HP 2140 Fax series
User Guide

Part number: CM721-90001
Safety information

⚠️ WARNING! To prevent fire or shock hazard, do not expose this product to rain or any type of moisture.

Always follow basic safety precautions when using this product to reduce risk of injury from fire or electric shock.

⚠️ WARNING! Potential shock hazard

- Read and understand all instructions in the setup poster.
- Telephone lines can develop hazardous voltages. To avoid electrical shock, do not touch the contacts on the end of the cord, or any of the sockets on the HP Fax. Replace damaged cords immediately.
- Never install telephone wiring during a lightning storm.
- Observe all warnings and instructions marked on the product.
- Unplug this product from wall outlets and telephone jacks before cleaning.
- Do not install or use this product near water or when you are wet.
- Install the product securely on a stable surface.
- Install the product in a protected location where no one can step on or trip over the line cord, and where the line cord will not be damaged.
- If the product does not operate normally, see the Troubleshooting section of this user guide.
- No operator-serviceable parts inside. Refer servicing to qualified service personnel.
- Use in a well ventilated area.

Note: Regulatory information can be found in the Specification section of this guide.

It is not lawful in many places to make copies of the following items. When in doubt, check with a legal representative first.

- Governmental paper or documents
  - Passports
  - Immigration papers
  - Selective service papers
  - Identification badges, cards or insignias
- Governmental stamps:
  - Postage stamps
  - Food stamps
- Checks or drafts drawn on Governmental agencies
- Paper currency, traveler’s checks, or money orders
- Certificates of deposit
- Copyrighted works

1 Quick start

This chapter gives you a quick introduction to the basic functions of your new fax machine. Please refer to the later chapters for detailed instructions.

Load paper

You can load up to 50 sheets of plain paper in the input tray. Before loading the paper, make sure the paper size is set correctly in the BASIC FAX menu. For more information, see Paper Size on page 13.

The HP Fax is designed to work with a variety of plain papers (cotton bond 75–90 g/m² (20–24 lb.)) in A4, Letter, and Legal sizes.

💡 TIP: Some papers have a side that’s been conditioned for printing. The “print side” is indicated on the paper’s packaging. Always load with the print side facing you.

1 Slide the Paper Guide to Ltr or A4 paper width. Be sure not to bind the paper stack.

2 Pull the Paper Tray Cover toward you to open it.

⚠️ NOTE: You must open the Paper Tray Cover to properly insert the paper.
3 Fan, neatly stack, then insert up to 50 sheets of paper with the print side facing you.

4 Push the Paper Tray Cover back into place.

Load documents to fax or copy

You can load up to 15 pages in the document feeder. Load the documents face down (printed side toward the machine).

Send a fax

1. Place the document to be sent (up to 15 pages) in the document feeder.
2. Dial the number by using one of these methods:
   • Entering the number and pressing Start.
   • Lifting the handset, entering the number, and pressing Start.
   • Using the Loudspeaker button to listen as you dial, then pressing Start.
   • Pressing and holding a One Touch button. For more information, see One-touch dialing on page 19.
   • Pressing the Speed Dial button, when Search & Dial appears in the display, press OK and search for the number. When the correct number appears, press Start. For more information, see Phone book dialing on page 19.

   NOTE: One touch and speed dial locations must have been previously programmed. For more information, see Store a number in the phone book on page 18.
Receive a fax

How faxes are received depends on how the Answer Mode/Receive Mode is set. For more information, see Set rings to answer on page 23.

**FAX answer mode**
The fax machine will answer the telephone, automatically detect fax tones, and receive a fax.

⚠️ TIP: However, if you accidentally answer the telephone and hear fax tones, press the Start button to receive the fax.

**AUTO answer mode**
In AUTO mode the telephone rings for a certain number of rings (see Set rings to answer on page 23), then switches to FAX receiving.

**TEL answer mode**
If the answer Mode is set to TEL, you must manually receive faxes.

1. Answer the telephone.
2. If you hear fax tones, press the Start button.
3. Once you hear fax tones from both machines (this may take several seconds), you should hang up the telephone.

Make a copy

You can make multiple copies of a 15 page document.

**Single copy—default settings**
1. Turn the page face down and insert it into the document feeder.
2. Press Copy twice.

**Multiple copies or copies with options/settings**
1. Turn the page face down and insert it into the document feeder.
2. Press Copy.
   - Number of Copies then 01 [01-50] will display.
3. If you want more than one copy, use the phone pad to enter the number of copies.
4. Press Copy to start copying or press OK to go to the next option.
   - Zoom Rate then 97% will display.
5. Press ▼ ▼ to select the reduction or enlargement percentage you want (50 –150).
6. Press Copy to start copying or press OK to go to the next option.
   - Print Order then Normal will display.
7. Press ▼ ▼ to select Reverse if you want the last page printed first.
   - Printing the copies in reverse order will cause the first page to be on top when the copy is complete.
8. Pressing either Copy or OK will start copying.
Make a telephone call

Use one of the following methods:

- Pick up the handset and dial the number.
- Press and hold a One Touch number. This turns on the speaker. When you are connected, pick up the handset. For more information, see One-touch dialing on page 19.
- Press the Speed Dial button, when Search & Dial appears in the display, press OK and search for the number. When the correct number appears, press Start. This turns on the speaker. When you are connected, pick up the handset. For more information, see Phone book dialing on page 19.

**NOTE:** One touch and speed dial locations must have already been entered before you can use them. For more information, see Store a number in the phone book on page 18.
This chapter lists the basic features of your new HP Fax and introduces you to the machine.

**The HP Fax features**

The HP Fax offers the following features:

- 200 page fax memory
- 50 page paper tray
- 15 page document feeder
- Favorites capability: Scan the entire document into memory before sending (see page 25).
- 100 speed dialing locations (including 10 One-Touch speed dials) (see page 18).
- Distinctive Ring (DRPD) capability: Multiple numbers on the same phone line that are differentiated by ring pattern (see page 26).
- Broadcasting: Send the same document to multiple destinations (see page 29).
- Fax forwarding: Forward documents to another fax machine (see page 31).
- Delayed fax: Send the document at a later time (see page 29).
- Send/Receive Polling: Retrieve a waiting fax or hold a fax to be picked up (see page 30).
- Caller ID (see page 24).
- Last 10 number redial (see page 37).
- Junk fax blocking (with Caller ID) (see page 24).
- Reports to help you manage your work (see page 34).

Overview of menu options

Your fax machine has settings that you can change. To find out how the options are currently set, print the System Data report (see Print reports on page 34).

To change these settings, see Navigate the menus on page 15.

The tables below shows the options for a menu in the left column and their setting choices in the right column.

### BASIC FAX menu

<table>
<thead>
<tr>
<th>Option</th>
<th>Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>Silent Mode</td>
<td>You can turn off the machine sounds either manually or on a daily schedule (for example, to turn off the sounds after work hours and overnight). The settings are: Off, On-Always, and On-Daily. For more information, see Silent mode on page 34.</td>
</tr>
<tr>
<td>Language</td>
<td>There are 4 languages you can use for display and reports: English, French, Spanish and Portuguese.</td>
</tr>
<tr>
<td>Sending Confirm</td>
<td>A confirmation report shows whether the transmission was successful or not, how many pages were sent. ON: prints a confirmation report automatically each time you send a fax. OFF: never prints a confirmation report (You can print one manually (see Print reports on page 34)). ERROR: prints only when an error occurs. Note that this report can include the Image TCR (see Image TCR on page 26).</td>
</tr>
<tr>
<td>Paper Size</td>
<td>A4, Letter and Legal are the paper sizes you can use to receive faxes and copy.</td>
</tr>
<tr>
<td>Auto Reduction</td>
<td>When receiving a document as long as or longer than the paper loaded, the machine can automatically reduce the data to fit your paper. If the fax machine cannot fit the data into one page with the feature enabled, the data is divided and printed in actual size on two or more sheets. The settings are On and Off.</td>
</tr>
<tr>
<td>Discard Size</td>
<td>If you turn the Automatic Reduction option off, you can set the fax machine to discard any excess image at the bottom of the page when receiving a document as long as or longer than the paper loaded in your machine. If the incoming fax is out of the margin you have set, it will be printed on two sheets of paper. The Discard Size can be 00 to 30 mm.</td>
</tr>
<tr>
<td>Rings To Answer</td>
<td>You can select the number of rings before answering an incoming call. If you are using your machine as both a telephone and a fax machine (AUTO mode), we suggest you set the ring count to at least 4 to give you time to answer. The number of rings can be 2 to 7.</td>
</tr>
<tr>
<td>ECM Mode</td>
<td>Error correction mode compensates for poor line quality and ensures accurate, error-free transmission with any other ECM-equipped facsimile machine. If the line quality is poor, transmission time may be increased when ECM is enabled. The settings are On and Off.</td>
</tr>
</tbody>
</table>
Overview of menu options

