

HP ProBook 5220m Notebook PC

Maintenance and Service Guide

SUMMARY

This guide is a troubleshooting reference used for maintaining and servicing the computer. It provides comprehensive information on identifying computer features, components, and spare parts; troubleshooting computer problems; and performing computer disassembly procedures.

Safety warning notice

-
- ⚠ **WARNING!** To reduce the possibility of heat-related injuries or of overheating the computer, do not place the computer directly on your lap or obstruct the computer air vents. Use the computer only on a hard, flat surface. Do not allow another hard surface, such as an adjoining optional printer, or a soft surface, such as pillows or rugs or clothing, to block airflow. Also, do not allow the AC adapter to contact the skin or a soft surface, such as pillows or rugs or clothing, during operation. The computer and the AC adapter comply with the user-accessible surface temperature limits defined by the International Standard for Safety of Information Technology Equipment (IEC 60950).

Wireless	<p>Integrated WLAN options by way of wireless module:</p> <p>Support for the following WLAN formats:</p> <ul style="list-style-type: none"> Intel Wi-Fi Link 1000 802.11b/g/n Intel WiFi Link 6200 802.11 a/b/g/n Broadcom 4322 802.11a/b/g/n Wi-Fi Adapter Broadcom 4313 802.11b/g/n 1x1 WiFi Adapter

Category	Description
	2 WLAN antennas built into display assembly
	Support for no-WLAN option
	Integrated personal area network (PAN) options by way of Bluetooth® module:
	Support for no-WPAN option
	Broadcom Bluetooth 2.1 + Enhanced Data Rate (EDR)
	Integrated WWAN options by way of WWAN module:
	WWAN module Universal Notebook Data Platform (UNDP) with 2 antennas
	Subscriber identity module (SIM) security (customer-accessible in battery bay)
External media cards	Media Card Reader supporting Memory Stick (MS), Memory Stick Pro (MSP), Secure Digital (SD) Memory Card, Secure Digital High Capacity (SDHC) Memory Card, MultiMediaCard (MMC), and xD-Picture Card formats
Ports	Audio-in/Audio-out (stereo microphone/headphone)
	RJ-11 (modem)
	RJ-45 (Ethernet, includes link and activity lights)
	USB 2.0 (3)
	Combo eSATA/USB 2.0 (1)
	HDMI
	VGA (Dsub 15-pin) supporting 1600×1200 external resolution at 75 GHz (hot plug/unplug with auto-detect)
	Multi-pin AC power
Keyboard and pointing devices	Keyboard with TouchPad
	TouchPad with 2 TouchPad buttons and vertical scrolling (taps enabled as default)
Power requirements	65-W AC adapter with localized cable plug support (3-wire plug with ground pin)
	4-cell, 41-Wh 2.8-Ah Li-ion battery
	6-cell, 62-Wh 2.8-Ah Li-ion battery
Security	Supports Kensington security lock
	Intel AT support
	Integrated fingerprint reader

2 External component identification

Identifying hardware

Components included with the computer may vary by region and model. The illustrations in this chapter identify the standard features on most computer models.

 **NOTE:** Your computer may look slightly different from the illustrations in this section.

Top components

TouchPad

Component	Description
(1) TouchPad off indicator	To turn the TouchPad on and off, quickly double-tap the TouchPad off indicator. NOTE: When the TouchPad is on, the light is off.
(2) TouchPad	Moves the pointer and selects or activates items on the screen.
(3) Left TouchPad control	Functions like the left button on an external mouse.
(4) Right TouchPad control	Functions like the right button on an external mouse.

Lights

Component	Description
(1) TouchPad off indicator	<ul style="list-style-type: none"> • Off: the TouchPad is on. • Amber: the TouchPad is off. <p>To switch between active and inactive, quickly double-tap the TouchPad off indicator.</p>
(2) Caps lock light	On: Caps lock is on.
(3) HP QuickLook light	<ul style="list-style-type: none"> • On: QuickLook is on. • Off: QuickLook is off.
(4) HP QuickWeb light	<ul style="list-style-type: none"> • On: QuickWeb is on. • Off: QuickWeb is off.
(5) Power light	<ul style="list-style-type: none"> • On: The computer is on. • Blinking: The computer is in the Sleep state. • Off: The computer is off or in Hibernation.
(6) Wireless light	<ul style="list-style-type: none"> • White: An integrated wireless device, such as a wireless local area network (WLAN) device, HP Mobile Broadband Module (select models only), and/or a Bluetooth® device (select models only), is on. • Amber: All wireless devices are off.
(7) Sound mute light	<ul style="list-style-type: none"> • On: The speaker sound is muted. • Off: The speaker sound is not muted.

Power button and fingerprint reader

Component	Description
(1) Power button	<ul style="list-style-type: none">• When the computer is off, press the button to turn on the computer.• When the computer is on, press the button to shut down the computer. <p>NOTE: Although you can shut down the computer with the power button, the recommended procedure is to use the Windows Shut Down command.</p> <ul style="list-style-type: none">• When the computer is in the Sleep state, press the button briefly to exit Sleep.• When the computer is in Hibernation, press the button briefly to exit Hibernation. <p>If the computer has stopped responding and Windows shutdown procedures are ineffective, press and hold the power button for at least 5 seconds to turn off the computer.</p>
(2) Fingerprint reader (select models only)	Allows a fingerprint logon to Windows, instead of a password logon.

Keys

Component	Description
(1) esc key	Displays system information when pressed in combination with the fn key.
(2) fn key	Executes frequently used system functions when pressed in combination with a function key or the esc key.
(3) Windows logo key	Displays the Windows Start menu. NOTE: This feature does not exist if you are using the Linux operating system.
(4) Windows applications key	Displays a shortcut menu for items beneath the pointer. NOTE: This feature does not exist if you are using the Linux operating system.
(5) Embedded numeric keypad keys	When the keypad has been enabled, it can be used like the keys on an external numeric keypad.
(6) Function keys	Execute frequently used system functions when pressed in combination with the fn key.

Front components

Component	Description
(1) Drive light	<ul style="list-style-type: none">• White: The hard drive is being accessed.• Amber: HP 3D DriveGuard has temporarily parked the hard drive.
(2) Speakers (2)	Produce sound.
(3) Vent	Enables airflow to cool internal components. NOTE: The computer fan starts up automatically to cool internal components and prevent overheating. It is normal for the internal fan to cycle on and off during routine operation.

Right-side components

Component	Description
(1) Battery light	<ul style="list-style-type: none"> • Amber: A battery is charging. • White: A battery is close to full charge capacity. • Off: If the computer is plugged into an external power source, the light turns off when the battery is fully charged. If the computer is not plugged into an external power source, the light stays off until the battery reaches a low battery level.
(2) Media Card Reader	<p>Supports the following optional digital card formats:</p> <ul style="list-style-type: none"> • Memory Stick (MS) • Memory Stick Pro (MSP) • Memory Stick Duo (adapter required) • Memory Stick Duo Pro (adapter required) • MultiMediaCard (MMC) • MultiMediaCard Plus • Secure Digital (SD) Memory Card • SD High Capacity (HC) Memory Card • microSD Memory Card (adapter required) • xD-Picture Card (XD)
(3) Powered USB port	Provides power to a USB device, such as an optional external MultiBay or an optional external optical drive, if used with a powered USB cable.
(4) USB port	Connects optional USB devices.

Component	Description
(5) Audio-out (headphone)/Audio-in (microphone) jack	<p data-bbox="810 218 1442 296">Produces sound when connected to optional powered stereo speakers, headphones, ear buds, a headset, or television audio. Also connects an optional headset microphone.</p> <p data-bbox="810 323 1442 380">NOTE: When a device is connected to the headphone jack, the computer speakers are disabled.</p> <p data-bbox="810 407 1442 506">WARNING! To reduce the risk of personal injury, adjust the volume before putting on headphones, earbuds, or a headset. For additional safety information, refer to the <i>Regulatory, Safety, and Environmental Notices</i>.</p>
(6) RJ-11 (modem) jack	Connects a modem cable.
(7) Power connector	Connects an AC adapter.
(8) Security cable slot	Attaches an optional security cable to the computer.
	<p data-bbox="810 684 1442 741">NOTE: The security cable is designed to act as a deterrent, but it may not prevent the computer from being mishandled or stolen.</p>

Left-side components

Component	Description
(1) External monitor port	Connects an external VGA monitor or projector.
(2) Vent	Enables airflow to cool internal components. NOTE: The computer fan starts up automatically to cool internal components and prevent overheating. It is normal for the internal fan to cycle on and off during routine operation.
(3) Network activity light	Amber: Data is being transmitted over the network.
(4) RJ-45 (network) jack	Connects a network cable.
(5) Network connection light	Green: The computer is connected to the network.
(6) USB/eSATA port	Connects a high-performance eSATA component, such as an eSATA external hard drive, or connects an optional USB device.
(7) HDMI port	Connects an optional video or audio device, such as a high-definition television, or any compatible digital or audio component.

Bottom components

Component	Description
(1) Battery release latches (2)	Release the battery from the battery bay.
(2) Battery bay	Holds the battery and the subscriber identity module (SIM).
(3) Service access door release latches (2).	Release the service access door.
(4) Vents (3)	Enable airflow to cool internal components. NOTE: The computer fan starts up automatically to cool internal components and prevent overheating. It is normal for the internal fan to cycle on and off during routine operation.
(5) Service access bay	Provides access to the hard drive, 2 memory module slots, the wireless local area network (WLAN) module, and the HP Mobile Broadband Module (select models only; not supported by the Linux operating system).

Display components

Component	Description
(1) Internal display switch	Turns off the display and initiates Sleep if the display is closed while the power is on.
(2) Internal microphone	Records sound.
(3) Webcam light (select models only)	On: The webcam is in use.
(4) Webcam (select models only)	Records audio and video and captures still photographs.

Wireless antennas

Your computer has at least two antennas that send and receive signals from one or more wireless devices.

