on. Press the On button if it is not lit.
2. Open the print cartridge door, and then wait until the print carriage is idle and silent.
3. Press down lightly on the end of the problem cartridge to release it.
4. Slide the cartridge out and inspect it:
   - CAUTION: Do not touch the copper electrical contacts or the ink nozzles.
   - Check the electrical contacts for debris.
   - Make sure all the clear nozzle protective tape has been removed.
   - CAUTION: Do not attempt to remove the copper electrical strip!
5. Read the selection number on the print cartridge label and make sure it is compatible with the product. Compatible print cartridges are listed in the printed documentation that came with the product.

![Image of print cartridge with selection number]
6. If the print cartridge has the wrong selection number, install a new print cartridge. For more information, see Replace the print cartridges.

7. Close the print cartridge door.

If this did not solve the issue, try the next solution.

Solution 2: Clean the print cartridge contacts

Solution: If the print cartridge selection number is correct and the previous solution did not resolve the problem, try cleaning the print cartridge. For more information, see Clean the print cartridge contacts.

If the print cartridge status light continues to flash after cleaning the print cartridge, replace the print cartridge. For more information, see Replace the print cartridges.

If this did not solve the issue, try the next solution.

Solution 3: Print in ink-backup mode

Solution: If you do not have a replacement print cartridge, you can still print in ink backup mode. Remove the problem cartridge and print with the remaining cartridge.

For more information, see: Use ink-backup mode
Print quality troubleshooting

If you are having problems with print quality, try the solutions in this section and observe the following guidelines.

To troubleshoot print quality issues

1. Check the print cartridges.
   
   HP recommends that you use genuine HP print cartridges. Genuine HP print cartridges are designed and tested with HP printers to help you easily produce great results, time after time.

   **NOTE:** HP cannot guarantee the quality or reliability of non-HP supplies. Printer service or repairs required as a result of using a non-HP supply will not be covered under warranty.

   If you believe you purchased genuine HP ink cartridges, go to:
   
   www.hp.com/go/anticounterfeit

   For more information, see Replace the print cartridges.

2. Check the ink levels.

   If you have installed a refilled or remanufactured print cartridge, or a cartridge that has been used in another printer, the ink level indicator will be inaccurate or unavailable. The ink levels provided are an estimate. When print cartridges are truly low on ink, printouts will be faded or streaked. As long as print quality is acceptable, there is no reason to replace print cartridges. Low ink warnings are provided for planning purposes only.

   For more information, see Check the estimated ink levels.

3. Make sure you turn off the product by pressing the On button.

   **CAUTION:** Do not turn off the product by turning off a power strip or unplugging the power cord from it. If you improperly turn off the product, the print carriage does not return to the correct position and the print cartridges can dry out.

4. To achieve the best print quality, HP recommends using HP papers that are specifically designed for the type of project you are printing along with genuine HP ink. HP papers and HP ink are specifically designed to work well together to provide high-quality output.

5. Check the product settings to make sure that the print mode and paper selection is correct for the paper and the task.

   For more information, see Set the paper type for printing and Choose papers for printing and copying.

6. If the cartridges are genuine HP and the product is not in backup mode, print a self-test report to determine if the product and ink supplies are operating correctly. This will use one sheet of plain paper and a very small amount of ink.

   For more information, see Print a self-test report.
7. Evaluate the self-test report.
   If the self-test report shows a defect, try the following:
   • Clean the print cartridges automatically. For more information, see Clean the print cartridges.
   • If you are missing lines when you print, clean the electrical contacts. For more information, see Clean the print cartridge contacts.
   • Replace the print cartridge. For more information, see Replace the print cartridges.
   For more information, see Print a self-test report.
8. If the self-test report does not show a problem, investigate other causes, such as the image file or software program.

For additional print cartridge troubleshooting, visit the HP Web site at www.hp.com/support.

This section contains the following topics:
• Wrong, inaccurate, or bleeding colors
• Ink is not filling the text or graphics completely
• The printout has a horizontal band of distortion near the bottom of a borderless print
• Printouts have horizontal streaks or lines
• Printouts are faded or have dull colors
• Printouts seem blurry or fuzzy
• Printouts have vertical streaks
• Printouts are slanted or skewed
• Ink streaks on the back of the paper
• Paper is not picked up from the input tray
• The text edges are jagged

Wrong, inaccurate, or bleeding colors

If your printout has one of the following print quality problems, try the solutions in this section for help.
• Colors look different than what you expected.
  For example, the colors in your graphic or photo look one way on your computer screen but print out differently, or magenta was replaced with cyan in your printout.
• Colors run into each other, or look like they are smeared on the page. The edges might have a feathering appearance instead of being sharp and defined.

Try the following solutions if the colors appear wrong, inaccurate, or bleed into each other.
• Solution 1: HP recommends using genuine HP print cartridges
• Solution 2: Check the paper loaded in the input tray
• Solution 3: Check the paper type
• Solution 4: Check to see if the product is in ink-backup mode
• Solution 5: Check the print settings
• Solution 6: Clean the print cartridges

Solution 1: HP recommends using genuine HP print cartridges

   Solution: Check to see if your print cartridges are genuine HP print cartridges.
HP recommends that you use genuine HP print cartridges. Genuine HP print cartridges are designed and tested with HP printers to help you easily produce great results, time after time.

**NOTE:** HP cannot guarantee the quality or reliability of non-HP supplies. Printer service or repairs required as a result of using a non-HP supply will not be covered under warranty.

If you believe you purchased genuine HP print cartridges, go to: www.hp.com/go/anticounterfeit

**Cause:** Non-HP ink was being used.

If this did not solve the issue, try the next solution.

---

**Solution 2: Check the paper loaded in the input tray**

**Solution:** Make sure the paper is loaded correctly and that it is not wrinkled or too thick.

- Load paper with the side you want to print on facing down. For example, if you are loading glossy photo paper, load the paper with the glossy side down.
- If the paper is too close to the print cartridge during printing, the ink might be smeared. This can happen if the paper is raised, wrinkled, or very thick, such as a mailing envelope. Make sure the paper lays flat in the input tray and is not wrinkled.

For more information, see:

- **Load paper**
- **Information on paper**

**Cause:** The paper was loaded incorrectly, or it was wrinkled or too thick.

If this did not solve the issue, try the next solution.

---

**Solution 3: Check the paper type**

**Solution:** HP recommends that you use HP Premium Papers or any other paper type that is appropriate for the product.

Always make sure the paper you are printing on is flat. For best results when printing images, use HP Premium Plus Photo Paper.

Store photo media in its original packaging inside a resealable plastic bag on a flat surface in a cool, dry place. When you are ready to print, remove only the paper you plan to use immediately. When you have finished printing, return any unused photo paper to the plastic bag. This will prevent the photo paper from curling.

**NOTE:** There is no problem with the ink supplies and replacing the print cartridges is unnecessary.
For more information, see:

- Recommended papers for printing and copying
- Information on paper

**Cause:** The wrong kind of paper was loaded in the input tray.

If this did not solve the issue, try the next solution.

---

**Solution 4: Check to see if the product is in ink-backup mode**

**Solution:** Check to see if the product is printing in ink-backup mode, with only one print cartridge installed.

If the product is in ink-backup mode, text and photo quality will differ from those printed when using both print cartridges.

If you are satisfied with the print quality, continue printing in ink-backup mode. Or, replace the missing print cartridge.

For more information, see:

- Use ink-backup mode
- Replace the print cartridges

**Cause:** A print cartridge was missing and the product was printing in ink-backup mode.

If this did not solve the issue, try the next solution.

---

**Solution 5: Check the print settings**

**Solution:** Check the print settings.

- Check the print settings to see if the color settings are incorrect.
  
  For example, check to see if the document is set to print in grayscale. Or, check to see if advanced color settings such as saturation, brightness, or color tone, are set to modify the appearance of colors.

- Check the print quality setting and make sure it matches the type of paper loaded in the product.
  
  You might need to choose a lower print quality setting, if colors are running into each other. Or, choose a higher setting if you are printing a high-quality photo, and then make sure photo paper such as HP Premium Photo Papers, is loaded in the input tray.

**NOTE:** On some computer screens, colors might appear differently than they do when printed on paper. In this case, there is nothing wrong with the product, print settings, or print cartridges. No further troubleshooting is required.

For more information, see:

- Change the print speed or quality
- Choose papers for printing and copying

**Cause:** The print settings were set incorrectly.
If this did not solve the issue, try the next solution.

Solution 6: Clean the print cartridges

**Solution:** Print a self-test report to determine if there is a problem with the print cartridges. If the self-test report shows a problem, clean the print cartridges. If the problem persists, you might need to replace the print cartridges.

For more information on print cartridges, see [Print cartridge troubleshooting](#).

**Cause:** The print cartridges need to be cleaned.

### Ink is not filling the text or graphics completely

Try the following solutions if the ink is not filling the text or image completely so that it appears that parts are missing or blank.

- **Solution 1:** HP recommends using genuine HP print cartridges
- **Solution 2:** Check the print settings
- **Solution 3:** Check the paper type
- **Solution 4:** Clean the print cartridges

**Solution 1: HP recommends using genuine HP print cartridges**

**Solution:** Check to see if your print cartridges are genuine HP print cartridges.

HP recommends that you use genuine HP print cartridges. Genuine HP print cartridges are designed and tested with HP printers to help you easily produce great results, time after time.

**NOTE:** HP cannot guarantee the quality or reliability of non-HP supplies. Printer service or repairs required as a result of using a non-HP supply will not be covered under warranty.

If you believe you purchased genuine HP print cartridges, go to: [www.hp.com/go/anticounterfeit](http://www.hp.com/go/anticounterfeit)

**Cause:** Non-HP ink was being used.

If this did not solve the issue, try the next solution.

**Solution 2: Check the print settings**

**Solution:** Check the print settings.

- Check the paper type setting to make sure it matches the type of paper loaded in the input tray.
- Check the quality setting. Use a higher quality setting to increase the amount of ink used for printing.
For more information, see:

- Set the paper type for printing
- Change the print speed or quality
- Print using Maximum dpi
- Change copy speed

**Cause:** The paper type or print quality settings were incorrectly.

If this did not solve the issue, try the next solution.

**Solution 3: Check the paper type**

**Solution:** HP recommends that you use HP Premium Papers or any other paper type that is appropriate for the product.

Always make sure the paper you are printing on is flat. For best results when printing images, use HP Premium Plus Photo Paper.

Store photo media in its original packaging inside a resealable plastic bag on a flat surface in a cool, dry place. When you are ready to print, remove only the paper you plan to use immediately. When you have finished printing, return any unused photo paper to the plastic bag. This will prevent the photo paper from curling.

**NOTE:** There is no problem with the ink supplies and replacing the print cartridges is unnecessary.

For more information, see:

- Recommended papers for printing and copying
- Information on paper

**Cause:** The wrong kind of paper was loaded in the input tray.

If this did not solve the issue, try the next solution.

**Solution 4: Clean the print cartridges**

**Solution:** Print a self-test report to determine if there is a problem with the print cartridges. If the self-test report shows a problem, clean the print cartridges. If the problem persists, you might need to replace the print cartridges.

For more information on print cartridges, see **Print cartridge troubleshooting**.

**Cause:** The print cartridges need to be cleaned.

---

**The printout has a horizontal band of distortion near the bottom of a borderless print**

Try the following solutions if your borderless print has a blurry band or line on the bottom of it.
NOTE: There is no problem with the ink supplies and replacing the print cartridges is unnecessary.

- **Solution 1: Check the paper type**
- **Solution 2: Check the print quality setting**
- **Solution 3: Rotate the image**

### Solution 1: Check the paper type

**Solution:** HP recommends that you use HP Premium Papers or any other paper type that is appropriate for the product.

Always make sure the paper you are printing on is flat. For best results when printing images, use HP Premium Plus Photo Paper.

Store photo media in its original packaging inside a resealable plastic bag on a flat surface in a cool, dry place. When you are ready to print, remove only the paper you plan to use immediately. When you have finished printing, return any unused photo paper to the plastic bag. This will prevent the photo paper from curling.

NOTE: There is no problem with the ink supplies and replacing the print cartridges is unnecessary.

For more information, see:
- Recommended papers for printing and copying
- Information on paper

**Cause:** The wrong kind of paper was loaded in the input tray.

If this did not solve the issue, try the next solution.

### Solution 2: Check the print quality setting

**Solution:** Check the quality setting. Use a higher quality setting to increase the amount of ink used for printing.

NOTE: For maximum dpi resolution, go to the Advanced tab, and then select Enabled from the Maximum dpi drop-down list. For more information, see Print using Maximum dpi.

For more information, see:
- Change the print speed or quality
- Print using Maximum dpi
- Change copy speed

**Cause:** The print quality setting was set too low.

If this did not solve the issue, try the next solution.
Solution 3: Rotate the image

**Solution:** If the problem persists, use the software you installed with the product or another software application to rotate your image 180 degrees so that the light blue, gray, or brown hues in your image do not print at the bottom of the page.

For more information, see: [Change the page orientation](#)

**Cause:** The photo image had light blue, gray, or brown hues that print near the bottom of the page.

---

Printouts have horizontal streaks or lines

Try the following solutions if your printout has lines, streaks, or marks on it that run side-to-side across the width of the page.

- **Solution 1: Make sure the paper is loaded correctly**
- **Solution 2: Check the print quality setting**
- **Solution 3: If the print cartridge was dropped, wait for it to recover**
- **Solution 4: Clean the print cartridge nozzles**
- **Solution 5: Clean the print cartridges**

**Solution 1: Make sure the paper is loaded correctly**

**Solution:** Make sure the paper is loaded correctly.

For more information, see: [Load full-size paper](#)

**Cause:** The paper was not feeding properly or was not loaded correctly.

If this did not solve the issue, try the next solution.

---

**Solution 2: Check the print quality setting**

**Solution:** Check the quality setting. Use a higher quality setting to increase the amount of ink used for printing.

![NOTE:](#) For maximum dpi resolution, go to the Advanced tab, and then select Enabled from the Maximum dpi drop-down list. For more information, see [Print using Maximum dpi](#).

For more information, see:

- [Change the print speed or quality](#)
- [Print using Maximum dpi](#)
- [Change copy speed](#)

**Cause:** The print quality setting was set too low.

If this did not solve the issue, try the next solution.
Solution 3: If the print cartridge was dropped, wait for it to recover

Solution: Allow 30 minutes for the print cartridge to recover.

Cause: A tri-color or photo print cartridge was jarred or handled roughly during installation.

If this did not solve the issue, try the next solution.

Solution 4: Clean the print cartridge nozzles

Solution: Check the print cartridges. If it looks as though there are fibers or dust around the ink nozzles, clean the ink nozzle area of the print cartridge.

For more information, see: 
Clean the area around the ink nozzles

Cause: The print cartridge nozzles needed to be cleaned.

If this did not solve the issue, try the next solution.

Solution 5: Clean the print cartridges

Solution: Check the estimated ink levels remaining in the print cartridges.

NOTE: Ink level warnings and indicators provide estimates for planning purposes only. When you receive a low-ink warning message, consider having a replacement cartridge available to avoid possible printing delays. You do not need to replace the print cartridges until print quality becomes unacceptable.

If there is ink remaining in the print cartridges, but you are still noticing a problem, print a self-test report to determine if there is a problem with the print cartridges. If the self-test report shows a problem, clean the print cartridges. If the problem persists, you might need to replace the print cartridges.

For more information, see: 
• Print cartridge troubleshooting
• Print a self-test report

Cause: The print cartridges needed to be cleaned or there was insufficient ink.

Printouts are faded or have dull colors

Try the following solutions if the colors in your printout are not as bright and intense as you expected.

• Solution 1: Check the print settings
• Solution 2: Check the paper type
• Solution 3: If you are making a copy, place a protective sheet on the glass
• Solution 4: Clean the glass
• Solution 5: Clean the print cartridges
Solution 1: Check the print settings

Solution: Check the print settings.

• Check the paper type setting to make sure it matches the type of paper loaded in the input tray.
• Check the quality setting. Use a higher quality setting to increase the amount of ink used for printing.

For more information, see:

• Set the paper type for printing
• Change the print speed or quality
• Print using Maximum dpi
• Change copy speed

Cause: The paper type or print quality settings were set incorrectly.

If this did not solve the issue, try the next solution.

