2 Setting up your computer

 **WARNING!** To reduce the risk of electrical shock or damage to your equipment:

- Place the computer in a location away from water, dust, moisture, and soot. These can increase the inside temperature, or can cause fire or electrocution.
- Do not disable the power cord grounding plug. The grounding plug is an important safety feature.
- Plug the power cord in a grounded (earthed) outlet that is easily accessible at all times.
- Disconnect power from the equipment by unplugging the power cord from the electrical outlet. To prevent direct exposure to laser beam, do not try to open the enclosure of the CD or DVD drives.
- The power supply is preset for the country/region in which you purchased your computer. If you move, check the voltage requirements for your new location before plugging the computer into an AC power outlet.

The computer may be heavy; be sure to use ergonomically correct lifting procedures when moving the computer.

To reduce the risk of serious injury read the *Safety & Comfort Guide*. The guide is located on the web at <http://www.hp.com/ergo>.

1. Place the computer so that all ventilation openings are unobstructed and cabling is not in a walkway or where it can be stepped on or damaged by placing furniture on it.
2. Connect all power cords from the monitor, computer, and accessories to a power surge protection device that is specifically labeled as having surge protection, an uninterruptible power supply (UPS), or a similar device. If the computer has a television tuner, or a modem or telephone connection, protect the computer by using surge protection with these signal inputs as well. Connect the television cable or the telephone line cord to the surge protection device, and then connect the device to the computer.
3. Download and install operating system updates.
 - a. Find out what operating system and version your computer is currently running.
(Click **Start** > **Control Panel** and double-click **System**. The operating system and version are shown under Windows edition.)
 - b. Open your internet browser and go to <http://www.hp.com/go/contactHP>.
 - c. Select your country and language, if necessary, and click **Support & Drivers**.

- d. Select **Download drivers and software (and firmware)**, type your computer model name and number in the product field, and press Enter.
 - e. If necessary, select your computer model from **Product search results**.
 - f. Select your computer operating system.
 - g. Click **Download** next to each update you wish to download.
 - h. Follow the on-screen instructions to install each downloaded update.
4. Look in the computer box for additional printed details or updates.
 5. Read the *Safety and Regulatory Information* document in the HP User Manuals folder.
 6. Read the *Safety & Comfort Guide* for proper workstation setup, posture, health and work habits, and electrical and mechanical safety information. Click **Start**, click **All Programs**, and then click **HP User Manuals** or visit <http://www.hp.com/ergo>.

After you complete the initial computer setup, you might want to install additional software programs or hardware devices. Check the operating system, memory, and other requirements listed before purchasing new software or hardware for your computer. Follow the software manufacturer's directions to install the new software.

NOTE: Use only licensed original software. Installing copied software could result in an unstable installation, infect the computer with a virus, or be illegal.

Security solutions can deter theft, mishandling, and software attacks, but cannot prevent them.

Connecting to the Internet

Steps to connect to the Internet:

1. Connect the hardware as shown on the setup view.
2. Get Internet service.
 - Sign up with an Internet Service Provider (ISP). If you already have an account with an ISP, skip this step and follow the instructions provided by the ISP.
 - If you did not set up the computer for Internet service during the initial setup, do so now by using Online Services:
 - a. Click **Start**, click **All Programs**, click **Online Services**, and then click **Get Online**.
 - b. Follow the on-screen instructions to select an ISP and set up Internet service.

NOTE: Online Services provides a list of ISPs; however, you might choose another ISP or transfer an existing account to this computer. To transfer existing accounts, follow the instructions provided by the ISP.

3. Using your Internet connection through your ISP, open a web browser and browse the Internet.

NOTE: If you have issues connecting to the Internet, see [Internet access on page 16](#).

3 Setting up additional features

Using Beats Audio™ (select models only)

Your HP TouchSmart PC features audio connectors (headphone and Audio Out) that are optimized for Beats Audio™ headphones and external audio systems (purchased separately). Select HP TouchSmart PC models also include four Beats-optimized internal speakers and a Beats toggle button  on the keyboard.

Your computer comes ready for you to experience music with Beats enabled. To disable Beats, press the Beats toggle button; the Beats-off icon appears on the screen. To turn Beats on, press the Beats toggle button again. If your keyboard does not contain the Beats toggle button, press Fn+B to enable and disable Beats. Tap the **Beats** icon on the system tray to view the Beats user interface.