Component	Description
(1) WWAN antennas (2)* (select models only)	Send and receive wireless signals to communicate with wireless wide area networks (WWANs).
(2) WLAN antennas (2)*	Send and receive wireless signals to communicate with wireless local area networks (WLANs).

* For optimal transmission, keep the area immediately around the antennas free from obstructions.

To see wireless regulatory notices, refer to the section of the *Regulatory, Safety, and Environmental Notices* that applies to your country or region. These notices are located in Help and Support.

Additional hardware components

Component	Description
(1) Power cord*	Connects an AC adapter to an AC outlet.
(2) AC adapter	Converts AC power to DC power.
(3) Battery	Powers the computer when the computer is not plugged into external power.

*Power cords vary in appearance by country or region.

3 Illustrated parts catalog

Serial number label location

When you order parts or request information, the serial number label, located inside the battery bay, provides important information that you may need when contacting technical support.

	Component	Description
(1)	Part number	The number that provides specific information about the product's hardware components. The part number helps a service technician to determine what components and parts are needed.
(2)	Serial number	An alphanumeric number that is unique to each product.
(3)	Product information	The product name affixed to the front of your computer.
(4)	Warranty period	The duration of the warranty period for this computer.
(5)	Model description	The alphanumeric identifier you need to locate documents, drivers, and support for your computer.

Computer major components

Item	Description	Spare part number
(1)	30.734-cm (12.1-in) Display assembly (includes 2 WLAN antennas and cables and, on select computer models, 2 WWAN antennas and cables)	
	NOTE: WWAN is available only on select models.	
	• WXGA AntiGlare display assembly without webcam	610807-001
	• WXGA AntiGlare display assembly with webcam	610808-001
	• WXGA AntiGlare display assembly with webcam and WWAN	610809-001
	• WXGA BrightView display assembly without webcam	610810-001
	• WXGA BrightView display assembly with webcam	610811-001
(2)	Switch cover	610832-001
(3)	Keyboard	
	• For use in Japan	610826-291
	• For use in South Korea	610826-AD1
	• For use in Taiwan	610826-AB1
	• For use in Thailand	610826-281
	• For use in the United States	610826-001
(4)	SIM (provided by your wireless vendor for use with WWAN option)	
(5)	Top cover	
	For use with models with fingerprint readers (includes TouchPad assembly)	610833-001
	For use with models without fingerprint readers (includes TouchPad assembly)	610834-001

610813-001	Display back cover for displays with WWAN
610814-001	Display bezel for displays with webcam
610815-001	Display bezel for displays without webcam
610816-001	Display cable for displays with webcam (includes microphone and webcam connector)
610817-001	Display Hinge Kit (includes left and right display hinges)
610818-001	Hard drive, 250-GB, 7200-rpm (includes hard drive bracket)
610819-001	Hard drive, 320-GB, 7200-rpm (includes hard drive bracket)
610820-001	Hard drive, 500-GB, 7200-rpm (includes hard drive bracket)
610821-001	Hard drive, 640-GB, 7200-rpm (includes hard drive bracket)
610823-001	Solid-state drive, 4.57-cm (1.8-in), 80-GB (includes hard drive bracket)
610824-001	Fan
610825-001	Heat sink
610826-001	Keyboard for use in the United States
610826-281	Keyboard for use in Thailand
610826-291	Keyboard for use in Japan
610826-AB1	Keyboard for use in Taiwan
610826-AD1	Keyboard for use in South Korea
610828-001	Plastics Kit (includes service access door)
610829-001	Rubber Kit (includes 4 base enclosure feet, display screw covers, and Bluetooth rubber cage)
610830-001	Screw Kit (See Miscellaneous parts on page 29 for more Screw Kit spare part information.)
610831-001	Speaker assembly
610832-001	Switch cover
610833-001	Top cover, for use with models with fingerprint readers (includes TouchPad assembly)
610834-001	Top cover, for use with models without fingerprint readers (includes TouchPad assembly)
610835-001	Webcam module
611373-001	System board (includes Intel Arrandale i5-540M 2.53-GHz processor and replacement thermal material)
614534-001	System board (includes Intel Arrandale i5-450M 2.4-GHz processor and replacement thermal material)

Spare part number	Description
614535-001	System board (includes Intel Arrandale i5-520M 2.4-GHz processor and replacement thermal material)
614536-001	System board (includes Intel Celeron U3400 1.06-GHz processor and replacement thermal material)
614742-001	Display cable for displays without webcam (includes microphone)

4 Removal and replacement procedures

Preliminary replacement requirements

Tools required

You will need the following tools to complete the removal and replacement procedures:

- Flat-bladed screwdriver
- P0 and P1 screwdrivers

Service considerations

The following sections include some of the considerations that you must keep in mind during disassembly and assembly procedures.

 **NOTE:** As you remove each subassembly from the computer, place the subassembly (and all accompanying screws) away from the work area to prevent damage.

Plastic parts

 **CAUTION:** Using excessive force during disassembly and reassembly can damage plastic parts. Use care when handling the plastic parts. Apply pressure only at the points designated in the maintenance instructions.

Cables and connectors

-
- △ **CAUTION:** When servicing the computer, be sure that cables are placed in their proper locations during the reassembly process. Improper cable placement can damage the computer.
-

Cables must be handled with extreme care to avoid damage. Apply only the tension required to unseat or seat the cables during removal and insertion. Handle cables by the connector whenever possible. In all cases, avoid bending, twisting, or tearing cables. Be sure that cables are routed in such a way that they cannot be caught or snagged by parts being removed or replaced. Handle flex cables with extreme care; these cables tear easily.

Drive handling

-
- △ **CAUTION:** Drives are fragile components that must be handled with care. To prevent damage to the computer, damage to a drive, or loss of information, observe these precautions:
-

Before removing or inserting a hard drive, shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.

Before handling a drive, be sure that you are discharged of static electricity. While handling a drive, avoid touching the connector.

Before removing a diskette drive or optical drive, be sure that a diskette or disc is not in the drive and be sure that the optical drive tray is closed.

Handle drives on surfaces covered with at least one inch of shock-proof foam.

Avoid dropping drives from any height onto any surface.

After removing a hard drive, an optical drive, or a diskette drive, place it in a static-proof bag.

Avoid exposing a hard drive to products that have magnetic fields, such as monitors or speakers.

Avoid exposing a drive to temperature extremes or liquids.

If a drive must be mailed, place the drive in a bubble pack mailer or other suitable form of protective packaging and label the package "FRAGILE."

Grounding guidelines

Electrostatic discharge damage

Electronic components are sensitive to electrostatic discharge (ESD). Circuitry design and structure determine the degree of sensitivity. Networks built into many integrated circuits provide some protection, but in many cases, ESD contains enough power to alter device parameters or melt silicon junctions.

A discharge of static electricity from a finger or other conductor can destroy static-sensitive devices or microcircuitry. Even if the spark is neither felt nor heard, damage may have occurred.

An electronic device exposed to ESD may not be affected at all and can work perfectly throughout a normal cycle. Or the device may function normally for a while, then degrade in the internal layers, reducing its life expectancy.

△ **CAUTION:** To prevent damage to the computer when you are removing or installing internal components, observe these precautions:

Keep components in their electrostatic-safe containers until you are ready to install them.

Use nonmagnetic tools.

Before touching an electronic component, discharge static electricity by using the guidelines described in this section.

Avoid touching pins, leads, and circuitry. Handle electronic components as little as possible.

If you remove a component, place it in an electrostatic-safe container.

The following table shows how humidity affects the electrostatic voltage levels generated by different activities.

△ **CAUTION:** A product can be degraded by as little as 700 V.

Typical electrostatic voltage levels

Event	Relative humidity		
	10%	40%	55%
Walking across carpet	35,000 V	15,000 V	7,500 V
Walking across vinyl floor	12,000 V	5,000 V	3,000 V
Motions of bench worker	6,000 V	800 V	400 V
Removing DIPS from plastic tube	2,000 V	700 V	400 V
Removing DIPS from vinyl tray	11,500 V	4,000 V	2,000 V
Removing DIPS from Styrofoam	14,500 V	5,000 V	3,500 V
Removing bubble pack from PCB	26,500 V	20,000 V	7,000 V
Packing PCBs in foam-lined box	21,000 V	11,000 V	5,000 V

Packaging and transporting guidelines

Follow these grounding guidelines when packaging and transporting equipment:

- To avoid hand contact, transport products in static-safe tubes, bags, or boxes.
- Protect ESD-sensitive parts and assemblies with conductive or approved containers or packaging.
- Keep ESD-sensitive parts in their containers until the parts arrive at static-free workstations.
- Place items on a grounded surface before removing items from their containers.
- Always be properly grounded when touching a component or assembly.
- Store reusable ESD-sensitive parts from assemblies in protective packaging or nonconductive foam.
- Use transporters and conveyors made of antistatic belts and roller bushings. Be sure that mechanized equipment used for moving materials is wired to ground and that proper materials are selected to avoid static charging. When grounding is not possible, use an ionizer to dissipate electric charges.

Workstation guidelines

Follow these grounding workstation guidelines:

- Cover the workstation with approved static-shielding material.
- Use a wrist strap connected to a properly grounded work surface and use properly grounded tools and equipment.
- Use conductive field service tools, such as cutters, screwdrivers, and vacuums.
- When fixtures must directly contact dissipative surfaces, use fixtures made only of static-safe materials.
- Keep the work area free of nonconductive materials, such as ordinary plastic assembly aids and Styrofoam.
- Handle ESD-sensitive components, parts, and assemblies by the case or PCM laminate. Handle these items only at static-free workstations.
- Avoid contact with pins, leads, or circuitry.
- Turn off power and input signals before inserting or removing connectors or test equipment.

Equipment guidelines

Grounding equipment must include either a wrist strap or a foot strap at a grounded workstation.

- When seated, wear a wrist strap connected to a grounded system. Wrist straps are flexible straps with a minimum of one megohm $\pm 10\%$ resistance in the ground cords. To provide proper ground, wear a strap snugly against the skin at all times. On grounded mats with banana-plug connectors, use alligator clips to connect a wrist strap.
- When standing, use foot straps and a grounded floor mat. Foot straps (heel, toe, or boot straps) can be used at standing workstations and are compatible with most types of shoes or boots. On conductive floors or dissipative floor mats, use foot straps on both feet with a minimum of one megohm resistance between the operator and ground. To be effective, the conductive strips must be worn in contact with the skin.

