## Safety warning notice

- 
- ⚠ **WARNING!** To reduce the possibility of heat-related injuries or of overheating the device, do not place the device directly on your lap or obstruct the device air vents. Use the device only on a hard, flat surface. Do not allow another hard surface, such as an adjoining optional printer, or a soft surface, such as pillows or rugs or clothing, to block airflow. Also, do not allow the AC adapter to contact the skin or a soft surface, such as pillows or rugs or clothing, during operation. The device and the AC adapter comply with the user-accessible surface temperature limits defined by the International Standard for Safety of Information Technology Equipment (IEC 60950).

# 1 Product description

Category	Description
<b>Product Name</b>	HP Mini 1000 Netbook
<b>Processor</b>	Intel® Atom™ N270 1.6-GHz processor, 512-KB Level 2 cache, 533-MHz front-side bus (FSB)
<b>Chipset</b>	Northbridge: 945GSE; 533-MHz bus speed Southbridge: ICH7M
<b>Graphics</b>	Intel® Graphics Media Accelerator 950 Universal Memory Architecture (UMA) graphics subsystem
<b>Panels</b>	All display assemblies include 1 webcam, 1 microphone, 1 speaker box, and 2 wireless local-area network (WLAN) antenna transceivers/cables; wireless wide-area network Wide aspect 16:10 ratio panels 8.9-inch WSVGA BrightView (1024 × 600) LED 10.1-inch standard-definition AntiGlare (1024 × 576) LED 10.2-inch WSVGA AntiGlare (1024 × 600) LED
<b>Memory</b>	One customer-accessible/upgradable memory module slot Supports up to 1 GB of system memory PC2-4200, 533-MHz, DDR2 Supports the following configurations: <ul style="list-style-type: none"><li>• 512-MB total system memory (512 × 1)</li><li>• 1024-MB total system memory (1024 × 1)</li><li>• 2048-MB total system memory (2048 × 1)</li></ul>
<b>Mass storage devices</b>	Solid-state drive (SSD) based on multi-level cell (MLC) technology Configurations: 8-GB, 16-GB Models equipped with a solid-state drive also support the HP Mini Mobile Drive Supports all 4.57-cm (1.8-inch) parallel ATA (PATA) hard drives (optional) Configuration: 60-GB, 4200-rpm
<b>Optical drive</b>	Supports external USB optical drives only
<b>Diskette drive</b>	Supports external USB diskette drives only

Category	Description
<b>Audio</b>	High-definition (HD) audio - AD1984
	Integrated speakers (2)
	Fixed integrated microphone
<b>Webcam</b>	Fixed integrated VGA webcam, 640 × 480 resolution, up to 30 frames per second
<b>Modem</b>	Supports external USB modems only
<b>Ethernet</b>	Integrated 10/100 network interface card (NIC)
<b>Wireless</b>	2 WLAN antennae built into display assembly
	Integrated WLAN by way of Broadcom BCM4312 802.11b/g WLAN module
	Integrated personal area network (PAN) by way of Bluetooth® module (optional)
<b>External media cards</b>	SD Card Reader supporting MultiMediaCard (MMC) and Secure Digital (SD) Memory Card
	HP Mini Mobile Drive (on models equipped with a solid-state drive)
<b>Internal media cards</b>	Two Mini Card slots:
	<ul style="list-style-type: none"> <li>• Full-size Mini Card slot</li> <li>• Half-size Mini Card slot</li> </ul>
<b>Ports</b>	Audio-in (stereo microphone)
	Audio-out (stereo headphone)
	RJ-45 (Ethernet, includes link and activity lights)
	USB (2)
	3-pin AC power
<b>Docking</b>	Expansion port
	Signals passed through expansion port:
	<ul style="list-style-type: none"> <li>• USB 2.0</li> <li>• Headphone-out/stereo-out and stereo microphone-in</li> <li>• VGA-out</li> <li>• Power-in</li> <li>• Power (up to 50 W)</li> </ul>
	<b>NOTE:</b> Docking device will support RJ-45 through USB (no pass-through support on the expansion port).
<b>Keyboard/pointing device</b>	92% keyboard
	TouchPad, with 2 TouchPad buttons and 2-way scrolling (taps enabled as default)
<b>Power requirements</b>	30-W UMA AC adapter (non-smart) with localized cable plug support
	AC adapter connector on cable
	3-cell lithium-polymer (Li-Po) battery (2.4-Ah, 26-Wh), 3-hour target life

<b>Category</b>	<b>Description</b>
<b>Security</b>	Supports security lanyard
<b>Operating system</b>	<b>Preinstalled:</b> HP Mobile Internet Experience (MIE)
	<b>Restore media:</b> Backup software provided by operating system CD and recovery DVD
<b>Serviceability</b>	<b>End-user replaceable parts:</b> AC adapter Battery (system) Memory module HP Mini Mobile Drive

## 2 External component identification

### Top components

#### Display

Item	Component	Function
(1)	Internal display switch	Turns off the display if the display is closed while the power is on.
(2)	Speakers (2)	Produce sound.
(3)	Internal microphone	Records and captures sound.
(4)	Webcam	Captures still photographs and videos.

**NOTE:** To capture videos, you will need to install additional webcam software.

## Wireless antennae

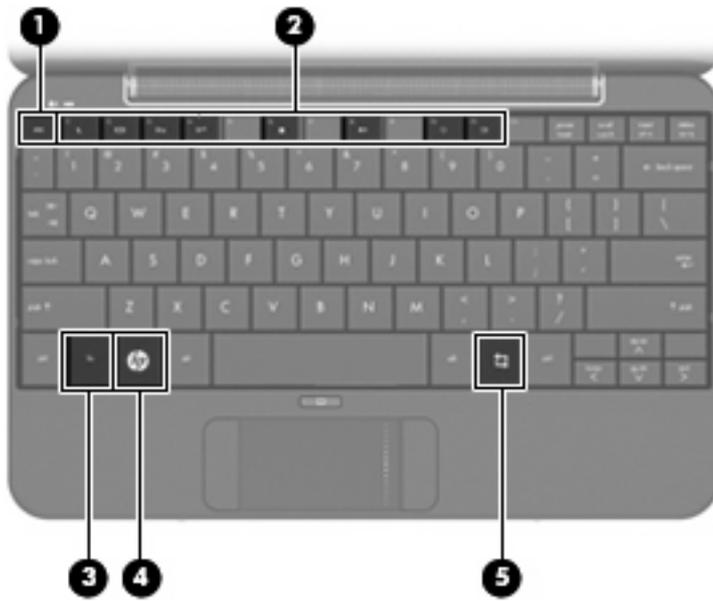

Component	Function
WLAN antennae (2) *	Send and receive wireless signals to communicate with wireless local-area networks (WLANs).

\* The antennae are not visible from the outside of the device. For optimal transmission, keep the areas immediately around the antennae free from obstructions.

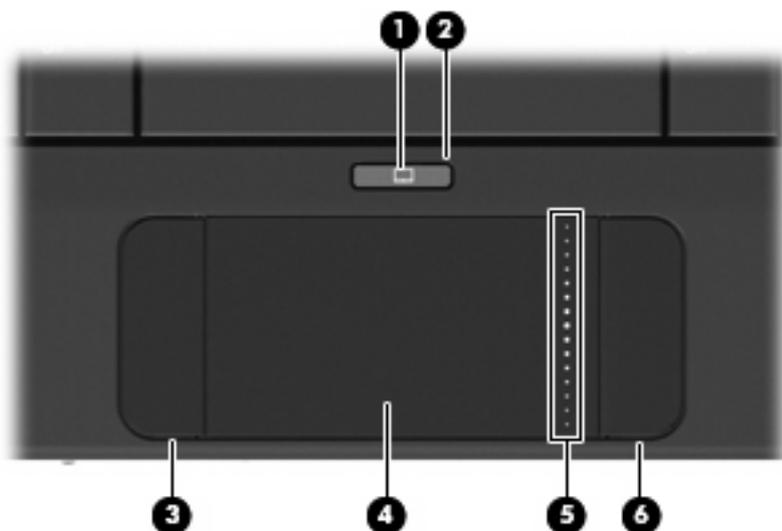

To see wireless regulatory notices, refer to the section of the *Regulatory, Safety and Environmental Notices* that applies to your country or region. To access these notices, refer to the *User Guides* disc that is included with the device.

## Keys

Item	Component	Function
(1)	esc key	Displays system information when pressed in combination with the <b>fn</b> key.
(2)	Function keys	Execute frequently used system functions when pressed in combination with the <b>fn</b> key.
(3)	fn key	Executes frequently used system functions when pressed in combination with a function key.
(4)	Home key	Returns to the Home Screen.
(5)	Program Switcher key	Displays the Start New Program button from anywhere on the device.

## TouchPad

Item	Component	Function
(1)	TouchPad on/off button	Turns the TouchPad on and off.
(2)	TouchPad on/off light	<ul style="list-style-type: none"><li>• White: TouchPad is on.</li><li>• Amber: TouchPad is off.</li></ul>
(3)	Left TouchPad button *	Functions like the left button on an external mouse.
(4)	TouchPad *	Moves the pointer and selects or activates items on the screen.
(5)	TouchPad scroll zone	Scrolls up or down.
(6)	Right TouchPad button *	Functions like the right button on an external mouse.

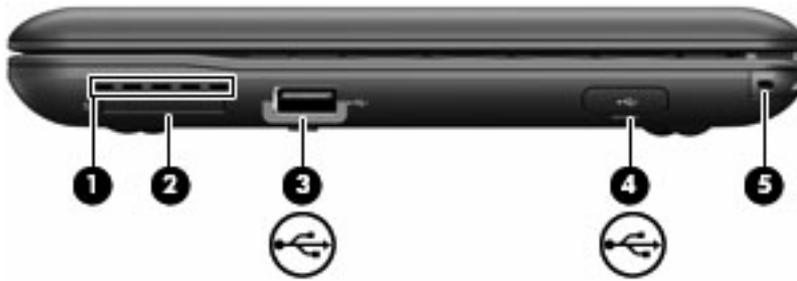

\* This table describes factory settings. To view or change pointing device preferences, select **Settings > System** tab > **Mouse**.

## Front components

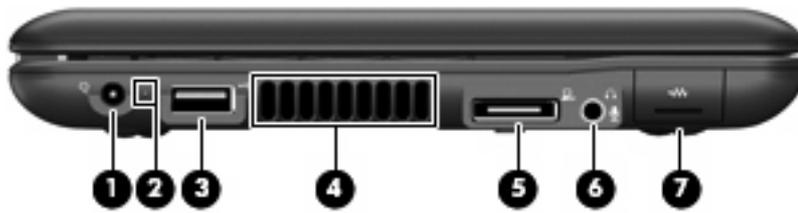

Item	Component	Function
(1)	Power light	<ul style="list-style-type: none"> <li>On: The device is on.</li> <li>Blinking: The device is in Standby.</li> <li>Off: The device is off.</li> </ul>
(2)	Power switch	<ul style="list-style-type: none"> <li>When the device is off, slide the switch to turn on the device.</li> <li>When the device is on, briefly slide the switch to initiate Hibernation.</li> <li>When the device is in Standby, briefly slide the switch to exit Standby.</li> <li>When the device is in Hibernation, briefly slide the switch to exit Hibernation.</li> </ul> <p>If the device has stopped responding and shutdown procedures are ineffective, slide and hold the power switch for at least 5 seconds to turn off the device.</p> <p>To learn more about your power settings, select <b>Settings &gt; System tab &gt; Power Management</b>.</p>
(3)	Drive light	Blinking: The hard drive or flash drive is being accessed.
(4)	Battery light	<ul style="list-style-type: none"> <li>On: A battery is charging.</li> <li>Blinking: A battery that is the only available power source has reached a low battery level. When the battery reaches a critical battery level, the battery light begins blinking rapidly.</li> <li>Off: If the device is plugged into an external power source, the light turns off when all batteries in the device are fully charged. If the device is not plugged into an external power source, the light stays off until the battery reaches a low battery level.</li> </ul>
(5)	Wireless light	<ul style="list-style-type: none"> <li>Blue: An integrated wireless device, such as a WLAN device, is on.</li> <li>Amber: All wireless devices are off.</li> </ul>
(6)	Wireless switch	<p>Turns the wireless feature on or off, but does not establish a wireless connection.</p> <p><b>NOTE:</b> A wireless network must be set up in order to establish a wireless connection.</p>

## Right-side components

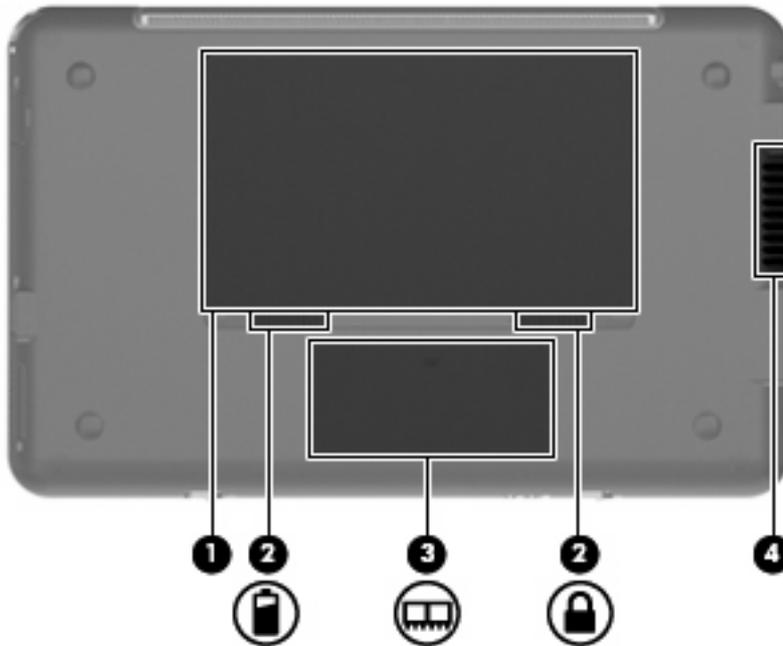

Item	Component	Function
(1)	Vent	Enables airflow to cool internal components <b>NOTE:</b> The device fan starts up automatically to cool internal components and prevent overheating. It is normal for the internal fan to cycle on and off during routine operation.
(2)	SD Card Reader	Supports the following optional digital card formats: <ul style="list-style-type: none"><li>• MultiMediaCard (MMC)</li><li>• Secure Digital (SD) Memory Card</li></ul>
(3)	USB port	Connects an optional USB device.
(4)	HP Mini Mobile Drive Bay (on models equipped with a solid-state drive)	Connects an optional HP Mini Mobile Drive.
(5)	Security lanyard connector	Attaches an optional security lanyard to the device. <b>NOTE:</b> The security lanyard is designed to act as a deterrent, but it may not prevent the device from being mishandled or stolen.

## Left-side components

Item	Component	Function
(1)	Power connector	Connects an AC adapter.
(2)	Power connector light	<ul style="list-style-type: none"><li>• On: The device is running on AC power.</li><li>• Off: The device is running on battery power.</li></ul>
(3)	USB port	Connects an optional USB device.
(4)	Vent	Enables airflow to cool internal components. <b>NOTE:</b> The device fan starts up automatically to cool internal components and prevent overheating. It is normal for the internal fan to cycle on and off during routine operation.
(5)	Expansion port	Connects the device to an optional docking device or an optional expansion product.
(6)	Audio-out (headphone) jack/Audio-in (microphone) jack	Produces sound when connected to optional powered stereo speakers, headphones, earbuds, a headset, or television audio. Also connects an optional headset microphone. <b>WARNING!</b> To reduce the risk of personal injury, adjust the volume before putting on headphones, earbuds, or a headset. For additional safety information, refer to the <i>Regulatory, Safety and Environmental Notices</i> . <b>NOTE:</b> When a device is connected to the jack, the device speakers are disabled.
(7)	RJ-45 (network) jack	Connects a network cable.

## Bottom components

Item	Component	Function
(1)	Battery bay	Holds the battery.
(2)	Battery release latches (2)	Release the battery from the battery bay.
(3)	Memory module compartment	Contains the memory module slot. <b>NOTE:</b> The release latch for the memory module compartment cover (not illustrated) is located underneath the right battery release latch (see <a href="#">Memory module on page 33</a> ).
(4)	Vent	Enables airflow to cool internal components. <b>NOTE:</b> The device fan starts up automatically to cool internal components and prevent overheating. It is normal for the internal fan to cycle on and off during routine operation.

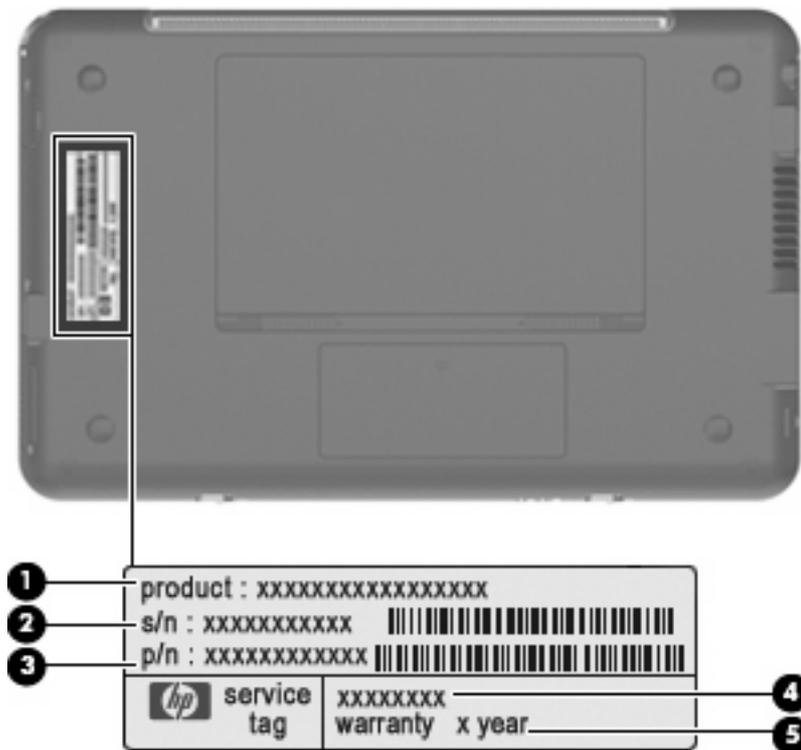

# 3 Illustrated parts catalog

## Serial number location

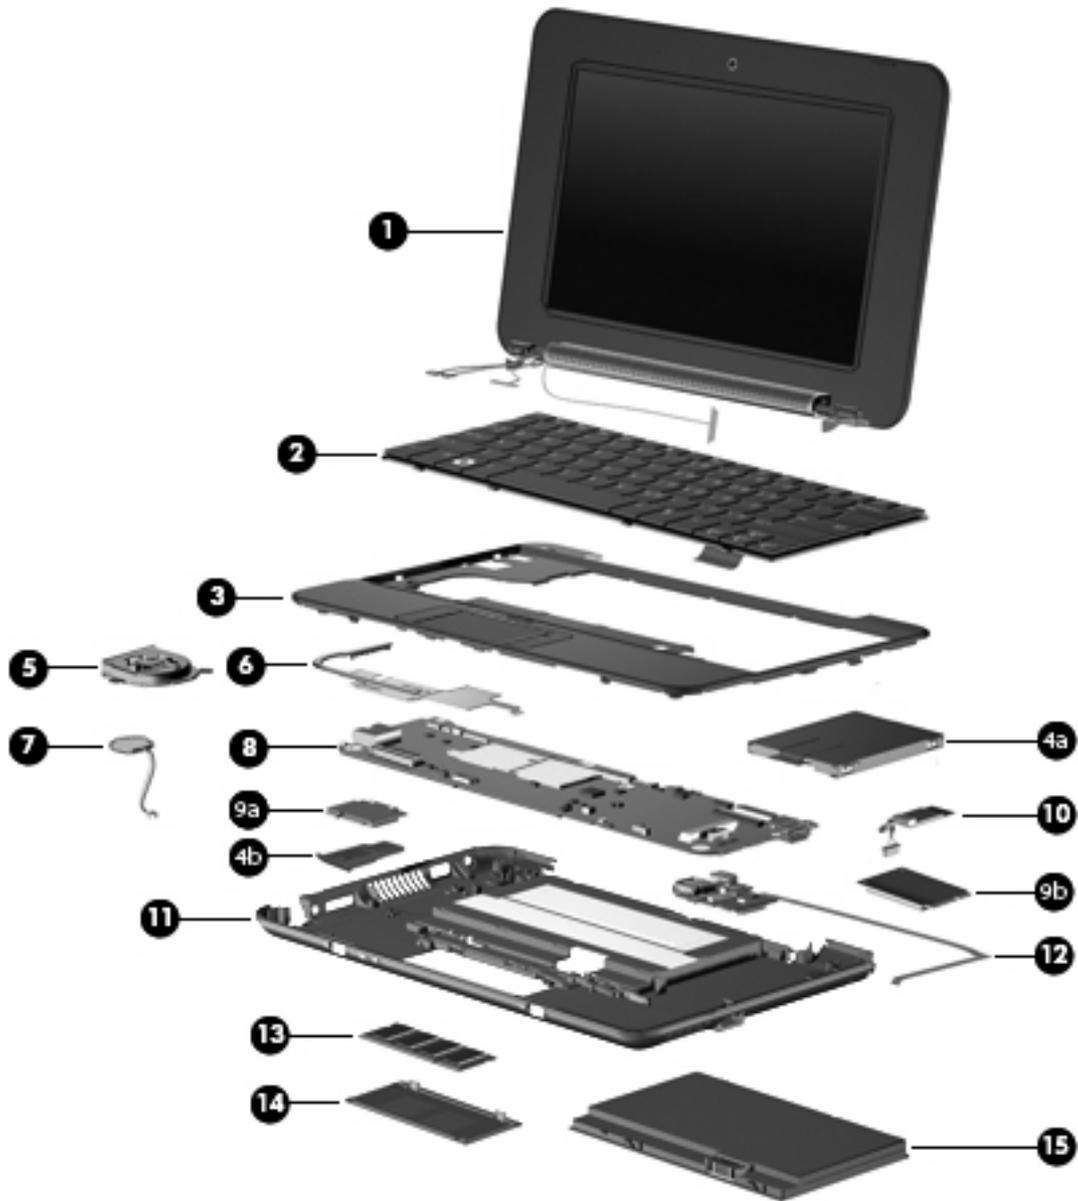

The service tag, affixed to the bottom of the device, provides information that may be needed when troubleshooting system problems. The service tag provides the following information:

- (1) Product name: This is the product name affixed to the front of the device.
- (2) Serial number (s/n): This is an alphanumeric identifier that is unique to each product.
- (3) Part number/Product number (p/n): This number provides specific information about the product's hardware components. The part number helps a service technician to determine what components and parts are needed.
- (4) Model description: This is the number used to locate documents, drivers, and support for the device.
- (5) Warranty period: This number describes the duration of the warranty period for the device.

When ordering parts or requesting information, provide the device serial number and model description provided on the service tag.

