HP LF Printing Knowledge Center

Proof the output on the monitor

Application: Adobe InDesign CS

Printer: HP Designjet 30/90/130 series

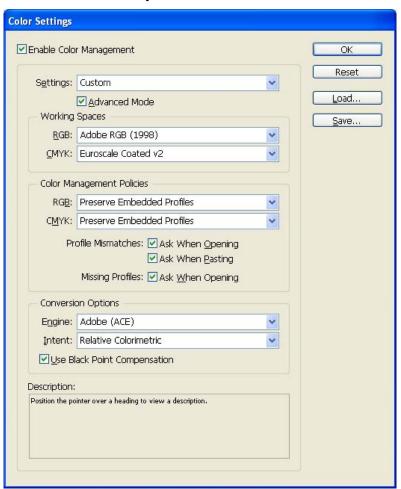

Software: HP Driver

Operating System: Windows

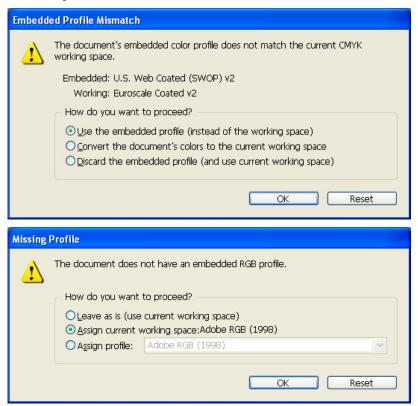

1. First recommendations:

- See the Media type functionality & features and choose the most appropriate media.
- It is essential you have the media type correctly calibrated with the printer and print mode, consult the <u>Calibrate my printer</u> document.
- In order to get a correct display, it's also essential you have the monitor profiled, consult the <u>Profile my monitor</u> document.
- 2. Open Adobe InDesign CS.
- 3. Configure the Color Settings, Edit menu > Color Settings...:
 - Check the Enable Color Management checkbox.
 - Make sure the **Advanced Mode** check box is ticked.
 - Working Space > RGB: Adobe RGB (1998).
 - Working Space > CMYK: Euroscale Coated v2 (for Europe), U.S. Web Coated (SWOP) v2 (for US) and Japan Standard v2 (for Japan).
 - Color Management Policies: Preserve Embedded Profiles.
 - Profile Mismatches: check Ask When Opening and Ask When Pasting.
 - Missing Profiles: check Ask When Opening.
 - Conversion Options > Intent: Relative Colorimetric.

Click OK.

- 4. Open the image, **File menu > Open**...:
 - If the document has an embedded color profile that does not match the current working space, select Use the embedded profile. Otherwise, select Assign current working space.

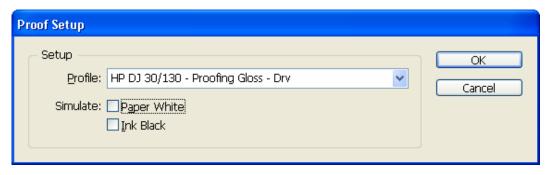

- Click OK.
- 5. Place the images if needed, **File menu > Place...**, browse the image and click **Open...**.
- 6. So that you get a good display select a High Quality Display, **View menu > Display** performace > High Quality Display.
- 7. Make sure you have configured the **Document Setup** appropriately for your document, **File** menu > **Document Setup...**.
- 6. Configure the **Proof Setup** dialog box in order to proof the output on the monitor, **View menu** > **Proof Setup** > **Custom...**:
 - Profile: Select the profile of the output device you want to proof; printer profile generally
 depends on the printer model and the media type. If you don't have it on the list, you should
 copy it in the next folder:

Windows 98: WINDOWS>System>Color

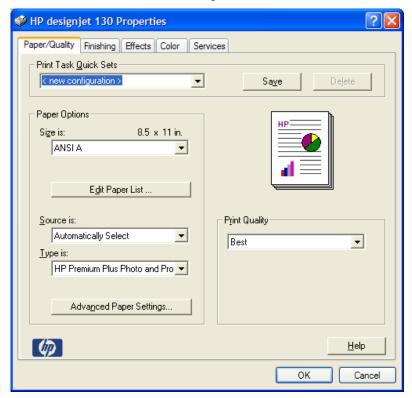

Windows NT: WinNT>System32>Color

Windows 2000: C: > WINDOWS > System32 > Spool > Drivers > Color Windows XP: C: > WINDOWS > System32 > Spool > Drivers > Color

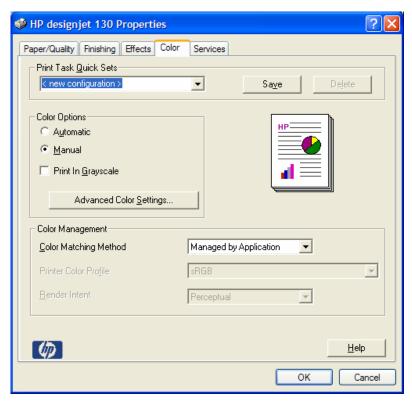

• **Simulate** > **Paper White:** This setting only affects the display, check it if you want to emulate the white of the paper.

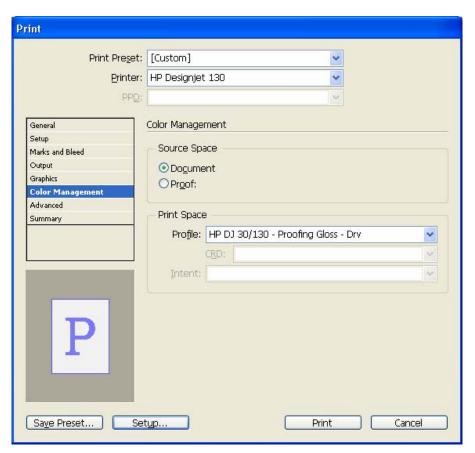

- Click OK.
- Now, you can retouch your image and the monitor will show you how it's going to look once you've printed it.
- 8. Printer settings, **File menu > Print... > Setup...** button:
 - **Select Printer...**: Select the printer (ex. HP Designjet 130).
 - Preferences:
 - Paper/Quality tab:
 - **Paper Size is:** Select the paper size of the media loaded on the printer.
 - **Type is**: Select the media type that is loaded on the printer.
 - Print Quality: Best.

- o Finishing tab:
 - Orientation: Select the orientation of your document on the paper.
- o Color tab:
 - Color Options: Manual.
 - Color Matching Method: Managed by Application.

- Click **OK** until the InDesign **Print** dialog box.
- 9. Adobe InDesign **Print...** settings:
 - **Setup** (left hand menu):
 - o **Paper Size:** Defined by Driver.
 - Options: Select the scaling option you need.
 - Output (left hand menu):
 - o Color: Composite RGB.
 - Color Management (left hand menu):
 - Source Space: Document.
 - o **Print Space > Profile**: Select the profile of the printer and media type you will use to print, it should be the same as selected in the **Proof Setup** dialog box.

• Click **Print.**
