1. Pull the stand away from the PC until it clicks into place.

2. Plug in the two-piece power cable and you’re ready to start.

3. **Mouse**
   - Pull tab
   - IMPORTANT: For better mouse battery life and performance, avoid using your mouse on a dark or high-velocity surface, and turn mouse power off when not in use.

4. **Keyboard**
   - Pull tab

Press Power button.
Do not turn off the computer during this process.

Startup may take up to 20 MINUTES.

Pull tabs on the back of the keyboard and mouse to activate pre-installed batteries. Ensure the mouse power switch is in the “On” position. The keyboard and mouse are pre-synchronized for your convenience.

If the keyboard or mouse do not respond, refer to the information on synchronizing the wireless keyboard and mouse in the User Guide.