# Device major components

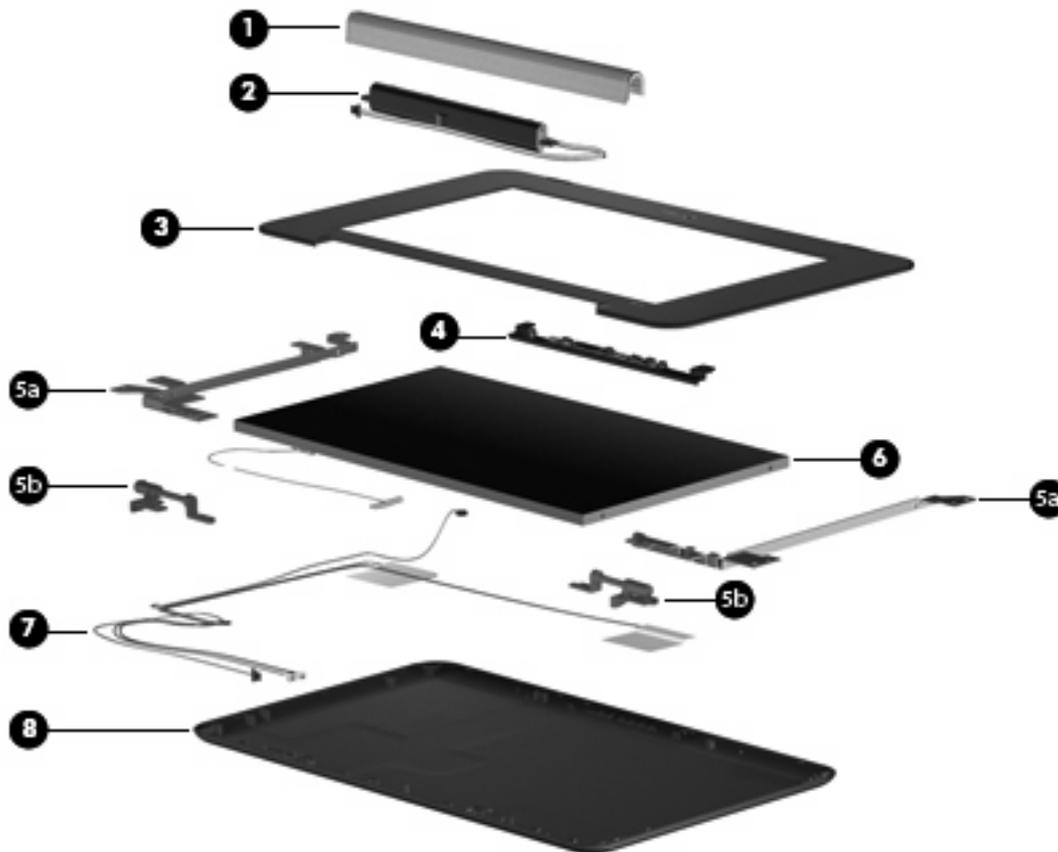

Item	Description	Spare part number
(1)	<b>Display assembly</b> (includes 1 webcam, 1 microphone, 1 speaker box, and 2 WLAN antenna transceivers/cables)	
	8.9-inch WSVGA BrightView	507309-001
	10.1-inch standard-definition AntiGlare	507312-001
	10.1-inch standard-definition AntiGlare (red-colored models)	509696-001
	10.2-inch WSVGA AntiGlare	507310-001
	10.2-inch WSVGA AntiGlare (red-colored models)	512140-001
See <a href="#">Display assembly components on page 16</a> for more spare part information.		

Item	Description	Spare part number
(2)	<b>Keyboard</b>	
	<b>NOTE:</b> For a comprehensive list of keyboard spare part numbers, see the <a href="#">Sequential part number listing on page 21</a> .	
	For use with standard device models	504611-xx1
	For use with red-colored models only	509650-xx1
(3)	<b>Top cover</b> (includes TouchPad)	504612-001
	<b>Mass storage devices</b>	
(4a)	Hard drive (select models only; includes cable and bracket): 60-GB, 4200-rpm	504601-001
	Hard Drive Hardware Kit (not illustrated)	504607-001
(4b)	Solid-state drive (includes cable and bracket)	
	16-GB	507314-001
	8-GB	507313-001
(5)	<b>Fan</b>	504615-001
	<b>NOTE:</b> The fan spare part kit does not include a fan cable. The fan cable is included in the Cable Kit, spare part number 507708-001.	
(6)	<b>Heat sink assembly</b> (includes replacement thermal material)	515099-001
(7)	<b>RTC battery</b>	507707-001
(8)	<b>System board</b> (includes processor and replacement thermal material)	504592-001
(9)	<b>Wireless modules</b>	
	<b>Broadcom 4312 802.11/b/g WLAN module:</b>	
	For use in Canada, the Cayman Islands, Guam, Puerto Rico, the U.S. Virgin Islands, and the United States	504593-001

Item	Description	Spare part number
	For use in Afghanistan, Albania, Algeria, Andorra, Angola, Antigua and Barbuda, Argentina, Armenia, Aruba, Australia, Austria, Azerbaijan, the Bahamas, Bahrain, Bangladesh, Barbados, Belarus, Belgium, Belize, Benin, Bermuda, Bhutan, Bolivia, Bosnia and Herzegovina, Botswana, Brazil, the British Virgin Islands, Brunei, Bulgaria, Burkina Faso, Burundi, Cameroon, Cape Verde, the Central African Republic, Chad, Chile, the People's Republic of China, Colombia, Comoros, the Congo, Costa Rica, Croatia, Cyprus, the Czech Republic, Denmark, Djibouti, Dominica, the Dominican Republic, East Timor, Ecuador, Egypt, El Salvador, Equatorial Guinea, Eritrea, Estonia, Ethiopia, Fiji, Finland, France, French Guiana, Gabon, Gambia, Georgia, Germany, Ghana, Gibraltar, Greece, Grenada, Guadeloupe, Guatemala, Guinea, Guinea-Bissau, Guyana, Haiti, Honduras, Hong Kong, Hungary, Iceland, India, Ireland, Israel, Italy, the Ivory Coast, Jamaica, Jordan, Kazakhstan, Kenya, Kiribati, Kyrgyzstan, Laos, Latvia, Lebanon, Lesotho, Liberia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Madagascar, Malawi, Malaysia, the Maldives, Mali, Malta, the Marshall Islands, Martinique, Mauritania, Mauritius, Mexico, Micronesia, Monaco, Mongolia, Montenegro, Morocco, Mozambique, Namibia, Nauru, Nepal, the Nether Antilles, the Netherlands, New Zealand, Nicaragua, Niger, Nigeria, Norway, Oman, Pakistan, Palau, Panama, Papua New Guinea, Paraguay, Peru, the Philippines, Poland, Portugal, the Republic of Moldova, Romania, Russia, Rwanda, Samoa, San Marino, Sao Tome and Principe, Saudi Arabia, Senegal, Serbia, the Seychelles, Sierra Leone, Singapore, Slovakia, Slovenia, the Solomon Islands, Somalia, South Africa, South Korea, Spain, Sri Lanka, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Suriname, Swaziland, Sweden, Switzerland, Taiwan, Tajikistan, Tanzania, Togo, Tonga, Trinidad and Tobago, Tunisia, Turkey, Turkmenistan, Tuvalu, Uganda, Ukraine, the United Arab Emirates, the United Kingdom, Uruguay, Uzbekistan, Vanuatu, Venezuela, Vietnam, Yemen, Zaire, Zambia, and Zimbabwe	504593-002
(10)	<b>Bluetooth module</b> (select models only)	507706-001
	<b>NOTE:</b> The Bluetooth module spare part kit does not include a Bluetooth module cable. The Bluetooth module cable is included in the Cable Kit, spare part number 507708-001.	
(11)	<b>Base enclosure</b> (includes 4 rubber feet)	
	For standard models	506337-001
	For red-colored models	512189-001
(12)	<b>USB board</b>	506336-001
(13)	<b>Memory module</b> (PC2-4200, 533-MHz, DDR2)	
	512-MB	504599-001
	1024-MB	504600-001
	2048-MB	517577-001
(14)	<b>Memory module compartment cover</b> (see <a href="#">Plastics Kit on page 18</a> for more Plastics Kit spare part information)	507317-001
(15)	<b>Battery</b> (3-cell, 26-Wh Li-Pol)	
	For standard models	504610-001
	For red-colored models (for use in all countries and regions except Germany)	512851-001
	For red-colored models (for use in Germany only)	512851-002

## Display assembly components

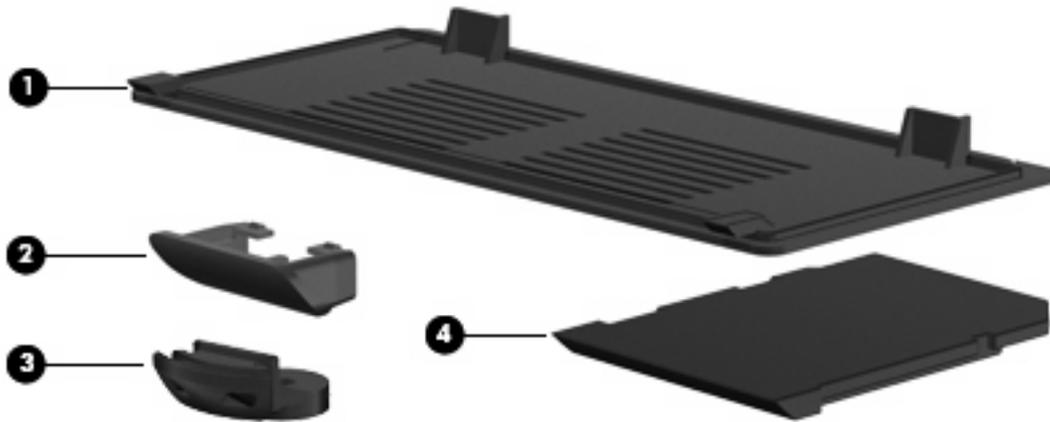

**NOTE:** 10.1-inch display assembly components are not sold separately. The complete display assembly is available as spare part number 509696-001 for the red-colored model or 507312-001 for all other models.

**NOTE:** 10.2-inch display assembly components are not sold separately. The complete display assembly is available as spare part number 512140-001 for the red-colored model, or 507310-001 for all other models.

Item	Description	Spare part number
(1)	<b>Speaker grill</b>	506338-001
(2)	<b>Speaker assembly</b> (includes left and right cables)	506335-001
(3)	<b>Display bezel</b>	
	For use with 8.9-inch panels	506333-001
(4)	<b>Webcam module</b>	
	<b>NOTE:</b> The webcam module spare part kit does not include a webcam cable. An integrated display/webcam cable for all 8.9-inch panels is included in the Display Cable Kit, spare part number 504597-001 (with WLAN).	
	For use with all 8.9-inch panels	504594-001
<b>Display Hinge Kit</b>		

<b>Item</b>	<b>Description</b>	<b>Spare part number</b>
<b>(5a)</b>	Left and right display panel brackets	
<b>(5b)</b>	Left and right display hinges	
	For use with all 8.9-inch panels	504596-001
<b>(6)</b>	<b>Display panel</b>	
	8.9-inch WSVGA BrightView	509698-001
<b>(7)</b>	<b>Display Cable Kit</b> for use with all 8.9-inch panels (includes microphone assembly and display/webcam cable)	
	Includes WLAN	504597-001
<b>(8)</b>	<b>Display enclosure</b> (includes logo)	
	For use with all 8.9-inch panels	504595-001
	<b>Display Rubber Kit</b> (not illustrated)	
	For use with all 8.9-inch panels	509699-001
	<b>Display Screw Kit</b> (not illustrated)	
	For use with all 8.9-inch panels	509700-001
	<b>Foil shield</b> (not illustrated)	
	For use with all 8.9-inch panels	506334-001

## Plastics Kit

Item	Description	Spare part number
<b>Plastics Kit:</b>		507317-001
(1)	Memory module compartment cover	
(2)	HP Mini Mobile Drive Bay cover	
(3)	Security lanyard connector	
(4)	SD Card Reader slot bezel	

# Miscellaneous parts

Description	Spare part number
<b>Bracket Kit</b>	507318-001
<ul style="list-style-type: none"> <li>• Actuators for power switch and wireless switch</li> <li>• DC jack bracket (fits over power and USB ports)</li> <li>• Internal display switch bracket</li> <li>• RJ-45 connector bracket</li> <li>• USB connector bracket</li> </ul>	
<b>Cable Kit</b>	507708-001
<ul style="list-style-type: none"> <li>• Bluetooth module cable</li> <li>• Internal display switch module</li> <li>• Power cable</li> <li>• SIM card cable</li> <li>• USB board cable</li> </ul>	
<b>HP Mini Mobile Drive</b> (supported on models equipped with a solid-state drive and HP Mini Mobile Drive Bay)	
2-GB	512329-001
4-GB	512330-001
8-GB	512331-001
<b>Power cord</b>	
For use in Argentina	490371-D01
For use in Australia	490371-011
For use in Brazil	490371-201
For use in China	490371-AA1
For use in Denmark	490371-081
For use in Europe	490371-021
For use in India	490371-D61
For use in Italy	490371-061
For use in Japan	490371-291
For use in North America	490371-001
For use in Singapore and the United Kingdom	490371-031
For use in South Africa	490371-AR1
For use in South Korea	490371-AD1
For use in Taiwan	490371-AB1
<b>Rubber Kit</b> (contains 4 device feet and RJ-45 cover)	504613-001

Description	Spare part number
<b>Screw Kit</b>	504614-001
<ul style="list-style-type: none"> <li>• Phillips PM1.6×2.5 screw</li> <li>• Phillips PM1.6×4.0 screw</li> <li>• Phillips PM1.6×6.0 screw</li> <li>• Phillips PM2.0×3.0 screw</li> <li>• Phillips PM2.0×4.5 screw</li> <li>• Phillips PM2.5×5.0 screw</li> <li>• Phillips PM2.5×7.0 screw</li> </ul>	
<b>HP Mini Sleeve</b>	
For standard models	512321-001
For red-colored models	511844-001
<b>VGA cable</b>	512315-001
<b>30-W UMA AC adapter</b>	
For use in all countries and regions except Germany	496813-001
For use in Germany only	512852-001

## Sequential part number listing

Spare part number	Description
490371-001	Power cord for use in North America
490371-011	Power cord for use in Australia
490371-021	Power cord for use in Europe
490371-031	Power cord for use in Singapore and the United Kingdom
490371-061	Power cord for use in Italy
490371-081	Power cord for use in Denmark
490371-201	Power cord for use in Brazil
490371-291	Power cord for use in Japan
490371-AA1	Power cord for use in China
490371-AB1	Power cord for use in Taiwan
490371-AD1	Power cord for use in South Korea
490371-AR1	Power cord for use in South Africa
490371-D01	Power cord for use in Argentina
490371-D61	Power cord for use in India
496813-001	30-W UMA AC adapter for use in all countries and regions except Germany
504592-001	System board equipped with 1.6-GHz processor (includes replacement thermal material)
504593-001	Broadcom 4312 802.11/b/g WLAN module for use in Canada, the Cayman Islands, Guam, Puerto Rico, the U.S. Virgin Islands, and the United States
504593-002	Broadcom 4312 802.11/b/g WLAN module for use in Afghanistan, Albania, Algeria, Andorra, Angola, Antigua and Barbuda, Argentina, Armenia, Aruba, Australia, Austria, Azerbaijan, the Bahamas, Bahrain, Bangladesh, Barbados, Belarus, Belgium, Belize, Benin, Bermuda, Bhutan, Bolivia, Bosnia and Herzegovina, Botswana, Brazil, the British Virgin Islands, Brunei, Bulgaria, Burkina Faso, Burundi, Cameroon, Cape Verde, the Central African Republic, Chad, Chile, the People's Republic of China, Colombia, Comoros, the Congo, Costa Rica, Croatia, Cyprus, the Czech Republic, Denmark, Djibouti, Dominica, the Dominican Republic, East Timor, Ecuador, Egypt, El Salvador, Equatorial Guinea, Eritrea, Estonia, Ethiopia, Fiji, Finland, France, French Guiana, Gabon, Gambia, Georgia, Germany, Ghana, Gibraltar, Greece, Grenada, Guadeloupe, Guatemala, Guinea, Guinea-Bissau, Guyana, Haiti, Honduras, Hong Kong, Hungary, Iceland, India, Ireland, Israel, Italy, the Ivory Coast, Jamaica, Jordan, Kazakhstan, Kenya, Kiribati, Kyrgyzstan, Laos, Latvia, Lebanon, Lesotho, Liberia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Madagascar, Malawi, Malaysia, the Maldives, Mali, Malta, the Marshall Islands, Martinique, Mauritania, Mauritius, Mexico, Micronesia, Monaco, Mongolia, Montenegro, Morocco, Mozambique, Namibia, Nauru, Nepal, the Nether Antilles, the Netherlands, New Zealand, Nicaragua, Niger, Nigeria, Norway, Oman, Pakistan, Palau, Panama, Papua New Guinea, Paraguay, Peru, the Philippines, Poland, Portugal, the Republic of Moldova, Romania, Russia, Rwanda, Samoa, San Marino, Sao Tome and Principe, Saudi Arabia, Senegal, Serbia, the Seychelles, Sierra Leone, Singapore, Slovakia, Slovenia, the Solomon Islands, Somalia, South Africa, South Korea, Spain, Sri Lanka, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Suriname, Swaziland, Sweden, Switzerland, Taiwan, Tajikistan, Tanzania, Togo, Tonga, Trinidad and Tobago, Tunisia, Turkey, Turkmenistan, Tuvalu, Uganda, Ukraine, the United Arab Emirates, the United Kingdom, Uruguay, Uzbekistan, Vanuatu, Venezuela, Vietnam, Yemen, Zaire, Zambia, and Zimbabwe
504594-001	Webcam module for use with all 8.9-inch panels
	<b>NOTE:</b> The webcam module spare part kit does not include a webcam cable. An integrated display/webcam cable is included in the Display Cable Kit, spare part number 504597-001 (with WLAN).

Spare part number	Description
504595-001	Display enclosure (includes logo) for use with 8.9-inch panels
504596-001	Display Hinge Kit for use with all 8.9-inch panels (includes left/right display hinges and display panel brackets)
504597-001	Display Cable Kit with WLAN for use with all 8.9-inch panels (includes microphone assembly and display/webcam cable)
504599-001	512-MB memory module (PC2-4200, 533-MHz, DDR2)
504600-001	1024-MB memory module (PC2-4200, 533-MHz, DDR2)
504601-001	60-GB, 4200-rpm hard drive (includes cable and bracket)
504607-001	Hard Drive Hardware Kit
504610-001	3-cell, 26-Wh Li-Pol battery
504611-001	Keyboard for use in the United States
504611-071	Keyboard for use in Spain
504611-161	Keyboard for use in Latin America
504611-251	Keyboard for use in Russia
504611-281	Keyboard for use in Thailand
504611-291	Keyboard for use in Japan
504611-AB1	Keyboard for use in Taiwan
504611-AD1	Keyboard for use in South Korea
504612-001	Top cover (includes TouchPad)
504613-001	Rubber Kit (contains 4 device feet and RJ-45 cover)
504614-001	Screw Kit
504615-001	Fan
	<b>NOTE:</b> The fan spare part kit does not include a fan cable. The fan cable is included in the Cable Kit, spare part number 507708-001.
506333-001	Display bezel for use with 8.9-inch panels
506334-001	Foil shield for use with all 8.9-inch display panels
506335-001	Speaker assembly (includes left and right cables)
506336-001	USB board
506337-001	Base enclosure (includes 4 rubber feet)
506338-001	Speaker grill
507309-001	8.9-inch WSVGA BrightView display assembly (includes 1 webcam, 1 microphone, 1 speaker box, and 2 WLAN antenna transceivers/cables)
507310-001	10.2-inch, WSVGA, AntiGlare display assembly (includes 1 webcam, 1 microphone, 1 speaker box, and 2 WLAN antenna transceivers/cables)
507312-001	10.1-inch, standard-definition, AntiGlare display assembly (includes 1 webcam, 1 microphone, 1 speaker box, and 2 WLAN antenna transceivers/cables)

Spare part number	Description
507313-001	8-GB solid-state drive (includes cable and bracket)
507314-001	16-GB solid-state drive (includes cable and bracket)
507317-001	Plastics Kit (see <a href="#">Plastics Kit on page 18</a> for more Plastics Kit spare part number information)
507318-001	Bracket Kit
507706-001	Bluetooth module
	<b>NOTE:</b> The Bluetooth module spare part kit does not include a Bluetooth module cable. The Bluetooth module cable is included in the Cable Kit, spare part number 507708-001.
507707-001	RTC battery
507708-001	Cable Kit
509650-001	Keyboard for use in the United States (red-colored models only)
509650-031	Keyboard for use in the United Kingdom (red-colored models only)
509650-041	Keyboard for use in Germany (red-colored models only)
509650-051	Keyboard for use in France (red-colored models only)
509650-061	Keyboard for use in Italy (red-colored models only)
509650-071	Keyboard for use in Spain (red-colored models only)
509650-131	Keyboard for use in Portugal (red-colored models only)
509650-141	Keyboard for use in Turkey (red-colored models only)
509650-161	Keyboard for use in Latin America (red-colored models only)
509650-171	Keyboard for use in Saudi Arabia (red-colored models only)
509650-251	Keyboard for use in Russia (red-colored models only)
509650-281	Keyboard for use in Thailand (red-colored models only)
509650-291	Keyboard for use in Japan (red-colored models only)
509650-AB1	Keyboard for use in Taiwan (red-colored models only)
509650-AD1	Keyboard for use in South Korea (red-colored models only)
509650-B31	Keyboard for international use (red-colored models only)
509696-001	10.1-inch, standard-definition, AntiGlare display assembly for red-colored models (includes 1 webcam, 1 microphone, 1 speaker box, and 2 WLAN antenna transceivers/cables)
509698-001	8.9-inch WSVGA BrightView display panel
509699-001	Display Rubber Kit for use with all 8.9-inch panels
509700-001	Display Screw Kit for use with all 8.9-inch panels
511844-001	HP Mini Sleeve for red-colored models
512140-001	10.2-inch, WSVGA, AntiGlare display assembly for red-colored models (includes 1 webcam, 1 microphone, 1 speaker box, and 2 WLAN antenna transceivers/cables)
512189-001	Base enclosure (includes 4 rubber feet) for red-colored models
512190-001	Top cover (includes TouchPad) for red-colored models

<b>Spare part number</b>	<b>Description</b>
512191-001	Speaker grill for red-colored models
512192-001	Plastics Kit for red-colored models (see <a href="#">Plastics Kit on page 18</a> for more Plastics Kit spare part number information)
512315-001	VGA cable
512321-001	HP Mini Sleeve
512329-001	HP Mini Mobile Drive, 2-GB
512330-001	HP Mini Mobile Drive, 4-GB
512331-001	HP Mini Mobile Drive, 8-GB
512851-001	3-cell, 26-Wh Li-Pol battery for red-colored models (for use in all countries and regions except Germany)
512851-002	3-cell, 26-Wh Li-Pol battery for red-colored models (for use in Germany only)
512852-001	30-W UMA AC adapter (for use in Germany only)
515099-001	Heat sink assembly (includes replacement thermal material)
517577-001	2048-MB memory module (PC2-4200, 533-MHz, DDR2)

---

# 4 Removal and replacement procedures

## Preliminary replacement requirements

### Tools required

You will need the following tools to complete the removal and replacement procedures:

- Flat-bladed screwdriver
- Magnetic screwdriver
- Phillips P0 and P000 screwdrivers

### Service considerations

The following sections include some of the considerations that you must keep in mind during disassembly and assembly procedures.

---

 **NOTE:** As you remove each subassembly from the device, place the subassembly (and all accompanying screws) away from the work area to prevent damage.

---

### Plastic parts

---

△ **CAUTION:** Using excessive force during disassembly and reassembly can damage plastic parts. Use care when handling the plastic parts. Apply pressure only at the points designated in the maintenance instructions.

---

### Cables and connectors

---

△ **CAUTION:** When servicing the device, be sure that cables are placed in their proper locations during the reassembly process. Improper cable placement can damage the device.

---

Cables must be handled with extreme care to avoid damage. Apply only the tension required to unseat or seat the cables during removal and insertion. Handle cables by the connector whenever possible. In all cases, avoid bending, twisting, or tearing cables. Be sure that cables are routed in such a way that they cannot be caught or snagged by parts being removed or replaced. Handle flex cables with extreme care; these cables tear easily.

## Drive handling

△ **CAUTION:** Drives are fragile components that must be handled with care. To prevent damage to the device, damage to a drive, or loss of information, observe these precautions:

Before removing or inserting a hard drive, shut down the device. If you are unsure whether the device is off or in Hibernation, turn the device on, and then shut it down through the operating system.