The following grounding equipment is recommended to prevent electrostatic damage:

- Antistatic tape
- Antistatic smocks, aprons, and sleeve protectors
- Conductive bins and other assembly or soldering aids
- Nonconductive foam
- Conductive tabletop workstations with ground cords of one megohm resistance
- Static-dissipative tables or floor mats with hard ties to the ground
- Field service kits
- Static awareness labels
- Material-handling packages
- Nonconductive plastic bags, tubes, or boxes
- Metal tote boxes
- Electrostatic voltage levels and protective materials

The following table lists the shielding protection provided by antistatic bags and floor mats.

Material	Use	Voltage protection level
Antistatic plastic	Bags	1,500 V
Carbon-loaded plastic	Floor mats	7,500 V
Metallized laminate	Floor mats	5,000 V

Component replacement procedures

This section provides removal and replacement procedures.

There are as many as 57 screws, in 5 different sizes, that must be removed, replaced, or loosened when servicing the computer. Make special note of each screw size and location during removal and replacement.

Service tag

When you order parts or request information, provide the computer serial number and model number provided on the service tag, located inside the battery bay.

	Component	Description
(1)	Part number	The number that provides specific information about the product's hardware components. The part number helps a service technician to determine what components and parts are needed.
(2)	Serial number	An alphanumeric number that is unique to each product.
(3)	Product information	The product name affixed to the front of your computer.
(4)	Warranty period	The duration of the warranty period for this computer.
(5)	Model description	The alphanumeric identifier you need to locate documents, drivers, and support for your computer.

Computer feet

Description	Spare part number
Rubber Kit (includes computer feet)	610829-001

The computer feet are adhesive-backed rubber pads. There are 4 rubber feet that attach to the base enclosure in the locations shown in the following illustration.

Battery

Description	Spare part number
4-cell, 41-Wh (2.8-Ah) Li-ion battery	535630-001
6-cell, 62-Wh (2.8-Ah) Li-ion battery	596236-001

Before removing the battery, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer.

Remove the battery:

1. Position the computer upside down on a flat surface with the battery bay toward you.
2. Slide the right lock latch **(1)** inward. The latch opening is marked red to indicate that the latch is unlocked.
3. Slide the left release latch **(2)** inward and hold it in place as you slide and remove the battery **(3)**.

To insert the battery:

1. Turn the computer upside down on a flat surface, with the battery bay toward you.
2. Slide the battery into the battery bay **(1)** until the battery release latch **(2)** clicks.

3. Slide the battery lock (3) to the right to lock the battery into place.

SIM

 **NOTE:** This section applies only to select models with WWAN capability.

NOTE: If there is a SIM inserted in the SIM slot, it must be removed before disassembling the computer. Be sure that the SIM is reinserted in the SIM slot after reassembling the computer.

Before removing the SIM, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
4. Remove the battery (see [Battery on page 40](#)).

Remove the SIM:

1. Position the computer upside down with the battery bay toward you.
2. Press in on the SIM **(1)** to release it from the SIM slot.
3. Remove the SIM **(2)** from the computer.

Install the SIM by inserting it into the SIM slot until you hear a click. To prevent damage to the connectors, use minimal force when inserting a SIM.

 **CAUTION:** If a SIM is inserted backwards or upside down, the battery may not snap into place properly and could damage the SIM and the SIM connector.

WLAN module

Description	Spare part number
Intel Centrino Wireless-N 1000 802.11b/g/n 1x2	593065-001

Description	Spare part number
Intel WiFi Link 6200 802.11 a/b/g/n	572509-001
Broadcom 4313 802.11b/g/n 1x1 WiFi Adapter	593836-001
Broadcom 4322 802.11a/b/g/n 2x2 WiFi Adapter	518434-002

△ **CAUTION:** To prevent an unresponsive system, replace the wireless module only with a wireless module authorized for use in the computer by the governmental agency that regulates wireless devices in your country or region. If you replace the module and then receive a warning message, remove the module to restore computer functionality, and then contact technical support through [Help and Support](#).

Before removing the WLAN module, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer.
4. Remove the battery (see [Battery on page 40](#)).

Remove the WLAN module:

1. Position the computer upside down with the battery bay toward you.
2. Slide the lock latch **(1)** on the service access door inward. The latch opening is marked red to indicate that the latch is unlocked.
3. Slide the left release latch **(2)** inward and hold it in place as you slide the door toward the battery bay.

4. Release the latch and remove the service access door (3).

 **NOTE:** The service access door is available in the Plastics Kit, part number 610828-001.

5. Disconnect the WLAN antenna cables (1) from the terminals on the WLAN module.

 **NOTE:** The black WLAN antenna cable is connected to the WLAN module “Main” terminal. The white WLAN antenna cable is connected to the WLAN module “Aux” terminal.

6. Remove the PM2.0×3.0 screw (2) that secures the WLAN module to the system board. (The WLAN module tilts up.)
7. Remove the WLAN module (3) by pulling the module away from the slot at an angle.

 **NOTE:** WLAN modules are designed with a notch (4) to prevent incorrect insertion.

Reverse this procedure to install the WLAN module.

WWAN module

 **NOTE:** Only select models include a WWAN module (see [Product description on page 1](#)).

Description	Spare part number
EVDO Birlion HSPA	531993-001

 **CAUTION:** To prevent an unresponsive system, replace the wireless module only with a wireless module authorized for use in the computer by the governmental agency that regulates wireless devices in your country or region. If you replace the module and then receive a warning message, remove the module to restore computer functionality, and then contact technical support through Help and Support.

Before removing the WWAN module, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer.
4. Remove the battery (see [Battery on page 40](#)).
5. Remove the service access door (see [WLAN module on page 42](#)).

Remove the WWAN module:

1. Position the computer upside down with the front toward you.
2. Disconnect the WWAN antenna cables **(1)** from the terminals on the WWAN module.

 **NOTE:** The red WWAN antenna cable is connected to the WLAN module “Main” terminal. The blue WWAN antenna cable is connected to the WWAN module “Aux” terminal.

3. Remove the PM2.0×3.0 screw **(2)** that secures the WWAN module to the system board. (The WWAN module tilts up.)

4. Remove the WWAN module (3) by pulling the module away from the slot at an angle.

 **NOTE:** WWAN modules are designed with a notch (4) to prevent incorrect insertion.

Reverse this procedure to install the WWAN module.

Memory module

Description	Spare part number
Memory module (DDR3 PC3-10600 SDRAM, 1333 MHz, shared)	
1024-MB	598859-001
2048-MB	581096-001
4096-MB	599092-001

Before removing the memory module, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer.
4. Remove the battery (see [Battery on page 40](#)).
5. Remove the service access door (see [WLAN module on page 42](#)).

Remove the memory module:

1. Position the computer upside down with the front toward you.
2. Pull away the retention clips (**1**) on each side of the memory module to release the memory module. (The memory module tilts up.)

△ CAUTION: To prevent damage to the memory module, hold it by the edges only. Do not touch the components on the memory module.

3. Remove the memory module (2) by pulling the module away from the slot at an angle.

 **NOTE:** Memory modules are designed with a notch (3) to prevent incorrect insertion.

Reverse this procedure to install a memory module.

Hard drive

 **NOTE:** The hard drive spare part kit includes a hard drive connector and hard drive bracket.

Description	Spare part number
SATA, 9.5-mm, 6.35-cm (2.5-in) hard drives:	
250-GB 7200-rpm hard drive	610818-001
320-GB 7200-rpm hard drive	610819-001
500-GB 7200-rpm hard drive	610820-001
640-GB 7200-rpm hard drive	610821-001
4.57-cm (1.8-in) solid-state drive:	
80-GB	610823-001

Before removing the hard drive, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer.

4. Remove the battery (see [Battery on page 40](#)).
5. Remove the service access door (see [WLAN module on page 42](#)).

Remove the hard drive:

1. Position the computer upside down with the front toward you.
2. Disconnect the hard drive connector cable (1).
3. Remove the two PM2.0x3.0 screws (2) and loosen the PM2.5x10.0 captive screw (3) that secures the hard drive to the computer.
4. Grasp the Mylar tab (4) on the hard drive and lift the hard drive out of the hard drive bay.

5. If it is necessary to replace the hard drive bracket, follow these steps:
 - a. Remove the two PM3.0x3.5 hard drive bracket screws (1) from each side of the hard drive.
 - b. Lift the bracket (2) straight up to remove it from the hard drive.

Reverse this procedure to reassemble and install the hard drive.

Switch cover

Description	Spare part number
Switch cover	610832-001

Before removing the switch cover, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer.
4. Remove the battery (see [Battery on page 40](#)).

Remove the switch cover:

1. Position the computer upside down with the battery bay toward you.
2. Remove the three PM2.0x2.5 screws (1) inside the battery bay.
3. Remove the two PM2.5x6.5 screws (2) located outside the battery bay.

4. Position the computer right-side up with the front toward you, and open the computer.
5. Using a flat-bladed screwdriver, pry up the front edge of the switch cover from the keyboard.

6. To prevent the tabs on the rear edge from breaking, lift the front edge (1) of the switch cover at an angle, and then pull the switch cover (2) toward you to remove it from the computer.

Reverse this procedure to install the switch cover.

Keyboard

 **NOTE:** The keyboard spare part kit includes a keyboard cable.

Description	Spare part number
Keyboard	
For use in Japan	610826-291
For use in South Korea	610826-AD1
For use in Taiwan	610826-AB1
For use in Thailand	610826-281
For use in United States	610826-001

Before removing the keyboard, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer.
4. Remove the battery (see [Battery on page 40](#)).
5. Remove the switch cover (see [Switch cover on page 51](#)).