Solution 2: Check the paper type

Solution: HP recommends that you use HP Premium Papers or any other paper type that is appropriate for the product.

Always make sure the paper you are printing on is flat. For best results when printing images, use HP Premium Plus Photo Paper.

Store photo media in its original packaging inside a resealable plastic bag on a flat surface in a cool, dry place. When you are ready to print, remove only the paper you plan to use immediately. When you have finished printing, return any unused photo paper to the plastic bag. This will prevent the photo paper from curling.

NOTE: There is no problem with the ink supplies and replacing the print cartridges is unnecessary.

For more information, see:

• Recommended papers for printing and copying
• Information on paper

Cause: The wrong kind of paper was loaded in the input tray.

If this did not solve the issue, try the next solution.

Solution 3: If you are making a copy, place a protective sheet on the glass

Solution: If you are making a copy, try placing one or more clear plastic sheet protectors directly on the glass, and then place the original print side down on top of the sheet protectors.

Cause: The quality of the original was poor.

If this did not solve the issue, try the next solution.
Solution 4: Clean the glass

**Solution:** Clean the glass and lid backing.

For more information, see:

- Clean the lid backing
- Clean the glass

**Cause:** Debris might be stuck on the glass or on the back of the document lid; this causes poor copy quality and slows down processing.

If this did not solve the issue, try the next solution.

---

Solution 5: Clean the print cartridges

**Solution:** Check the estimated ink levels remaining in the print cartridges.

![NOTE: Ink level warnings and indicators provide estimates for planning purposes only. When you receive a low-ink warning message, consider having a replacement cartridge available to avoid possible printing delays. You do not need to replace the print cartridges until print quality becomes unacceptable.](image)

If there is ink remaining in the print cartridges, but you are still noticing a problem, print a self-test report to determine if there is a problem with the print cartridges. If the self-test report shows a problem, clean the print cartridges. If the problem persists, you might need to replace the print cartridges.

**For more information, see:**

- Print cartridge troubleshooting
- Print a self-test report

**Cause:** The print cartridges needed to be cleaned or there was insufficient ink.

---

Printouts seem blurry or fuzzy

Try the following solutions if your printout is smudged or unclear.

![NOTE: There is no problem with the ink supplies and replacing the print cartridges is unnecessary.](image)

**TIP:** After reviewing the solutions in this section, you can go to HP's support Web site to see if there is additional troubleshooting help. For more information, go to: [www.hp.com/support](http://www.hp.com/support).

- Solution 1: Check the print settings
- Solution 2: Check the resolution of the image
Solution 1: Check the print settings

Solution: Check the print settings.
• Check the paper type setting to make sure it matches the type of paper loaded in the input tray.
• Check the quality setting. Use a higher quality setting to increase the amount of ink used for printing.

For more information, see:
• Set the paper type for printing
• Change the print speed or quality
• Print using Maximum dpi
• Change copy speed

Cause: The paper type or print quality settings were set incorrectly.

If this did not solve the issue, try the next solution.

Solution 2: Check the resolution of the image

Solution: Check the resolution of the image. If you are printing a photo or graphic, and the resolution is too low, it will be blurry or fuzzy when printed.

If a digital photo or rasterized graphic has been resized, it can be blurry or fuzzy when printed.

Cause: The resolution of the image was low.

Printouts have vertical streaks

Refer to this section if your printout has a lines, streaks, or marks on it that run up-and-down or lengthwise down the page.

NOTE: There is no problem with the ink supplies and replacing the print cartridges is unnecessary.

Solution: HP recommends that you use HP Premium Papers or any other paper type that is appropriate for the product.

Always make sure the paper you are printing on is flat. For best results when printing images, use HP Premium Plus Photo Paper.

Store photo media in its original packaging inside a resealable plastic bag on a flat surface in a cool, dry place. When you are ready to print, remove only the paper you plan to use immediately. When you have finished printing, return any unused photo paper to the plastic bag. This will prevent the photo paper from curling.

NOTE: There is no problem with the ink supplies and replacing the print cartridges is unnecessary.

For more information, see:
• Recommended papers for printing and copying
• Information on paper
Printouts are slanted or skewed
Try the following solutions if your printout does not appear straight on the page.

- **Solution 1: Make sure the paper is loaded correctly**
- **Solution 2: Make sure only one type of paper is loaded**
- **Solution 3: Check the rear access door**

**Solution 1: Make sure the paper is loaded correctly**

**Solution:** Make sure the paper is loaded correctly.

For more information, see:

- [Load full-size paper](#)

**Cause:** The paper was not feeding properly or was not loaded correctly.

If this did not solve the issue, try the next solution.

---

**Solution 2: Make sure only one type of paper is loaded**

**Solution:** Load only one type of paper at a time.

**Cause:** More than one type of paper was loaded in the input tray.

If this did not solve the issue, try the next solution.

---

**Solution 3: Check the rear access door**

**Solution:** Make sure the rear access door is securely installed.

**Cause:** The rear access door was not securely installed.

---

Ink streaks on the back of the paper
Try the following solutions if there is smeared ink on the back of your printout.

- **Solution 1: Print on a page of plain paper**
- **Solution 2: Wait while the ink dries**

**Solution 1: Print on a page of plain paper**

**Solution:** Print one or several pages of plain paper to soak up any excess ink in the product.

**To remove excess ink using plain paper**

1. Load several sheets of plain paper in the input tray.
2. Wait five minutes.
3. Print a document with little or no text.
4. Check the back of the paper for ink. If there is still ink on the back of the paper, try printing on another page of plain paper.

**Cause:** Ink accumulated inside the product, where the back of the paper rests during printing.

If this did not solve the issue, try the next solution.

---

**Solution 2: Wait while the ink dries**

**Solution:** Wait at least thirty minutes for the ink inside the product to dry, then try the print job again.

**Cause:** The excess ink in the product needed to dry out.

---

**Paper is not picked up from the input tray**

**Solution:**

Do one of the following:

- If the product is out of paper or there are only a few sheets remaining, load more paper in the input tray.
- If there is paper in the input tray:
  - Remove the stack of paper from the input tray and verify that all the paper in the input tray is the same size and type.
  - Replace any paper that is ripped, dusty, wrinkled, or bent. If the paper is curled, uncurl the paper by gently bending it in the opposite direction of the curl or replace the paper.
  - Tap the stack of paper on a flat surface to align the edges.
  - Verify that the stack of paper contains between 10 and 25 sheets of paper.
  - Reload the paper into the input tray.

Follow the prompts on the display to continue.

**Cause:** There was not enough paper in the input tray.

---

**The text edges are jagged**

Try the following solutions if the text in your printouts is not sharp and the edges are rough.

**NOTE:** There is no problem with the ink supplies and replacing the print cartridges is unnecessary.

**Solution:** Use TrueType or OpenType fonts to ensure that the product is able to print smooth fonts. When selecting a font, look for the TrueType or OpenType icon.

Some software applications offer custom fonts that have jagged edges when enlarged or printed. Also, if you want to print bitmapped text, it might have jagged edges when enlarged or printed.
Cause: The font was a custom size.

Print troubleshooting

Use this section to solve these printing problems:

- Envelopes print incorrectly
- Borderless printing produces unexpected results
- The product is not responding
- The product prints meaningless characters
- Nothing happens when I try to print
- The pages in my document came out in the wrong order
- The margins are not printing as expected
- Text or graphics are cut off at the edge of the page
- A blank page came out while printing
- Ink is spraying the inside of the HP All-in-One when I print a photo

Envelopes print incorrectly

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

- Solution 1: Reload the envelopes in the input tray
- Solution 2: Load a different type of envelope

Solution 1: Reload the envelopes in the input tray

Solution: Remove all paper from the input tray. Load a stack of envelopes in the input tray, with the envelope flaps facing up and on the left.

NOTE: To avoid paper jams, tuck the flaps inside the envelopes.

Cause: A stack of envelopes was loaded incorrectly.

If this did not solve the issue, try the next solution.

Solution 2: Load a different type of envelope

Solution: Do not use shiny or embossed envelopes or envelopes that have clasps or windows.
Cause: The wrong type of envelope was loaded.

Borderless printing produces unexpected results
Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

• Solution 1: Print from the HP Photosmart Software
• Solution 2: Use the appropriate media

Solution 1: Print from the HP Photosmart Software
Solution: Try printing the image from the photo imaging software that came with the product.
Cause: Printing a borderless image from a non-HP software application produced unexpected results.
If this did not solve the issue, try the next solution.

Solution 2: Use the appropriate media
Solution: To print a borderless image, use 10 x 15 cm (4 x 6 inch) HP Premium Plus Photo Papers with a tear-off tab. When you remove the tear-off tab, the printed image is borderless and extends to the edges of the paper.
For more information, see:
Print a borderless image
Cause: Use of inappropriate media.

The product is not responding
Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

• Solution 1: Wait for the product to finish other tasks
• Solution 2: Check for a paper jam
• Solution 3: Load more paper in the input tray
• Solution 4: Check for a print carriage stall
• Solution 5: Check the cable connections to the product
• Solution 6: Make sure that the product is turned on
• Solution 7: Restart the product
• Solution 8: Check the print driver status
• Solution 9: Check the print queue for canceled jobs
Solution 1: Wait for the product to finish other tasks

**Solution:** If the product is performing another task such as copying or scanning, your print job will be delayed until the product completes the current task.

Some documents take a long time to print. If nothing has printed several minutes after you sent a print job to the product, check your computer to see if there are any messages.

**Cause:** The product was busy with another task.

If this did not solve the issue, try the next solution.

---

Solution 2: Check for a paper jam

**Solution:** Clear the paper jam.

For more information, see:

[Clear paper jams](#)

**Cause:** The product had a paper jam.

If this did not solve the issue, try the next solution.

---

Solution 3: Load more paper in the input tray

**Solution:** Load paper in the input tray.

For more information, see:

[Load full-size paper](#)

**Cause:** The product was out of paper.

If this did not solve the issue, try the next solution.

---

Solution 4: Check for a print carriage stall

**Solution:** Turn off the product, open the print cartridge door, and remove any objects that are blocking the print carriage (including any packing materials), and then turn on the product.

For more information, see:

[The print carriage is stalled](#)
**Cause:** The print carriage has stalled.
If this did not solve the issue, try the next solution.

---

**Solution 5: Check the cable connections to the product**

**Solution:** If the product is not properly connected to the computer, communication errors can occur. Try the following:

If the connections are secure, and nothing has printed several minutes after you sent a print job to the product, check the status of the product. In the HP Photosmart Software, click **Settings**, and then click **Status**.

For more information, see:
- [After setting up the product, it does not print](#)

**Cause:** The computer was not communicating with the product.
If this did not solve the issue, try the next solution.

---

**Solution 6: Make sure that the product is turned on**

**Solution:** Look at the **On** button located on the product. If it is not lit, the product is turned off. Make sure the power cord is firmly connected to the product and plugged into a power outlet. Press the **On** button to turn on the product.

**Cause:** The product was turned off.
If this did not solve the issue, try the next solution.

---

**Solution 7: Restart the product**

**Solution:** Turn off the product, and then unplug the power cord. Plug the power cord back in, and then press the **On** button to turn on the product.
Cause: The product experienced an error. If this did not solve the issue, try the next solution.

Solution 8: Check the print driver status

Solution: The printer driver status might have changed to either offline or stop printing.

To check the printer driver status
1. In the HP Solution Center, click the Settings tab.
2. Click Status. If the status is Offline or Stop printing, change the status to Ready.

Cause: The status of the printer driver has changed. If this did not solve the issue, try the next solution.

Solution 9: Check the print queue for canceled jobs

Solution: A print job might remain in the queue after it has been cancelled. The cancelled print job jams the queue and prevents the next print job from printing.

From your computer, open the printer folder and see if the cancelled job remains in the print queue. Try to delete the job from the queue. If the print job remains in the queue, try one or both of the following:
   • Disconnect the USB cable from the product, restart the computer, and then reconnect the USB cable to the product.
   • Shut down the product, restart the computer, and then restart the product.

Cause: A deleted print job was still in the queue.

The product prints meaningless characters

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

• Solution 1: Restart the product and your computer
• Solution 2: Try printing another document

Solution 1: Restart the product and your computer

Solution: Turn off the product and your computer for 60 seconds, then turn them both on and try printing again.

Cause: The memory in the product was full. If this did not solve the issue, try the next solution.
Solution 2: Try printing another document

**Solution:** Try printing another document from the same software application. If this works, then try printing a previously saved version of the document that is not corrupt.

**Cause:** The document was corrupt.

Nothing happens when I try to print

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

- **Solution 1: Make sure that the product is turned on**
  
  **Solution:** Look at the On button located on the product. If it is not lit, the product is turned off. Make sure the power cord is firmly connected to the product and plugged into a power outlet. Press the On button to turn on the product.

  **Cause:** The product was turned off.

  If this did not solve the issue, try the next solution.

- **Solution 2: Wait for the product to finish other tasks**
  
  **Solution:** If the product is performing another task such as copying or scanning, your print job will be delayed until the product completes the current task.

  Some documents take a long time to print. If nothing has printed several minutes after you sent a print job to the product, check the product display to see if there are any messages.

  **Cause:** The product was busy with another task.

  If this did not solve the issue, try the next solution.

- **Solution 3: Make sure that the product is the selected printer**
  
  **Solution:** Make sure the product is the selected printer in your software application.

  **TIP:** You can set the product as the default printer to ensure that the printer is automatically selected when you select Print in the File menu of your different software applications.

  **Cause:** The product was not the selected printer.
If this did not solve the issue, try the next solution.

Solution 4: Check the cable connections to the product

Solution: If the product is not properly connected to the computer, communication errors can occur.

If the connections are secure, and nothing has printed several minutes after you sent a print job to the product, check the status of the product. In the HP Photosmart Software, click Settings, and then click Status.

For more information, see:

After setting up the product, it does not print

Cause: The computer was not communicating with the product.

If this did not solve the issue, try the next solution.

Solution 5: Load more paper in the input tray

Solution: Load paper in the input tray.

For more information, see:

Load full-size paper

Cause: The product was out of paper.

If this did not solve the issue, try the next solution.
Solution 6: Check for a paper jam

**Solution:** Clear the paper jam.
For more information, see:
[Clear paper jams](#)

**Cause:** The product had a paper jam.
If this did not solve the issue, try the next solution.

---

Solution 7: Check for a print carriage stall

**Solution:** Turn off the product, open the print cartridge door, and remove any objects that are blocking the print carriage (including any packing materials), and then turn on the product.

For more information, see:
[The print carriage is stalled](#)

**Cause:** The print carriage has stalled.

---

The pages in my document came out in the wrong order

**Solution:** Print the document in reverse order. When the document finishes printing, the pages will be in correct order.
For more information, see:
[Print a multiple-page document in reverse order](#)

**Cause:** The print settings were set to print the first page of your document first. Because of the way the paper feeds through the product, this means the first page will be print side up at the bottom of the stack.

---

The margins are not printing as expected

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

- **Solution 1:** Set the correct margins in your software application
- **Solution 2:** Make sure that the paper size setting is correct
• Solution 3: Check the paper guide position
• Solution 4: Make sure the stack of envelopes is loaded correctly

Solution 1: Set the correct margins in your software application

Solution: Check the printer margins.

Make sure the margin settings for the document do not exceed the printable area of the product.

To check your margin settings
1. Preview your print job before sending it to the product.
   In most software applications, click the File menu, and then click Print Preview.
2. Check the margins.
   The product uses the margins you have set in your software application, as long as they are greater than the minimum margins the product supports. For more information about setting margins in your software application, see the documentation that came with the software.
3. Cancel the print job if the margins are not satisfactory, and then adjust the margins in your software application.

Cause: The margins were not set correctly in your software application.

If this did not solve the issue, try the next solution.

Solution 2: Make sure that the paper size setting is correct

Solution: Verify that you have selected the proper paper size setting for your project. Make sure that you have loaded the correct paper size in the input tray.

For example, in some countries/regions you may need to specify A4 as the paper size if A (letter) is the default value.

For more information, see:
Set the paper type for printing

Cause: The paper size setting was not set correctly for the project you were printing.

If this did not solve the issue, try the next solution.

Solution 3: Check the paper guide position

Solution: Remove the stack of paper from the input tray, and then reload the paper.

