1. Plug in the two-piece power cable and you're ready to start.

2. Pull tab on the back of the keyboard and mouse to activate preinstalled batteries. Ensure the mouse power switch is in the "On" position. The keyboard and mouse are pre-synchronized for your convenience.

3. The keyboard or mouse do not respond, refer to the information on synchronizing the wireless keyboard and mouse in the Getting Started guide.

NOTE: Configurations vary by model.
