## Environmental features

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Duplex</td>
<td>Save paper by using duplex printing as your default print setting.</td>
</tr>
<tr>
<td>Print multiple pages per sheet</td>
<td>Save paper by printing two or more pages of a document side-by-side on one sheet of paper. Access this feature through the printer driver.</td>
</tr>
<tr>
<td>Recycling</td>
<td>Reduce waste by using recycled paper.</td>
</tr>
<tr>
<td></td>
<td>Recycle print cartridges by using the HP return process.</td>
</tr>
<tr>
<td>Energy savings</td>
<td>Save energy by initiating sleep mode for the product.</td>
</tr>
<tr>
<td>HP Smart Web printing</td>
<td>Use HP Smart Web printing to select, store, and organize text and graphics from multiple Web pages and then edit and print exactly what you see onscreen. It gives you the control you need for printing meaningful information while minimizing waste.</td>
</tr>
<tr>
<td></td>
<td>Download HP Smart Web printing from this Web site: <a href="http://www.hp.com/go/smartweb">www.hp.com/go/smartweb</a>.</td>
</tr>
<tr>
<td>Job storage</td>
<td>Use the job storage features to manage print jobs. By using job storage, you activate printing while you are at the shared product, eliminating lost print jobs that are then reprinted.</td>
</tr>
</tbody>
</table>
Accessibility features

The product includes several features that aid you with accessibility issues.

- Online user guide that is compatible with text screen-readers.
- Print cartridges can be installed and removed by using one hand.
- All doors and covers can be opened by using one hand.
- Paper can be loaded in Tray 1 by using one hand.
Product views

Front view

1. Front door (access to print cartridges)
2. Standard output bin
3. Control panel
4. Right door (access for clearing jams)
5. On/off button (illuminates when turned on)
6. Tray 1 (pull the handle to open the tray)
7. Tray 2
8. Tray 3
9. Lower right door (access for clearing jams)
10. Optional Tray 4 (included with the HP Color LaserJet CP5525xh model)
11. Optional Tray 5 (included with the HP Color LaserJet CP5525xh model)
12. Optional Tray 6 (included with the HP Color LaserJet CP5525xh model)
Back view

1. Interface ports
2. Power connection
3. Rear door (access to the toner collection unit)

Interface ports

1. Hi-Speed USB 2.0 printing port
2. Local area network (LAN) Ethernet (RJ-45) network port
3. USB port for a third-party device
4. EIO interface expansion slot
Serial number and model number location

The model number and serial number are listed on an identification label located on the left side of the product. The serial number contains information about the country/region of origin, the product version, production code, and the production number of the product.

Control panel menus

To use all of the capabilities of this product, a firmware upgrade might be required. HP recommends that you periodically go to www.hp.com/support/cljcp5525 to see if a new version of firmware is available.

**NOTE:** Print a configuration page to determine the version of firmware currently installed in this product.

Navigate the control-panel menus

- Press the Home button \( \text{Home} \) to access the menus.
- Use the up arrow button \( \text{Up} \) and down arrow button \( \text{Down} \) to highlight a desired menu item.
- Press the OK button to select the menu item.

USB Firmware Upgrade menu

To display: At the product control panel, select the **Device Maintenance** menu, and then select the **USB Firmware Upgrade** menu.

Insert a USB storage device with a firmware upgrade bundle into the USB port, and follow the on-screen instructions.

Service menu

The **Service** menu is locked and requires a PIN for access. This menu is intended for use by authorized service personnel.
3 Software for Windows

- Supported operating systems for Windows®
- Supported printer drivers for Windows
- Select the correct printer driver for Windows
- Priority for print settings
- Change printer-driver settings for Windows
- Remove software for Windows
- Supported utilities for Windows
- Software for other operating systems
Supported operating systems for Windows®

The product supports the following Windows operating systems:

- Windows® XP (32-bit and 64-bit)
- Windows Vista® (32-bit and 64-bit)
- Windows 7 (32-bit and 64-bit)
- Windows Server 2003 (32-bit and 64-bit)
- Windows Server 2008 (32-bit and 64-bit)

Supported printer drivers for Windows

- HP PCL 6 (this is the default printer driver)
- HP PCL 6 Universal Print Driver (HP UPD PCL 6)
- HP postscript emulation Universal Print Driver (HP UPD PS)
- HP PCL 5 Universal Print Driver (HP UPD PCL 5)

The printer drivers include online Help that has instructions for common printing tasks and also describes the buttons, checkboxes, and drop-down lists that are in the printer driver.

**NOTE:** For more information about the UPD, see [www.hp.com/go/upd](http://www.hp.com/go/upd).
Select the correct printer driver for Windows

Printer drivers provide access to the product features and allow the computer to communicate with the product (using a printer language). The following printer drivers are available at www.hp.com/support/cljcp5525.

<table>
<thead>
<tr>
<th>Printer Driver</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>HP PCL 6 driver</strong></td>
<td>• Provided as the default driver. This driver is automatically installed unless you select a different one.</td>
</tr>
<tr>
<td></td>
<td>• Recommended for all Windows environments</td>
</tr>
<tr>
<td></td>
<td>• Provides the overall best speed, print quality, and product-feature support for most users</td>
</tr>
<tr>
<td></td>
<td>• Developed to align with the Windows Graphic Device Interface (GDI) for the best speed in Windows environments</td>
</tr>
<tr>
<td></td>
<td>• Might not be fully compatible with third-party and custom software programs that are based on PCL 5</td>
</tr>
<tr>
<td><strong>HP UPD PCL 6 driver</strong></td>
<td>• Recommended for all Windows environments</td>
</tr>
<tr>
<td></td>
<td>• Provides the overall best speed, print quality, and product-feature support for most users</td>
</tr>
<tr>
<td></td>
<td>• Developed to align with the Windows GDI for the best speed in Windows environments</td>
</tr>
<tr>
<td></td>
<td>• Might not be fully compatible with third-party and custom software programs that are based on PCL 5</td>
</tr>
<tr>
<td><strong>HP UPD PS driver</strong></td>
<td>• Recommended for printing with Adobe® software programs or with other highly graphics-intensive software programs</td>
</tr>
<tr>
<td></td>
<td>• Provides support for printing from postscript emulation needs, or for postscript flash font support</td>
</tr>
<tr>
<td><strong>HP UPD PCL 5</strong></td>
<td>• Recommended for general office printing in Windows environments</td>
</tr>
<tr>
<td></td>
<td>• Compatible with previous PCL versions and older HP LaserJet products</td>
</tr>
<tr>
<td></td>
<td>• The best choice for printing from third-party or custom software programs</td>
</tr>
<tr>
<td></td>
<td>• The best choice when operating with mixed environments, which require the product to be set to PCL 5 (UNIX®, Linux, mainframe)</td>
</tr>
<tr>
<td></td>
<td>• Designed for use in corporate Windows environments to provide a single driver for use with multiple printer models</td>
</tr>
<tr>
<td></td>
<td>• Preferred when printing to multiple printer models from a mobile Windows computer</td>
</tr>
</tbody>
</table>
**HP Universal Print Driver (UPD)**

The HP Universal Print Driver (UPD) for Windows is a single driver that gives you instant access to virtually any HP LaserJet product, from any location, without downloading separate drivers. It is built on proven HP print driver technology and has been tested thoroughly and used with many software programs. It is a powerful solution that performs consistently over time.

The HP UPD communicates directly with each HP product, gathers configuration information, and then customizes the user interface to show the product’s unique, available features. It automatically enables features that are available for the product, such as two-sided printing and stapling, so you do not need to enable them manually.

For more information, go to [www.hp.com/go/upd](http://www.hp.com/go/upd).

**UPD installation modes**

| Traditional mode | ● Use this mode if you are installing the driver from a CD for a single computer. |
|                 | ● When installed from the CD that comes with the product, UPD operates like traditional printer drivers. It operates with a specific product. |
|                 | ● If you use this mode, you must install UPD separately for each computer and for each product. |

| Dynamic mode | ● To use this mode, download UPD from the Internet. See [www.hp.com/go/upd](http://www.hp.com/go/upd). |
|             | ● Dynamic mode allows you to use a single driver installation, so you can discover and print to HP products in any location. |
|             | ● Use this mode if you are installing UPD for a workgroup. |
Priority for print settings

Changes to print settings are prioritized depending on where the changes are made:

**NOTE:** The names of commands and dialog boxes might vary depending on your software program.

- **Page Setup dialog box:** Click **Page Setup** or a similar command on the **File** menu of the program you are working in to open this dialog box. Settings changed here override settings changed anywhere else.

- **Print dialog box:** Click **Print, Print Setup**, or a similar command on the **File** menu of the program you are working in to open this dialog box. Settings changed in the **Print** dialog box have a lower priority and usually do not override changes made in the **Page Setup** dialog box.

- **Printer Properties dialog box (printer driver):** Click **Properties** in the **Print** dialog box to open the printer driver. Settings changed in the **Printer Properties** dialog box usually do not override settings anywhere else in the printing software. You can change most of the print settings here.

- **Default printer driver settings:** The default printer driver settings determine the settings used in all print jobs, unless settings are changed in the **Page Setup, Print,** or **Printer Properties** dialog boxes.

- **Printer control panel settings:** Settings changed at the printer control panel have a lower priority than changes made anywhere else.
Change printer-driver settings for Windows

Change the settings for all print jobs until the software program is closed

1. On the File menu in the software program, click Print.
2. Select the driver, and then click Properties or Preferences.

The steps can vary; this procedure is most common.

Change the default settings for all print jobs

   Windows Vista: Click Start, click Control Panel, and then in the category for Hardware and Sound click Printer.
   Windows 7: Click Start, and then click Devices and Printers.
2. Right-click the driver icon, and then select Printing Preferences.

Change the product configuration settings

   Windows Vista: Click Start, click Control Panel, and then in the category for Hardware and Sound click Printer.
   Windows 7: Click Start, and then click Devices and Printers.
2. Right-click the driver icon, and then select Properties or Printer properties.
3. Click the Device Settings tab.
Remove software for Windows

Windows XP
1. Click Start, Control Panel, and then Add or Remove Programs.
2. Find and select the product from the list.
3. Click the Change/Remove button to remove the software.

Windows Vista
1. Click Start, Control Panel, and then Programs and Features.
2. Find and select the product from the list.
3. Select the Uninstall/Change option.

Windows 7
1. Click Start, Control Panel, and then under the Programs heading, click Uninstall a program.
2. Find and select the product from the list.
3. Select the Uninstall option.
Supported utilities for Windows

HP Web Jetadmin

HP Web Jetadmin is a simple print and imaging peripheral management software tool that helps optimize product use, control color costs, secure products, and streamline supplies management by enabling remote configuration, proactive monitoring, security troubleshooting, and reporting of printing and imaging products.

To download a current version of HP Web Jetadmin and for the latest list of supported host systems, visit www.hp.com/go/webjetadmin.

When installed on a host server, a Windows client can gain access to HP Web Jetadmin by using a supported Web browser (such as Microsoft® Internet Explorer) by navigating to the HP Web Jetadmin host.

HP Embedded Web Server

The product is equipped with the HP Embedded Web Server, which provides access to information about product and network activities. This information appears in a Web browser, such as Microsoft Internet Explorer, Netscape Navigator, Apple Safari, or Mozilla Firefox.

The HP Embedded Web Server resides on the product. It is not loaded on a network server.

The HP Embedded Web Server provides an interface to the product that anyone who has a network-connected computer and a standard Web browser can use. No special software is installed or configured, but you must have a supported Web browser on your computer. To gain access to the HP Embedded Web Server, type the IP address for the product in the address line of the browser. (To find the IP address, print a configuration page. For more information about printing a configuration page, see Print information pages on page 162).

For a complete explanation of the features and functionality of the HP Embedded Web Server, see Use the HP Embedded Web Server on page 163.
## Software for other operating systems

<table>
<thead>
<tr>
<th>OS</th>
<th>Software</th>
</tr>
</thead>
</table>
| UNIX | For HP-UX and Solaris networks, go to [www.hp.com/go/jetdirectunix_software](http://www.hp.com/go/jetdirectunix_software) to install model scripts using the HP Jetdirect printer installer (HPPI) for UNIX.  
For the latest model scripts, go to [www.hp.com/go/unixmodelscripts](http://www.hp.com/go/unixmodelscripts). |
| Linux| For information, go to [www.hplip.net](http://www.hplip.net). |
| SAP  | For drivers, go to [www.hp.com/go/sap/drivers](http://www.hp.com/go/sap/drivers)  
For information, go to [www.hp.com/go/sap/print](http://www.hp.com/go/sap/print) |
4 Use the product with Mac

- Software for Mac
- Print with Mac
- Solve problems with a Mac
Software for Mac

Supported operating systems for Mac

The product supports the following Mac operating systems:

- Mac OS X 10.4, 10.5, 10.6, and later

**NOTE:** For Mac OS X 10.4 and later, PPC and Intel® Core™ Processor Macs are supported.

Supported printer drivers for Mac

The HP LaserJet software installer provides PostScript® Printer Description (PPD) files, Printer Dialog Extensions (PDEs), and the HP Utility for use with Mac OS X computers. The HP printer PPD and PDE files, in combination with the built-in Apple PostScript printer drivers, provide full printing functionality and access to specific HP printer features.

Install software for Mac operating systems

Install software for Mac computers connected directly to the product

1. Install the software from the CD.
2. Click the product icon, and follow the onscreen instructions.
3. Click the **Close** button.
4. When the software prompts you, connect the USB cable to the product and the computer.

5. To configure the product software to recognize the installed accessories, complete these steps:
Mac OS X 10.4

1. From the Apple menu , click the System Preferences menu and then click the Print & Fax icon.
2. Click the Printer Setup button.
3. Click the Installable Options menu.

Mac OS X 10.5 and 10.6

1. From the Apple menu , click the System Preferences menu and then click the Print & Fax icon.
2. Select the product in the left side of the window.
3. Click the Options & Supplies button.
4. Click the Driver tab.
5. Configure the installed options.

**NOTE:** For Mac OS X 10.5 and 10.6, the installation procedure should automatically configure the installed options.

6. Print a page from any program to make sure that the software is correctly installed.

**NOTE:** If the installation failed, reinstall the software.

**Install software for Mac computers on a wired network**

**Configure the IP address**

1. Connect the network cable to the product and to the network.

2. Wait for 60 seconds before continuing. During this time, the network recognizes the product and assigns an IP address or host name for the product.

3. At the product control panel, press the Home button .
4. Press the down arrow to highlight the Administration menu, and then press the OK button.
5. Press the down arrow to highlight the Reports menu, and then press the OK button.
6. Press the down arrow to highlight the Configuration/Status Pages menu, and then press the OK button.
7. Press the down arrow to highlight the Configuration Page menu, and then press the OK button.
8. Find the IP address on the Embedded Jetdirect page.

9. IPv4: If the IP address is 0.0.0.0, or 192.0.0.192, or 169.254.x.x, you must manually configure the IP address. See Manually configure IPv4 TCP/IP parameters from the control panel on page 67. Otherwise, the network configuration was successful.

IPv6: If the IP address begins with "fe80:", the product should be able to print. If not, you must manually configure the IP address. See Manually configure IPv6 TCP/IP parameters from the control panel on page 68.

Install the Mac software

Mac

1. Quit all programs on the computer.
2. Install the software from the CD.
3. Click the product icon, and follow the onscreen instructions.
4. Click the Close button when the installation is complete.
5. At the computer, open the Apple menu, click the System Preferences menu, and then click the Print & Fax icon.
6. Click the plus symbol (+).

By default, Mac OS X uses the Bonjour method to find the driver and add the product to the printer pop-up menu. This method is best in most situations. If Mac OS X cannot find the HP printer driver, an error message displays. Reinstall the software.

If you are connecting the product to a large network, you might need to use IP printing to connect rather than Bonjour. Follow these steps:

a. Click the IP Printer button.

b. From the Protocol drop-down list, select the HP Jetdirect-Socket option. Enter the IP address or host name for the product. From the Print Using drop-down list, select the product model if one is not already selected.
7. To configure the product to recognize the installed accessories, complete these steps:

**Mac OS X 10.4**

1. From the Apple menu , click the **System Preferences** menu and then click the **Print & Fax** icon.
2. Click the **Printer Setup** button.
3. Click the **Installable Options** menu.

**Mac OS X 10.5 and 10.6**

1. From the Apple menu , click the **System Preferences** menu and then click the **Print & Fax** icon.
2. Select the product in the left side of the window.
3. Click the **Options & Supplies** button.
4. Click the **Driver** tab.
5. Configure the installed options.

**NOTE:** For Mac OS X 10.5 and 10.6, the installation procedure should automatically configure the installed options.

8. Print a page from any program to make sure that the software is correctly installed.

**NOTE:** If the installation failed, reinstall the software.

### Remove software from Mac operating systems

You must have administrator rights to remove the software.

1. Open **System Preferences**.
2. Select **Print & Fax**.
3. Highlight the product.
4. Click the minus (-) symbol.
5. Delete the print queue, if necessary.
6. Delete the .GZ file from the following hard-drive folder:
   - **Mac OS X 10.4**: `Library/Printers/PPDs/Contents/Resources/<lang>.lproj`, where `<lang>` is the two-letter language code for the language that you are using.
   - **Mac OS X 10.5 and 10.6**: `Library/Printers/PPDs/Contents/Resources`
Priority for print settings for Mac

Changes to print settings are prioritized depending on where the changes are made:

**NOTE:** The names of commands and dialog boxes might vary depending on your software program.

- **Page Setup dialog box:** Click Page Setup or a similar command on the File menu of the program you are working in to open this dialog box. Settings changed here might override settings changed anywhere else.

- **Print dialog box:** Click Print, Print Setup, or a similar command on the File menu of the program you are working in to open this dialog box. Settings changed in the Print dialog box have a lower priority and do not override changes made in the Page Setup dialog box.

