First Edition: July 2012

Document Part Number: 677251-001

Product notice

This guide describes features that are common to most models. Some features may not be available on your computer.

To obtain the latest information in this guide, contact support. For U.S. support, go to http://www.hp.com/go/contactHP. For worldwide support, go to http://welcome.hp.com/country/us/en/wwcontact_us.html.

Software terms

By installing, copying, downloading, or otherwise using any software product preinstalled on this computer, you agree to be bound by the terms of the HP End User License Agreement (EULA). If you do not accept these license terms, your sole remedy is to return the entire unused product (hardware and software) within 14 days for a refund subject to the refund policy of your place of purchase.

For any further information or for requesting a full refund of the computer, please contact your local point of sale (the seller).

Safety warning notice

MARNING! To reduce the possibility of heat-related injuries or of overheating the computer, do not place the computer directly on your lap or obstruct the computer air vents. Use the computer only on a hard, flat surface. Do not allow another hard surface, such as an adjoining optional printer, or a soft surface, such as pillows or rugs or clothing, to block airflow. Also, do not allow the AC adapter to come into contact with the skin or a soft surface, such as pillows or rugs or clothing, during operation. The computer and the AC adapter comply with the user-accessible surface temperature limits defined by the International Standard for Safety of Information Technology Equipment (IEC 60950).

1 Welcome

After you set up and register the computer, it is important to take the following steps:

- **Connect to the Internet**—Set up your wired or wireless network so that you can connect to the Internet. For more information, see Networking on page 18.
- **Update your antivirus software**—Protect your computer from damage caused by viruses. The software is preinstalled on the computer. See the *HP Notebook Reference Guide*. For instructions on accessing this guide, see Finding information on page 2.
- **Get to know your computer**—Learn about your computer features. See <u>Getting to know your computer on page 4</u> and <u>Keyboard and pointing devices on page 22</u> for additional information.
- Find installed software—Access a list of the software preinstalled on the computer. Select
 Start > All Programs. For details about using the software included with the computer, see the
 software manufacturer's instructions, which may be provided with the software or on the
 manufacturer's website.

Finding information

The computer comes with several resources to help you perform various tasks.

Resources	For inf	ormation about

Resources	For information about
Limited Warranty*	Warranty information

To access the warranty:

Select Start > Help and Support > User Guides > View Warranty Information.

- or -

Go to http://www.hp.com/go/orderdocuments.

*You can find the expressly provided HP Limited Warranty applicable to your product located with the user guides on your computer and/or on the CD/DVD provided in the box. In some countries/regions, HP may provide a printed HP Limited Warranty in the box. For some countries/regions where the warranty is not provided in printed format, you may request a printed copy from http://www.hp.com/go/orderdocuments or write to:

- North America: Hewlett-Packard, MS POD, 11311 Chinden Blvd., Boise, ID 83714, USA
- Europe, Middle East, Africa: Hewlett-Packard, POD, Via G. Di Vittorio, 9, 20063, Cernusco s/Naviglio (MI), Italy
- Asia Pacific: Hewlett-Packard, POD, P.O. Box 200, Alexandra Post Office, Singapore 9115077

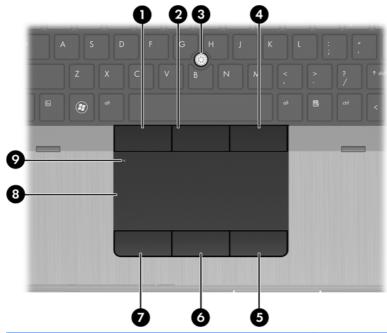

When you request a printed copy of your warranty, please include your product number, warranty period (found on your service label), name, and postal address.

IMPORTANT: Do NOT return your HP product to the addresses above. For U.S. support, go to http://www.hp.com/go/contactHP. For worldwide support, go to http://welcome.hp.com/country/us/en/wwcontact_us.html.

2 Getting to know your computer

Top

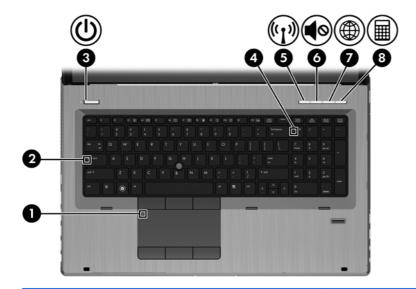

TouchPad

Component		Description
(1)	Left pointing stick button	Functions like the left button on an external mouse.
(2)	Center pointing stick button	Functions like the center button on an external mouse.
(3)	Pointing stick	Moves the pointer and selects or activates items on the screen.
(4)	Right pointing stick button	Functions like the right button on an external mouse.
(5)	Right TouchPad button	Functions like the right button on an external mouse.
(6)	Center TouchPad button	Functions like the center button on an external mouse.
(7)	Left TouchPad button	Functions like the left button on an external mouse.

Component		Description
(8)	TouchPad zone	Moves the pointer and selects or activates items on the screen.
(9)	TouchPad on/off button	Turns the TouchPad on and off.

Lights

Component			Description	
(1)		TouchPad light	Amber: The TouchPad is off.	
			Off: The TouchPad is on.	
(2)		Caps lock light	On: Caps lock is on.	
(3)	۲l۱	Power light	On: The computer is on.	
	O		Blinking: The computer is in the Sleep state.	
			Off: The computer is off or in Hibernation.	
(4)		Num lock light	On: Num lock is on.	
(5)	((I ₎)	Wireless light	 White: An integrated wireless device, such as a wireless local area network (WLAN) device and/or a Bluetooth® device, is on. 	
			Amber: All wireless devices are off.	
(6)	40	Mute light	Amber: Computer sound is off.	
	•••		Off: Computer sound is on.	
(7)	ATA	Web browser light	On: The computer is on.	
	(1)		Off: The computer is off or in Hibernation.	
(8)	=	Calculator light	On: The calculator function is on.	
	 		Blinking: The calculator has been activated.	

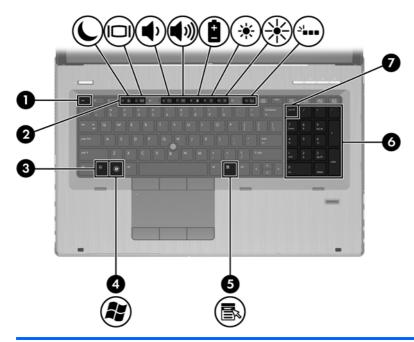

Buttons and fingerprint reader (select models only)

Component			Description
(1)		TouchPad on/off button	Turns the TouchPad on and off.
(2)	(l)	Power button	 When the computer is off, press the button to turn on the computer.
	•		 When the computer is on, press the button briefly to initiate Sleep.
			 When the computer is in the Sleep state, press the button briefly to exit Sleep.
			 When the computer is in Hibernation, press the button briefly to exit Hibernation.
			CAUTION: Pressing and holding down the power button will result in the loss of unsaved information.
			If the computer has stopped responding and Microsoft® Windows® shutdown procedures are ineffective, press and hold the power button for at least 5 seconds to turn off the computer.
			To learn more about your power settings:
			 Select Start > Control Panel > System and Security > Power Options.
			 For more information, see the HP Notebook Reference Guide.
(3)	(⁽¹⁾)	Wireless button	Turns the wireless feature on or off but does not establish a wireless connection.
(4)	4 ⊘	Volume mute button	Mutes and restores speaker sound.
(5)	(1)	Web browser button	When Windows is running, press the button to open the default Web browser.