Before handling a drive, be sure that you are discharged of static electricity. While handling a drive, avoid touching the connector.

Handle drives on surfaces covered with at least one inch of shock-proof foam.

Avoid dropping drives from any height onto any surface.

After removing a hard drive, an optical drive, or a diskette drive, place it in a static-proof bag.

Avoid exposing a hard drive to products that have magnetic fields, such as monitors or speakers.

Avoid exposing a drive to temperature extremes or liquids.

If a drive must be mailed, place the drive in a bubble pack mailer or other suitable form of protective packaging and label the package "FRAGILE."

---

# Grounding guidelines

## Electrostatic discharge damage

Electronic components are sensitive to electrostatic discharge (ESD). Circuitry design and structure determine the degree of sensitivity. Networks built into many integrated circuits provide some protection, but in many cases, ESD contains enough power to alter device parameters or melt silicon junctions.

A discharge of static electricity from a finger or other conductor can destroy static-sensitive devices or microcircuitry. Even if the spark is neither felt nor heard, damage may have occurred.

An electronic device exposed to ESD may not be affected at all and can work perfectly throughout a normal cycle. Or the device may function normally for a while, then degrade in the internal layers, reducing its life expectancy.

△ **CAUTION:** To prevent damage to the device when you are removing or installing internal components, observe these precautions:

Keep components in their electrostatic-safe containers until you are ready to install them.

Use nonmagnetic tools.

Before touching an electronic component, discharge static electricity by using the guidelines described in this section.

Avoid touching pins, leads, and circuitry. Handle electronic components as little as possible.

If you remove a component, place it in an electrostatic-safe container.

The following table shows how humidity affects the electrostatic voltage levels generated by different activities.

△ **CAUTION:** A product can be degraded by as little as 700 V.

Typical electrostatic voltage levels			
Event	Relative humidity		
	10%	40%	55%
Walking across carpet	35,000 V	15,000 V	7,500 V
Walking across vinyl floor	12,000 V	5,000 V	3,000 V
Motions of bench worker	6,000 V	800 V	400 V
Removing DIPS from plastic tube	2,000 V	700 V	400 V
Removing DIPS from vinyl tray	11,500 V	4,000 V	2,000 V
Removing DIPS from Styrofoam	14,500 V	5,000 V	3,500 V
Removing bubble pack from PCB	26,500 V	20,000 V	7,000 V
Packing PCBs in foam-lined box	21,000 V	11,000 V	5,000 V

## Packaging and transporting guidelines

Follow these grounding guidelines when packaging and transporting equipment:

- To avoid hand contact, transport products in static-safe tubes, bags, or boxes.
- Protect ESD-sensitive parts and assemblies with conductive or approved containers or packaging.
- Keep ESD-sensitive parts in their containers until the parts arrive at static-free workstations.
- Place items on a grounded surface before removing items from their containers.
- Always be properly grounded when touching a component or assembly.
- Store reusable ESD-sensitive parts from assemblies in protective packaging or nonconductive foam.
- Use transporters and conveyors made of antistatic belts and roller bushings. Be sure that mechanized equipment used for moving materials is wired to ground and that proper materials are selected to avoid static charging. When grounding is not possible, use an ionizer to dissipate electric charges.

## Workstation guidelines

Follow these grounding workstation guidelines:

- Cover the workstation with approved static-shielding material.
- Use a wrist strap connected to a properly grounded work surface and use properly grounded tools and equipment.
- Use conductive field service tools, such as cutters, screwdrivers, and vacuums.
- When fixtures must directly contact dissipative surfaces, use fixtures made only of static-safe materials.
- Keep the work area free of nonconductive materials, such as ordinary plastic assembly aids and Styrofoam.
- Handle ESD-sensitive components, parts, and assemblies by the case or PCM laminate. Handle these items only at static-free workstations.
- Avoid contact with pins, leads, or circuitry.
- Turn off power and input signals before inserting or removing connectors or test equipment.

## Equipment guidelines

Grounding equipment must include either a wrist strap or a foot strap at a grounded workstation.

- When seated, wear a wrist strap connected to a grounded system. Wrist straps are flexible straps with a minimum of one megohm  $\pm 10\%$  resistance in the ground cords. To provide proper ground, wear a strap snugly against the skin at all times. On grounded mats with banana-plug connectors, use alligator clips to connect a wrist strap.
- When standing, use foot straps and a grounded floor mat. Foot straps (heel, toe, or boot straps) can be used at standing workstations and are compatible with most types of shoes or boots. On conductive floors or dissipative floor mats, use foot straps on both feet with a minimum of one megohm resistance between the operator and ground. To be effective, the conductive strips must be worn in contact with the skin.

The following grounding equipment is recommended to prevent electrostatic damage:

- Antistatic tape
- Antistatic smocks, aprons, and sleeve protectors
- Conductive bins and other assembly or soldering aids
- Nonconductive foam
- Conductive tabletop workstations with ground cords of one megohm resistance
- Static-dissipative tables or floor mats with hard ties to the ground
- Field service kits
- Static awareness labels
- Material-handling packages
- Nonconductive plastic bags, tubes, or boxes
- Metal tote boxes
- Electrostatic voltage levels and protective materials

The following table lists the shielding protection provided by antistatic bags and floor mats.

Material	Use	Voltage protection level
Antistatic plastic	Bags	1,500 V
Carbon-loaded plastic	Floor mats	7,500 V
Metallized laminate	Floor mats	5,000 V

# Component replacement procedures

This chapter provides removal and replacement procedures.

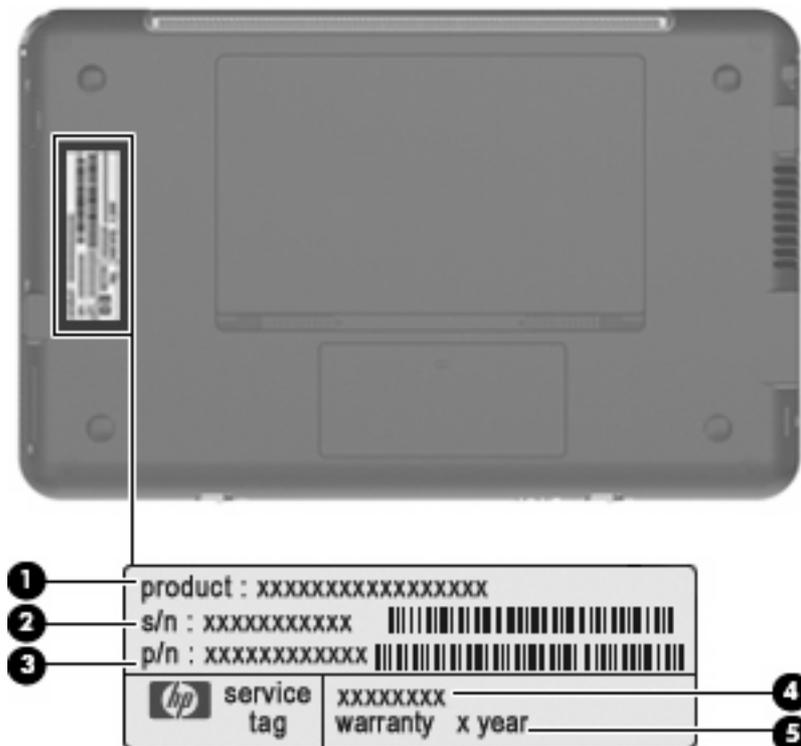

There are as many as 49 screws, in 7 different sizes, that must be removed, replaced, or loosened when servicing the device. Make special note of each screw size and location during removal and replacement.

## Service tag

The service tag, affixed to the bottom of the device, provides information that may be needed when troubleshooting system problems. The service tag provides the following information:

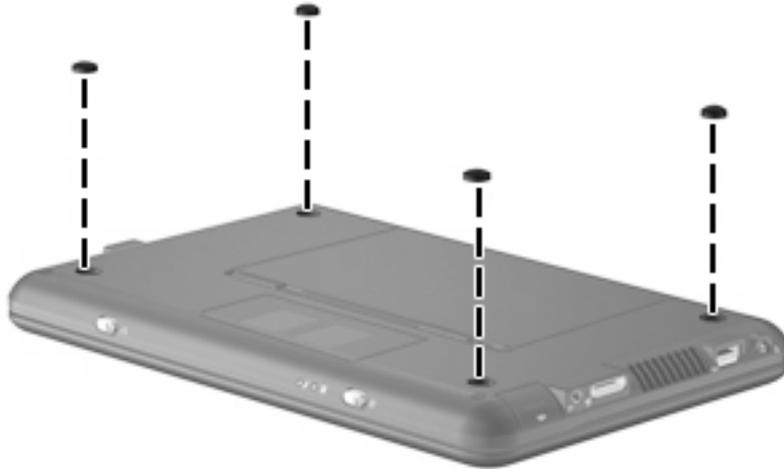

- (1) Product name: This is the product name affixed to the front of the device.
- (2) Serial number (s/n): This is an alphanumeric identifier that is unique to each product.
- (3) Part number/Product number (p/n): This number provides specific information about the product's hardware components. The part number helps a service technician to determine what components and parts are needed.
- (4) Model description: This is the number used to locate documents, drivers, and support for the device.
- (5) Warranty period: This number describes the duration of the warranty period for the device.

When ordering parts or requesting information, provide the device serial number and model description provided on the service tag.

## Device feet

The device feet are adhesive-backed rubber pads. The feet are included in the Rubber Kit, spare part number 504613-001. There are 4 rubber feet that are installed on the base enclosure in the locations illustrated below.

## Battery

Description	Spare part number
3-cell, 26-Wh Li-Pol battery	504610-001
3-cell, 26-Wh Li-Pol battery for red-colored models (for use in all countries and regions except Germany)	512851-001
3-cell, 26-Wh Li-Pol battery for red-colored models (for use in Germany only)	512851-002

Before disassembling the device, follow these steps:

1. Shut down the device. If you are unsure whether the device is off or in Hibernation, turn the device on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the device.
3. Disconnect the power from the device by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the device.

Remove the battery:

1. Turn the device upside down on a flat surface, with the battery bay toward you.
2. Slide the battery release latches (1) to release the battery.
3. Pivot the battery (2) upward and remove the battery (3) from the device.

To install the battery, insert the rear edge of the battery into the battery bay and pivot the battery downward until it is seated. The battery release latch automatically locks the battery into place.

## Memory module

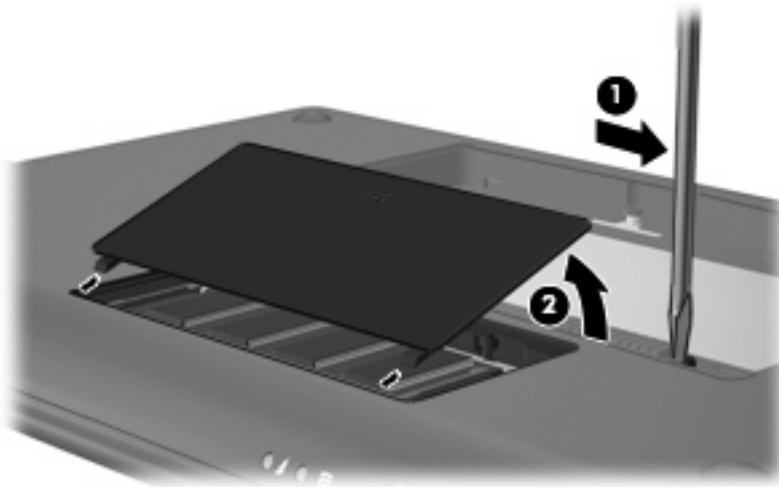

Description	Spare part number
512-MB (PC2-4200, 533-MHz, DDR2)	504599-001
1024-MB (PC2-4200, 533-MHz, DDR2)	504600-001
2048-MB (PC2-4200, 533-MHz, DDR2)	517577-001

Before removing the memory module, follow these steps:

1. Shut down the device. If you are unsure whether the device is off or in Hibernation, turn the device on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the device.
3. Disconnect the power from the device by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the device.
4. Remove the battery (see [Battery on page 32](#)).

Remove the memory module:

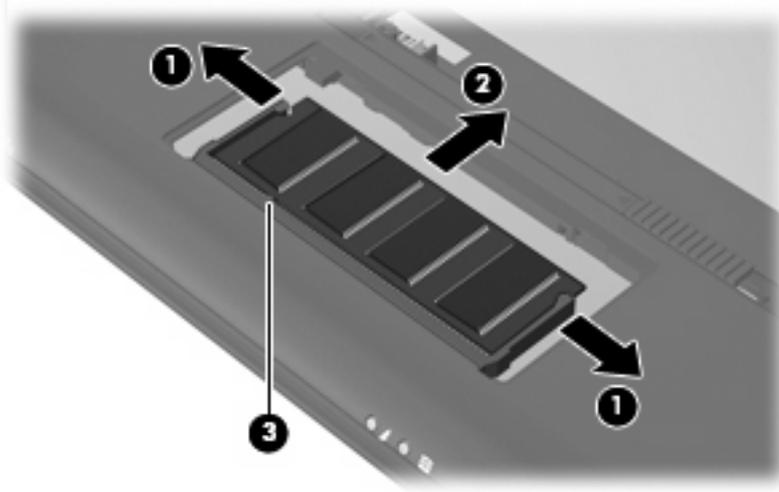

1. Slide the right battery release latch to the inside or “unlocked” position to reveal the release latch for the memory module compartment cover. Use a thin, narrow tool to slide the release latch to the outside or “unlocked” position (1). (The edge of the cover rises away from the device.)
2. Remove the cover (2). The memory module compartment cover is included in the Plastics Kit, spare part number 507317-001.

3. Spread the retaining tabs (1) on each side of the memory module slot to release the memory module. (The edge of the module opposite the slot rises away from the device.)

4. Remove the memory module (2) by pulling the module away from the slot at an angle.

 **NOTE:** Memory modules are designed with a notch (3) to prevent incorrect insertion into the memory module slot.

Reverse this procedure to install a memory module.

## Keyboard

 **NOTE:** For a comprehensive list of spare part numbers, see the [Sequential part number listing on page 21](#).

Description	Spare part number	Description	Spare part number
For use with standard device models	504611-xx1	For use with red-colored models only	509650-xx1

Before removing the keyboard, follow these steps:

1. Shut down the device. If you are unsure whether the device is off or in Hibernation, turn the device on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the device.
3. Disconnect the power from the device by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the device.
4. Remove the battery (see [Battery on page 32](#)).

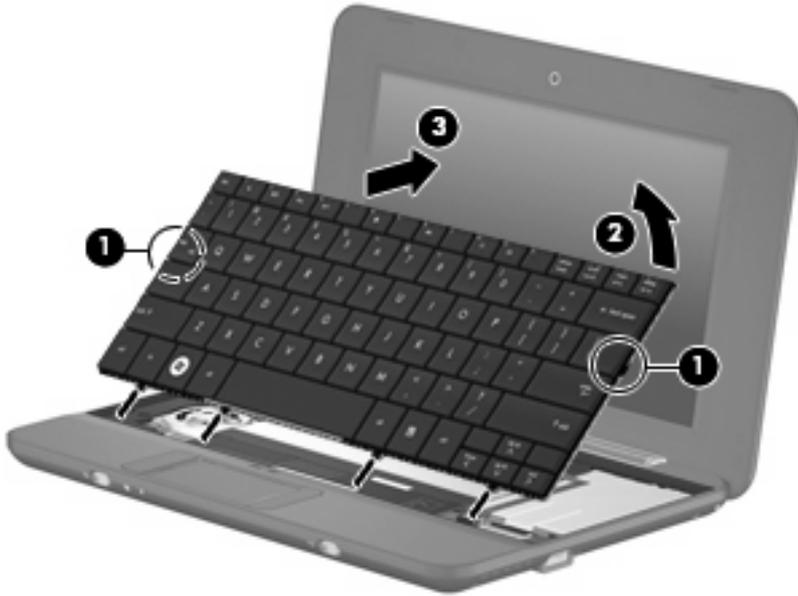

Remove the keyboard:

1. Remove the Phillips PM1.6×4.0 screw (1) and the Phillips PM1.6×6.0 screw (2) that secure the keyboard to the device.

2. Turn the device display-side up, with the front toward you.
3. Open the device as far as possible.

4. Grasp the tabs on the outer edges of the keyboard (1), lift the rear edge of the keyboard (2) until it rests at an angle, and then slide it back (3) until it rests on the display assembly.

5. Release the zero insertion force (ZIF) connector (1) to which the keyboard cable is attached, and then disconnect the cable (2) from the system board.

6. Remove the keyboard.

Reverse this procedure to install the keyboard.

## Mass storage devices

 **NOTE:** Each hard drive spare part kit and solid-state drive spare part kit includes a cable and bracket.

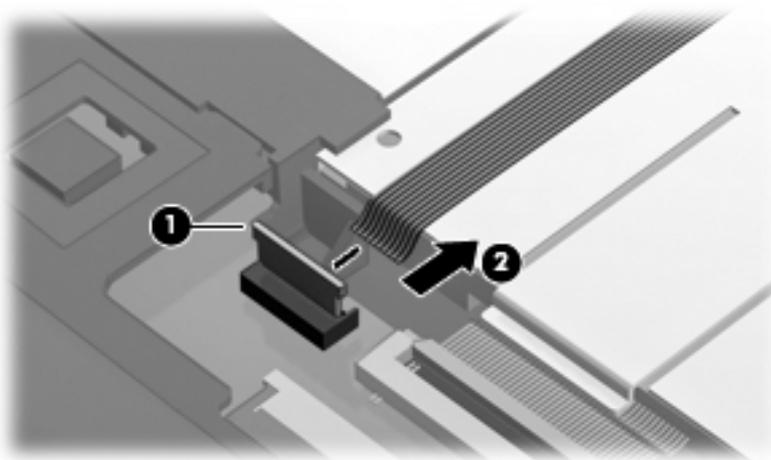

Description	Spare part number
8-GB solid-state drive	507313-001
16-GB solid-state drive	507314-001
60-GB, 4200-rpm hard drive	504601-001

Before removing the hard drive or solid-state drive, follow these steps:

1. Shut down the device. If you are unsure whether the device is off or in Hibernation, turn the device on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the device.
3. Disconnect the power from the device by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the device.
4. Remove the battery (see [Battery on page 32](#)).
5. Remove the keyboard (see [Keyboard on page 35](#)).

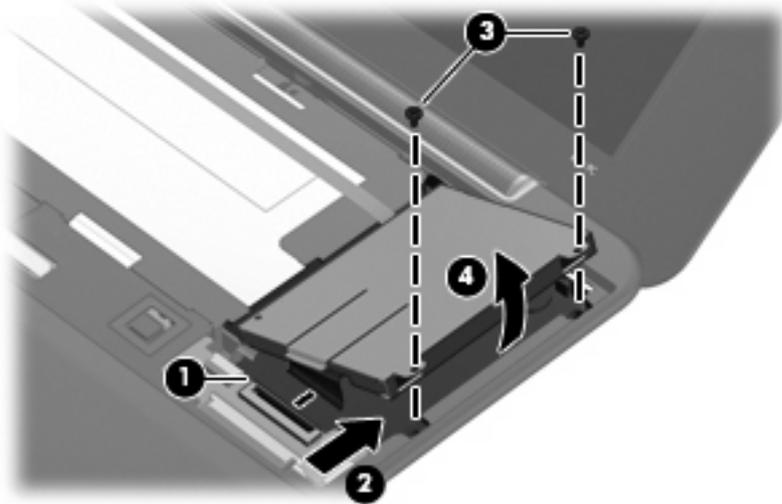

To remove the hard drive:

1. Release the ZIF connector **(1)** to which the USB board pass-through cable is attached. The cable lies across the top of the hard drive.
2. Disconnect the USB board pass-through cable **(2)**, and then detach the tape from the top of the hard drive.

3. Release the low insertion force (LIF) connector **(1)** to which the hard drive cable is attached, and then disconnect the cable **(2)**.

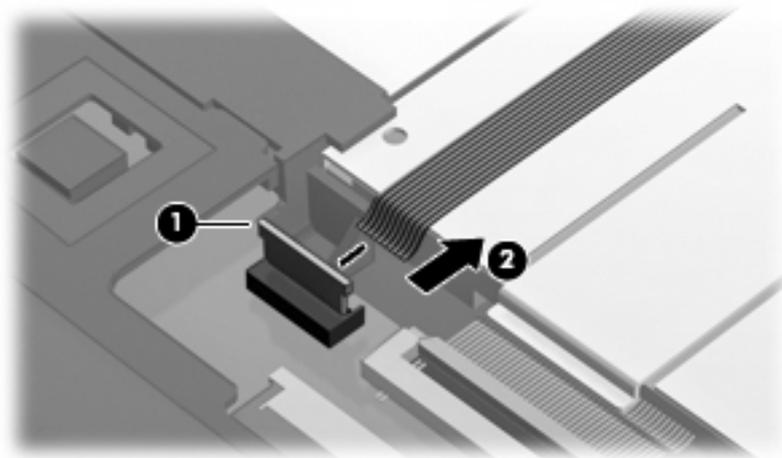

4. Remove the two Phillips PM2.0×4.5 screws (3) that secure the hard drive to the device. Then lift the drive (4) up, and slide it out of the drive bay.

Reverse this procedure to install the hard drive.

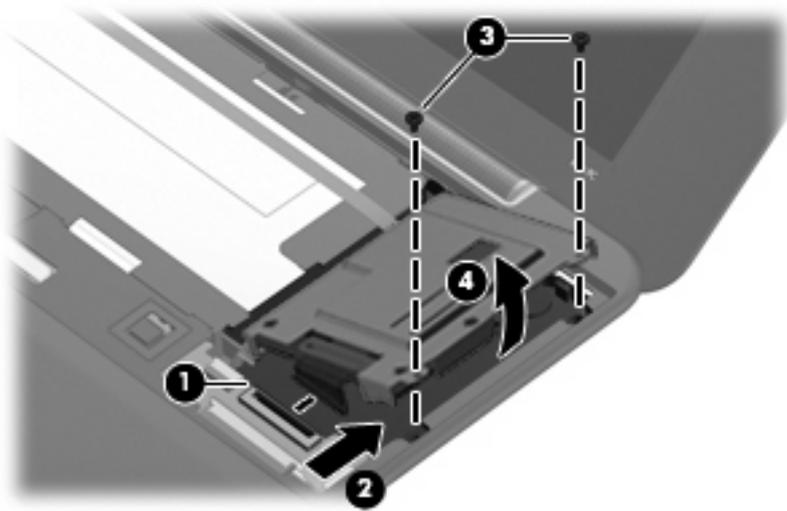

To remove the solid-state drive:

1. Release the ZIF connector (1) to which the USB board pass-through cable (that lies across the top of the drive) is attached.
2. Disconnect the USB board pass-through cable (2), and then detach the tape from the top of the drive.

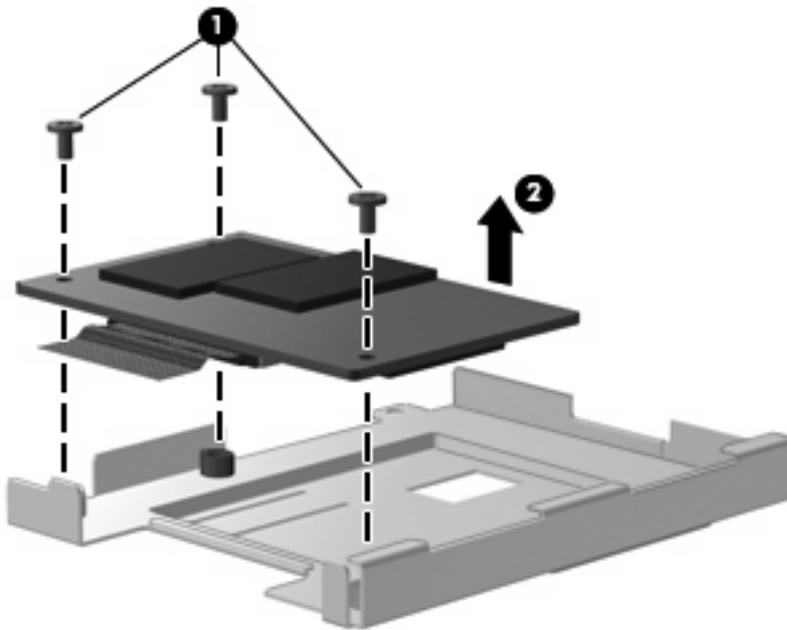

3. Release the LIF connector (1) to which the solid-state drive cable is attached, and then disconnect the cable (2).

4. Remove the two Phillips PM2.0×4.5 screws (3) that secure the drive bracket to the device, and then remove the bracket (4) from the drive bay.