- **Default printer driver settings:** The default printer driver settings determine the settings used in all print jobs, unless settings are changed in the Page Setup, Print, or Printer Properties dialog boxes.

- **Printer control panel settings:** Settings changed at the printer control panel have a lower priority than changes made anywhere else.

**Supported utilities for Mac**

**HP Embedded Web Server**

The product is equipped with an embedded Web server, which provides access to information about product and network activities. For more information, see [Features on page 164](#).
**Print with Mac**

**Cancel a print job with a Mac**

If the print job is currently printing, cancel it by pressing the Cancel button on the product control panel.

**NOTE:** Pressing the Cancel button clears the job that the product is currently processing. If more than one process is running (for example, the product is printing a document while receiving a fax), pressing the Cancel button clears the process that currently appears on the product control panel.

You can also cancel a print job from a software program or a print queue.

To stop the print job immediately, remove the remaining print media from the product. After printing stops, use one of the following options:

- **Product control panel:** To cancel the print job, press and release the Cancel button on the product control panel.

- **Software program:** Typically, a dialog box appears briefly on the computer screen, allowing you to cancel the print job.

- **Mac print queue:** Open the print queue by double-clicking the product icon in the dock. Highlight the print job, and then click **Delete**.

**Change the paper size and type with Mac**

1. On the **File** menu in the software program, click the **Print** option.

2. In the **Copies & Pages** menu, click the **Page Setup** button.

3. Select a size from the **Paper Size** drop-down list, and then click the **OK** button.

4. Open the **Finishing** menu.

5. Select a type from the **Media-type** drop-down list.

6. Click the **Print** button.

**Resize documents or print on a custom paper size with Mac**

1. On the **File** menu, click the **Page Setup** option.

2. Select the product, and then select the correct settings for the **Paper Size** and **Orientation** options.
Mac OS X 10.5 and 10.6

Use one of these methods.

1. On the File menu, click the Print option.
2. Click the Page Setup button.
3. Select the product, and then select the correct settings for the Paper Size and Orientation options.

Create and use printing presets with Mac

Use printing presets to save the current printer driver settings for reuse.

Create a printing preset

1. On the File menu, click the Print option.
2. Select the driver.
3. Select the print settings that you want to save for reuse.
4. In the Presets menu, click the Save As... option, and type a name for the preset.
5. Click the OK button.

Use printing presets

1. On the File menu, click the Print option.
2. Select the driver.
3. In the Presets menu, select the printing preset.

**NOTE:** To use printer-driver default settings, select the standard option.

Print a cover page with Mac

1. On the File menu, click the Print option.
2. Select the driver.
3. Open the Cover Page menu, and then select where to print the cover page. Click either the Before Document button or the After Document button.
4. In the Cover Page Type menu, select the message that you want to print on the cover page.

**NOTE:** To print a blank cover page, select the standard option from the Cover Page Type menu.
Use watermarks with Mac

1. On the File menu, click the Print option.
2. Open the Watermarks menu.
3. From the Mode menu, select the type of watermark to use. Select the Watermark option to print a semi-transparent message. Select the Overlay option to print a message that is not transparent.
4. From the Pages menu, select whether to print the watermark on all pages or on the first page only.
5. From the Text menu, select one of the standard messages, or select the Custom option and type a new message in the box.
6. Select options for the remaining settings.

Print multiple pages on one sheet of paper with Mac

1. On the File menu, click the Print option.
2. Select the driver.
3. Open the Layout menu.
4. From the Pages per Sheet menu, select the number of pages that you want to print on each sheet (1, 2, 4, 6, 9, or 16).
5. In the Layout Direction area, select the order and placement of the pages on the sheet.
6. From the Borders menu, select the type of border to print around each page on the sheet.

Print on both sides of the page (duplex printing) with Mac

Use automatic duplex printing

1. Insert enough paper into one of the trays to accommodate the print job.
2. On the File menu, click the Print option.
3. Open the **Layout** menu.

4. From the **Two-Sided** menu, select a binding option.

**Print on both sides manually**

1. Insert enough paper into one of the trays to accommodate the print job.

2. On the **File** menu, click the **Print** option.

3. Open the **Finishing** menu, and click the **Manual Duplex** tab or open the **Manual Duplex** menu.

4. Click the **Manual Duplex** box, and select a binding option.

5. Click the **Print** button. Follow the instructions in the pop-up window that appears on the computer screen before replacing the output stack in Tray 1 for printing the second half.

6. Go to the product, and remove any blank paper that is in Tray 1.

7. Insert the printed stack face-up with the bottom edge feeding into the printer first in Tray 1. You must print the second side from Tray 1.

8. If prompted, press the appropriate control-panel button to continue.

**Store jobs with Mac**

You can store jobs on the product so you can print them at any time. You can share stored jobs with other users, or you can make them private.

1. On the **File** menu, click the **Print** option.

2. Open the **Job Storage** menu.

3. In the **Job Storage Mode** drop-down list, select the type of stored job.
   
   - **Proof and Hold**: This feature provides a quick way to print and proof one copy of a job and then print more copies.
   
   - **Personal Job**: When you send a job to the product, the job does not print until you request it at the product control panel. If you assign a personal identification number (PIN) to the job, you must provide the required PIN at the control panel.
   
   - **Quick Copy**: If the optional hard disk is installed on the product, you can print the requested number of copies of a job and then store a copy of the job on the optional hard disk. Storing the job allows you to print additional copies of the job later.
   
   - **Stored Job**: If the optional hard disk is installed on the product, you can store a job such as a personnel form, time sheet, or calendar on the product and allow other users to print the job at any time. Stored jobs also can be protected by a PIN.
   
4. To use a custom user name or job name, click the **Custom** button, and then enter the user name or the job name.

   Select which option to use if another stored job already has that name.
**Use Job Name + (1 - 99)**  Append a unique number to the end of the job name.

**Replace Existing File**  Overwrite the existing stored job with the new one.

5. **If you selected the Stored Job or Personal Job option in step 3, you can protect the job with a PIN. Type a 4-digit number in the Use PIN to Print field. When other people attempt to print this job, the product prompts them to enter this PIN number.**

### Set the color options with Mac

Use the **Color Options** menu or the **Color/Quality Options** menu to control how colors are interpreted and printed from software programs.

1. **On the File menu, click the Print option.**
2. **Select the driver.**
3. **Open the Color Options menu or the Color/Quality Options menu.**
4. **Open the Advanced menu, or select the appropriate tab.**
5. **Adjust the individual settings for text, graphics, and photographs.**

### Use the Services menu with Mac

If the product is connected to a network, use the **Services** menu to obtain product and supply-status information.

1. **On the File menu, click the Print option.**
2. **Open the Services menu.**
3. **To open the embedded Web server and perform a maintenance task, do the following:**
   - **Select the Device Maintenance tab.**
   - **Select a task from the drop-down list.**
   - **Click the Launch button.**
4. **To go to various support Web sites for this product, do the following:**
   - **Select the Services on the Web tab.**
   - **Select an option from the menu.**
   - **Click the Go! button.**

### Solve problems with a Mac

See Solve common Mac problems on page 203.
5 Connect the product

- Supported network operating systems
- Connect with USB
- Connect to a network
Supported network operating systems

The following operating systems support network printing:

- Windows 7 (32-bit and 64-bit)
- Windows Vista (32-bit and 64-bit)
- Windows Server 2008 (32-bit and 64-bit)
- Windows XP (32-bit, Service Pack 2)
- Windows XP (64-bit, Service Pack 1)
- Windows Server 2003 (Service Pack 1, 32-bit and 64-bit)
- Mac OS X 10.4, 10.5, 10.6, and higher

NOTE: Most network operating systems support a full software installation.

Printer sharing disclaimer

HP does not support peer-to-peer networking, as the feature is a function of Microsoft operating systems and not of the HP printer drivers. Go to Microsoft at www.microsoft.com.
Connect with USB

This product supports a USB 2.0 connection. You must use an A-to-B type USB cable that is no longer than 2 m (6.5 ft).

⚠️ **CAUTION:** Do not connect the USB cable until the installation software prompts you to connect it.

1. Quit all open programs on the computer.
2. Install the software from the CD, and follow the onscreen instructions.
3. When prompted, select the **Connected directly to the computer** option, and then click the **Install** button.
4. When the software prompts you, connect the USB cable to the product and the computer.

5. At the end of the installation, click the **Finish** button.
6. On the **Additional Options** screen, you can install more software, or click the **Exit** button.
7. Print a page from any program to make sure that the software is correctly installed.

**NOTE:** If the installation failed, reinstall the software.

Connect to a network

You can configure network parameters from the control panel, the HP Embedded Web Server, or for most networks, from the HP Web Jetadmin software.

**NOTE:** HP Web Jetadmin software is not supported on Mac OS X operating systems.

For a complete list of supported networks and for instructions on configuring network parameters from software, see the *HP Jetdirect Embedded Print Server Administrator’s Guide*. The guide comes with products in which an HP Jetdirect embedded print server is installed.

Supported network protocols

The product supports the TCP/IP network protocol, the most widely used and accepted networking protocol. Many networking services utilize this protocol. The following tables list the supported networking services and protocols.
## Table 5-1 Printing

<table>
<thead>
<tr>
<th>Service name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>port9100 (Direct Mode)</td>
<td>Printing service</td>
</tr>
<tr>
<td>Line printer daemon (LPD)</td>
<td>Printing service</td>
</tr>
<tr>
<td>Advanced LPD (custom LPD queues)</td>
<td>Protocol and programs associated with line-printer spooling services installed on TCP/IP systems.</td>
</tr>
<tr>
<td>FTP</td>
<td>TCP/IP utility for transferring data between systems.</td>
</tr>
<tr>
<td>WS Print</td>
<td>Uses the Microsoft Web Services for Devices (WSD) Print services on the HP Jetdirect print server.</td>
</tr>
<tr>
<td>WS Discovery</td>
<td>Allows Microsoft WS discovery protocols on the HP Jetdirect print server.</td>
</tr>
</tbody>
</table>

## Table 5-2 Network device discovery

<table>
<thead>
<tr>
<th>Service name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SLP (Service Location Protocol)</td>
<td>Device-discovery protocol, used to help find and configure network devices. Used primarily by Microsoft-based programs.</td>
</tr>
<tr>
<td>Bonjour</td>
<td>Device-discovery protocol, used to help find and configure network devices. Used primarily by Apple Macintosh-based programs.</td>
</tr>
</tbody>
</table>

## Table 5-3 Messaging and management

<table>
<thead>
<tr>
<th>Service name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>HTTP (Hyper Text Transfer Protocol)</td>
<td>Allows Web browsers to communicate with embedded Web server.</td>
</tr>
<tr>
<td>EWS (embedded Web server)</td>
<td>Allows you to manage the product through a Web browser.</td>
</tr>
<tr>
<td>SNMP (Simple Network Management Protocol)</td>
<td>Used by network applications for product management. SNMP v1, SNMP v3, and standard MIB-II (Management Information Base) objects are supported.</td>
</tr>
<tr>
<td>LLMNR (Link Local Multicast Name Resolution)</td>
<td>Specifies if the product responds to LLMNR requests over IPv4 and IPv6.</td>
</tr>
<tr>
<td>TFTP Configuration</td>
<td>Allows you to use TFTP to download a configuration file containing additional configuration parameters, such as SNMP or non-default settings, for an HP Jetdirect print server.</td>
</tr>
</tbody>
</table>
### Table 5-4  IP addressing

<table>
<thead>
<tr>
<th>Service name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>DHCP (Dynamic Host Configuration Protocol)</td>
<td>For automatic IP address assignment. The product supports IPv4 and IPv6. The DHCP server provides the product with an IP address. Generally, no user intervention is required for the product to obtain an IP address from a DHCP server.</td>
</tr>
<tr>
<td>BOOTP (Bootstrap Protocol)</td>
<td>For automatic IP address assignment. The BOOTP server provides the product with an IP address. Requires the administrator to input a product’s MAC hardware address on the BOOTP server for the product to obtain an IP address from that server.</td>
</tr>
<tr>
<td>Auto IP</td>
<td>For automatic IP address assignment. If neither a DHCP server nor a BOOTP server is present, the product uses this service to generate a unique IP address.</td>
</tr>
</tbody>
</table>

### Table 5-5  Security features

<table>
<thead>
<tr>
<th>Service name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>IPsec/Firewall</td>
<td>Provides network-layer security on IPv4 and IPv6 networks. A firewall provides simple control of IP traffic. IPsec provides additional protection through authentication and encryption protocols.</td>
</tr>
<tr>
<td>Kerberos</td>
<td>Allows you to exchange private information across an open network by assigning a unique key, called a ticket, to each user who logs on to the network. The ticket is then embedded in messages to identify the sender.</td>
</tr>
<tr>
<td>SNMP v3</td>
<td>Employs a user-based security model for SNMP v3, which provides user authentication and data privacy through encryption.</td>
</tr>
<tr>
<td>Access control list (ACL)</td>
<td>Specifies the individual host systems, or networks of host systems, that are allowed to access the HP Jetdirect print server and the attached network product.</td>
</tr>
<tr>
<td>SSL/TLS</td>
<td>Allows you to transmit private documents via the Internet and guarantee privacy and data integrity between the client and server applications.</td>
</tr>
<tr>
<td>IPsec batch configuration</td>
<td>Provides network-layer security through the simple control of IP traffic to and from the product. This protocol provides the benefits of encryption and authentication and allows for multiple configurations.</td>
</tr>
</tbody>
</table>
Install the product on a wired network

Configure the IP address

1. Connect the network cable to the product and to the network.

2. Wait for 60 seconds before continuing. During this time, the network recognizes the product and assigns an IP address or host name for the product.

3. At the product control panel, press the Home button.

4. Press the down arrow to highlight the Administration menu, and then press the OK button.

5. Press the down arrow to highlight the Reports menu, and then press the OK button.

6. Press the down arrow to highlight the Configuration/Status Pages menu, and then press the OK button.

7. Press the down arrow to highlight the Configuration Page item, and then press the OK button.

8. Press the up arrow to highlight the Print option, and then press the OK button to print the report.

9. Find the IP address on the Embedded Jetdirect page.

10. IPv4: If the IP address is 0.0.0.0, or 192.0.0.192, or 169.254.x.x, you must manually configure the IP address. See Manually configure IPv4 TCP/IP parameters from the control panel on page 67. Otherwise, the network configuration was successful.
**IPv6**: If the IP address begins with "fe80:," the product should be able to print. If not, you must manually configure the IP address. See [Manually configure IPv6 TCP/IP parameters from the control panel on page 68](#).

**Install the software**

1. Quit all programs on the computer.
2. Install the software from the CD.
3. Follow the onscreen instructions.
4. When prompted, select the **Connected via the Network** option, and then click the **Install** button.
5. From the list of available printers, select the printer that has the correct IP address.
6. Click the **Finish** button.
7. On the **Additional Options** screen, you can install more software, or click the **Exit** button.
8. Print a page from any program to make sure that the software is correctly installed.

**NOTE:** If the installation failed, reinstall the software.
Configure network settings

View or change network settings

Use the embedded Web server to view or change IP configuration settings.

1. Print a configuration page, and locate the IP address.
   - If you are using IPv4, the IP address contains only digits. It has this format:
     xxx.xxx.xxx.xxx
   - If you are using IPv6, the IP address is a hexadecimal combination of characters and digits. It has a format similar to this:
     xxxx::xxxx:xxxx:xxxx:xxxx

2. To open the embedded Web server, type the IP address into the address line of a Web browser.
3. Click the Networking tab to obtain network information. You can change settings as needed.

Set or change the network password

Use the embedded Web server to set a network password or change an existing password.

1. Open the embedded Web server, click the Security tab, and then click the General Security link.

   **NOTE:** If a password has previously been set, you are prompted to type the password. Type the password, and then click the Apply button.

2. Type the new password in the New Password box and in the Verify password box.
3. At the bottom of the window, click the Apply button to save the password.
Manually configure IPv4 TCP/IP parameters from the control panel

Use the control-panel menus to manually set an IPv4 address, subnet mask, syslog server, and default gateway.

1. Press the Home button.
2. Press the down arrow to highlight the Administration menu, and then press the OK button.
3. Press the down arrow to highlight the Network Settings menu, and then press the OK button.
4. Press the down arrow to highlight the Embedded Jetdirect menu, and then press the OK button.
5. Press the down arrow to highlight the TCP/IP menu, and then press the OK button.
6. Press the down arrow to highlight the IPv4 Settings menu, and then press the OK button.
7. Press the down arrow to highlight the Config Method menu, and then press the OK button.
8. Press the down arrow to highlight the Manual option, and then press the OK button.
9. Press the down arrow to highlight the Manual Settings menu, and then press the OK button.
10. Press the down arrow to highlight the IP Address, Subnet Mask, or Default Gateway menu, and then press the OK button.
11. Press the up arrow or the down arrow to increase or decrease the number for the first byte of the IP address, subnet mask, syslog server, or default gateway.
12. Press the OK button to move to the next set of numbers, or press the back arrow to move to the previous set of numbers.
13. Repeat steps 10 and 11 until the IP address, subnet mask, or default gateway is complete, and then press the OK button to save the setting.
14. Press the Home button to return to the Ready state.
Manually configure IPv6 TCP/IP parameters from the control panel

Use the control-panel menus to manually set an IPv6 address.

1. Press the Home button ⟨⟩.
2. Press the down arrow ▼ to highlight the Administration menu, and then press the OK button.
3. Press the down arrow ▼ to highlight the Network Settings menu, and then press the OK button.
4. Press the down arrow ▼ to highlight the Embedded Jetdirect menu, and then press the OK button.
5. Press the down arrow ▼ to highlight the TCP/IP menu, and then press the OK button.
6. Press the down arrow ▼ to highlight the IPv6 Settings menu, and then press the OK button.
7. Press the down arrow ▼ to highlight the Address menu, and then press the OK button.
8. Press the OK button to select the Manual Settings menu.
9. Press the down arrow ▼ to highlight the Address option, and then press the OK button.
10. Press the up arrow ▲ or the down arrow ▼ to select the first character of the address. Press the OK button.