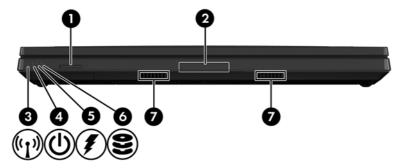

Component			Description
(6)		Calculator button	Activates the calculator function.
(7)		Fingerprint reader (select models only)	Allows a fingerprint logon to Windows, instead of a password logon.

Keys

Compo	nent	Description
(1)	esc key	Displays system information when pressed in combination with the fn key.
(2)	Function keys	Execute frequently used system functions when pressed in combination with the fn key. For more information, see Keyboard and pointing devices on page 22.
(3)	fn key	Executes frequently used system functions when pressed in combination with a function key, the num lk key, the esc key, or other keys. For more information, see Keyboard and pointing devices on page 22 .
(4)	Windows logo key	Displays the Windows Start menu.
(5)	Windows applications key	Displays a shortcut menu for items beneath the cursor.
(6)	Integrated numeric keypad	When num lk has been enabled, it can be used like an external numeric keypad. To alternate between this numeric function and the navigational function (indicated by the directional arrows on the keys), press the num lk key.
(7)	num lk key	Alternates between the navigational and numeric functions on the integrated numeric keypad.

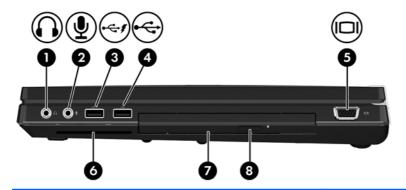

Front

Component			Description
(1)		Media Card Reader	Supports the following digital card formats:
			Secure Digital (SD) Card
			Secure Digital HC (SDHC) Card
			Secure Digital XC (SDXC) Card
			 MultiMediaCard (MMC)
			 MultiMediaCardplus (MMC+)
(2)		Display release latch	Opens the computer.
(3)	(₍₁₎	Wireless light	 White: An integrated wireless device, such as a wireless local area network (WLAN) device and/ or a Bluetooth® device, is on.
			Amber: All wireless devices are off.
(4)	۷ls	Power light	On: The computer is on.
	\mathbf{O}		Blinking: The computer is in the Sleep state.
			Off: The computer is off or in Hibernation.
(5)	#	AC adapter/Battery light	 Amber: The computer is connected to external power and the battery is charged from 0 to 90 percent.
			 White: The computer is connected to external power and the battery is charged from 90 to 99 percent.
			 Blinking amber: A battery that is the only available power source has reached a low battery level. When the battery reaches a critical battery level, the battery light begins blinking rapidly.
			Off: The battery is fully charged.

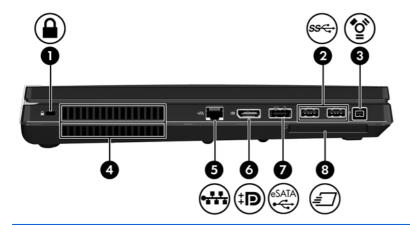

Component		Description	
(6)	Hard drive light	 Blinking white: The hard drive is being accessed. Amber: HP 3D DriveGuard has temporarily parked the hard drive. 	
		NOTE: For information on HP 3D DriveGuard, see the <i>HP Notebook Reference Guide</i> .	
(7)	Speakers (2)	Produce SRS Premium Sound (select models only).	
		NOTE: To use the SRS Premium Sound software, select Start > All Programs > SRS Premium Sound.	

Right

Com	ponent		Description	
(1)	$\mathbf{\Omega}$	Audio-out (headphone) jack	Produces sound when connected to optional powered stereo speakers, headphones, earbuds, a headset, or television audio.	
			WARNING! To reduce the risk of personal injury, adjust the volume before putting on headphones, earbuds, or a headset. For additional safety information, see the <i>Regulatory, Safety, and Environmental Notices</i> .	
			NOTE: When a device is connected to the jack, the computer speakers are disabled.	
(2)	₫	Audio-in (microphone) jack	Connects an optional computer headset microphone, stereo array microphone, or monaural microphone.	
(3)	•€†	USB 2.0 charging port	Connects an optional USB device. The USB 2.0 charging port can also charge select models of cell phones and MP3 players, even when the computer is off. For more information about USB devices, see the <i>HP Notebook Reference Guide</i> .	
(4)	~	USB 2.0 port	Connects an optional USB device. For more information about USB devices, see the <i>HP Notebook Reference Guide</i> .	
(5)		External monitor port	Connects an external VGA monitor or projector.	
(6)		Smart card reader (select models only)	Supports optional smart cards.	
(7)		Upgrade bay (optical drive shown)	The upgrade bay can hold a weight-saver option, a hard drive, or an optical drive that reads an optical disc.	
			NOTE: On select models, the optical drive also writes to an optical disc.	
(8)		Optical drive eject button (select models only)	Releases the disc tray.	

Left

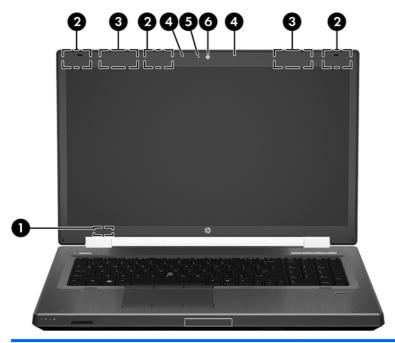

Com	Component		Description
(1)		Security cable slot	Attaches an optional security cable to the computer. NOTE: The security cable is designed to act as a deterrent, but it may not prevent the computer from being mishandled or stolen.
(2)	ss←	USB 3.0 ports (2)	Connect optional USB 3.0 devices and provide enhanced USB power performance.
(3)	″ੂ•ੇ	1394 port	Connects an optional IEEE 1394 or 1394a device, such as a camcorder.
(4)		Vents (2)	Enable airflow to cool internal components. NOTE: The computer fan starts up automatically to cool internal components and prevent overheating. It is normal for the internal fan to cycle on and off during routine operation.
(5)	***	RJ-45 (network) jack	Connects a network cable.
(6)	Ð	DisplayPort	Connects an optional digital display device, such as a high-performance monitor or projector.
(7)	eSATA	eSATA/USB 2.0 combo port	Connects an optional high-performance eSATA component, such as an eSATA external hard drive, or connects an optional USB device.
(8)	₽	HP ExpressCard slot	Supports optional ExpressCards.

Rear

Component			Description
(1)	Ç	RJ-11 (modem) jack	Connects a modem cable.
(2)		Vents (2)	Enable airflow to cool internal components. NOTE: The computer fan starts up automatically to cool internal components and prevent overheating. It is normal for the internal fan to cycle on and off during routine operation.
(3)	Ą	Power connector	Connects an AC adapter.