5. Remove the three Phillips PM2.0×3.0 screws (1) that secure the solid-state drive to the bracket, and then remove the drive from the bracket (2).

Reverse this procedure to install the solid-state drive.

## Top cover

Description	Spare part number
Top cover (includes TouchPad)	504612-001

Before removing the top cover, follow these steps:

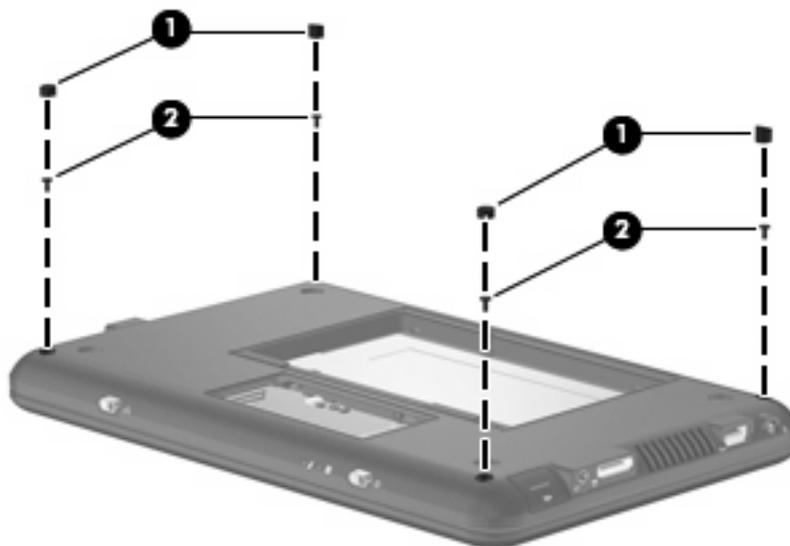

1. Shut down the device. If you are unsure whether the device is off or in Hibernation, turn the device on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the device.
3. Disconnect the power from the device by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the device.
4. Remove the battery (see [Battery on page 32](#)).
5. Remove the keyboard (see [Keyboard on page 35](#)).
6. Remove the hard drive or solid-state drive (see [Mass storage devices on page 37](#)).

Remove the top cover:

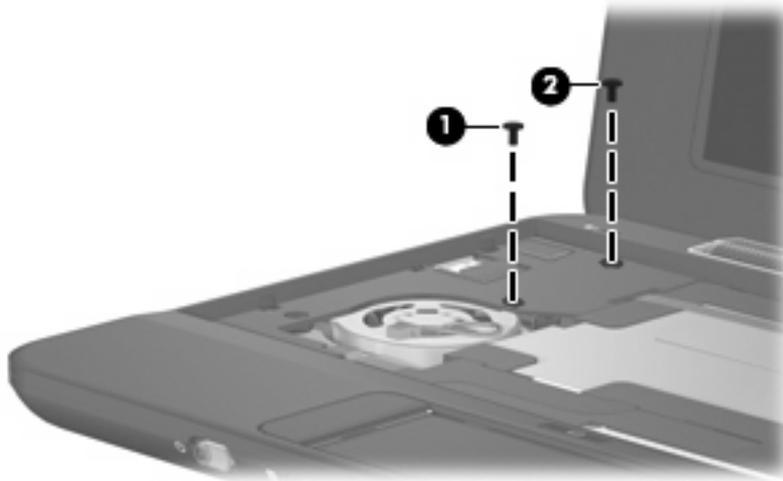

1. Turn the device upside down, with the front toward you.
2. Use a thin, flat tool to remove the four screw covers (1).

There are three different variations of the covers, each of which is shaped like a rounded square:

- The two front covers are short in height and are notched to prevent incorrect insertion.
  - The right rear cover is taller in height and is notched.
  - The left rear cover is taller in height and is *not* notched.
3. Remove the four Phillips PM2.5×7.0 screws (2) that secure the top cover to the base enclosure.

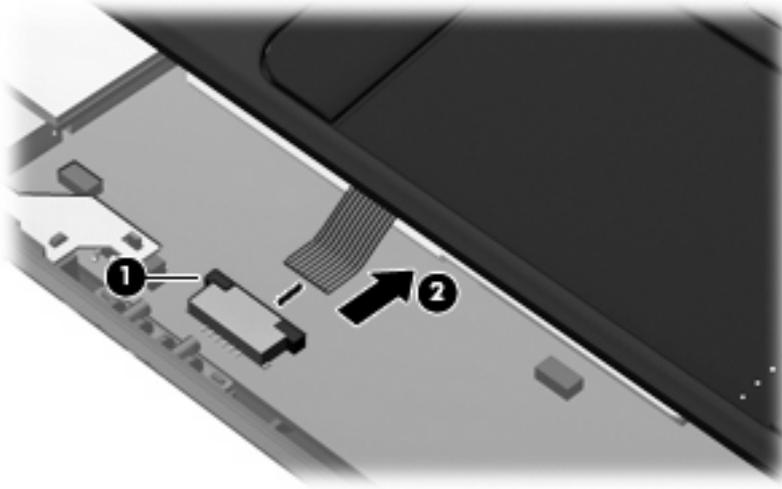

4. Turn the device right-side up, with the front toward you.
5. Open the device as far as possible.
6. Remove the Phillips PM2.0×4.5 screw (1) and the Phillips PM2.5×5.0 screw (2) that secure the top cover to the base enclosure.

7. Lift the rear edge of the top cover (1), swing it up, and then slide it back slightly to rest against the display assembly (2) at an angle.

8. Release the ZIF connector (1) to which the TouchPad button board cable is connected, and then disconnect the cable (2) from the system board.

9. Remove the top cover.

Reverse this procedure to install the top cover.

## WLAN module

Description	Spare part number
<b>Broadcom 4312 802.11/b/g WLAN modules:</b>	
For use in Canada, the Cayman Islands, Guam, Puerto Rico, the U.S. Virgin Islands, and the United States	504593-001
For use in Afghanistan, Albania, Algeria, Andorra, Angola, Antigua and Barbuda, Argentina, Armenia, Aruba, Australia, Austria, Azerbaijan, the Bahamas, Bahrain, Bangladesh, Barbados, Belarus, Belgium, Belize, Benin, Bermuda, Bhutan, Bolivia, Bosnia and Herzegovina, Botswana, Brazil, the British Virgin Islands, Brunei, Bulgaria, Burkina Faso, Burundi, Cameroon, Cape Verde, the Central African Republic, Chad, Chile, the People's Republic of China, Colombia, Comoros, the Congo, Costa Rica, Croatia, Cyprus, the Czech Republic, Denmark, Djibouti, Dominica, the Dominican Republic, East Timor, Ecuador, Egypt, El Salvador, Equatorial Guinea, Eritrea, Estonia, Ethiopia, Fiji, Finland, France, French Guiana, Gabon, Gambia, Georgia, Germany, Ghana, Gibraltar, Greece, Grenada, Guadeloupe, Guatemala, Guinea, Guinea-Bissau, Guyana, Haiti, Honduras, Hong Kong, Hungary, Iceland, India, Ireland, Israel, Italy, the Ivory Coast, Jamaica, Jordan, Kazakhstan, Kenya, Kiribati, Kyrgyzstan, Laos, Latvia, Lebanon, Lesotho, Liberia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Madagascar, Malawi, Malaysia, the Maldives, Mali, Malta, the Marshall Islands, Martinique, Mauritania, Mauritius, Mexico, Micronesia, Monaco, Mongolia, Montenegro, Morocco, Mozambique, Namibia, Nauru, Nepal, the Nether Antilles, the Netherlands, New Zealand, Nicaragua, Niger, Nigeria, Norway, Oman, Pakistan, Palau, Panama, Papua New Guinea, Paraguay, Peru, the Philippines, Poland, Portugal, the Republic of Moldova, Romania, Russia, Rwanda, Samoa, San Marino, Sao Tome and Principe, Saudi Arabia, Senegal, Serbia, the Seychelles, Sierra Leone, Singapore, Slovakia, Slovenia, the Solomon Islands, Somalia, South Africa, South Korea, Spain, Sri Lanka, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Suriname, Swaziland, Sweden, Switzerland, Taiwan, Tajikistan, Tanzania, Togo, Tonga, Trinidad and Tobago, Tunisia, Turkey, Turkmenistan, Tuvalu, Uganda, Ukraine, the United Arab Emirates, the United Kingdom, Uruguay, Uzbekistan, Vanuatu, Venezuela, Vietnam, Yemen, Zaire, Zambia, and Zimbabwe	504593-002

△ **CAUTION:** To prevent an unresponsive system, replace the wireless module only with a wireless module authorized for use in the device by the governmental agency that regulates wireless devices in your country or region. If you replace the module and then receive a warning message, remove the module to restore device functionality, and then contact technical support through Help and Support.

Before removing the WLAN module, follow these steps:

1. Shut down the device. If you are unsure whether the device is off or in Hibernation, turn the device on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the device.
3. Disconnect the power from the device by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the device.
4. Remove the battery (see [Battery on page 32](#)).
5. Remove the following components:
  - a. Keyboard (see [Keyboard on page 35](#))
  - b. Hard drive or solid-state drive (see [Mass storage devices on page 37](#))
  - c. Top cover (see [Top cover on page 40](#))

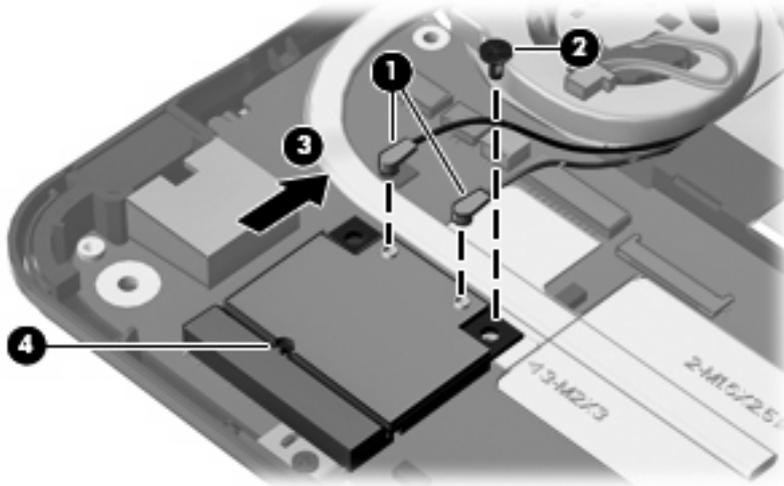

Remove the WLAN module:

1. Disconnect the wireless antenna cables (1) from the terminals on the WLAN module.
2. Remove the Phillips PM2.0×3.0 screw (2) that secures the WLAN module to the system board. (The edge of the module opposite the slot rises away from the device.)
3. Remove the WLAN module (3) by pulling the module away from the slot at an angle.

---

 **NOTE:** WLAN modules are designed with a notch (4) to prevent incorrect insertion.

---

Reverse this procedure to install the WLAN module.

## RTC battery

Description	Spare part number
RTC battery	507707-001

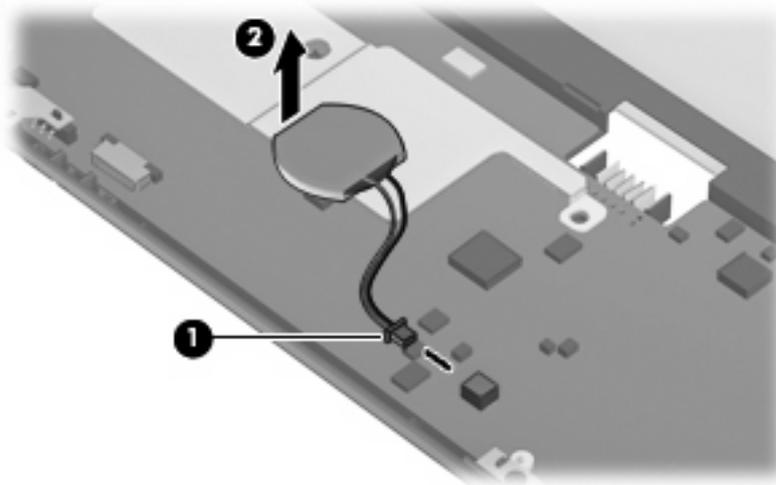

Before removing the real-time clock (RTC) battery, follow these steps:

1. Shut down the device. If you are unsure whether the device is off or in Hibernation, turn the device on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the device.
3. Disconnect the power from the device by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the device.
4. Remove the battery (see [Battery on page 32](#)).
5. Remove the following components:
  - a. Keyboard (see [Keyboard on page 35](#))
  - b. Hard drive or solid-state drive (see [Mass storage devices on page 37](#))
  - c. Top cover (see [Top cover on page 40](#))

Remove the RTC battery:

1. Disconnect the RTC battery cable (1) from the system board.
2. Detach the RTC battery (2) from the system board, and then remove the RTC battery.

 **NOTE:** The RTC battery is attached to the system board with double-sided tape.

Reverse this procedure to install the RTC battery.

## Bluetooth module

 **NOTE:** The Bluetooth module spare part kit does not include a Bluetooth module cable. The Bluetooth module cable is included in the Cable Kit, spare part number 507708-001.

Description	Spare part number
Bluetooth module	507706-001

Before removing the Bluetooth module, follow these steps:

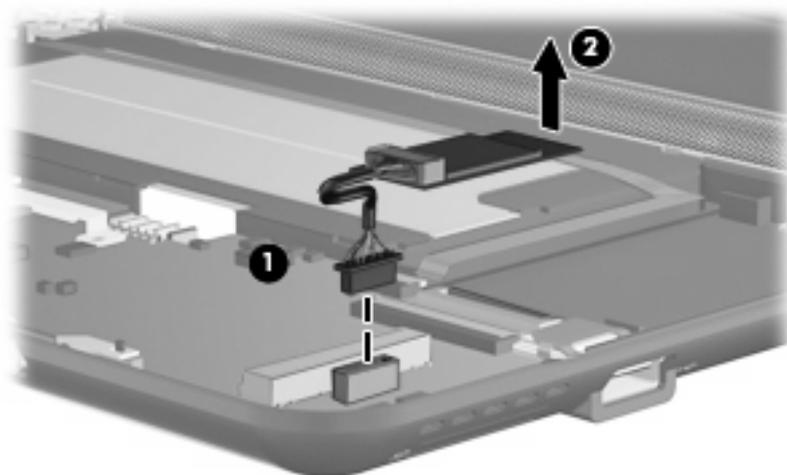

1. Shut down the device. If you are unsure whether the device is off or in Hibernation, turn the device on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the device.
3. Disconnect the power from the device by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the device.
4. Remove the battery (see [Battery on page 32](#)).
5. Remove the following components:
  - a. Keyboard (see [Keyboard on page 35](#))
  - b. Hard drive or solid-state drive (see [Mass storage devices on page 37](#))
  - c. Top cover (see [Top cover on page 40](#))

Remove the Bluetooth module:

1. Detach the Bluetooth module (1) from the system board.

 **NOTE:** The Bluetooth module is attached to the system board by double-sided tape.

2. Disconnect the Bluetooth module cable (2).

Reverse this procedure to install the Bluetooth module.

## System board

 **NOTE:** The system board spare part kit includes a processor and replacement thermal material.

Description	Spare part number
System board equipped with 1.6-GHz processor	504592-001

Before removing the system board, follow these steps:

1. Shut down the device. If you are unsure whether the device is off or in Hibernation, turn the device on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the device.
3. Disconnect the power from the device by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the device.
4. Remove the battery (see [Battery on page 32](#)).
5. Remove the following components:
  - a. Keyboard (see [Keyboard on page 35](#))
  - b. Hard drive or solid-state drive (see [Mass storage devices on page 37](#))
  - c. Top cover (see [Top cover on page 40](#))

When replacing the system board, be sure that the following components are removed from the defective system board and installed on the replacement system board:

- WLAN module (see [WLAN module on page 43](#))
- RTC battery (see [RTC battery on page 45](#))
- Bluetooth module (see [Bluetooth module on page 46](#))
- Heat sink assembly (see [Heat sink assembly on page 51](#))

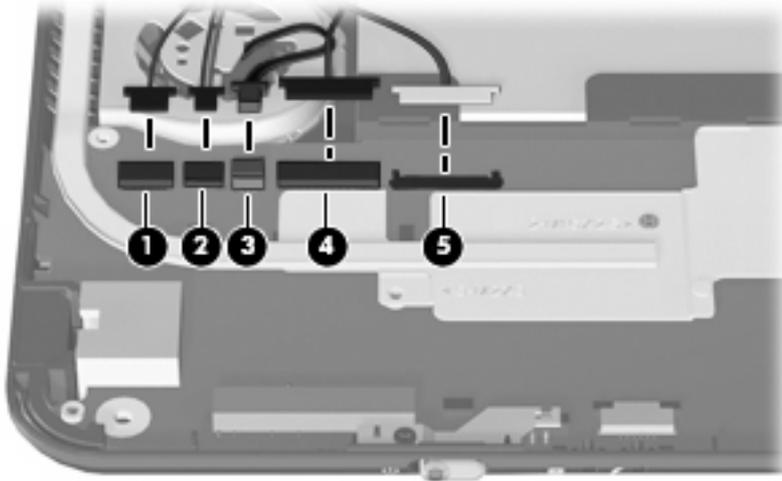

Remove the system board:

1. Disconnect the wireless antenna cables from the terminals on the WLAN module (see [WLAN module on page 43](#)).

2. Disconnect the following cables from the system board:

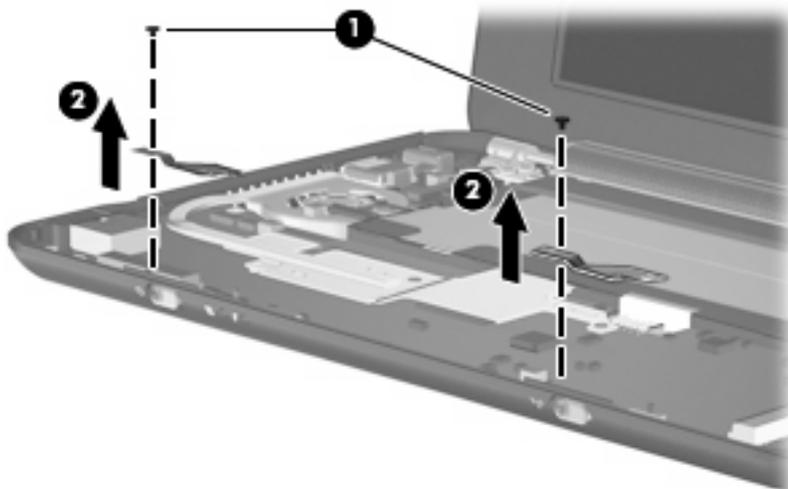

- (1) Speaker cables
- (2) Microphone cable
- (3) Fan cable
- (4) Power cable
- (5) Display panel cable

 **NOTE:** The USB board pass-through cable was disconnected earlier (see [Mass storage devices on page 37](#)).

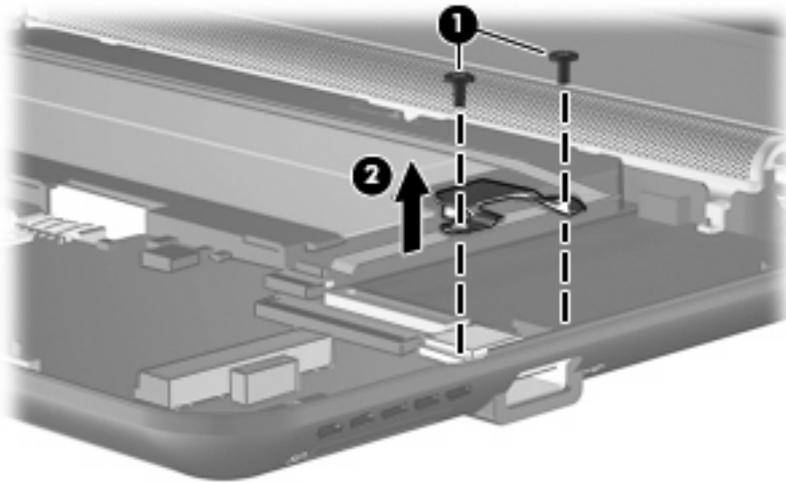

3. Remove the two Phillips PM1.6×2.5 screws (1) that secure the actuators for the power switch and wireless on/off switch to the system board, and then remove the actuators (2).

 **NOTE:** The actuators are included in the Bracket Kit, spare part number 507318-001.

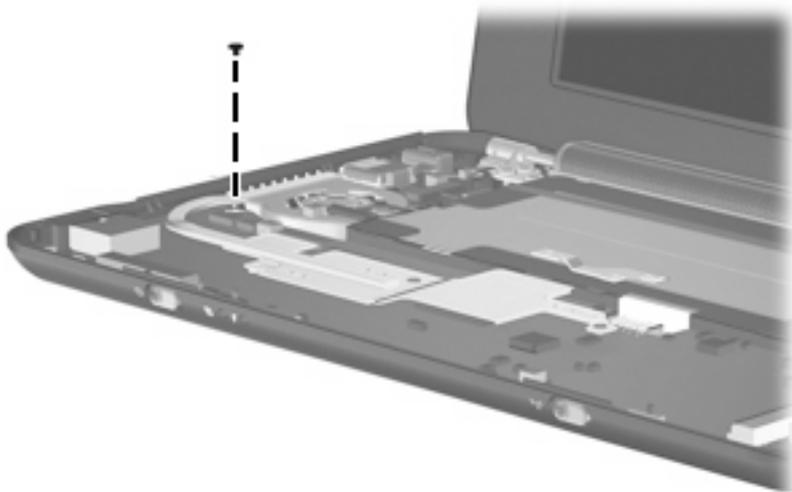

4. Remove the two Phillips PM2.0×3.0 screws (1) that secure the USB connector bracket to the base enclosure, and then remove the bracket (2).

 **NOTE:** The USB connector bracket is included in the Bracket Kit, spare part number 507318-001.

5. Remove the Phillips PM2.0×4.5 screw that secures the system board to the base enclosure.

6. Grasp the system board at its midpoint (1), lift the right side up (2), and remove the system board (3).

Reverse the procedure to install the system board.