   Repeat this process for each character in the address.

   **NOTE:** You must press the OK button after entering each character.

11. After entering all of the address characters, press the up arrow ▲ or the down arrow ▼ to select the stop character ⏎. Press the OK button.
12. Press the Home button ⟨⟩ to return to the Ready state.
Link speed and duplex settings

The link speed and communication mode of the print server must match the network. For most situations, leave the product in automatic mode. Incorrect changes to the link speed and duplex settings might prevent the product from communicating with other network devices. If you need to make changes, use the product control panel.

**NOTE:** Making changes to these settings causes the product to turn off and then on. Make changes only when the product is idle.

1. Press the Home button.
2. Press the down arrow to highlight the Administration menu, and then press the OK button.
3. Press the down arrow to highlight the Network Settings menu, and then press the OK button.
4. Press the down arrow to highlight the Embedded Jetdirect menu, and then press the OK button.
5. Press the down arrow to highlight the Link Speed menu, and then press the OK button.
6. Press the down arrow to highlight one of the following options.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto</td>
<td>The print server automatically configures itself for the highest link speed and communication mode allowed on the network.</td>
</tr>
<tr>
<td>10T Half</td>
<td>10 megabytes per second (Mbps), half-duplex operation</td>
</tr>
<tr>
<td>10T Full</td>
<td>10 Mbps, full-duplex operation</td>
</tr>
<tr>
<td>100TX Half</td>
<td>100 Mbps, half-duplex operation</td>
</tr>
<tr>
<td>100TX Full</td>
<td>100 Mbps, full-duplex operation</td>
</tr>
<tr>
<td>100TX Auto</td>
<td>Limits auto-negotiation to a maximum link speed of 100 Mbps</td>
</tr>
<tr>
<td>1000T Full</td>
<td>1000 Mbps, full-duplex operation</td>
</tr>
</tbody>
</table>

7. Press the OK button. The product turns off and then on.
6 Paper and print media

- Understand paper use
- Change the printer driver to match the paper type and size
- Supported paper sizes
- Supported paper types and tray capacity
- Load paper trays
- Configure trays
Understand paper use

This product supports a variety of paper and other print media in accordance with the guidelines in this user guide. Paper or print media that does not meet these guidelines might cause poor print quality, increased jams, and premature wear on the product.

For best results, use only HP-brand paper and print media designed for laser printers or multiuse. Do not use paper or print media made for inkjet printers. Hewlett-Packard Company cannot recommend the use of other brands of media because HP cannot control their quality.

It is possible for paper to meet all of the guidelines in this user guide and still not produce satisfactory results. This might be the result of improper handling, unacceptable temperature and/or humidity levels, or other variables over which Hewlett-Packard has no control.

⚠️ **CAUTION:** Using paper or print media that does not meet Hewlett-Packard’s specifications might cause problems for the product, requiring repair. This repair is not covered by the Hewlett-Packard warranty or service agreements.

Special paper guidelines

This product supports printing on special media. Use the following guidelines to obtain satisfactory results. When using special paper or print media, be sure to set the type and size in the printer driver to obtain the best results.

⚠️ **CAUTION:** HP LaserJet products use fusers to bond dry toner particles to the paper in very precise dots. HP laser paper is designed to withstand this extreme heat. Using inkjet paper could damage the product.

<table>

</tbody>
</table>
Change the printer driver to match the paper type and size

Change the paper size and type (Windows)

1. On the **File** menu in the software program, click **Print**.
2. Select the product, and then click the **Properties** or **Preferences** button.
3. Click the **Paper/Quality** tab.
4. Select a size from the **Paper size** drop-down list.
5. Select a paper type from the **Paper type** drop-down list.
6. Click the **OK** button.

Change the paper size and type (Mac)

1. On the **File** menu in the software program, click the **Print** option.
2. In the **Copies & Pages** menu, click the **Page Setup** button.
3. Select a size from the **Paper Size** drop-down list, and then click the **OK** button.
4. Open the **Finishing** menu.
5. Select a type from the **Media-type** drop-down list.
6. Click the **Print** button.
Supported paper sizes

This product supports a number of paper sizes, and it adapts to various media.

**NOTE:** To obtain best print results, select the appropriate paper size and type in your print driver before printing.

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1 These sizes can be loaded in a rotated orientation in Tray 2, Tray 3, and optional Trays 4, 5, and 6.
2 A5 size is supported for Tray 3 only, as a custom size, with the long edge feeding into the product first. A5 size is not supported for two-sided (duplex) printing from Tray 3.
3 Custom media width is limited to 312 mm (12.3 in). However, SRA3, which is 320 mm (12.6 in) wide, is supported. The maximum printable image is 302 mm (11.9 in) wide. With the required blank 5 mm (0.2 in) margins on each side for printing, any media wider than 312 mm (11.9 in) will have its image centered and limited to 302 mm wide.

### Supported paper sizes for duplex printing

- **Minimum:** 148 x 182 mm (5.8 x 7.2 in)
- **Maximum:** 312/320 x 457 mm (12.3/12.6 x 18 in)

**NOTE:** Custom media width is limited to 312 mm (12.3 in). However, SRA3, which is 320 mm (12.6 in) wide, is supported. The maximum printable image is 302 mm (11.9 in) wide. With the required blank 5 mm (0.2 in) margins on each side for printing, any media wider than 312 mm (11.9 in) will have its image centered and limited to 302 mm wide.

**NOTE:** For automatic duplexing, do not load paper that is heavier than 120 g/m² (32-lb bond). Use manual duplexing to print on heavier paper.
## Supported paper types and tray capacity

</tbody>
</table>

1. The product supports a wide range of standard and custom sizes of print media. Check the printer driver for supported sizes.
2. Capacity can vary depending on media weight and thickness, and environmental conditions.
3. Smoothness: 100 to 250 (Sheffield)
Load paper trays

Load Tray 1

1. Open Tray 1.

2. Pull out the tray extension to support the paper.

3. Load paper in the tray.

   **TIP:** To achieve the highest print-quality, HP recommends that you load the paper long-edge first.
4. Make sure that the stack fits under the tabs on the guides and does not exceed the load-level indicators.

5. Adjust the side guides so that they lightly touch the paper stack but do not bend it.

Load Tray 2, Tray 3, and optional Trays 4, 5, and 6 with standard-size paper

1. Open the tray.

   **NOTE:** Do not open the tray while it is in use.
2. Adjust the paper-length and paper-width guides by squeezing the adjustment latches and sliding the guides to the size of the paper being used.

3. Load paper into the tray. Check the paper to verify the guides lightly touch the stack, but do not bend it.
   
   **NOTE:** To prevent jams, do not overfill the tray. Be sure that the top of the stack is below the tray full indicator.

   **NOTE:** If the tray is not adjusted correctly, an error message might appear during printing or the paper might jam.

4. Close the tray.

5. The control panel shows the tray’s paper type and size. If the configuration is not correct, follow the instructions on the control panel to change the size or type.
Load Tray 2, Tray 3, and optional Trays 4, 5, and 6 with custom-size paper

1. Open the tray.

2. Adjust the paper-length and paper-width guides by squeezing the adjustment latches and sliding the guides to the size of the paper being used.

   **NOTE:** It might be easier to load the custom-size paper first, and then adjust the guides.

3. Load paper into the tray. Check the paper to verify the guides lightly touch the stack, but do not bend it.
4. Close the tray.

5. The control panel prompts you to set the paper size and type. Select the **Custom** setting, and then configure the X and Y dimensions of the custom paper size.

   **NOTE:** See the label in the paper tray, or the following illustration, to determine the X and Y dimensions.

</tbody>
</table>
Configure trays

The product automatically prompts you to configure a tray for type and size in the following situations:

- When you load paper into the tray
- When you specify a particular tray or media type for a print job through the printer driver or a software program and the tray is not configured to match the print-job’s settings

**NOTE:** The prompt does not appear if you are printing from Tray 1, and it is configured for the Any Size and Any Type settings. In this situation, if the print job does not specify a tray, the product prints from Tray 1, even if the paper size and type settings in the print job do not match the paper loaded in Tray 1.

Configure a tray when loading paper

1. Load paper in the tray. Close the tray if you are using Tray 2, 3, 4, 5, or 6.
2. The tray configuration message appears.
3. Do one of the following:
   - Press the OK button to accept the size and type.
   - To modify the tray size configuration, press the down arrow to highlight the Modify option, and then press the OK button.
     a. Press the down arrow to highlight the correct size, and then press the OK button.
     b. Press the down arrow to highlight the correct type, and then press the OK button.

Configure a tray to match print job settings

1. In the software program, specify the source tray, the paper size, and the paper type.
2. Send the job to the product.
   If the tray needs to be configured, the tray configuration message appears.
3. Load the tray with the specified type and size of paper, and then close the tray.
4. When the size and type confirmation messages appear, press the OK button to confirm the paper size and type.

Configure a tray from the control panel

You can also configure the trays for type and size without a prompt from the product.

1. Press the Home button.
2. Open the Trays menu.
3. Press the down arrow to highlight the size or type setting for the desired tray, and then press the OK button.
4. Press the up arrow ▲ or the down arrow ▼ to highlight the size or type. If you select a custom size, select the unit of measure, and then set the X dimension and the Y dimension.

5. Press the OK button to save your selection.

6. Press the Home button ◄ to exit the menus.

**Automatic paper sensing (auto-sense mode)**

The automatic media type sensor functions when that tray is configured to the **Any Type** or plain type setting. It also functions when the **Print Mode** setting for that tray is set to the **Auto Sense Mode** option.

After it has picked up paper from the tray, the product can detect overhead transparencies, paper weight, and gloss level.

For more control, a specific type must be selected in the job or configured in a tray.

**Auto-sense settings**

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Full sensing (Tray 1 only)</td>
<td>For each sheet of paper that it picks up from the tray, the product detects light paper, plain paper, heavy paper, glossy paper, tough paper, and transparencies.</td>
</tr>
<tr>
<td>Expanded sensing</td>
<td>For the first few sheets of paper that it picks up from the tray, the product detects light paper, plain paper, heavy paper, glossy paper, tough paper, and transparencies. The product assumes the rest of the pages are of the same type.</td>
</tr>
<tr>
<td>Transparency only</td>
<td>The product distinguishes between transparencies and non-transparencies.</td>
</tr>
</tbody>
</table>

**Select the paper by source, type, or size**

In the Microsoft Windows operating system, three settings affect how the printer driver tries to pull media when you send a print job. Source, Type, and Size settings appear in the **Page Setup**, **Print, Preferences**, or **Print Properties** dialog boxes in most software programs. Unless you change these settings, the product automatically selects a tray using the default settings.

**Source**

To print by source, select a specific tray in the printer driver for the product to pull from. If you select a tray that is configured for a type or size that does not match your print job, the product prompts you to load the tray with the type or size of paper for your print job before printing it. When you load the tray, the product begins printing.

**Type and size**

- Printing by type or size causes the product to pull from the tray that is loaded with the correct type and size of paper.
- Selecting paper by type rather than source helps protect special paper from accidental use.
- Using the wrong setting might result in unsatisfactory print quality. Always print by type for special print media, such as labels or transparencies.
- Print by type or size for envelopes, if possible.
- To print by type or size, select the type or size from the **Page Setup** dialog box, the **Print** dialog box, the **Preferences** dialog box, or the **Print Properties** dialog box, depending on the software program.
- If you often print on a certain type or size of paper, configure a tray for that type or size. Then, when you select that type or size as you print a job, the product automatically pulls paper from the tray that is configured for that type or size.

Manage print cartridges

Correctly using, storing, and monitoring the print cartridge can help ensure high-quality print output.

Settings for print cartridges

Print when a print cartridge is at estimated end of life

- A `<Color> <Supply> Low` message—where `<Color>` is the color of the supply, and `<Supply>` is the type of supply—appears when a supply is nearing the estimated end of its useful life.

- A `<Color> <Supply> Very Low` message appears when a supply is at its estimated end of useful life.

Print-quality problems can occur when using a supply that is at its estimated end of life.

Enable or disable the Very Low Settings options from the control panel

You can enable or disable the default settings at any time, and you do not have to re-enable them when you install a new cartridge.

⚠️ **CAUTION:** Once an HP supply has reached Very Low, the HP premium Protection Warranty on that supply has ended.

1. At the control panel, press the Home button.
2. Open the following menus:
   1. Administration
   2. Manage Supplies
   3. Supply Settings
   4. Black Cartridge or Color Cartridges
   5. Very Low Settings
3. Use the arrow buttons to highlight your selection, and then press the OK button to select it. Select one of the following options:

   🔄 **NOTE:** If you select the Stop or Prompt to continue option, the product stops printing when it reaches the Very Low threshold. When you replace the cartridge, the product automatically resumes printing.

   - Select the Stop option to set the product to stop printing until you replace the cartridge.
   - Select the Prompt to continue option to set the product to stop printing and prompt you to replace the cartridge. You can acknowledge the prompt and continue printing.
   - Select the Continue option to set the product to alert you that the cartridge is very low, but to continue printing.

   🔄 **NOTE:** Using the Continue setting allows printing beyond Very Low without customer interaction and can result in unsatisfactory print quality.
Recycle supplies

To recycle a genuine HP print cartridge, place the used cartridge in the box in which the new cartridge arrived. For complete information, see the recycling guide that is included with each new HP supply item.

Print-cartridge storage

Do not remove the print cartridge from its package until you are ready to use it.

⚠️ CAUTION: To prevent damage to the print cartridge, do not expose it to light for more than a few minutes.

HP policy on non-HP print cartridges

Hewlett-Packard Company cannot recommend the use of non-HP print cartridges, either new or remanufactured.

📝 NOTE: Any damage caused by a non-HP print cartridge is not covered under the HP warranty and service agreements.
HP fraud hotline and Web site

Call the HP fraud hotline (1-877-219-3183, toll-free in North America) or go to www.hp.com/go/anticounterfeit when you install an HP print cartridge and the control-panel message says the cartridge is non-HP. HP will help determine if the cartridge is genuine and take steps to resolve the problem.

Your print cartridge might not be a genuine HP print cartridge if you notice the following:

- The supplies status page indicates that a non-HP supply is installed.
- You are experiencing a high number of problems with the print cartridge.
- The cartridge does not look like it usually does (for example, the packaging differs from HP packaging).
Replacement instructions

Replace print cartridges

The product uses four colors and has a different print cartridge for each color: black (K), magenta (M), cyan (C), and yellow (Y).

⚠️ CAUTION: If toner gets on clothing, wipe it off with a dry cloth and wash the clothes in cold water. Hot water sets toner into fabric.

.BorderStyle — Vertical Alignment: Top

issance: Information about recycling used print cartridges is on the print-cartridge box.

1. Open the front door. Make sure that the door is completely open.

2. Grasp the handle of the used print cartridge and pull out to remove.

3. Store the used print cartridge in a protective bag. Information about recycling used print cartridges is on the print-cartridge box.

4. Remove the new print cartridge from its protective bag.

 NOTE: Be careful not to damage the memory tag on the print cartridge.
5. Grasp both sides of the print cartridge and distribute the toner by gently rocking the print cartridge.

6. Remove the orange protective cover from the print cartridge.
   
   **CAUTION:** Avoid prolonged exposure to light.
   
   **CAUTION:** Do not touch the green roller. Doing so can damage the cartridge.

7. Align the print cartridge with its slot and insert the print cartridge until it clicks into place.
   
   **NOTE:** The print cartridges go in at a slight angle.

8. Close the front door.
Replace the toner collection unit

Replace the toner collection unit when the control panel prompts you.

**NOTE:** The toner collection unit is designed for a single use. Do not attempt to empty the toner collection unit and reuse it. Doing so could lead to toner being spilled inside the product, which could result in reduced print quality. After use, return the toner collection unit to HP’s Planet Partners program for recycling.

1. Open the rear door. Make sure that the door is completely open.

2. Grasp the top of the toner collection unit and remove it from the product.
3. Place the attached cap over the opening at the top of the unit.

4. Remove the new toner collection unit from its packaging.
5. Insert the bottom of the new unit into the product first and then push the top of the unit until it clicks into place.

6. Close the rear door.

To recycle the used toner collection unit, follow the instructions included with the new toner collection unit.
Solve problems with supplies

Check the print cartridges

Check the print cartridge, and replace it if necessary, if you are having any of the following problems:

- The printing is too light or seems faded in areas.
- Printed pages have small unprinted areas.
- Printed pages have streaks or bands.

**NOTE:** If you are using a draft or EconoMode print setting, the printing might appear light.

If you determine that you need to replace a print cartridge, print the supplies status page to find the part number for the correct genuine HP print cartridge.