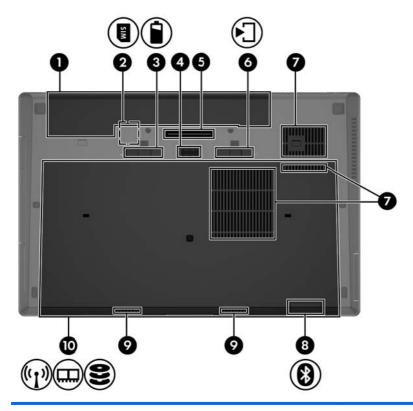

Display

Component		Description
(1)	Internal display switch	Turns off the display or initiates Sleep if the display is closed while the power is on.
		NOTE: The display switch is not visible from the outside of the computer.
(2)	WLAN antennas (3)*	Send and receive wireless signals to communicate with wireless local area networks (WLAN).
(3)	WWAN antennas (2)* (select models only)	Send and receive wireless signals to communicate with wireless wide area networks (WWAN).
(4)	Internal microphones (2)	Record sound.
(5)	Webcam light	On: The webcam is in use.
(6)	Webcam	Records video and captures still photographs.
		To use the webcam, select Start > All Programs > Communication and Chat > HP Webcam .

^{*}The antennas are not visible from the outside of the computer. For optimal transmission, keep the areas immediately around the antennas free from obstructions. To see wireless regulatory notices, see the section of the *Regulatory, Safety, and Environmental Notices* that applies to your country or region. These notices are located in Help and Support.

Bottom

Com	ponent		Description	
(1)		Battery bay	Holds the battery.	
(2)	SIM	SIM slot	Supports a wireless subscriber identity module (SIM). The SIM slot is located inside the battery bay.	
(3)		Battery release latch	Releases the battery.	
(4)		Accessory battery connector	Connects an optional accessory battery.	
(5)		Docking connector	Connects an optional docking device.	
(6)	Service door release latch Releases the service door from		Releases the service door from the computer.	
(7)		Vents (3)	Enable airflow to cool internal components.	
			NOTE: The computer fan starts up automatically to cool internal components and prevent overheating. It is normal for the internal fan to cycle on and off during routine operation.	
(8)	8	Bluetooth compartment	Contains a Bluetooth device (select models only).	

Com	Component		Description
(9)		Speakers (2)	Produce sound.
			NOTE: To use the SRS Premium Sound software, select Start > All Programs > SRS Premium Sound.
(10)		Service door	Provides access to the hard drive bay, the wireless LAN (WLAN) module slot, the WWAN module slot, and the memory module slots.
			NOTE: To prevent an unresponsive system, replace the wireless module only with a wireless module authorized for use in the computer by the governmental agency that regulates wireless devices in your country or region. If you replace the module and then receive a warning message, remove the module to restore computer functionality, and then contact technical support through Help and Support.

Networking

NOTE: Internet hardware and software features vary depending on computer model and your location.

Your computer may support one or both of the following types of Internet access:

- Wireless—For mobile Internet access, you can use a wireless connection. For more information, see Connecting to an existing WLAN on page 19 or Setting up a new WLAN network on page 20.
- Wired—You can access the Internet by connecting to a wired network. For information on connecting to a wired network, see the HP Notebook Reference Guide.

Using an Internet service provider (ISP)

Before you can connect to the Internet, you must establish an ISP account. Contact a local ISP to purchase Internet service and a modem. The ISP will help set up the modem, install a network cable to connect your wireless computer to the modem, and test the Internet service.

NOTE: Your ISP will give you a user ID and password to access the Internet. Record this information and store it in a safe place.

The following features will help you set up a new Internet account or configure the computer to use an existing account:

- Internet Services & Offers (available in some locations)—This utility assists with signing up for a new Internet account and configuring the computer to use an existing account. To access this utility, select Start > All Programs > Communication and Chat.
- **ISP-provided icons (available in some locations)**—These icons may be displayed either individually on the Windows desktop or grouped in a desktop folder named Online Services. To set up a new Internet account or configure the computer to use an existing account, double-click an icon, and then follow the on-screen instructions.
- **Windows Connect to the Internet Wizard**—You can use the Windows Connect to the Internet Wizard to connect to the Internet in any of these situations:
 - You already have an account with an ISP.
 - You do not have an Internet account and want to select an ISP from the list provided within the wizard. (The list of ISP providers is not available in all regions.)
 - You have selected an unlisted ISP, and the ISP has provided you with information such as a specific IP address and POP3 and SMTP settings.

To access the Windows Connect to the Internet Wizard and instructions for using it, select **Start > Control Panel > Network and Internet > Network and Sharing Center**.

NOTE: If you are prompted within the wizard to choose between enabling or disabling Windows Firewall, choose to enable the firewall.

Connecting to a wireless network

Wireless technology transfers data across radio waves instead of wires. Your computer may be equipped with one or more of the following wireless devices:

- Wireless local area network (WLAN) device
- HP Mobile Broadband Module, a wireless wide area network (WWAN) device
- Bluetooth device

For more information on wireless technology and connecting to a wireless network, see the *HP Notebook Reference Guide* and information and website links provided in Help and Support.

Connecting to an existing WLAN

- 1. Turn on the computer.
- 2. Be sure that the WLAN device is on.

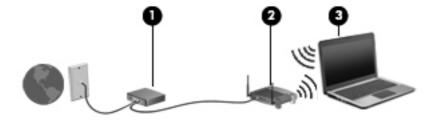

- Click the network icon in the notification area, at the far right of the taskbar.
- Select a WLAN to connect to.
 - NOTE: If no WLANs are listed, you may be out of range of a wireless router or access point.
 - NOTE: If you do not see the WLAN you want to connect to, click **Open Network and Sharing Center**, and then click **Set up a new connection or network**. A list of options is displayed. You can choose to manually search for and connect to a network or to create a new network connection.
- Click Connect.
- 6. If the network is a security-enabled WLAN, you are prompted to enter a network security code. Type the code, and then click **OK** to complete the connection.

Setting up a new WLAN network

Required equipment:

- A broadband modem (either DSL or cable) (purchased separately) (1) and high-speed Internet service purchased from an Internet service provider (ISP)
- A wireless router (purchased separately) (2)
- Your new wireless computer (3)
- NOTE: Some modems have a built-in wireless router. Check with your ISP to determine what type of modem you have.

The illustration shows an example of a completed WLAN network installation that is connected to the Internet. As your network grows, additional wireless and wired computers can be connected to the network to access the Internet.

Configuring a wireless router

For help in setting up a WLAN, see the information provided by your router manufacturer or your ISP.

The Windows operating system also provides tools to help you set up a new wireless network. To use the Windows tools to set up your network:

Select Start > Control Panel > Network and Internet > Network and Sharing Center > Set up a new connection or network > Set up a network. Then follow the on-screen instructions.

NOTE: It is recommended that you initially connect your new wireless computer to the router by using the network cable provided with the router. When the computer successfully connects to the Internet, you can disconnect the cable, and then access the Internet through your wireless network.

Protecting your WLAN

When you set up a WLAN or access an existing WLAN, always enable security features to protect your network from unauthorized access.

For information on protecting your WLAN, see the HP Notebook Reference Guide.

4 Keyboard and pointing devices

Using the keyboard

Identifying the hot keys

A hot key is a combination of the fn key (1) and either the esc key (2), or one of the function keys (3).