Make sure that you slide the paper-width guide to the right until it stops at the edge of the paper.

For more information, see:
Load paper

Cause: The paper guides are not positioned correctly.

If this did not solve the issue, try the next solution.
Solution 4: Make sure the stack of envelopes is loaded correctly

**Solution:** Remove all paper from the input tray. Load a stack of envelopes in the input tray, with the envelope flaps facing up and on the left.

**NOTE:** To avoid paper jams, tuck the flaps inside the envelopes.

For more information, see:
Load envelopes

**Cause:** A stack of envelopes was loaded incorrectly.

---

Text or graphics are cut off at the edge of the page

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

- **Solution 1: Check the margins in your software application**
- **Solution 2: Make sure the document can fit on a supported paper size**
- **Solution 3: Remove and reload the paper in the input tray**

**Solution 1: Check the margins in your software application**

**Solution:** Make sure the margin settings for the document do not exceed the printable area of the product.

**To check your margin settings**

1. Preview your print job before sending it to the product.
   In most software applications, click the **File** menu, and then click **Print Preview**.
2. Check the margins.
   The product uses the margins you have set in your software application, as long as they are greater than the minimum margins the product supports. For more information about setting margins in your software application, see the documentation that came with the software.
3. Cancel the print job if the margins are not satisfactory, and then adjust the margins in your software application.

**Cause:** The margins are not set correctly in your software application.

If this did not solve the issue, try the next solution.
**Solution 2: Make sure the document can fit on a supported paper size**

**Solution:** Make sure the layout of the document you are trying to print fits on a paper size supported by the product.

**To preview the print layout**
1. Load the correct paper size into the input tray.
2. Preview your print job before sending it to the product.
   - In most software applications, click the **File** menu, and then click **Print Preview**.
3. Check the graphics in the document to make sure that the current size fits within the printable area of the product.
4. Cancel the print job if the graphics do not fit in the printable area of the page.

**TIP:** Some software applications allow you to scale the document to fit the paper size currently selected. Additionally, you can scale the size of a document from the print **Properties** dialog box.

**Cause:** The size of the document you are printing is larger than the paper loaded in the input tray.

If this did not solve the issue, try the next solution.

---

**Solution 3: Remove and reload the paper in the input tray**

**Solution:** If the paper is misfeeding, it could cause parts of the document to cut off.

Remove the stack of paper from the input tray, and then reload the paper. Make sure that you slide the paper-width guide inward until it stops at the edge of the paper.

For more information, see:
- **Load full-size paper**

**Cause:** The paper is loaded incorrectly.

---

**A blank page came out while printing**

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

- **Solution 1: Check the ink levels in the print cartridges**
- **Solution 2: Check for blank pages at the end of the document**
- **Solution 3: Load more paper in the input tray**
- **Solution 4: Check the print cartridges for protective tape**

**Solution 1: Check the ink levels in the print cartridges**

**Solution:** Check the estimated ink levels remaining in the print cartridges.
NOTE: Ink level warnings and indicators provide estimates for planning purposes only. When you receive a low-ink warning message, consider having a replacement cartridge available to avoid possible printing delays. You do not need to replace the print cartridges until print quality becomes unacceptable.

If there is ink remaining in the print cartridges, but you are still noticing a problem, print a self-test report to determine if there is a problem with the print cartridges. If the self-test report shows a problem, clean the print cartridges. If the problem persists, you might need to replace the print cartridges.

For more information on print cartridges, see Print cartridge troubleshooting.

**Cause:** If you are printing black text, and a blank page comes out of the product, the black print cartridge might be empty.

If this did not solve the issue, try the next solution.

---

**Solution 2: Check for blank pages at the end of the document**

**Solution:** Open the document file in your software application and remove any extra pages or lines at the end of the document.

**Cause:** The document you are printing contains an additional blank page.

If this did not solve the issue, try the next solution.

---

**Solution 3: Load more paper in the input tray**

**Solution:** If the product has only a few sheets remaining, load more paper in the input tray. If there is plenty of paper in the input tray, remove the paper, tap the stack of paper against a flat surface, and reload the paper into the input tray.

For more information, see:

Load full-size paper

**Cause:** The product picked up two sheets of paper.

If this did not solve the issue, try the next solution.

---

**Solution 4: Check the print cartridges for protective tape**

**Solution:** Check each print cartridge. The tape might have been removed from the copper-colored contacts, but still might cover the ink nozzles. If the tape is still
covering the ink nozzles, carefully remove the tape from the print cartridges. Do not touch the ink nozzles or the copper-colored contacts.

For more information, see:
Replace the print cartridges

Cause: The protective plastic tape was only partially removed from the print cartridge.

Ink is spraying the inside of the HP All-in-One when I print a photo

Solution: Make sure you load photo paper in the input tray before you print a borderless print job.

Cause: The borderless print settings require photo paper to be loaded in the input tray. You are using the wrong paper type.

Copy troubleshooting

Use this section to solve these copy problems:

• Nothing happens when I try to copy
• Parts of the original do not appear or are cut off
• The printout appears enlarged on the page
• The printout is blank
• A borderless copy has white space around the edges
Nothing happens when I try to copy

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

- **Solution 1:** Make sure that the product is turned on
- **Solution 2:** Make sure that the original is placed correctly on the glass
- **Solution 3:** Wait for the product to finish other tasks
- **Solution 4:** Make sure the paper loaded is recognized by the product
- **Solution 5:** Check for a paper jam

**Solution 1: Make sure that the product is turned on**

**Solution:** Look at the On button located on the product. If it is not lit, the product is turned off. Make sure the power cord is firmly connected to the product and plugged into a power outlet. Press the On button to turn on the product.

**Cause:** The product was turned off.

If this did not solve the issue, try the next solution.

**Solution 2: Make sure that the original is placed correctly on the glass**

**Solution:** Place your original with the side you want to copy or scan face down on the left front corner of the glass.

**Cause:** The original was placed incorrectly on the glass.

If this did not solve the issue, try the next solution.

**Solution 3: Wait for the product to finish other tasks**

**Solution:** Check the On light. If it is blinking, the product is busy.

If the product is performing another task such as printing or scanning, your copy job will be delayed until the product completes the current task.

**Cause:** The product was busy with another task.
If this did not solve the issue, try the next solution.

Solution 4: Make sure the paper loaded is recognized by the product

Solution: Do not use the product to copy onto envelopes or other papers the product does not support.

Related topics
Recommended papers for printing and copying
Cause: The product did not recognize the inserted paper type.
If this did not solve the issue, try the next solution.

Solution 5: Check for a paper jam

Solution: Clear the paper jam.
For more information, see:
Clear paper jams
Cause: The product had a paper jam.

Parts of the original do not appear or are cut off

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

• Solution 1: Place the original correctly on the glass
• Solution 2: Clean the scanner glass

Solution 1: Place the original correctly on the glass

Solution: Place your original with the side you want to copy or scan face down on the left front corner of the glass.

Cause: The original was placed incorrectly on the glass.
If this did not solve the issue, try the next solution.

Solution 2: Clean the scanner glass
Solution: Clean the scanner glass and make sure that there are no foreign materials adhering to it.
For more information, see Clean the glass.
Cause: The scanner glass was dirty, causing the product to include an area in the copy that was larger than the document.

The printout appears enlarged on the page
Solution: Ensure that your Copy settings are chosen correctly. If the problem persists, debris might be stuck on the glass or on the back of the document lid. This can cause the product to detect only a portion of the image. Turn off the product, unplug the power cord, and use a soft cloth to wipe the glass and the back of the document lid.
For more information, see:
- Clean the lid backing
- Clean the glass
Cause: The product detected only a portion of the image due to dust or debris on the glass.

The printout is blank
Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.
- Solution 1: Place the original correctly on the glass
- Solution 2: Check the ink levels in the print cartridges

Solution 1: Place the original correctly on the glass
Solution: Place your original with the side you want to copy or scan face down on the left front corner of the glass.
Cause: The original was placed incorrectly on the glass.
If this did not solve the issue, try the next solution.

---

Solution 2: Check the ink levels in the print cartridges

Solution: Check the estimated ink levels remaining in the print cartridges.

NOTE: Ink level warnings and indicators provide estimates for planning purposes only. When you receive a low-ink warning message, consider having a replacement cartridge available to avoid possible printing delays. You do not need to replace the print cartridges until print quality becomes unacceptable.

If there is ink remaining in the print cartridges, but you are still noticing a problem, print a self-test report to determine if there is a problem with the print cartridges. If the self-test report shows a problem, clean the print cartridges. If the problem persists, you might need to replace the print cartridges.

For more information on print cartridges, see Print cartridge troubleshooting.

Cause: The print cartridges needed to be cleaned or there was insufficient ink.

---

A borderless copy has white space around the edges

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

- Solution 1: Resize the image
- Solution 2: Use photo paper

Solution 1: Resize the image

Solution: When you make a borderless copy of a very small original, the product enlarges the original up to a maximum percentage. This might leave white space around the edges. (The maximum percentage varies by model.)

Depending on the size of the borderless copy you are trying to make, the minimum size of the original varies. For example, you cannot enlarge a passport photo to create a letter-size borderless copy.

If you want to make a borderless copy of a very small original, scan the original into the computer, resize the image, and then print a borderless copy of the enlarged image.

Cause: You were trying to make a borderless copy of a very small original.
If this did not solve the issue, try the next solution.

---

Solution 2: Use photo paper

Solution: Use photo paper with a tear-off tab to make borderless copies.
Cause: You were trying to make a borderless copy without using photo paper.

Scan troubleshooting

Use this section to solve these scan problems:

- **Scan halts**
- **Scan fails**
- **Scanned image is blank**
- **Scanned image is incorrectly cropped**
- **Scanned image has incorrect page layout**
- **Text format is incorrect**
- **Scanned image shows dotted lines instead of text**
- **Text is incorrect or missing**

**Scan halts**

**Solution:** Turn off the computer and then turn it back on.

If this does not work, try changing the scan to a lower resolution in the software.

**Cause:** The computer system resources may have been low.

**Scan fails**

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

- **Solution 1: Make sure your computer is turned on**
- **Solution 2: Make sure your computer is connected to the product by a USB cable**
- **Solution 3: Make sure the HP Photosmart Software is installed on your computer**
- **Solution 4: Make sure the HP Photosmart Software is running on your computer**
- **Solution 5: Make sure you have sufficient computer memory**

**Solution 1: Make sure your computer is turned on**

**Solution:** Turn on your computer.

**Cause:** The computer was not turned on.

If this did not solve the issue, try the next solution.

**Solution 2: Make sure your computer is connected to the product by a USB cable**

**Solution:** Connect your computer to the product with a standard USB cable.

For more information, see the Setup Guide.

**Cause:** Your computer was not connected to the product by a USB cable.
If this did not solve the issue, try the next solution.

---

**Solution 3: Make sure the HP Photosmart Software is installed on your computer**

**Solution:** Insert the product installation CD and install the software.
For more information, see the Setup Guide.

**Cause:** The HP Photosmart Software was not installed on your computer.
If this did not solve the issue, try the next solution.

---

**Solution 4: Make sure the HP Photosmart Software is running on your computer**

**Solution:** Open the software you installed with the product and try scanning again.

**NOTE:** To check to see whether the software is running, right-click on the **HP Digital Imaging Monitor** icon in the system tray at the far right of the Windows taskbar. Pick a device in the list, and then click **Display Status**.

---

**Cause:** The HP Photosmart Software was not running on your computer.
If this did not solve the issue, try the next solution.

---

**Solution 5: Make sure you have sufficient computer memory**

**Solution:** Close all applications that are not in use. This includes applications that run in the background, such as screen savers and virus checkers. If you turn off your virus checker, remember to turn it back on after you finish your scan.
If this problem occurs frequently, or if you encounter memory problems while using other applications, you might need to add more memory to your computer. See the user guide that came with your computer for more information.

**Cause:** Too many applications were running on your computer. These applications occupied your computer memory.

---

**Scanned image is blank**

**Solution:** Load your original print side down on the right front corner of the glass.

**Cause:** The original was placed incorrectly on the glass.

---

**Scanned image is incorrectly cropped**

**Solution:** The autocropping feature in the software crops anything that is not part of the main image. Sometimes this might not be what you want. In that case, turn off autocropping in the software and crop the scanned image manually, or not at all.

**Cause:** The software was set to automatically crop scanned pictures.

---

**Scanned image has incorrect page layout**

**Solution:** Turn off autocropping in the software to retain the page layout.

**Cause:** The automatic cropping feature in the software was changing the page layout.

---

**Text format is incorrect**

**Solution:** Some applications cannot handle framed text formatting. Framed text is one of the scan document settings in the software. It maintains complex layouts, such as multiple columns from a newsletter, by putting the text in different frames (boxes) in the destination application. In the software, select the correct format so that the scanned text layout and formatting are retained.

**Cause:** The scan document settings were incorrect.
Scanned image shows dotted lines instead of text

**Solution:** Make a black-and-white copy of the original and then scan the copy.

**Cause:** If you used the **Text** image type to scan text that you plan to edit, the scanner might not recognize color text. The **Text** image type scans at 300 x 300 dpi, in black and white.

If you are scanning an original that has graphics or artwork surrounding the text, the scanner might not recognize the text.

---

Text is incorrect or missing

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

- **Solution 1:** Make sure that the brightness is set appropriately in the software
- **Solution 2:** Make sure that the glass and the back of the document lid are clean
- **Solution 3:** Make sure that the scan document settings are set to the correct optical character recognition (OCR) language

**Solution 1: Make sure that the brightness is set appropriately in the software**

**Solution:** Adjust the brightness in the software, and then rescan the original.

**To adjust the brightness**

1. In the **HP Scanning** window, click **Lighten/Darken** in the **Basic** menu or the **Tools** panel.
2. Adjust the brightness indicators.

**Cause:** The brightness was not set correctly in the software.

If this did not solve the issue, try the next solution.

---

**Solution 2: Make sure that the glass and the back of the document lid are clean**

**Solution:** Turn off the product, unplug the power cord, and use a soft cloth to wipe the glass and the back of the document lid.

For more information, see:

- [Clean the lid backing](#)
- [Clean the glass](#)

**Cause:** The glass and the back of the document lid were not clean.

If this did not solve the issue, try the next solution.

---

**Solution 3: Make sure that the scan document settings are set to the correct optical character recognition (OCR) language**

**Solution:** Select the correct OCR language in the software.
NOTE: If you are using the HP Photosmart Software, the Optical Character Recognition (OCR) software might not be installed on your computer. To install the OCR software, you must re-insert the software disk and select OCR under the Custom installation options.

See the documentation that came with Readiris, or whichever OCR software you use, for information on how to select the OCR language.

Cause: The scan document settings were not set to the correct optical character recognition (OCR) language.

The OCR language tells the software how to interpret the characters it sees in the original image. If the OCR language does not match the language in the original, the scanned text might be incomprehensible.

Errors

If the product has an error, the lights on the product might flash, or an error message might appear on your computer screen.

This section contains the following topics:

- Flashing lights
- Product messages
- File messages
- General user messages
- Paper messages
- Power and connection messages
- Print cartridge messages

Flashing lights

The lights on the HP All-in-One flash in special sequences to inform you about various error conditions. Refer to the following table for information on solving your error condition based on which lights are on or blinking on the HP All-in-One.

<table>
<thead>
<tr>
<th>On light</th>

</table>

**Product messages**

The following is a list of product-related error messages:

- **Door open**
- **Firmware revision mismatch**
- **Mechanism error**
- **Memory is full**
• Scan errors
• Unable to print
• Product might not be correctly installed
• Product was not found
• Product could not find available scan destinations
• Required software component was not found or was incorrectly installed
• Error occurred while communicating with the product

Door open

Solution: Close the print cartridge door.

Cause: The print cartridge door was open.

Firmware revision mismatch

Solution: To find support and warranty information, go to the HP Web site at www.hp.com/support. If prompted, choose your country/region, and then click Contact HP for information on calling for technical support.

Cause: The revision number of the product firmware does not match the revision number of the software.

Mechanism error

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

• Solution 1: Check for a paper jam
• Solution 2: Make sure the print carriage is not blocked

Solution 1: Check for a paper jam

Solution: Clear the paper jam.

For more information, see: Clear paper jams

Cause: The product had a paper jam.

