

LASERJET PRO 200 COLOR MFP M275nw

Copy on both sides (duplex)

1. Raise the camera arm to the fully open position.

2. Place the document on the capture stage, facing up. Align it with the ridges along the left and rear edges of the capture stage.

3. From the Home screen, touch the **Copy** button.

4. Touch the **Black** or **Color** button to start copying.

5. Remove the printed copy from the output bin, rotate the stack 180 degrees, and then load the page with the printed side down into Tray 1.

6. Place the next page of the document onto the capture stage.

7. From the Home screen, touch the **Copy** button.

8. Touch the **Black** or **Color** button to start copying.

9. Repeat these steps until the copy is complete.
10. When you are finished, lower the camera arm.

NOTE: Lower the camera arm to protect the camera lens cover from damage.