To use a hot key:

▲ Briefly press the fn key, and then briefly press the second key of the hot key combination.

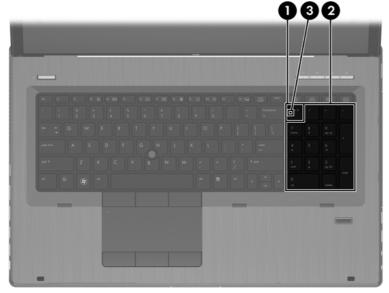

Hot key combination		Description	
	fn+esc	Displays system information.	
	fn+f3	Initiates Sleep, which saves your information in system memory. The display and other system components turn off and power is conserved.	
To exit Sleep, briefly press the power button.		To exit Sleep, briefly press the power button.	
		CAUTION: To reduce the risk of information loss, save your work before initiating Sleep.	
		NOTE: If a critical battery level occurs while the computer is in the Sleep state, the computer initiates Hibernation and the information stored in system memory is saved to the hard drive.	
		The function of the fn+f3 hot key can be changed. For example, you can set the fn+f3 hot key to initiate Hibernation instead of Sleep. In all Windows operating system windows, references to the sleep button apply to the fn+f3 hot key.	

Hot key combination		Description	
	fn+f4	Switches the screen image among display devices connected to the system. For example, if a monitor is connected to the computer, fn+f4 alternates the screen image from computer display to monitor display to simultaneous display on both the computer and the monitor.	
		Most external monitors receive video information from the computer using the external VGA video standard. The fn+f4 hot key can also alternate images among other devices that are receiving video information from the computer.	
♠)	fn+f6	Decreases speaker volume.	
4)))	fn+f7	Increases speaker volume.	
ê	fn+f8	Launches HP Power Assistant. Displays charge information for all installed batteries. The display indicates which batteries are charging and reports the amount of charge remaining in each battery.	
*	fn+f9	Decreases the screen brightness level.	
*	fn+f10	Increases the screen brightness level.	
.1	fn+f12	Turns the keyboard backlight (select models only) on and off.	
		The fn+f12 key toggles the keyboard backlight brightness level in the following order:	
		1. Off	
		2. Full brightness level	
		3. Half brightness level	
		NOTE: The keyboard backlight is turned on at the factory. To extend battery life, turn off the keyboard backlight.	

Using keypads

The computer includes an integrated numeric keypad. The computer also supports an optional external numeric keypad, or an optional external keyboard that includes a numeric keypad.

Using the integrated numeric keypad

	Component	Description	
(1)	num lk key	Alternates between the navigational and numeric functions on the integrated numeric keypad.	
		NOTE: The keypad function that is active when the computer is turned off is reinstated when the computer is turned back on.	
(2)	Integrated numeric keypad	Set at the factory to function like an external numeric keypad. To alternate between this numeric function and the navigational function (indicated by the directional arrows on the keys), press the num lk key.	
(3)	Num lk light	On: The keypad function is numeric.	
		Off: The keypad function is navigational.	

Using an optional external numeric keypad

Keys on most external numeric keypads function differently according to whether num lock is on or off. (Num lock is turned off at the factory.) For example:

- When num lock is on, most keypad keys type numbers.
- When num lock is off, most keypad keys function like the arrow, page up, or page down keys.

When num lock on an external keypad is turned on, the num lock light on the computer is turned on. When num lock on an external keypad is turned off, the num lock light on the computer is turned off.

To turn num lock on or off on an external keypad as you work:

Press the num lk key on the external keypad, not on the computer.

Using pointing devices

NOTE: In addition to the pointing devices included with your computer, you can use an external USB mouse (purchased separately) by connecting it to one of the USB ports on the computer.

Setting pointing device preferences

Use Mouse Properties in Windows to customize settings for pointing devices, such as button configuration, click speed, and pointer options.

To access Mouse Properties:

 Select Start > Devices and Printers. Then right-click the device representing your computer, and select Mouse settings.

Using the pointing stick

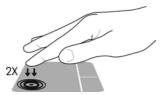

Press the pointing stick in the direction you want to move the pointer on the screen. Use the left and right pointing stick buttons as you would the left and right buttons on an external mouse.

Using the TouchPad

To move the pointer, slide one finger across the TouchPad in the direction you want the pointer to go. Use the left and right TouchPad buttons like the buttons on an external mouse.

Turning the TouchPad off and on

To turn the TouchPad off and on, quickly double-tap the TouchPad on/off button.

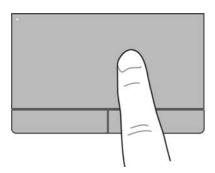

The TouchPad light and onscreen display icons indicate the TouchPad status. The following table shows and describes the TouchPad display icons.

TouchPad light	lcon	Description
Amber	×	Indicates that the TouchPad is off.
Off	8	Indicates that the TouchPad is on.

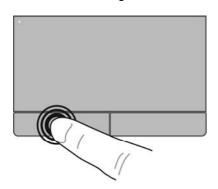

Navigating

To move the pointer, slide one finger across the TouchPad in the direction you want the pointer to go.

Selecting

Use the left and right TouchPad buttons like the corresponding buttons on an external mouse.

Using TouchPad gestures

The TouchPad supports a variety of gestures. To use TouchPad gestures, place two fingers on the TouchPad at the same time.

NOTE: TouchPad gestures are not supported in all programs.

To view the demonstration of a gesture:

- 1. Click the **Show hidden icons** icon in the notification area, at the far right of the taskbar.
- 2. Click the Synaptics Pointing Device icon , and then click Pointing Device Properties.
- Click the Device Settings tab, select the device in the window that is displayed, and then click Settings.
- 4. Select the gesture to activate the demonstration.

To turn the gestures on and off:

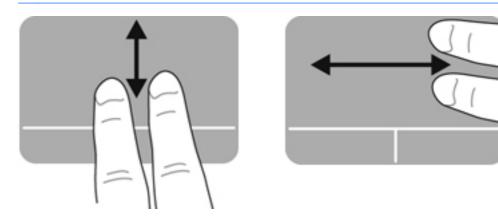

- 1. Click the **Show hidden icons** icon in the notification area, at the far right of the taskbar.
- 2. Click the Synaptics Pointing Device icon , and then click Pointing Device Properties.
- Click the Device Settings tab, select the device in the window that is displayed, and then click Settings.
- Select the check box next to the gesture that you want to turn on or off.
- 5. Click Apply, and then click OK.

Scrolling

Scrolling is useful for moving up, down, or sideways on a page or image. To scroll, place two fingers slightly apart on the TouchPad, and then drag them across the TouchPad in an up, down, left, or right motion.

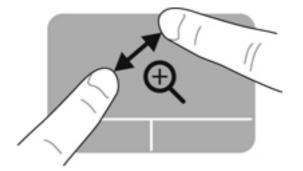

NOTE: Scrolling speed is controlled by finger speed.

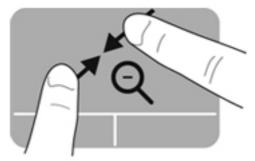

Pinching/Zooming

Pinching allows you to zoom in or out on images or text.

- Zoom in by placing two fingers together on the TouchPad, and then moving them apart.
- Zoom out by placing two fingers apart on the TouchPad, and then moving them together.

