1. Pull the stand away from the PC.

2. Plug in the power cable and you’re ready to start.

3. Wireless Keyboard/Mouse

   1. Important: For better mouse battery life and performance, avoid using your mouse on a dark or high-gloss surface, and turn mouse power off when not in use.

   2. Pull tabs on the back of the keyboard and mouse to activate pre-installed batteries. Ensure the mouse power switch is in the “On” position. The keyboard and mouse are presynchronized for your convenience.

   If the keyboard or mouse do not respond, refer to the information on synchronizing the wireless keyboard and mouse in the User Guide.

4. Wired Keyboard/Mouse

   Press Power button. Do not turn off the computer during this process.

   Startup may take up to 20 minutes.