<table>
<thead>
<tr>
<th>Option</th>
<th>Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Send From Memory</strong></td>
<td>You can set your machine to scan a document into memory and then send the fax. The settings are <strong>On</strong> and <strong>Off</strong>.</td>
</tr>
<tr>
<td><strong>Caller ID</strong></td>
<td>You can see the number of the person calling you. Before using this feature, Caller ID service must be installed on your telephone line by the telephone company. The settings are <strong>On</strong>, <strong>On w/ Junk Fax</strong>, and <strong>Off</strong>. For more information, see Use Caller ID on page 24.</td>
</tr>
<tr>
<td><strong>Set Junk Fax No.</strong></td>
<td>If you have Caller ID set to <strong>On w/ Junk Fax</strong>, you can block faxes from particular numbers. You must have received a fax from that number to block it. Even though you have added junk fax numbers, if you turned off the Caller ID option above, the Junk Fax protection will be removed. The settings are <strong>Add</strong> and <strong>Delete</strong>.</td>
</tr>
<tr>
<td><strong>Auto Journal</strong></td>
<td>The Auto Journal shows the specific information concerning transmission or reception activities, the time and date of most recent 40 transmissions or receptions. The settings are <strong>On</strong> and <strong>Off</strong>.</td>
</tr>
<tr>
<td><strong>DRPD Mode</strong></td>
<td>Distinctive ring (DRPD—distinctive ring pattern detection) is a service provided by some telephone companies that assigns two phone numbers to one phone line, each of which makes your phone ring differently. If you subscribe to this service, you can program your machine to learn one phone number and distinctive ring for incoming faxes. For more information, see Distinctive ring (DRPD) on page 26.</td>
</tr>
<tr>
<td><strong>Resolution</strong></td>
<td>Sets the default resolution when copying and faxing. The settings are: <strong>Standard</strong>, <strong>Fine</strong>, and <strong>Superfine</strong>. For more information, see Set document resolution and contrast for a single copy on page 21.</td>
</tr>
<tr>
<td><strong>Contrast</strong></td>
<td>Sets the default contrast when copying and faxing. The settings are: <strong>Normal</strong>, <strong>Lighten</strong>, <strong>Photo</strong>, and <strong>Darken</strong>. For more information, see Set document resolution and contrast for a single copy on page 21.</td>
</tr>
<tr>
<td><strong>Image TCR</strong></td>
<td>Image TCR prints a sending confirm page with a miniature image of the first page of the fax. The settings are <strong>On</strong> and <strong>Off</strong>. For more information, see Image TCR on page 26.</td>

</table>
Loudspeaker

You do not need to pick up the handset to make a phone call. When dialing, just press the Loudspeaker button and enter the numbers. When your party answers, pick up the handset to talk to them. This feature is especially useful for checking voicemail messages.

∫ NOTE: Your HP Fax does not have speakerphone capabilities. The loudspeaker enables you to hear calls but you must speak using the handset.

⋎ TIP: If you want to share the conversation with somebody beside you, pick up the handset and press Loudspeaker. The line is still connected and everybody can listen to the conversation.

While you are using Loudspeaker, do not place the handset beside the speaker, as this may result in noise interference.

Navigate the menus

Ready mode

Whenever the HP Fax is ready for faxing and copying (called Ready mode), it will display the date, time, and answer mode. For example, OCT-05 14:23 FAX.

Menu buttons

Use the Menu buttons to navigate the menu items.
Enter dates, times, text, and telephone numbers

Use these buttons when menu items ask you to enter dates, time or text.

- If the date format seems unfamiliar, check that you selected the correct one for your country when setting up your HP Fax (see Set the date and time on page 33).
- Some items on the display will show up with the blinking cursor under the item to change. Simply press the key for the new character or number or use the \( \downarrow \uparrow \) to move to the one you want to change.
- To enter a pause in a telephone number, press Redial/Pause. A \( \text{P} \) will appear in the display. Press the button multiple times for a longer pause.
- When entering text, press the phone pad button repeatedly to scroll through the characters. Use the following table for reference.

---

**Example** To change the default Resolution setting to Fine, you would take the following steps.

1. Press the **Menu** button repeatedly until **BASIC FAX** displays.
2. Press **OK**.
   
   Silent Mode will display.
3. Use the \( \downarrow \uparrow \) to scroll until **Resolution** displays.
4. Press **OK**.
   
   Standard will display.
5. Use the \( \downarrow \uparrow \) to scroll until **Fine** displays.
6. Press **OK**.
7. Press **Cancel** to return to Ready mode.
Most text fields

The letters and numbers scroll as shown next to each button for text fields such as the phone book. Press the 2 to display an A and press ▶ for the cursor to advance before pressing 3 to select D. If you want a B, press 2 twice in rapid succession.

Speed dialing

Fax header telephone number

For most telephone numbers you can only enter the numbers (for example, 1234567890). For the fax header that prints on all your faxes (see Set the fax header information on page 34), you can enter some punctuation in the number.

To punctuate the telephone number in the fax header, use these keys.

Table 2-2  Keys to punctuate the fax header telephone number

</table>

Speed dialing

Your HP Fax has a built-in phone book that allows you to enter up to 100 names and numbers for faxing or telephone use. Once entered, you can dial the number by any of these methods.

- One-Touch (first 10 numbers)
- Searching the phone book through the Speed Dial button

All numbers must be stored in the phone book before use.

Store a number in the phone book

Once in the phone book these numbers can be dialed using one touch buttons, or by searching the phone book through the Speed Dial button.

1. Press Speed Dial button repeatedly until New & Edit appears and press OK. The display shows Speed [00-99]##.
2. Enter a two-digit number and press OK. Numbers from 00 to 09 will be used for One-Touch dialing.
3. Enter the telephone/fax number you want to store (up to 40 digits) and press OK.
• If you want a pause between numbers (for example, when entering an access code where you need to wait for a second dial tone), press **Redial/Pause**. A \( \text{P} \) appears in the display. For a longer pause, simply press **Redial/Pause** again.

• If you make a mistake while entering a number, use \( \leftarrow \rightarrow \) to move the cursor under the digit, then enter the correct digit.
  • **Cancel** will backspace delete in the field.
  • Holding down **Cancel** will clear the whole field.

4. Enter the name (up to 20 characters) and press **OK**.
   If you do not want a name, just skip this step by pressing **OK**.

   \( \text{TIP: If you have subscribed to a Caller ID service, we recommend that you enter a name. } \)

5. Press **Cancel** to exit.

**Print the phone book**

1. Press **Menu** repeatedly until **REPORTS** appears and press **OK**.
2. Press \( \leftarrow \rightarrow \) until **Phonebook** displays and press **OK**.

**Dial from the phone book**

Dialing works the same for both faxes and telephone calls. If a document is loaded in the document feeder, the HP Fax sends the fax.

**One-touch dialing**

\( \uparrow \) Press and hold the number (0 through 9) on the phone pad.

You can refer to the number assigned to each code by printing the phone book. See **Print the phone book** on page 19.

**Phone book dialing**

You can search the entire phone book to find the number you want to dial.

**Search sequentially through the phone book**

1. Press **Speed Dial** button once and when **Search & Dial** appears, press **OK**.
2. Press \( \leftarrow \rightarrow \) to move upward or downward through the directory until you find the number you want.
3. When the number you want appears in the display, press **Start** to dial.

