## HP LF Printing Knowledge Center

Proof another printer

<u>Application:</u> Adobe InDesign CS <u>Printer:</u> HP Designjet 30/90/130 series <u>Software</u>: EFI Designer Edition for HP <u>Operating System:</u> Windows

- 1. First recommendations:
  - See the <u>Media type functionality & features</u> and choose the most appropriate media.
  - It is essential you have the media type correctly calibrated with the printer and print mode, consult the Calibrate my printer document.
- 2. Open the EFI Designer Edition RIP.
- 3. EFI Designer Edition RIP settings, **Preferences**:
  - Color:
    - o Check the Active Color Management checkbox.
    - Paper name: Select the paper type that is loaded on the printer (always calibrated) and "Best" print quality.
    - **Print resolution**: 600 x 600.
    - Color output mode: Proof.
    - **CMYK**: Click the **Add profile** button and browse to the printer profile you want to emulate.

Select the **Relative Colorimetric** intent (select **Absolute Colorimetric** if you want to emulate the white of the paper).

- Click **OK**.
- 6. Open the image, **File menu > Open**...:
  - If the document has an embedded color profile that does not match the current working space, select **Use the embedded profile**. Otherwise, select **Assign current working space**.

Embedded Profile Mismatch							
♪	The document's embedded color profile does not match the current CMYK working space.						
	Embedded: U.S. Web Coated (SWOP) v2 Working: Euroscale Coated v2						
- How do you want to proceed?							
	<ul> <li>O Use the embedded profile (instead of the working space)</li> <li>○ Convert the document's colors to the current working space</li> <li>○ Discard the embedded profile (and use current working space)</li> </ul>						
	OK Reset						

- Click **OK**.
- 5. Place the images if needed, File menu > Place..., browse the image and click Open....
- 6. So that you get a good display select a High Quality Display, **View menu > Display** performace > High Quality Display.
- Make sure you have configured the Document Setup appropriately for your document, File menu > Document Setup....
- 8. Printer settings, File menu > Print... > Setup... button:
  - Select Printer...: Select the printer (ex. EFI Designer Edition).
  - Preferences:
    - Layout tab:
      - Orientation: Select the orientation of your document on the paper.
    - Advanced...:
      - Paper/Output > Paper Size: Select the paper size of the media loaded on the printer.
      - Document Options > Printer Features:
        - Paper Size: Setup
        - Select RIP's Default on the others settings.

• Click **OK** until the InDesign **Print** dialog box.

- 9. Adobe InDesign **Print...** settings:
  - Setup (left hand menu):
    - Paper Size: Defined by Driver.
    - **Options:** Select the scaling option you need.
  - **Output** (left hand menu):
    - **Color:** Composite CMYK.
  - Color Management (left hand menu):
    - o Source Space: Document.
    - Print Space > Profile: Select the printer profile you want to emulate. If you need to add the printer profile in the application, copy it in the next folder: Windows 98: WINDOWS>System>Color Windows NT: WinNT>System32>Color
       Windows 2000; CrashWINDOWS > Sustem 22 > Speed > Driver > Color

Windows 2000: C: > WINDOWS > System32 > Spool > Drivers > Color Windows XP: C: > WINDOWS > System32 > Spool > Drivers > Color