If this did not solve the issue, try the next solution.
Solution 2: Make sure the print carriage is not blocked

Solution: Turn off the product, open the print cartridge door, and remove any objects that are blocking the print carriage (including any packing materials), and then turn on the product.

For more information, see:

The print carriage is stalled

Cause: The print carriage was blocked.

Memory is full

Solution: Try making fewer copies at a time.

Cause: The document you are copying has exceeded the memory of the product.

Scan errors

Review this section if you receive an error such as one of the following:

• An error occurred communicating with the scanning device. Please ensure that the scanning device is connected properly and try again.
• The scanning device could not be initialized.
• The scanning device could not be found.
• An internal error has occurred.
• The computer cannot communicate with the scanning device.

NOTE: Before starting to troubleshoot, make a copy to verify that the hardware is functioning correctly. If you cannot make a copy, see Hardware setup troubleshooting for more troubleshooting information.

Try each of the following solutions separately. After completing the steps for each solution, try to scan again. If the product still does not work, then go to the next solution.

• Solution 1: Uninstall and reinstall the software
• Solution 2: Refresh the Windows Device Manager
• Solution 3: Check the Digital Imaging Monitor
• Solution 4: Check the status of the product
• Solution 5: Check the power supply
• Solution 6: Check the USB cable connection
Solution 1: Uninstall and reinstall the software

Solution: Verify that the software was installed correctly. Open the HP Solution Center and verify that all the icons and buttons are present.

If the appropriate icons and buttons for your product (such as Make Copies) do not appear, your installation might not be complete, and you might need to uninstall and then reinstall the software. Do not simply delete the application files from your hard drive. Make sure to remove them properly using the uninstall utility provided with the software.

To uninstall from a Windows computer

NOTE: Use this method if Uninstall is not available in the Windows Start menu (click Programs or All Programs, HP, Deskjet F2200 All-In-One series, Uninstall).

1. Open the Windows control panel and double-click Add or Remove Programs.

   NOTE: The procedure to open the control panel varies by operating system. If you are not sure how to do this, see the Windows Help.

2. Select HP Deskjet All-In-One Driver Software, and then click Change/Remove.
   Follow the onscreen instructions.
3. Disconnect the product from your computer.
4. Restart your computer.

   NOTE: It is important that you disconnect the product before restarting your computer. Do not connect the product to your computer until after you have reinstalled the software.

5. Insert the product CD-ROM into your computer’s CD-ROM drive and then start the Setup program.
6. Follow the onscreen instructions and the instructions provided in the Setup Guide that came with the product.

   After you have reinstalled the software, try to scan again.

Cause: The software installation was not complete.

If this did not solve the issue, try the next solution.
Solution 2: Refresh the Windows Device Manager

Solution: Refresh the Windows Device Manager.

To refresh the Windows Device Manager
1. On the Windows taskbar, click Start, right-click My Computer, and then click Properties.
2. Click the Hardware tab, and then click Device Manager.
4. Click USB Composite Device, click Action, and then click Uninstall.
   If a screen appears to confirm the deletion, confirm the deletion.
5. Disconnect the USB cable from the product.
6. Wait a few seconds, and then reconnect the cable.
   This should restart the Windows device detection (Plug and Play). A New Hardware found screen might appear.
7. Click Next through all of the screens that appear in the Wizard to install the USB Composite Device.
8. Click Finish to finish the installation.
9. Try to scan again.
10. If these steps do not resolve the problem, try using a different USB cable to connect the product to the computer.

Cause: Communication problems between the product and the USB controller caused this error to occur. This might be caused by an incomplete installation, a USB cable longer than 3 meters (9.8 feet) in length, or a defective USB cable.

If this did not solve the issue, try the next solution.
Solution 3: Check the Digital Imaging Monitor

Solution: Verify that the Digital Imaging Monitor is running.

To check that the Digital Imaging Monitor is running
1. Look for the Digital Imaging Monitor icon in the system tray at the lower right side of the screen, near the time.

2. If the Digital Imaging Monitor icon is not present, restart the computer.
3. After the computer restarts, try to scan again.

Cause: The Digital Imaging Monitor was not running.
If this did not solve the issue, try the next solution.

Solution 4: Check the status of the product

Solution: Check the status of the product in the HP Solution Center.

To check the status of the product
1. On the Windows taskbar, click Start, Programs or All Programs, HP, HP Solution Center.
2. Verify that the product is listed in the Select Device area or that the appropriate tab is selected.
3. Click Status.
   If the product is working properly, a message appears indicating your product is ready.
4. If you receive a Disconnected error message, then check whether there is another instance or another tab for the product with a copy number included, such as HP Deskjet F2200 All-in-One series 2.
5. Select the second instance of the product and repeat steps 2 through 4.
6. Try to scan again.

**Cause:** There might have been two instances of the product connected to the HP Solution Center.

If this did not solve the issue, try the next solution.

---

**Solution 5: Check the power supply**

**Solution:** Check the power supply.

**To check the power supply**

1. Make sure the power cord is firmly connected to both the product and the power adaptor. Plug the power cord into a power outlet, surge protector, or power strip.

2. Make sure the product is turned on.
3. If the product is not receiving electrical power, connect it to another power outlet.
4. Turn off the product and reset it by disconnecting the power cord.
5. Wait 5 seconds, and plug in the power cord.
6. Turn on the product.
7. Try to scan again.

**Cause:** The product was not properly connected to a power supply or needed to be reset.

If this did not solve the issue, try the next solution.
Solution 6: Check the USB cable connection

Solution: Check USB connection between the product and the computer.

To check the USB connection

1. Verify that the USB cable is securely plugged into the USB port on the back of the product.
2. Make sure the other end of the USB cable is plugged into a USB port on your computer.

3. Try to scan again. If the scan fails, continue to the next step.
4. Do one of the following, depending upon how the product is connected to the computer:
   • If the USB cable is connected to a USB hub, try unplugging and replugging the USB cable into the hub. If that does not work, try turning off the hub and then turning it on again. Finally, try disconnecting the cable from the hub and connecting it directly to the computer.
   • If the USB cable is connected to a docking station for a laptop, disconnect the cable from the docking station and connect it directly to the computer.
   • If the USB cable is directly connected to the computer, try plugging it into another USB port on the computer.
5. If there are other USB devices connected to the computer, disconnect the other devices, except for the keyboard and the mouse.
6. Check the USB cable to make sure it is functioning properly.

NOTE: If you are using an older cable, it might not be working properly. Try connecting it to another product to see if the USB cable works. If you experience problems, the USB cable might need to be replaced. Also verify that the cable does not exceed 3 meters (9.8 feet) in length.
7. If another USB cable is available, try using that one instead.
8. Restart the computer.
9. After the computer restarts, try to scan again.

**Cause:** The product was not properly connected to the computer.
If this did not solve the issue, try the next solution.

---

**Solution 7: Scan with Windows Image Acquisition (WIA)**

**Solution:** Try scanning with Windows Image Acquisition (WIA) instead of the HP Solution Center.

**To scan using WIA**

1. Make sure the product is turned on.
2. Verify that the USB cable is securely plugged into the USB port on the back of the product.
   The USB icon on the cable faces up when the cable is properly connected.
3. Make sure the other end of the USB cable is plugged into a USB port on your computer.
4. On the Windows taskbar, click **Start**, click **Programs** or **All Programs**, and then click **Accessories**.
5. Click **Imaging**.
6. From the Imaging application, click **File** and then click **Select Device**.
7. Select the product from the TWAIN source list.
8. Click **File**, and then click **Scan New**.
   Imaging for Windows will scan from the product using TWAIN software instead of the HP Solution Center.

**Cause:** If you could scan using WIA, this indicates that there was a problem with the HP Solution Center. You can continue to use WIA to scan, or try the next solution.
If you could not scan using WIA, try the next solution.

Solution 8: Disable the Lexbces service

**Solution:** Check if the Lexbces service is started, and disable it.

If a Lexmark or Dell all-in-one device is connected with a USB cable to a computer where product is installed, the HP software might not scan because the Lexbces service is running.

**NOTE:** This solution only applies if you have a Lexmark or Dell all-in-one. If you do not, try the next solution.

To check for and disable the service
1. Log into Windows as an Administrator.
2. Press the **Ctrl** + **Alt** + **Delete** to open the **Task Manager**.
3. Click the **Processes** tab.
4. If the Lexbceserver service is listed in the **Image Name** list, disable it.

To disable the service
a. On the Windows taskbar, click **Start**, right-click **My Computer**, and then click **Manage**.
   The **Computer Management** appears.
b. Double-click **Services and Applications**, and then double-click **Services**.
c. In the right pane, right-click **Lexbceserver**, and then click **Properties**.
d. On the **General tab**, in the **Service status** area, click **Stop**.
e. From the **Startup type** drop-down menu, select **Disabled**, and then click **OK**.
f. Click **OK** to close the dialog box.
5. Back up the Registry.

To back up the Registry
a. On the Windows taskbar, click **Start**.
b. Depending on your operating system, do one of the following:
   - Windows Vista: In **Start Search**, type `regedit`, and then press **Enter**. When the User Account Control dialog box appears, click **Continue**.
   - Windows XP: Click **Run**. When the **Run** dialog box appears, type `regedit`, and then press **Enter**.
   - Windows 2000: Click **Registry**, and then click **Export Registry**
   The **Registry Editor** appears.
c. In the **Registry Editor**, select **My Computer**.
d. With **My Computer** highlighted, click **File**, and then click **Export**.
e. Browse to a storage location that is easy for you to remember; for example: **My Documents** or **Desktop**.
f. In the **Export Range** area, select **All**.
g. Enter a filename for the backed up Registry. HP suggests naming the file with the current date; for example: Registry Backup 04_01_07.

h. Click **Save** to save the Registry.

6. Edit the registry.

**To edit the Registry**

a. Select the `HKEY_LOCAL_MACHINE\System\CurrentControlSet\Services\Spooler` Registry key.
Details of the Registry key appears on the pane to the right.

b. Check the **DependOnService** data string (in the pane on the right) to see if `lexbces` is listed in the **Data** column.

c. If the **Data** column contains `lexbces`, right-click **DependOnService** and select **Modify**.

Do one of the following:

- If you see only `lexbces`, but not **RPCSS**, delete `lexbces` and enter **RPCSS**.
- If you see both `lexbces` and **RPCSS**, delete only `lexbces` and keep **RPCSS**.

d. Click **OK**.

7. Restart the computer, and then try to scan again.

If you can scan successfully, then proceed with the next step to restart the **Lexbceserver** service.

---

**NOTE:** Restarting the service enables the normal functionality of the Lexmark or Dell devices without affecting HP software.

---

8. Restart the **Lexbceserver** service.

**To restart the service**

a. On the Windows taskbar, click **Start**, right-click **My Computer**, and then click **Manage**.

The **Computer Management** screen appears.

b. Double-click **Services and Applications**, and then double-click **Services**.

c. In the right pane, right-click **Lexbceserver**, and then click **Properties**.

d. On the **General tab**, in the **Service status** area, click **Start**.

e. From the **Startup type** drop-down menu, select **Automatic**, and then click **OK**.

f. Click **OK** to close the dialog box.

**Cause:** The **Lexbceserver** service installed by a Lexmark printer, Lexmark all-in-one, or Dell all-in-one, caused a scan communication error.

If this did not solve the issue, try the next solution.
Solution 9: Run the Scan Diagnostic utility

Solution: Download and run the Scan Diagnostic utility to find and correct problems with your product.

To download and run the Scan Diagnostic utility
2. Select Download drivers and software (and firmware).
3. Type your product name and model number in the field provided, and then press Enter.
4. Select the operating system of your computer where the HP software is installed.
5. Go to the Utility section and download the HP Scan diagnostic utility.
6. Try to scan.
   If an error condition is identified with any of the HP software components, a red X is displayed next to the component. If there is no error condition, a green check mark is displayed next to the component. The utility is equipped with a Fix button to correct the error conditions.

Cause: There was a problem with the connections between the product and the computer.
If this did not solve the issue, try the next solution.

Solution 10: Install a patch

Solution: Download and install the unexpected internal error and communications failure patch.
This patch resolves the An unexpected internal error has occurred error and other communication failures with the product.

To install the patch
2. Select Download drivers and software (and firmware).
3. Select the operating system of your computer where the HP software is installed.
4. Go to the Patch section and download the HP Image zone/photo and imaging unexpected internal error and communications failure patch.
5. Double-click the patch to install it on the computer.
6. Try to scan.

Cause: You needed to install the unexpected internal error and communications failure patch.
If this did not solve the issue, try the next solution.

Solution 11: Check the USB chipset and controller

Solution: Check the USB chipset and controller.
Scan communication errors can occur because of compatibility issues with USB chipsets installed on the computer. This can be caused by a mismatch in the
handshake timing between HP device chipset and certain types of USB chipsets on the computer.

To check the USB chipset and controller
1. On the Windows taskbar, click Start, right-click My Computer, and then click Properties.
2. Click the Hardware tab, and then click Device Manager.
3. Open Universal Serial Bus Controllers by clicking the plus sign (+) next to it.
4. Check if you have one of the following chipsets listed:
   • SIS 7001 USB host controller
   • ALI chipsets
   • NEC universal host controllers
   • Intel 82801 AA, Intel 82801BA/BAM

   **NOTE:** This is not a comprehensive list. If you are experiencing communication issues while trying to scan, follow the steps below to resolve the issue.

5. Disconnect all USB devices (printers, scanners, cameras, etc.) from the computer, except the mouse or keyboard.
6. Reconnect the USB cable to the USB port on the back of the product.
7. Reconnect the other end of the USB cable to a USB port on your computer.
8. Make sure the power cord is firmly connected to both the product and the power adaptor. Plug the power cord into a power outlet, surge protector or power strip.

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Power connection</td>
</tr>
<tr>
<td>2</td>
<td>Power cord and adaptor</td>
</tr>
</tbody>
</table>

9. Turn on the product.

10. Print a self-test report to test the basic standalone functionality of the product. See the following procedure for more information about printing a self-test report.

11. Try to scan.

   If the scan is successful, other USB devices connected to the computer might be causing the problem.

12. If the scan is successful, then connect one USB device at a time to the computer.

13. Test the scanning functionality after each connection, until you identify which piece of equipment is causing the problem.

14. If the product fails to scan. Or, does not establish communication with the computer along with any of the USB devices plugged in, then connect a powered USB hub between the product and the computer. This might help to establish, or to maintain, communication between the computer and the product. See the following section for more information about USB hubs.

**To print a self-test report**

1. Load letter or A4 unused plain white paper into the input tray.

2. Press and hold the **Cancel** button and then press the **Start Copy Color** button. The product prints a self-test report, which might indicate the source of the printing problem. A sample of the ink test area of the report is shown below.
3. Make sure the test patterns show a complete grid and the thick color lines are complete.
   • If more than a few lines in a pattern are broken, this might indicate a problem with the nozzles. You might need to clean the print cartridges.
   • If the black line is missing, faded, streaked, or shows lines, this might indicate a problem with the black print cartridge in the right slot.
   • If any of the color lines are missing, faded, streaked, or show lines, this might indicate a problem with the tri-color print cartridge in the left slot.

More information about using a USB hub
• Verify that the USB hub is a powered hub and the power adapter is plugged in. Some powered hubs do not include the power adapter as a standard item.
• The hub must be plugged into a power source.
• Some hubs cannot handle more than four full-power USB devices. You can connect a maximum of five hubs to the system.
• If the product has trouble with a hub when the hubs are connected together, or there are more than four devices on the hub, connect the product to the hub that is directly connected to the computer (unless there are known issues).

Cause: There was a compatibility issue with USB chipsets installed on the computer.

If this did not solve the issue, try the next solution.

Solution 12: Uninstall the software and reset the product

Solution: Uninstall the software completely, and then reinstall it.

To uninstall the software and reset the product
1. Disconnect and reset the product.

   To disconnect and reset the product
   a. Make sure the product is turned on.
   b. Press the On button to turn off the product.
   c. Disconnect the power cord from the back of the product.
   d. Reconnect the power cord to the back of the product.
   e. Press the On to turn on the product.
2. Uninstall the software completely.

   NOTE: It is important that you follow the uninstall procedure carefully to ensure you have removed the software completely from the computer, before reinstalling it.
To uninstall the software completely

a. On the Windows taskbar, click Start, Settings, Control Panel, (or just Control Panel).

b. Double-click Add/Remove Programs (or click Uninstall a program).

c. Remove all the items that are related to the HP scanning software.