Rotating

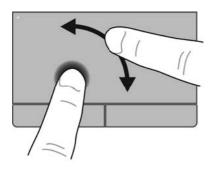

Rotating allows you to rotate items such as photos. To rotate, anchor your left forefinger in the TouchPad zone. Move the right forefinger around the anchored finger in a sweeping motion, moving from 12 o'clock to 3 o'clock. To reverse the rotation, move your right forefinger from 3 o'clock to 12 o'clock.

N

NOTE: Rotating must be done within the TouchPad zone.

NOTE: Rotating is disabled at the factory.

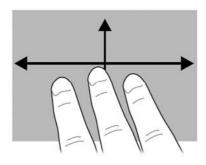

Flicking

Flicking allows you to navigate through screens or quickly scroll through documents. To flick, use three fingers to touch the TouchPad zone in a light, quick flicking motion up, down, left, or right.

NOTE: Three-finger flicking is disabled at the factory.

5 Maintenance

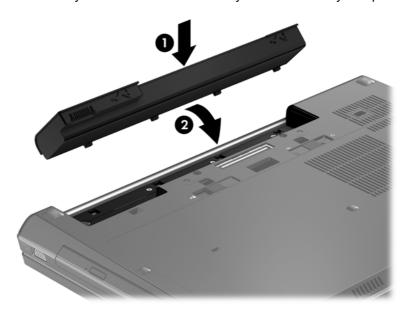

Inserting or removing the battery

NOTE: For additional information on using the battery, see the HP Notebook Reference Guide.

To insert the battery:

▲ Insert the battery (1) into the battery bay until it is seated (2).

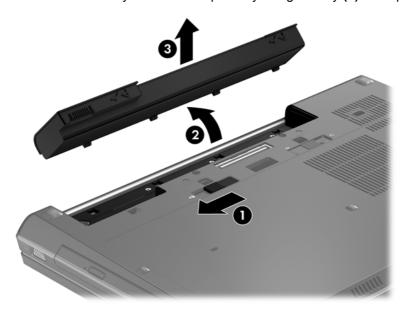

The battery release latch automatically locks the battery into place.

To remove the battery:

1. Slide the battery release latch (1) to release the battery.

Remove the battery from the computer by lifting it away (2) and up (3) from the computer.

Removing or replacing the service door

A CAUTION: To prevent information loss or an unresponsive system:

Save your work and shut down the computer before adding or replacing a memory module or hard drive.

If you are not sure whether the computer is off or in Hibernation, turn the computer on by pressing the power button. Then shut down the computer through the operating system.

Removing the service door

Remove the service door to access the memory module slot, hard drive, regulatory label, and other components.

To remove the service door:

- 1. Remove the battery (see <u>Inserting or removing the battery on page 30</u>).
- 2. With the battery bay toward you, slide the service door release latch (1) to the left, remove the screw (if the optional screw is being used) (2), and then slide the release latch again (3) to release the service door.
- Slide the service door towards the front of the computer (4) and lift (5) to remove the service door.

Replacing the service door

Replace the service door after accessing the memory module slot, hard drive, regulatory label, and other components.

To replace the service door:

- 1. Tilt down the service door to align the front edge of the service door near the front edge of the computer (1).
- 2. Insert the alignment tabs (2) on the rear edge of the service door with the notches on the computer.
- 3. Slide the service door towards the battery bay until the service door snaps into place.
- 4. With the battery bay toward you, slide the service door release latch to the left (3), and if you choose to, insert and tighten the optional screw (4) to hold the service door in place. Slide the release latch to the right to lock the service door (5).
 - NOTE: If you want to use the optional screw, it is stored inside the service door.

5. Insert the battery (see <u>Inserting or removing the battery on page 30</u>).

Replacing or upgrading the hard drive

A CAUTION: To prevent information loss or an unresponsive system:

Shut down the computer before removing the hard drive from the hard drive bay. Do not remove the hard drive while the computer is on, in the Sleep state, or in Hibernation.

If you are not sure whether the computer is off or in Hibernation, turn the computer on by pressing the power button. Then shut down the computer through the operating system.

Intel Smart Response Technology (select models only)

Intel® Smart Response Technology (SRT) is an Intel Rapid Storage Technology (RST) caching feature that significantly enhances computer system performance. SRT allows computers with an SSD mSATA module to be used as cache memory between the system memory and the hard disk drive. This provides the hard disk drive (or a RAID volume) for maximum storage capacity while simultaneously delivering an SSD-enhanced system performance experience.

If you add a hard drive and intend to set a RAID volume, you must temporarily disable SRT, set the RAID volume, and then enable SRT.

To temporarily disable SRT:

- Select Start > All Programs > Intel > Rapid Storage Technology.
- Click Disable acceleration on the Accelerate tab.
- NOTE: Wait for the Acceleration Mode to complete.

IMPORTANT: You must temporarily disable SRT when changing RAID modes. Make the change, and then reenable SRT. Failure to temporarily disable this feature will prevent you from creating or changing RAID volumes.

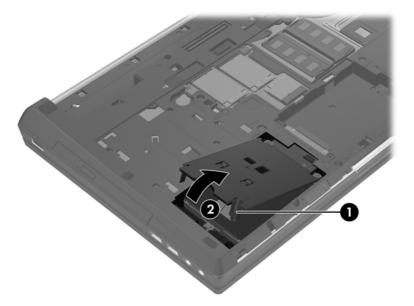

For additional information about RAID, see the RAID User Guide located in Help and Support.

Removing the primary hard drive

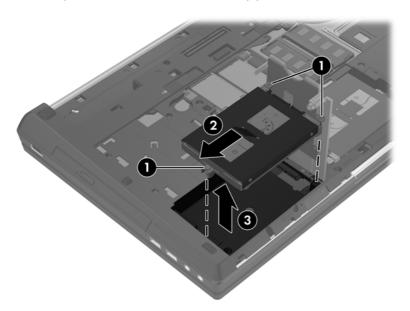

To remove the primary hard drive:

- 1. Save your work and shut down the computer.
- 2. Disconnect AC power and external devices connected to the computer.
- Turn the computer upside down on a flat surface.
- 4. Remove the battery (see Inserting or removing the battery on page 30).
- 5. Remove the service door (see Removing or replacing the service door on page 32).
- Loosen the smart card holder cover screw (1).

7. Open the smart card holder cover (2) to a vertical position.

- 8. Loosen the hard drive screws (1).
- **9.** Pull the plastic tab on the hard drive **(2)** towards the left side of the computer to disengage the hard drive from the connector.
- 10. Use the plastic tab to lift the hard drive (3) and remove it from the computer.

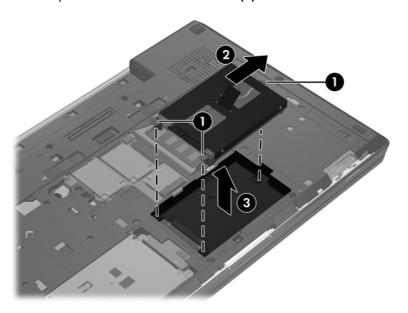

Removing the secondary hard drive

To remove the secondary hard drive:

- 1. Save your work and shut down the computer.
- 2. Disconnect AC power and external devices connected to the computer.
- 3. Turn the computer upside down on a flat surface, with the secondary hard drive bay toward you.