**Search for a particular first letter**

1. Press **Speed Dial** button once and when **Search & Dial** appears, press **OK**.
2. Press the phone pad button labelled with the letter you want to find.
   • For example, if you want to find the name ‘NEW YORK’, press the 6 button, which is labelled with ‘MNO’.
   • The machine finds the closest entry.
   • If the machine cannot find a name that begins with the given letter, the machine shows the message **Not Found**.
3. When the name and number you want appears in the display, press **Start**.
Paper types and sizes

The HP Fax is designed to work optimally with plain paper (cotton bond: 20 lb., 75 g/m²) in the following sizes: A4, Letter, and Legal.

TIP: Some papers have a side that’s been conditioned for printing. The print side is usually indicated on the paper’s packaging. Always load with the print side facing you.

You can load up to 50 sheets of paper in the paper tray. Satisfactory print and receive quality can be obtained with many types of plain paper. Since the quality of plain paper varies widely, test the print quality before buying large quantities of paper. Your machine uses a variety of papers including:

• Copier paper
• Bond paper
• Dual-purpose paper

Because all paper varies in physical characteristics, you can receive mixed results from different packages of paper even though the packages contain the same type of paper. If you encounter undesirable results, try the other side of the paper, a different type, or another package of the same kind of paper.

Do not use the following types of paper with your machine:

• Continuous form feed paper
• Synthetic paper (Tyvek®, etc.)
• Thermal paper
• Multi-sheet forms and documents
• Chemically treated paper (pressure-sensitive paper, carbon-coated paper, etc.)
• Coated (glossy, photo, etc.)
• Papers with raised, embossed lettering

Document types and sizes

The following document size is acceptable when you send a fax.

• The minimum document size is 148 mm (5.8 in.) wide by 128 mm (5 in.) long.
• The maximum size is 216 mm (8.5 in.) wide by 356 mm (14 in.) long.

Follow these tips to ensure worry-free faxing.

• Be sure that your document is dry and free of staples, paper clips, and other foreign objects.
• If you are sending more than one sheet, make sure the bottom sheet enters first. Insert the sheets with a slight push to ensure smooth feeding.
• For multiple sheets, all pages of the document must be the same size and paper type.
• If you are loading pages that are unusually thick or thin, feed one sheet at a time. If the document does not feed correctly, open the control panel, remove the document, and try loading it again.

• For more information on what kind of paper you can use for documents, see Acceptable documents on page 52.

DO NOT try to send documents that are:
• wet
• covered with wet ink or paste
• wrinkled, curled, or folded
• too thin (less than 0.07 mm (0.18 in.) thick—onionskin, airmail paper, etc.)
• too thick (more than 0.15 mm (0.38 in.) thick—index cards, file folders)
• chemically processed (pressure-sensitive paper, carbon-coated paper, etc.)
• coated (glossy, etc.)
• too small or short (such as a label, voucher, etc.)
• made of cloth or metal
To send these documents, use an office copier to make a photocopy first, and then send the copy.

Set document resolution and contrast for a single copy

Document resolution and contrast are set in the same manner for both faxes and copies. For most faxes and copies, default settings will work well.

If you need to send/copy a document with unusual contrast characteristics, including images/embedded pictures, you can adjust the resolution and contrast for that document using the control panel buttons.

We recommend you use documents with a high contrast, such as, documents printed using a high quality printer, felt tip pen, black ink, or typewriter. The paper should be white or very light, and of normal weight, not cardboard or onionskin.

Blue lines on a ruled pad don’t fax well. For more information on the types of paper you can use for documents, see Document types and sizes on page 20.

NOTE: You must set the resolution and contrast before dialing the number.

1. Turn the page face down and insert it into the document feeder. For more information, see Load documents to fax or copy on page 5.

2. Press Resolution repeatedly to select the option you want:
   • STANDARD works well for printed or typewritten originals with normal-sized characters.
   • FINE is good for documents containing a lot of detail.

Adjust volume

- SUPER FINE works well for documents containing extremely fine detail; for example, a map or engineering drawing. SUPER FINE only works if the remote machine also has the SUPER FINE feature.

**NOTE:** SUPER FINE mode is not used when sending documents scanned into memory (i.e., Broadcasting and Delayed Fax). If you are sending document using one of these methods, SUPER FINE will be changed back to FINE even though you selected SUPER FINE.

3. Press Mode/Contrast repeatedly to select the option you want:
   - NORMAL is used for normal handwritten, typed, or printed documents.
   - LIGHTEN is used with very dark print.
   - DARKEN is used with light print or faint pencil markings.
   - PHOTO is used when faxing images/embedded pictures or other documents containing color or gray shades. When Photo is chosen, the resolution is automatically set to FINE.

4. Dial the number and press Start or press Copy.

When sending/copying is finished, resolution/contrast automatically returns to default.

Adjust volume

You can adjust the volume level for both the ringer and the speaker.

Ringer volume

▲ Press ▼ when the fax is in Ready mode to adjust the volume of the ringer. Whenever you press the button, it will increase or decrease the volume.

**NOTE:** The volume 0 indicates that the machine will not ring when a call is received.

Speaker volume

1. Press Loudspeaker.
2. Then press ▼ to adjust the volume of the speaker.

Automatic fax redial

When you send a fax, if the number you have dialed is busy or there is no answer, the machine will automatically redial the number every three minutes up to two times.

If you wish to manually redial the number immediately, press Start after the display shows To redial now, press Start.

Or, press Cancel to stop redialing and the machine returns to Ready mode.
3 Additional features

This chapter contains information on additional features you may want to set or change for your HP Fax.

- Rings to answer: Sets the number of rings before the HP Fax answers the phone.
- Caller ID: If you subscribe to Caller ID through your local phone company, you can use it with your HP Fax.
- Block Junk Faxes: In conjunction with Caller ID, you can block certain numbers from sending you a fax.
- Favorites
- Image TCR
- Distinctive Ring
- Answer/Receive mode: Determines how the HP Fax responds to incoming calls.

Set rings to answer

You can select the number of rings that will occur before the fax answers an incoming call.

⚠️ NOTE: If you are using your machine as both a telephone and a fax machine, we suggest you set the ring count to at least 4 to give you time to answer.

1. Press Menu repeatedly until BASIC FAX displays and press OK.
2. Press ‹ › until Rings to Answer displays and press OK.
3. Enter the number of rings you want (2–7) and press OK.

The HP Fax rings the set number of times and then answers. It then produces a different sounding ring to alert you to which type of call is incoming.

- The additional ring may occur once for a fax call
- The additional ring occurs 5 times for a voice call.

1 The “arrow buttons” located at the left and right of OK button on the control panel are designated by ‹ › in the instructions.
Use Caller ID

Many countries have the Caller ID system that enables the receiver to view the numbers or names of callers. Once you have subscribed to Caller ID services through your local phone company, your machine can display caller information.

NOTE: This option is not available in all countries/regions.

Turn Caller ID on

1. Press Menu repeatedly until BASIC FAX displays and press OK.
2. Use the << >> to scroll to Caller ID and press OK.
3. Use the << >> to scroll to the desired option and press OK.
   - On: Activates the Caller ID feature.
   - On w/ Junk Fax: Activates Caller ID and ignores any fax registered as a junk fax (Block junk fax numbers on page 24).
   - Off: Deactivates the Caller ID feature.

See who called with Caller ID

This function allows you to see who has called. You cannot dial these numbers.

1. Hold Redial/Pause for about two seconds.
2. Press << >> until Caller ID displays and press OK.
3. Scroll through the numbers by pressing << >>.

Print a list of Caller ID numbers

1. Press Menu repeatedly until REPORTS displays and press OK.
2. Press << >> until Caller ID displays and press OK.

Block junk fax numbers

If you subscribe to Caller ID through your local phone company, you can block future faxes from numbers on the Caller ID List. Before using this feature, you must set the Caller ID option to On w/ Junk Fax (see Use Caller ID on page 24).