⚠️ CAUTION: If the computer is manufactured by HP or Compaq, do not remove any applications other than those listed below.

- HP Imaging device functions
- HP Document Viewer
- HP Photosmart Essential
- HP Image Zone
- HP Photo and imaging gallery
- HP Photosmart, Officejet, Deskjet, (with product name and software version number)
- HP Software update
- HP Share to web
- HP Solution Center
- HP Director
- HP Memories Disk Greeting Card Creator 32

d. Go to C:\Program Files\HP or C:\Program Files\Hewlett-Packard (for some older products) and delete the Digital Imaging folder.

e. Go to C:\WINDOWS and rename the twain_32 folder to twain_32 old.

3. Turn off programs that run in the background.

⚠️ NOTE: When the computer is turned on, a software group called the Terminate and Stay Resident (TSR) programs automatically loads. These programs activate some of the computer utilities, such as the anti-virus software, but are not required for the computer to function. Occasionally, TSR’s prevent the HP software from loading so that it does not install properly. In Windows Vista, Windows XP, and Windows 2000, use the MSCONFIG utility to prevent TSR programs and services from starting up.

To turn off programs that run in the background

a. On the Windows taskbar, click Start.

b. Depending on your operating system, do one of the following:

- In Windows Vista: In Start Search, type MSCONFIG, and then press Enter.
  When the User Account Control dialog box appears, click Continue.
- In Windows XP and Windows 2000: Click Run. When the Run dialog box appears, type MSCONFIG, and then press Enter.

The MSCONFIG utility application appears.

c. Click the General tab.

d. Click Selective Startup.
e. If there is a check mark next to **Load Startup Items**, click the check mark to remove it.

f. Click the **Services** tab, and select the **Hide All Microsoft Services** box.

g. Click **Disable all**.

h. Click **Apply**, and then click **Close**.

   **NOTE:** If you receive a message stating **Access is denied** while making changes, click **OK** and continue. The message will not prevent you from making the changes.

i. Click **Restart** to apply the changes to the computer during the next restart. After the computer restarts, the **You’ve used system configuration utility to make changes to the way windows starts** message appears.

j. Click the check box next to **Do not show this message again**.

4. Run the **Disk Cleanup** utility to delete temporary files and folders.

   **To run the Disk Cleanup utility**
   a. On the Windows taskbar, click **Start**, click **Programs** or **All Programs**, and then click **Accessories**.
   b. Click **System Tools**, and then click **Disk Cleanup**.
      The **Disk Cleanup** analyzes the hard drive and then presents a report with a list of components to delete.
   c. Select the appropriate check boxes to remove the unnecessary components.

   **More information about the Disk Cleanup utility**
   The Disk Cleanup utility frees hard disk space on your computer by doing the following:
   • Deleting temporary Internet files
   • Deleting downloaded program files
   • Emptying the Recycle Bin
   • Deleting files from your temporary folder
   • Deleting files created by other Windows tools
   • Removing optional Windows components that you do not use
   d. After selecting the components to remove, click **OK**.
5. Install the software.

**To install the software**

a. Insert software CD into the CD-ROM drive of the computer. The software installation will start automatically.

   **NOTE:** If the installation does not run automatically, from the Windows Start menu, click Start Search (or Run). In the Start Search (or Run dialog box), type d:\setup.exe, and then press Enter. (If your CD-ROM drive is not assigned to drive letter D, enter the appropriate drive letter.)

b. Follow the prompts on the computer screen to install the software.

6. Try to scan.

**Cause:** The software needed to be completely uninstalled and reinstalled.

---

### Unable to print

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

- **Solution 1: Print a self-test report**
- **Solution 2: Clear the print queue**
- **Solution 3: Disconnect and reconnect the USB cable**
- **Solution 4: Verify the driver configuration**
- **Solution 5: Check if the printer is paused or offline**
- **Solution 6: Clear the print queue manually**
- **Solution 7: Restart the print spooler**
- **Solution 8: Check the software application**

#### Solution 1: Print a self-test report

**Solution:** Print a self-test report to see if the product can print and is communicating with the computer.

**To print a self-test report**

1. Load letter or A4 unused plain white paper into the input tray.
2. Press and hold the **Cancel** button and then press the **Start Copy Color** button. The product prints a self-test report, which might indicate the source of the printing problem. A sample of the ink test area of the report is shown below.
3. Make sure the test patterns show a complete grid and the thick color lines are complete.
   • If more than a few lines in a pattern are broken, this might indicate a problem with the nozzles. You might need to clean the print cartridges.
   • If the black line is missing, faded, streaked, or shows lines, this might indicate a problem with the black print cartridge in the right slot.
   • If any of the color lines are missing, faded, streaked, or show lines, this might indicate a problem with the tri-color print cartridge in the left slot.

If the self-test report fails to print, make sure you set up the product properly. See the Setup Guide that came with the product for information about setting it up.

**Cause:** The product was not set up properly.

If this did not solve the issue, try the next solution.

---

**Solution 2: Clear the print queue**

**Solution:** Restart your computer to clear the print queue.

**To clear the print queue**

1. Restart your computer.
2. After the computer has restarted, check the print queue.
   a. Depending upon your operating system, do one of the following:
      • Windows Vista: On the Windows taskbar, click **Start**, click **Control Panel**, and then click **Printers**.
      • Windows XP: On the Windows taskbar, click **Start**, click **Control Panel**, and then click **Printers and Faxes**.
      • Windows 2000: On the Windows taskbar, click **Start**, point to **Settings**, and then click **Printers**.
   b. Double-click the icon for your product to open the print queue.
      If there are no print jobs pending, the issue might have been resolved.
3. Try to print again.

**Cause:** The computer needed to be restarted to clear the print queue.

If this did not solve the issue, try the next solution.

---

**Solution 3: Disconnect and reconnect the USB cable**

**Solution:** Disconnect the USB cable from the computer and product, and then reconnect it.

**To disconnect and reconnect the USB cable**

1. Disconnect the USB cable from the product.
2. Disconnect the USB cable from the computer.
3. Leave the USB cable disconnected for 5-6 seconds.
4. Reconnect the USB cable to the product and the computer.

After reconnecting the USB cable, the product should start printing the jobs in queue.

NOTE: If you are connecting the product through a USB hub, make sure the hub is turned on. If the hub is on, try connecting directly to your computer.

5. If the product does not start printing automatically, start another print job.

Cause: The USB cable needed to be disconnected.
If this did not solve the issue, try the next solution.

Solution 4: Verify the driver configuration

Solution: Check to make sure the product is set as the default printer and it is using the correct printer driver.

To verify that the product is set as the default printer

1. Depending upon your operating system, do one of the following:
   • Windows Vista: On the Windows taskbar, click Start, click Control Panel, and then click Printers.
   • Windows XP: On the Windows taskbar, click Start, click Control Panel, and then click Printers and Faxes.
   • Windows 2000: On the Windows taskbar, click Start, point to Settings, and then click Printers.

2. Make sure the correct product is set as the default printer. The default printer has a check mark in a black circle next to it.

3. If the wrong product is set as the default printer, right-click the correct product and select Set as Default.
To verify the print driver

1. Depending upon your operating system, do one of the following:
   - Windows Vista: On the Windows taskbar, click **Start**, click **Control Panel**, and then click **Printers**.
   - Windows XP: On the Windows taskbar, click **Start**, click **Control Panel**, and then click **Printers and Faxes**.
   - Windows 2000: On the Windows taskbar, click **Start**, point to **Settings**, and then click **Printers**.

2. Right-click the icon next to the product, and select **Properties**.

3. Click the **Ports** tab to verify that the product is using the correct port.
   The port that the product is using is highlighted and has a check mark next to it.
   The product should be set to use a DOT4 or the USB00X (where X is replaced by a number) port.

4. If the product is using the wrong port, click the correct port to select it.
   The port that the product is now using is highlighted and has a check mark next to it.

5. Click the **Advanced** tab.

6. Check the driver listed in the **Driver** drop-down menu to verify that the product is using the correct driver.
   The name of your product should be listed as the driver.

7. If the wrong driver is selected, select the correct driver from the **Driver** drop-down menu.

8. Click **OK** to save your changes.

**Cause:** If there was more than one product configured on the same computer, the product in use was not be set as the default printer, or the wrong driver might have been configured.

If this did not solve the issue, try the next solution.

---

Solution 5: Check if the printer is paused or offline

**Solution:** Check to make sure the product is not paused or offline.

**To check if the printer is paused or offline**

1. Depending upon your operating system, do one of the following:
   - Windows Vista: On the Windows taskbar, click **Start**, click **Control Panel**, and then click **Printers**.
   - Windows XP: On the Windows taskbar, click **Start**, click **Control Panel**, and then click **Printers and Faxes**.
   - Windows 2000: On the Windows taskbar, click **Start**, point to **Settings**, and then click **Printers**

2. Double-click the icon for your product to open the print queue.
3. On the Printer menu, make sure there are no check marks next to Pause Printing or Use Printer Offline.
   On the Printer menu, make sure there are no check marks next to Pause Printing or Use Printer Offline. If a check mark is present on either option, click the menu option to remove it. If the menu has the Use Printer Online option, select that option to put a check mark next to it.

4. If you made any changes, try to print again.
   Cause: The product was paused or offline.

Solution 6: Clear the print queue manually
Solution: Manually clear the print queue.

To clear the print queue manually
1. Depending upon your operating system, do one of the following:
   • Windows Vista: On the Windows taskbar, click Start, click Control Panel, and then click Printers.
   • Windows XP: On the Windows taskbar, click Start, click Control Panel, and then click Printers and Faxes.
   • Windows 2000: On the Windows taskbar, click Start, point to Settings, and then click Printers.
2. Double-click the icon for your product to open the print queue.
3. On the Printer menu, click Cancel all documents or Purge Print Document, and then click Yes to confirm.
4. If there are still documents in the queue, restart the computer and try printing again after the computer has restarted.
5. Check the print queue again to make sure it is clear, and then try to print again.
   Cause: The print queue needed to be manually cleared.
   If this did not solve the issue, try the next solution.

Solution 7: Restart the print spooler
Solution: Restart the print spooler.

To stop and restart the print spooler
1. On the Windows taskbar, click Start, and then click Control Panel.
2. Double-click Administrative Tools, and then double-click Services.
3. Scroll down the list and click Print Spooler, and then click Stop to stop the service.
4. Click Start to restart the service, and then click OK.
5. Restart the computer and try printing again after the computer has restarted.
Cause: The print spooler needed to be restarted. If this did not solve the issue, try the next solution.

Solution 8: Check the software application

Solution: Verify whether the software application is the problem.

To verify the software application
1. Close the software application and reopen it.
2. Try to print again from the software application.

NOTE: The printer might not support printing from a DOS application. Determine if the software application is Windows-based or DOS-based by checking the system requirements of the application.

3. Try printing from Notepad to see if the issue is the software application or the driver.

To print from Notepad
a. On the Windows taskbar, click Start, and then click Programs or All Programs.
b. Click Accessories, and then click Notepad.
c. Type a few characters of text into Notepad.
d. Click File, and then click Print.
4. If printing is successful from Notepad but not the software application, contact the manufacturer of that application for support.

Cause: The software application was be failing or could not interface with the print driver incorrectly.

Product might not be correctly installed
Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

• Solution 1: Reset the product
• Solution 2: Check the power cord and USB cable
• Solution 3: Restart the computer
• Solution 4: Uninstall and reinstall the product
• Solution 5: Uninstall and reinstall the HP Photosmart Software

Solution 1: Reset the product
Solution: Turn off the product and reset it by disconnecting the power cord. Wait 60 seconds, and then plug in the power cord. Turn on the product.
Cause: You needed to reset the product.
If this did not solve the issue, try the next solution.

Solution 2: Check the power cord and USB cable

**Solution:** Make sure that the power cord and USB cable are properly attached and plugged in. Also, make sure that the product is turned on.

**To check the power supply**

1. Make sure the power cord is firmly connected to both the product and the power adaptor. Plug the power cord into a power outlet, surge protector, or power strip.

   ![Diagram of power cord connections]

   - 1 Power connection
   - 2 Power cord and adaptor
   - 3 Power outlet

2. Make sure the product is turned on.
3. If the product is not receiving electrical power, connect it to another power outlet.
4. Turn off the product and reset it by disconnecting the power cord.
5. Wait 5 seconds, and plug in the power cord.
6. Turn on the product.
7. Try to scan again.
To check the USB connection

1. Verify that the USB cable is securely plugged into the USB port on the back of the product.
2. Make sure the other end of the USB cable is plugged into a USB port on your computer.

3. Try to scan again.
   If the scan fails, continue to the next step.

4. Do one of the following, depending upon how the product is connected to the computer:
   • If the USB cable is connected to a USB hub, try unplugging and replugging the USB cable into the hub. If that does not work, try turning off the hub and then turning it on again. Finally, try disconnecting the cable from the hub and connecting it directly to the computer.
   • If the USB cable is connected to a docking station for a laptop, disconnect the cable from the docking station and connect it directly to the computer.
   • If the USB cable is directly connected to the computer, try plugging it into another USB port on the computer.

5. If there are other USB devices connected to the computer, disconnect the other devices, except for the keyboard and the mouse.

6. Check the USB cable to make sure it is functioning properly.

   **NOTE:** If you are using an older cable, it might not be working properly. Try connecting it to another product to see if the USB cable works. If you experience problems, the USB cable might need to be replaced. Also verify that the cable does not exceed 3 meters (9.8 feet) in length.

7. If another USB cable is available, try using that one instead.

8. Restart the computer.

9. After the computer restarts, try to scan again.

**Cause:** The power cord or USB cable was not attached properly.
If this did not solve the issue, try the next solution.

**Solution 3: Restart the computer**

**Solution:** Restart the computer.

**Cause:** You might not have restarted the computer after installing the product software. Or, there might have been another problem with the computer.

If this did not solve the issue, try the next solution.

**Solution 4: Uninstall and reinstall the product**

**Solution:** Uninstall the product from the **Printers and Faxes** control panel and then reinstall it.

**To uninstall and reinstall the product**

1. Disconnect the USB cable between the product and the computer.
2. On the Windows taskbar, click **Start, Printers and Faxes**.
3. Right-click the product and select **Delete**.
4. Wait several seconds, and then reconnect the product to the computer with the USB cable.
5. Follow any onscreen prompts to reinstall the product.

**Cause:** There might have been a problem when you originally installed the product.

If this did not solve the issue, try the next solution.

**Solution 5: Uninstall and reinstall the HP Photosmart Software**

**Solution:** Uninstall the complete HP Photosmart Software from the computer and then reinstall it using the CD that came with your product.

**To uninstall and reinstall the software**

1. On the Windows taskbar, click **Start, Settings, Control Panel**.
2. Double-click **Add/Remove Programs**.
3. Remove all the items that are related to the HP scanning software.
   A message appears on the computer to restart after removing some programs from the **Add/Remove Programs** list.
4. Select **Click here to restart later**.
5. Disconnect the product from your computer and then restart your computer.

**NOTE:** It is important that you disconnect the product before restarting your computer. Do not connect the product to your computer until after you have reinstalled the software.
6. Insert the HP Photosmart CD-ROM into your computer’s CD-ROM drive and then start the Setup program.

NOTE: If the Setup program does not appear, locate the setup.exe file on the CD-ROM drive and double-click it.

7. Follow the onscreen instructions and the instructions provided in the Setup Guide that came with the product.

8. If you are still having trouble scanning, remove the following additional applications from the Add/Remove Programs list, if they are present.

   CAUTION: If the computer is manufactured by HP or Compaq, do not remove any applications other than those listed below.

- HP Imaging device functions
- HP Document Viewer
- HP Photosmart Essential
- HP Image Zone
- HP Photo and imaging gallery
- HP Photosmart, Officejet, Deskjet, (with product name and software version number)
- HP Software update
- HP Share to web
- HP Solution Center
- HP Director
- HP Memories Disk Greeting Card Creator 32

   Cause: There might have been a problem when you originally installed the HP Photosmart Software.