## Heat sink assembly

 **NOTE:** The heat sink assembly spare part kit includes replacement thermal material.

Description	Spare part number
Heat sink assembly	515099-001

Before removing the heat sink assembly, follow these steps:

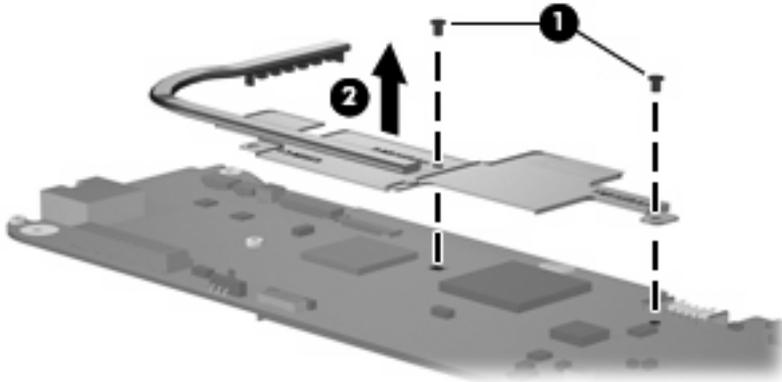

1. Shut down the device. If you are unsure whether the device is off or in Hibernation, turn the device on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the device.
3. Disconnect the power from the device by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the device.
4. Remove the battery (see [Battery on page 32](#)).
5. Remove the following components:
  - a. Keyboard (see [Keyboard on page 35](#))
  - b. Hard drive or solid-state drive (see [Mass storage devices on page 37](#))
  - c. Top cover (see [Top cover on page 40](#))
  - d. WLAN module (see [WLAN module on page 43](#))

Remove the heat sink assembly:

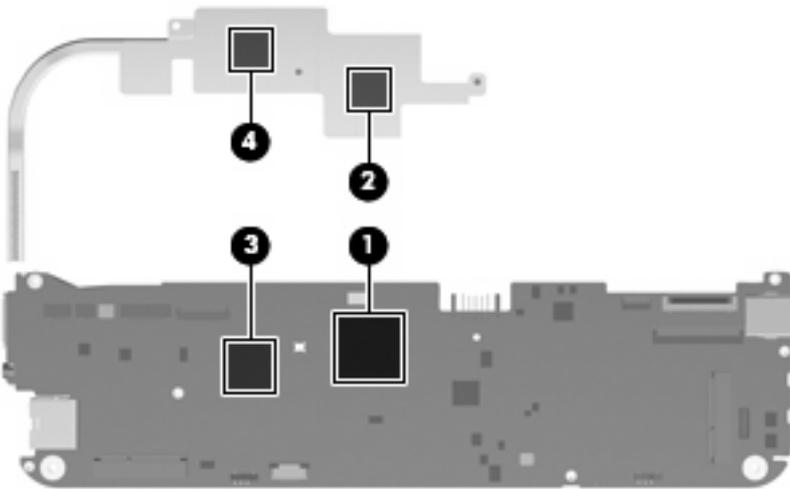

1. Remove the two Phillips PM1.6×2.5 screws **(1)** that secure the heat sink assembly to the system board.

2. Remove the heat sink assembly (2).

 **NOTE:** Due to the adhesive quality of the thermal material located between the heat sink assembly and system board components, it may be necessary to move the heat sink assembly from side to side to detach the assembly.

 **NOTE:** The thermal material must be thoroughly cleaned from the surfaces of the heat sink assembly and the system board each time the heat sink assembly is removed. Thermal paste is used on the processor (1), the heat sink section (2) that services the processor, the Northbridge chip (3), and the heat sink section (4) that services the Northbridge chip. Replacement thermal material is included with all heat sink assembly and system board spare part kits.

Reverse this procedure to install the heat sink assembly.

## Fan

 **NOTE:** The fan spare part kit does not include a fan cable. The fan cable is included in the Cable Kit, spare part number 507708-001.

Description	Spare part number
Fan	504615-001

 **NOTE:** To properly ventilate the device, allow at least a 7.6-cm (3-inch) clearance on the left side of the device. The device uses an electric fan for ventilation. The fan is controlled by a temperature sensor and is designed to turn on automatically when high temperature conditions exist. These conditions are affected by high external temperatures, system power consumption, power management/battery conservation configurations, battery fast charging, and software requirements. Exhaust air is displaced through the ventilation grill located on the left side of the device.

Before removing the fan, follow these steps:

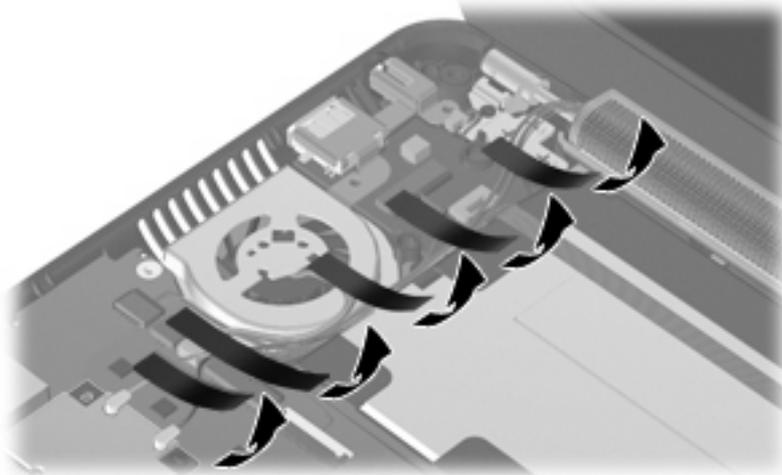

1. Shut down the device. If you are unsure whether the device is off or in Hibernation, turn the device on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the device.
3. Disconnect the power from the device by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the device.
4. Remove the battery (see [Battery on page 32](#)).
5. Remove the following components:
  - a. Keyboard (see [Keyboard on page 35](#))
  - b. Hard drive or solid-state drive (see [Mass storage devices on page 37](#))
  - c. Top cover (see [Top cover on page 40](#))
  - d. System board (see [System board on page 47](#))

Remove the fan:

1. Detach the black Mylar covering from the fan.

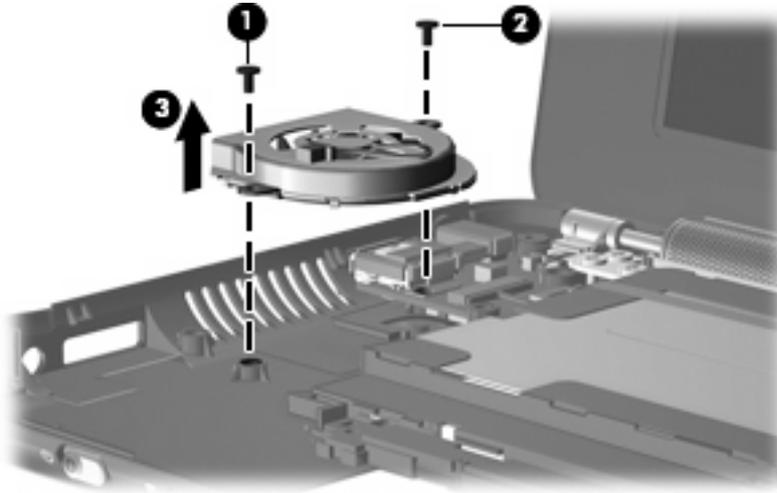

2. Detach the black tape from the fan cables, and then move the cables aside.

3. Remove the Phillips PM2.0×4.5 screw (1) and the Phillips PM2.0×3.0 screw (2) that secure the fan to the base enclosure.

4. Remove the fan (3).

Reverse this procedure to install the fan.

 **NOTE:** To properly ventilate the device, allow at least a 7.6-cm (3-inch) clearance on the left side of the device.

The device uses an electric fan for ventilation. The fan is controlled by a temperature sensor and is designed to turn on automatically when high temperature conditions exist. These conditions are affected by high external temperatures, system power consumption, power management/battery conservation configurations, battery fast charging, and software requirements. Exhaust air is displaced through the ventilation grill located on the left side of the device.

## USB board and internal display switch

 **NOTE:** The internal display switch module is included in the Cable Kit, spare part number 507708-001.

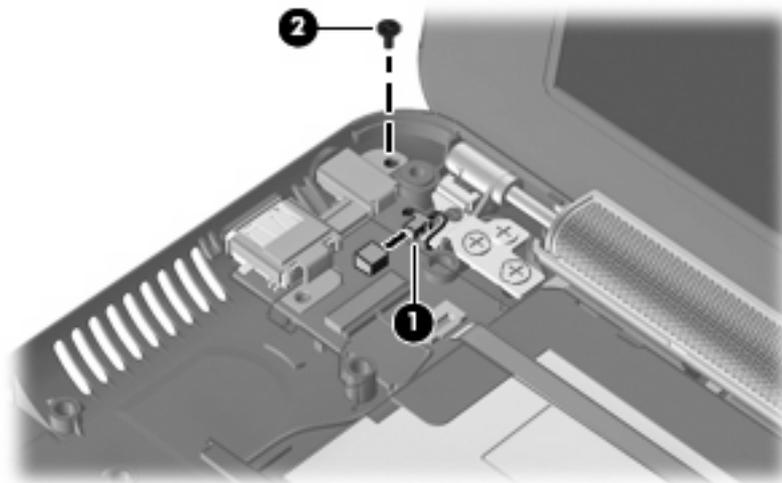

Description	Spare part number
USB board	506336-001

Before removing the USB board, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC Adapter from the computer.
4. Remove the battery (see [Battery on page 32](#)).
5. Remove the following components:
  - a. Keyboard (see [Keyboard on page 35](#)).
  - b. Hard drive (see [Mass storage devices on page 37](#)).
  - c. Top cover (see [Top cover on page 40](#)).
  - d. Fan (see [Fan on page 53](#)).

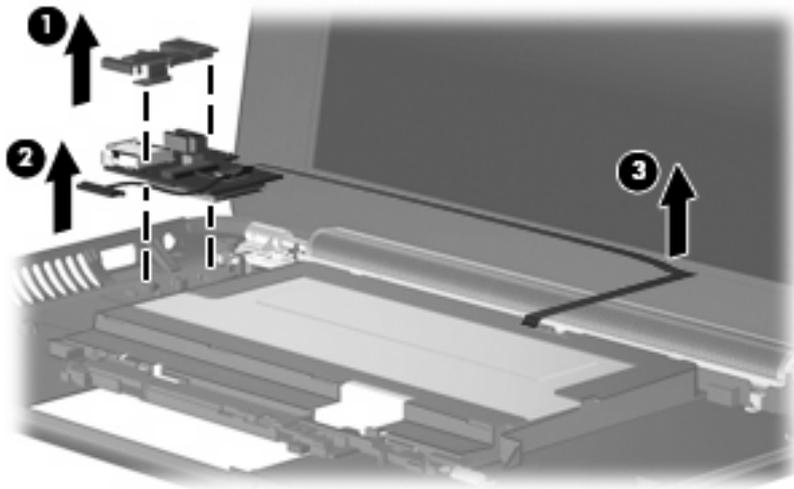

Remove the USB board:

1. Disconnect the internal display switch cable (1) from the USB board.
2. Remove the Phillips PM2.0×3.0 screw (2) that secures the DC jack bracket to the base enclosure.

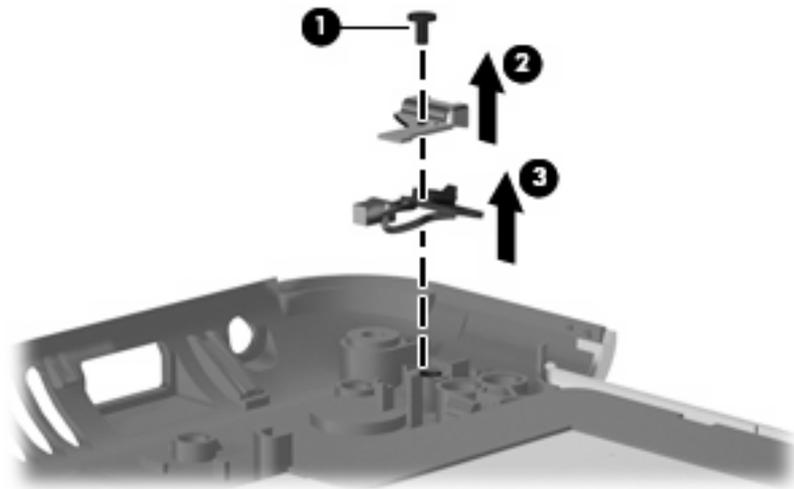

3. Detach the USB board ribbon cable (1). The cable is attached to the battery bay with tape.

4. Remove the DC jack bracket (2) and the USB board (3) from the base enclosure.

If it is necessary to replace the internal display switch module, perform the following steps:

1. Remove the Phillips PM2.0×3.0 screw (1) that secures the internal display switch bracket to the base enclosure.
2. Remove the internal display switch bracket (2) and module (3) from the base enclosure.

Reverse this procedure to install the USB board.

## Display assembly

 **NOTE:** Each display assembly spare part kit includes 1 webcam, 1 microphone, 1 speaker box, and 2 WLAN antenna transceivers/cables.

**NOTE:** 10.1-inch display assembly components are not sold separately. The complete display assembly is available as spare part number 509696-001 for the red-colored model or 507312-001 for all other models.

**NOTE:** 10.2-inch display assembly components are not sold separately. The complete display assembly is available as spare part number 512140-001 for the red-colored model, or 507310-001 for all other models.

Description	Spare part number
8.9-inch, WSVGA, BrightView	507309-001
10.1-inch standard-definition AntiGlare	507312-001
10.1-inch standard-definition AntiGlare (red-colored models)	509696-001
10.2-inch WSVGA AntiGlare	507310-001
10.2-inch WSVGA AntiGlare (red-colored models)	512140-001
10.2-inch WSVGA AntiGlare (Compaq Mini 700)	512143-001

See [Display assembly components on page 16](#) for more spare part information.

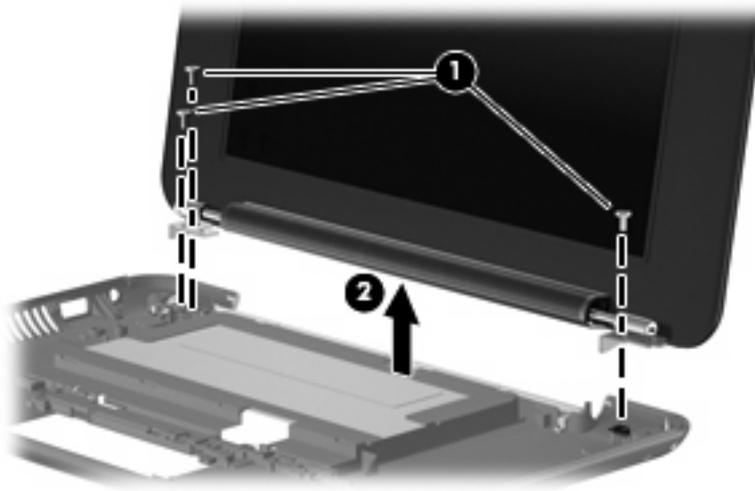

Before removing the display assembly, follow these steps:

1. Shut down the device. If you are unsure whether the device is off or in Hibernation, turn the device on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the device.
3. Disconnect the power from the device by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the device.
4. Remove the battery (see [Battery on page 32](#)).
5. Remove the following components:
  - a. Keyboard (see [Keyboard on page 35](#))
  - b. Hard drive or solid-state drive (see [Mass storage devices on page 37](#))
  - c. Top cover (see [Top cover on page 40](#))

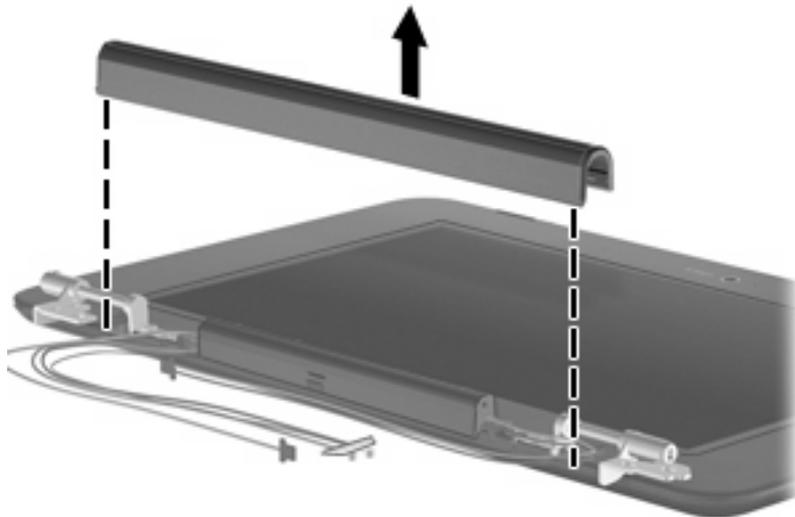

Remove the display assembly:

△ **CAUTION:** Support the display assembly when removing the following screws. Failure to support the display assembly can result in damage to the display assembly and other device components.

1. Remove the three remaining Phillips PM2.5×5.0 screws (1) that secure the display assembly to the device, and then remove the display assembly (2).

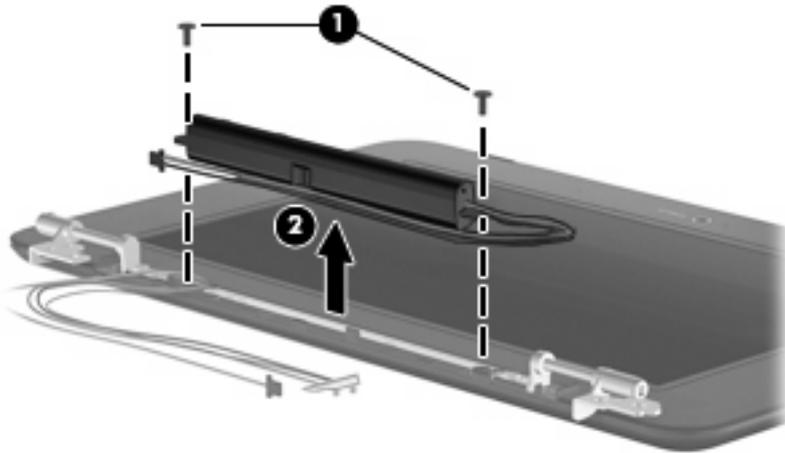

2. If it is necessary to replace the speaker assembly, perform the following steps:
  - a. Squeeze the sides of the speaker grill together to release the pressure clips, and then remove the speaker grill. The speaker grill is available using spare part number 506338-001.

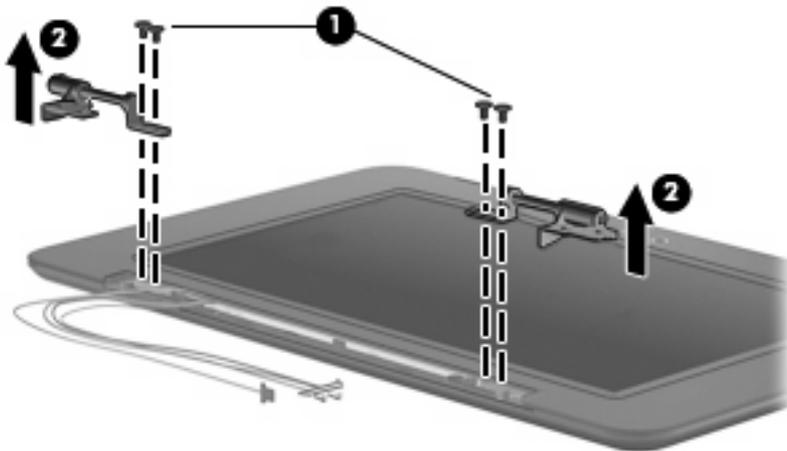

- b. Remove the two Phillips PM2.0×4.5 screws (1) that secure the speaker assembly to the display enclosure. All display assembly subcomponent screws are available in the Display Screw Kit, spare part number 509700-001 for all 8.9-inch panels.

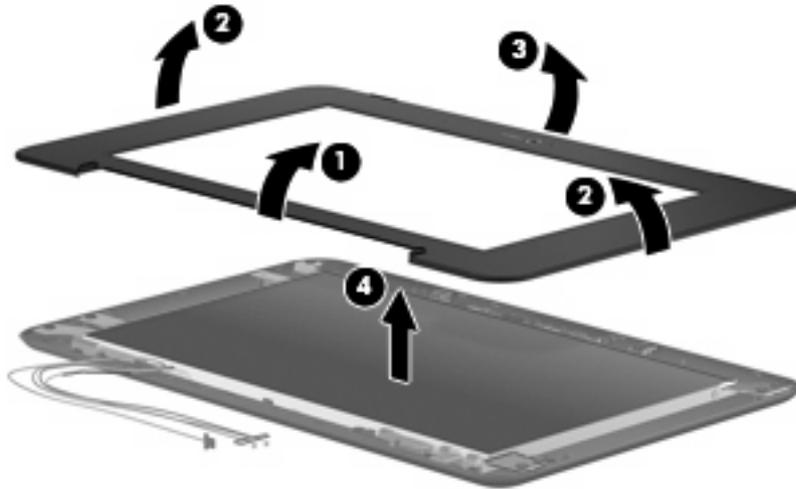

- c. Remove the speaker assembly (2). The speaker assembly is available using spare part number 506335-001.

3. If it is necessary to replace the display hinges, remove the two Phillips PM2.0×4.5 screws (1) that secure each hinge to the display enclosure, and then remove the hinges (2). The hinges are available in the Display Hinge Kit, spare part number 504596-001 for all 8.9-inch panels.

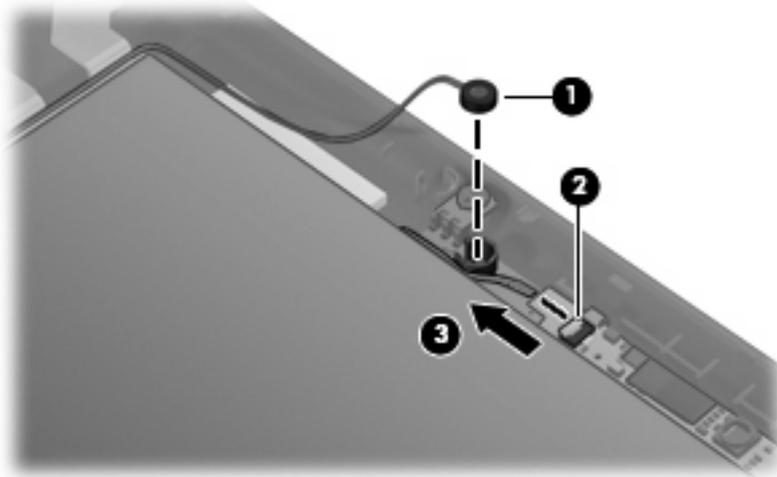

4. If it is necessary to replace the display bezel, flex the inside edges of the bottom (1), left and right sides (2), and the top (3) of the display bezel until the bezel disengages from the display enclosure, and then remove the display bezel (4).

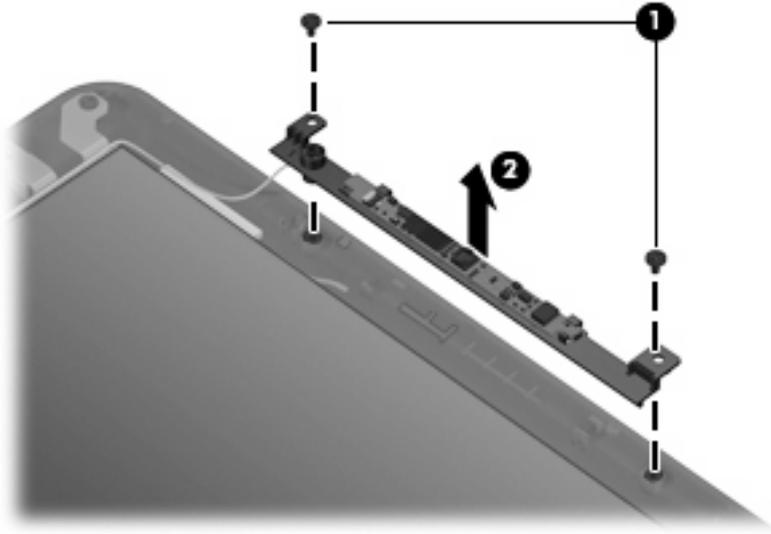

The spare part number for the 8.9-inch display bezels is 506333-001.