Remove the keyboard:

1. Position the computer right-side up with the front toward you.
2. Open the computer as far as possible.

3. Remove the two PM2.0x5.0 screws (1) that secure the keyboard to the computer.

4. Gently slide the keyboard back toward the display (1) until you hear the locking tabs release.
5. Lift the rear edge of the keyboard (2) and rotate it toward you until it rests at an angle.

6. Release the zero insertion force (ZIF) connector (1) to which the keyboard cable is attached, and then disconnect the keyboard cable (2) from the system board.

7. Remove the keyboard.

Reverse this procedure to install the keyboard.

Top cover

Description	Spare part number
Top cover	
NOTE: The top cover kit includes the TouchPad assembly.	
For use with models with fingerprint readers	610833-001
For use with models without fingerprint readers	610834-001

Before removing the top cover, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer.
4. Remove the battery (see [Battery on page 40](#)).
5. Remove the following components:
 - a. Switch cover (see [Switch cover on page 51](#))
 - b. Keyboard (see [Keyboard on page 53](#))
 - c. WLAN cables (see [WLAN module on page 42](#))
 - d. WWAN cables (see [WWAN module on page 45](#))

Remove the top cover:

1. Position the computer upside down with the front toward you.

2. Remove the four PM2.5x5.0 screws along the front edge.

3. Position the computer right-side up with the front toward you, and open the display as far as possible.
4. Release and disconnect the following zero insertion force (ZIF) connector cables from the system board:
 - a. Power cable (1)
 - b. TouchPad cable (2)
 - c. Fingerprint reader cable (3)
5. Remove the WLAN cables (4) from the routing channel.

6. Remove the five PM2.5x5.0 screws that secure the keyboard to the base enclosure.

7. Lift the rear edge (1) of the top cover until it rests at an angle and you hear the locking tabs release.
8. Remove the top cover (2) by lifting first one side, then the other, until the top cover is released from the enclosure.

Reverse this procedure to install the top cover.

Display assembly

Description	Spare part number
Display assembly (includes 2 WLAN antennas and cables and, on select computer models, 2 WWAN antennas and cables)	
<ul style="list-style-type: none">WXGA AntiGlare display assembly without webcam	610807-001
<ul style="list-style-type: none">WXGA AntiGlare display assembly with webcam	610808-001
<ul style="list-style-type: none">WXGA AntiGlare display assembly with webcam and WWAN	610809-001
<ul style="list-style-type: none">WXGA BrightView display assembly without webcam	610810-001
<ul style="list-style-type: none">WXGA BrightView display assembly with webcam	610811-001
Display bezel	
<ul style="list-style-type: none">For use with displays with webcam	610814-001
<ul style="list-style-type: none">For use with displays without webcam	610815-001
Webcam module	
	610835-001
Display panel	
Display Hinge Kit	
<ul style="list-style-type: none">Display Hinge Kit (includes left and right display hinges)	610817-001
Display cable	
<ul style="list-style-type: none">Display cable for use with displays with webcam (includes microphone and webcam connector)	610816-001
<ul style="list-style-type: none">Display cable for use with displays without webcam (includes microphone)	614742-001
WLAN antennas and cables (included with display back cover)	
WWAN antennas and cables (included with display back cover used with WWAN option)	
Display back cover	
<ul style="list-style-type: none">For use with displays without WWAN	610812-001
<ul style="list-style-type: none">For use with displays with WWAN	610813-001

Before removing the display assembly, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer.
4. Remove the battery (see [Battery on page 40](#)).
5. Remove the following components:
 - a. Switch cover (see [Switch cover on page 51](#))
 - b. Keyboard (see [Keyboard on page 53](#))

- c. WWAN cables (see [WWAN module on page 45](#))
- d. WLAN cables (see [WLAN module on page 42](#))
- e. Top cover (see [Top cover on page 56](#))

Remove the display assembly:

1. Disconnect the display cable (1) from the system board (2).

△ **CAUTION:** Support the display assembly when removing the following screws. Failure to support the display assembly can result in damage to the display assembly and other computer components.

2. Remove the four PM2.5×5.0 screws (1) that secure the display assembly to the base enclosure.
3. Lift the display assembly (2) straight up and remove it from the base enclosure.

4. If it is necessary to replace the display bezel, display enclosure, or display hinges, remove the four Mylar screw covers (1) and the four PM2.5×5.0 screws (2) that secure the display bezel to the display assembly. The screw covers are available in the Rubber Kit, spare part number 610829-001.

5. Remove the bezel:
 - a. Flex the top (1) of the bezel from the inside edge until it disengages from the display back cover.
 - b. Flex the inside edge of the left side and the right side (2) of the bezel until it disengages from the display back cover.
 - c. Flex the bottom (3) of the bezel from the inside edge until it disengages from the display back cover.
 - d. Remove the display bezel from the display back cover (4).

 **NOTE:** While removing the display bezel, gently remove the double-sided tape that attaches the bezel to the display panel.

6. If it is necessary to replace the webcam module, gently pull the webcam module away from the double-sided tape on the display back cover (1), disconnect the webcam cable from the module (2), and then remove the webcam.

 **NOTE:** To replace the webcam module in the display enclosure, align the holes on the webcam module with the pins on the display enclosure and press onto the double-sided tape.

7. If it is necessary to replace the display hinges, remove the display panel by removing the two PM2.5×5.0 screws and the two PM2.5×3.0 screws (1) that secure the panel to the display back cover.
8. Remove the display panel (2).

- Remove the four PM2.0×3.0 screws (1) that secure the display hinges to the display panel, and then remove the display hinges (2). The left and right display hinges are available in the Display Hinge Kit, spare part number 610817-001.

- If it is necessary to replace the display/webcam cable, turn the display panel upside down and peel back the tape that secures the display cable to the display panel (1), and then release the connector locking bar (2).
- Release the cable from the display panel connector (3).

 **NOTE:** The display cable includes the microphone and, on select models, the webcam connector.

12. Gently pull the integrated microphone (1) from the clips at the top of the display back cover, remove the display cable from the clips and routing channels (2) along the bottom of the display back cover, and then remove the display cable (3).

13. If it is necessary to remove the wireless antennas and cables:

- a. Detach the WLAN antennas and the WWAN antennas (1) from the adhesive on the back cover, and then route the cables through the clips (2) that secure the antenna cables to the display back cover.

- b. Remove the wireless antennas and cables.

Reverse this procedure to reassemble and install the display assembly.

Modem module

Description	Spare part number
Modem module	
NOTE: The modem module spare part kit does not include a modem module cable. The modem module cable is included in the Cable Kit, 610806-001. See Cable Kit on page 27 for more Cable Kit spare part information.	
High-speed 56K modem	510100-011

Before removing the modem module, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer.
4. Remove the battery (see [Battery on page 40](#)).
5. Remove the following components:
 - a. Switch cover (see [Switch cover on page 51](#))
 - b. Keyboard (see [Keyboard on page 53](#))
 - c. Top cover (see [Top cover on page 56](#))

Remove the modem module:

1. Position the computer right-side up with the front toward you.
2. Disconnect the modem module cable **(1)**.
3. Remove the two PM2.0×3.0 screws **(2)** that secure the modem module to the system board.

4. Lift the modem module (3) straight up to disconnect it from the system board.

5. Remove the modem module.

Reverse this procedure to install the modem module.

Bluetooth module

Description	Spare part number
Bluetooth module	537921-001

NOTE: The Bluetooth module spare part kit does not include a Bluetooth module cable. The Bluetooth module cable is included in the Cable Kit, spare part number 610806-001. See [Cable Kit on page 27](#) for more Cable Kit spare part information.

Before removing the Bluetooth module, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer.
4. Remove the battery (see [Battery on page 40](#)).
5. Remove the following components:
 - a. Switch cover (see [Switch cover on page 51](#))
 - b. Keyboard (see [Keyboard on page 53](#))
 - c. Top cover (see [Top cover on page 56](#))

Remove the Bluetooth module:

1. Position the computer right-side up with the front toward you.
2. Remove the Bluetooth module from the base enclosure **(1)**.
3. Disconnect the Bluetooth module cable **(2)**, and then remove the Bluetooth module.

4. Remove the Bluetooth module cable (3) from the system board.

Reverse this procedure to install the Bluetooth module.

Audio board

Description	Spare part number
Audio board (includes cable)	610805-001

Before removing the audio board, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer.
4. Remove the battery (see [Battery on page 40](#)).
5. Remove the following components:
 - a. Switch cover (see [Switch cover on page 51](#))
 - b. Keyboard (see [Keyboard on page 53](#))
 - c. Top cover (see [Top cover on page 56](#))

Remove the audio board:

1. Disconnect the audio board cable (1) from the system board.
2. Remove the PM 2.5x5.0 screw (2).

3. Lift the audio board (3) straight up from the base enclosure.

Reverse this procedure to install the audio board.

RTC battery

Description	Spare part number
RTC battery	599516-001

Before removing the RTC battery, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer.
4. Remove the battery (see [Battery on page 40](#)).
5. Remove the following components:
 - a. Switch cover (see [Switch cover on page 51](#))
 - b. Keyboard (see [Keyboard on page 53](#))
 - c. Top cover (see [Top cover on page 56](#))

Remove the RTC battery:

1. Use a sharp, non-conductive tool to release the clip that secures the battery to the system board.
2. Lift the battery out of the computer.

To install the RTC battery, press it down into the socket until it is seated.