---

**Product was not found**

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

- **Solution 1: Reset the product**
- **Solution 2: Check the power cord and USB cable**
- **Solution 3: Restart the computer**
- **Solution 4: Uninstall and reinstall the product**
- **Solution 5: Uninstall and reinstall the HP Photosmart Software**

**Cause:** There might have been a problem when you originally installed the HP Photosmart Software.

If this did not solve the issue, try the next solution.

**Solution 6: Contact HP support for service**

**Solution:** If you have completed all of the steps provided in the previous solutions and are still having a problem, contact HP support for service.

Go to: [www.hp.com/support](http://www.hp.com/support).

If prompted, choose your country/region, and then click **Contact HP** for technical support.
**Cause:** You might need assistance to enable the product or software to function properly.

---

**File messages**

The following is a list of file-related error messages:

- **Error reading or writing the file**
- **File not found**
- **File format not supported**
- **Invalid file name**
- **Supported file types for the HP All-in-One**

---

**Error reading or writing the file**

**Solution:** Check to see if you have the right folder and file name.

**Cause:** The product software could not open or save the file.

---

**File not found**

**Solution:** Close some applications and try the task again.

**Cause:** There was not enough available memory on your computer to create a print preview file.

---

**File format not supported**

**Solution:** Open the file in another application, and save it in a format that the product software recognizes.

For more information, see:

**Supported file types for the HP All-in-One**

**Cause:** The product software did not recognize or support the file format of the image you are trying to open or save. If the file extension indicates it is a supported file type, the file might be corrupted.

---

**Invalid file name**

**Solution:** Make sure that you are not using any invalid symbols in the file name.

**Cause:** The file name you entered was invalid.
Supported file types for the HP All-in-One
Refer to the following for the supported file formats:

- The HP Photosmart software supports the following file formats: BMP, DCX, FPX, GIF, JPG, PCD, PCX, TIF, PICT, PSD, PCS, EPS, TGA, SGI, PDF, and PNG
- When scanning, the HP Photosmart Software enables you to save an image in the following file formats: BMP, DCX, FPX, GIF, JPG, PCD, PCX, and TIF

General user messages
The following is a list of messages related to common user errors:

- Cannot crop
- Disconnected
- No scan options
- Out of disk space

Cannot crop
Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

- Solution 1: Close applications that are not being used
- Solution 2: Create more space on your hard drive

Solution 1: Close applications that are not being used

**Solution:** Close all applications that are not in use. This includes applications that run in the background, such as screen savers and virus checkers. If you turn off your virus checker, remember to turn it back on after you finish your scan.

If this problem occurs frequently, or if you encounter memory problems while using other applications, you might need to add more memory to your computer. See the user guide that came with your computer for more information.

**Cause:** The computer does not have enough memory.

Solution 2: Create more space on your hard drive

**Solution:** Empty the Recycle Bin on your desktop. You might also need to remove files from the hard disk; for example, delete temporary files.

**Cause:** For scanning, there must be at least 50 MB of space available on your computer’s hard disk.

Disconnected

**Solution:** Make sure your computer is turned on and is connected to the product. Also make sure you installed the software that came with the product.

For more information, see:

*After setting up the product, it does not print*
**Cause:** Several situations can cause this error message to appear.
- Your computer was not turned on.
- Your computer was not connected to the product.
- The software that came with the product was not installed correctly.
- The software that came with the product is installed, but it was not running.

---

**No scan options**

**Solution:** Make sure the software is installed and running. For more information, see the Setup Guide that came with the HP All-in-One.

**Cause:** The software that came with the product was not running, or has never been installed.

---

**Out of disk space**

**Solution:** Close some applications and try the task again.

**Cause:** There was not enough available memory on your computer to perform the task.

---

**Paper messages**

The following is a list of paper-related error messages:
- **Cannot load paper from input tray**
- **Ink is drying**
- **Out of paper**
- **Paper jam or misfeed**
- **Paper mismatch**
- **Wrong paper width**

**Cannot load paper from input tray**

**Solution:** If the product is out of paper or there are only a few sheets remaining, load more paper in the input tray. If there is paper in the input tray, remove the paper, gently tap the stack of paper against a flat surface, and reload the paper into the input tray. To continue your print job, press any button on the control panel of the product.

**Cause:** There was not enough paper in the input tray.

---

**Ink is drying**

**Solution:** Leave the sheet in the output tray until the message disappears. If it is necessary to remove the printed sheet before the message disappears, carefully hold the printed sheet on the underside or the edges, and place it on a flat surface to dry.

**Cause:** Transparencies and some other media require a drying time that is longer than normal.
Out of paper

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

- Solution 1: Replace the rear door of the product
- Solution 2: Check the paper type and the print settings
- Solution 3: Clean the rollers
- Solution 4: Contact HP support

Solution 1: Replace the rear door of the product

Solution: If you removed the rear door to clear a paper jam, replace it. Gently push the door forward until it snaps into place.

Cause: The rear door was removed from the product.
If this did not solve the issue, try the next solution.

Solution 2: Check the paper type and the print settings

Solution: Check the paper loaded in the input tray and the print settings.

To check the paper in the input tray

1. Remove the stack of paper from the input tray and verify that all the paper in the input tray is the same size and type.
2. Replace any paper that is ripped, dusty, wrinkled, or bent.
   If the paper is curled, uncurl the paper by gently bending it in the opposite direction of the curl or replace the paper.

   NOTE: Use plain paper in the product until the issue is resolved.

3. Tap the stack of paper on a flat surface to align the edges.
4. Verify that the stack of paper contains between 10 and 25 sheets of paper.
5. Insert the stack of paper into the input tray with the short edge forward and the print side down. Slide the stack of paper forward until it stops.

![Image of inserting paper into tray]

6. Slide the paper-width guide inward until it stops at the edge of the paper.

**NOTE:** Do not overload in the input tray; make sure the stack of paper fits within the input tray and is no higher than the top of the paper-width guide.

![Image of sliding paper-width guide]

7. Make sure the print settings, paper size and type, match the paper loaded in the input tray.
   See the following tasks for information about checking and changing these settings.

8. Try to print again.

**To set the paper size**

1. Make sure you have paper loaded in the input tray.
2. On the **File** menu in your software application, click **Print**.
3. Make sure the product is the selected printer.
4. Click the button that opens the **Properties** dialog box.
   Depending on your software application, this button might be called **Properties**, **Options**, **Printer Setup**, **Printer**, or **Preferences**.
5. Click the **Features** tab.
6. In the **Resizing Options** area, click the appropriate paper size from the **Size** list.
   The following table lists the suggested paper size settings for the different types of paper you can load in the input tray. Make sure to look at the long list of choices...
in the **Size** list to see if a defined paper size already exists for the type of paper you are using.

<table>
<thead>
<tr>
<th>Paper type</th>
<th>Suggested paper size settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>Copier, multi-purpose, or plain papers</td>
<td>Letter or A4</td>
</tr>
<tr>
<td>Envelopes</td>
<td>Appropriate listed envelope size</td>
</tr>
<tr>
<td>Greeting-card papers</td>
<td>Letter or A4</td>
</tr>
<tr>
<td>Index cards</td>
<td>Appropriate listed card size (if listed sizes are not appropriate, you can specify a custom paper size)</td>
</tr>
<tr>
<td>Inkjet papers</td>
<td>Letter or A4</td>
</tr>
<tr>

</tbody>
</table>

**To set the paper type for printing**

1. Make sure you have paper loaded in the input tray.
2. On the **File** menu in your software application, click **Print**.
3. Make sure you have selected the correct printer.
4. Click the button that opens the **Properties** dialog box. Depending on your software application, this button might be called **Properties**, **Options**, **Printer Setup**, **Printer**, or **Preferences**.
5. Click the **Features** tab.
6. In the **Basic Options** area, click the appropriate paper type from the **Paper Type** list.

**Cause:** There was a problem with the paper loaded in the input tray, or the print settings did not match.

If this did not solve the issue, try the next solution.

**Solution 3: Clean the rollers**

**Solution:** Clean the rollers.
Make sure you have the following materials available:

- Lint-free cloth, or any soft material that will not come apart or leave fibers.
- Distilled, filtered, or bottled water.

**To clean the rollers**

1. Turn off the product and remove the power cord.
2. Remove the rear access door.
3. Dip the lint-free cloth into the purified or distilled water, and squeeze any excess water from it.
4. Clean the rubber rollers to remove any dust or dirt buildup.
5. Replace the rear access door. Gently push the door forward until it snaps into place.
6. Plug the power cord back in, and turn on the product.
7. Try to print again.

**Cause:** The rollers were dirty and needed to be cleaned.

If this did not solve the issue, try the next solution.

---

**Solution 4: Contact HP support**

**Solution:** If you have completed all of the steps provided in the previous solutions, contact HP support for service.

Go to: [www.hp.com/support](http://www.hp.com/support).

If prompted, choose your country/region, and then click **Contact HP** for information on calling for technical support.

**Cause:** Your product needs servicing.
Paper jam or misfeed

Solution: Clear the paper jam.
For more information, see:
Clear paper jams
Cause: The HP All-in-One had a paper jam.

Paper mismatch

Solution: Change the print setting or load the appropriate paper in the input tray.
For more information, see:
• Set the paper type for printing
• Choose papers for printing and copying
Cause: The print setting for the print job did not match the paper type or size loaded in the product.

Wrong paper width

Solution: Change the print setting or load the appropriate paper in the input tray.
For more information, see:
• Set the paper type for printing
• Choose papers for printing and copying
Cause: The print setting for the print job did not match the paper type or size loaded in the product.

Power and connection messages

The following is a list of power- and connection-related error messages:
• HP All-in-One not found
• Communication test failed
• Improper shutdown
• Two-way communication lost
HP All-in-One not found

Solution: If the product is not properly connected to the computer, communication errors can occur. Make sure the USB cable is securely connected to the product and the computer, as shown below.

For more information, see:

After setting up the product, it does not print

Cause: This error applies only to USB-connected devices. The USB cable was not plugged in properly.

Communication test failed

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

• Solution 1: Make sure the product is turned on
• Solution 2: Make sure the product is connected to the computer

Solution 1: Make sure the product is turned on

Solution: Look at the On button located on the product. If it is not lit, the product is turned off. Make sure the power cord is firmly connected to the product and plugged into a power outlet. Press the On button to turn on the product.

Cause: The product was turned off.

If this did not solve the issue, try the next solution.
Solution 2: Make sure the product is connected to the computer

**Solution:** If the HP All-in-One is not properly connected to the computer, communication errors can occur. Make sure the USB cable is connected to the HP All-in-One and the computer as shown below.

![USB Connection Diagram](image)

For more information, see:

*After setting up the product, it does not print*

**Cause:** The computer was not communicating with the product.

---

**Improper shutdown**

**Solution:** Press the On button located on the control panel of the product to turn the product on and off.

**Cause:** The last time the product was used, it was not turned off properly. If the product is turned off by turning off the switch on a power strip or by using a wall switch, the product can be damaged.

---

**Two-way communication lost**

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

- **Solution 1: Make sure the product is turned on**
- **Solution 2: Make sure the product is connected to the computer**

**Solution 1: Make sure the product is turned on**

**Solution:** Look at the On button located on the product. If it is not lit, the product is turned off. Make sure the power cord is firmly connected to the product and plugged into a power outlet. Press the On button to turn on the product.
Cause: The product was turned off.
If this did not solve the issue, try the next solution.

Solution 2: Make sure the product is connected to the computer

Solution: If the product is not properly connected to the computer, communication errors can occur. Make sure the USB cable is securely connected to the product and the computer, as shown below.

For more information, see:
After setting up the product, it does not print

Cause: The product was not connected to the computer.

Print cartridge messages

The following is a list of print cartridge error messages:

• Non-HP cartridges installed
• Previously used genuine HP cartridges installed
• Original HP ink has been depleted
• Low on ink
• Printing in ink-backup mode
• The print carriage is stalled
• Need alignment or alignment failed
• Print cartridge is missing, incorrectly installed, or not intended for your product
• Print cartridges missing or not detected
• Incompatible print cartridges
• Print cartridges in wrong slot
• Print cartridge problem

Non-HP cartridges installed

**Solution:** Follow the prompts on the computer screen to continue or replace the indicated print cartridges with genuine HP cartridges.

HP recommends that you use genuine HP print cartridges. Genuine HP print cartridges are designed and tested with HP printers to help you easily produce great results, time after time.

**CAUTION:** HP cannot guarantee the quality or reliability of non-HP supplies. Printer service or repairs required as a result of using of a non-HP supply will not be covered under warranty.

If you believe you purchased genuine HP print cartridges, go to:

[www.hp.com/go/anticounterfeit](http://www.hp.com/go/anticounterfeit)

For more information, see:

Replace the print cartridges

**Cause:** The product detected that a non-HP print cartridge was installed.

Previously used genuine HP cartridges installed

**Solution:** Check the print quality of the current print job. If it is satisfactory, follow the prompts on the computer screen to continue.

Ink levels might not be available for the indicated print cartridges. Ink level warnings and indicators provide estimates for planning purposes only. When you receive a low-ink warning message, consider having a replacement cartridge available to avoid possible printing delays. You do not need to replace the print cartridges until print quality becomes unacceptable.

**Cause:** A genuine HP print cartridge was previously used in another printer.

Original HP ink has been depleted

**Solution:** Follow the prompts on the computer screen to continue or replace the indicated print cartridges with genuine HP cartridges.

Ink levels might not be available for the indicated print cartridges. Ink level warnings and indicators provide estimates for planning purposes only. When you receive a low-ink warning message, consider having a replacement cartridge available to avoid possible printing delays. You do not need to replace the print cartridges until print quality becomes unacceptable.

**CAUTION:** HP cannot guarantee the quality or reliability of non-HP supplies. Printer service or repairs required as a result of using of a non-HP supply will not be covered under warranty.

If you believe you purchased genuine HP print cartridges, go to:
For more information, see Replace the print cartridges.

**Cause:** The original HP ink in the indicated print cartridges was depleted.

---

### Low on ink

**Solution:** Ink levels might not be available for the indicated print cartridges. Ink level warnings and indicators provide estimates for planning purposes only. When you receive a low-ink warning message, consider having a replacement cartridge available to avoid possible printing delays. You do not need to replace the print cartridges until print quality becomes unacceptable.

For HP product return and recycling information, visit us at: [www.hp.com/recycle](http://www.hp.com/recycle).

**Cause:** The indicated print cartridges were estimated to be low on ink and might need to be replaced soon.

---

### Printing in ink-backup mode

**Solution:** If you receive the ink-backup mode message and two print cartridges are installed in the product, verify that the protective piece of plastic tape has been removed from each print cartridge. When plastic tape covers the print cartridge contacts, the device cannot detect that the print cartridge is installed.

1. Copper-colored contacts
2. Plastic tape with pink pull tab (must be removed before installing)
3. Ink nozzles under tape

For more information, see Use ink-backup mode.

**Cause:** When the product detected that only one print cartridge is installed, ink-backup mode is initiated. This printing mode lets you print with a single print cartridge, but it slows the product and affects the quality of printouts.
The print carriage is stalled

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

• Solution 1: Print a self-test report
• Solution 2: Clear the print carriage
• Solution 3: Check the power source

Solution 1: Print a self-test report

Solution: Print a self-test report to see if the product can print.

To print a self-test report

1. Load letter or A4 unused plain white paper into the input tray.
2. Press and hold the Cancel button and then press the Start Copy Color button.
   The product prints a self-test report, which might indicate the source of the printing problem. A sample of the ink test area of the report is shown below.

3. Make sure the test patterns show a complete grid and the thick color lines are complete.
   • If more than a few lines in a pattern are broken, this might indicate a problem with the nozzles. You might need to clean the print cartridges.
   • If the black line is missing, faded, streaked, or shows lines, this might indicate a problem with the black or photo print cartridge in the right slot.
   • If any of the color lines are missing, faded, streaked, or show lines, this might indicate a problem with the tri-color print cartridge in the left slot.

Cause: The error was false.

If this did not solve the issue, try the next solution.
Solution 2: Clear the print carriage

Solution: Remove any objects, such as paper, that are blocking the print carriage. Then reset the product.

To clear the print carriage
1. Make sure the product is on.
2. Open the print cartridge door.
   The print carriage should move to the center of the product. If the print carriage does not move to the center, turn the product off, and then on.

3. Make note of where the print carriage is stuck and look for jammed paper.
   A paper jam can cause the error message and the print carriage to stall.

