

## Printing a photo

Application: Adobe Photoshop CS

Printer: HP Designjet 30/130 series

Software: HP Software RIP

Operating System: Windows

1. First recommendations:
  - See the [Media type functionality & features](#) and choose the most appropriate media.
  - It is essential to have the media type correctly calibrated with the printer and print mode, consult the [Calibrate my printer](#) document.
2. Open Adobe Photoshop CS.
3. Configure the **Color Settings, Edit menu > Color Settings...**:
  - Make sure the **Advanced Mode** check box is ticked.
  - **Working Space > RGB**: select profile of the scanner or camera you have used to get the photo (source profile), if you don't have it, select Adobe RGB (1998).
  - **Color Management Policies**: Preserve the Embedded Profiles.
  - **Profile Mismatches**: check **Ask When Opening** and **Ask When Pasting**.
  - **Missing Profiles**: check **Ask When Opening**.
  - **Conversion Options > Intent**: Perceptual.

- Click **OK**
4. Open the image, **File menu > Open...**:
    - If the document has an embedded color profile that does not match the current working space, select **Use the embedded profile**. Otherwise, select **Assign working space**.

- Click **OK**
- 5. Adobe Photoshop **Print with Preview...** settings, **File menu > Print with Preview...**
  - **Page Setup:**
    - **Printer...**: Select the printer (ex. HP designjet 130 RIP).
    - Click **OK**.
    - **Paper Size**: Select the paper size of the media loaded on the printer.
    - **Orientation**: Select the orientation of your image on the paper.
    - Click **OK**.
  - Set the **Position** and the **Scaled Print Size** you need.
  - Check **Show More Options**.
  - Select the **Color Management** tab:
    - **Source Space**: Document.
    - **Print Space > Profile**: Printer Color Management.
    - **Print Space > Intent**: Perceptual.

6. RIP settings, **Print... > Properties > Advanced...**:

- **Document Options > Printer Features:**

- Select the **Media Type** that is loaded on the printer (always calibrated).
- **Print Mode:** Best (always calibrated).
- You don't need to worry about the RIP color settings (Perform Color Correction, CMYK and RGB Input Profiles and Color rendering intent) because you have selected **Printer Color Management** option in the application, then, the application tells the RIP which source profile and rendering intent should be used for the conversion to the print space, these are the Document profile and the Print Space Intent of the application. The RIP color settings will be overridden.

- Click **OK**, until print.