NOTE: This option is not available in all countries/regions.

Add a junk fax number

1. Press Menu repeatedly until BASIC FAX appears and press OK.
2. Press << >> until Set Junk Fax No. displays and press OK.
3. Press << >> until Add displays and press OK.
   The machine shows the first Caller ID number.
4. Press << >> to find the Caller ID number you want to register as a junk fax and press OK.
   You can enter up to 20 numbers. Numbers which have already been entered as a junk number are marked by * at the end of the display.
Delete a number

1. Press Menu repeatedly until BASIC FAX appears and press OK.
2. Press ▼ ▼ until Set Junk Fax No. displays and press OK.
3. Press ▼ ▼ until Delete displays and press OK.
   The machine shows the first junk number.
4. Press ▼ ▼ to scroll to the junk fax number you want to delete and press OK.

Favorites

Favorites enables you to store documents that are frequently faxed and send them to selected fax numbers without the originals.

NOTE: When you use this feature, PHOTO contrast and SUPER FINE resolution are not supported.

Save a document

1. Load the documents face down in the document feeder.
2. Press Favorites repeatedly until Save appears and press OK.
3. Enter the document ID name (up to 15 characters) by using the number keypad.
4. Press OK.
   The document will be scanned into memory.
   Exceeded Job Memory message appears when you try to save more than five Favorites.

Delete a document

1. Press Favorites repeatedly until Delete appears and press OK.
2. Press ▼ ▼ and then OK to select one or all documents. If you select one document, press ▼ ▼ and when the correct document ID is displayed, press OK.
3. Select Y and press OK when the machine asks if you are sure.

Send a document

1. Press Favorites repeatedly until Send appears and press OK.
2. Press ▼ ▼ to scroll to the document you want to send and press OK.
3. Enter the fax number.
4. Press OK when the correct number is displayed.
   If you have more destinations, select Y and press OK when asked Another? Y/N and repeat from step 3.

Print a document

1. Press Favorites repeatedly until Print appears and press OK.
2. Press ▼ ▼ and then OK to select one or all documents. If you select one document, press ▼ ▼ and when the correct document ID is displayed, press OK.
Image TCR

Image TCR (Transmission Confirmation Report) is a valuable tool for keeping records of faxes you send. It prints a Sending Confirm page with a miniaturized image of the first page of the fax on it. See the following example.

To use image TCR, you must set these Menu options to On: Image TCR and Sending Confirm. Follow these instructions to set the menu options:

1. Press the Menu button repeatedly until BASIC FAX displays and press OK.
2. Use the buttons to scroll to Sending Confirm and press OK.
3. Use the buttons to select On and press OK.
4. Use the buttons to scroll to Image TCR and press OK.
5. Use the buttons to select On and press OK.
6. Press Cancel to return to Ready mode.

NOTE: Image TCR is unavailable if the resolution is set to Super Fine.

Distinctive ring (DRPD)

Distinctive ring or distinctive ring pattern detection (DRPD) is a service offered by some telephone companies. When you subscribe to this service through your local phone company, you have different ring patterns; such as double ring and triple ring, that allow you to have different telephone numbers on one physical line. Your HP Fax works with distinctive ring service.

Use Distinctive Ring to set your HP Fax to answer one of your phone numbers as a fax only line. The phone number (ring pattern) that you teach the HP Fax will be answered as if the machine is in FAX mode. All other numbers on the same line will be answered if they are in AUTO mode.
If you have this service follow both of these instructions in this order to set it up and use it.

**Step 1—Teach the HP Fax the ring pattern**

The HP Fax will learn the ring pattern when you call it from another telephone or fax machine.

1. Be ready to call the fax machine.
2. Press Menu repeatedly until BASIC FAX displays and press OK.
3. Use ← → to scroll through the options until DRPD Mode displays and press OK.
   Call this fax from another fax machine... Waiting Ring... will display.
4. Call the HP Fax.
   DRPD OK will display when the pattern has been learned and the HP Fax will return to Ready mode.

**Step 2—Set up distinctive ring (DRPD) answer mode**

Once you have activated distinctive ring, it becomes one of the answering modes you can select by pressing the Mode/Contrast button.

▲ Press Mode/Contrast repeatedly until DRPD Mode appears in the display.

- In Ready mode, DRPD appears in the right hand corner of the display.
- Now, the HP Fax will manage calls and faxes as if it were set to AUTO mode (AUTO mode on page 28)

Tip: Distinctive ring must be set up again if you reassign your fax number or connect the machine to another telephone line. Once set up again (that is, the fax machine has learned the ring pattern and the answering mode is correctly set), you should test the fax machine by calling the fax number and another number on the same line. The machine should respond appropriately to a call placed to the fax number with fax tones, and to a normal telephone call with the expected ring pattern.

**Answer/receive mode**

How the product receives faxes depends on the answer/receive mode you chose when you set up the product. You can send faxes in any answer/receive mode. The answer/receive mode setting determines how the device answers the incoming call.

### FAX mode

- In Ready mode, **FAX** appears in the right hand corner of the display.
- When you get a call, the machine answers and receives the fax automatically. When reception is complete, the machine returns to Ready mode.
- If you want to change the number of rings before it answers, see **Set rings to answer** on page 23.

### AUTO mode

- In Ready mode, **AUTO** appears in the right hand corner of the display.
- When a call comes in, the machine answers it. If a fax is being sent, the device receives the fax. If the machine does not sense a fax signal, it will ring 5 times in a different tone to tell you it may be a regular telephone call. If you do not pick up the handset it will try again to receive a fax after several more rings.
- If you want to change the number of rings before it answers, see **Set rings to answer** on page 23.

### TEL mode

- In Ready mode, **TEL** appears in the right hand corner of the display.
- Automatic fax reception is turned off. You can receive a fax only by lifting the handset and pressing **Start**.
4 Advanced faxing

In this chapter, you will learn how to use the advanced fax features of your machine.

Broadcasting

With Broadcasting you can have your HP Fax send your fax up to 20 fax numbers at once. The documents are automatically erased from memory when Broadcasting is finished.

1. Turn the document face down and feed it into the machine.
2. Press Menu repeatedly until ADVANCED FAX displays and press OK.
3. Select Set Broadcasting by pressing ‹ › and press OK.
4. Enter the fax number.

• You can enter 20 fax numbers into one job.
5. Press OK when the correct number appears in the display.
   • If you have more destinations, select Y by using ‹ › and press OK when asked Another? Y/N and repeat steps from 4.
   • If you have finished entering all the numbers, answer N and press OK.

The document will be scanned into memory before transmission.

Delayed fax

You can set your machine to send a fax any time in the next 24 hours. For example, it is usually cheaper to send a fax at night because telephone rates are lower than they are during the day. To cancel a scheduled fax, see To cancel the scheduled job on page 31.

1. Turn the document face down and feed it into the machine.
2. Press Menu repeatedly until ADVANCED FAX appears and press OK.
3. Select Set Delayed Fax by pressing ‹ › and press OK.
4. Enter the fax number.

• You can enter 20 fax numbers into one job.
5. Press OK when the number appears in the display.
   • If you have more destinations, select Y by using ← → and press OK when asked Another? Y/N and repeat steps from 4.
   • If you have finished entering all the numbers, answer N and press OK.

6. Enter the name if you want to name the transmission.
   If not, skip this step.

7. Press OK.

8. Enter the time (in the next 24 hours) for the transmission to start.

9. Press OK when the time appears correctly in the display.
The document will be scanned into memory before transmission and be sent at the programmed time.

### Polling

Polling enables you to set up a document so it can be retrieved at a later time. For example, you can place the document in your machine, and the other party can retrieve it when they are in the office or when their calling rates are lower.

### Setting send polling

You can program your fax machine to send a document when it is requested by a remote fax machine.

