Setup troubleshooting

If the HP Photosmart doesn't turn on...

Check the power cord. To do this:

- Make sure the power cord is firmly connected to both the printer and the power adaptor. An LED on the power supply will be lit if the power cord is working.
- If you are using a power strip, check that the power strip is turned on. Or, plug the printer directly into a power outlet.
- Test the power outlet to make sure that is working. Plug in another appliance that you know works, and see if it has power. If not, there may be a problem with the power outlet.
- If you plugged the printer into a switched outlet, check that the outlet is turned on.

1. Turn off the printer, and then unplug the power cord. Plug the power cord back in, and then press the  button to turn on the printer.
2. Take care not to press the  button too quickly. Press it only once. It might take a few minutes for the printer to turn on, so if you press the  button more than once, you might be turning off the printer.
3. If you have completed all the above steps, but are still having a problem, contact HP support for service. Go to www.hp.com/support.

Windows

Make sure that your HP Photosmart is set as the default printer. To do this:

1. On the Windows taskbar, click **Start**.
2. Then click **Control Panel**.
3. Then open:
 - **Devices and Printers** (Windows 7)
 - **Printers** (Vista)
 - **Printers and Faxes** (XP)

Look for your printer to see if it has a check mark in a circle next to it. If not, right-click the printer icon and choose "Set as default printer" from the menu.

If you still can't print, or if the Windows software installation failed:

1. Remove the CD from your computer's CD drive, and then disconnect the printer from the computer.
2. Restart the computer.
3. Temporarily disable any software firewall and close any anti-virus software.
4. Insert the printer software CD into the computer CD drive, then follow the onscreen instructions to install the printer software. Do not connect the USB cable until you are told to do so.
5. After the installation finishes, restart the computer and any security software you disabled or closed.

Mac

Uninstall and reinstall the software.

The uninstaller removes all the HP software components that are specific to this HP Photosmart. It does not remove any components that are shared by other printers or programs.

To uninstall the software:

1. Disconnect the printer from your computer.
2. Open the Applications: Hewlett-Packard folder.
3. Double-click **HP Uninstaller**. Follow the onscreen instructions.

To install the software:

1. Insert the CD into your computer's CD drive.
2. On the desktop, open the CD, then double-click **HP Installer**.
3. Follow the onscreen instructions.

Features and tips

Print

- Print photos directly from a memory card in various sizes and papers. Use the **Photo** menu on the printer display for browsing photos, applying automatic fixes, and making selections.
- Print documents and photos from software applications on a connected computer.
- When installing new cartridges, be sure to remove the piece of protective plastic before inserting the cartridge.
- The first time you set up and use the HP Photosmart, make sure to install the ink cartridges that were shipped with your device. These cartridges are specially formulated for the first-time use of your printer.
- Make sure you have sufficient ink. To check the estimated ink levels, select **Settings** on the printer display, select **Tools**, then select **Display Estimated Levels**.
- Photo or Photo Black cartridges are not compatible with this printer.

Copy

- Make color or black and white copies. Use the **Copy** menu on the printer display to choose color, actual size of original or resize to fit, quality setting (including fast economy), paper size, and the number of copies.
- Load single-sheet or thin originals, print side down, on the right front corner of the glass.
- For thick originals, like a page in a book, remove the lid. Place the original, print side down, into the right front corner of the glass. If possible, lay the lid on top of the original to provide a white background.

Scan

- Scan photographs or documents. Use the **Scan** menu on the printer display to select **Scan to PC**, **Scan to Card**, or **Reprint**. Then, load the original, print side down, on the right front corner of the glass. Choose a scan shortcut: **Photo to File**, **Photo to Email**, or **PDF Document**.
- If you are scanning to a connected computer, the scanning software will open for you to make adjustments and other selections, including the location of the scan file.
- For best scanning, keep the glass and the back of the lid clean. The scanner interprets any spot or mark detected as part of the scan image.

What's new? Web Services

HP ePrint

How to get started with HP ePrint

To use HP ePrint, you need to have your printer connected to the Internet.

- Press the **Wireless** button on the HP Photosmart front panel.
- Select the **Web Services** menu from the printer display. From here, you can turn the service on or off, display the printer's email address, and print an information page.

Print from anywhere

HP's free ePrint service provides an easy way to print from email, anywhere and anytime. Just forward an email to your printer's email address from your computer or mobile device, and both the email message and recognized attachments will print.

- HP ePrint might not have come with your printer, but you can easily add it via product update. See www.hp.com/go/ePrinterCenter for availability and details.
- Attachments may print differently than they appear in the software program which created them, depending on the original fonts and layout options used.
- Free product updates are provided with this service. Some updates may be required to enable certain functionality.

Your printer is protected

To help prevent unauthorized email, HP assigns a random email address to your printer, never publicizes this address, and by default does not respond to any sender. HP ePrint also provides industry-standard spam filtering and transforms email and attachments to a print-only format to reduce the threat of a virus or other harmful content.

- The HP ePrint service does not filter emails based on content, so it cannot prevent objectionable or copyrighted material from being printed.

HP Apps

Print the web, without a computer

Select the **Apps** icon on the printer display to print pages for the whole family.

- Use the Quick Forms app locally. Print calendars, notebook and graph paper, even puzzles.
- Add more Apps from the web. Print coloring pages, weather reports, and more!
- Free product updates are provided with this service. Some updates may be required to enable certain functionality.

ePrinterCenter

Use the HP ePrinterCenter website

Use HP's free ePrinterCenter website to set up increased security for HP ePrint, specify the email addresses that are allowed to send email to your printer, get more HP Apps, and access other free services.