⚠️ CAUTION: Do not use any tools or other devices to remove jammed paper. Always use caution when removing jammed paper from inside the product.

If the print carriage is stuck on the right side
a. Check for any paper or object that might be restricting the print carriage.
b. Move the print carriage all the way to the left side.
c. Check the paper path all the way to the right side and remove any paper still in the product.

If the print carriage is stuck on the left side
a. Check for any paper or object that may be restricting the print carriage.
b. Move the print carriage all the way to the right side.
c. Check the paper path all the way to the left side and remove any paper still in the product.

e. Move the print carriage all the way to the right side.

d. Check the paper path all the way to the left side and remove any paper still in the product.
4. Close the print cartridge door.
5. Check for a paper jam in the rear access door.

To check for a paper jam in the rear access door
a. Press in the tab on the rear access door to release the door. Remove the door by pulling it away from the product.

![Image of printer with rear access door removed]

b. Check for any paper still in the product. Gently pull any paper out of the rollers.
c. Replace the rear access door. Gently push the door forward until it snaps into place.

![Image of printer with rear access door reinstalled]

6. Do one of the following, depending upon the state of the product:
   • If the On button light is on and steady, print a self-test report. If you can print a self-test report, the carriage is no longer jammed. For more information, see Print a self-test report.
   • If the On button light is not on or is flashing and the print carriage is still stalled, proceed to the next solution.

7. Disconnect and reset the product.

To disconnect and reset the product
a. Make sure the product is turned on.
b. Press the On button to turn off the product.
c. Disconnect the power cord from the back of the product.
d. Reconnect the power cord to the back of the product.
e. Press the On to turn on the product.

Cause: The print carriage was blocked by a paper jam.
If this did not solve the issue, try the next solution.
Solution 3: Check the power source

Solution: Verify that the product is properly connected to a suitable power source.

To verify that the product is connected to a suitable power source
1. Verify that the product has a two-prong power plug, and make sure you are using the power cord provided with the product.
2. If the product is connected to a computer, make sure the computer has the correct power plug depending on your country/region.
3. Make sure the power cord is firmly connected to both the product and the power adaptor.
4. Plug the power cord directly into a wall outlet.

5. Try to print from your computer.
   If the product prints when plugged directly into a wall outlet while disconnected from any power strips or surge suppressors, the power strip or surge suppressor might not be allowing sufficient voltage to reach the product.
6. If the product cannot print and the print carriage is still stalled, contact HP support for service.
   Go to: www.hp.com/support.
   If prompted, choose your country/region, and then click Contact HP for information on calling for technical support.

Cause: There might not be sufficient voltage for the product.
Need alignment or alignment failed
Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

- **Solution 1:** Incorrect type of paper is loaded in the input tray
- **Solution 2:** Make sure the protective tape is removed from the print cartridges
- **Solution 3:** Check if print cartridges are fully inserted
- **Solution 4:** Align newly installed print cartridges
- **Solution 5:** Print cartridge or sensor might be defective

**Solution 1: Incorrect type of paper is loaded in the input tray**

**Solution:** If you have colored paper loaded in the input tray when you align the print cartridges, the alignment fails. Load unused plain white letter or A4 paper into the input tray, and then try the alignment again. If the alignment fails again, you might have a defective sensor or print cartridge.

To find support and warranty information, go to the HP Web site at [www.hp.com/support](http://www.hp.com/support). If prompted, choose your country/region, and then click Contact HP for information on calling for technical support.

**Cause:** Incorrect type of paper was loaded in the input tray.

If this did not solve the issue, try the next solution.

---

**Solution 2: Make sure the protective tape is removed from the print cartridges**

**Solution:** Check each print cartridge. The tape might have been removed from the copper-colored contacts, but still might cover the ink nozzles. If the tape is still covering the ink nozzles, carefully remove the tape from the print cartridges. Do not touch the ink nozzles or the copper-colored contacts.

![Diagram of print cartridge with labels:
1. Copper-colored contacts
2. Plastic tape with pink pull tab (must be removed before installing)
3. Ink nozzles under tape]
Remove and then reinsert the print cartridges. Verify that they are fully inserted and locked in place.

**Cause:** Protective tape was covering the print cartridges.

If this did not solve the issue, try the next solution.

---

**Solution 3: Check if print cartridges are fully inserted**

**Solution:** Remove and then reinsert the print cartridges. Verify that they are fully inserted and locked in place.

**Cause:** The contacts on the print cartridge were not touching the contacts in the print carriage.

If this did not solve the issue, try the next solution.

---

**Solution 4: Align newly installed print cartridges**

**Solution:** You must align the print cartridges to ensure excellent print quality.

If the alignment error persists and you cannot clear it, your print cartridge might be defective. Contact HP for support.

To find support and warranty information, go to the HP Web site at [www.hp.com/support](http://www.hp.com/support). If prompted, choose your country/region, and then click Contact HP for information on calling for technical support.

For more information, see:

- [Align the print cartridges](#)

**Cause:** You installed new print cartridges that needed alignment

If this did not solve the issue, try the next solution.

---

**Solution 5: Print cartridge or sensor might be defective**

**Solution:** To find support and warranty information, go to the HP Web site at [www.hp.com/support](http://www.hp.com/support). If prompted, choose your country/region, and then click Contact HP for information on calling for technical support.

**Cause:** The print cartridge or sensor was defective.

---

**Print cartridge is missing, incorrectly installed, or not intended for your product**

**Solution:** If the print cartridges are missing, incorrectly installed, or not intended for your product, one or both of the print cartridge status lights begin to blink. One of the following messages may appear on your computer screen:

- **Print Cartridge Problem**
- **Incorrect Print Cartridge(s)**
- **Incorrectly Installed Cartridge(s)**
Print Cartridge(s) Missing
For resolving these print cartridge error messages, see Resolving print cartridge error messages.

Print cartridges missing or not detected
Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

- **Solution 1:** Remove and reinsert the print cartridges
- **Solution 2:** Clean the print cartridge contacts
- **Solution 3:** Replace the print cartridges

**Solution 1: Remove and reinsert the print cartridges**

**Solution:** Remove and reinsert the print cartridges and verify that they are fully inserted and locked in place.

Also, make sure the print cartridges are installed into the correct slots.

**To make sure the print cartridges are installed correctly**
1. Make sure the product is on.
   - **CAUTION:** If the HP All-in-One is off when you open the print cartridge door to access the print cartridges, the HP All-in-One will not release the cartridges for changing. You might damage the HP All-in-One if the print cartridges are not docked safely when you try to remove them.

2. Open the print cartridge door.
   The print carriage moves to the center of the product.

3. Check to make sure you are using the correct print cartridges for your product. For a list of compatible print cartridges, see the printed documentation that came with the product.
4. Remove the black print cartridge from the slot on the right. Do not touch the ink nozzles or the copper-colored contacts. Check for possible damage to the copper-colored contacts or ink nozzles.

Make sure the clear plastic tape has been removed. If it is still covering the ink nozzles, gently remove the clear plastic tape by using the pink pull tab. Make sure you do not remove the copper colored tape containing the electrical contacts.

5. Reinsert the print cartridge by sliding it forward into the slot on the right. Then push the print cartridge forward until it clicks into the socket.

6. Repeat steps 1 and 2 for the tri-color print cartridge on the left side.

**Cause:** The indicated print cartridges were installed incorrectly.

If this did not solve the issue, try the next solution.

---

**Solution 2: Clean the print cartridge contacts**

**Solution:** Clean the print cartridge contacts.
Make sure you have the following materials available:

- Dry foam rubber swabs, lint-free cloth, or any soft material that will not come apart or leave fibers.

  🌿 TIP: Coffee filters are lint-free and work well for cleaning print cartridges.

- Distilled, filtered, or bottled water (tap water might contain contaminants that can damage the print cartridges).

⚠️ CAUTION: Do not use platen cleaners or alcohol to clean the print cartridge contacts. These can damage the print cartridge or the product.

**To clean the print cartridge contacts**

1. Turn on the product and open the print cartridge door. The print carriage moves to the center of the product.

2. Wait until the print carriage is idle and silent, and then unplug the power cord from the back of the product.

3. Lightly press down on the print cartridge to release it, and then pull it toward you out of the slot.

   📝 NOTE: Do not remove both print cartridges at the same time. Remove and clean each print cartridge one at a time. Do not leave a print cartridge outside the HP All-in-One for more than 30 minutes.

4. Inspect the print cartridge contacts for ink and debris buildup.

5. Dip a clean foam rubber swab or lint-free cloth into distilled water, and squeeze any excess water from it.

6. Hold the print cartridge by its sides.
7. Clean only the copper-colored contacts. Allow the print cartridges to dry for approximately ten minutes before reinserting.

8. Hold the print cartridge with the HP logo on top, and insert the print cartridge back into the slot. Make sure you push the print cartridge in firmly until it snaps into place.

9. Repeat if necessary for the other print cartridge.

10. Gently close the print cartridge door and plug the power cord into the back of the product.

**Cause:** The print cartridge contacts needed to be cleaned.

If this did not solve the issue, try the next solution.
Solution 3: Replace the print cartridges

**Solution:** Replace the indicated print cartridge. You can also remove the indicated print cartridge and print using ink-backup mode.

**NOTE:** During ink-backup mode, the product can only print jobs from the computer. You cannot initiate a print job from the control panel (such as printing a photo from a memory card).

Check to see if your print cartridge is still under warranty and end of warranty date has not been reached.

- If the end of warranty date has been reached, purchase a new print cartridge.
- If the end of warranty date has not been reached, contact HP support. Go to [www.hp.com/support](http://www.hp.com/support). If prompted, choose your country/region, and then click **Contact HP** for information on calling for technical support.

**Related topics**
Replace the print cartridges

**Cause:** The print cartridge was damaged.

Incompatible print cartridges

Try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

- **Solution 1: Make sure you are using the correct print cartridges**
- **Solution 2: Contact HP customer support**

**Solution 1: Make sure you are using the correct print cartridges**

**Solution:** Check to make sure you are using the correct print cartridges for your product. For a list of compatible print cartridges, see the printed documentation that came with the product.

If you are using print cartridges that are not compatible with the product, replace the indicated print cartridges with print cartridges that are compatible.

If it appears that you are using the correct print cartridges, proceed to the next solution.

For more information, see:

- **Shop for ink supplies**
- **Replace the print cartridges**

**Cause:** The indicated print cartridges were not compatible with the product.

If this did not solve the issue, try the next solution.
Solution 2: Contact HP customer support

Solution: To find support and warranty information, go to the HP Web site at www.hp.com/support. If prompted, choose your country/region, and then click Contact HP for information on calling for technical support.

Cause: The print cartridges were not intended for use in this product.

Print cartridges in wrong slot

Solution: Make sure the print cartridges are installed into the correct slots. If they are, remove and reinsert the print cartridges and verify that they are fully inserted and locked in place.

To make sure the print cartridges are installed correctly

1. Make sure the product is on.

   △ CAUTION: If the HP All-in-One is off when you open the print cartridge door to access the print cartridges, the HP All-in-One will not release the cartridges for changing. You might damage the HP All-in-One if the print cartridges are not docked safely when you try to remove them.

2. Open the print cartridge door.
   The print carriage moves to the center of the product.
3. Check to make sure you are using the correct print cartridges for your product. For a list of compatible print cartridges, see the printed documentation that came with the product.

4. Remove the black print cartridge from the slot on the right. Do not touch the ink nozzles or the copper-colored contacts. Check for possible damage to the copper-colored contacts or ink nozzles. Make sure the clear plastic tape has been removed. If it is still covering the ink nozzles, gently remove the clear plastic tape by using the pink pull tab. Make sure you do not remove the copper colored tape containing the electrical contacts.

</table>

5. Reinsert the print cartridge by sliding it forward into the slot on the right. Then push the print cartridge forward until it clicks into the socket.

6. Repeat steps 1 and 2 for the tri-color print cartridge on the left side.

NOTE: If the print cartridges are installed in the wrong slots and you cannot remove them from the product, contact HP support for service.

Go to: [www.hp.com/support](http://www.hp.com/support).

If prompted, choose your country/region, and then click Contact HP for information on calling for technical support.

Cause: The indicated print cartridges were installed incorrectly.
Print cartridge problem

The message might indicate which cartridge is causing the problem. If so, try the following solutions to resolve the issue. Solutions are listed in order, with the most likely solution first. If the first solution does not solve the problem, continue trying the remaining solutions until the issue is resolved.

If the message does not indicate which cartridge is causing the problem, follow these steps to determine which cartridge is the problem cartridge. After you determine which cartridge is the problem cartridge, continue with the first solution.

To determine which print cartridge is having the problem

1. Make sure the product is on.

   △ CAUTION: If the product is turned off when you open the print cartridge door to access the print cartridges, it will not release the cartridges for changing. You might damage the product if the print cartridges are not docked safely when you try to remove them.

2. Open the print cartridge door.
   The print carriage moves to the far right side of the product.

3. Check to make sure you are using the correct print cartridges for your product. For a list of compatible print cartridges, see the printed documentation that came with the product.

4. Remove the black print cartridge from the slot on the right.
   Press down on the cartridge to release it, and then pull it toward you out of the slot.

   1 Tri-color print cartridge
   2 Black print cartridge
5. Close the print cartridge door.
6. Check to see if the error has been resolved.
   • If the error has been resolved, then there is a problem with the black print cartridge.
   • If the error has not been resolved, continue to the next step.
7. Open the print cartridge door and reinsert the black print cartridge by sliding it forward into the slot on the right. Then push the print cartridge forward until it clicks into the slot.
8. Remove the tri-color print cartridge from the slot on the left. Press down on the cartridge to release it, and then pull it toward you out of the slot.
9. Close the print cartridge door.
10. Check to see if the error has been resolved.
    • If the error has been resolved, then there is a problem with the tri-color print cartridge.
    • If the error has not been resolved, then there is a problem with both print cartridges.
11. Open the print cartridge door and reinsert the tri-color print cartridge by sliding it forward into the slot on the left. Then push the print cartridge forward until it clicks into the slot.
12. Close the print cartridge door.
    • Solution 1: Remove and reinsert the print cartridges
    • Solution 2: Clean the print cartridge contacts
    • Solution 3: Replace the print cartridges

Solution 1: Remove and reinsert the print cartridges

Solution: Remove and reinsert the print cartridges and verify that they are fully inserted and locked in place.
Also, make sure the print cartridges are installed into the correct slots.

**To make sure the print cartridges are installed correctly**

1. Make sure the product is on.

   △ **CAUTION:** If the HP All-in-One is off when you open the print cartridge door to access the print cartridges, the HP All-in-One will not release the cartridges for changing. You might damage the HP All-in-One if the print cartridges are not docked safely when you try to remove them.

2. Open the print cartridge door.
   The print carriage moves to the center of the product.

3. Check to make sure you are using the correct print cartridges for your product. For a list of compatible print cartridges, see the printed documentation that came with the product.

4. Remove the black print cartridge from the slot on the right. Do not touch the ink nozzles or the copper-colored contacts. Check for possible damage to the copper-colored contacts or ink nozzles.
   Make sure the clear plastic tape has been removed. If it is still covering the ink nozzles, gently remove the clear plastic tape by using the pink pull tab. Make sure you do not remove the copper colored tape containing the electrical contacts.

   1  Copper-colored contacts
   2  Plastic tape with pink pull tab (must be removed before installing)
   3  Ink nozzles under tape
5. Reinsert the print cartridge by sliding it forward into the slot on the right. Then push the print cartridge forward until it clicks into the socket.

6. Repeat steps 1 and 2 for the tri-color print cartridge on the left side.

**Cause:** The indicated print cartridges were installed incorrectly. If this did not solve the issue, try the next solution.

**Solution 2: Clean the print cartridge contacts**

**Solution:** Clean the print cartridge contacts on the print cartridge(s) that are experiencing the problem.

Make sure you have the following materials available:

- Dry foam rubber swabs, lint-free cloth, or any soft material that will not come apart or leave fibers.

  ▲ **TIP:** Coffee filters are lint-free and work well for cleaning print cartridges.

- Distilled, filtered, or bottled water (tap water might contain contaminants that can damage the print cartridges).

  △ **CAUTION:** Do not use platen cleaners or alcohol to clean the print cartridge contacts. These can damage the print cartridge or the product.