System board

 **NOTE:** The system board spare part kit includes replacement thermal material.

Description	Spare part number
System board (includes replacement thermal material)	
<ul style="list-style-type: none">Includes Intel Arrandale I3-350M 2.26-GHz processor	610803-001
<ul style="list-style-type: none">Includes Intel Arrandale I5-540M 2.53-GHz processor	611373-001
<ul style="list-style-type: none">Includes Intel Arrandale I5-450M 2.4-GHz processor	614534-001
<ul style="list-style-type: none">Includes Intel Arrandale I5-520M 2.4-GHz processor	614535-001
<ul style="list-style-type: none">Includes Intel Celeron U3400 1.06-GHz processor	614536-001

Before removing the system board, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer.
4. Remove the battery (see [Battery on page 40](#)).
5. Remove the following components:
 - a. SIM (see [SIM on page 42](#))
 - b. Switch cover (see [Switch cover on page 51](#))
 - c. Keyboard (see [Keyboard on page 53](#))
 - d. WWAN module (see [WWAN module on page 45](#))
 - e. Bluetooth module and cable (see [Bluetooth module on page 67](#))
 - f. WLAN module (see [WLAN module on page 42](#))
 - g. Hard drive (see [Hard drive on page 48](#))
 - h. Top cover (see [Top cover on page 56](#))

When replacing the system board, be sure that the following components are removed from the defective system board and installed on the replacement system board:

- Memory module (see [Memory module on page 47](#))
- WLAN module (see [WLAN module on page 42](#))
- WWAN module (see [WWAN module on page 45](#))
- Modem module (see [Modem module on page 65](#))
- SIM (see [SIM on page 42](#))

- Fan and heat sink (see [Fan and heat sink on page 75](#))
- RTC battery (see [RTC battery on page 70](#))

Remove the system board:

1. Position the computer upside down with the rear toward you.
2. Disconnect the power connector cable from the system board.

3. Position the computer right-side up with the front toward you.
4. Disconnect the speaker cable (1) from the system board.
5. Disconnect the Bluetooth cable (2) from the system board.
6. Disconnect the audio board cable (3) from the system board.

7. Disconnect the display panel cable (1) from the system board.
8. Disconnect the power button ZIF cable (2) from the system board.

9. Remove the two PM2.5×5.0 screws that secure the system board to the base enclosure.

10. Lift the right side of the system board from the base enclosure (1).

11. Lift the system board up and to the right to remove the system board (2).

Reverse this procedure to install the system board.

Fan and heat sink

 **NOTE:** The heat sink spare part kit includes replacement thermal material.

Description	Spare part number
Fan	610824-001
Heat sink	610825-001

Before removing the heat sink, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer.
4. Remove the battery (see [Battery on page 40](#)).
5. Remove the following components:
 - a. SIM (see [SIM on page 42](#))
 - b. Switch cover (see [Switch cover on page 51](#))
 - c. Keyboard (see [Keyboard on page 53](#))
 - d. WWAN module (see [WWAN module on page 45](#))
 - e. Bluetooth module (see [Bluetooth module on page 67](#))
 - f. WLAN module (see [WLAN module on page 42](#))
 - g. Hard drive (see [Hard drive on page 48](#))
 - h. Top cover (see [Top cover on page 56](#))
 - i. System board (see [System board on page 71](#))

Remove the heat sink:

1. Position the system board upside down on a flat surface.
2. Disconnect the fan cable from the system board **(1)**.

3. Loosen the two PM2.0×5.0 captive screws (2) from the system board, and then remove the fan (3).

4. Following the sequence stamped into the heat sink, loosen the four PM2.5×10.0 captive screws (1) that secure the heat sink to the processor.
5. Lift the heat sink off the processor (2).

 **NOTE:** The thermal material must be thoroughly cleaned from the surfaces of the heat sink components (1) and (2), and the system board components (3) and (4), each time the heat sink is removed. Replacement thermal material is included with all heat sink and system board spare part kits.

Reverse this procedure to install the heat sink and fan.

Speakers

Description	Spare part number
Speakers	610831-001

Before removing the speakers, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer.
4. Remove the battery (see [Battery on page 40](#)).
5. Remove the following components:
 - a. Switch cover (see [Switch cover on page 51](#))
 - b. Keyboard (see [Keyboard on page 53](#))
 - c. Top cover (see [Top cover on page 56](#))
 - d. System board (see [System board on page 71](#))

Remove the speakers:

1. Position the computer right-side up with the front toward you.
2. Remove the two PM2.0×3.0 screws (1) that secure the speakers to the base enclosure.
3. Remove the speakers from the computer (2).

Reverse this procedure to install the speakers.

Security cable slot bracket

Before removing the security cable slot bracket, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer.
4. Remove the battery (see [Battery on page 40](#)).
5. Remove the following components:
 - a. Switch cover (see [Switch cover on page 51](#))
 - b. Keyboard (see [Keyboard on page 53](#))
 - c. Top cover (see [Top cover on page 56](#))
 - d. System board (see [System board on page 71](#))

Remove the security cable slot bracket:

1. Position the computer right-side up with the right side toward you.
2. Remove the two PM2.0x5.0 screws (1) that secure the security cable slot bracket to the base enclosure.
3. Lift the bracket (2) from the rear at an angle up and out.

4. Disconnect the bracket from the power connector.

Reverse this procedure to install the security cable slot bracket.

Power connector cable

 **NOTE:** The power connector cable is included in the [Cable Kit on page 27](#), part number 610806-001.

Before removing the power connector cable, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer.
4. Remove the battery (see [Battery on page 40](#)).
5. Remove the following components:
 - a. Switch cover (see [Switch cover on page 51](#))
 - b. Keyboard (see [Keyboard on page 53](#))
 - c. Top cover (see [Top cover on page 56](#))
 - d. System board (see [System board on page 71](#))
 - e. Security cable slot bracket (see [Security cable slot bracket on page 79](#))

Remove the power connector cable.

1. Position the computer right-side up with the front toward you.
2. Remove the power connector cable (1) from the routing in the base enclosure.
3. Remove the power connector cable from the base enclosure (2).

Reverse this procedure to install the power connector cable.

Modem module cable

 **NOTE:** The modem module cable with RJ-11 connector is included in the [Cable Kit on page 27](#), part number 610806-001.

Before removing the modem module cable, follow these steps:

1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer.
4. Remove the battery (see [Battery on page 40](#)).
5. Remove the following components:
 - a. Switch cover (see [Switch cover on page 51](#))
 - b. Keyboard (see [Keyboard on page 53](#))
 - c. Speakers (see [Speakers on page 78](#))
 - d. Hard drive (see [Hard drive on page 48](#))
 - e. Display assembly (see [Display assembly on page 59](#))
 - f. Top cover (see [Top cover on page 56](#))
 - g. System board (see [System board on page 71](#))
 - h. Security cable slotbracket (see [Security cable slot bracket on page 79](#))

Remove the modem cable.

1. Position the computer right-side up with the front toward you.
2. Release the modem RJ-11 connector from the base enclosure clips (1).

3. Remove the modem cable (2) from the routing in the base enclosure.

Reverse this procedure to install the modem cable.

5 Computer Setup

Computer Setup in Windows 7

Starting Computer Setup

Computer Setup is a preinstalled, ROM-based utility that can be used even when the operating system is not working or will not load.

 **NOTE:** Some of the Computer Setup menu items listed in this guide may not be supported by your computer.

NOTE: An external keyboard or mouse connected to a USB port can be used with Computer Setup only if USB legacy support is enabled.

To start Computer Setup, follow these steps:

1. Turn on or restart the computer, and then press **esc** while the “Press the ESC key for Startup Menu” message is displayed at the bottom of the screen.
2. Press **f10** to enter BIOS Setup.

Using Computer Setup

Navigating and selecting in Computer Setup

The information and settings in Computer Setup are accessed from the File, Security, Diagnostics, and System Configuration menus.

To navigate and select in Computer Setup, follow these steps:

1. Turn on or restart the computer, and then press **esc** while the “Press the ESC key for Startup Menu” message is displayed at the bottom of the screen.
 - To select a menu or a menu item, use the tab key and the keyboard arrow keys and then press **enter**, or use a pointing device to click the item.
 - To scroll up and down, click the up arrow or the down arrow in the upper-right corner of the screen, or use the up arrow key or the down arrow key.
 - To close open dialog boxes and return to the main Computer Setup screen, press **esc**, and then follow the on-screen instructions.

 **NOTE:** You can use either a pointing device (TouchPad, pointing stick, or USB mouse) or the keyboard to navigate and make selections in Computer Setup.

2. Press **f10** to enter BIOS Setup.
3. Select the **File, Security, Diagnostics,** or **System Configuration** menu.

To exit Computer Setup menus, choose one of the following methods:

- To exit Computer Setup menus without saving your changes, click the **Exit** icon in the lower-left corner of the screen, and then follow the on-screen instructions.
– or –
Use the tab key and the arrow keys to select **File > Ignore Changes and Exit**, and then press **enter**.
- To save your changes and exit Computer Setup menus, click the **Save** icon in the lower-left corner of the screen, and then follow the on-screen instructions.
– or –
Use the tab key and the arrow keys to select **File > Save Changes and Exit**, and then press **enter**.

Your changes go into effect when the computer restarts.

Restoring factory settings in Computer Setup

 **NOTE:** Restoring defaults will not change the hard drive mode.

To return all settings in Computer Setup to the values that were set at the factory, follow these steps:

1. Turn on or restart the computer, and then press **esc** while the “Press the ESC key for Startup Menu” message is displayed at the bottom of the screen.
2. Press **f10** to enter BIOS Setup.
3. Use a pointing device or the arrow keys to select **File > Restore Defaults**.
4. Follow the on-screen instructions.
5. To save your changes and exit, click the **Save** icon in the lower-left corner of the screen, and then follow the on-screen instructions.

– or –

Use the arrow keys to select **File > Save Changes and Exit**, and then press **enter**.

Your changes go into effect when the computer restarts.

 **NOTE:** Your password settings and security settings are not changed when you restore the factory settings.

Computer Setup menus

The menu tables in this section provide an overview of Computer Setup options.

 **NOTE:** Some of the Computer Setup menu items listed in this chapter may not be supported by your computer.

File menu

Set Security Level	Change, view, or hide security levels for all BIOS menu items.
Restore Security Defaults	Restore the default security settings.

Computer Setup in Windows Vista and Windows XP

Starting Computer Setup

Computer Setup is a preinstalled, ROM-based utility that can be used even when the operating system is not working or will not load.

 **NOTE:** Some of the Computer Setup menu items listed in this guide may not be supported by your computer.

NOTE: An external keyboard or mouse connected to a USB port can be used with Computer Setup only if USB legacy support is enabled.