- Go to the ePrinterCenter website for more information and specific terms and conditions: www.hp.com/go/ePrinterCenter

If your printer is not found during software installation...

Troubleshooting for a wireless printer setup

Check that your printer is connected to your network

Run a **Wireless Network Test** to check that your printer is on the network. To do this:

1. On the HP Photosmart front panel, press the **Wireless** button to display the **Wireless** menu on the printer display.
2. Select **Run Wireless Network Test** on the display.
3. The **Wireless Network Test** Report is automatically printed. Review the report:
 - If something failed during the test, it is described at the top of the report.
 - The Diagnostics Summary lists all the tests that were performed, and whether or not your printer passed.
 - View the Configuration Summary to find out Network Name (SSID), Hardware Address (MAC), and IP Address.

If your printer is not connected to the network:

1. Press the **Wireless** button to open the **Wireless** menu on the printer display. Select **Wireless Setup Wizard**.
2. Follow the instructions on the screen.

For additional help with setting up a wireless connection, go to the Wireless Easy site: www.hp.com/go/wirelessprinting.

You may have picked the wrong network or typed in your network name (SSID) incorrectly

Check these settings to ensure that they are correct.

You may have typed in your WEP key or your WPA encryption key incorrectly.

- If you are using encryption on your network, you'll need to enter a key. These are case-sensitive so be sure that it has been entered correctly.
- If the network name (SSID) or the WEP/WPA key are not found automatically during installation, and you don't already know them, you can download the Network Diagnostic Utility, which can help you locate them.
- The Network Diagnostic Utility runs on computers with Windows XP SP3, Vista, or Windows 7 OS. The computer should also be wirelessly connected to your network. To download the Network Diagnostic Utility, go to: www.hp.com/go/wirelessprinting.

You may have a router problem.

Try restarting both the printer and the router by turning off the power on each. Then, turn them on again.

Your computer may not be connected to your network.

Make sure that the computer is connect to the same network to which the HP Photosmart is connected.

Your computer may be connected to a Virtual Private Network (VPN)

Temporarily disconnect from the VPN before proceeding with the installation. Being connected to a VPN is like being on a different network. You will need to disconnect from the VPN to access the printer over the home network.

Security software may be blocking communication.

Security software (firewall, anti-virus, anti-spyware) installed on your computer may be blocking communication between the printer and the computer. An HP diagnostic utility runs automatically during installation and can provide messages about what might be blocked by a firewall. Try temporarily disconnecting your firewall, anti-virus, or anti-spyware applications to see if you can finish the installation successfully. You should re-enable the security applications after installation is complete.

Setup your firewall software to allow communication over UDP port 427 (Windows).

After software installation

If your printer has been successfully installed, but you are having trouble printing:

- Turn off the router, printer, and computer. Then, turn on router, printer, and computer - in that order.
- If powering down and up doesn't solve the problem, run the **Network Diagnostic Utility (Windows)**:
- Go to: www.hp.com/go/wirelessprinting to download the Network Diagnostic Utility, then run it.

3. 自动打印**无线网络测试报告**。查看报告：
 - 如果某些项目未通过测试，将在报告开头列出。
 - “**诊断摘要**”将列出已执行的所有测试，以及您的打印机是否通过这些测试。
 - 查看“**配置摘要**”可以找到网络名称 (SSID)、硬件地址 (MAC) 和 IP 地址。

如果打印机未连接到网络：

1. 按**无线按钮**在打印机显示屏上打开**无线菜单**。选择**无线设置向导**。
2. 遵循屏幕上的说明进行操作。

您可能选择了错误的网络或没有正确键入网络名称 (SSID)

检查这些设置以确保设置正确。

您可能输入了不正确的 WEP 或 WPA 密钥。

- 如果网络中使用了加密功能，则需要输入密钥。密钥区分大小写，请确保将其正确输入。
- 如果安装过程中没有自动找到网络名称 (SSID) 或 WEP/WPA 密钥，且您也不知道这些信息，则可以下载 Network Diagnostic (网络诊断) 实用程序以帮助找到这些信息。
- 网络诊断实用程序运行在使用 Windows XP SP3、Vista 或 Windows 7 操作系统的计算机上。该计算机还应当无线连接到网络。要下载网络诊断实用工具，请转至：www.hp.com/go/wirelessprinting。

路由器可能存在问题。

尝试重新启动打印机和路由器，首先分别关闭各自的电源。然后，再将它们重新打开。

您的计算机可能没有连接到网络。

确保将计算机与 HP Photosmart 连接到同一网络。

您的计算机可能已连接到虚拟专用网络 (VPN)。

在继续安装之前，临时与 VPN 断开连接。连接到 VPN 后，就好像处于不同的网络上。因此，需要与 VPN 断开连接才能通过家庭网络访问打印机。

安全软件可能会阻止通信。

安装在计算机上的安全软件（防火墙、防病毒软件或反间谍软件等）可能阻止打印机和计算机之间通信。HP 诊断实用程序会在安装过程中自动运行，可以显示消息，说明哪些内容可能被防火墙阻止。尝试临时中断防火墙、防病毒或反间谍应用程序，确定是否可以成功完成安装。完成安装后应该重新启用这些安全应用程序。

请设置防火墙软件以允许通过 UDP 端口 427 (Windows 下) 进行通信。

软件安装后

如果打印机已经成功安装，但打印仍然有问题，请如下进行操作：

- 关闭路由器、打印机和计算机。然后，按同样顺序打开路由器、打印机和计算机。
- 如果先断电再通电不能解决问题，请运行网络诊断实用程序 (Windows 下)：
- 转至 www.hp.com/go/wirelessprinting 下载网络诊断实用程序，然后运行。