**NOTE:** Your HP Fax allows you to set one poll job at a time and it can be retrieved once.

1. Turn the document face down and feed it into the machine.
2. Press Menu repeatedly until ADVANCED FAX appears and press OK.
4. Enter the poll code you want to use for this document and press OK.
   • The poll code is preset to 0000, which means that the receiver does not need to enter a poll code to receive the document.
   • The poll code is not static. You enter a new one for each document.
   • The poll code is used to prevent your document from being retrieved by an unauthorized caller.
   • Your machine starts scanning the document(s) into memory and shows POLLING SEND in the display. If the answer mode was TEL, the machine changes it to FAX mode automatically.
   • When it is polled, the page in memory will be deleted automatically. To cancel Send Polling, see To cancel the scheduled job on page 31.
Polling another fax to receive

You can dial another fax machine that has a document waiting and request it to be sent to your fax machine.

1. Dial the telephone number of the remote machine that is ready to be polled.

- **TIP:** One touch buttons do not work in this area.

2. Press **Menu** when you hear a fax tone from the remote machine.
   - The display shows *To poll documents press Start.*
3. Press **Start**.
4. Enter the other fax’s Poll Code to retrieve the document, and press **OK**.

- **NOTE:** If the other fax machine does not have a poll code, enter 0000.

The HP Fax receives and prints the polled document.

- **NOTE:** Not all fax machines have polling capability, and polling incompatibility sometimes occurs between fax machines made by different manufacturers.

To cancel the scheduled job

All scheduled jobs remain in memory after they have been set. To make more memory available, cancel unnecessary scheduled jobs.

1. Press **Menu** repeatedly until **ADVANCED FAX** appears and press **OK**.
2. Select **Cancel Schedule** by pressing **and press **OK**.
3. Select the scheduled job you want to cancel by pressing **.**
4. Press **OK** to cancel the selected schedule.

Forward faxes

While you are away from your home or office, you do not have to miss important faxes. Your machine can forward any faxes it receives to a fax machine at your current location, and if you choose, it can print a copy for you to review when you get back as well.

A Sending Confirm report will print for every fax that is forwarded.

1. Press **Menu** repeatedly until **ADVANCED FAX** appears and press **OK**.
2. Select **Set Fax Forward** by pressing **and press **OK**.
3. Use ** to select the option you want and press **OK**.
   - **Off:** disables fax forwarding
   - **Forward:** forwards a fax to your new location
   - **Forward & Print:** prints a fax and also forwards it to your new location
4. If you selected **Forward or Forward & Print**, **Tel:** will display.
   a. Enter the fax number and press **OK**.
Forward faxes

Start Date&Time will display.

b. Press OK.
The current date and time will display.
c. Enter the start time and press OK.
End Date&Time will display.
d. Press OK.
e. Enter the end time and press OK.
   • The machine returns to Ready mode and FWD will appear in the display at
     the start time and every fax will be forwarded to your new location till the
     end time.
   • During forwarding time, the answer mode temporarily changes to FAX.
This chapter contains instructions for other features of the HP Fax that you may want to use from time to time.

Set the date and time

The current date and time are shown in the display when the machine is on and ready for use (Ready mode). The date and time will be printed on all faxes you send.

1. Press Menu.
2. Press to choose SET DATE & TIME and press OK.
3. Press OK when the display shows Date Format.
4. Press to select either Europe (day month year) or USA (month day year) and press OK.
5. Press OK when the display shows Date & Time.
6. Use the keypad to enter the date and time. You can move the cursor by pressing . Enter the hour in 24-hour format.
7. Press OK.

Turn on and off sounds

You can turn on and off the sounds the HP Fax makes.

WakeUp sounds

WakeUp sound will ring at a specific time set even when Silent Mode is enabled.

1. Press Menu repeatedly until SET UP SOUND appears and press OK.
2. WakeUp Sound will display. Press OK.
3. Select On and enter the time you want the HP Fax to ring. Press OK. Select Off to turn off WakeUp Sound. Press OK.

Alarm sounds

Alarm sounds include the fax tones and beeps.

1. Press Menu repeatedly until SET UP SOUND appears and press OK.
2. Press to select Alarm Sound and press OK.
3. Select On or Off and press OK.
Set the fax header information

**Key sounds**

The Key sounds are the beeps the keys make.

1. Press Menu repeatedly until SET UP SOUND appears and press OK.
2. Press ‹ › to select Key Sounds and press OK.
3. Select On or Off and press OK.

**Silent mode**

You can turn the sounds of the HP Fax (including ringing) on and off using the control panel button. You can also set all sounds to turn off on a daily schedule; for example, turn all the sounds off between 8 pm and 8 am.

1. Press Menu repeatedly until BASIC FAX appears and press OK.
2. Silent Mode will display. Press OK.
3. Select On-Daily and press OK.
   From: 00h To: 23h will display.
4. Enter a start time and an end time and press OK.

**Set the fax header information**

This information is required by law in many countries. The fax header prints your name and fax number on the top of every fax you send.

1. Press Menu repeatedly until SET FAX HEADER displays and press OK.
2. Press OK when the display shows Fax Number.
3. Enter the fax number to which your machine is connected.
   • You can enter up to 20 digits, and include special characters (space, plus sign, etc). For more information, see Fax header telephone number on page 18.
   • To enter a space, press # once.
   • To enter a plus sign +, press *.
   • If you enter a wrong number, use ‹ › to move to the number and correct it.
4. Press OK when finished.
5. Press OK when the display shows Fax Name.
6. Enter the fax name (up to 40 characters) by using the number keypad.
   • You can include special characters (space, plus sign, etc.). For more information, see Enter dates, times, text, and telephone numbers on page 16.
7. Press OK when the name in the display is correct.

**Print reports**

Your fax machine can print many reports for your use.

**Automatic reports**

These reports print automatically.
Reports you can print

You can print these reports whenever you need to. Some of these reports can be set to print automatically also.

1. Press **Menu** repeatedly until **REPORTS** appears and press **OK**.
2. Choose the report you want by using ← →.
3. Press **OK** when the desired report is displayed.
4. The selected report will be printed. The available reports are shown below:

<table>
<thead>
<tr>
<th>Report name</th>
<th>Content</th>

<td>Junk Fax</td>
<td>This report shows the telephone numbers that are marked as a junk fax to be blocked.</td>
</tr>
<tr>
<td>Print Fax</td>
<td>Your machine stores fax data into memory as far as the memory is available and lets you print it at later time. For more information, see Reprinting faxes on page 36.</td>
</tr>
</tbody>
</table>
Reprinting faxes

You may sometimes need to reprint a received fax. Your machine stores the most recently received faxes in memory (approximately 200 pages). As this memory is filled, old faxes that have been printed will be erased to make room for new faxes.

**NOTE:** Unplugging the fax machine power cord and plugging it back in again clears the memory including all unprinted or unsent faxes. A power outage also clears the fax machine memory.

1. Press **Menu** repeatedly until **REPORTS** appears and press **OK**.
2. Press ‹ › to choose **Print Fax** and press **OK**.
   - If there are only old faxes, the machine will automatically print all of them and return to Ready mode without moving to the next step.
   - If there are no faxes in memory, the machine will inform you by displaying **Memory Empty**.
   - If there are both old faxes and unprinted faxes in memory, the machine will go to step 3.
3. Select between **Print New Fax** or **Reprint Old Fax** and press **OK**.
   - **Print New Fax**: The machine prints all new faxes which have never been printed.
   - **Reprint Old Fax**: The machine prints all faxes regardless of new or old.

Clearing memory

You can selectively clear information stored in your machine’s memory.

1. Press **Menu** repeatedly until **MEMORY CLEAR** appears, and press **OK**.
   The display shows the type of information you can clear from memory.
2. Select what you want to delete by pressing ‹ › and press **OK**.
3. Select **Y** and press **OK** when the machine asks if you are sure.
   The types of information you can clear are:

<table>
<thead>
<tr>
<th>Item</th>
<th>It will</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fax Header</td>
<td>Delete the name and phone number from your fax header information.</td>
</tr>
<tr>
<td>Dial/Schedule</td>
<td>Clear the stored numbers in the phone book. In addition, all the scheduled jobs are also cancelled.</td>
</tr>
<tr>
<td>Journal</td>
<td>Clear all records of transmissions and receptions.</td>
</tr>
<tr>
<td>Factory Default</td>
<td>Return all settings to factory defaults.</td>
</tr>
</tbody>
</table>
**Loudspeaker**

You do not need to pick up the handset to make a phone call. When dialing, just press the Loudspeaker button and enter the numbers. When your party answers, pick up the handset to talk to them. This feature is especially useful for checking voicemail messages.