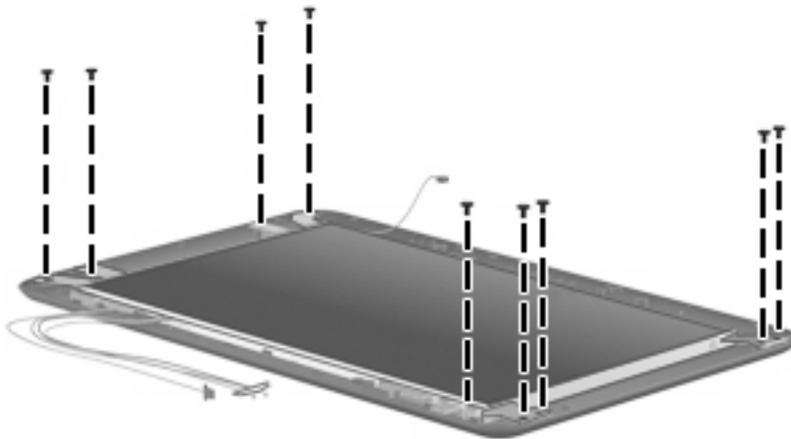

5. If it is necessary to replace the webcam module, perform the following steps:
  - a. Open the tab built into the display enclosure shielding that secures the microphone cable, and then release the microphone (1) from its clip.
  - b. Release the ZIF connector (2) to which the integrated display/webcam cable is attached, and then disconnect the cable (3) from the display enclosure. The microphone assembly and display/webcam cable for all 8.9-inch panels is available in the Display Cable Kit, spare part number 504597-001 (with WLAN).

- c. Remove the two Phillips PM2.0×3.0 screws (1) that secure the webcam module to the display enclosure, and then remove the webcam module (2). The webcam module is available using spare part number 504594-001 for all 8.9-inch panels.

6. If it is necessary to replace the display panel, perform the following steps:
- a. Remove the nine Phillips PM2.0×3.0 screws that secure the display panel to the display enclosure.

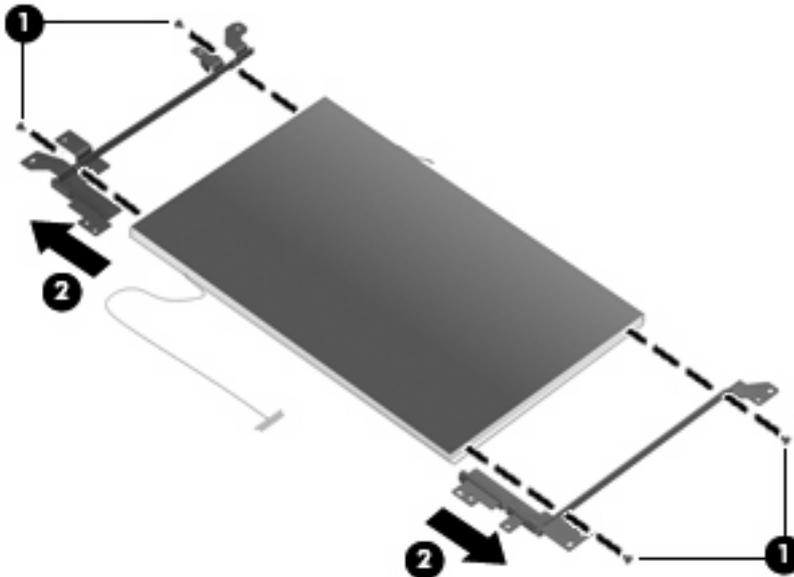

- b. Remove the wireless antenna cables (1) from the clips and routing channels built into the display and brackets (2).

- c. Remove the display panel from the display enclosure (3).

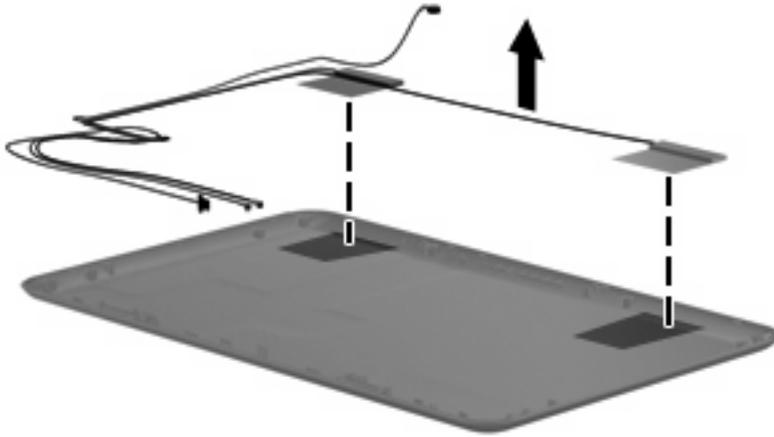

An 8.9-inch display panel is available using spare part number 509698-001.

7. If it is necessary to replace the display panel brackets, remove the four Phillips PM2.0×3.0 screws (1) that secure the brackets to the display panel, and then remove the brackets (2). The brackets are available in the Display Hinge Kit, spare part number 504596-001 for all 8.9-inch panels.

8. If it is necessary to replace the wireless antenna transceivers and cables, detach the cables from the adhesive that secures them to the display enclosure, and then remove the cables. The wireless antenna transceivers and cables for all 8.9-inch panels are available in the Display Cable Kit, spare part number 504597-001 (with WLAN).

Reverse this procedure to reassemble and install the display assembly.

---

# 5 Setup Utility

## Starting the Setup Utility

The Setup Utility is a ROM-based information and customization utility that can be used even when your operating system is not working.

The utility reports information about the device and provides settings for startup, security, and other preferences.

To start the Setup Utility, turn on or restart the device, and then press **f10** while the “F10 = BIOS Setup Options” message is displayed in the lower-left corner of the screen.

## Using the Setup Utility

### Changing the language of the Setup Utility

The following procedure explains how to change the language of the Setup Utility. If the Setup Utility is not already running, begin at step 1. If the Setup Utility is running, begin at step 2.

1. To open the Setup Utility, turn on or restart the device, and then press **f10** while the “F10 = BIOS Setup Options” message is displayed in the lower-left corner of the screen.
2. Use the arrow keys to select **System Configuration > Language**, and then press **enter**.
3. Use the arrow keys to select a language, and then press **enter**.
4. When a confirmation prompt with your language selected is displayed, press **enter**.
5. To save your change and exit the Setup Utility, use the arrow keys to select **Exit > Exit Saving Changes**, and then press **enter**.

Your change becomes effective immediately.

## Navigating and selecting in the Setup Utility

Because the Setup Utility is not operating system based, it does not support the TouchPad. Navigation and selection are by keystroke.

- To choose a menu or a menu item, use the arrow keys.
- To choose an item in a list or to toggle a field, for example an Enable/Disable field, use either the arrow keys or **f5** or **f6**.
- To select an item, press **enter**.
- To close a text box or return to the menu display, press **esc**.
- To display additional navigation and selection information while the Setup Utility is open, press **f1**.

## Displaying system information

The following procedure explains how to display system information in the Setup Utility. If the Setup Utility is not already running, begin at step 1. If the Setup Utility is running, begin at step 2.

1. To open the Setup Utility, turn on or restart the device, and then press **f10** while the "F10 = BIOS Setup Options" message is displayed in the lower left corner of the screen.
2. Select the **Main** menu. System information such as the system time and date and identification information about the device is displayed.
3. To exit the Setup Utility without changing any settings, use the arrow keys to select **Exit > Exit Discarding Changes**, and then press **enter**.

## Restoring default settings in the Setup Utility

The following procedure explains how to restore the Setup Utility default settings. If the Setup Utility is not already running, begin at step 1. If the Setup Utility is running, begin at step 2.

1. To open the Setup Utility, turn on or restart the device, and then press **f10** while the "F10 = BIOS Setup Options" message is displayed in the lower-left corner of the screen.
2. Use the arrow keys to select **Exit > Load Setup Defaults**, and then press **enter**.
3. When the Setup Confirmation is displayed, press **enter**.
4. To save your change and exit the Setup Utility, use the arrow keys to select **Exit > Exit Saving Changes**, and then press **enter**.

The Setup Utility default settings go into effect when the device restarts.

---

 **NOTE:** Your password, security, and language settings are not changed when you restore the factory default settings.

---

## Exiting the Setup Utility

You can exit the Setup Utility with or without saving changes.

- To exit the Setup Utility and save your changes from the current session:

If the Setup Utility menus are not visible, press **esc** to return to the menu display. Use the arrow keys to select **Exit > Exit Saving Changes**, and then press **enter**.

- To exit the Setup Utility without saving your changes from the current session:

If the Setup Utility menus are not visible, press **esc** to return to the menu display. Use the arrow keys to select **Exit > Exit Discarding Changes**, and then press **enter**.

After either choice, the device restarts in the operating system.

## Setup Utility menus

The menu tables in this section provide an overview of Setup Utility options.

 **NOTE:** Some of the Setup Utility menu items listed in this chapter may not be supported by your device.

### Main menu

Select	To do this
System information	<ul style="list-style-type: none"><li>• View and change the system time and date.</li><li>• View identification information about the device.</li><li>• View specification information about the processor, memory size, and system BIOS.</li></ul>

### Security menu

Select	To do this
Administrator password	Enter, change, or delete an administrator password.
Power-on password	Enter, change, or delete a power-on password.

## System Configuration menu

Select	To do this
Language Support	Change the Setup Utility language.
Processor C4 State	Enable/disable the processor C4 sleep state.
Boot Options	Set the following boot options: <ul style="list-style-type: none"><li>• <b>f10</b> and <b>f12</b> Delay (sec.)—Set the delay for the <b>f10</b> and <b>f12</b> functions of the Setup Utility in intervals of 5 seconds each (0, 5, 10, 15, 20).</li><li>• Internal Network Adapter boot—Enable/disable boot from Internal Network Adapter.</li><li>• Boot Order—Set the boot order for:<ul style="list-style-type: none"><li>◦ Internal hard drive (select models only)</li><li>◦ USB Floppy</li><li>◦ USB CD/DVD ROM Drive</li><li>◦ USB Diskette on Key</li><li>◦ USB Hard drive</li><li>◦ USB Card Reader</li><li>◦ Network adapter</li></ul></li></ul>

## Diagnostics menu

Select	To do this
Hard Disk Self Test (select models only)	Run a comprehensive self-test on the hard drive.
Memory Test	Run a diagnostic test on the system memory.

# 6 Specifications

## Device specifications

	Metric	U.S.
<b>Dimensions</b>		
Depth	16.67 cm	6.56 in
Width	26.17 cm	10.30 in
Height	2.52 cm	0.99 in
<b>Weight</b>		
10.2-in. LCD, equipped with a 3-cell battery, 60-GB hard drive, 1-GB memory, WLAN module, and 2 wireless antennae	1.11 kg	2.45 lb
10.2-in. LCD, equipped with a 3-cell battery, 8-GB solid-state drive, 1-GB memory, WLAN module, and 2 wireless antennae	1.09 kg	2.40 lb
8.9-in. LCD, equipped with a 3-cell battery, 60-GB hard drive, 1-GB memory, WLAN module, and 2 wireless antennae	1.08 kg	2.38 lb
8.9-in. LCD, equipped with a 3-cell battery, 8-GB solid-state drive, 1-GB memory, WLAN module, and 2 wireless antennae	1.02 kg	2.25 lb
<b>Input power</b>		
Operating voltage	19 V dc @ 1.58 A – 30 W	
Operating current	1.58 A	
<b>Temperature</b>		
Operating	5°C to 35°C	41°F to 95°F
Nonoperating	-20°C to 65°C	-4°F to 149°F
<b>Relative humidity (noncondensing)</b>		
Operating	10% to 90%	
Nonoperating	0% to 95%	
<b>Maximum altitude (unpressurized)</b>		
Operating	-15 m to 3,048 m	-50 ft to 10,000 ft
Nonoperating	-15 m to 12,192 m	-50 ft to 40,000 ft

**NOTE:** Applicable product safety standards specify thermal limits for plastic surfaces. The device operates well within this range of temperatures.

## 8.9-inch, WSVGA, BrightView display specifications

	Metric	U.S.
<b>Dimensions</b>		
Height	11.34 cm	4.47 in
Width	19.51 cm	7.68 in
Diagonal	22.61 cm	8.90 in
<b>Number of colors</b>	262,144	
<b>Contrast ratio</b>	300:1 (typical)	
<b>Brightness</b>	200 nits (typical)	
<b>Pixel resolution</b>		
Pitch	0.1905 × 0.189 mm	
Format	1024 × 600	
Configuration	RGB vertical stripe	
<b>Backlight</b>	Edge lit	
<b>Character display</b>	80 × 25	
<b>Total power consumption</b>	3.0 W	
<b>Viewing angle</b>	+/-45° horizontal, +15/-35° vertical (typical)	

## 10.1-inch, standard-definition, AntiGlare display specifications

	Metric	U.S.
<b>Dimensions</b>		
Height	23.45 cm	9.23 in
Width	14.30 cm	5.62 in
Diagonal	25.55 cm	10.05 in
<b>Number of colors</b>	262,144	
<b>Contrast ratio</b>	400:1 (typical)	
<b>Brightness</b>	200 nits (typical)	
<b>Pixel resolution</b>		
Pitch	0.2175 × 0.2175 mm	
Format	1024 × 576	
Configuration	RGB vertical stripe	
<b>Backlight</b>	Edge lit	
<b>Character display</b>	80 × 25	
<b>Total power consumption</b>	3.2 W	
<b>Viewing angle</b>	+/-45° horizontal, +15/-35° vertical (typical)	

## 10.2-inch, WSVGA, AntiGlare display specifications

	Metric	U.S.
<b>Dimensions</b>		
Height	12.53 cm	4.93 in
Width	22.27 cm	8.77 in
Diagonal	25.55 cm	10.06 in
<b>Number of colors</b>	262,144	
<b>Contrast ratio</b>	400:1 (typical)	
<b>Brightness</b>	200 nits (typical)	
<b>Pixel resolution</b>		
Pitch	0.2175 × 0.2175 mm	
Format	1024 × 576	
Configuration	RGB vertical stripe	
<b>Backlight</b>	Edge lit	
<b>Character display</b>	80 × 25	
<b>Total power consumption</b>	3.0 W	
<b>Viewing angle</b>	+/-40° horizontal, +20/-40° vertical (typical)	

## Hard drive specifications

	60-GB *	
<b>Dimensions</b>		
Height	9.5 mm	
Width	70 mm	
Weight	101 g	
<b>Interface type</b>		PATA
<b>Transfer rate</b>		100 MB/sec
<b>Security</b>		ATA security
<b>Seek times</b> (typical read, including setting)		
Single track	3 ms	
Average	13 ms	
Maximum	24 ms	
<b>Logical blocks</b>		117,210,240
<b>Disc rotational speed</b>		4200 rpm
<b>Operating temperature</b>		
* 1 GB = 1 billion bytes when referring to hard drive storage capacity. Actual accessible capacity is less. Actual drive specifications may differ slightly.		
<b>NOTE:</b> Certain restrictions and exclusions apply. Contact technical support for details.		

# Solid-state drive specifications

<b>Performance</b>	
Transfer modes supported	UDMA 0-4, Multiword-DMA 0-2, PIO 0-4
Sustained read	39 MB/sec
Sustained write	17 MB/sec
<b>Characteristics</b>	
Interface	Parallel ATA (PATA)
MLC NAND flash capacity	8 GB, 16 GB
<b>Electrical specifications</b>	
DC supply voltage	3.3 V +/- 5%
Standby current	300 µA (typical)
Active current	Read = 130 mA (typical) Write = 120 mA (typical)
<b>Environmental specifications</b>	
Operating temperature	0°C to +70°C (32°F to 158°F)
Storage temperature	-25°C to +85°C (-13°F to 185°F)
Operating altitude	up to 24,384 m (80,000 feet)
Humidity	5% to 90% non-condensing
Shock	1,000 g
Acoustic noise	0 dB
Vibration	15 g (peak to peak)
<b>Physical specifications</b>	
Connector	40-pin ZIF connector
Weight (8-GB model)	5.5 g
Weight (16-GB model)	7.0 g
Dimensions (8-GB model)	54 × 32 × 2.6 mm
Dimensions (16-GB model)	54 × 32 × 3.75 mm
<b>Regulations and compliance</b>	
	RoHS, China RoHS, SGS ROHS, FCC, CE UL – PCB Only

## 7 Screw listing

This section provides specification and reference information for the screws and screw locks used in the device. All screws listed in this section are available in the Screw Kit, spare part number 504614-001; or in the Display Screw Kit, spare part number 509700-001 for all 8.9-inch panels or 515211-001 for 10.1-inch panels (Compaq Mini 700 only).