To start Computer Setup, follow these steps:

1. Turn on or restart the computer, and then press **esc** while the “Press the ESC key for Startup Menu” message is displayed at the bottom of the screen.
2. Press **f10** to enter BIOS Setup.

Using Computer Setup

Navigating and selecting in Computer Setup

The information and settings in Computer Setup are accessed from the File, Security, Diagnostics, and System Configuration menus.

To navigate and select in Computer Setup, follow these steps:

1. Turn on or restart the computer, and then press **esc** while the “Press the ESC key for Startup Menu” message is displayed at the bottom of the screen.
 - To select a menu or a menu item, use the tab key and the keyboard arrow keys and then press **enter**, or use a pointing device to click the item.
 - To scroll up and down, click the up arrow or the down arrow in the upper-right corner of the screen, or use the up arrow key or the down arrow key.
 - To close open dialog boxes and return to the main Computer Setup screen, press **esc**, and then follow the on-screen instructions.

 **NOTE:** You can use either a pointing device (TouchPad, pointing stick, or USB mouse) or the keyboard to navigate and make selections in Computer Setup.

2. Press **f10** to enter BIOS Setup.
3. Select the **File**, **Security**, **Diagnostics**, or **System Configuration** menu.

To exit Computer Setup menus, choose one of the following methods:

- To exit Computer Setup menus without saving your changes, click the **Exit** icon in the lower-left corner of the screen, and then follow the on-screen instructions.

– or –

Use the tab key and the arrow keys to select **File > Ignore Changes and Exit**, and then press [enter](#).

– or –

- To save your changes and exit Computer Setup menus, click the **Save** icon in the lower-left corner of the screen, and then follow the on-screen instructions.

– or –

Use the tab key and the arrow keys to select **File > Save Changes and Exit**, and then press [enter](#).

Your changes go into effect when the computer restarts.

Restoring factory settings in Computer Setup

 **NOTE:** Restoring defaults will not change the hard drive mode.

To return all settings in Computer Setup to the values that were set at the factory, follow these steps:

1. Turn on or restart the computer, and then press [esc](#) while the “Press the ESC key for Startup Menu” message is displayed at the bottom of the screen.
2. Press [f10](#) to enter BIOS Setup.
3. Use a pointing device or the arrow keys to select **File > Restore Defaults**.
4. Follow the on-screen instructions.
5. To save your changes and exit, click the **Save** icon in the lower-left corner of the screen, and then follow the on-screen instructions.

– or –

Use the arrow keys to select **File > Save Changes and Exit**, and then press [enter](#).

Your changes go into effect when the computer restarts.

 **NOTE:** Your password settings and security settings are not changed when you restore the factory settings.

Computer Setup in Linux

Starting Computer Setup

Computer Setup is a preinstalled, ROM-based utility that can be used even when the operating system is not working or will not load.

 **NOTE:** Some of the Computer Setup menu items listed in this guide may not be supported by your computer or your operating system.

NOTE: Pointing devices are not supported in Computer Setup. You must use the keyboard to navigate and make selections.

NOTE: An external keyboard connected by USB can be used with Computer Setup only if USB legacy support is enabled.

To start Computer Setup, follow these steps:

1. Turn on or restart the computer.
2. Before your operating system opens and while the “F10=ROM Based Setup” message is displayed in the lower-left corner of the screen, press **f10**.

Using Computer Setup

Navigating and selecting in Computer Setup

The information and settings in Computer Setup are accessed from the File, Security, Diagnostics, and System Configuration menus.

1. Open Computer Setup by turning on or restarting the computer, and then pressing **f10** while the “F10 = ROM Based Setup” message is displayed in the lower-left corner of the screen.

Because Computer Setup is not operating system based, it does not support the TouchPad. Navigation and selection are by keystroke:

- To choose a menu or a menu item, use the arrow keys.
 - To select an item, press **enter**.
 - To close open dialog boxes and return to the main Computer Setup screen, press **esc**.
 - To view navigation information, press **f1**.
 - To change the language, press **f2**.
2. Select the **File**, **Security**, **Diagnostics**, or **System Configuration** menu.
 3. To exit Computer Setup, choose one of the following methods:
 - To exit Computer Setup without saving your preferences, use the arrow keys to select **File > Ignore Changes And Exit**. Then follow the instructions on the screen.
 - To save your preferences and exit Computer Setup, use the arrow keys to select **File > Save Changes And Exit**. Then follow the instructions on the screen.

Your preferences go into effect when the computer restarts.

Restoring factory settings in Computer Setup

To return all settings in Computer Setup to the values that were set at the factory, follow these steps:

1. Open Computer Setup by turning on or restarting the computer, and then pressing **f10** while the "F10 = ROM Based Setup" message is displayed in the lower-left corner of the screen.
2. Use the arrow keys to select **File > Restore Defaults**, and then press **enter**.
3. When the confirmation dialog box opens, press **f10**.
4. To save your preferences and exit Computer Setup, use the arrow keys to select **File > Save Changes And Exit**. Then follow the instructions on the screen.

Your preferences go into effect when the computer restarts.

 **NOTE:** Your password settings and security settings are not changed when you restore the factory settings.

Computer Setup menus

The menu tables in this section provide an overview of Computer Setup options.

 **NOTE:** Some of the Computer Setup menu items listed in this guide may not be supported by your computer or your operating system.

File menu

7 Backup and recovery

Windows 7 backup and recovery

To protect your information, use Windows Backup and Restore to back up individual files and folders, back up your entire hard drive (select models only), create system repair discs (select models only), or create system restore points. In case of system failure, you can use the backup files to restore the contents of your computer.

Windows Backup and Restore provides the following options:

- Creating a system repair disc (select models only)
- Backing up individual files and folders
- Creating a system image (select models only)
- Scheduling automatic backups (select models only)
- Creating system restore points
- Recovering individual files
- Restoring the computer to a previous state
- Recovering information using recovery tools

 **NOTE:** For detailed instructions, perform a search for these topics in Help and Support.

NOTE: In case of system instability, HP recommends that you print the recovery procedures and save them for later use.

Backing up your information

Recovery after a system failure is as complete as your most current backup. You should create system repair discs (select models only) and your initial backup immediately after software setup. As you add new software and data files, you should continue to back up your system on a regular basis to maintain a reasonably current backup. The system repair discs (select models only) are used to start up (boot) the computer and repair the operating system in case of system instability or failure. Your initial and subsequent backups allow you to restore your data and settings if a failure occurs.

You can back up your information to an optional external hard drive, a network drive, or discs.

Note the following when backing up:

- Store personal files in the Documents library, and back it up regularly.
- Back up templates that are stored in their associated programs.

- Save customized settings that appear in a window, toolbar, or menu bar by taking a screen shot of your settings. The screen shot can be a time-saver if you have to reset your preferences.

To create a screen shot:

1. Display the screen you want to save.

2. Copy the screen image:

To copy only the active window, press **alt+fn+prt sc**.

To copy the entire screen, press **fn+prt sc**.

3. Open a word-processing document, and then select **Edit > Paste**.

The screen image is added to the document.

4. Save the document.

- When backing up to discs, use any of the following types of discs (purchased separately): CD-R, CD-RW, DVD+R, DVD+R DL, DVD-R, DVD-R DL, or DVD±RW. The discs you use will depend on the type of external optical drive attached to your computer.

 **NOTE:** DVDs and DVDs with double-layer (DL) support store more information than CDs, so using them for backup reduces the number of recovery discs required.

- When backing up to discs, number each disc before inserting it into the external optical drive attached to your computer.

To create a backup using Backup and Restore, follow these steps:

 **NOTE:** Be sure that the computer is connected to AC power before you start the backup process.

NOTE: The backup process may take over an hour, depending on file size and the speed of the computer.

1. Select **Start > All Programs > Maintenance > Backup and Restore**.
2. Follow the on-screen instructions to set up your backup, create a system image (select models only), or create a system repair disc (select models only).

 **NOTE:** Windows includes the User Account Control feature to improve the security of your computer. You may be prompted for your permission or password for tasks such as installing software, running utilities, or changing Windows settings. Refer to Windows Help and Support for more information.

Performing a recovery

In case of system failure or instability, the computer provides the following tools to recover your files:

- Windows recovery tools: You can use Windows Backup and Restore to recover information you have previously backed up. You can also use Windows Startup Repair to fix problems that might prevent Windows from starting correctly.
- **f11** recovery tools: You can use the **f11** recovery tools to recover your original hard drive image. The image includes the Windows operating system and software programs installed at the factory.

 **NOTE:** If you are unable to boot (start up) your computer and you cannot use the system repair discs you previously created (select models only), you must purchase a Windows 7 operating system DVD to reboot the computer and repair the operating system. For additional information, refer to the “Using a Windows 7 operating system DVD (purchased separately)” section in this guide.

Using the Windows recovery tools

To recover information you previously backed up, follow these steps:

1. Select **Start > All Programs > Maintenance > Backup and Restore**.
2. Follow the on-screen instructions to recover your system settings, your computer (select models only), or your files.

 **NOTE:** Windows includes the User Account Control feature to improve the security of your computer. You may be prompted for your permission or password for tasks such as installing software, running utilities, or changing Windows settings. Refer to Windows Help and Support for more information.

To recover your information using Startup Repair, follow these steps:

 **CAUTION:** Using Startup Repair completely erases hard drive contents and reformats the hard drive. All files you have created and any software installed on the computer are permanently removed. When reformatting is complete, the recovery process restores the operating system, as well as the drivers, software, and utilities from the backup used for recovery.

1. If possible, back up all personal files.
2. If possible, check for the presence of the Windows partition and the HP Recovery partition.

To check for the Windows partition, select **Start > Computer**.

To check for the HP Recovery partition, select **Start**, right-click **Computer**, click **Manage**, and then click **Disk Management**.

 **NOTE:** If the Windows partition and the HP Recovery partition are not listed, you must recover your operating system and programs using the Windows 7 operating system DVD and the *Driver Recovery* disc (both purchased separately). For additional information, refer to the “Using a Windows 7 operating system DVD (purchased separately)” section in this guide.