**NOTE:** Your HP Fax does not have speakerphone capabilities. The loudspeaker enables you to hear calls but you must speak using the handset.

**TIP:** If you want to share the conversation with somebody beside you, pick up the handset and press Loudspeaker. The line is still connected and everybody can listen to the conversation.

While you are using Loudspeaker, do not place the handset beside the speaker, as this may result in noise interference.

**Redial a number in memory**

These steps allow you to dial one of the last 10 numbers called that is in memory.

1. Hold Redial/Pause for about two seconds.
2. Press ‹ › until Recent Numbers displays and press OK.
3. Press ‹ › to find the number you want to dial.
4. Press Start when the correct number appears.

If a document is loaded, the machine automatically begins to send.
6 Care and maintenance

This chapter contains information about changing print cartridges, maintaining your HP Fax, the menu settings, error messages, and troubleshooting.

Print cartridge information

The print cartridge life is very sensitive to the content of received faxes or copies you make. To increase its life, we recommend you follow the instructions below:

- Always use the HP 701 (CC635A) black inkjet print cartridge.

**NOTE:** Your HP Fax was shipped with a starter ink cartridge. Replace the starter cartridge when it runs out of ink with the HP 701 cartridge.

- DO NOT unpack the cartridge until you are ready to use it.
- Store it in the same environment as the fax machine.
- If you have unpacked the cartridge but are not using it, store it in an airtight plastic bag.
- DO NOT leave it exposed for an extended period.
- DO NOT refill the cartridge. The warranty will not cover damage caused by using refilled cartridges.

View ink level

When using the 17ml print cartridge, your machine allows you to check the amount of ink remaining. To view the current ink level:

1. Press Menu repeatedly until TOOLS appears and press OK.
2. Scroll to View Ink Level by pressing ← → and press OK.
   
   The machine displays a fractional number. For examples, 1/8 means that ink is low and you need to replace the cartridge. 8/8 means that a new cartridge is installed.

**NOTE:** If the print cartridges were used before being installed in the HP Fax, the estimated ink levels may be inaccurate or unavailable.

**NOTE:** If the HP Fax is low on ink (ink level is 1/8), new faxes that come in will not be printed. They will be stored in memory. You must manually print the faxes from memory (see Reprinting faxes on page 36) until you replace the ink cartridge (see Replace the print cartridge on page 39).

**TIP:** If memory become full before the print cartridge is replaced, the HP Fax will stop answering the phone. Be sure to print the faxes out of memory regularly if you do not immediately replace the ink cartridge.
Print the self test

When you want to test if the machine is working correctly, you can check it by printing the self test.

1. Press Menu repeatedly until TOOLS appears and press OK.
2. Scroll to Self Test by pressing ← → and press OK.

The machine runs self test and prints a report which shows the current status of the machine.

Replace the print cartridge

When you notice that the print becomes light or ink low or when install new ink cartridge appears in the display, replace the print cartridge. The part number for replacement cartridges is HP 701.

1. Press the Access Cartridge button on the control panel.

The cartridge carrier moves to the install position.

2. Open the control panel and cartridge compartment cover (it will click and remain open).
Replace the print cartridge

3. Push the cartridge down and remove it.

4. Take out a new cartridge from its packaging and carefully remove the tape covering the printhead.
   Hold the cartridge by the colored top or black areas only. Do not touch the copper area.
5. To load the cartridge insert the cartridge as shown below. When the cartridge is pushed to the back of the cartridge carrier, push the top of the cartridge until it clicks into place.
   If the cartridge moves loosely in the carrier, it has not clicked into place. Repeat this step.

6. Close the cartridge compartment cover and control panel.
7. Press Start.
8. Press 1 for new cartridge, or 2 for the old one.
   - When you put in a new cartridge, you must choose 1:New
   - When you put in a used cartridge, choose 2:Used. This helps you to check the correct amount of ink you have left.

💡 TIP: If you mix up several used cartridges, it is not possible to check the correct amount of remaining ink. Once you have put in a new cartridge, use it until it is completely exhausted.
Clear jammed documents and paper

Document jams during transmission
If a document jams during transmission or copying, Remove jammed document appears in the display. DO NOT pull the document out of the slot. Doing so could harm your machine.

To clear document jam:
1. Open the control panel.
2. Carefully remove the jammed document.
3. Close the control panel firmly until it clicks into place.

Paper jams during printing
If the fax paper jams while you are receiving or printing, Remove jammed paper and press Cancel appears in the message.

If the paper is jammed in the printing area
1. Remove the jammed paper by pulling it out smoothly in the direction of the arrow as shown.
   If the paper tears when it is being removed check to ensure that no small pieces have been left inside the machine.
2. Press Cancel.
3. If this was a fax, reprint the fax. For more information, see Reprinting faxes on page 36.
If the paper is jammed in the paper feed area
1. Remove the jammed paper as shown.
   If the paper tears when it is being removed check to ensure that no small pieces have been left inside the machine.
2. Reload new paper with the print side facing toward you.
3. Press Cancel when finished.
4. If this was a fax, reprint the fax. For more information, see Reprinting faxes on page 36.

Maintain the print cartridge

If characters are not printing completely or white streaks appear in your text, you may have clogged nozzles. Clean the print cartridge as described below:

1. Press Menu repeatedly until TOOLS appears and press OK.
2. Scroll to Clean Cartridge by pressing ‹ › and press OK.
3. Examine the printed test pattern.
   • If print quality does not improve, remove and reinstall the cartridge and repeat these steps.
   • If the line is still broken, wipe the print cartridge contacts. For more information, see Wipe the print cartridge contacts on page 42.

Wipe the print cartridge contacts

If cleaning the print cartridge as discussed above does not help and you are certain the cartridge has plenty of ink, the problem may be caused by dried ink on the print cartridge contacts or the print cartridge carrier contacts. Follow these two sets of instructions for manual cleaning.

Clean the contacts
1. Press Access Cartridge.
2. Open the control panel and cartridge compartment cover and remove the cartridge. See Replace the print cartridge on page 39.

3. Gently blot and wipe the contacts dry.
   - Use a clean cloth dampened with water to gently clean the entire copper-colored contacts.
   - To dissolve any dried ink, hold the damp cloth against the contacts for about three seconds.

4. Reinstall the cartridge and close the cover and panel.
   If you spend a long time cleaning the cartridge, the cartridge carrier may have moved back to the original position. If so, press Access Cartridge again to move the carrier to the install position.

5. Press Start.
6. Press 1 for new cartridge or 2 for the old one.

Clean the cartridge carrier contacts
Before cleaning these parts, there should be no scheduled job such as delayed fax, send polling, or faxes received into memory.

⚠️ CAUTION: Once you have unplugged the power cord from the machine, all data in memory will be lost.

1. Press Access Cartridge.
2. Open the control panel and cartridge compartment cover and remove the cartridge. See Replace the print cartridge on page 39.
3. Remove the print cartridge.
4. Unplug the power cord from the electrical outlet of the rear of the machine.

⚠️ WARNING! Shock Hazard. Be sure to unplug the power cord before proceeding.
5. Clean the cartridge carrier contacts with clean cotton swab.

6. Plug in the power cord and reinstall the cartridge.

**Clean the document scanner area**

To keep your machine working properly, occasionally clean the white roller, document feeder rubber piece, and the scanning glass. If they are dirty, documents sent to another fax machine will not be clear.

⚠️ **CAUTION:** When you turn the power off to clean the scanner, documents stored in memory will be lost.

1. Open the control panel.
2. Remove the white roller.
   a. At the right-hand end of the white roller there is a bushing that is secured with a small tab.
   b. Push the tab slightly inward, then rotate towards you. Then pull up the right-hand end of the roller to remove it.

