- PC adapter clip

Regulatory and Safety Notices

Federal Communications Commission notice
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the Federal Communications Commission (FCC) rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

To avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antennas should not be less than 20 cm (8 inches), including when the computer display is closed.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

WARNING! Exposure to Radio Frequency Radiation
This device contains a transmitting module. To comply with FCC RF exposure limits, a separation distance of at least 20 cm (8 inches) must be maintained between the device and all persons.

Cables
To maintain compliance with FCC Rules, cables must be shielded and connected to the device using shielded cables having metallic RFI/EMI connector hoods.

To maintain compliance with FCC Rules and Regulations, connections to this device must be made with HP cables that have metal shielding. Connections with cables expressly approved by HP may void the user’s authority to operate the equipment. To identify your product, refer to the part, series, or model number located on the product.

Modifications
The FCC requires the user to be notified that any changes or modifications made to this device that are not expressly approved by HP may void the user’s authority to operate the equipment.

Products with wireless LAN devices or HP Mobile Broadband Modules
To identify your product, refer to the part, series, or model number located on the product.

Products with wireless LAN devices or HP Mobile Broadband Modules
This device must not be co-located or operating in conjunction with any other transmitters.

WARNING! Separate to Radio Frequency Radiation
The unshielded output power of this device is below the FCC radio frequency power limits. However, the device should be used in such a manner that the potential for human contact is minimized during normal operation of wireless sub-systems. To avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antennas should not be less than 20 cm (8 inches), including when the computer display is closed.

Modifications
If changes or modifications are made to this device without the express approval by HP, the user’s authority to operate the equipment may be void.

Regulatory and Safety Notices

Canada notices

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

Wireless operation is subject to 2 conditions. The first is that the wireless device may not cause interference. The second is that the wireless device must accept any interference, including interference that may cause undesired operation of the device.

CAUTION: When using IEEE 802.11a wireless LAN, this product is restricted to indoor use due to its operation in the 5.15 to 5.25 GHz frequency range. Industry Canada requires this product to be used indoors for the frequency range of 5.15 to 5.25 GHz to reduce the potential for harmful interference to co-channel mobile satellite systems. High power radar is the primary user of the 5.25 to 5.35 GHz and 5.65 to 5.85 GHz bands. These radar stations can cause interference to or damage to this device.

The antennas for this device are not replaceable. Any attempt at user access will damage your computer.

Avis Canadien

Cet appareil numérique de la classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

AC adapter notices

WARNING! To reduce the risk of electric shock or damage to the equipment:

• Plug the AC adapter into an AC outlet that is easily accessible at all times.

• Disconnect power from the product by unplugging the AC adapter from the AC outlet (not by unplugging the AC adapter from the product).

WARNING! To reduce potential safety issues, only the AC adapter provided with the product, a replacement AC adapter purchased as an accessory from HP should be used with the product.
