

PC460t Digital Camera

Great Pictures, Better Memories

The PC460t delivers exceptional image shooting capabilities and style all in a slim point-and-shoot digital camera. It offers 14.2 MP high resolution along with 720p HD video recording to capture stunning images and videos vivid colors. Its 3-inch touch screen display, easy-to-navigate user interface, and USB charging capabilities offer added convenience and make taking photos easy. With the wide selection of scene modes, including the new LOMO and Fisheye scene modes, the PC460t takes impressive professional looking photos that you can't wait to share with your family and friends.

High definition images with outstanding clarity

The PC460t offers 14.2 MP high resolution and 720p HD video recording to capture videos or images in outstanding quality. With 4X optical zoom, the PC460t lets you magnify and capture sharp images when taking pictures from a distance. The PC460t offers you everything you need to capture life-like images to share with family and friends.

New easy-to-navigate user interface

The new user interface features modern 3D icons and greater color contrast for improved visibility when navigating menu selections in bright light. Additionally, when choosing scene modes, two images are shown as examples of what a picture would look like in comparison to using the auto mode.

Touch screen technology

The touch screen LCD lets you easily access all the camera functions without having to push buttons. You can use your fingers to zoom in and out when viewing pictures, and swipe left or right to scroll through different menu items. By using the "touch shot" function, you can point to a subject on the screen, let the camera auto focus, and take a picture at the release of your finger.

Smile and blink detection

With smile detection, the camera will search for a smile and automatically take the picture when the subject is smiling. When using the blink detection feature, the camera alerts you if a subject is blinking. The camera will then prompt you to either keep or delete the picture.

Over 30 scene modes

With over 30 scene modes, you can easily ensure the best shot is captured in different shooting situations. Pick the mode that best matches your activity or use the intelligent scene mode to let the camera detect the conditions and select the best mode for you.

The PC460t also features two new scene modes for you to create fun special effects: LOMO and Fisheye. When using LOMO, the camera will create a halo effect around your picture, and capture the people and objects in artistic, over-saturated color. Using the Fisheye scene mode, the camera will create a circular fish-eye appearance.