<table>
<thead>
<tr>
<th>Type of print cartridge</th>
<th>Steps to resolve the problem</th>
</tr>
</thead>
<tbody>
<tr>
<td>Refilled or remanufactured print</td>
<td>Hewlett-Packard Company cannot recommend the use of non-HP supplies, either new or remanufactured. Because they are not HP products, HP cannot influence their design or control their quality. If you are using a refilled or remanufactured print cartridge and are not satisfied with the print quality, replace the cartridge with a genuine HP cartridge that has the words “HP” or “Hewlett-Packard” on it, or has the HP logo on it.</td>
</tr>
<tr>
<td>cartridge</td>
<td></td>
</tr>
<tr>
<td>Genuine HP print cartridge</td>
<td>1. The product control panel or the supplies status page indicates <strong>Very Low</strong> status when the cartridge has reached the end of its designated life. Replace the print cartridge if print quality is no longer acceptable.</td>
</tr>
<tr>
<td></td>
<td>2. Visually inspect the print cartridge for damage. See the instructions that follow. Replace the print cartridge if necessary.</td>
</tr>
<tr>
<td></td>
<td>3. If printed pages have marks that repeat several times at the same distance apart, print a cleaning page. If this does not solve the problem, use the repeating defects information in this document to identify the cause of the problem.</td>
</tr>
</tbody>
</table>
Inspect the print cartridge for damage

1. Remove the print cartridge from the product, and verify that the sealing tape has been removed.

2. Check the memory chip for damage.

3. Examine the surface of the green imaging drum on the bottom of the print cartridge.

⚠️ **CAUTION:** Do not touch the green roller (imaging drum) on the bottom of the cartridge. Fingerprints on the imaging drum can cause print-quality problems.

4. If you see any scratches, fingerprints, or other damage on the imaging drum, replace the print cartridge.

5. If the imaging drum does not appear to be damaged, rock the print cartridge gently several times and reinstall it. Print a few pages to see if the problem has resolved.
Repeating defects

If defects repeat at regular intervals on the page, use this ruler to identify the cause of the defect. Place the top of the ruler at the first defect. The marking that is beside the next occurrence of the defect indicates which component needs to be replaced.

Print the Supplies Status page

The Print Supplies Status page indicates the estimated life remaining in print cartridges. It also lists the part number for the correct genuine HP print cartridge for your product so you can order a replacement print cartridge, as well as other useful information.

1. At the control panel, press the Home button.
2. Open the following menus:
   1. Administration
   2. Reports
   3. Configuration/Status Pages
3. Use the down arrow button to highlight the Supplies Status Page item, and then press the OK button to select it.
4. Use the up arrow button to highlight the Print item, and then press the OK button.
Interpret control panel messages for supplies

The following table contains important information about supplies status messages.

Table 7-1  Supplies status messages

<table>
<thead>
<tr>
<th>Control panel message</th>
<th>Description</th>
<th>Recommended action</th>
</tr>
</thead>
<tbody>
<tr>
<td>10.XX.YY Supply memory error</td>
<td>The product cannot read or write to at least one print cartridge memory chip or a memory chip is missing from a print cartridge.</td>
<td>Reinstall the print cartridge, or install a new print cartridge.</td>
</tr>
</tbody>
</table>

**Memory chip memory errors**

- YY = 00
- XX = 00 - Black
- XX = 01 - Cyan
- XX = 02 - Magenta
- XX = 03 - Yellow

**Memory chip missing errors**

- YY = 10
- XX = 00 - Black
- XX = 01 - Cyan
- XX = 02 - Magenta
- XX = 03 - Yellow

**Black cartridge low**

The print cartridge is nearing the estimated end of its useful life.

**Black cartridge very low**

The print cartridge is at the estimated end of its useful life. Print quality might decrease. Replace the print cartridge when the print quality becomes unacceptable.

The product indicates when the print cartridge level is low. The actual print cartridge life remaining can vary. Consider having a replacement cartridge available to install when the print quality is no longer acceptable. The print cartridge does not need to be replaced now.

To ensure optimal print quality, HP recommends replacing the print cartridge at this point. You do not need to replace the print cartridge at this time unless the print quality is no longer acceptable. The actual print cartridge life can vary.

Once an HP print cartridge has reached the very low threshold, the HP Premium Protection Warranty on that print cartridge has ended. All print defects or print cartridge failures incurred when an HP print cartridge is used in “continue in very low” mode will not be considered to be defects in materials or workmanship in the print cartridge under the HP Print Cartridge Warranty Statement.

8 Print tasks

- Cancel a print job
- Basic print tasks with Windows
- Additional print tasks with Windows
- Walk-up USB printing
Cancel a print job

1. Press the stop button \( \bigcirc \) on the control panel.

2. Press the down arrow \( \downarrow \) to highlight the **Cancel Current Job** option, and then press the **OK** button.

   **NOTE:** It can take some time for all printing to clear after you have canceled a print job.
Basic print tasks with Windows

Open the printer driver with Windows

1. On the **File** menu in the software program, click **Print**.

2. Select the product, and then click the **Properties** or **Preferences** button.
Get help for any printing option with Windows

1. Click the Help button to open the online Help.

Change the number of print copies with Windows

1. On the File menu in the software program, click Print.
2. Select the product, and then select the number of copies.

Save custom print settings for reuse with Windows

Use a printing shortcut with Windows

1. On the File menu in the software program, click Print.
2. Select the product, and then click the Properties or Preferences button.

3. Click the Printing Shortcuts tab.

4. Select one of the shortcuts, and then click the OK button.

**NOTE:** When you select a shortcut, the corresponding settings change on the other tabs in the printer driver.
Create printing shortcuts

1. On the **File** menu in the software program, click **Print**.

2. Select the product, and then click the **Properties** or **Preferences** button.

3. Click the **Printing Shortcuts** tab.
4. Select an existing shortcut as a base.

**NOTE:** Always select a shortcut before adjusting any of the settings on the right side of the screen. If you adjust the settings and then select a shortcut, all your adjustments are lost.

5. Select the print options for the new shortcut.
6. Click the **Save As** button.

7. Type a name for the shortcut, and click the **OK** button.
Select the page size with Windows

1. On the File menu in the software program, click Print.
2. Select the product, and then click the Properties or Preferences button.
3. Click the Paper/Quality tab.
4. Select a size from the Paper size drop-down list.

Select a custom page size with Windows

1. On the File menu in the software program, click Print.
2. Select the product, and then click the Properties or Preferences button.
3. Click the Paper/Quality tab.
4. Click the Custom button.
5. Type a name for the custom size, specify the dimensions, and click the OK button.

Select the paper type with Windows

1. On the File menu in the software program, click Print.
2. Select the product, and then click the Properties or Preferences button.
3. Click the Paper/Quality tab.
4. From the Paper type drop-down list, click the More... option.
5. Expand the list of Type is: options.
6. Expand the category of paper types that best describes your paper, and then click the paper type that you are using.

Select the paper tray with Windows

1. On the File menu in the software program, click Print.
2. Select the product, and then click the Properties or Preferences button.
3. Click the Paper/Quality tab.
4. Select a tray from the Paper source drop-down list.

Select the print resolution

1. On the File menu in the software program, click Print.
2. Select the product, and then click the Properties or Preferences button.
3. Click the **Paper/Quality** tab.

4. In the **Print Quality** area, select the resolution from the first drop-down list.
Print on both sides (duplex) with Windows

**NOTE:** See Paper orientation for loading trays on page 85 for information about the correct way to load paper.

Manually print on both sides with Windows

**NOTE:** This information applies only to products that do not have an automatic duplexer.

1. On the **File** menu in the software program, click **Print**.

2. Select the product, and then click the **Properties** or **Preferences** button.

3. Click the **Finishing** tab.
4. Select the **Print on both sides (manually)** check box. Click the **OK** button to print the first side of the job.

5. Retrieve the printed stack from the output bin, and place it with the printed-side facing up in Tray 1.

6. On the control panel, press the **OK** button to print the second side of the job.

### Automatically print on both sides with Windows

**NOTE:** This information applies only to products that have an automatic duplexer.

1. On the **File** menu in the software program, click **Print**.
2. Select the product, and then click the Properties or Preferences button.

3. Click the Finishing tab.

4. Select the Print on both sides check box. Click the OK button to print the job.
Print multiple pages per sheet with Windows

1. On the **File** menu in the software program, click **Print**.

2. Select the product, and then click the **Properties** or **Preferences** button.

3. Click the **Finishing** tab.
4. Select the number of pages per sheet from the **Pages per sheet** drop-down list.

5. Select the correct **Print page borders**, **Page order**, and **Orientation** options.

---

**Select page orientation with Windows**

1. On the **File** menu in the software program, click **Print**.
2. Select the product, and then click the Properties or Preferences button.

3. Click the Finishing tab.

4. In the Orientation area, select the Portrait or Landscape option.

   To print the page image upside down, select the Rotate by 180 degrees option.
Set color options with Windows

1. On the **File** menu in the software program, click **Print**.

2. Select the product, and then click the **Properties** or **Preferences** button.

3. Click the **Color** tab.
4. Click the **HP EasyColor** check box to clear it.

5. In the **Color Options** area, click the **Manual** option, and then click the **Settings** button.

6. Adjust the general settings for Edge Control, and settings for text, graphics, and photographs.
Additional print tasks with Windows

Print colored text as black (grayscale) with Windows

1. On the File menu in the software program, click Print.
2. Select the product, and then click the Properties or Preferences button.
3. Click the Advanced tab.
4. Expand the Document Options section.
5. Expand the Printer Features section.
6. In the Print All Text as Black drop-down list, select the Enabled option.
Print on preprinted letterhead or forms with Windows

1. On the **File** menu in the software program, click **Print**.

2. Select the product, and then click the **Properties** or **Preferences** button.

3. Click the **Paper/Quality** tab.
4. From the **Paper type** drop-down list, click the **More...** option.

5. Expand the list of **Type is:** options.
6. Expand the list of Other options.

7. Select the option for the type of paper you are using, and click the OK button.

Print on special paper, labels, or transparencies

1. On the File menu in the software program, click Print.
2. Select the product, and then click the Properties or Preferences button.

![Printer Properties dialog box]

3. Click the Paper/Quality tab.

![Paper/Quality tab]

4. From the Paper type drop-down list, click the More... option.
5. Expand the list of **Type is:** options.

6. Expand the category of paper types that best describes your paper.

   **NOTE:** Labels and transparencies are in the list of **Other** options.

7. Select the option for the type of paper you are using, and click the **OK** button.
Print the first or last page on different paper with Windows

1. On the **File** menu in the software program, click **Print**.

2. Select the product, and then click the **Properties** or **Preferences** button.

3. Click the **Paper/Quality** tab.
4. In the **Special pages** area, click the **Print pages on different paper** option, and then click the **Settings** button.

5. In the **Pages in document** area, select either the **First** or **Last** option.

6. Select the correct options from the **Paper source** and **Paper type** drop-down lists. Click the **Add** button.
7. If you are printing both the first and last pages on different paper, repeat steps 5 and 6, selecting the options for the other page.

8. Click the OK button.

Scale a document to fit page size

1. On the File menu in the software program, click Print.
2. Select the product, and then click the **Properties** or **Preferences** button.

3. Click the **Effects** tab.

4. Select the **Print document on** option, and then select a size from the drop-down list.
Add a watermark to a document with Windows

1. On the File menu in the software program, click Print.

2. Select the product, and then click the Properties or Preferences button.

3. Click the Effects tab.

4. Select a watermark from the Watermarks drop-down list.

   Or, to add a new watermark to the list, click the Edit button. Specify the settings for the watermark, and then click the OK button.

5. To print the watermark on the first page only, select the First page only check box. Otherwise, the watermark is printed on each page.
Create a booklet with Windows

1. On the File menu in the software program, click Print.

2. Select the product, and then click the Properties or Preferences button.

3. Click the Finishing tab.
4. Select the **Print on both sides** check box.

5. In the **Booklet layout** drop-down list, click the **Left binding** or **Right binding** option. The **Pages per sheet** option automatically changes to **2 pages per sheet**.

---

**Use job storage features with Windows**

The following job-storage modes are available for print jobs:

- **Proof and Hold**: This feature provides a quick way to print and proof one copy of a job and then print more copies.

- **Personal Job**: When you send a job to the product, the job does not print until you request it at the product control panel. If you assign a personal identification number (PIN) to the job, you must provide the required PIN at the control panel.

- **Quick Copy**: If the optional hard disk is installed on the product, you can print the requested number of copies of a job and then store a copy of the job on the optional hard disk. Storing the job allows you to print additional copies of the job later.

- **Stored Job**: If the optional hard disk is installed on the product, you can store a job such as a personnel form, time sheet, or calendar on the product and allow other users to print the job at any time. Stored jobs also can be protected by a PIN.
△ **CAUTION:** If you turn off the product, all Quick Copy, Proof and Hold, and Personal Job types of stored jobs are deleted. To permanently store the job and prevent the product from deleting it when space is needed for something else, select the Stored Job option in the driver.

### Create a stored job with Windows

1. On the **File** menu in the software program, click **Print**.

![Print dialog box](image)

2. Select the product, and then click the **Properties** or **Preferences** button.

![Properties dialog box](image)
3. Click the **Job Storage** tab.

4. Select a **Job Storage Mode** option, and then click the **OK** button.

---

### Print a stored job

1. Press the **Home button**.

2. Press the down arrow ▼ to highlight the **Retrieve Job From Device Memory** menu, and then press the **OK** button.

3. Press the down arrow ▼ to highlight your user name, and then press the **OK** button.
4. Press the down arrow \( \downarrow \) to highlight a job name, and then press the OK button. 
   
The Print or Delete option is highlighted. 
   
   **NOTE:** If you have stored more than one job on the product, you have the option to print or delete all of them at the same time. 
   
5. Press the OK button to select the Print or Delete option. 
   
**Delete a stored job**

When you send a stored job, the product overwrites any previous jobs with the same user and job name. If a job is not already stored under the same user and job name, and the product needs additional space, the product might delete other stored jobs starting with the oldest. You can change the number of jobs that can be stored from the Retrieve Job From Device Memory menu on the product control panel.

You can delete a job from the control panel, from the HP Embedded Web Server, or from HP Web Jetadmin. To delete a job from the control panel, use the following procedure:

1. Press the Home button \( \text{Home} \).
2. Press the down arrow \( \downarrow \) to highlight the Retrieve Job From Device Memory menu, and then press the OK button.
3. Press the down arrow \( \downarrow \) to highlight a job name, and then press the OK button.
4. Press the down arrow \( \downarrow \) to highlight the Delete option, and then press the OK button.

**Set job storage options with Windows**

**Print one copy for proof before printing all the copies**

1. On the File menu in the software program, click Print.
2. Select the product, and then click the Properties or Preferences button.
3. Click the Job Storage tab.
4. In the Job Storage Mode area, click the Proof and Hold option.

**Temporarily store a personal job on the product and print it later**

\( \text{NOTE:} \) The product deletes the job after you print it.

1. On the File menu in the software program, click Print.
2. Select the product, and then click the Properties or Preferences button.
3. Click the Job Storage tab.
4. In the Job Storage Mode area, click the Personal Job option.
5. Optional: In the **Make Job Private** area, click the **PIN to print** option, and enter a 4-digit personal identification number (PIN).

6. Print the job at any time from the product control panel.

**Temporarily store a job on the product**

*NOTE:* This option is available if the optional hard disk is installed in the product.

*NOTE:* The product stores the job until you turn the product off.

1. On the **File** menu in the software program, click **Print**.
2. Select the product, and then click the **Properties** or **Preferences** button.
3. Click the **Job Storage** tab.
4. In the **Job Storage Mode** area, click the **Quick Copy** option.

   The requested number of copies are printed immediately, and you can print more copies from the product control panel.

**Permanently store a job on the product**

*NOTE:* This option is available if the optional hard disk is installed in the product.

1. On the **File** menu in the software program, click **Print**.
2. Select the product, and then click the **Properties** or **Preferences** button.
3. Click the **Job Storage** tab.
4. In the **Job Storage Mode** area, click the **Stored Job** option.

**Make a permanently stored job private so that anyone who tries to print it must provide a PIN**

*NOTE:* This option is available if the optional hard disk is installed in the product.

1. On the **File** menu in the software program, click **Print**.
2. Select the product, and then click the **Properties** or **Preferences** button.
3. Click the **Job Storage** tab.
4. In the **Job Storage Mode** area, click the **Stored Job** option or the **Personal Job** option.
5. In the **Make Job Private** area, click the **PIN to print** option, and enter a 4-digit personal identification number (PIN).

*NOTE:* To print the job or to delete it, you must provide the PIN at the product control panel.
Receive notification when someone prints a stored job

**NOTE:** Only the person who created the stored job receives notification. You do not receive notification when someone prints a stored job that another person has created.

1. On the *File* menu in the software program, click *Print*.
2. Select the product, and then click the *Properties* or *Preferences* button.
3. Click the *Job Storage* tab.
4. Select the job storage mode that you want.
5. In the *Job Notifications Options* area, click the *Display Job ID when printing* option.

Set the user name for a stored job

Follow this procedure to change the user name for a stored job.

1. On the *File* menu in the software program, click *Print*.
2. Select the product, and then click the *Properties* or *Preferences* button.
3. Click the *Job Storage* tab.
4. Select the job storage mode that you want.
5. In the *User Name* area, click the *User name* option to use the Windows default user name. To provide a different user name, click the *Custom* option and type the name.

Specify a name for the stored job

Follow this procedure to change the default name for a stored job.

1. On the *File* menu in the software program, click *Print*.
2. Select the product, and then click the *Properties* or *Preferences* button.
3. Click the *Job Storage* tab.
4. Select the job storage mode that you want.
5. To automatically generate the job name associated with the stored document, in the *Job Name* area, click the *Automatic* option. The driver uses the document file name, if it is available. If the document has no file name, the driver uses the software program name or a time stamp for the job name.

   To specify a job name, click the *Custom* option and type the name.

6. Select an option from the *If job name exists* drop-down list.
   - Select the *Use Job Name + (1-99)* option to add a number to the end of the existing name.
   - Select the *Replace Existing File* option to overwrite a job that already has that name.
Print special jobs with Windows

Print business graphics or marketing material

You can use this product to print marketing and sales material or other color documents on glossy paper. To maximize the quality of this output you must do the following:

1. Choose the appropriate paper. See the following table.
2. At the product control panel, configure the paper tray for the correct paper type.
3. Select the corresponding settings in the printer driver.

Supported glossy paper

**NOTE:** In the United States, see [www.hp.com/go/paper](http://www.hp.com/go/paper) for a complete list of HP brand paper.