All you need to do is plug the Beats Audio headphones into the side headphone connector to experience crisp and clear sound separation. To experience the full capability of BEATS audio using the internal speakers, HP recommends connecting a matching HP subwoofer to the Sub connector on the back panel. If you are using an external audio system, plug it into the Audio Out connector on the back panel.

Using an HDMI monitor

If your computer has a graphics card with an HDMI (High Definition Multimedia Interface) connector, Hewlett-Packard recommends using a DVI or VGA connector for a monitor, and using HDMI to connect a TV.

If you use HDMI to connect your monitor, you may need to adjust some settings to hear sound (see the following steps). Because of this, HP recommends that you connect analog speakers to the computer if you want to hear sound during the initial setup of the computer.

For optimum viewing, you may need to adjust the resolution setting for the monitor (see “Adjusting resolution”).

Save this document for future use.

NOTE: If you ever need to recover the computer operating system by using the Recovery Manager, you must repeat these procedures to activate sound and adjust resolution for the HDMI connector.

IMPORTANT: Your HDMI monitor must be connected to the graphics card before you activate sound and adjust resolution.

Activating sound

1. Right-click the **Volume** icon (white speaker) on the system tray.
2. Click **Playback Devices**. The Sound window opens.

3. On the **Playback** tab, look for the Default Device. It may display a green circle with a checkmark in it.

If the Default Device is one of the following, then your HDMI monitor is already activated:

- **NVIDIA High Definition Audio** (select models only)
- **ATI High Definition Audio** (select models only)
- **Realtek HDMI Output**

Click the **Cancel** button to close the window, and then continue with the next procedure, "Adjusting resolution," if necessary.

If the Default Device is not one of these devices, continue with step 4.

4. If one of the following HDMI options is available on the **Playback** tab, click it:

- **NVIDIA High Definition Audio** (select models only)
- **ATI High Definition Audio** (select models only)

If neither of these is present, click **Realtek HDMI Output**.

5. Click **Set Default**.

6. Click **OK** to close the window. This completes the steps to activate HDMI sound.

Adjusting resolution

To adjust resolution, follow the instructions for your type of graphics card. Right click an empty area of the desktop, and then:

- If **NVIDIA Control Panel** is present, follow the steps under "NVIDIA graphics cards."
- If **Catalyst Control Center** is present, follow the steps under "ATI graphics cards."
- If only **Screen resolution** is present, follow the steps under "Other graphic cards."

-

1. Right-click an empty area of the desktop, and then click **NVIDIA Control Panel**. The View Selection window opens.
 2. In the **Selecting a Task** area on the left, under **Display**, click **Change resolution**. The Change resolution window opens.
 3. If your HP computer is connected to an HP monitor, make sure that the **Show only TV resolutions** check box does not contain a check mark. If your HP computer is connected to a non-HP monitor, make sure that the **Show only TV resolutions** check box contains a check mark. If necessary, click the box to remove a check mark or add a check mark.
 4. Close the NVIDIA Control Panel. This completes the steps to adjust resolution for NVIDIA graphics cards.
-

- ATI graphics cards
1. Right-click an empty area of the desktop, and then click **Catalyst™ Control Center**. The Catalyst Control Center window opens.
 2. Select **Graphics** and then **Desktops & Displays** on the top left corner of the window.
 3. Under the Desktops & Displays window, right click the monitor icon at the bottom left corner of the window and select **Configure**. The DTV (HDMI™) 2 window opens.
 4. If your HP computer is connected to an HP monitor, make sure that the **Show only TV resolutions** check box does not contain a check mark. If your HP computer is connected to a non-HP monitor, make sure that the **Show only TV resolutions** check box contains a check mark. If necessary, click the box to remove a check mark or add a check mark.
 5. Click **OK**. This completes the steps to adjust resolution for this option.
-

- Other graphics cards
1. Right-click an empty area of the desktop, and then click **Screen resolution**.

Setting up multiple displays

Use the following steps to connect and set up additional monitors:

These instructions are for standard two-monitor setup. If you have purchased a dual-monitor system with ATI™ Eyefinity software, follow these instructions for dual-

monitor setup (or for three monitors), and proceed to the instructions for ATI Eyefinity Catalyst™ setup.

1. Verify that the PC is set up according to the instructions in the setup view. Do not power on the PC or monitor.
2. Connect the monitors to an available display connector on the back of the PC. The monitor's connection type must match the connector on the PC.