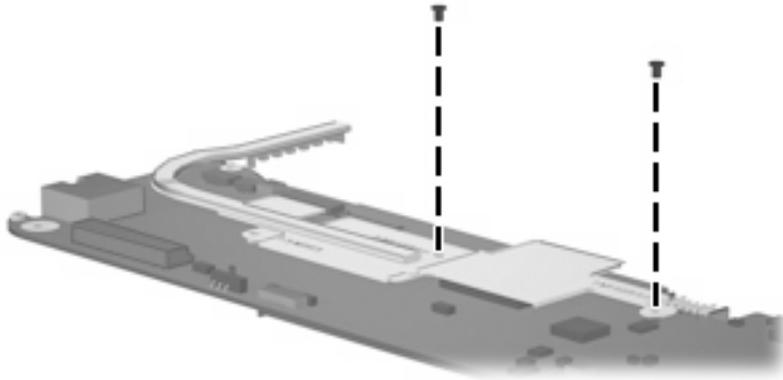

### Phillips PM1.6×2.5 screw

Color	Quantity	Length	Thread	Head diameter
Silver	4	2.5 mm	1.6 mm	3.0 mm

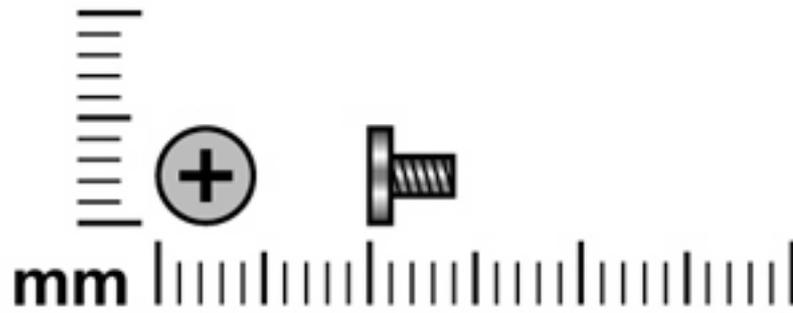

**Where used:** Two screws that secure the power and wireless switch actuators to the system board

**Where used:** Two screws that secure the heat sink to the system board

## Phillips PM1.6×4.0 screw

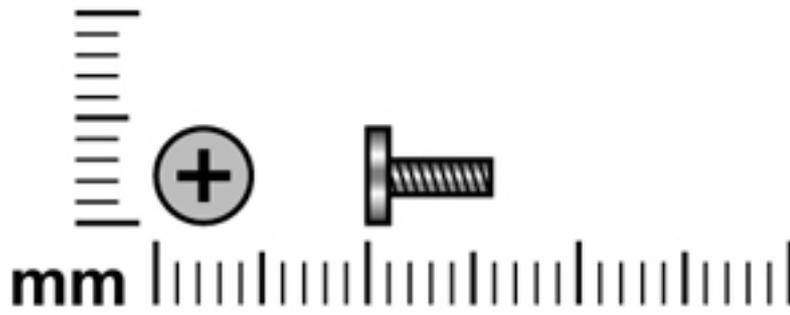

Color	Quantity	Length	Thread	Head diameter
Silver	1	4.0 mm	1.60 mm	3.5 mm

**Where used:** One screw that secures the keyboard to the device

## Phillips PM1.6×6.0 screw

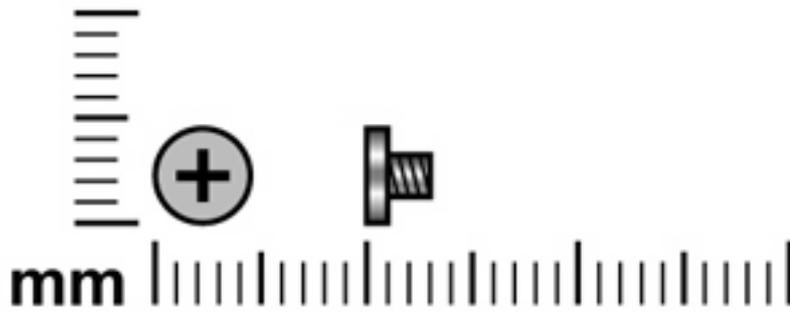

Color	Quantity	Length	Thread	Head diameter
Black	1	6.0 mm	1.60 mm	3.5 mm

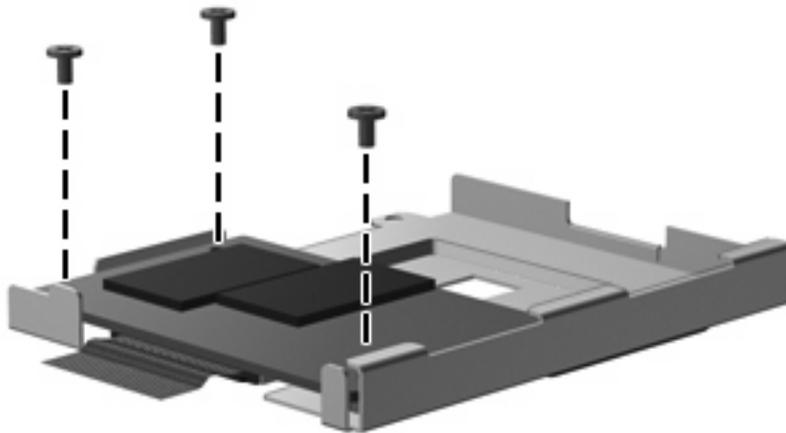

**Where used:** One screw that secures the keyboard to the device

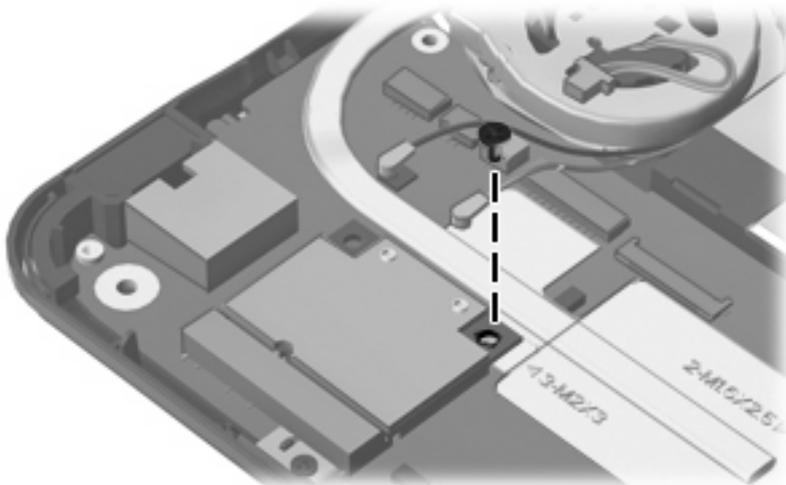

## Phillips PM2.0×3.0 screw

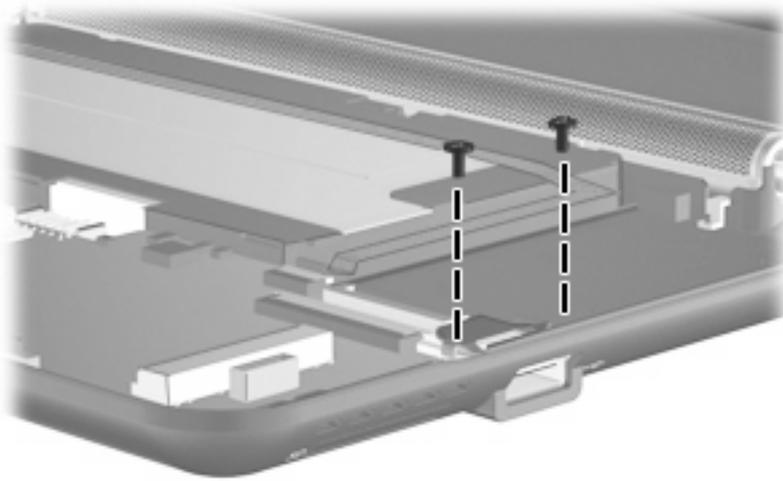

Color	Quantity	Length	Thread	Head diameter
Black	24	3.0 mm	2.0 mm	4.0 mm

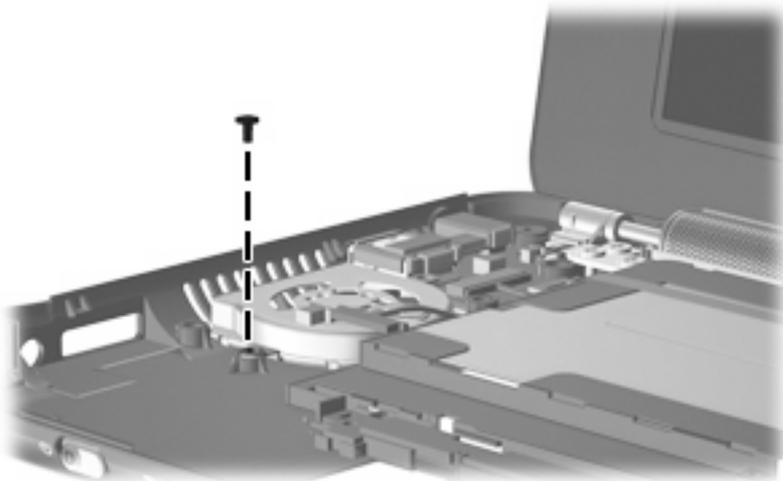

**Where used:** Three screws that secure the solid-state drive to its bracket

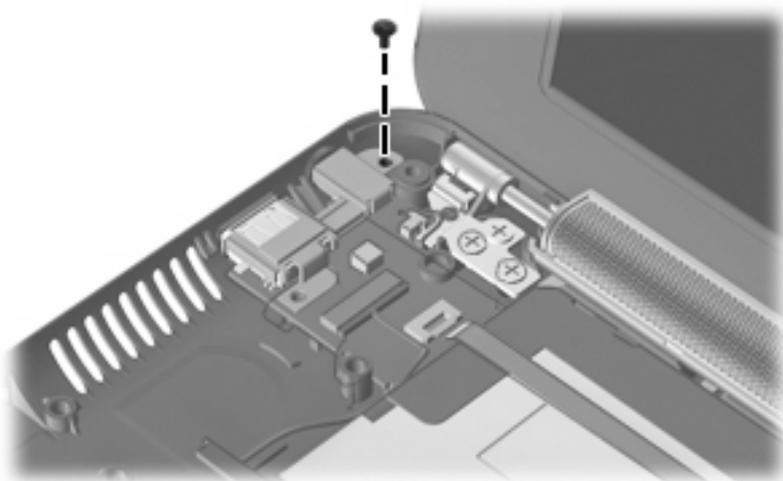

**Where used:** One screw that secures the WLAN module to the system board

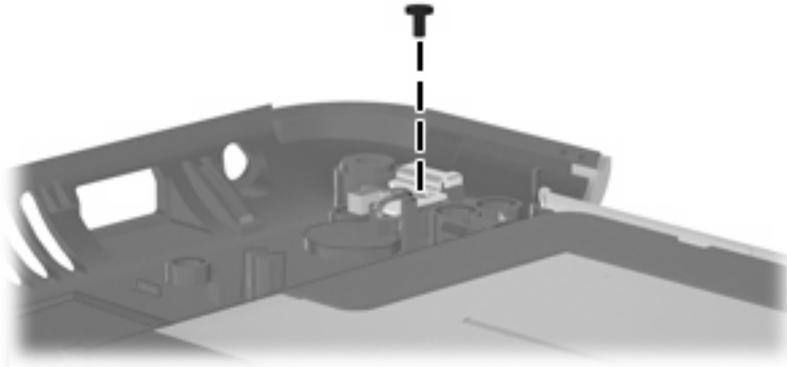

**Where used:** Two screws that secure the USB connector bracket to the system board

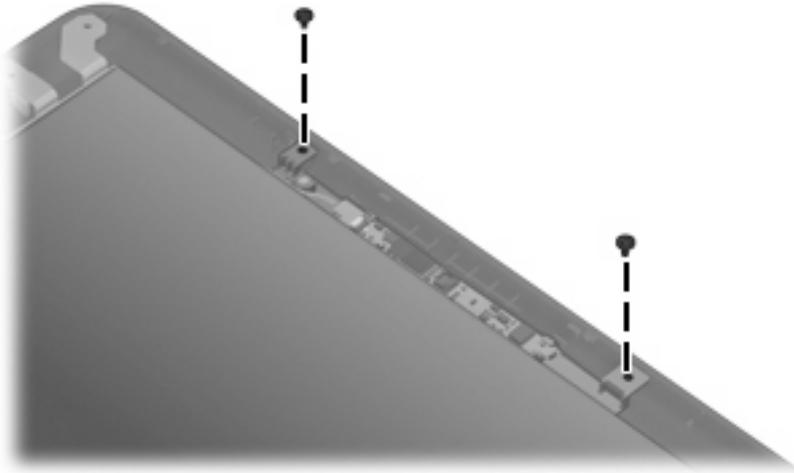

**Where used:** One screw that secures the fan to the base enclosure

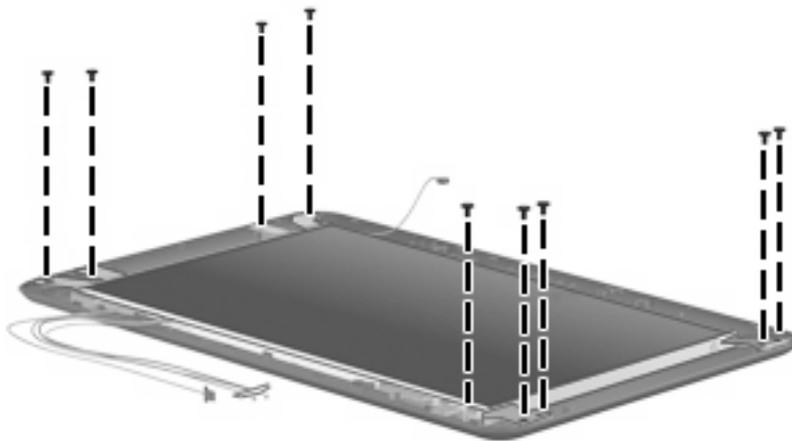

**Where used:** One screw that secures the DC jack bracket to the base enclosure

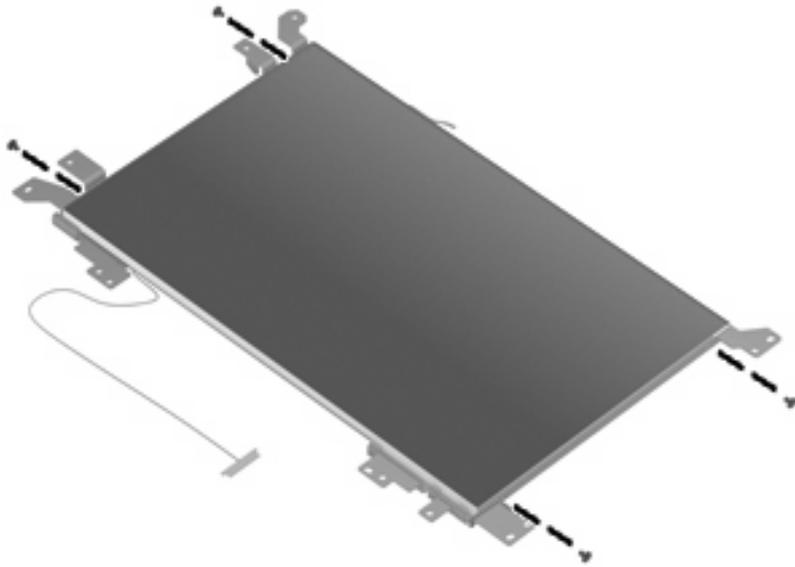

**Where used:** One screw that secures the internal display switch bracket to the base enclosure

**Where used:** Two screws that secure the webcam module to the display enclosure

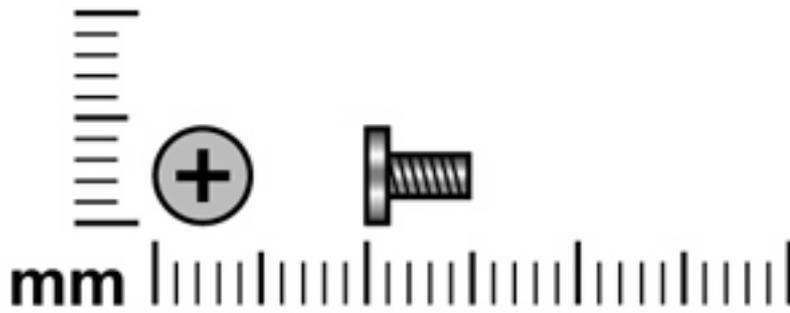

**Where used:** Nine screws that secure the display panel to the display enclosure

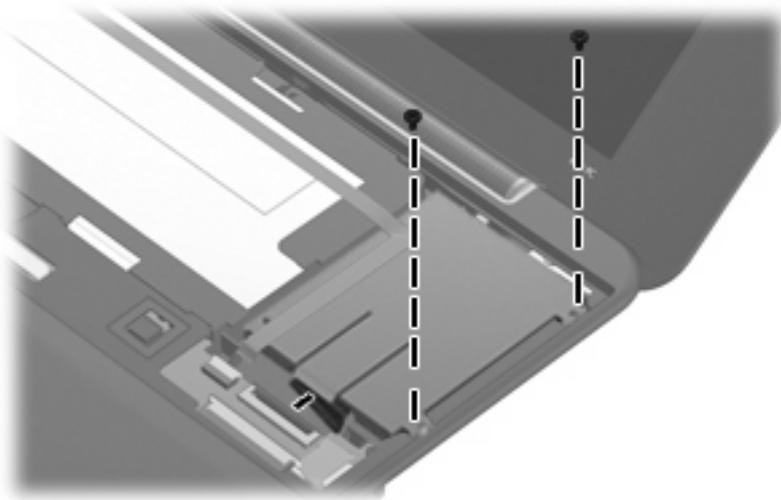

**Where used:** Four screws that secure the left and right display panel brackets to the display panel

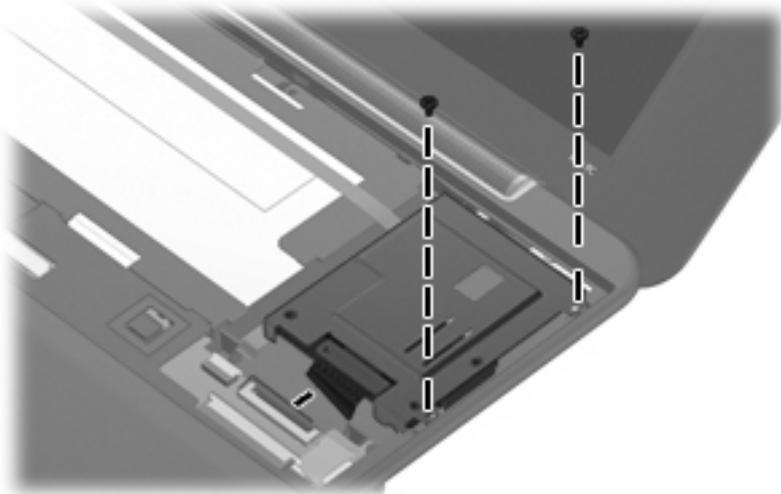

## Phillips PM2.0×4.5 screw

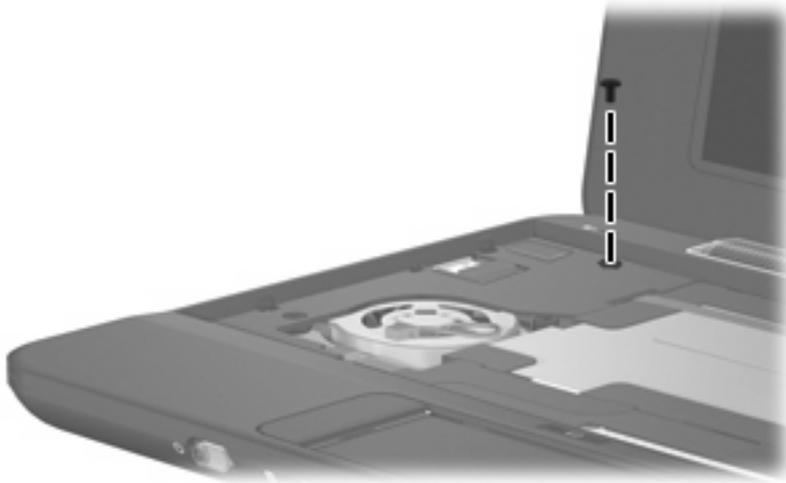

Color	Quantity	Length	Thread	Head diameter
Silver	12	4.5 mm	2.0 mm	4.0 mm

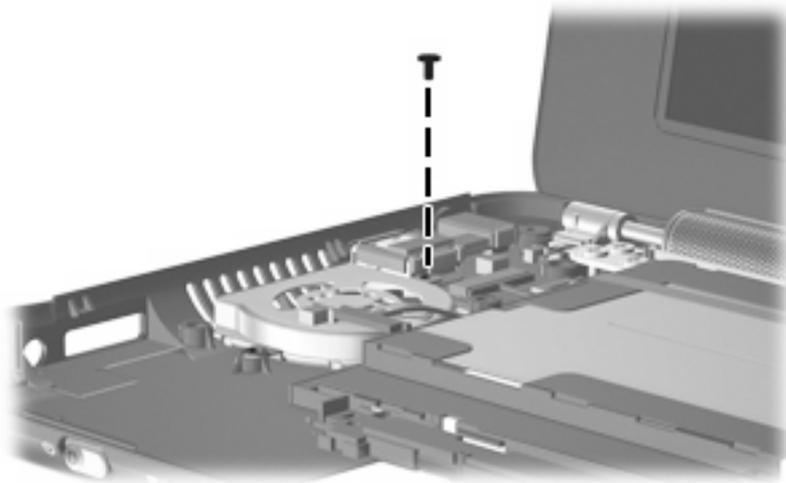

**Where used:** Two screws that secure the hard drive to the device

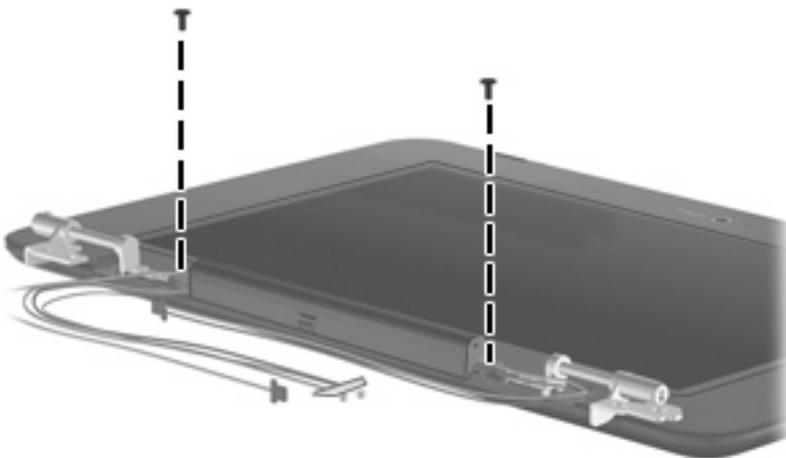

**Where used:** Two screws that secure the solid-state drive bracket to the device

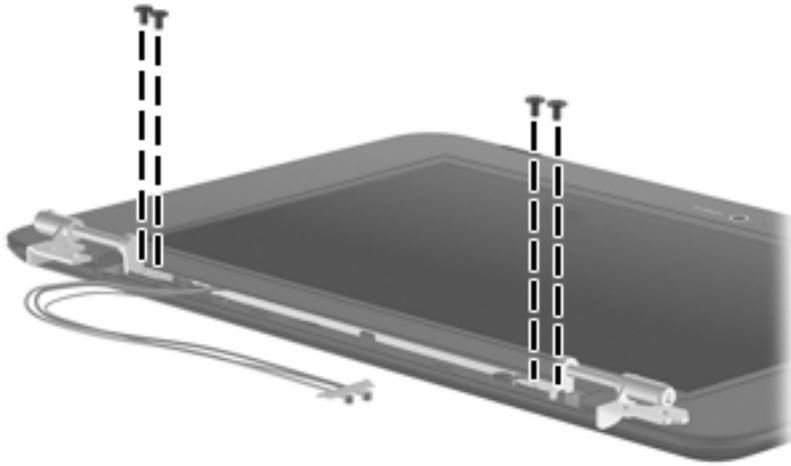

**Where used:** One screw that secures the top cover to the device

**Where used:** One screw that secures the fan and DC jack bracket to the base enclosure

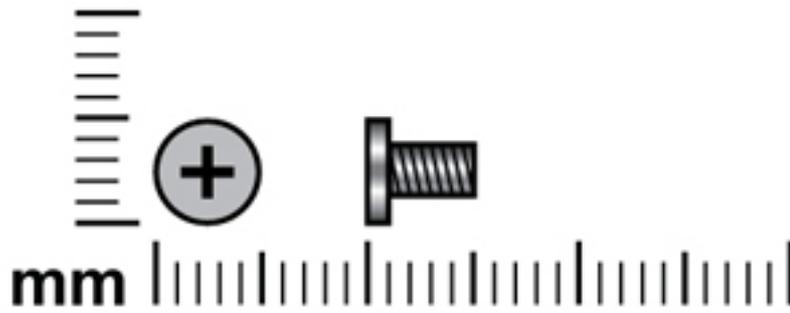

**Where used:** Two screws that secure the speaker assembly to the display enclosure

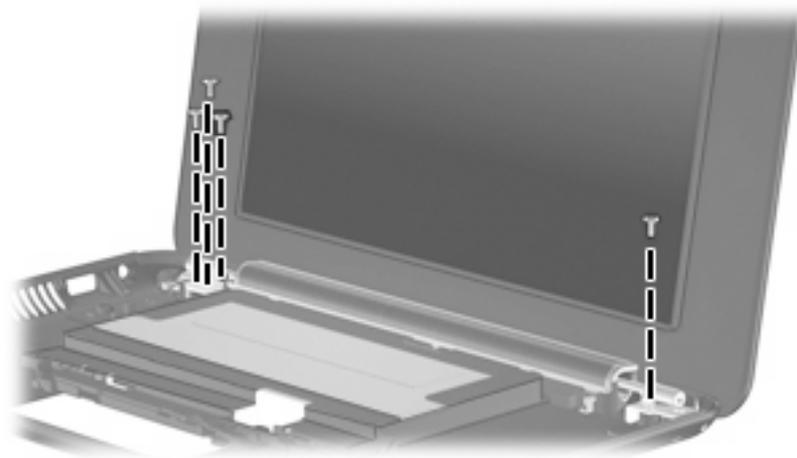

**Where used:** Four screws that secure the display hinges to the display assembly

## Phillips PM2.5×5.0 screw

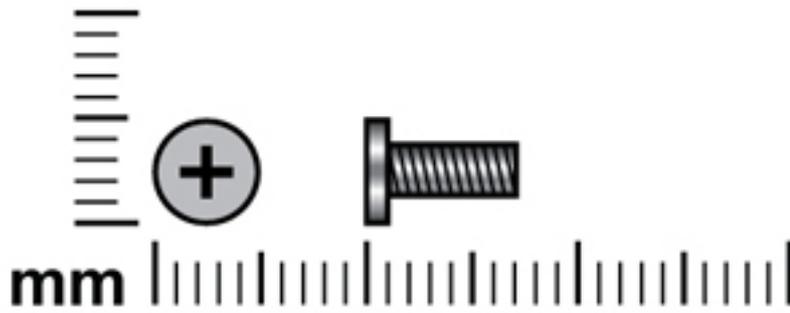

Color	Quantity	Length	Thread	Head diameter
Silver	4	5.0 mm	2.5 mm	4.5 mm

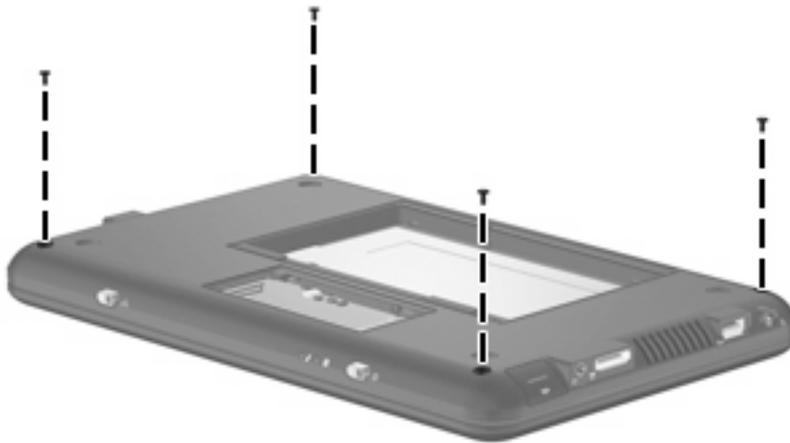

**Where used:** Four screws that secure the display assembly and top cover to the device

## Phillips PM2.5×7.0 screw

Color	Quantity	Length	Thread	Head diameter
Black	4	7.0 mm	2.5 mm	4.0 mm

**Where used:** Four screws that secure the top cover to the base enclosure

---

## 8 Backup and restore

To protect your information, back up your files and folders. Then if the system fails, you can restore your important files from copies. You can also use the options listed in this chapter to restore the operating system and programs that were installed at the factory.

## Backing up your information

Successful recovery after a system failure depends on whether you have completely backed up your files. You should back up your files on a regular basis to maintain up-to-date information.

You can back up important personal files and folders to an external hard drive or USB flash drive (both purchased separately).

### When to back up

- On a regularly scheduled basis
- Before the device is repaired or restored
- Before you add or modify hardware or software

## Restoring your information

In case of system failure or instability, you can restore the operating system and programs installed at the factory.

- △ **CAUTION:** The restore process reformats and completely erases the hard drive. All the files you have created and any software installed on the device are permanently removed. The restore process reinstalls the original operating system, software, and drivers. Software, drivers, and updates not installed with the factory image must be reinstalled using Update Manager.

The device provides the following restore options:

- System Restore (installed on the device): You can use the System Restore utility to restore the original operating system and programs.
- HP MIE Restore Image Creator (USB flash drive): If you are unable to boot (start up) the device, and if you are unable to use System Restore, you can use another computer to download the HP MIE Restore Image Creator utility and create a bootable USB flash drive (purchased separately). You can then use the USB flash drive to install the HP MIE operating system and programs on your device.

Note the following before beginning the restore process:

- The device must be connected to AC power during the restore process.
- The restore process may take several hours to complete.
- If possible, all personal files should be backed up.

## Using System Restore

-  **NOTE:** System Restore is the recommended option to restore the original operating system.

To restore the original operating system and programs using the **System Restore** utility that is installed on the device, follow these steps:

1. Turn on or restart the device, and then press the **esc** key repeatedly while the “F10 = BIOS Setup Options” message is displayed in the lower-left corner of the screen.

The “System Restore” page opens.

2. Use the arrow keys to select **System Restore**, and then press **enter**.
3. Follow the on-screen instructions to restore the system.

## Using HP MIE Restore Image Creator

You will need the following before you begin this restore process:

- A 2-GB (minimum) USB flash drive (purchased separately)
- An additional computer running either a Windows® or Linux operating system

To perform this restore option, you download the HP MIE Restore Image Creator utility and HP Mini operating system onto another computer and then transfer the necessary files to the USB flash drive. The drive can then be used to reboot your device and restore the system.

Follow the specific operating system instructions in this section to restore your system.

---

△ **CAUTION:** The restore process reformats and completely erases the hard drive on the HP Mini. All the files you have created and any software installed on the device are permanently removed. The restore process reinstalls the original operating system, software, and drivers. Software, drivers, and updates not installed with the factory image must be reinstalled using Update Manager.

