Plug in the two-piece power cable and you’re ready to start.

1. Pull tabs on the back of the keyboard and mouse to activate pre-installed batteries. Ensure the mouse power switch is in the “On” position. The keyboard and mouse are pre-synchronized for your convenience.

2. If the keyboard or mouse do not respond, refer to the information on synchronizing the wireless keyboard and mouse in the Getting Started guide.

3. Refer to the Language Guide to install the cabinet and the outside cover. Install the outside cover on the cabinet. The keyboard and mouse are already synchronized.

NOTE: Configurations vary by model.

REMARQUE : les configurations peuvent varier selon les modèles.