**To clean the print cartridge contacts**

1. Turn on the product and open the print cartridge door. The print carriage moves to the center of the product.
2. Wait until the print carriage is idle and silent, and then unplug the power cord from the back of the product.

3. Lightly press down on the print cartridge to release it, and then pull it toward you out of the slot.

**NOTE:** Do not remove both print cartridges at the same time. Remove and clean each print cartridge one at a time. Do not leave a print cartridge outside the HP All-in-One for more than 30 minutes.

4. Inspect the print cartridge contacts for ink and debris buildup.

5. Dip a clean foam rubber swab or lint-free cloth into distilled water, and squeeze any excess water from it.

6. Hold the print cartridge by its sides.

7. Clean only the copper-colored contacts. Allow the print cartridges to dry for approximately ten minutes before reinserting.

8. Hold the print cartridge with the HP logo on top, and insert the print cartridge back into the slot. Make sure you push the print cartridge in firmly until it snaps into place.
9. Repeat if necessary for the other print cartridge.

10. Gently close the print cartridge door and plug the power cord into the back of the product.

**Cause:** The print cartridge contacts needed to be cleaned.
If this did not solve the issue, try the next solution.

---

**Solution 3: Replace the print cartridges**

**Solution:** Replace the print cartridges that are experiencing the problem. If only one of the print cartridges is experiencing the problem, you can also remove it and print using ink-backup mode.

**NOTE:** During ink-backup mode, the product can only print jobs from the computer. You cannot initiate a print job from the control panel (such as copying or scanning an original). For more information, see [Use ink-backup mode](#).

**Cause:** One or both of the print cartridges were having a problem.
13 HP warranty and support

Hewlett-Packard provides Internet and phone support for the HP All-in-One. This section contains the following topics:

- Warranty
- Print cartridge warranty information
- Support process
- Before you call HP customer support
- HP support by phone
- Additional warranty options
- HP Quick Exchange Service (Japan)
- HP Korea customer support
- Prepare the product for shipment
- Pack the product

Warranty

For more information about the warranty, see the printed documentation that came with the product.

Print cartridge warranty information

The HP cartridge warranty is applicable when the product is used in its designated HP printing device. This warranty does not cover HP ink products that have been refilled, remanufactured, refurbished, misused, or tampered with.

During the warranty period the product is covered as long as the HP ink is not depleted and the end of warranty date has not been reached. The end of warranty date, in YYYY/MM/DD format, may be found on the product as indicated:

For a copy of the HP Limited Warranty Statement, see the printed documentation that came with the product.

Support process

If you have a problem, follow these steps:

1. Check the documentation that came with the product.
2. Visit the HP online support Web site at www.hp.com/support. HP online support is available to all HP customers. It is the fastest source for up-to-date product information and expert assistance and includes the following features:
   • Fast access to qualified online support specialists
   • Software and driver updates for the product
• Valuable product and troubleshooting information for common problems
• Proactive product updates, support alerts, and HP newsgrams that are available when you register the product

3. Call HP support. Support options and availability vary by product, country/region, and language.

### Before you call HP customer support

Software programs from other companies might be included with the HP All-in-One. If you experience problems with any of those programs, you will receive the best technical assistance by calling the experts at that company.

If you need to contact HP support, do the following before you call:

1. Make sure that:
   a. The product is plugged in and turned on.
   b. The specified print cartridges are installed correctly.
   c. The recommended paper is properly loaded in the input tray.

2. Reset the product:
   a. Turn off the product by pressing the On button.
   b. Unplug the power cord from the back of the product.
   c. Plug the power cord back into the product.
   d. Turn on the product by pressing the On button.

3. To find support and warranty information, go to the HP Web site at [www.hp.com/support](http://www.hp.com/support). If prompted, choose your country/region, and then click Contact HP for information on calling for technical support.

Check the HP Web site for updated information or troubleshooting tips for the product.

4. If you are still experiencing problems and need to speak with an HP support representative, do the following:
   a. Have the specific name of the product, as it appears on the control panel, available.
   b. Print a self-test report.
   c. Make a color copy to have available as a sample printout.
   d. Be prepared to describe your problem in detail.
   e. Have your serial number ready.
      - You can view the serial number by looking at the sticker on the rear side of the product. The serial number is the 10-character code in the upper left corner of the sticker.

5. Call HP support. Be near the product when you call.

**Related topics**
- [Print a self-test report](#)
- [Placing a call](#)

### HP support by phone

For a list of support phone numbers, see the printed documentation that came with the device.

This section contains the following topics:
- [Phone support period](#)
- [Placing a call](#)
- [After the phone support period](#)

#### Phone support period

One year of phone support is available in North America, Asia Pacific, and Latin America (including Mexico). To determine the duration of phone support in Europe, the Middle East, and Africa, go to [www.hp.com/support](http://www.hp.com/support). Standard phone company charges apply.
Placing a call

Call HP support while you are in front of the computer and the product. Be prepared to provide the following information:

- Model number (located on the label on the front of the product)
- Serial number (located on the back or bottom of the product)
- Messages that appear when the situation occurs
- Answers to these questions:
  - Has this situation happened before?
  - Can you re-create it?
  - Did you add any new hardware or software to your computer at about the time that this situation began?
  - Did anything else occur prior to this situation (such as a thunderstorm, product was moved, etc.)?

After the phone support period

After the phone support period, help is available from HP at an additional cost. Help may also be available at the HP online support Web site: www.hp.com/support. Contact your HP dealer or call the support phone number for your country/region to learn more about support options.

Additional warranty options

Extended service plans are available for the HP All-in-One at additional costs. Go to www.hp.com/support, select your country/region and language, then explore the services and warranty area for information about the extended service plans.
HP Quick Exchange Service (Japan)

プリント カートリッジに問題がある場合は以下に記載されている電話番号に連絡してください。プリント カートリッジが故障している、または欠陥があると判断された場合、HP Quick Exchange Service がこのプリント カートリッジを正常品と交換し、故障したプリント カートリッジを回収します。保障期間中は、修理代と送料代は無料です。また、お住まいの地域にもよりますが、プリンタを次の日までに交換することも可能です。

電話番号： 0570-000511（自動応答）
          03-3335-9800（自動応答システムが使用できない場合）
サポート時間： 平日の午前 9:00 から午後 5:00 まで
          土日の午前 10:00 から午後 5:00 まで
          祝祭日および 1 月 1 日から 3 日は除きます。

サービスの条件:
• サポートの提供は、カスタマケアセンターを通じてのみ行われます。
• カスタマケアセンターがプリンタの不具合と判断した場合に、サービスを受けることができます。

ご注意：ユーザの扱いが不適切であったために故障した場合は、保障期間中であっても修理は有料となります。詳細については保証書を参照してください。

その他の制限:
• 運搬の時間はお住まいの地域によって異なります。詳しくは、カスタマケアセンターに連絡してください。
• 出荷配送は、当社指定の配送業者が行います。
• 配送は交通事情などの諸事情によって、遅れる場合があります。
• このサービスは、将来予告なしに変更することがあります。

HP Korea customer support

HP 한국 고객 지원 문의
• 고객 지원 센터 대표 전화
  1588-3003
• 제품가격 및 구입처 정보 문의 전화
  080-703-0700
• 전화상담 가능 시간:
  평 일 09:00~18:00
  토요일 09:00~13:00
  (일요일, 공휴일 제외)
Prepare the product for shipment

If after contacting HP Customer Support or returning to the point of purchase you are requested to send the product in for service, make sure you remove and keep the following items before returning your product:

- The print cartridges
- The power cord, USB cable, and any other cable connected to the HP All-in-One
- Any paper loaded in the input tray
- Any originals loaded in the HP All-in-One

To remove print cartridges before shipment

1. Turn on the product and wait until the print carriage is idle and silent. If the product will not turn on, skip this step and go to step 2.
2. Open the print cartridge door.
3. Remove the print cartridges from their slots.

   **NOTE:** If the product does not turn on, you can unplug the power cord and then manually slide the print carriage to the center to remove the print cartridges.

4. Place the print cartridges in an airtight plastic container so they will not dry out, and put them aside. Do not send them with the product unless the HP customer support call agent instructs you to.
5. Close the print cartridge door and wait a few minutes for the print carriage to move back to its home position (on the left side).

   **NOTE:** Make sure the scanner is idle and has returned to its parked position before turning off the product.

6. Press the On button to turn off the product.

Pack the product

Complete the following steps once you have removed the print cartridges, turned off the product, and unplugged it.

To pack the product

1. If available, pack the product for shipment by using the original packing materials or the packaging materials that came with your exchange product.
If you do not have the original packaging materials, please use other adequate packaging materials. Shipping damage caused by improper packaging and/or improper transportation is not covered under the warranty.

2. Place the return shipping label on the outside of the box.

3. Include the following items in the box:
   - A complete description of symptoms for service personnel (samples of print quality problems are helpful).
   - A copy of the sales slip or other proof of purchase to establish the warranty coverage period.
   - Your name, address, and a phone number where you can be reached during the day.
14 Technical information

The technical specifications and international regulatory information for the HP All-in-One are provided in this section.

For additional specifications, see the printed documentation that came with the HP All-in-One.

This section contains the following topics:

- Specifications
- Notice to Windows 2000 users
- Environmental product stewardship program
- Regulatory notices

Specifications

Technical specifications for the HP All-in-One are provided in this section. For additional specifications, see the printed Basics Guide.

System requirements

Software and system requirements are located in the Readme file.

For information about future operating system releases and support, visit the HP online support Web site at www.hp.com/support.

† Output tray capacity is affected by the type of paper and the amount of ink you are using. HP recommends emptying the output tray frequently.

Copy specifications

- Digital image processing
- Up to 9 copies from original (depends on model)
- Copy speeds vary according to the complexity of the document and model
• Maximum copy enlargement ranging from 200-400% (depends on model)
• Maximum copy reduction ranging from 25-50% (depends on model)

Scan specifications
• Image editor included
• Integrated OCR software automatically converts scanned text to editable text (if installed)
• Twain-compliant software interface
• Resolution: up to 1200 x 2400 ppi optical (depends on model); 19200 ppi enhanced (software)
  For more information about ppi resolution, see the scanner software.
• Color: 48-bit color, 8-bit grayscale (256 levels of gray)
• Maximum scan size from glass: 21.6 x 29.7 cm (8.5 x 11.7 inches)

Print resolution
To find out about the printer resolution, see the printer software. For more information, see View the
print resolution.

Print cartridge yield
Visit www.hp.com/pageyield for more information on estimated cartridge yields.

Acoustic information
If you have Internet access, you can get acoustic information from the HP Web site. Go to:
www.hp.com/support.

Notice to Windows 2000 users
This product provides limited functionality for Windows 2000, including but not limited to the following:
• Scanning is supported using TWAIN or WIA in a software application only. The Scan button on
  the control panel will not work.
• Copying is supported from the control panel only.
• The HP Photosmart Software is not available.
• The onscreen Help is not installed, but it is available as a Web download at www.hp.com/
support.

Environmental product stewardship program
Hewlett-Packard is committed to providing quality products in an environmentally sound manner.
Design for recycling has been incorporated into this product. The number of materials has been kept
to a minimum while ensuring proper functionality and reliability. Dissimilar materials have been
designed to separate easily. Fasteners and other connections are easy to locate, access, and
remove using common tools. High priority parts have been designed to access quickly for efficient
disassembly and repair.

For more information, visit HP’s Commitment to the Environment Web site at:
www.hp.com/hpinfo/globalcitizenship/environment/index.html

This section contains the following topics:
• Paper use
• Plastics
• Material safety data sheets
• Recycling program
• HP inkjet supplies recycling program
• Energy Star® notice
• Disposal of waste equipment by users in private households in the European Union
Paper use
This product is suited for the use of recycled paper according to DIN 19309 and EN 12281:2002.

Plastics
Plastic parts over 25 grams are marked according to international standards that enhance the ability to identify plastics for recycling purposes at the end of product life.

Material safety data sheets
Material safety data sheets (MSDS) can be obtained from the HP Web site at:
www.hp.com/go/msds

Recycling program
HP offers an increasing number of product return and recycling programs in many countries/regions, and partners with some of the largest electronic recycling centers throughout the world. HP conserves resources by reselling some of its most popular products. For more information regarding recycling of HP products, please visit:
www.hp.com/hpinfo/globalcitizenship/environment/recycle/

HP inkjet supplies recycling program
HP is committed to protecting the environment. The HP Inkjet Supplies Recycling Program is available in many countries/regions, and lets you recycle used print cartridges and ink cartridges free of charge. For more information, go to the following Web site:
www.hp.com/hpinfo/globalcitizenship/environment/recycle/

Energy Star® notice
This product is designed to reduce power consumption and save natural resources without compromising product performance. It has been designed to reduce total energy consumption both during operation and when the device is not active. This product qualifies for ENERGY STAR® which is a voluntary program established to encourage the development of energy-efficient office products.

ENERGY STAR is a U.S. registered service mark of the U.S. EPA. As an ENERGY STAR partner, HP has determined that this product meets ENERGY STAR guidelines for energy efficiency. For more information on ENERGY STAR guidelines, go to the following Web site:
www.energystar.gov
Disposal of Waste Equipment by Users in Private Households in the European Union

This symbol on the product or on its packaging indicates that this product must not be disposed of with your other household waste. Instead, it is your responsibility to ensure that your waste equipment is disposed of in a way that protects the environment. In many areas, local authorities will have collection facilities for this type of waste. Alternatively, there may be one or more charged collection points. You can also contact your local authorities or retailer to whom you purchased the product. Further information on the separate collection of waste electrical and electronic equipment is available at the following internet address:  europa.eu/efi/disposal.html. 

The aim of this document is to ensure that you choose the correct disposal method for your waste equipment. Please refer to the technical information below to determine which type of equipment you have. 

14 Disposal of Waste Equipment by Users in Private Households in the European Union

Disposal of waste equipment by users in private households in the European Union

Responsabilitatea să vă debarasaţi de echipamentul uzat predându-l la un centru de colectare desemnat pentru reciclarea deşeurilor.
Regulatory notices

The HP All-in-One meets product requirements from regulatory agencies in your country/region.

This section contains the following topics:

- FCC statement
- Notice to users in Korea
- VCCI (Class B) compliance statement for users in Japan
- Notice to users in Japan about the power cord
- Noise emission statement for Germany
- Toxic and hazardous substance table
- HP Deskjet F2200 All-in-One series declaration of conformity

FCC statement

The United States Federal Communications Commission (in 47 CFR 15.105) has specified that the following notice be brought to the attention of users of this product.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

For further information, contact:
Manager of Corporate Product Regulations
Hewlett-Packard Company
3000 Hanover Street
Palo Alto, CA 94304
(650) 857-1501

Modifications (part 15.21)
The FCC requires the user to be notified that any changes or modifications made to this device that are not expressly approved by HP may void the user’s authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

0: 指成部件的所有原材料中包含的这种有害物质，含量低于SJ/T11363-2006的限制
X: 指此部件使用的原材料中至少有一种包含的这种有害物质，含量高于SJ/T11363-2006的限制
注：环保使用期限的参考标识取决于产品正常工作的温度和湿度等条件
*以上只适用于使用这些部件的产品
DECLARATION OF CONFORMITY
according to ISO/IEC 17050-1 and EN 17050-1

DoC #: VCVRA-0706-03

Supplier’s Name: Hewlett-Packard Company
Supplier’s Address: 60 Alexandra Terrace, #07-01 The Comtech
Singapore 118502

declares, that the product
Product Name and Model: HP Deskjet F4100 Series
HP Deskjet F2100 Series
HP 915 Series
HP Deskjet F2200 Series

Regulatory Model Number: 1) VCVRA-0706
AC Power Adapter: 0957-2231
Product Options: All
conforms to the following Product Specifications:

EMC: Class B
EN 61000-3-2:2000 (2nd Edition)
FCC C/IR 47 Part 15

Safety:
EN 60950-1:2001
IEC 60950-1:2001

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Additional Information:
1) This product is assigned a Regulatory Modal Number which stays with the regulatory aspects of the design. The Regulatory Modal Number is the main product identifier in the regulatory documentation and test reports, this number should not be confused with the marketing name or the product numbers.

Local contact for regulatory topics only:
EMEA: Hewlett-Packard GmbH, HQ RE, Herrenberger Strasse 140, 71034 Boeblingen, Germany