3. If the Windows partition and the HP Recovery partition are listed, restart the computer, and then press **f8** before the Windows operating system loads.
4. Select **Startup Repair**.
5. Follow the on-screen instructions.

 **NOTE:** For additional information on recovering information using the Windows tools, perform a search for these topics in Help and Support.

Using f11

 **CAUTION:** Using **f11** completely erases hard drive contents and reformats the hard drive. All files you have created and any software installed on the computer are permanently removed. The **f11** recovery tool reinstalls the operating system and HP programs and drivers that were installed at the factory. Software not installed at the factory must be reinstalled.

 **NOTE:** If your computer includes a solid-state drive (SSD), you may not have a recovery partition. Recovery discs have been included for computers that do not have a partition. Use these discs to recover your operating system and software. To check for the presence of a recovery partition, select **Start > Computer**. If the partition is present, an HP Recovery drive is listed in the Hard Disk Drives section of the window.

To recover the original hard drive image using **f11**, follow these steps:

1. If possible, back up all personal files.
2. If possible, check for the presence of the HP Recovery partition: select **Start**, right-click **Computer**, click **Manage**, and then click **Disk Management**.

 **NOTE:** If the HP Recovery partition is not listed, you must recover your operating system and programs using the Windows 7 operating system DVD and the *Driver Recovery* disc (both purchased separately). For additional information, refer to the “Using a Windows 7 operating system DVD (purchased separately)” section in this guide.

3. If the HP Recovery partition is listed, restart the computer, and then press **esc** while the “Press the ESC key for Startup Menu” message is displayed at the bottom of the screen.
4. Press **f11** while the “Press <F11> for recovery” message is displayed on the screen.
5. Follow the on-screen instructions.

Using a Windows 7 operating system DVD (purchased separately)

If you are unable to boot (start up) your computer and you cannot use the system repair discs you previously created (select models only), you must purchase a Windows 7 operating system DVD to reboot the computer and repair the operating system. Make sure that your most recent backup (stored on discs or on an external drive) is easily accessible. To order a Windows 7 operating system DVD, go to <http://www.hp.com/support>, select your country or region, and then follow the on-screen instructions. You can also order the DVD by calling technical support. For contact information, refer to the *Worldwide Telephone Numbers* booklet included with the computer.

 **CAUTION:** Using a Windows 7 operating system DVD completely erases hard drive contents and reformats the hard drive. All files you have created and any software installed on the computer are permanently removed. When reformatting is complete, the recovery process helps you restore the operating system, as well as drivers, software, and utilities.

To initiate recovery using a Windows 7 operating system DVD, follow these steps:

 **NOTE:** This process takes several minutes. Before rebooting, make sure you have changed the legacy boot order in the F10 utility so that the USB CD-ROM drive is the first choice.

1. If possible, back up all personal files.
2. Restart the computer, and then insert the Windows 7 operating system DVD into the external optical drive before the Windows operating system loads.
3. When prompted, press any keyboard key.
4. Follow the on-screen instructions.
5. Click **Next**.
6. Select **Repair your computer**.
7. Follow the on-screen instructions.

Windows Vista backup and recovery

To protect your information, use the Backup and Restore Center to back up individual files and folders, back up your entire hard drive (select models only), create system repair discs (select models only), or create system restore points. In case of system failure, you can use the backup files to restore the contents of your computer.

The Backup and Restore Center provides the following options:

- Creating a system repair disc (select models only)
- Backing up individual files and folders
- Backing up the entire hard drive (select models only)
- Scheduling automatic backups (select models only)
- Creating system restore points
- Recovering individual files
- Restoring the computer to a previous state
- Recovering information using recovery tools

 **NOTE:** For detailed instructions, perform a search for these topics in Help and Support.

NOTE: In case of system instability, HP recommends that you print the recovery procedures and save them for later use.

Backing up your information

Recovery after a system failure is as complete as your most current backup. You should create system repair discs (select models only) and your initial backup immediately after software setup. As you add new software and data files, you should continue to back up your system on a regular basis to maintain a reasonably current backup. The system repair discs (select models only) are used to start up (boot) the computer and repair the operating system in case of system instability or failure. Your initial and subsequent backups allow you to restore your data and settings if a failure occurs.

You can back up your information to an optional external hard drive, a network drive, or discs.

Note the following when backing up:

- Store personal files in the Documents folder, and back it up regularly.
- Back up templates that are stored in their associated programs.
- Save customized settings that appear in a window, toolbar, or menu bar by taking a screen shot of your settings. The screen shot can be a time-saver if you have to reset your preferences.

To create a screen shot:

1. Display the screen you want to save.
2. Copy the screen image:

To copy only the active window, press [alt+fn+prt sc](#).

To copy the entire screen, press [fn+prt sc](#).

3. Open a word-processing document, and then select **Edit > Paste**.
The screen image is added to the document.
 4. Save the document.
- When backing up to discs, use any of the following types of discs (purchased separately): CD-R, CD-RW, DVD+R, DVD+R DL, DVD-R, DVD-R DL, or DVD±RW. The discs you use will depend on the type of external optical drive connected to your computer.

 **NOTE:** DVDs and DVDs with double-layer (DL) support store more information than CDs, so using them for backup reduces the number of recovery discs required.

- When backing up to discs, number each disc before inserting it into the external optical drive.

To create a backup using Backup and Restore Center, follow these steps:

 **NOTE:** Be sure that the computer is connected to AC power before you start the backup process.

NOTE: The backup process may take over an hour, depending on file size and the speed of the computer.

1. Select **Start > All Programs > Maintenance > Backup and Restore Center**.
2. Follow the on-screen instructions to set up your backup, create a system image (select models only), or create a system repair disc (select models only).

 **NOTE:** Windows® includes the User Account Control feature to improve the security of your computer. You may be prompted for your permission or password for tasks such as installing software, running utilities, or changing Windows settings. Refer to Help and Support for more information.

Performing a recovery

In case of system failure or instability, the computer provides the following tools to recover your files:

- Windows recovery tools: You can use the Backup and Restore Center to recover information you have previously backed up. You can also use Windows Startup Repair to fix problems that might prevent Windows from starting correctly.
- f11 recovery tools: You can use the f11 recovery tools to recover your original hard drive image. The image includes the Windows operating system and software programs installed at the factory.

 **NOTE:** If you are unable to boot (start up) your computer and you cannot use the system repair discs you previously created (select models only), you must purchase a Vista operating system DVD to reboot the computer and repair the operating system. For additional information, refer to the “Using a Vista operating system DVD (purchased separately)” section in this guide.

Using the Windows recovery tools

To recover information you previously backed up, follow these steps:

1. Select **Start > All Programs > Maintenance > Backup and Restore Center**.
2. Follow the on-screen instructions to recover your system settings, your computer (select models only), or your files.

 **NOTE:** Windows includes the User Account Control feature to improve the security of your computer. You may be prompted for your permission or password for tasks such as installing software, running utilities, or changing Windows settings. Refer to Help and Support for more information.

To recover your information using Startup Repair, follow these steps:

△ **CAUTION:** Using Startup Repair completely erases hard drive contents and reformats the hard drive. All files you have created and any software installed on the computer are permanently removed. When reformatting is complete, the recovery process restores the operating system, as well as the drivers, software, and utilities from the backup used for recovery.

1. If possible, back up all personal files.
2. If possible, check for the presence of the Windows partition and the HP Recovery partition. To find the partitions, select **Start > Computer**.

 **NOTE:** If the Windows partition and the HP Recovery partition are not listed, you must recover your operating system and programs using the Windows Vista operating system DVD and the *Driver Recovery* disc (both purchased separately). For additional information, refer to the “Using a Windows Vista operating system DVD (purchased separately)” section in this guide.

3. Restart the computer, and then press **f8** before the Windows operating system loads.
4. Select **Repair your computer**.
5. Follow the on-screen instructions.

 **NOTE:** For additional information on recovering information using the Windows tools, perform a search for these topics in Help and Support.

Using f11 recovery tools

△ **CAUTION:** Using **f11** completely erases hard drive contents and reformats the hard drive. All files you have created and any software installed on the computer are permanently removed. The **f11** recovery tool reinstalls the operating system and HP programs and drivers that were installed at the factory. Software not installed at the factory must be reinstalled. Personal files must be restored from a backup.

 **NOTE:** If your computer includes a solid-state drive (SSD), you may not have a recovery partition. Recovery discs have been included for computers that do not have a partition. Use these discs to recover your operating system and software. To check for the presence of a recovery partition, select **Start > Computer**. If the partition is present, an HP Recovery drive is listed in the Hard Disk Drives section of the window.

To recover the original hard drive image using **f11**, follow these steps:

1. If possible, back up all personal files.
2. If possible, check for the presence of the HP Recovery partition. To find the partition, select **Start > Computer**.

 **NOTE:** If the HP Recovery partition is not listed, you must recover your operating system and programs using the Windows Vista operating system DVD and the *Driver Recovery* disc (both purchased separately). For additional information, refer to the “Using a Windows Vista operating system DVD (purchased separately)” section in this guide.

3. Turn on or restart the computer, and then press **esc** while the “Press the ESC key for Startup Menu” message is displayed at the bottom of the screen.

4. Press **f11** while the “Press <F11> for recovery” message is displayed on the screen.
5. Follow the on-screen instructions.

Using a Windows Vista operating system DVD (purchased separately)

If you are unable to boot (start up) your computer, you must purchase a Windows Vista operating system DVD to reboot the computer and repair the operating system. Make sure that your most recent backup (stored on discs or on an external drive) is easily accessible. To order a Windows Vista operating system DVD, go to <http://www.hp.com/support>, select your country or region, and follow the on-screen instructions. You can also order the DVD by calling technical support. For contact information, refer to the *Worldwide Telephone Numbers* booklet included with the computer.

△ **CAUTION:** Using a Windows Vista operating system DVD completely erases hard drive contents and reformats the hard drive. All files you have created and any software installed on the computer are permanently removed. When reformatting is complete, the recovery process helps you restore the operating system, as well as drivers, software, and utilities.