NOTE: The three-monitor setup requires that you **separately purchase** an additional monitor and cable. The monitor should have a DVI, HDMI, or VGA connector. A DVI-to-VGA adapter is required for monitors with a VGA connector.

- Connect the DisplayPort cable to the DisplayPort connector (required).
 - Connect the DVI cable to the bottom DVI connector.
3. Connect power to each additional monitor.
 4. Press the power button on each display and then press the power button on the computer. The power indicator light on each of the displays will be amber; the lights will turn blue when the PC starts.

NOTE: During the initial setup, only one display is active; you may see various display states (such as blank screens, blue screens, etc.) on the other displays until the setup is completed.

5. When the setup is complete, you will see the extended desktop on all connected displays.
6. To change the display mode for a display, select **Start**, select **Control Panel**, select **Display**, and then select the option you want to change and follow the onscreen instructions.

ATI Eyefinity Catalyst™ setup

1. Right-click on the **Eyefinity Catalyst™** icon on the desktop to bring up **ATI Catalyst Control Center™**, or select **Start**, select **All Programs**, and select **Catalyst Control Center™**.
2. Select **CCC-Advanced**, select **Graphics**, and select **Desktop & Displays**, then follow the onscreen instructions to set up the layout for the two- or three-monitor display.

4 Maintaining your computer

Cleaning procedures

Keeping your computer system free of dust, dirt, and heat will prolong its life.

- Dust, pet hair, and other particles can build up, creating a blanket effect; as a result, components can overheat or, in the case of the keyboard and mouse, not work smoothly and effectively.
 - Check your system once a month for visible signs of dust and debris, and clean it about once every three months.
 - Visit <http://www.hp.com/go/contactHP> for additional cleaning instructions.
-

Cleaning the computer vents

Air vents keep the computer cool. Keep these vents clean by using a small, battery-powered vacuum cleaner. (A battery-powered vacuum cleaner eliminates the risk of electric shock.)

1. Vacuum the vents on the computer case.
 2. Remove any debris that has accumulated in and around the computer connectors (for example, the Ethernet and USB connectors).
-

Cleaning the keyboard and mouse

When cleaning the keyboard keys, use a low setting on a battery-powered vacuum cleaner, to avoid removing key caps and springs.

1. Vacuum between the keys of the keyboard and along the grooves.
 2. Use a clean, dry cloth and isopropyl (rubbing) alcohol to clean buildup on the keyboard keys and along its edges.
 3. Wipe the body of the mouse and the mouse cord by using cleaning wipes.
-

If you have a roller-ball mouse, clean the ball and rollers inside:

1. Turn the mouse upside down, and rotate the ball-cover ring counterclockwise to remove the ring and release the roller ball.
 2. Rinse the roller ball with soap and warm water.
 3. Clean the rollers inside the mouse with a cotton swab dampened with isopropyl (rubbing) alcohol.
 4. After the roller ball and rollers are completely dry, replace the ball and ball-cover ring.
-

5 Troubleshooting

Refer to the documentation provided by the product manufacturer for information about peripheral-specific problems, such as issues with a monitor or a printer. The following tables present some issues you might encounter while installing, starting up, or using your computer and possible solutions.

For more information or for additional troubleshooting options, see [Getting information on page 1](#).

Software troubleshooting

To repair software problems, try these methods:	<ul style="list-style-type: none"> • Turn the computer off completely and then turn it on again. This is the easiest (and sometimes the best) way. • Update the drivers (see Updating device drivers, following). • Use Microsoft System Restore Software program and hardware driver reinstallation (see Microsoft System Restore, later in this table). — Restores your computer to a configuration that was in use before the software was installed. • Reinstall the software program or hardware driver (see Software program and hardware driver reinstallation, later in this table). — Restores the software (if it came with the product) or hardware driver to factory defaults. • System Recovery (see <i>Troubleshooting and Maintenance Guide</i> on your computer. At the bottom of your screen, click on Start, then click HP Help and Support and HP User Manuals.) — Erase and reformat the hard disk drive, and then reinstall the operating system, programs, and drivers. This erases all data files you have created.
---	--

Updating device drivers Complete the following procedure to update a driver, or to revert to an earlier version of the driver if the new one does not solve your problem:

1. Click **Start**.
2. Type *Device Manager* into the **Start Search** box, and then click **Device Manager** to open the **Device Manager** window.
3. Click the plus sign (+) to expand the type of device you want to update or rollback. (For example, DVD/CD-ROM drives).
4. Double-click the specific item (for example, HP DVD Writer 640b).
5. Click the **Driver** tab.
6. To update a driver, click **Update Driver**, and then follow the on-screen instructions.
*Or, to revert to an earlier version of a driver, click **Rollback Driver**, and then follow the on-screen instructions.*

Microsoft System Restore If you have a problem that might be due to software that was installed on your computer, use System Restore to return the computer to a previous restore point. You can also set restore points manually.

NOTE: Always use this System Restore procedure before you use the System Recovery program.

To start a **System Restore**:

1. Close all open programs.
 2. Click **Start**, right-click **Computer**, and then click **Properties**.
 3. Click **System protection, System Restore**, click **Next**, and then follow the on-screen instructions.
-

To add restore points manually:

1. Close all open programs.
 2. Click **Start**, right-click **Computer**, click **Properties**, and then click **System protection**.
 3. Under **Protection Settings**, select the disk for which you want to create a restore point.
 4. Click **Create**, and then follow the on-screen instructions.
-

Software program and hardware driver reinstallation

If any of your factory-installed software programs or hardware drivers are damaged, you can reinstall it by using the Recovery Manager program (select models only).

NOTE: Do not use the Recovery Manager program to reinstall software programs that came on CDs or DVDs included in the computer box. Reinstall these programs directly from the CDs or DVDs.

Before you uninstall a program, be sure you have a way to reinstall it. Check to be sure that it is still available from where you initially installed it (for example, discs or the Internet). Or check to be sure that the program is in the list of programs you can reinstall from the Recovery Manager.

To check the list of installable programs in the Recovery Manager:

These services are covered during the warranty period.

There are a few limitations and exclusions to the warranty (as well as some important details), which are described in the *Hardware Limited Warranty* section of the *Limited Warranty and Support Guide*.

Before upgrading your hardware

Any hardware upgrades that you intend to do should only be done after you have completely set up your new computer. Refer to the setup poster included with your system for help with setting up. If you have any problems setting up your system and turning it on, immediately contact the HP Customer Care Center listed earlier in this guide, and a HP Customer Representative will assist you. This must be done first before attempting to upgrade your system.

By breaking the security seal on the back of the computer, you are confirming that the computer was working properly before you attempted to upgrade your system. Once the security seal has been broken, your computer is then, to the extent allowed by local law, covered under the terms and conditions listed in the *Hardware Limited Warranty* section of the *Limited Warranty and Support Guide*.

2 安裝電腦

警告！ 若要降低觸電或損壞設備的風險：

- 請將電腦放置於遠離水、灰塵、潮濕、油煙的位置。上述情況可能會增加電腦內部溫度，也可能造成起火或漏電。
- 勿拔除電源線接地插頭。接地插頭是重要的安全功能。
- 將電源線插在有接地且任何時間都方便使用的插座上。
- 請從電源插座中拔除電源線，以中斷設備的電源。為了避免暴露在雷射光束下，請勿打開 CD 或 DVD 光碟機的外殼。
- 電源供應器預設適用於您購買電腦的國家/地區。如果您前往其他地區，在您將電腦插頭插入 AC 電源插座之前，請先檢查該地區的電壓需求。