---

## Restoring using a Windows computer

To download the files to a computer running a Windows operating system and then restore your device, follow these steps:

1. From your Windows computer, go to <http://www.hp.com>.
2. Click the **Support & Drivers** tab.
3. Under “Step 1: Start by selecting a task,” select **Download drivers and software (and firmware)**.
4. Under “Step 2: Enter a product name/number,” type the part number/product number (p/n) of your HP Mini , and then click **Go**.

---

**NOTE:** The p/n is located on the service tag affixed to the bottom of your HP Mini.

---

5. Under “Which operating system is used with your product?”, click **HP Mi -or- Linux**.
6. Click **HP MIE Restore Image Creator (for Windows)**.
7. Click **Download only**.
8. Save **ImageCreator.msi** to the Windows computer.
9. Double-click **ImageCreator.msi** and follow the on-screen instructions to install HP MIE Restore Image Creator.
10. Insert the USB flash drive into a USB port on the Windows computer.

---

**CAUTION:** The restore process reformats and completely erases the USB flash drive. All the files on the USB flash drive are permanently removed.

---

11. From the Start menu, launch **HP MIE Restore Image Creator**.
12. Select **Download HP Mini MIE recovery image**.
13. Select the target USB flash drive, and click **Start** to download the latest HP Mini recovery image from the HP web site.

The recovery image will be downloaded and saved to the Windows computer and then written to the USB flash drive.

14. When the download and write processes are complete, remove the USB flash drive.
15. Insert the USB flash drive into a USB port on your HP Mini.
16. Change the boot order by turning on or restarting the device, and then pressing **f9** repeatedly while the “F9 = Change Boot Device Order” message is displayed in the lower-left corner of the screen.
17. Use the arrow keys to select the USB flash drive, and then press **enter**.
18. Press **enter** again to begin restoring the device.
19. Follow the on-screen instructions to install the operating system and programs.
20. After the operating system and programs are installed, remove the USB flash drive.

---

**NOTE:** After the operating system and programs are installed, the device automatically restarts. You are then prompted to set up your device.

---

21. Use Update Manager to reinstall any updates not installed with the factory image.

22. Restore your personal files.

---

 **NOTE:** After this process is complete, you can uninstall the HP MIE Restore Image Creator utility from the Windows computer and delete the downloaded recovery image from the USB flash drive. (The image must be deleted manually.)

---

## Restoring using a Linux computer

To download the files to a computer running a Linux operating system and then restore your device, follow these steps:

1. From your Linux computer, go to <http://www.hp.com>.
2. Click the **Support & Drivers** tab.
3. Under “Step 1: Start by selecting a task,” select **Download drivers and software (and firmware)**.
4. Under “Step 2: Enter a product name/number,” type the part number/product number (p/n) of your HP Mini , and then click **Go**.

---

**NOTE:** The p/n is located on the service tag affixed to the bottom of your HP Mini.

---

5. Under “Which operating system is used with your product?”, click **HP Mi -or- Linux**.
6. Click **HP MIE Restore Image Creator (for Linux)**.
7. Click **Download only**.
8. Save **liveusb-creator-ubuntu\_0.3.3netbook0dennis5\_all.deb** to the Linux computer.
9. Install **liveusb-creator-ubuntu\_0.3.3netbook0dennis5\_all.deb** on the Linux computer.
10. Insert the USB flash drive into a USB port on the Linux computer

---

**CAUTION:** The restore process reformats and completely erases the USB flash drive. All the files on the USB flash drive are permanently removed.

---

11. Open a terminal window and type the following command at the command prompt:  
**sudo liveusb-creator**
12. Select “**Download restore image/HP MIE Restore Image**.”
13. Select the target USB flash drive, and click **Start** to download the latest HP Mini recovery image from the HP web site.  
  
The recovery image will be downloaded and saved to the Linux computer, and then written to the USB flash drive.
14. When the download and write processes are complete, remove the USB flash drive.
15. Insert the USB flash drive into a USB port on your HP Mini.
16. Change the boot order by turning on or restarting the device, and then pressing **f9** repeatedly while the “F9 = Change Boot Device Order” message is displayed in the lower-left corner of the screen.
17. Use the arrow keys to select the USB flash drive, and then press **enter**.
18. Press **enter** again to begin restoring the device.
19. Follow the on-screen instructions to install the operating system and programs.
20. After the operating system and programs are installed, remove the USB flash drive.

---

**NOTE:** After the operating system and programs are installed, the device automatically restarts. You are then prompted to set up your device.

---

21. Use Update Manager to reinstall any updates not installed with the factory image.

22. Restore your personal files.

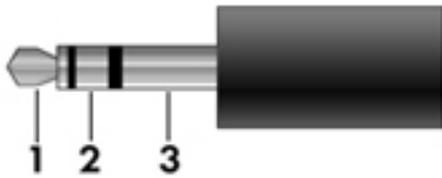

---

 **NOTE:** After this process is complete, you can uninstall the HP MIE Restore Image Creator utility from the Linux computer and delete the downloaded recovery image from the USB flash drive. (The image must be deleted manually.)

# 10 Power cord set requirements

The wide range input feature of the device permits it to operate from any line voltage from 100 to 120 volts AC or from 220 to 240 volts AC.

The 3-conductor power cord set included with the device meets the requirements for use in the country or region where the equipment is purchased.

Power cord sets for use in other countries and regions must meet the requirements of the country or region where the device is used.

## Requirements for all countries and regions

The requirements listed below are applicable to all countries and regions:

- The length of the power cord set must be at least 1.5 m (5.0 ft) and no more than 2.0 m (6.5 ft).
- All power cord sets must be approved by an acceptable accredited agency responsible for evaluation in the country or region where the power cord set will be used.
- The power cord sets must have a minimum current capacity of 10 amps and a nominal voltage rating of 125 or 250 V AC, as required by the power system of each country or region.
- The appliance coupler must meet the mechanical configuration of an EN 60 320/IEC 320 Standard Sheet C13 connector for mating with the appliance inlet on the back of the device.

## Requirements for specific countries and regions

Country/region	Accredited agency	Applicable note number
Australia	EANSW	1
Austria	OVE	1
Belgium	CEBC	1
Canada	CSA	2
Denmark	DEMKO	1
Finland	FIMKO	1
France	UTE	1
Germany	VDE	1
Italy	IMQ	1
Japan	METI	3
The Netherlands	KEMA	1
Norway	NEMKO	1
The People's Republic of China	CCC	5
South Korea	EK	4
Sweden	SEMKO	1
Switzerland	SEV	1
Taiwan	BSMI	4
The United Kingdom	BSI	1
The United States	UL	2

1. The flexible cord must be Type HO5VV-F, 3-conductor, 1.0-mm<sup>2</sup> conductor size. Power cord set fittings (appliance coupler and wall plug) must bear the certification mark of the agency responsible for evaluation in the country or region where it will be used.
2. The flexible cord must be Type SPT-3 or equivalent, No. 18 AWG, 3-conductor. The wall plug must be a two-pole grounding type with a NEMA 5-15P (15 A, 125 V) or NEMA 6-15P (15 A, 250 V) configuration.
3. The appliance coupler, flexible cord, and wall plug must bear a "T" mark and registration number in accordance with the Japanese Dentori Law. The flexible cord must be Type VCT or VCTF, 3-conductor, 1.00-mm<sup>2</sup> conductor size. The wall plug must be a two-pole grounding type with a Japanese Industrial Standard C8303 (7 A, 125 V) configuration.
4. The flexible cord must be Type RVV, 3-conductor, 0.75-mm<sup>2</sup> conductor size. Power cord set fittings (appliance coupler and wall plug) must bear the certification mark of the agency responsible for evaluation in the country or region where it will be used.
5. The flexible cord must be Type VCTF, 3-conductor, 0.75-mm<sup>2</sup> conductor size. Power cord set fittings (appliance coupler and wall plug) must bear the certification mark of the agency responsible for evaluation in the country or region where it will be used.

---

# 11 Recycling

## Battery

When a battery has reached the end of its useful life, do not dispose of the battery in general household waste. Follow the local laws and regulations in your area for computer battery disposal.

## Display

- 
- ⚠ **WARNING!** The backlight contains mercury. Exercise caution when removing and handling the backlight to avoid damaging this component and causing exposure to the mercury.
  - ⚠ **CAUTION:** The procedures in this chapter can result in damage to display components. The only components intended for recycling purposes are the liquid crystal display (LCD) panel and the backlight. When you remove these components, handle them carefully.
  - 📄 **NOTE: Materials Disposal.** This HP product contains mercury in the backlight in the display assembly that might require special handling at end-of-life. Disposal of mercury may be regulated because of environmental considerations. For disposal or recycling information, contact your local authorities, or see the Electronic Industries Alliance (EIA) Web site at <http://www.eiae.org>.
- 

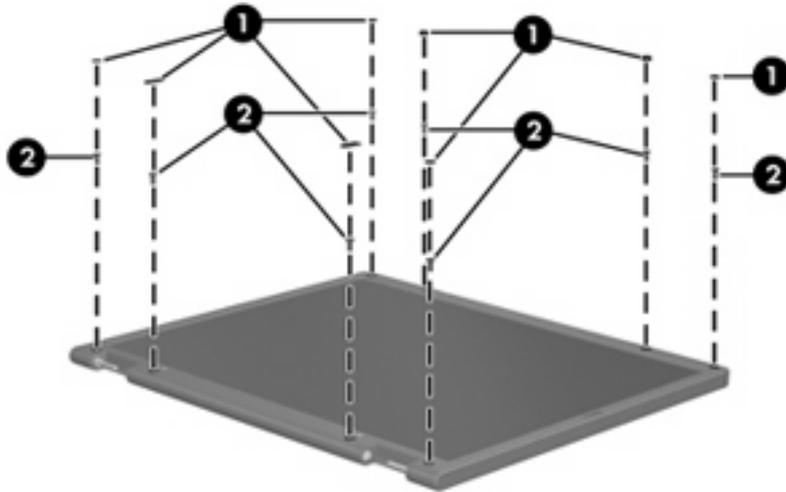

This section provides disassembly instructions for the display assembly. The display assembly must be disassembled to gain access to the backlight **(1)** and the liquid crystal display (LCD) panel **(2)**.

- 
- 📄 **NOTE:** The procedures provided in this appendix are general disassembly instructions. Specific details, such as screw sizes, quantities, and locations, and component shapes and sizes, can vary from one computer model to another.
-

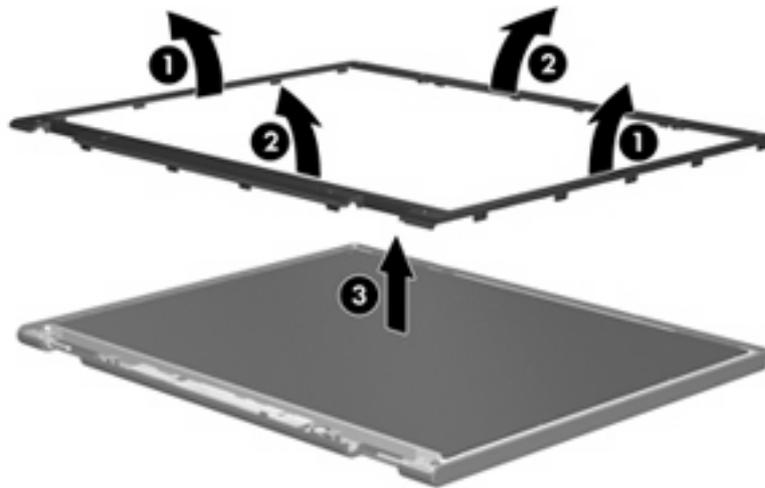

Perform the following steps to disassemble the display assembly:

1. Remove all screw covers (1) and screws (2) that secure the display bezel to the display assembly.

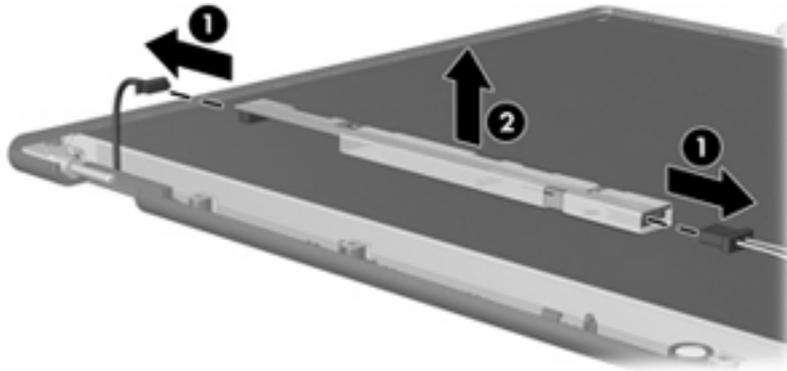

2. Lift up and out on the left and right inside edges (1) and the top and bottom inside edges (2) of the display bezel until the bezel disengages from the display assembly.

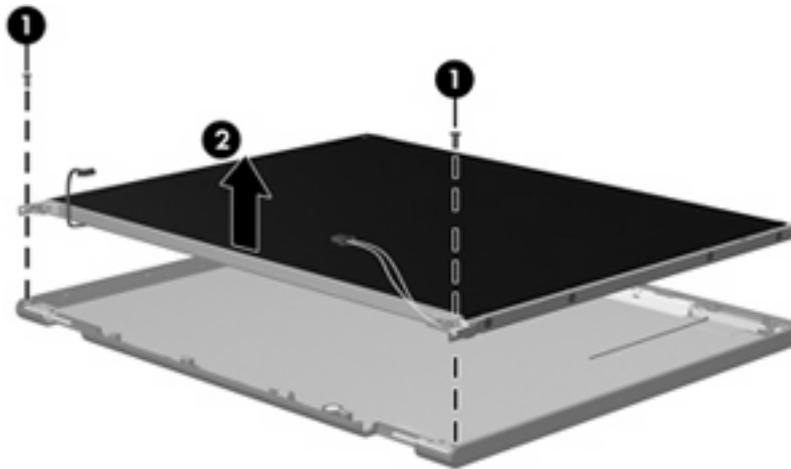

3. Remove the display bezel (3).

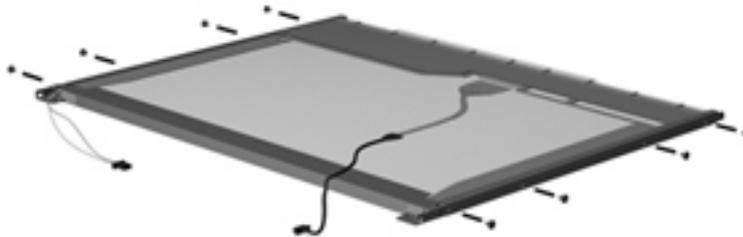

4. Disconnect all display panel cables (1) from the display inverter and remove the inverter (2).

5. Remove all screws (1) that secure the display panel assembly to the display enclosure.
6. Remove the display panel assembly (2) from the display enclosure.

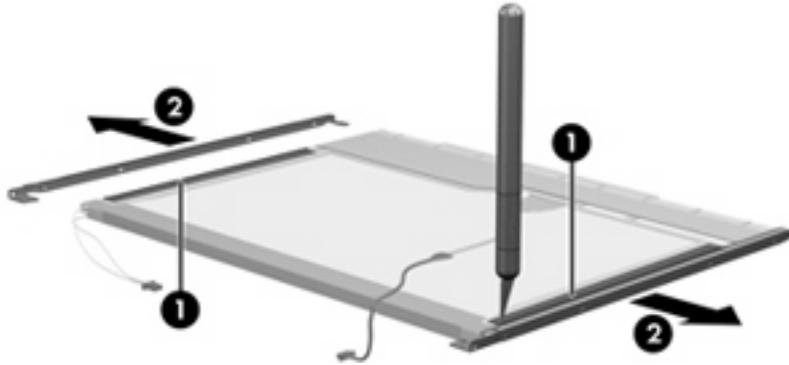

7. Turn the display panel assembly upside down.
8. Remove all screws that secure the display panel frame to the display panel.

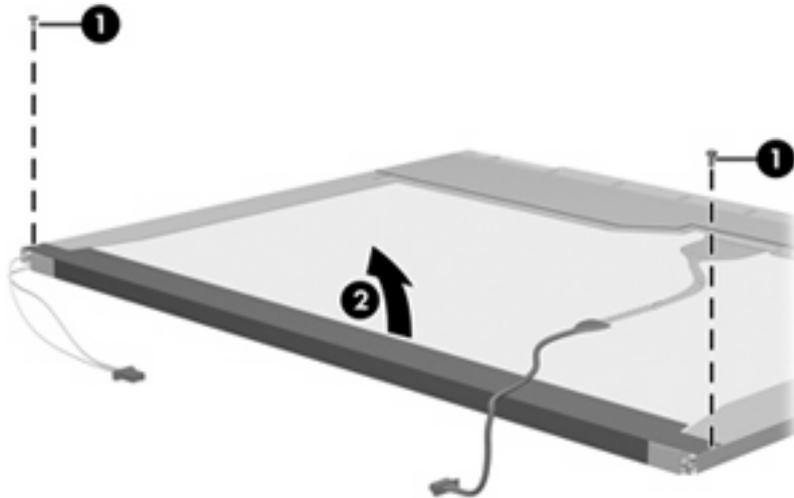

9. Use a sharp-edged tool to cut the tape (1) that secures the sides of the display panel to the display panel frame.

10. Remove the display panel frame (2) from the display panel.

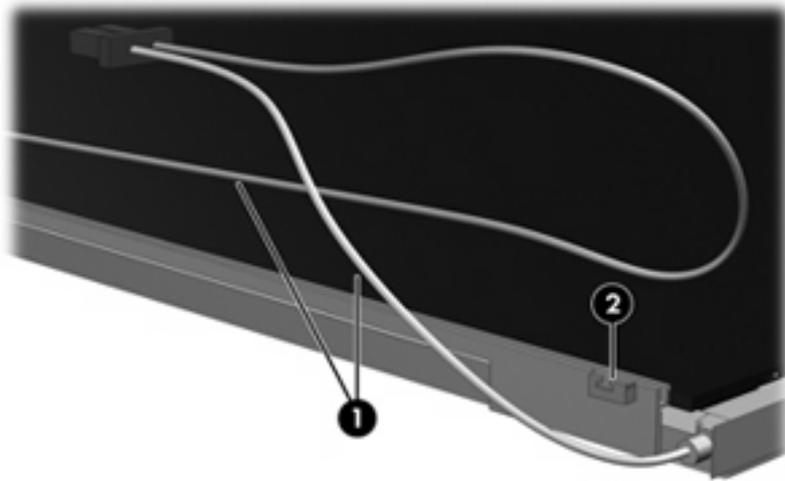

11. Remove the screws (1) that secure the backlight cover to the display panel.
12. Lift the top edge of the backlight cover (2) and swing it outward.

13. Remove the backlight cover.
14. Turn the display panel right-side up.

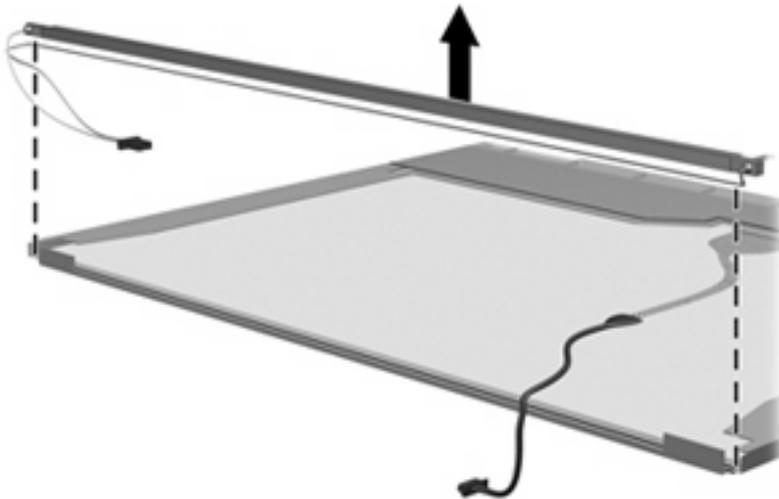

15. Remove the backlight cables (1) from the clip (2) in the display panel.

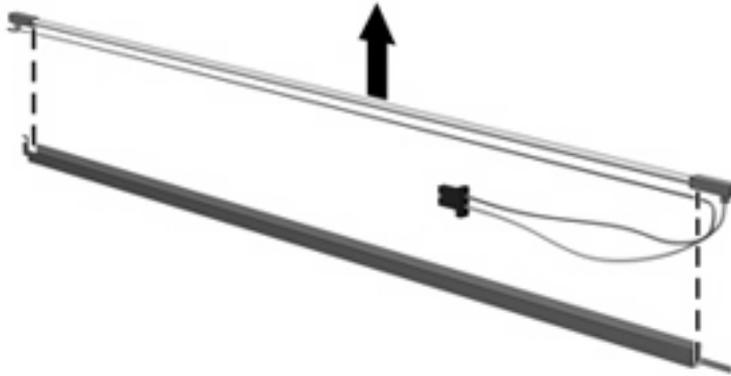

16. Turn the display panel upside down.

⚠ **WARNING!** The backlight contains mercury. Exercise caution when removing and handling the backlight to avoid damaging this component and causing exposure to the mercury.

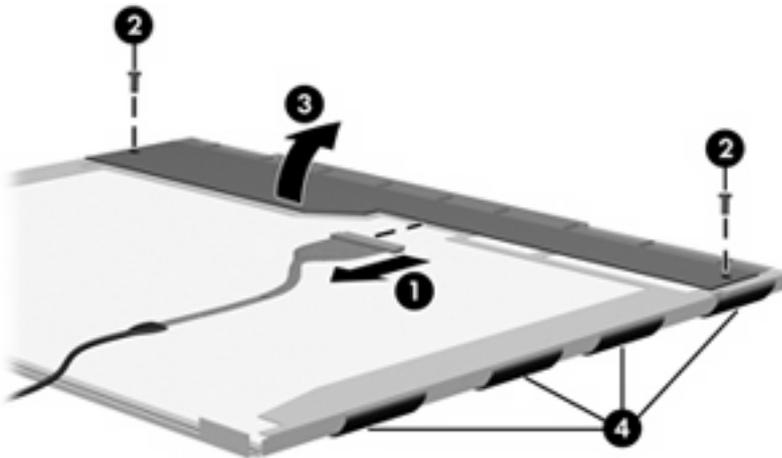

17. Remove the backlight frame from the display panel.

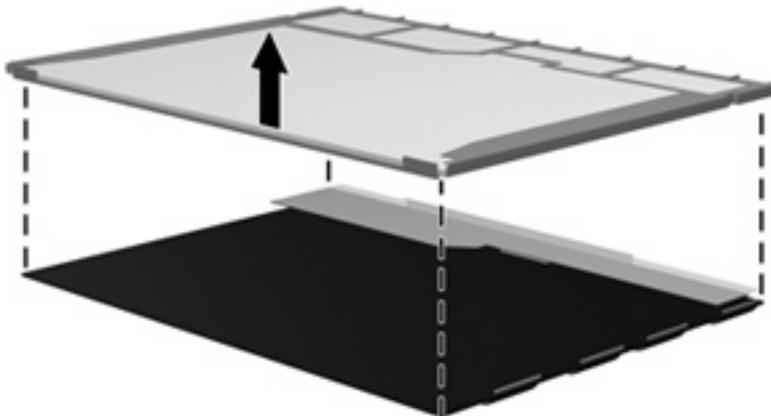

18. Remove the backlight from the backlight frame.

19. Disconnect the display panel cable (1) from the LCD panel.
20. Remove the screws (2) that secure the LCD panel to the display rear panel.
21. Release the LCD panel (3) from the display rear panel.
22. Release the tape (4) that secures the LCD panel to the display rear panel.

23. Remove the LCD panel.

24. Recycle the LCD panel and backlight.