- 4. Remove the battery (see <u>Inserting or removing the battery on page 30</u>).
- 5. Remove the service door (see Removing or replacing the service door on page 32).
- 6. Loosen the hard drive screws (1).
- 7. Pull the plastic tab on the hard drive (2) towards the right side of the computer to disengage the hard drive from the connector.
- 8. Use the plastic tab to lift the hard drive (3) and remove it from the computer.

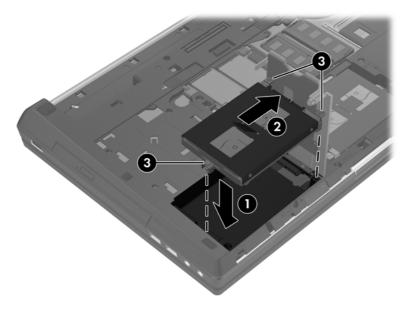

Installing the primary hard drive

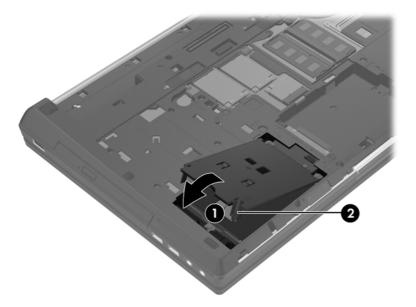

To install the primary hard drive:

- 1. Disconnect all external devices connected to the computer.
- 2. Unplug the power cord from the AC outlet.
- 3. Turn the computer upside down on a flat surface, with the secondary hard drive bay toward you.
- 4. Remove the battery (see Inserting or removing the battery on page 30).
- 5. Remove the service door (see Removing or replacing the service door on page 32).
- 6. Insert the hard drive into the primary hard drive bay at an angle, and then lay the hard drive flat in the hard drive bay (1).
- Pull the plastic tab (2) towards the center of the computer to engage the hard drive with the connector.

Tighten the hard drive screws (3).

- Align the tabs on the hard drive door (1) with the notches on the computer.
- 10. Tighten the smart card holder cover screw (2).

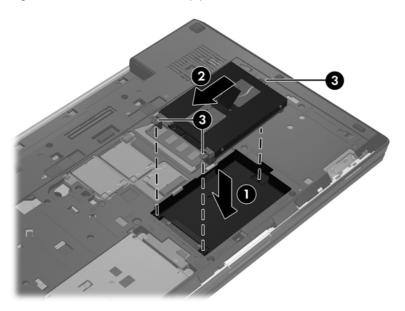

- 11. Replace the service door (see Removing or replacing the service door on page 32).
- 12. Replace the battery (see <u>Inserting or removing the battery on page 30</u>).
- **13.** Connect AC power and external devices to the computer.
- **14.** Turn on the computer.

Installing the secondary hard drive

To install the secondary hard drive:

- 1. Disconnect all external devices connected to the computer.
- 2. Unplug the power cord from the AC outlet.
- 3. Turn the computer upside down on a flat surface, with the secondary hard drive bay toward you.
- 4. Remove the battery (see <u>Inserting or removing the battery on page 30</u>).
- 5. Remove the service door (see Removing or replacing the service door on page 32).
- 6. Insert the hard drive into the secondary hard drive bay at an angle, and then lay the hard drive flat in the hard drive bay (1).
- 7. Pull the plastic tab (2) towards the center of the computer to engage the hard drive with the connector.
- 8. Tighten the hard drive screws (3).

- 9. Replace the service door (see Removing or replacing the service door on page 32).
- **10.** Replace the battery (see <u>Inserting or removing the battery on page 30</u>).
- 11. Connect AC power and external devices to the computer.
- **12.** Turn on the computer.

Replacing a drive in the upgrade bay

The upgrade bay can hold either a hard drive or an optical drive.

Replacing a hard drive

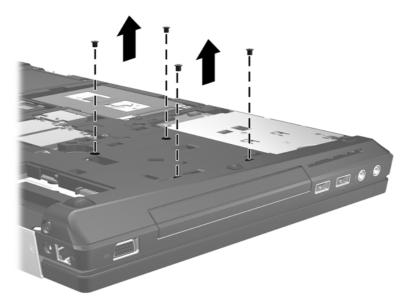

↑ CAUTION: To prevent information loss or an unresponsive system:

Shut down the computer before removing the hard drive from the upgrade bay. Do not remove the hard drive while the computer is on, in the Sleep state, or in Hibernation.

If you are not sure whether the computer is off or in Hibernation, turn the computer on by pressing the power button. Then shut down the computer through the operating system.

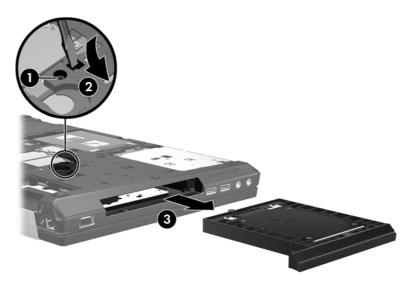

To remove a hard drive from the upgrade bay:

- Save your work.
- 2. Shut down the computer and close the display.
- 3. Disconnect all external devices connected to the computer.
- 4. Unplug the power cord from the AC outlet.
- 5. Turn the computer upside down on a flat surface, with the upgrade bay toward you.
- **6.** Remove the battery (see <u>Inserting or removing the battery on page 30</u>).
- 7. Remove the service door (see Removing or replacing the service door on page 32).
- 8. Remove the hard drive screws from the upgrade bay.

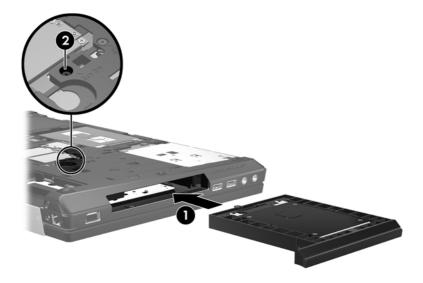

- Loosen the upgrade bay screw (1).
- 10. Using a flat-bladed screwdriver, gently push the tab to release the hard drive (2).

11. Remove the hard drive from the upgrade bay (3).

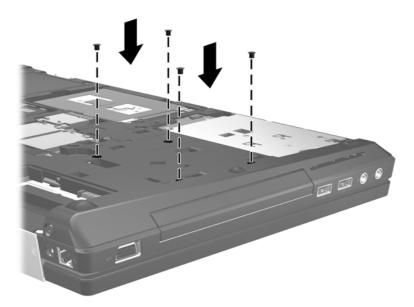

To install a hard drive in the upgrade bay:

- 1. Turn the computer upside down on a flat surface, with the upgrade bay toward you.
- 2. Insert the hard drive (1) into the upgrade bay, and then tighten the upgrade bay screw (2).

3. Replace the hard drive screws.

- 4. Replace the service door (see Removing or replacing the service door on page 32).
- 5. Insert the battery (see <u>Inserting or removing the battery on page 30</u>).
- **6.** Turn the computer right-side up, and then reconnect AC power and external devices to the computer.
- 7. Turn on the computer.