由於電腦非常重；搬動電腦時，請使用符合人體工學的搬運方法。

若要降低嚴重傷害的風險，請參閱《安全與舒適指南》。您可在網站上找到本指南，網址為 <http://www.hp.com/ergo>。

1. 將電腦放置在通風良好的位置，且勿將連接線放置於走道或是會被傢俱壓到或損壞的地方。
2. 請將顯示器、電腦和週邊設備的電源線，連接至特別標有避雷保護的電源裝置、不斷電系統 (UPS) 或類似的裝置。如果您的電腦有電視調諧器，或是連接數據機或電話，請同樣為這類訊號輸入使用避雷保護以保護電腦。將電視連接線或電話線連接到避雷保護裝置，再將裝置連接至電腦。
3. 下載並安裝作業系統更新。
 - a. 檢視電腦目前使用的作業系統及版本。
(按一下 **【開始】** > **【控制台】**，然後連按兩下 **【系統】**。電腦的 Windows 版本下會顯示作業系統及版本。)
 - b. 開啟網際網路瀏覽器並前往 http://welcome.hp.com/country/us/en/wwcontact_us.html。
 - c. 視需要選取國家及語言，然後按一下 **【支援與驅動程式】**。
 - d. 選取 **【下載驅動程式與軟體 (包含韌體)】**，在 **【產品型號】** 欄位中輸入您的電腦產品名稱和型號，然後按 **Enter** 鍵。
 - e. 視需要從 **【產品搜尋結果】** 中選取您的電腦型號。
 - f. 選取您電腦的作業系統。
 - g. 在每個您想要下載的更新旁，按一下 **【下載】**。
 - h. 遵循螢幕上的指示安裝下載好的更新。
4. 您可在電腦包裝箱中找到其他書面詳細資訊和更新訊息。

6. 閱讀《安全與舒適指南》，瞭解有關正確設置工作站、姿勢、健康和工作習慣以及電源與機械安全資訊。按一下 **[開始]**、**[所有程式]**，然後按一下 **[HP 使用手冊]** 或前往 <http://www.hp.com/ergo>。

完成電腦初步安裝後，您可能想要安裝其他軟體程式或硬體裝置。為您的電腦購買新軟體或硬體之前，請檢查作業系統、記憶體和其他列出的需求。請依照軟體製造商的指示安裝新軟體。

 **附註：** 請只使用原廠授權的軟體。安裝複製的軟體可能導致安裝不穩定、使您的電腦感染病毒或是觸犯法律。

安全性解決方案可預防資料遭竊、不當處理資料以及軟體攻擊，但無法完全阻止這些動作。

連線到網際網路

連線到網際網路的步驟：

1. 按照安裝畫面的指示來連接硬體。
2. 取得網際網路服務。
 - 向網際網路服務供應商 (ISP) 申請註冊。如果您已有 ISP 提供的帳戶，請略過這個步驟，並按照 ISP 的指示進行。
 - 如果您在第一次設定電腦時沒有設定網際網路服務，現在請使用 **[線上服務]** 進行設定：
 - a. 按一下 **[開始]**、**[所有程式]**、**[線上服務]**，然後按一下 **[連接上網]**。
 - b. 遵循螢幕上的指示選擇一個 ISP 並設定網際網路服務。

 **附註：** **[線上服務]** 會提供 ISP 清單，不過，您可選擇另一個 ISP 或是將現有的帳戶移轉到此電腦中。若要移轉現有帳戶，請按照 ISP 提供的指示進行。

3. 使用 ISP 所提供的網際網路連線，開啟網路瀏覽器並瀏覽網際網路。

 **附註：** 如果您有連線到網際網路的問題，請參閱位於第 14 頁的網際網路連線。

3 安裝其他功能

使用 Beats Audio™ (僅限部分型號)

HP TouchSmart PC 擁有針對 Beats Audio™ 耳機及外接音訊系統 (須另行購買) 最佳化的音訊接頭(耳機及音訊輸出)。部分 HP TouchSmart PC 型號也包含四個 Beats 最佳化內建喇叭，鍵盤上則有一個 Beats 切換按鈕 。

您隨時可以使用電腦的 Beats 音效來享受音樂。若要停用 Beats，請按下 Beats 切換按鈕；螢幕上會顯示 Beats 關閉的圖示。若要開啟 Beats，再按下 Beats 切換按鈕；若鍵盤未配置 Beats 切換按鈕，請按下 Fn+B 啟用和停用 Beats。點選系統工作匣內的 **[Beats]** 圖示，可檢視 Beats 使用者介面。

您只需要將 Beats Audio 耳機插入電腦側邊的耳機插孔，即可享受清晰細緻、音域分明的音效。若要使用內建喇叭來體驗完整的 BEATS 音訊功能，HP 建議您在背面板的 Sub 接頭接上相符的 HP 重低音喇叭。如果您要使用外接音訊系統，請將系統插到背面板上的 Audio Out 接頭。

使用 HDMI 顯示器

若電腦配備有 HDMI (高畫質多媒體介面) 接頭的圖形卡，Hewlett-Packard 建議您使用顯示器專用的 DVI 或 VGA 接頭，並且使用 HDMI 來連接電視。