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>White roller</td>
</tr>
<tr>
<td>2</td>
<td>White roller latch</td>
</tr>
</tbody>
</table>
3. Wipe the white roller surface with a soft cloth dampened with water.
4. Clean the document feeder rubber piece at the back of the control panel.

5. Carefully wipe the scanning glass with a soft, dry, lint free cloth.
   - If the glass is very dirty, first wipe it with a slightly dampened cloth, then with a dry one.
   - Be careful not to scratch the glass surface.

6. Replace the roller in reverse order, and then close the control panel firmly until it clicks into place.

**Adjust the scanner**

The scanner is adjusted at the factory. If, however, you drop your machine while moving it, we recommend you adjust scanner.

1. Press **Menu** repeatedly until **TOOLS** appears and press **OK**.
2. Scroll to **Adjust Scanner** by pressing ‹ › and press **OK**.
3. Load a plain WHITE sheet of paper (no writing or graphics) into the document feeder and press **OK**.
   - The machine starts to scan the document to adjust the scanner.
   - Printing quality may be unexpectedly worse if you do not use a plain WHITE paper for the adjustment.
## LCD error messages

These are the error messages that may display along with solutions for you.

<table>
<thead>
<tr>
<th><strong>Display</strong></th>
<th><strong>Status/Solution</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Adjust scanner first in TOOLS menu</td>
<td>Adjust the scanner to fix this problem as described in Adjust the scanner on page 45.</td>

</tr>
<tr>
<td>Processing Job</td>
<td>You attempted to enter Favorites while sending or printing Favorites document.</td>
</tr>
<tr>
<td>Unknown ink level</td>
<td>A previously used cartridge has been detected. Remaining ink reported in View Ink Level and Ink Low message may be inaccurate.</td>
</tr>
</tbody>
</table>

**TIP:** (For U.S. only) You can test your HP Fax to make sure it is set up properly for faxing. Place a document in the document feeder, dial 1-888 HP FAX ME (1-888-473-2963) and press Start. Please wait approximately 1 minute and you will receive a “Fax Back System Test” page, confirming your product is working correctly. The Fax Header must be set up in order to test the fax machine.

### Fax problems

This chapter contains product and supplies specifications, ordering information, and regulatory statements.

### Paper types and sizes

The HP Fax is designed to work optimally with plain cotton bond paper.

The following paper sizes and weight can be used with your machine:

<table>
<thead>
<tr>
<th>Paper size</th>
<th>Dimensions</th>
<th>Paper weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>A4</td>
<td>210mm x 297mm (8.3in x 11.7in)</td>
<td>75 – 90g/m² (20 – 24lbs)</td>
</tr>
<tr>
<td>Letter</td>
<td>216mm x 279mm (8.5in x 11.0in)</td>
<td></td>
</tr>
<tr>
<td>Legal</td>
<td>216mm x 356mm (8.5in x 14.0in)</td>
<td></td>
</tr>
</tbody>
</table>

### Document types and sizes

You can insert a document that is up to 15 pages long in the document feeder.

**Acceptable documents**

<table>
<thead>
<tr>
<th></th>
<th>Single sheet</th>
<th>2 or more sheets</th>
</tr>
</thead>
<tbody>
<tr>
<td>Document size</td>
<td>Max 216mm (W) x 356mm (L) b</td>

Dr. P.N. Cundall  
Mining Surveys Ltd., 
Holroyd Road, 
Reading,  
Berks.

Dear Pete,

Permit me to introduce you to the facility of facsimile transmission.

In facsimile a photocell is caused to perform a raster scan over the subject copy. The variations of print density on the document cause the photocell to generate an analogous electrical video signal. The signal is used to modulate a carrier, which is transmitted to a remote destination over a radio or cable communications line.

At the remote terminal, demodulation reconstructs the video signal, which is used to modulate the density of print produced by a printing device. This device is scanning in a raster scan synchronised with that at the transmitting terminal. As a result, a facsimile copy of the subject document is produced.

Probably you have uses for this facility in your organisation.

Yours Sincerely,

Phil.

P.J. CROSS  
Group Leader - Facsimile Research
Environmental product stewardship program

Protecting the environment
Hewlett-Packard Company is committed to providing quality products in an environmentally sound manner. This product has been designed with several attributes to minimize impacts on our environment. For more information, visit HP Commitment to the Environment website at:

http://www.hp.com/go/environment

Ozone production
This product generates no appreciable ozone gas (O₃).

Paper use
This product is suited for the use of recycled paper according to DIN 19309.

Plastics
Plastic parts over 25 grams are marked according to international standards that enhance the ability to identify plastics for recycling purposes at the end of the product's life.

Material safety data sheets
Material Safety Data Sheets (MSDS) can be obtained from the HP web site at:

http://www.hp.com/go/msds

Customers without Internet access should contact their local HP Customer Care Center.

Recycling program
HP offers an increasing number of product return and recycling programs in many countries, as well as partnering with some of the largest electronic recycling centers throughout the world. HP also conserves resources by refurbishing and reselling some of its most popular products.

This HP product contains the following materials that may require special handling at end-of-life:

- Mercury in the fluorescent lamp in the scanner (<2 mg)
- A lithium battery
  This product contains a small Lithium battery that must be removed and disposed of properly at the end of the product’s useful life. The battery is located on the main circuit board.
  - Battery Part Number: Panasonic CR2032
  - Battery Material: Lithium
  - Battery Type: Button/Coin Cell Battery
  - Quantity Per Product: 1
  - Weight: approximately 3 grams
  - Lithium Type: Solid
  - Battery Manufacturer: Panasonic of Japan

California Hazardous Waste Requirement
Attention California users:
The battery supplied with this product may contain perchlorate material. Special handling may apply. See www.dtsc.ca.gov/hazardouswaste/perchlorate for information.

Atención a los usuarios de California:
Regulatory notices

The HP Fax meets product requirements from regulatory agencies in your country/region.

Regulatory model identification number

For regulatory identification purposes, your product is assigned a Regulatory Model Number. The Regulatory Model Number for your product is SNPRG-0802. This regulatory number should not be confused with the marketing name (HP 2140 Fax series) or product number.

Notice to users of the U.S. telephone network: FCC requirements

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the back of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

The HP 2140 Fax series is provided with a RJ11C connector for connecting this product to the telephone network. An additional RJ11C connector is provided for connecting an additional device to the telephone network from the HP 2140 Fax series.

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details.

The REN is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g., 03 is a REN of 0.3).

For earlier products, the REN is separately shown on the label.

If the HP 2140 Fax series causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operation of the equipment. If this happens, the telephone company will provide advance notice in order for you to make necessary modifications to maintain uninterrupted service.

There are no customer serviceable parts inside the HP 2140 Fax series. If trouble is experienced with the HP 2140 Fax series, for repair or warranty information, please contact Hewlett-Packard technical support by calling 866-331-9600. If you have Internet access, you can go to www.hp.com/support for more information on the HP 2140 Fax series.

If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information.

If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of HP 2140 Fax series does not disable your alarm equipment.

If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

This equipment is hearing aid compatible.
HP recommends the use of a Surge Suppressor when connecting the HP 2140 Fax series to AC power. Use of a Surge Suppressor will help protect the HP 2140 Fax series and the telephone network from abnormal surges on the AC powerline.

The Customer Information for facsimile (FAX) equipment must contain the following wording:

The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device, including FAX machines, to send any message unless such message clearly contains in a margin at the top or bottom of each transmitted page or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity, or other individual sending the message and the telephone number of the sending machine or such business, other entity, or individual. (The telephone number provided may not be a 900 number or any other number for which charges exceed local or long-distance transmission charges.)

In order to program this information into your FAX machine, See Set the fax header information on page 34.

**Automatic Dialers:**

WHEN PROGRAMMING EMERGENCY NUMBERS AND (OR) MAKING TEST CALLS TO EMERGENCY NUMBERS:

1) Remain on the line and briefly explain to the dispatcher the reason for the call.

2) Perform such activities in the off-peak hours, such as early morning or late evenings.