Print weatherproof maps and outdoor signs

The product can print durable, waterproof maps, signs, or menus by using HP Tough Paper. HP Tough Paper is a waterproof, tear-proof, satin finish paper that retains rich, vibrant print color and clarity even
when exposed to heavy usage or weather. This avoids expensive and time-consuming lamination. To maximize the quality of this output, you must do the following:

- Choose the appropriate paper. See the following table.
- At the product control panel, configure the paper tray for the correct paper type.
- Select the corresponding settings in the printer driver.

**Supported tough paper**

**Set the duplex alignment**

For documents that are printed on both sides, such as brochures, set the registration for the tray before printing to ensure that the front and back of the page are aligned.

1. Press the Home button.
2. Press the down arrow to highlight the **Administration** menu, and then press the **OK** button.
3. Press the down arrow to highlight the **General Settings** menu, and then press the **OK** button.
4. Press the down arrow to highlight the **Print Quality** menu, and then press the **OK** button.
5. Press the down arrow to highlight the **Image Registration** menu, and then press the **OK** button.
6. Press the down arrow to highlight the **Adjust Tray <X>** menu for the tray that you want to adjust, and then press the **OK** button.
7. Press the down arrow to highlight the **Print Test Page** setting, and then press the **OK** button.
8. Follow the instructions on the test page to complete the adjustment.
Walk-up USB printing

This product features walk-up USB printing, so you can quickly print files without sending them from a computer. The product accepts standard USB storage accessories in the USB port on the front of the product. You can print the following types of files:

**NOTE:** You must enable this feature by using the control-panel menus or the HP Embedded Web Server before it can be used.

To enable this feature by using the control-panel menus, access the Administration menu, Retrieve From USB Settings sub menu, and then select Enable. To enable this feature by using the HP Embedded Web Server, access the Print tab.

- .pdf
- .prn
- .pcl
- .ps
- .cht

1. Insert the USB storage accessory into the USB port on the front of the product.
   **NOTE:** You might need to remove the cover from the USB port.

2. Press the down arrow ▼ to highlight OK, and then press the OK button.

3. Press the down arrow ▼ to highlight Select a File or Folder, and then press the OK button.

4. Press the down arrow ▼ to select a folder from the list.

5. Select the name of the document that you want to print.

6. Press the OK button to print the document.
9 Color

- Adjust color
- Match colors
- Advanced color use
**Adjust color**

Manage color by changing the settings on the Color tab (Windows) or the Color Options or Color/Quality Options menu (Mac) in the printer driver.

**Automatic**

Setting color options to the default or Automatic setting typically produces the best possible print quality for color documents. The default or Automatic color adjustment option optimizes the neutral-gray color treatment, halftones, and edge enhancements for each element in a document. For more information, see the printer driver online Help.

**Print in Grayscale**

Select the Print in Grayscale option (Windows) or the Print Color as Gray option (Mac) from the printer driver to print a color document in black and white. This option is useful for printing color documents that will be photocopied or faxed. The product uses the monochrome mode, which reduces use of the color cartridges.
Manual color adjustment

Manually set the color options to adjust the neutral-gray color treatment, halftones, and edge enhancements for text, graphics, and photographs. To open the manual color adjustment options, follow one of these procedures:

- **Windows**: From the Color tab, click the HP EasyColor check box to clear it, click the Manual button, and then click the Settings button.
- **Mac**: Open the Advanced menu, or select the appropriate tab with the Color/Quality Options tab. Click the HP EasyColor check box to clear it, and then enable the manual settings.

Manual color options

Use manual color options to adjust the Neutral Grays, Halftone, and Edge Control options for text, graphics, and photographs.

### Table 9-1 Manual color options

<table>
<thead>
<tr>
<th>Setting description</th>
<th>Setting options</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Halftone</strong></td>
<td></td>
</tr>
<tr>
<td>Halftone options</td>
<td>Smooth provides better results for large, solid-filled print areas and enhances photographs by smoothing color gradations. Select this option when uniform and smooth area fills are the top priority.</td>
</tr>
<tr>
<td></td>
<td>Detail is useful for text and graphics that require sharp distinctions among lines or colors, or images that contain a pattern or a high level of detail. Select this option when sharp edges and details are the top priority.</td>
</tr>
<tr>
<td><strong>Neutral Grays</strong></td>
<td></td>
</tr>
<tr>
<td>The Neutral Grays</td>
<td>Black Only generates neutral colors (grays and black) by using only black toner. This guarantees neutral colors without a color cast. This setting is best for documents and grayscale viewgraphs.</td>
</tr>
<tr>
<td>setting determines the method for creating gray colors used in text, graphics, and photographs.</td>
<td>4-Color generates neutral colors (grays and black) by combining all four toner colors. This method produces smoother gradients and transitions to other colors, and it produces the darkest black.</td>
</tr>
<tr>
<td><strong>Edge Control</strong></td>
<td></td>
</tr>
<tr>
<td>The Edge Control</td>
<td>Maximum is the most aggressive trapping setting. Adaptive halftoning is on.</td>
</tr>
<tr>
<td>setting determines how edges are rendered. Edge control has two components: adaptive halftoning and trapping. Adaptive halftoning increases edge sharpness. Trapping reduces the effect of color-plane misregistration by overlapping the edges of adjacent objects slightly.</td>
<td>Normal sets trapping at a medium level. Adaptive halftoning is on.</td>
</tr>
<tr>
<td></td>
<td>Light sets trapping at a minimal level. Adaptive halftoning is on.</td>
</tr>
<tr>
<td></td>
<td>Off turns off both trapping and adaptive halftoning.</td>
</tr>
</tbody>
</table>
Use the HP EasyColor option

If you are using the HP PCL 6 printer driver for Windows, the **HP EasyColor** technology automatically improves mixed-content documents that are printed from Microsoft Office programs. This technology scans documents and automatically adjusts photographic images in JPEG or .PNG format. **HP EasyColor** technology enhances the entire image at one time, rather than dividing it into several pieces, which results in improved color consistency, sharper details, and faster printing.

If you are using the HP Postscript printer driver for Mac, **HP EasyColor** technology scans all documents and automatically adjusts all photographic images with the same improved photographic results.

In the following example, the images on the left were created without using the **HP EasyColor** option. The images on the right show the enhancements that result from using the **HP EasyColor** option.

The **HP EasyColor** option is enabled by default in both the HP PCL 6 printer driver and the HP Mac Postscript printer driver, so you do not need to make manual color adjustments. To disable the option so you can manually adjust the color settings, open the **Color** tab in the Windows driver or the **Color/Quality Options** tab in the Mac driver, and then click the **HP EasyColor** check box to clear it.
Match colors

The process of matching product output color to your computer screen is quite complex, because printers and computer monitors use different methods of producing color. Monitors display colors by light pixels using an RGB (red, green, blue) color process, but printers print colors using a CMYK (cyan, magenta, yellow, and black) process.

Several factors can influence your ability to match printed colors to those on your monitor. These factors include:

- Paper
- Printer colorants (inks or toners for example)
- Printing process (inkjet, press, or laser technology for example)
- Overhead lighting
- Personal differences in perception of color
- Software programs
- Printer drivers
- Computer operating system
- Monitors and monitor settings
- Video cards and drivers
- Operating environment (humidity for example)

Keep the above factors in mind when colors on your screen do not perfectly match your printed colors. For most users, the best method for matching colors on your screen to your product is to print sRGB colors.

Sample book color matching

The process for matching product output to preprinted sample books and standard color references is complex. In general, you can obtain a reasonably good match to a sample book if the inks used to create the sample book are cyan, magenta, yellow, and black. These are usually referred to as process color sample books.

Some sample books are created from spot colors. Spot colors are specially created colorants. Many of these spot colors are outside of the range of the product. Most spot color sample books have companion process sample books that provide CMYK approximations to the spot color.

Most process sample books will state which process standards were used to print the sample book. In most cases they will be SWOP, EURO, or DIC. To get optimal color matching to the process sample book, select the corresponding ink emulation from the product menu. If you cannot identify the process standard, use SWOP ink emulation.
Print color samples

To use the color samples, select the color sample that is the closest match to the desired color. Use the sample’s color value in your software program to describe the object you wish to match. Colors might vary depending on paper type and the software program used. For more details on how to use the color samples, go to www.hp.com/support/cljcp5525.

Use the following procedure to print color samples at the product using the control panel:

1. Press the Home button.
2. Press the down arrow ▼ to highlight the Administration menu, and press the OK button.
3. Press the down arrow ▼ to highlight the Reports menu, and press the OK button.
4. Press the down arrow ▼ to highlight the Other Pages menu, and press the OK button.
5. Press the down arrow ▼ to highlight either the RGB Samples or the Print CMYK Values option, and press the OK button.

PANTONE® color matching

PANTONE has multiple color matching systems. PANTONE MATCHING SYSTEM® is very popular and uses solid inks to generate a wide range of color hues and tints. See www.hp.com/support/cljcp5525 for details on how to use PANTONE Colors with this product.

**NOTE:** PANTONE Colors generated might not match PANTONE-identified standards. Consult current PANTONE Publications for accurate color.
Advanced color use

The product provides automatic color features that generate excellent color results. Carefully designed and tested color tables provide smooth, accurate color rendition of all printable colors.

The product also provides sophisticated tools for the experienced professional.

HP ColorSphere toner

HP designs the print system (printer, print cartridges, toner, and paper) to work together to optimize print quality, product reliability, and user productivity. Original HP print cartridges contain HP ColorSphere toner that is specifically matched to your printer so that it will produce a wide range of brilliant colors. This helps you create professional looking documents that contain sharp, clear text and graphics and realistic printed photos.

HP ColorSphere toner produces print-quality consistency and intensity you can depend on across a wide range of papers. You can produce documents that help you make the right impression. Plus, HP professional-quality everyday and specialty papers (including a wide variety of HP media types and weights) are designed for the way you work.

HP ImageREt 3600

HP ImageREt 3600 print technology is a system of innovative technologies developed exclusively by HP to deliver superior print quality. The HP ImageREt system sets itself apart from the industry by integrating technology advancements and optimizing each element of the print system. Several categories of HP ImageREt have been developed for a variety of user needs.

The system’s foundation is composed of key color laser technologies, including image enhancements, smart supplies, and high-resolution imaging. As the level or category of ImageREt increases, these core technologies are refined for more advanced system usage, and additional technologies are integrated. HP offers superior image enhancements for general office documents and marketing collateral. Optimized for printing on HP color laser high-gloss papers, HP Image REt 3600 provides superior results on all supported media, and under a variety of environmental conditions.

Paper selection

For the best color and image quality, select the appropriate paper type from the control panel menu or from the printer driver.

Color options

Color options automatically provide optimal color output. These options use object tagging, which provides optimal color and halftone settings for different objects (text, graphics, and photos) on a page. The printer driver determines which objects appear on a page and uses halftone and color settings that provide the best print quality for each object.

In the Windows environment, the Automatic and Manual color options are on the Color tab in the printer driver.
Standard red-green-blue (sRGB)

Standard red-green-blue (sRGB) is a worldwide color standard that HP and Microsoft developed as a common color language for monitors, input devices (scanners and digital cameras), and output devices (printers and plotters). It is the default color space used for HP products, Microsoft operating systems, the World Wide Web, and most office software. The sRGB standard represents the typical Windows monitor and is the convergence standard for high-definition television.

NOTE: Factors such as the type of monitor you use and the room lighting can affect the appearance of colors on your screen. For more information, see Match colors on page 157.

The latest versions of Adobe PhotoShop®, CorelDRAW®, Microsoft Office, and many other programs use sRGB to communicate color. Because it is the default color space in Microsoft operating systems, sRGB has been adopted broadly. When programs and devices use sRGB to exchange color information, typical users experience greatly improved color matching.

The sRGB standard improves your ability to match colors between the product, the computer monitor, and other input devices automatically, and eliminates the need to become a color expert.
10 Manage and maintain

- Print information pages
- Use the HP Embedded Web Server
- Use HP Web Jetadmin software
- Product security features
- Economy settings
- Install external I/O cards
- Clean the product
- Product updates
Print information pages

Information pages provide details about the product and its current configuration. Use the following procedures to print commonly used information pages:

Print the menu map

The menu map report presents the entire structure of the Administration menu so you can identify how to navigate to any option.

1. At the control panel, press the Home button.
2. Open the following menus:
   1. Administration
   2. Reports
   3. Configuration/Status Pages
3. Use the down arrow button ▼ to highlight the Administration Menu Map item, and then press the OK button to select it.
4. Use the up arrow button ▲ to highlight the Print item, and then press the OK button.

Print the configuration report

The configuration report lists the current product settings and installed options. Use this report to find the product IP address or host name, the current firmware version, and information about network protocols.

1. At the control panel, press the Home button.
2. Open the following menus:
   1. Administration
   2. Reports
   3. Configuration/Status Pages
3. Use the down arrow button ▼ to highlight the Configuration Page item, and then press the OK button to select it.
4. Use the up arrow button ▲ to highlight the Print item, and then press the OK button. The report consists of several pages.

NOTE: The product IP address or host name is listed on the HP Jetdirect page.
Use the HP Embedded Web Server

Use the HP Embedded Web Server to view product status, configure product network settings, and to manage printing functions from your computer instead of from the product control panel. The following are examples of what you can do using the HP Embedded Web Server:

- View product status information.
- Determine the remaining life for all supplies and order new ones.
- View and change tray configurations.
- View and change the product control-panel menu configuration.
- View and print internal pages.
- Receive notification of product and supplies events.
- View and change network configuration.

To use the HP Embedded Web Server, you must have Microsoft Internet Explorer 5.01 or later or Netscape 6.2 or later for Windows, Mac OS, and Linux (Netscape only). Netscape Navigator 4.7 is required for HP-UX 10 and HP-UX 11. The HP Embedded Web Server works when the product is connected to an IP-based network. The HP Embedded Web Server does not support IPX-based product connections. You do not have to have Internet access to open and use the HP Embedded Web Server.

When the product is connected to the network, the HP Embedded Web Server is automatically available.

**NOTE:** For complete information about using the HP Embedded Web Server, see the HP Embedded Web Server User Guide, which is on the HP website at www.hp.com/support/cljcp5525.

Open the HP Embedded Web Server by using a network connection

1. Identify the product IP address or host name.
   - Open the following menus:
     1. Administration
     2. Reports
     3. Configuration/Status Pages

2. Use the down arrow button ▼ to highlight the Configuration Page item, and then press the OK button.

3. Use the up arrow button ▲ to highlight the Print item, and then press the OK button.

4. Locate the IP address or host name on the HP Jetdirect page.

5. In a supported Web browser on your computer, type the product IP address or host name in the address/URL field.

Print tab

Use the Print tab to enable or disable walk-up USB printing. Jobs printed from USB will use the default print settings. The following file types are supported for walk-up USB printing:

- .pdf
- .prn
- .pcl
- .ps
- .cht

Use HP Web Jetadmin software

HP Web Jetadmin is a Web-based software solution for remotely installing, monitoring, and troubleshooting network-connected peripherals. Management is proactive, allowing network administrators the ability to resolve issues before users are affected. Download this free, enhanced-management software at www.hp.com/go/webjetadmin.

Device plug-ins can be installed into HP Web Jetadmin to provide support for specific product features. The HP Web Jetadmin software can automatically notify you when new plug-ins are available. On the Product Update page, follow the directions to automatically connect to the HP Web site and install the latest device plug-ins for your product.

**NOTE:** Browsers must be Java™-enabled. Browsing from an Apple PC is not supported.
Product security features

Security statements

The product supports security standards and recommended protocols that help you keep the product secure, protect critical information on your network, and simplify the way you monitor and maintain the product.

For in-depth information about HP’s secure imaging and printing solutions, visit www.hp.com/go/secureprinting. The site provides links to white papers and FAQ documents about security features.

IP Security

IP Security (IPsec) is a set of protocols that control IP-based network traffic to and from the product. IPsec provides host-to-host authentication, data integrity, and encryption of network communications.

For products that are connected to the network and have an HP Jetdirect print server, you can configure IPsec by using the Networking tab in the HP Embedded Web Server.

Secure the HP Embedded Web Server

Assign an administrator password for access to the product and the HP Embedded Web Server so that unauthorized users cannot change the product settings.

1. Open the HP Embedded Web Server by entering the product IP address into the address line of a Web browser.
2. Click the Security tab.
3. Open the General Security menu.
4. In the Username field, type the name to associate with the password.
5. Type the password in the New Password box, and then type it again in the Verify password box.

**NOTE:** If you are changing an existing password, you must first type the existing password in the Old Password field.
6. Click the Apply button. Make note of the password and store it in a safe place.

Encryption support: HP Encrypted High Performance Hard Disks

This product includes an encrypted hard disk (standard for the HP Color LaserJet CP5525xh; optional on other models). This hard disk provides hardware-based encryption so you can securely store sensitive print, copy, and scan data without impacting product performance. This hard disk uses the latest Advanced Encryption Standard (AES) and has versatile time-saving features and robust functionality.

Use the Security menu in the HP Embedded Web Server to configure the disk.
For more information about the encrypted hard disk, see the *HP High-Performance Secure Hard Disk Setup Guide*.

2. Type *Secure Hard Disk* into the search box and click the >> button.
3. Click the *HP Secure High Performance Hard Disk Drive* link.
4. Click the *Manuals* link.

**Secure stored jobs**

You can protect jobs that are stored on the product by assigning a PIN to them. Anyone who tries to print these protected jobs must first enter the PIN at the product control panel.

**Lock the control panel menus**

You can lock various features on the control panel by using the HP Embedded Web Server.

1. Open the HP Embedded Web Server by entering the product IP address into the address line of a Web browser.
2. Click the the *Security* tab.
3. Open the *Access Control* menu.
4. In the *Sign In and Permission Policies* area, select which types of users have permission for each of the features.
5. Click the *Apply* button.