To initiate recovery using a Windows Vista operating system DVD, follow these steps:

 **NOTE:** This process takes several minutes.

1. If possible, back up all personal files.
2. Restart the computer, and then insert the Windows Vista operating system DVD into the optical drive before the Windows operating system loads.
3. When prompted, press any keyboard key.
4. Follow the on-screen instructions.
5. Click **Next**.
6. Select **Repair your computer**.
7. Follow the on-screen instructions.

Windows XP backup and recovery

To protect your information, use the Windows Backup utility (select models only) to back up files and folders or create recovery points. In case of system failure, you can use the backup files to restore your computer.

Windows provides the following options:

- Backing up individual files and folders
- Backing up all files and folders
- Scheduling automatic backups
- Creating recovery points
- Recovering information

 **NOTE:** For detailed instructions, perform a search for these topics in Help and Support.

NOTE: In case of system instability, HP recommends that you print the recovery procedures and save them for later use.

Backing up your information

Recovery after a system failure is as complete as your most current backup. You should create your initial backup immediately after software setup. As you add new software and data files, you should continue to back up your system on a regular basis to maintain a reasonably current backup.

You can back up individual files or folders to an optional external hard drive or to a network drive.

Note the following when backing up:

- Store personal files in the My Documents folder, and back it up periodically.
- Back up templates stored in their associated programs.
- Save customized settings that appear in a window, toolbar, or menu bar by taking a screen shot of your settings. The screen shot can be a time saver if you have to reset your preferences.

To copy the screen and paste it into a word-processing document:

- a. Display the screen you want to save.
- b. Copy the screen image:
 - To copy only the active window, press **alt+fn+prt sc**.
 - To copy the entire screen, press **fn+prt sc**.
- c. Open a word-processing document, click **Edit > Paste**.
 - The screen image is added to the document.
- d. Save the document.

To create a backup using the Windows Backup utility (select models only), follow these steps:

 **NOTE:** Be sure that the computer is connected to AC power before you start the backup process.

NOTE: The backup process may take over an hour, depending on file size and the speed of the computer.

1. Click **Start > All Programs > Accessories > System Tools > Backup**.
2. Follow the on-screen instructions.

Performing a recovery

In case of system failure or instability, the computer provides the following tools to recover your files:

- Windows recovery tools (select models only): You can use the Windows Backup utility to recover information you have previously backed up.
- *Operating System* and *Driver Recovery* discs (included with your computer): You can use the discs to recover your operating system and programs installed at the factory.

Recovering your information

To recover information you previously backed up, follow these steps:

1. If possible, back up all personal files.
2. Click **Start > All Programs > Accessories > System Tools > Backup**.
The Backup or Restore Wizard opens.
3. Click **Restore files and settings**, and then click **Next**.
4. Follow the on-screen instructions.

 **NOTE:** For additional information on initiating a recovery in Windows, perform a search for this topic in Help and Support.

Recovering the operating system and programs

△ **CAUTION:** The recovery process reformats and completely erases the hard drive. All files you have created and any software installed on the computer are permanently removed. The recovery process reinstalls the original operating system as well as software and drivers. Software, drivers, and updates not installed by HP must be manually reinstalled. Personal files must be restored from a backup.

To recover your operating system and programs, follow these steps:

1. If possible, back up all personal files.
2. Insert the *Operating System* disc into the optical drive.
3. Shut down the computer.
4. Turn on the computer.
5. Follow the on-screen instructions to install the operating system.
6. After the operating system is installed, remove the *Operating System* disc and insert the *Driver Recovery* disc.
7. Follow the on-screen instructions to install the drivers and programs.

Linux backup and recovery

Use the instructions in this section if SUSE Linux SLED 11 is installed on your computer.

To protect your information, back up your files and folders. Then if the system fails, you can restore your important files from copies. You can also use the options listed in this section to restore the operating system and programs that were installed at the factory.

△ **CAUTION:** Using **f11** completely erases hard drive contents and reformats the hard drive. All files you have created and any software installed on the computer are permanently removed. The **f11** recovery tool reinstalls the original operating system and HP programs and drivers that were installed at the factory. Software, drivers, and updates not installed by HP must be manually reinstalled. Personal files must be restored from a backup.

To recover the original hard drive image using **f11**, follow these steps:

1. If possible, back up all personal files.
2. Restart the computer, and then press **f11** while the “Press <F11> for recovery” message is displayed on the screen.
3. Follow the on-screen instructions.

9 Power cord set requirements

The wide range input feature of the computer permits it to operate from any line voltage from 100 to 120 volts AC or from 220 to 240 volts AC.

The 3-conductor power cord set included with the computer meets the requirements for use in the country or region where the equipment is purchased.

Power cord sets for use in other countries and regions must meet the requirements of the country or region where the computer is used.

Requirements for all countries and regions

The requirements listed below are applicable to all countries and regions:

- The length of the power cord set must be at least 1.5 m (5.0 ft) and no more than 2.0 m (6.5 ft).
- All power cord sets must be approved by an acceptable accredited agency responsible for evaluation in the country or region where the power cord set will be used.
- The power cord sets must have a minimum current capacity of 10 amps and a nominal voltage rating of 125 or 250 V AC, as required by the power system of each country or region.
- The appliance coupler must meet the mechanical configuration of an EN 60 320/IEC 320 Standard Sheet C13 connector for mating with the appliance inlet on the back of the computer.

Requirements for specific countries and regions

Country/region	Accredited agency	Applicable note number
Australia	EANSW	1
Austria	OVE	1
Belgium	CEBC	1
Canada	CSA	2
Denmark	DEMKO	1
Finland	FIMKO	1
France	UTE	1
Germany	VDE	1
Italy	IMQ	1
Japan	METI	3
The Netherlands	KEMA	1
Norway	NEMKO	1
The People's Republic of China	CCC	5
South Korea	EK	4
Sweden	SEMKO	1
Switzerland	SEV	1
Taiwan	BSMI	4
The United Kingdom	BSI	1
The United States	UL	2

1. The flexible cord must be Type HO5VV-F, 3-conductor, 1.0-mm² conductor size. Power cord set fittings (appliance coupler and wall plug) must bear the certification mark of the agency responsible for evaluation in the country or region where it will be used.
2. The flexible cord must be Type SPT-3 or equivalent, No. 18 AWG, 3-conductor. The wall plug must be a two-pole grounding type with a NEMA 5-15P (15 A, 125 V) or NEMA 6-15P (15 A, 250 V) configuration.
3. The appliance coupler, flexible cord, and wall plug must bear a "T" mark and registration number in accordance with the Japanese Dentori Law. The flexible cord must be Type VCT or VCTF, 3-conductor, 1.00-mm² conductor size. The wall plug must be a two-pole grounding type with a Japanese Industrial Standard C8303 (7 A, 125 V) configuration.
4. The flexible cord must be Type RVV, 3-conductor, 0.75-mm² conductor size. Power cord set fittings (appliance coupler and wall plug) must bear the certification mark of the agency responsible for evaluation in the country or region where it will be used.
5. The flexible cord must be Type VCTF, 3-conductor, 0.75-mm² conductor size. Power cord set fittings (appliance coupler and wall plug) must bear the certification mark of the agency responsible for evaluation in the country or region where it will be used.

10 Recycling

Battery

When a battery has reached the end of its useful life, do not dispose of the battery in general household waste. Follow the local laws and regulations in your area for computer battery disposal.

Display

-
- ⚠ **WARNING!** The backlight contains mercury. Exercise caution when removing and handling the backlight to avoid damaging this component and causing exposure to the mercury.
 - ⚠ **CAUTION:** The procedures in this chapter can result in damage to display components. The only components intended for recycling purposes are the liquid crystal display (LCD) panel and the backlight. When you remove these components, handle them carefully.
 - 📄 **NOTE: Materials Disposal.** This HP product contains mercury in the backlight in the display assembly that might require special handling at end-of-life. Disposal of mercury may be regulated because of environmental considerations. For disposal or recycling information, contact your local authorities, or see the Electronic Industries Alliance (EIA) Web site at <http://www.eiae.org>.
-

This section provides disassembly instructions for the display assembly. The display assembly must be disassembled to gain access to the backlight **(1)** and the liquid crystal display (LCD) panel **(2)**.

-
- 📄 **NOTE:** The procedures provided in this chapter are general disassembly instructions. Specific details, such as screw sizes, quantities, and locations, and component shapes and sizes, can vary from one computer model to another.
-

Perform the following steps to disassemble the display assembly:

1. Remove all screw covers (1) and screws (2) that secure the display bezel to the display assembly.

2. Lift up and out on the left and right inside edges (1) and the top and bottom inside edges (2) of the display bezel until the bezel disengages from the display assembly.
3. Remove the display bezel (3).

4. Disconnect all display panel cables (1) from the display inverter and remove the inverter (2).

5. Remove all screws (1) that secure the display panel assembly to the display enclosure.
6. Remove the display panel assembly (2) from the display enclosure.

7. Turn the display panel assembly upside down.
8. Remove all screws that secure the display panel frame to the display panel.

9. Use a sharp-edged tool to cut the tape (1) that secures the sides of the display panel to the display panel frame.

10. Remove the display panel frame (2) from the display panel.

11. Remove the screws (1) that secure the backlight cover to the display panel.
12. Lift the top edge of the backlight cover (2) and swing it outward.

13. Remove the backlight cover.
14. Turn the display panel right-side up.

15. Remove the backlight cables (1) from the clip (2) in the display panel.

16. Turn the display panel upside down.

⚠ WARNING! The backlight contains mercury. Exercise caution when removing and handling the backlight to avoid damaging this component and causing exposure to the mercury.

17. Remove the backlight frame from the display panel.

18. Remove the backlight from the backlight frame.

19. Disconnect the display panel cable (1) from the LCD panel.
20. Remove the screws (2) that secure the LCD panel to the display rear panel.
21. Release the LCD panel (3) from the display rear panel.
22. Release the tape (4) that secures the LCD panel to the display rear panel.

23. Remove the LCD panel.

24. Recycle the LCD panel and backlight.