Replacing an optical drive

<u>∧ CAUTION</u>: To prevent information loss or an unresponsive system:

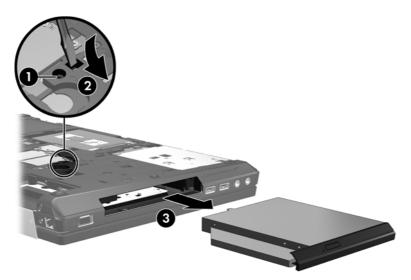

Shut down the computer before removing the optical drive from the upgrade bay. Do not remove the optical drive while the computer is on, in the Sleep state, or in Hibernation.

If you are not sure whether the computer is off or in Hibernation, turn the computer on by pressing the power button. Then shut down the computer through the operating system.

To remove an optical drive from the upgrade bay:

- 1. Save your work.
- 2. Shut down the computer and close the display.
- 3. Disconnect all external devices connected to the computer.
- 4. Unplug the power cord from the AC outlet.
- 5. Turn the computer upside down on a flat surface, with the upgrade bay toward you.
- **6.** Remove the battery (see <u>Inserting or removing the battery on page 30</u>).
- 7. Remove the service door (see Removing or replacing the service door on page 32).
- 8. Loosen the upgrade bay screw (1).

- Using a flat-bladed screwdriver, gently push the tab to release the optical drive (2).
- 10. Remove the optical drive from the upgrade bay (3).

To install an optical drive in the upgrade bay:

- 1. Turn the computer upside down on a flat surface, with the upgrade bay toward you.
- 2. Insert the optical drive into the upgrade bay (1).
- 3. Tighten the upgrade bay screw (2).

- 4. Replace the service door (see Removing or replacing the service door on page 32).
- 5. Insert the battery (see <u>Inserting or removing the battery on page 30</u>).
- **6.** Turn the computer right-side up, and then reconnect AC power and external devices to the computer.
- 7. Turn on the computer.

Adding or replacing memory modules

The computer has two memory module slots (or 4 memory module slots if there are quad core processors). The capacity of the computer can be upgraded by adding a memory module to the vacant expansion memory module slot or by upgrading the existing memory module in the memory module slot.

- **WARNING!** To reduce the risk of electric shock and damage to the equipment, unplug the power cord and remove all batteries before installing a memory module.
- CAUTION: Electrostatic discharge (ESD) can damage electronic components. Before beginning any procedure, ensure that you are discharged of static electricity by touching a grounded metal object.
- NOTE: Computers with dual core processors have 2 slots. Computers with quad core processors have 4 slots.
- NOTE: To use a dual-channel configuration when adding a second memory module, be sure that both memory modules are identical.

Adding or replacing the memory module underneath the service door

(CAUTION: To prevent information loss or an unresponsive system:

Shut down the computer before adding or replacing memory modules. Do not remove a memory module while the computer is on, in the Sleep state, or in Hibernation.

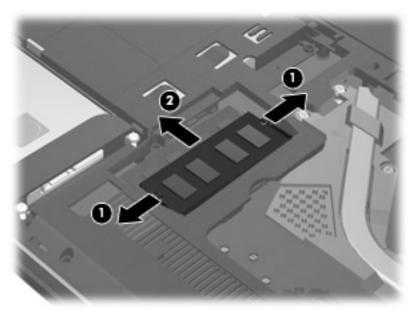

If you are not sure whether the computer is off or in Hibernation, turn the computer on by pressing the power button. Then shut down the computer through the operating system.

To add or replace the memory module underneath the service door:

- 1. Save your work and shut down the computer.
- 2. Disconnect AC power and external devices connected to the computer.
- 3. Turn the computer upside down on a flat surface, with the battery bay away from you.
- 4. Remove the battery (see Inserting or removing the battery on page 30).
- 5. Remove the service door (see Removing or replacing the service door on page 32).
- 6. If you are replacing a memory module, remove the existing memory module:
 - **a.** Pull away the retention clips (1) on each side of the memory module.

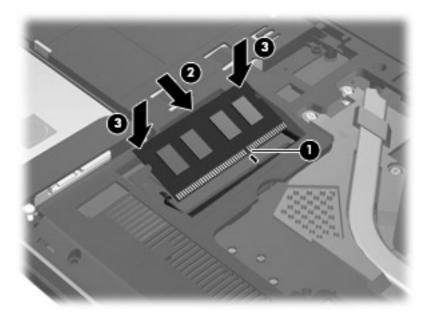

The memory module tilts up.

- **b.** Grasp the edge of the memory module **(2)**, and then gently pull the memory module out of the memory module slot.

To protect a memory module after removal, place it in an electrostatic-safe container.

- 7. Insert a new memory module:
 - <u>CAUTION</u>: To prevent damage to the memory module, hold the memory module by the edges only. Do not touch the components on the memory module.
 - a. Align the notched edge (1) of the memory module with the tab in the memory module slot.
 - **b.** With the memory module at a 45-degree angle from the surface of the memory module compartment, press the module (2) into the memory module slot until it is seated.
 - **c.** Gently press the memory module **(3)** down, applying pressure to both the left and right edges of the memory module, until the retention clips snap into place.
 - <u>CAUTION</u>: To prevent damage to the memory module, be sure that you do not bend the memory module.

- 8. Replace the service door (see Removing or replacing the service door on page 32
- Insert the battery (see <u>Inserting or removing the battery on page 30</u>).
- 10. Connect AC power and external devices to the computer.
- **11.** Turn on the computer.

Adding or replacing the memory module underneath the keyboard

↑ CAUTION: To prevent information loss or an unresponsive system:

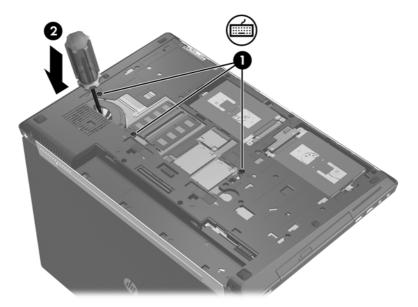

Shut down the computer before adding or replacing memory modules. Do not remove a memory module while the computer is on, in the Sleep state, or in Hibernation.

If you are not sure whether the computer is off or in Hibernation, turn the computer on by pressing the power button. Then shut down the computer through the operating system.

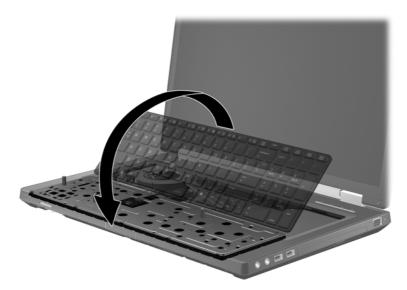

To replace the memory module underneath the keyboard:

- 1. Save your work and shut down the computer.
- 2. Disconnect AC power and external devices connected to the computer.
- 3. Turn the computer upside down on a flat surface, with the battery bay away from you.
- 4. Remove the battery (see <u>Inserting or removing the battery on page 30</u>).
- 5. Remove the service door (see Removing or replacing the service door on page 32).
- **6.** Remove the keyboard:
 - **a.** With the computer upside down, loosen the keyboard screws **(1)** on the bottom of the computer.