**Lock the formatter**

The formatter area, on the back of the product, has a slot that you can use to attach a security cable. Locking the formatter prevents someone from removing valuable components from it.
Economy settings

Optimize speed or energy usage

The optimum speed or energy usage feature controls the fuser cool down behavior. The following settings are available:

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Faster First Page</td>
<td>The fuser maintains power and the first page processes faster for any new job that is sent to the product.</td>
</tr>
<tr>
<td>Save Energy</td>
<td>The fuser reduces power when it is idle.</td>
</tr>
<tr>
<td>Save More Energy</td>
<td>The fuser reduces power when it is idle. The fuser reduces more power than the Save Energy setting.</td>
</tr>
<tr>
<td>Save Most Energy</td>
<td>The fuser is turned-off and it gradually cools to room temperature. The Save Most Energy setting takes the longest time to print the first page.</td>
</tr>
</tbody>
</table>

Complete the following steps to optimize the product for speed or energy usage:

1. Press the Home button.
2. Press the down arrow to highlight the Administration menu, and then press the OK button.
3. Press the down arrow to highlight the General Settings menu, and then press the OK button.
4. Press the down arrow to highlight the Energy Settings menu, and then press the OK button.
5. Press the down arrow to highlight the Optimum Speed/Energy Usage menu, and then press the OK button.
6. Select the appropriate option, and then press the OK button.

Power-saving modes

The adjustable sleep mode feature reduces power consumption when the product has been inactive for an extended period. You can set the length of time before the product enters sleep mode.

**NOTE:** This mode does not affect product warm-up time.

Set sleep mode

1. Press the Home button.
2. Press the down arrow to highlight the Administration menu, and then press the OK button.
3. Press the down arrow to highlight the Display Settings menu, and then press the OK button.
4. Press the down arrow to highlight the Sleep Mode menu, and then press the OK button.
5. Press the down arrow to highlight the appropriate setting, and then press the OK button.
Set sleep delay

1. Press the Home button.
2. Press the down arrow ▼ to highlight the Administration menu, and then press the OK button.
3. Press the down arrow ▼ to highlight the General Settings menu, and then press the OK button.
4. Press the down arrow ▼ to highlight the Energy Settings menu, and then press the OK button.
5. Press the down arrow ▼ to highlight the Sleep Delay menu, and then press the OK button.
6. Press the up or down arrow ▲/▼ to select the appropriate time period, and then press the OK button.

Wake time

The wake time feature allows you to instruct the product to wake at a certain time on selected days, to eliminate waiting for the warm-up and calibration periods. You must have the Sleep Mode setting on to set the wake time.

**NOTE:** Make sure that the real-time clock is set to the correct date and time before you set the wake time.

Set the real-time clock

Use the real-time clock feature to set the date and time settings. The date and time information is attached to stored print jobs, so you can identify the most recent versions.

<table>
<thead>
<tr>
<th>Open the Date/Time Settings menu</th>
<th>Press the Home button.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Press the down arrow ▼ to highlight the Administration menu, and then press the OK button.</td>
<td></td>

<tbody>
<tr>
<td>2. Press the up arrow or down arrow ▲/▼ to select the year, month, and day. Press the OK button after each selection.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Set the date format</th>
<th>Open the Date/Time Format menu, and then select the Date Format menu.</th>
</tr>
</thead>
<tbody>
<tr>
<td>2. Press the up arrow or down arrow ▲/▼ to select the date format, and then press the OK button.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Set the time</th>
<th>Open the Date/Time menu, and then select the Time menu.</th>
</tr>
</thead>
<tbody>
<tr>
<td>2. Press the up arrow or down arrow ▲/▼ to select the hour, minute, and AM/PM setting. Press the OK button after each selection.</td>
<td></td>
</tr>
</tbody>
</table>
Set the time format

1. Open the **Date/Time Format** menu, and then select the **Time Format** menu.
2. Press the up arrow or down arrow ▲/▼ to select the time format, and then press the **OK** button.

Set the time zone

1. Open the **Date/Time** menu, and then select the **Time Zone** menu.
2. Press the up arrow or down arrow ▲/▼ to select the time zone, and then press the **OK** button.

**Set the wake time**

1. Press the Home button  
2. Press the down arrow ▼ to highlight the **Administration** menu, and then press the **OK** button.
3. Press the down arrow ▼ to highlight the **General Settings** menu, and then press the **OK** button.
4. Press the down arrow ▼ to highlight the **Energy Settings** menu, and then press the **OK** button.
5. Press the down arrow ▼ to highlight an existing sleep mode delay or add an event, and then press the **OK** button.
Install external I/O cards

This product is equipped with an external I/O (EIO) slot. You can install an additional HP Jetdirect print server card or external EIO hard drive in the available EIO slot.

NOTE: This example shows installing an HP Jetdirect print server card.

1. Turn the product off.

2. Disconnect all power and interface cables.

NOTE: This illustration might not show all the cables.
3. Loosen and remove the two retaining screws holding the cover for the EIO slot, and then remove the cover. You will not need these screws and the cover again. They can be discarded.

4. Firmly insert the HP Jetdirect print server card or other EIO accessory into the EIO slot.

5. Insert and tighten the retaining screws that came with the print server card.
6. Reconnect the power cable, connect the interface cable to the HP Jetdirect print server card, and turn the product on.

7. Print a configuration page. An HP Jetdirect configuration page that contains network configuration and status information should also print.

   If it does not print, turn the product off, and then uninstall and reinstall the print server card to ensure that it is completely seated in the slot.

8. Perform one of these steps:
   - Choose the correct port. See the computer or operating system documentation for instructions.
   - Reinstall the software, choosing the network installation this time.

**Clean the product**

Over time, particles of toner and paper accumulate inside the product. This can cause print-quality problems during printing. Cleaning the product eliminates or reduces these problems.

Clean the paper path and print-cartridge areas every time that you change the print cartridge or whenever print-quality problems occur. As much as possible, keep the product free from dust and debris.

To clean the product exterior, use a soft, water-moistened cloth.

**Clean the paper path**

1. At the product control panel, press the Home button ⍞.

2. Open the following menus:
   1. **Device Maintenance**
   2. **Calibration/Cleaning**
3. Press the down arrow ▼ to highlight the **Print Cleaning Page** menu item, and then press the **OK** button.

4. Completion of the cleaning process depends on the product model:

   - **Non-duplex models**: After the first side prints, reload the page into Tray 1 according the instructions, and then press the **OK** button. After the second side prints, the task is complete. Discard the printed page.

   - **Duplex models**: After both sides print, the task is complete. Discard the printed page.

**Product updates**

To download the most recent firmware upgrade for the product, go to [www.hp.com/support/cljcp5525](http://www.hp.com/support/cljcp5525) or [www.hp.com/go/cljcp5525_firmware](http://www.hp.com/go/cljcp5525_firmware).

## Self help

In addition to the information in this guide, other sources are available that provide helpful information.

| Printable poster for using the product control panel | This poster is available on the product CD. It prints on four full-color pages that you can post near the product. It contains information on using the buttons and other features available on the product control panel. |
| Quick Reference Topics | Several Quick Reference Topics for this product are available at this website: [www.hp.com/support/cljcp5525](http://www.hp.com/support/cljcp5525). You can print these topics and keep them near the product. They are a handy reference for procedures that you perform frequently. |
| Quick Reference Guide | This guide contains procedures for the most commonly used product functions. The guide is available from this website: [www.hp.com/support/cljcp5525](http://www.hp.com/support/cljcp5525). You can print this guide and keep it near the product. |
| Control panel help | The control panel has built-in help that guides you through several tasks, such as replacing print cartridges and clearing jams. |
Solve general problems

If the product is not responding correctly, complete the steps in the following checklist, in order. If the
product does not pass a step, follow the corresponding troubleshooting suggestions. If a step resolves
the problem, you can stop without performing the other steps on the checklist.

Troubleshooting checklist

1. Make sure that the product Ready light is on. If no lights are on, complete these steps:
   a. Check the power-cable connections.
   b. Check that the power is turned on.
   c. Make sure that the line voltage is correct for the product power configuration. (See the label
      that is on the back of the product for voltage requirements.) If you are using a power strip
      and its voltage is not within specifications, plug the product directly into the wall. If it is
      already plugged into the wall, try a different outlet.
   d. If none of these measures restores power, contact HP Customer Care.

2. Check the cabling.
   a. Check the cable connection between the product and the computer or network port. Make
      sure that the connection is secure.
   b. Make sure that the cable itself is not faulty by using a different cable, if possible.
   c. Check the network connection.

3. Check to see if any messages appear on the control-panel display. If any error messages appear,
   see Interpret control-panel messages on page 181.

4. Ensure that the paper that you are using meets specifications.

5. Print a configuration page. See Print information pages on page 162. If the product is connected
to a network, an HP Jetdirect page also prints.
   a. If the pages do not print, check that at least one tray contains paper.
   b. If the page jams in the product, see Clear jams on page 182.

6. If the configuration page prints, check the following items:
   a. If the page does not print correctly, the problem is with the product hardware. Contact
      HP Customer Care.
   b. If the page prints correctly, then the product hardware is working. The problem is with the
      computer you are using, with the printer driver, or with the program.

7. Select one of the following options:
   - **Windows**: Click Start, click Settings, and then click Printers or Printers and Faxes.
     Double-click the name of the product.
   - **or-**
**Mac OS X**: Open the **Printer Setup Utility** or the **Print & Fax** list, and double-click the line for the product.

8. Verify that you have installed the printer driver for this product. Check the program to make sure that you are using the printer driver for this product.

9. Print a short document from a different program that has worked in the past. If this solution works, then the problem is with the program you are using. If this solution does not work (the document does not print), complete these steps:
   a. Try printing the job from another computer that has the product software installed.
   b. If you connected the product to the network, connect the product directly to a computer with a USB cable. Redirect the product to the correct port, or reinstall the software, selecting the new connection type that you are using.

**Factors that affect product performance**

Several factors affect the time it takes to print a job:

- Maximum product speed, measured in pages per minute (ppm)
- The use of special paper (such as transparencies, heavy paper, and custom-size paper)
- Product processing and download time
- The complexity and size of graphics
- The speed of the computer you are using
- The USB connection
- The printer I/O configuration
- The network operating system and configuration (if applicable)
- The printer driver that you are using

**Restore factory settings**

Use the control panel menus to restore factory settings.

1. At the product control panel, press the Home button ө.
2. Press the down arrow ▼ to highlight the **Administration** menu, and then press the OK button.
3. Press the down arrow ▼ to highlight the **General Settings** menu, and then press the OK button.
4. Press the down arrow ▼ to highlight the **Restore Factory Settings** option, and then press the OK button to reset the product to the original factory settings.
Interpret control-panel messages

Control-panel message types

Four types of control-panel messages can indicate the status of or problems with the product.

<table>
<thead>
<tr>
<th>Message type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Status messages</td>
<td>Status messages reflect the current state of the product. They inform you of normal product operation and require no interaction to clear them. They change as the state of the product changes. Whenever the product is ready, not busy, and has no pending warning messages, the <strong>Ready</strong> status message appears if the product is online.</td>
</tr>
<tr>
<td>Warning messages</td>
<td>Warning messages inform you of data and print errors. These messages typically alternate with the <strong>Ready</strong> or status messages and remain until you press the <strong>OK</strong> button. Some warning messages are clearable. If the <strong>Clearable Warnings</strong> menu in the <strong>Display Settings</strong> menu is set to the <strong>Job</strong> option, the next print job clears these messages.</td>
</tr>
<tr>
<td>Error messages</td>
<td>Error messages communicate that some action must be performed, such as adding paper or clearing a jam. Some error messages are auto-continuable. If the <strong>Continuable Events</strong> menu in the <strong>Display Settings</strong> menu is set to the <strong>Auto continue (10 seconds)</strong> option, the product continues normal operation after an auto-continuable error message appears for 10 seconds. <strong>NOTE:</strong> Pressing any button during the 10-second auto-continuable error message overrides the auto-continue feature, and the button function takes precedence. For example, pressing the Stop button pauses printing and offers the option to cancel the print job.</td>
</tr>
<tr>
<td>Critical-error messages</td>
<td>Critical error messages inform you of a product failure. You can clear some of these messages by turning the product off and then on. These messages are not affected by the <strong>Auto continue (10 seconds)</strong> setting. If a critical error persists, service is required.</td>
</tr>
</tbody>
</table>

Control-panel messages

The product provides robust control panel messaging. When a message appears on the control panel, follow the on-screen instructions to resolve the issue. If the product displays an “Error” or “Attention” message, and no steps are shown to resolve the issue, turn the product off then on. Contact HP support if you continue to experience issues with the product.

For additional information on a variety of topics, press the Help button on the control panel.
## Clear jams

### Prevent jams

#### Common causes of jams

<table>
<thead>
<tr>
<th>Cause</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The paper length and width guides are not adjusted correctly.</td>
<td>Adjust the guides so they are against the paper stack.</td>
</tr>
<tr>
<td>The media does not meet specifications.</td>
<td>Use only media that meets HP specifications. See <em>Paper and print media on page 71.</em></td>
</tr>
<tr>
<td>You are using media that has already passed through a printer or copier.</td>
<td>Do not use media that has been previously printed on or copied.</td>
</tr>
<tr>
<td>An input tray is loaded incorrectly.</td>
<td>Remove any excess media from the input tray. Make sure that the stack is below the maximum stack height mark in the tray. See <em>Load paper trays on page 80.</em></td>
</tr>
<tr>
<td>The media is skewed.</td>
<td>The input-tray guides are not adjusted correctly. Adjust them so that they hold the stack firmly in place without bending it.</td>
</tr>
<tr>
<td>The media is binding or sticking together.</td>
<td>Remove the media, flex it, rotate it 180 degrees, or flip it over. Reload the media into the input tray.</td>
</tr>
<tr>
<td><strong>NOTE:</strong> Do not fan paper. Fanning can create static electricity, which can cause paper to stick together.</td>
<td></td>
</tr>
<tr>
<td>The media is removed before it settles into the output bin.</td>
<td>Wait until the page completely settles in the output bin before removing it.</td>
</tr>
<tr>
<td>The paper is too heavy.</td>
<td>Do not use paper that exceeds the supported weights for the input tray. See <em>Supported paper types and tray capacity on page 78.</em></td>
</tr>
<tr>
<td><strong>NOTE:</strong> Do not use paper that exceeds the supported weight for automatic duplex printing. See <em>Supported paper sizes for duplex printing on page 77.</em></td>
<td></td>
</tr>
<tr>
<td>The media is in poor condition.</td>
<td>Replace the media.</td>
</tr>
<tr>
<td>The internal rollers from the tray are not picking up the media.</td>
<td>Remove the top sheet of media. If the media is too heavy, it might not be picked from the tray. See <em>Supported paper types and tray capacity on page 78.</em></td>
</tr>
<tr>
<td>The media has rough or jagged edges.</td>
<td>Replace the media.</td>
</tr>
<tr>
<td>The media is perforated or embossed.</td>
<td>Perforated or embossed media does not separate easily. Load sheets one at a time.</td>
</tr>
<tr>
<td>Paper was not stored correctly.</td>
<td>Replace the paper in the trays. Paper should be stored in the original packaging in a controlled environment.</td>
</tr>
</tbody>
</table>

1 If the product continues to jam, contact HP Customer Support or your authorized HP service provider.
**Jam locations**

Use this illustration to identify locations of jams. In addition, instructions appear on the control panel to direct you to the location of jammed paper and how to clear it.

**NOTE:** Internal areas of the product that might need to be opened to clear jams have green handles or green labels.

**Figure 11-1** Jam locations

<table>
<thead>
<tr>
<th></th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Output bin</td>
</tr>
<tr>
<td>2</td>
<td>Upper right door</td>
</tr>
<tr>
<td>3</td>
<td>Tray 1 area</td>
</tr>
<tr>
<td>4</td>
<td>Tray 2, Tray 3, and optional Trays 4, 5, and 6</td>

</tbody>
</table>

⚠️ **WARNING!** To avoid electrical shock, remove any necklaces, bracelets, or other metal items before reaching into the inside of the product.
Clear jams in the upper right door

⚠️ **WARNING!** The fuser can be hot while the product is in use. Wait for the fuser to cool before handling it.

1. Open the upper right door.

2. Gently pull the paper out of the pickup area.
3. If paper is visible entering the bottom of the fuser, gently pull downward to remove it.

   **CAUTION:** Do not touch the transfer roller (callout 1). Contaminants on the roller can affect print quality.

4. Paper could be jammed inside the fuser where it would not be visible. Open the fuser jam access door. If paper is jammed inside the fuser, gently pull it straight up to remove it. If the paper tears, remove all paper fragments.

   **WARNING!** Even if the body of the fuser has cooled, the rollers that are inside could still be hot. Do not touch the fuser rollers until they have cooled.

   If no paper is found but the product still reports a jam, remove the fuser to check for jammed paper inside the fuser cavity. Remove any paper, and then reinstall the fuser.

   **NOTE:** Make sure that the fuser is reinstalled correctly before closing the upper right door.

5. Close the upper right door.
Clear jams in the lower right door

1. Open the lower right door.

2. If paper is visible, gently pull the jammed paper up or down to remove it.

3. Close the lower right door.
Clear jams in Tray 1

1. If jammed paper is visible in Tray 1, clear the jam by gently pulling the paper straight out. Touch the OK button to clear the message.

2. If you cannot remove the paper, or if no jammed paper is visible in Tray 1, close Tray 1 and open the upper right door.
3. Gently pull the paper out of the pick up area.

4. Close the upper right door.
Clear jams from Tray 2, Tray 3, or an optional tray

⚠️ **CAUTION:** Opening a tray when paper is jammed can cause the paper to tear and leave pieces of paper in the tray, which might cause another jam. Be sure to clear jams from the upper and lower right door before opening a tray.