**FCC statement**

The United States Federal Communications Commission (in 47 CFR 15.105) has specified that the following notice be brought to the attention of users of this product.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Class B limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The user may find the following booklet prepared by the Federal Communications Commission helpful: How to Identify and Resolve Radio-TV Interference Problems. This booklet is available from the U.S. Government Printing Office, Washington DC, 20402. Stock No. 004-000-00345-4.

⚠️ **CAUTION:** Pursuant to Part 15.21 of the FCC Rules, any changes or modifications to this equipment not expressly approved by the Hewlett-Packard Company, may cause harmful interference and void the FCC authorization to operate this equipment.
Notice to users of the Canadian telephone network/Note à l’attention des utilisateurs du réseau téléphonique Canadien

This product meets the applicable Industry Canada technical specifications/Le présent matériel est conforme aux specifications techniques applicables d’Industrie Canada.

The Ringer Equivalence Number is an indication of the maximum number of devices allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the RENs of all the devices does not exceed five/L’indice d’équivalence de la sonnerie (IES) sert à indiquer le nombre maximal de terminaux qui peuvent être raccordés à une interface téléphonique. La terminaison d’une interface peut consister en une combinaison quelconque de dispositifs, à la seule condition que la somme d’indices d’équivalence de la sonnerie de tous les dispositifs n’excède pas 5.

For non-European customers

This product is approved for use only in the country in which it was purchased. Local country laws may prohibit the use of this product outside the country of purchase. It is strictly forbidden by law in virtually every country to connect nonapproved telecommunications equipment (fax machines) to public telephone networks.

Use Hewlett-Packard support services

www.hp.com/support

If you are unable to find the answer you need in the printed documentation supplied with your product or on the web, you can contact your HP dealer or call the support phone number for your country/region for help.

For the most current list of telephone support numbers and call costs information, go to www.hp.com/support.

Before calling customer support

1 Make sure that
   • Your unit is plugged in and turned on.
   • The correct print cartridge is installed properly.
   • The recommended paper is loaded in the input tray.
2 Reset your unit by unplugging it and plugging it in again.
3 If you need to speak to an HP Customer Support Representative:
   • Have your serial number ready.
   • Print a Self-Test Report.
   • Be prepared to discuss your problem in detail.
4 Be near your unit when you call.

Prepare your unit for shipment

If you are requested to send in your unit for service, do the following:
   • Remove the print cartridge and place it in an airtight bag so it will not dry out. Do not send the print cartridge with the unit unless asked to do so.
   • If you do not have the original packing material, you can request a replacement package set from HP Customer Support. Shipping damage caused by improper packaging is not covered under the warranty.
   • Include these items in the box:
     • A brief description of the symptoms (sample prints are helpful).
     • A copy of your sales slip or proof of purchase (to establish the warranty period).
     • Your name, address, and telephone number where you can be reached during the day.
Use Hewlett-Packard support services

DECLARATION OF CONFORMITY

DoC #: SNPRG-0802

Supplier's Name: Hewlett-Packard Company
Extended Printing Solutions (EPS)
Supplier's Address: 61 Alexandra Terrace
#08-01 Harbour Link
Singapore 119936

Declares, that the product:
Product Name and Model: HP 2140 Fax series
Regulatory Model Number: SNPRG-0802
Product Options: All

conforms to the following Product Specifications and Regulations:

EMC: Class B
FCC Part 15 Subpart B

Safety:
UL 60950-1

Telecom:
FCC Part 68 and TIA-968-A-1 + A-2 + A-3 standard
IC CS-03 standard (Issue 9)

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Additional Information:
This product is assigned a Regulatory Model Number which stays with the regulatory aspects of the design. The Regulatory Model Number is the main product identifier in the regulatory documentation and test reports, this number should not be confused with the marketing name or the product numbers.

<td>1 year unless otherwise stated</td>
</tr>
</tbody>
</table>

A. Extent of limited warranty
1. Hewlett-Packard (HP) warrants to the end-user customer that the HP products specified above will be free from defects in materials and workmanship for the duration specified above, which duration begins on the date of purchase by the customer.
2. For software products, HP’s limited warranty applies only to a failure to execute programming instructions. HP does not warrant that the operation of any product will be interrupted or error free.
3. HP’s limited warranty covers only those defects that arise as a result of normal use of the product, and does not cover any other problems, including those that arise as a result of:
   a. Improper maintenance or modification;
   b. Software, media, parts, or supplies not provided or supported by HP;
   c. Operation outside the product’s specifications;
   d. Unauthorized modification or misuse.
4. For HP printer products, the use of a non-HP cartridge or a refilled cartridge does not affect either the warranty to the customer or any HP support contract with the customer. However, if printer failure or damage is attributable to the use of a non-HP or refilled cartridge or an expired ink cartridge, HP will charge its standard time and materials charges to service the printer for the particular failure or damage.
5. If HP receives, during the applicable warranty period, notice of a defect in any product which is covered by HP’s warranty, HP shall either repair or replace the product, at HP’s option.
6. If HP is unable to repair or replace, as applicable, a defective product which is covered by HP’s warranty, HP shall, within a reasonable time after being notified of the defect, refund the purchase price for the product.
7. HP shall have no obligation to repair, replace, or refund until the customer returns the defective product to HP.
8. Any replacement product may be either new or like-new, provided that it has functionality at least equal to that of the product being replaced.
9. HP products may contain remanufactured parts, components, or materials equivalent to new in performance.
10. HP’s Limited Warranty Statement is valid in any country where the covered HP product is distributed by HP. Contracts for additional warranty services, such as on-site service, may be available from any authorized HP service facility in countries where the product is distributed by HP or by an authorized importer.

B. Limitations of warranty
TO THE EXTENT ALLOWED BY LOCAL LAW, NEITHER HP NOR ITS THIRD PARTY SUPPLIERS MAKES ANY OTHER WARRANTY OR CONDITION OF ANY KIND, WHETHER EXPRESS OR IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY, SATISFACTORY QUALITY, AND FITNESS FOR A PARTICULAR PURPOSE.

C. Limitations of liability
1. To the extent allowed by local law, the remedies provided in this Warranty Statement are the customer’s sole and exclusive remedies.
2. TO THE EXTENT ALLOWED BY LOCAL LAW, EXCEPT FOR THE OBLIGATIONS SPECIFICALLY SET FORTH IN THIS WARRANTY STATEMENT, IN NO EVENT SHALL HP OR ITS THIRD PARTY SUPPLIERS BE LIABLE FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER BASED ON CONTRACT, TORT, OR ANY OTHER LEGAL THEORY AND WHETHER ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

D. Local law
1. This Warranty Statement gives the customer specific legal rights. The customer may also have other rights which vary from state to state in the United States, from province to province in Canada, and from country to country elsewhere in the world.
2. To the extent that this Warranty Statement is inconsistent with local law, this Warranty Statement shall be deemed modified to be consistent with such local law. Under such local law, certain disclaimers and limitations of this Warranty Statement may not apply to the customer. For example, some states in the United States, as well as some governments outside the United States (including provinces in Canada), may:
   a. Preclude the disclaimers and limitations in this Warranty Statement from limiting the statutory rights of a consumer (e.g., the United Kingdom);
   b. Otherwise restrict the ability of a manufacturer to enforce such disclaimers or limitations; or
   c. Grant the customer additional warranty rights, specify the duration of implied warranties which the manufacturer cannot disclaim, or allow limitations on the duration of implied warranties.
3. THE TERMS IN THIS WARRANTY STATEMENT, EXCEPT TO THE EXTENT LAWFULLY PERMITTED, DO NOT EXCLUDE, RESTRICT, OR MODIFY, AND ARE IN ADDITION TO, THE MANDATORY STATUTORY RIGHTS APPLICABLE TO THE SALE OF THE HP PRODUCTS TO SUCH CUSTOMERS.

HP Limited Warranty

Dear Customer,

You will find below the name and address of the HP entity responsible for the performance of the HP Limited Warranty in your country.

You may have additional statutory rights against the seller based on your purchase agreement. Those rights are not in any way affected by this HP Limited Warranty.
