

CC330 Digital Camera

Capture your favorite moments with the HP CC330 digital camera. Featuring 14 megapixel resolution, 3x optical zoom and 5x digital zoom, the CC330 lets you magnify and capture amazing images. The 2.4-inch high-resolution LCD screen with its auto brightness function helps you compose your shot or view your photos in any lighting condition. The CC330 uses 2-AA size batteries, making it a convenient digital camera for the road.

Taking great panoramic pictures

- The new panoramic photo stitching function allows you to take 3 images and create a seamless panoramic picture. Use the panorama mode to create dramatic shots of beautiful landscapes. It's perfect for capturing and presenting any elongated scene, such as a stadium, or subject in a single panoramic picture.

Auto LCD brightness

- The LCD screen of the CC330 automatically adjusts to the existing lighting conditions for better viewing. It helps you to frame the subject properly and easily.

Electronic Image stabilization

- Image stabilization enhances your photos digitally to compensate for unintentional camera vibration, and gives you a clearer and sharper picture with every shot.

Smile detection

- With smile detection, the camera will search for a smile and automatically take the picture when the subject is smiling. This feature is especially helpful when trying to capture pictures of young children.

Blink detection

- When using the blink detection feature, the camera alerts you if a subject is blinking when the picture is taken. The camera will then prompt you to either keep or delete the picture.

20 scene modes

- Pick the mode that best matches your activity or use the intelligent scene mode to let the camera detect the conditions and select the best mode for you.

The CC330 features useful scene modes for you to create fun and special effects, including Glass, ID, Photo Frame and many more. The Glass scene mode helps you capture objects through a glass window. This is an ideal shooting mode when taking pictures at a bakery, shopping mall or even in a car. The ID scene mode allows you to create standard ID photos for your ID card, passport or visa without other identification photo making software. When using the Photo Frame mode, it will add a fun and creative border around the picture for special occasions, such as a birthday or anniversary.

Package contents

- HP CC330 digital camera
 - Wrist strap