1. Open the tray and make sure that the paper is stacked correctly. Remove any jammed or damaged sheets of paper. To access jammed paper from the tray cavity, remove the tray from the product.

2. Close the tray.

3. If the jam is in Tray 3, you also can open the door on the right side of the tray, remove the jammed paper, and then close the door.
Clear jams in the output bin area

1. If paper is visible from the output bin, grasp the leading edge and remove it.
Change jam recovery

This product provides a jam recovery feature that reprints jammed pages.

1. Press the Home button.

2. Press the down arrow to highlight the Administration menu, and then press the OK button.

3. Press the down arrow to highlight the General Settings menu, and then press the OK button.

4. Press the down arrow to highlight the Jam Recovery menu, and then press the OK button.

5. Press the down arrow or up arrow to highlight the appropriate setting, and then press the OK button. The following options are available:

   - **Auto** — The product attempts to reprint jammed pages when sufficient memory is available. This is the default setting.
   - **Off** — The product does not attempt to reprint jammed pages. Because no memory is used to store the most recent pages, performance is optimal.

   **CAUTION:** When using this option, if the product runs out of paper and the job is being printed on both sides, some pages can be lost.

   - **On** — The product always reprints jammed pages. Additional memory is allocated to store the last few pages printed. This might cause overall performance to suffer.

6. Press the Home button to return to the Ready state.
<table>
<thead>
<tr>
<th>Cause</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Manual feed is selected in the software program.</td>
<td>Load Tray 1 with paper, or, if the paper is loaded, press the OK button.</td>

Improve print quality

You can prevent most print-quality problems by following these guidelines.

● Use the correct paper type setting in the printer driver.
● Use paper that meets HP specifications for this product.
● Clean the product as necessary.
● Replace print cartridges when they are reaching the end of their estimated life and print quality is no longer acceptable.
● Use the printer driver that best meets your printing needs.

Select a paper type

1. Open the printer driver, click the Properties or Preferences button, and then click the Paper/Quality tab.
2. Select a type from the Type is drop-down list.
3. Click the OK button.

Use paper that meets HP specifications

Use different paper if you are having any of the following problems:

● The printing is too light or seems faded in areas.
● Specks of toner are on the printed pages.
● Toner is smearing on the printed pages.
● Printed characters seem misformed.
● Printed pages are curled.

Always use a paper type and weight that this product supports. In addition, follow these guidelines when selecting paper:

● Use paper that is of good quality and free of cuts, nicks, tears, spots, loose particles, dust, wrinkles, voids, staples, and curled or bent edges.
● Use paper that has not been previously printed on.
● Use paper that is designed for use in laser printers. Do not use paper that is designed only for use in Inkjet printers.
● Use paper that is not too rough. Using smoother paper generally results in better print quality.
Print a cleaning page

Print a cleaning page to remove dust and excess toner from the paper path if you are having any of the following problems:

- Specks of toner are on the printed pages.
- Toner is smearing on the printed pages.
- Repeated marks occur on the printed pages.

Use the following procedure to print a cleaning page.

1. At the product control panel, press the Home button.
2. Open the following menus:
   1. **Device Maintenance**
   2. **Calibration/Cleaning**
3. Press the down arrow to highlight the **Print Cleaning Page** menu item, and then press the OK button.
4. Completion of the cleaning process depends on the product model:
   - **Non-duplex models**: After the first side prints, reload the page into Tray 1 according the instructions, and then press the OK button. After the second side prints, the task is complete. Discard the printed page.
   - **Duplex models**: After both sides print, the task is complete. Discard the printed page.

Calibrate the product

Calibration is a product function that optimizes print quality. If you experience any image-quality problems, calibrate the product.

1. Press the Home button.
2. Press the down arrow to highlight the **Device Maintenance** menu, and then press the OK button.
3. Press the down arrow to highlight the **Calibration/Cleaning** menu, and then press the OK button.
4. Press the down arrow to highlight the **Full Calibration** setting, and then press the OK button.

Set the image registration

If you are having problems with text aligning on the page, use the **Set Registration** menu to set the image registration.

1. Press the Home button.
2. Press the down arrow to highlight the **Administration** menu, and then press the OK button.
3. Press the down arrow ▼ to highlight the General Settings menu, and then press the OK button.

4. Press the down arrow ▼ to highlight the Print Quality menu, and then press the OK button.

5. Press the down arrow ▼ to highlight the Image Registration menu, and then press the OK button.

6. Press the down arrow ▼ to highlight the Adjust Tray <X> menu for the tray that you want to adjust, and then press the OK button.

7. Press the down arrow ▼ to highlight the Print Test Page setting, and then press the OK button.

8. Follow the instructions on the test page to complete the adjustment.

Internal print-quality test pages

Use the built-in print-quality troubleshooting pages to help diagnose and solve print-quality problems.

1. Press the Home button ▼.

2. Open the following menus:
   1. Troubleshooting
   2. Print Quality Pages

3. Press the down arrow ▼ to highlight the Print PQ Troubleshooting Pages item, and then press the OK button to print the pages.

   The product returns to the Ready state after printing the print-quality troubleshooting pages. Follow the instructions on the pages that print out.

Check the print cartridge

Check each print cartridge, and replace it if necessary, if you are having any of the following problems:

- The printing is too light or seems faded in areas.
- Printed pages have small unprinted areas.
- Printed pages have streaks or bands.

**NOTE:** If you are using a draft or EconoMode print setting, the printing might appear light.

If you determine that you need to replace a print cartridge, print the supplies status page to find the part number for the correct genuine HP print cartridge.
<table>
<thead>
<tr>
<th>Type of print cartridge</th>
<th>Steps to resolve the problem</th>
</tr>
</thead>
<tbody>
<tr>
<td>Refilled or remanufactured print cartridge</td>
<td>Hewlett-Packard Company cannot recommend the use of non-HP supplies, either new or remanufactured. Because they are not HP products, HP cannot influence their design or control their quality. If you are using a refilled or remanufactured print cartridge and are not satisfied with the print quality, replace the cartridge with a genuine HP cartridge that has the words “HP” or “Hewlett-Packard” on it, or has the HP logo on it.</td>
</tr>
</tbody>
</table>
| Genuine HP print cartridge | 1. The product control panel or the supplies status page indicates Very Low status when the cartridge has reached the end of its designated life. Replace the print cartridge if print quality is no longer acceptable.  
2. Visually inspect the print cartridge for damage. See the instructions that follow. Replace the print cartridge if necessary.  
3. If printed pages have marks that repeat several times at the same distance apart, print a cleaning page. If this does not solve the problem, use the repeating defects information in this document to identify the cause of the problem. |

**Use the printer driver that best meets your printing needs**

You might need to use a different printer driver if the printed page has unexpected lines in graphics, missing text, missing graphics, incorrect formatting, or substituted fonts.

**HP PCL 6 driver**
- Provided as the default driver. This driver is automatically installed unless you select a different one.
- Recommended for all Windows environments
- Provides the overall best speed, print quality, and product-feature support for most users
- Developed to align with the Windows Graphic Device Interface (GDI) for the best speed in Windows environments
- Might not be fully compatible with third-party and custom software programs that are based on PCL 5

**HP UPD PCL 6 driver**
- Recommended for all Windows environments
- Provides the overall best speed, print quality, and product-feature support for most users
- Developed to align with the Windows GDI for the best speed in Windows environments
- Might not be fully compatible with third-party and custom software programs that are based on PCL 5
**HP UPD PS driver**
- Recommended for printing with Adobe® software programs or with other highly graphics-intensive software programs
- Provides support for printing from postscript emulation needs, or for postscript flash font support

**HP UPD PCL 5**
- Recommended for general office printing in Windows environments
- Compatible with previous PCL versions and older HP LaserJet products
- The best choice for printing from third-party or custom software programs
- The best choice when operating with mixed environments, which require the product to be set to PCL 5 (UNIX®, Linux, mainframe)
- Designed for use in corporate Windows environments to provide a single driver for use with multiple printer models
- Preferred when printing to multiple printer models from a mobile Windows computer

Download additional printer drivers from this Web site: [www.hp.com/support/cljcp5525](http://www.hp.com/support/cljcp5525).

**Repetitive defects ruler**

If the print-quality issues repeat at regular intervals use the table below to identify the cause of the defect.

Place the top of a ruler at the first defect. The measurement that is beside the next occurrence of the defect indicates which component needs to be replaced.

Solve walk-up USB printing problems

- The Open From USB menu does not open when you insert the USB accessory
- The file does not print from the USB storage accessory
- The file that you want to print is not listed in the Open From USB menu

The Open From USB menu does not open when you insert the USB accessory

1. You might be using a USB storage accessory or a file system that this product does not support. Save the files on a standard USB storage accessory that uses File Allocation Table (FAT) file systems. The product supports FAT12, FAT16, and FAT32 USB storage accessories.

2. If another menu is already open, close that menu and then reinsert the USB storage accessory.

3. The USB storage accessory might have multiple partitions. (Some USB storage accessory manufacturers install software on the accessory that creates partitions, similar to a CD.) Reformat the USB storage accessory to remove the partitions, or use a different USB storage accessory.

4. The USB storage accessory might require more power than the product can provide.
   a. Remove the USB storage accessory.
   b. Turn the product off and then on.
   c. Use a USB storage accessory that has its own power supply or that requires less power.

5. The USB storage accessory might not be functioning correctly.
   a. Remove the USB storage accessory.
   b. Turn the product off and then on.
   c. Try printing from another USB storage accessory.

The file does not print from the USB storage accessory

1. Make sure that paper is in the tray.

2. Check the control panel for messages. If paper is jammed in the product, clear the jam.

The file that you want to print is not listed in the Open From USB menu

1. You might be trying to print a file type that the USB printing feature does not support. The product supports .pdf, .prn, .pcl, .ps, and .cht file types.

2. You might have too many files in a single folder on the USB storage accessory. Reduce the number of files in the folder by moving them to subfolders.

3. You might be using a character set for the file name that the product does not support. In this case, the product replaces the file names with characters from a different character set. Rename the files using ASCII characters.
Solve connectivity problems

Solve direct-connect problems

If you have connected the product directly to a computer, check the cable.

- Verify that the cable is connected to the computer and to the product.
- Verify that the cable is not longer than 2 m (6.5 ft). Replace the cable if necessary.
- Verify that the cable is working correctly by connecting it to another product. Replace the cable if necessary.

Solve network problems

Check the following items to verify that the product is communicating with the network. Before beginning, print a configuration page. See Print information pages on page 162.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Poor physical connection</td>
<td>Verify that the product is attached to the correct network port using a cable of the correct length.</td>
</tr>
<tr>
<td></td>
<td>Verify that cable connections are secure.</td>
</tr>
<tr>
<td></td>
<td>Look at the network port connection on the back of the product, and verify that the amber activity light and the green link-status light are lit.</td>
</tr>
<tr>
<td></td>
<td>If the problem continues, try a different cable or port on the hub.</td>
</tr>
<tr>
<td>The computer is unable to communicate with the product.</td>
<td>Use the command prompt to ping the product from your computer. For example: ping 192.168.45.39</td>
</tr>
<tr>
<td></td>
<td>Verify that the ping displays round-trip times, which indicates that it is working.</td>
</tr>
<tr>
<td></td>
<td>If the ping command failed, verify that the network hubs are on, and then verify that the network settings, the product, and the computer are all configured for the same network.</td>
</tr>
<tr>
<td>Incorrect link and duplex settings</td>
<td>Hewlett-Packard recommends leaving this setting in automatic mode (the default setting). See Link speed and duplex settings on page 69.</td>
</tr>
<tr>
<td>Incorrect IP address for the product on the computer</td>
<td>Use the correct IP address. The IP address is listed on the configuration page.</td>
</tr>
<tr>
<td></td>
<td>If the IP address is correct, delete the product and then add it again.</td>
</tr>
<tr>
<td>New software programs have caused compatibility problems.</td>
<td>Verify that any new software programs are correctly installed and that they use the correct printer driver.</td>
</tr>
<tr>
<td>Your computer or workstation is set up incorrectly.</td>
<td>Check the network drivers, printer drivers, and the network redirection.</td>
</tr>
<tr>
<td></td>
<td>Verify that the operating system is configured correctly.</td>
</tr>
<tr>
<td>The protocol is disabled, or other network settings are incorrect.</td>
<td>Review the configuration page to check the status of the protocol. Enable it if necessary.</td>
</tr>
<tr>
<td></td>
<td>Reconfigure the network settings if necessary. See Connect to a network on page 61.</td>
</tr>
</tbody>
</table>
## Solve software problems

HP warrants to you, the end-user customer, that HP hardware and accessories will be free from defects in materials and workmanship after the date of purchase, for the period specified above. If HP receives notice of such defects during the warranty period, HP will, at its option, either repair or replace products which prove to be defective. Replacement products may be either new or equivalent in performance to new.

HP warrants to you that HP software will not fail to execute its programming instructions after the date of purchase, for the period specified above, due to defects in material and workmanship when properly installed and used. If HP receives notice of such defects during the warranty period, HP will replace software which does not execute its programming instructions due to such defects.

HP does not warrant that the operation of HP products will be uninterrupted or error free. If HP is unable, within a reasonable time, to repair or replace any product to a condition as warranted, you will be entitled to a refund of the purchase price upon prompt return of the product.

HP products may contain remanufactured parts equivalent to new in performance or may have been subject to incidental use.

Warranty does not apply to defects resulting from (a) improper or inadequate maintenance or calibration, (b) software, interfacing, parts or supplies not supplied by HP, (c) unauthorized modification or misuse, (d) operation outside of the published environmental specifications for the product, or (e) improper site preparation or maintenance.

TO THE EXTENT ALLOWED BY LOCAL LAW, THE ABOVE WARRANTIES ARE EXCLUSIVE AND NO OTHER WARRANTY OR CONDITION, WHETHER WRITTEN OR ORAL, IS EXPRESSED OR IMPLIED AND HP SPECIFICALLY DISCLAIMS ANY IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY, SATISFACTORY QUALITY, AND FITNESS FOR A PARTICULAR PURPOSE. Some countries/regions, states or provinces do not allow limitations on the duration of an implied warranty, so the above limitation or exclusion might not apply to you. This warranty gives you specific legal rights and you might also have other rights that vary from country/region to country/region, state to state, or province to province.

HP’s limited warranty is valid in any country/region or locality where HP has a support presence for this product and where HP has marketed this product. The level of warranty service you receive may vary according to local standards. HP will not alter form, fit or function of the product to make it operate in a country/region for which it was never intended to function for legal or regulatory reasons.

TO THE EXTENT ALLOWED BY LOCAL LAW, THE REMEDIES IN THIS WARRANTY STATEMENT ARE YOUR SOLE AND EXCLUSIVE REMEDIES. EXCEPT AS INDICATED ABOVE, IN NO EVENT WILL HP OR ITS SUPPLIERS BE LIABLE FOR LOSS OF DATA OR FOR DIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL (INCLUDING LOST PROFIT OR DATA), OR OTHER DAMAGE, WHETHER BASED IN CONTRACT, TORT, OR OTHERWISE. Some countries/regions, states or provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.
THE WARRANTY TERMS CONTAINED IN THIS STATEMENT, EXCEPT TO THE EXTENT LAWFULLY PERMITTED, DO NOT EXCLUDE, RESTRICT OR MODIFY AND ARE IN ADDITION TO THE MANDATORY STATUTORY RIGHTS APPLICABLE TO THE SALE OF THIS PRODUCT TO YOU.
HP's Premium Protection Warranty: LaserJet print cartridge limited warranty statement

This HP product is warranted to be free from defects in materials and workmanship.

This warranty does not apply to products that (a) have been refilled, refurbished, remanufactured or tampered with in any way, (b) experience problems resulting from misuse, improper storage, or operation outside of the published environmental specifications for the printer product or (c) exhibit wear from ordinary use.

To obtain warranty service, please return the product to place of purchase (with a written description of the problem and print samples) or contact HP customer support. At HP's option, HP will either replace products that prove to be defective or refund your purchase price.

TO THE EXTENT ALLOWED BY LOCAL LAW, THE ABOVE WARRANTY IS EXCLUSIVE AND NO OTHER WARRANTY OR CONDITION, WHETHER WRITTEN OR ORAL, IS EXPRESSED OR IMPLIED AND HP SPECIFICALLY DISCLAIMS ANY IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY, SATISFACTORY QUALITY, AND FITNESS FOR A PARTICULAR PURPOSE.

TO THE EXTENT ALLOWED BY LOCAL LAW, IN NO EVENT WILL HP OR ITS SUPPLIERS BE LIABLE FOR DIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL (INCLUDING LOST PROFIT OR DATA), OR OTHER DAMAGE, WHETHER BASED IN CONTRACT, TORT, OR OTHERWISE.

THE WARRANTY TERMS CONTAINED IN THIS STATEMENT, EXCEPT TO THE EXTENT LAWFULLY PERMITTED, DO NOT EXCLUDE, RESTRICT OR MODIFY AND ARE IN ADDITION TO THE MANDATORY STATUTORY RIGHTS APPLICABLE TO THE SALE OF THIS PRODUCT TO YOU.
Color LaserJet Fuser Kit, Toner Collection Unit, and Transfer Kit Limited Warranty Statement

This HP product is warranted to be free from defects in materials and workmanship until the printer provides a low-life indicator on the control panel.

This warranty does not apply to products that (a) have been refurbished, remanufactured or tampered with in any way, (b) experience problems resulting from misuse, improper storage, or operation outside of the published environmental specifications for the printer product or (c) exhibit wear from ordinary use.

To obtain warranty service, please return the product to place of purchase (with a written description of the problem) or contact HP customer support. At HP’s option, HP will either replace products that prove to be defective or refund your purchase price.