若您使用 HDMI 連接顯示器，可能需要調整一些設定才能聽到聲音 (請參閱以下步驟)。若您希望初次設定電腦時，就可以聽到聲音，HP 建議您在開始設定前，先將類比喇叭接到電腦。

若要達到最佳觀看品質，您可能需要調整顯示器的解析度設定 (請參閱「調整解析度」)。

請保存本文件以供日後使用。

附註： 如果需要使用「復原管理員」復原電腦作業系統，您必須重複執行這些程序來啟動 HDMI 接頭的聲音和調整解析度。

重要： HDMI 顯示器必須連接至圖形卡，才可以啟動聲音並調整解析度。

啟動聲音

安裝多部顯示器

使用下列步驟來連接並安裝其他顯示器：

以下說明僅適用於連接其他兩部標準顯示器。若您已選購裝有 ATI™ Eyefinity 軟體的雙顯示器系統，請遵循這些說明來安裝雙顯示器（或三部顯示器），然後繼續遵循說明來安裝 ATI Eyefinity Catalyst™。

1. 確認已根據安裝檢視中的說明來設定電腦。請勿開啟電腦或顯示器電源。
2. 將顯示器連接至電腦背面的可用顯示器接頭。顯示器的連接類型必須與電腦上的接頭相符。

 **附註：** 若要安裝三部顯示器，您必須另外選購其他顯示器和連接線。顯示器應配備 DVI、HDMI 或 VGA 接頭。配備 VGA 接頭的顯示器必須使用 DVI-to-VGA 轉接器。

- 將 DisplayPort 連接線連接到 DisplayPort 接頭（必要）。
 - 將 DVI 連接線連接到底部的 DVI 接頭。
3. 連接每部其他顯示器的電源。

4. 按下每部顯示器的電源按鈕，然後再按下電腦的電源按鈕。所有顯示器的電源指示燈皆會亮起橘色燈號；電腦啟動時，顯示器的電源指示燈會變為藍色。

附註： 初次安裝時僅會使用一部顯示器；完成安裝之前，您會在其他顯示器上看見多種顯示器狀態（例如螢幕全黑、藍色螢幕等）。

5. 完成安裝後，您就會在所有連接的顯示器上看見延伸桌面。
6. 若要變更顯示器的顯示模式，請選取 **【開始】**、**【控制台】**、**【顯示器】**，然後再選取您要變更的選項並遵循螢幕上的指示。

2. 選取 **【CCC 進階】**、**【圖形】**、**【桌面與顯示器】**，然後遵循螢幕上的指示來設定兩或三部顯示器螢幕的配置。

4 維護您的電腦

清潔程序

保持電腦遠離灰塵與高溫，可延長電腦使用壽命。

- 灰塵、動物毛髮和其他塵埃會不斷堆積，因而產生毛毯效應；如此一來，電腦組件會過熱，如果是鍵盤和滑鼠，使用起來會不順並降低工作效率。
- 請每月檢查您的系統，查看是否明顯覆蓋一層灰塵和堆積物，並大約每三個月清潔一次。
- 如需其他清潔指示，請前往 welcome.hp.com/country/us/en/wwcontact_us.html。

清潔電腦通風孔

通風孔可保持電腦不會過熱。請使用電池式小型吸塵器來清潔通風孔。維持通風孔暢通。（電池式吸塵器可減少電擊的危險性。）

1. 使用吸塵器清潔電腦外殼的通風孔。
2. 吸除任何堆積在電腦連接埠（例如：乙太網路與 USB 連接埠）周圍的堆積物。

清潔鍵盤和滑鼠

清潔鍵盤時，請使用設為低速的電池式吸塵器，以防按鍵帽與彈簧脫落。

1. 沿著鍵盤按鍵間的溝槽吸除灰塵。
2. 使用乾淨的乾布和異丙醇（外用）酒精來清潔鍵盤按鍵上以及按鍵邊緣的堆積物。
3. 使用清潔抹布來擦拭滑鼠與滑鼠連接線。

如果您使用的是滾球式滑鼠，請清潔滾球和滾輪內部：

1. 將滑鼠的底部朝上，以逆時針方向旋轉滾球蓋以取下外蓋和滾球。
 2. 使用肥皂溫水沖洗滾球。
 3. 使用沾異丙酮（外用）酒精的棉花棒清潔滑鼠內的滾輪。
 4. 滾球與滾輪完全乾燥後，裝回滾球與滾球外蓋。
-
