

CW450t Digital Camera

Great Pictures, Better Memories

The CW450t is a feature-rich 12 megapixel 4X optical zoom digital camera with a 2.7" touch screen LCD display. It takes AA batteries, making it a convenient digital camera for the road. With a new user interface, the CW450t is a great compact digital camera that allows a more intuitive navigation of functions offered at an exceptional value.

New & improved user interface

The new user interface features modern 3D icons and greater color contrast for improved visibility when navigating menu selections even in bright light. Additionally, when you're choosing scene modes, two images are shown as examples of how a picture would look like in comparison to using the auto mode.

Touch Screen Technology

The touch LCD screen lets you easily access all the camera functions without having to push buttons. You can use your fingers to zoom in and out when viewing pictures, and swipe left or right to scroll through different menu items. By using the "touch shot" function, you can point at any subject on the screen, let the camera auto focus, and take a picture at the release of your finger.

Smile Detection

With smile detection, the camera will search for a smile and automatically take the picture when it detects that the subject is smiling. This feature is especially helpful when trying to capture pictures of young children smiling in front of the camera.

Blink Detection

When you use the blink detection feature, the camera alerts you if a subject is blinking when the picture is taken. The camera will then prompt you to either keep or delete the picture, allowing you the opportunity to retake pictures as you deem necessary.

Over 25 scene modes

With over 25 scene modes, you can easily ensure the best shot is captured in different shooting situations. Pick the mode that best matches your activity or use the Intelligent scene mode to let the camera detect the conditions and select the best mode for you.

The night scene mode is perfect in non-luminous conditions. It produces properly exposed images, making the picture lighter and less grainy. Use the candlelight mode to capture the warm color of party settings lit by candles. For posting pictures on online auction or shopping websites, use the auction mode. In auction mode, images are captured and saved in smaller size files for easy uploading.

Package contents

- HP CW450t Digital Camera
- Wrist strap
- 0.8 meter USB cable
- 2x AA Batteries
- Quick Start Guide
- Software install and Electronic User Manual CD-ROM
- Warranty document

CW450t Digital Camera

SPECIFICATIONS

LCD Display	2.7"
Sensor Type	1/2.3" CCD