TO THE EXTENT ALLOWED BY LOCAL LAW, THE ABOVE WARRANTY IS EXCLUSIVE AND NO OTHER WARRANTY OR CONDITION, WHETHER WRITTEN OR ORAL, IS EXPRESSED OR IMPLIED AND HP SPECIFICALLY DISCLAIMS ANY IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY, SATISFACTORY QUALITY, AND FITNESS FOR A PARTICULAR PURPOSE.

TO THE EXTENT ALLOWED BY LOCAL LAW, IN NO EVENT WILL HP OR ITS SUPPLIERS BE LIABLE FOR DIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL (INCLUDING LOST PROFIT OR DATA), OR OTHER DAMAGE, WHETHER BASED IN CONTRACT, TORT, OR OTHERWISE.

THE WARRANTY TERMS CONTAINED IN THIS STATEMENT, EXCEPT TO THE EXTENT LAWFULLY PERMITTED, DO NOT EXCLUDE, RESTRICT OR MODIFY AND ARE IN ADDITION TO THE MANDATORY STATUTORY RIGHTS APPLICABLE TO THE SALE OF THIS PRODUCT TO YOU.
Data stored on the print cartridge

The HP print cartridges used with this product contain a memory chip that assists in the operation of the product.

In addition, this memory chip collects a limited set of information about the usage of the product, which might include the following: the date when the print cartridge was first installed, the date when the print cartridge was last used, the number of pages printed using the print cartridge, the page coverage, the printing modes used, any printing errors that might have occurred, and the product model. This information helps HP design future products to meet our customers' printing needs.

The data collected from the print cartridge memory chip does not contain information that can be used to identify a customer or user of the print cartridge or their product.

HP collects a sampling of the memory chips from print cartridges returned to HP's free return and recycling program (HP Planet Partners: www.hp.com/recycle). The memory chips from this sampling are read and studied in order to improve future HP products. HP partners who assist in recycling this print cartridge might have access to this data, as well.

Any third party possessing the print cartridge might have access to the anonymous information on the memory chip. If you prefer to not allow access to this information, you can render the chip inoperable. However, after you render the memory chip inoperable, the memory chip cannot be used in an HP product.
End User License Agreement

PLEASE READ CAREFULLY BEFORE USING THIS SOFTWARE PRODUCT: This End-User License Agreement (“EULA”) is a contract between (a) you (either an individual or the entity you represent) and (b) Hewlett-Packard Company (“HP”) that governs your use of the software product (“Software”). This EULA does not apply if there is a separate license agreement between you and HP or its suppliers for the Software, including a license agreement in online documentation. The term “Software” may include (i) associated media, (ii) a user guide and other printed materials, and (iii) “online” or electronic documentation (collectively “User Documentation”).

RIGHTS IN THE SOFTWARE ARE OFFERED ONLY ON THE CONDITION THAT YOU AGREE TO ALL TERMS AND CONDITIONS OF THIS EULA. BY INSTALLING, COPYING, DOWNLOADING, OR OTHERWISE USING THE SOFTWARE, YOU AGREE TO BE BOUND BY THIS EULA. IF YOU DO NOT ACCEPT THIS EULA, DO NOT INSTALL, DOWNLOAD, OR OTHERWISE USE THE SOFTWARE. IF YOU PURCHASED THE SOFTWARE BUT DO NOT AGREE TO THIS EULA, PLEASE RETURN THE SOFTWARE TO YOUR PLACE OF PURCHASE WITHIN FOURTEEN DAYS FOR A REFUND OF THE PURCHASE PRICE; IF THE SOFTWARE IS INSTALLED ON OR MADE AVAILABLE WITH ANOTHER HP PRODUCT, YOU MAY RETURN THE ENTIRE UNUSED PRODUCT.

1. THIRD PARTY SOFTWARE. The Software may include, in addition to HP proprietary software (“HP Software”), software under licenses from third parties (“Third Party Software” and “Third Party License”). Any Third Party Software is licensed to you subject to the terms and conditions of the corresponding Third Party License. Generally, the Third Party License is in a file such as “license.txt” or a “readme” file. You should contact HP support if you cannot find a Third Party License. If the Third Party Licenses include licenses that provide for the availability of source code (such as the GNU General Public License) and the corresponding source code is not included with the Software, then check the product support pages of HP’s website (hp.com) to learn how to obtain such source code.

2. LICENSE RIGHTS. You will have the following rights provided you comply with all terms and conditions of this EULA:

   a. Use. HP grants you a license to Use one copy of the HP Software. “Use” means installing, copying, storing, loading, executing, displaying, or otherwise using the HP Software. You may not modify the HP Software or disable any licensing or control feature of the HP Software. If this Software is provided by HP for Use with an imaging or printing product (for example, if the Software is a printer driver, firmware, or add-on), the HP Software may only be used with such product (“HP Product”). Additional restrictions on Use may appear in the User Documentation. You may not separate component parts of the HP Software for Use. You do not have the right to distribute the HP Software.

   b. Copying. Your right to copy means you may make archival or back-up copies of the HP Software, provided each copy contains all the original HP Software’s proprietary notices and is used only for back-up purposes.

3. UPGRADES. To Use HP Software provided by HP as an upgrade, update, or supplement (collectively “Upgrade”), you must first be licensed for the original HP Software identified by HP as eligible for the Upgrade. To the extent the Upgrade supersedes the original HP Software, you may no longer use such HP Software. This EULA applies to each Upgrade unless HP provides other terms with the Upgrade. In case of a conflict between this EULA and such other terms, the other terms will prevail.
4. TRANSFER.

   a. Third Party Transfer. The initial end user of the HP Software may make a one-time transfer of the HP Software to another end user. Any transfer will include all component parts, media, User Documentation, this EULA, and if applicable, the Certificate of Authenticity. The transfer may not be an indirect transfer, such as a consignment. Prior to the transfer, the end user receiving the transferred Software will agree to this EULA. Upon transfer of the HP Software, your license is automatically terminated.

   b. Restrictions. You may not rent, lease or lend the HP Software or Use the HP Software for commercial timesharing or bureau use. You may not sublicense, assign or otherwise transfer the HP Software except as expressly provided in this EULA.

5. PROPRIETARY RIGHTS. All intellectual property rights in the Software and User Documentation are owned by HP or its suppliers and are protected by law, including applicable copyright, trade secret, patent, and trademark laws. You will not remove any product identification, copyright notice, or proprietary restriction from the Software.

6. LIMITATION ON REVERSE ENGINEERING. You may not reverse engineer, decompile, or disassemble the HP Software, except and only to the extent that the right to do so is allowed under applicable law.

7. CONSENT TO USE OF DATA. HP and its affiliates may collect and use technical information you provide in relation to (i) your Use of the Software or the HP Product, or (ii) the provision of support services related to the Software or the HP Product. All such information will be subject to HP’s privacy policy. HP will not use such information in a form that personally identifies you except to the extent necessary to enhance your Use or provide support services.

8. LIMITATION OF LIABILITY. Notwithstanding any damages that you might incur, the entire liability of HP and its suppliers under this EULA and your exclusive remedy under this EULA will be limited to the greater of the amount actually paid by you for the Product or U.S. $5.00. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IN NO EVENT WILL HP OR ITS SUPPLIERS BE LIABLE FOR ANY SPECIAL, INCIDENTAL, INDIRECT, OR CONSEQUENTIAL DAMAGES (INCLUDING DAMAGES FOR LOST PROFITS, LOST DATA, BUSINESS INTERRUPTION, PERSONAL INJURY, OR LOSS OF PRIVACY) RELATED IN ANY WAY TO THE USE OF OR INABILITY TO USE THE SOFTWARE, EVEN IF HP OR ANY SUPPLIER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES AND EVEN IF THE ABOVE REMEDY FAILS OF ITS ESSENTIAL PURPOSE. Some states or other jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

9. U.S. GOVERNMENT CUSTOMERS. Software was developed entirely at private expense. All Software is commercial computer software within the meaning of the applicable acquisition regulations. Accordingly, pursuant to US FAR 48 CFR 12.212 and DFAR 48 CFR 227.7202, use, duplication and disclosure of the Software by or for the U.S. Government or a U.S. Government subcontractor is subject solely to the terms and conditions set forth in this End User License Agreement, except for provisions which are contrary to applicable mandatory federal laws.

10. COMPLIANCE WITH EXPORT LAWS. You will comply with all laws, rules, and regulations (i) applicable to the export or import of the Software, or (ii) restricting the Use of the Software, including any restrictions on nuclear, chemical, or biological weapons proliferation.

11. RESERVATION OF RIGHTS. HP and its suppliers reserve all rights not expressly granted to you in this EULA.
Customer self-repair warranty service

HP products are designed with many Customer Self Repair (CSR) parts to minimize repair time and allow for greater flexibility in performing defective parts replacement. If during the diagnosis period, HP identifies that the repair can be accomplished by the use of a CSR part, HP will ship that part directly to you for replacement. There are two categories of CSR parts: 1) Parts for which customer self repair is mandatory. If you request HP to replace these parts, you will be charged for the travel and labor costs of this service. 2) Parts for which customer self repair is optional. These parts are also designed for Customer Self Repair. If, however, you require that HP replace them for you, this may be done at no additional charge under the type of warranty service designated for your product.

Based on availability and where geography permits, CSR parts will be shipped for next business day delivery. Same-day or four-hour delivery may be offered at an additional charge where geography permits. If assistance is required, you can call the HP Technical Support Center and a technician will help you over the phone. HP specifies in the materials shipped with a replacement CSR part whether a defective part must be returned to HP. In cases where it is required to return the defective part to HP, you must ship the defective part back to HP within a defined period of time, normally five (5) business days. The defective part must be returned with the associated documentation in the provided shipping material. Failure to return the defective part may result in HP billing you for the replacement. With a customer self repair, HP will pay all shipping and part return costs and determine the courier/carrier to be used.

D  Regulatory information

- FCC regulations
- Environmental product stewardship program
- Declaration of conformity
- Safety statements
FCC regulations

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

**NOTE:** Any changes or modifications to the printer that are not expressly approved by HP could void the user’s authority to operate this equipment.

Use of a shielded interface cable is required to comply with the Class A limits of Part 15 of FCC rules.
Environmental product stewardship program

Protecting the environment

Hewlett-Packard Company is committed to providing quality products in an environmentally sound manner. This product has been designed with several attributes to minimize impacts on our environment.

Ozone production

This product generates no appreciable ozone gas (O₃).

Power consumption

Power usage drops significantly while in Ready and Sleep mode, which saves natural resources and saves money without affecting the high performance of this product. To determine the ENERGY STAR® qualification status for this product, see the Product Data Sheet or Specifications Sheet. Qualified products are also listed at:

www.hp.com/go/energystar

Paper use

This product’s optional automatic duplex feature (two-sided printing) and N-up printing (multiple pages printed on one page) capability can reduce paper usage and the resulting demands on natural resources.

Plastics

Plastic parts over 25 grams are marked according to international standards that enhance the ability to identify plastics for recycling purposes at the end of the product’s life.

HP LaserJet print supplies

It’s easy to return and recycle your HP LaserJet print cartridges after use—free of charge—with HP Planet Partners. Multilingual program information and instructions are included in every new HP LaserJet print cartridge and supplies package. You help reduce the toll on the environment further when you return multiple cartridges together rather than separately.

HP is committed to providing inventive, high-quality products and services that are environmentally sound, from product design and manufacturing to distribution, customer use and recycling. When you participate in the HP Planet Partners program, we ensure your HP LaserJet print cartridges are recycled properly, processing them to recover plastics and metals for new products and diverting millions of tons of waste from landfills. Since this cartridge is being recycled and used in new materials, it will not be returned to you. Thank you for being environmentally responsible!

NOTE: Use the return label to return original HP LaserJet print cartridges only. Please do not use this label for HP inkjet cartridges, non-HP cartridges, refilled or remanufactured cartridges or warranty returns. For information about recycling your HP inkjet cartridges please go to http://www.hp.com/recycle.
Return and recycling instructions

United States and Puerto Rico

The enclosed label in the HP LaserJet toner cartridge box is for the return and recycling of one or more HP LaserJet print cartridges after use. Please follow the applicable instructions below.

Multiple returns (more than one cartridge)

1. Package each HP LaserJet print cartridge in its original box and bag.
2. Tape the boxes together using strapping or packaging tape. The package can weigh up to 31 kg (70 lb).
3. Use a single pre-paid shipping label.

OR

1. Use your own suitable box, or request a free bulk collection box from www.hp.com/recycle or 1-800-340-2445 (holds up to 31 kg (70 lb) of HP LaserJet print cartridges).
2. Use a single pre-paid shipping label.

Single returns

1. Package the HP LaserJet print cartridge in its original bag and box.
2. Place the shipping label on the front of the box.

Shipping

For all HP LaserJet print cartridge recycling returns, give the package to UPS during your next delivery or pickup, or take it to an authorized UPS drop-off center. For the location of your local UPS drop-off center, call 1-800-PICKUPS or visit www.ups.com. If you are returning via USPS label, give the package to a U.S. Postal Service carrier or drop off at a U.S. Postal Service Office. For more information, or to order additional labels or boxes for bulk returns, visit www.hp.com/recycle or call 1-800-340-2445. Requested UPS pickup will be charged normal pickup rates. Information subject to change without notice.

Residents of Alaska and Hawaii

Do not use the UPS label. Call 1-800-340-2445 for information and instructions. The U.S. Postal Service provides no-cost cartridge return transportation services under an arrangement with HP for Alaska and Hawaii.

Non-U.S. returns

To participate in HP Planet Partners return and recycling program, just follow the simple directions in the recycling guide (found inside the packaging of your new product supply item) or visit www.hp.com/recycle. Select your country/region for information on how to return your HP LaserJet printing supplies.
Paper

This product is capable of using recycled papers when the paper meets the guidelines outlined in the HP LaserJet Printer Family Print Media Guide. This product is suitable for the use of recycled paper according to EN12281:2002.

Material restrictions

This HP product does not contain added mercury.

This HP product contains a battery that might require special handling at end-of-life. The batteries contained in or supplied by Hewlett-Packard for this product include the following:

For recycling information, you can go to www.hp.com/recycle, or contact your local authorities or the Electronics Industries Alliance: www.eiae.org.

Disposal of waste equipment by users in private households in the European Union

This symbol on the product or on its packaging indicates that this product must not be disposed of with your other household waste. Instead, it is your responsibility to dispose of your waste equipment by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. The separate collection and recycling of your waste equipment at the time of disposal will help to conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment. For more information about where you can drop off your waste equipment for recycling, please contact your local city office, your household waste disposal service or the shop where you purchased the product.
Chemical substances

HP is committed to providing our customers with information about the chemical substances in our products as needed to comply with legal requirements such as REACH (Regulation EC No 1907/2006 of the European Parliament and the Council). A chemical information report for this product can be found at: www.hp.com/go/reach.

Material Safety Data Sheet (MSDS)

Material Safety Data Sheets (MSDS) for supplies containing chemical substances (for example, toner) can be obtained by accessing the HP Web site at www.hp.com/go/msds or www.hp.com/hpinfo/community/environment/productinfo/safety.

Safety statements

Laser safety

The Center for Devices and Radiological Health (CDRH) of the U.S. Food and Drug Administration has implemented regulations for laser products manufactured since August 1, 1976. Compliance is mandatory for products marketed in the United States. The device is certified as a “Class 1” laser product under the U.S. Department of Health and Human Services (DHHS) Radiation Performance Standard according to the Radiation Control for Health and Safety Act of 1968. Since radiation emitted inside the device is completely confined within protective housings and external covers, the laser beam cannot escape during any phase of normal user operation.

⚠️ WARNING! Using controls, making adjustments, or performing procedures other than those specified in this user guide may result in exposure to hazardous radiation.

Canadian DOC regulations

Complies with Canadian EMC Class A requirements.

« Conforme à la classe A des normes canadiennes de compatibilité électromagnétiques. « CEM ». »

Laitteen käyttäminen muulla kuin käyttöohjeessa mainitulla tavalla saattaa altistaa altistaa käyttäjän
turvallisuusluokan 1 ylittäville näkymättömälle lasersäteilylle.

WARNING!

Om apparaten används på annat sätt än i bruksanvisning specificerats, kan användaren utsättas för
osynlig laserstrålning, som överskrider gränsen för laserklass 1.

HUOLTO

HP Color LaserJet CP5525n, CP5525dn, CP5525xh - kirjoittimen sisällä ei ole käyttäjän huoletattavissa
olevia kohteita. Laitteen saa avata ja huolita ainoastaan sen huoltamiseen koulutettu henkilö.
Tällaiseksi huoltoitoimenpiteeksi ei katsota vääräineen kasettin vaihtamista, paperiradan puhdistusta tai
muita käyttäjän käsikirjassa lueteltuja, käyttäjän tehtäväksi tarkoitettuja ylläpitotoimia, jotka voidaan
suorittaa ilman erikoistyökaluja.
**VARO!**
Mikäli kirjoittimen suojakotelo avataan, olet alttiina näkymättömelle lasersäteilylle laitteen ollessa toiminnassa. Älä katso säteeseen.

**WARNING!**
Om laserprinterns skyddshölje öppnas då apparaten är i funktion, utsättas användaren för osynlig laserstrålning. Betrakta ej strålen.

Tiedot laitteessa käytettävän laserdiodin säteilyominaisuuksista: Aallonpituus 775-795 nm Teho 5 m W Luokan 3B laser.

**GS statement (Germany)**
Das Gerät ist nicht für die Benutzung im unmittelbaren Gesichtsfeld am Bildschirmarbeitsplatz vorgesehen. Um störende Reflexionen am Bildschirmarbeitsplatz zu vermeiden, darf dieses Produkt nicht im unmittelbaren Gesichtsfeld platziert werden.