- b. Release the keyboard by pressing down on the back of the keyboard in the fan area (2).
 - CAUTION: To prevent damaging the fan and keyboard, do not use excessive force when pressing on the keyboard and avoid contact with the fan blades. Also, be sure and use a screwdriver that will fit comfortably between the fan blades when performing this procedure.

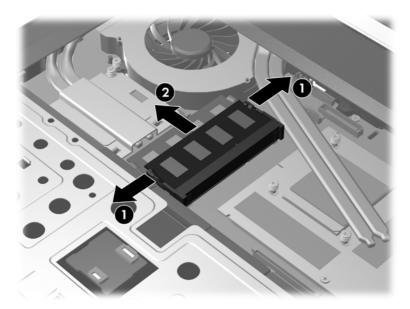

- **c.** Turn the computer right-side up, lift the top edge of the keyboard, and then rest the keyboard on the TouchPad.
- NOTE: Do not disconnect the keyboard cable. To avoid disconnecting the keyboard cable, do not pull the keyboard away from the computer.

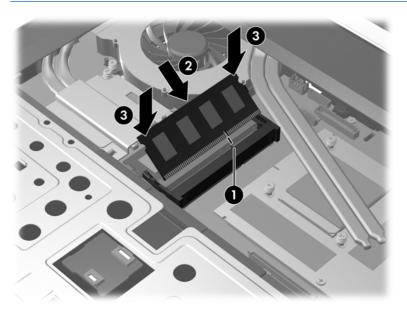

- If you are replacing a memory module, remove the existing memory module:
 - a. Pull away the retention clips (1) on each side of the memory module.The memory module tilts up.

- **b.** Grasp the edge of the memory module **(2)**, and then gently pull the memory module out of the memory module slot.
- CAUTION: To prevent damage to the memory module, hold the memory module by the edges only. Do not touch the components on the memory module.

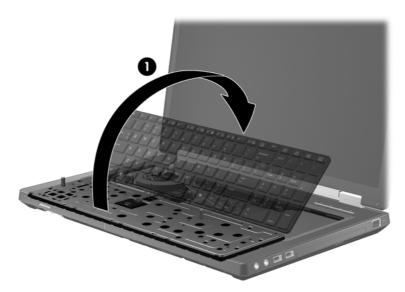

- 8. Insert a new memory module:
 - CAUTION: To prevent damage to the memory module, hold the memory module by the edges only. Do not touch the components on the memory module.
 - a. Align the notched edge (1) of the memory module with the tab in the memory module slot.
 - **b.** With the memory module at a 45-degree angle from the surface of the memory module compartment, press the module (2) into the memory module slot until it is seated.

- **c.** Gently press the memory module **(3)** down, applying pressure to both the left and right edges of the memory module, until the retention clips snap into place.
 - CAUTION: To prevent damage to the memory module, be sure that you do not bend the memory module.

- 9. Replace the keyboard:
 - **a.** Lift up the keyboard and flip it over **(1)**, resting it on the base enclosure.

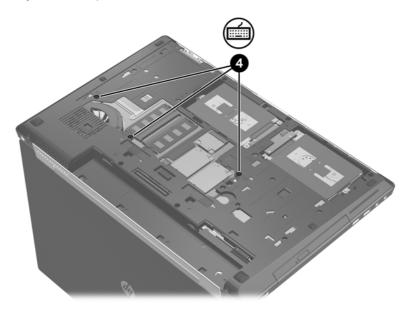

b. Slide the keyboard tabs **(2)** into the base enclosure slots.

c. Press gently on the left and right sides of the keyboard, and then press gently on the top of the keyboard **(3)** so that it snaps in place.

d. Turn the computer upside down, and then tighten the 3 keyboard screws **(4)** to lock the keyboard into place.

- 10. Replace the service door (see Removing or replacing the service door on page 32).
- 11. Insert the battery (see <u>Inserting or removing the battery on page 30</u>).
- **12.** Connect AC power and external devices to the computer.
- **13.** Turn on the computer.

Using the DreamColor display (select models only)

Computer models with the HP DreamColor display include the preinstalled HP Mobile Display Assistant software. You can use this program to adjust display color settings such as preset color space, white point/color temperature, and luminance/brightness.

▲ To access Mobile Display Assistant, click the Mobile Display Assistant icon in the notification area, at the far right of the taskbar, or select Start > All Programs > Productivity and Tools > Mobile Display Assistant.

Updating programs and drivers

HP recommends that you update your programs and drivers on a regular basis with the latest versions. For U.S. support, go to http://www.hp.com/go/contactHP. For worldwide support, go to http://www.hp.com/go/contactHP. For worldwide support, go to http://www.hp.com/go/contactHP. For worldwide support, go to http://www.hp.com/country/us/en/wwcontact_us.html.

Cleaning your computer

Cleaning products

Use the following products to safely clean and disinfect your computer:

- Dimethyl benzyl ammonium chloride 0.3 percent maximum concentration (For example: germicidal disposable wipes. These wipes come in a variety of brand names.)
- Alcohol-free glass cleaning fluid
- Water with mild soap solution
- Dry microfiber cleaning cloth or a chamois (static-free cloth without oil)
- Static-free cloth wipes

CAUTION: Avoid the following cleaning products:

Strong solvents, such as alcohol, acetone, ammonium chloride, methylene chloride, and hydrocarbons, which can permanently damage the surface of the computer.

Fibrous materials, such as paper towels, which can scratch the computer. Over time, dirt particles and cleaning agents can get trapped in the scratches.

Cleaning procedures

Follow the procedures in this section to safely clean your computer.

<u>MARNING!</u> To prevent electric shock or damage to components, do not attempt to clean your computer while it is turned on:

- 1. Turn off the computer.
- Disconnect external power.
- Disconnect all powered external devices.

Cleaning the display

Gently wipe the display using a soft, lint-free cloth moistened with an *alcohol-free* glass cleaner. Be sure that the display is dry before closing the display.

Cleaning the sides and cover

To clean and disinfect the sides and cover, use a soft microfiber cloth or chamois moistened with one of the cleaning solutions listed previously or use an acceptable germicidal disposable wipe.

NOTE: When cleaning the cover of the computer, use a circular motion to aid in removing dirt and debris.

Cleaning the TouchPad and keyboard

- <u>WARNING!</u> To reduce the risk of electric shock or damage to internal components, do not use a vacuum cleaner attachment to clean the keyboard. A vacuum cleaner can deposit household debris on the keyboard surface.
- - To clean and disinfect the TouchPad and keyboard, use a soft microfiber cloth or chamois moistened with one of the cleaning solutions listed previously or use an acceptable germicidal disposable wipe.
 - To prevent keys from sticking and to remove dust, lint, and particles from the keyboard, use a can of compressed air with a straw extension.

6 Backup and recovery

To protect your information, use Windows Backup and Restore to back up individual files and folders, back up your entire hard drive (select models only), create system repair discs (select models only)with the installed optical drive (select models only) or an optional external optical drive, or create system restore points. In case of system failure, you can use the backup files to restore the contents of your computer.

Windows Backup and Restore provides the following options:

- Creating a system repair disc (select models only) by using the installed optical drive (select models only) or an optional external optical drive
- Backing up your information
- Creating a system image (select models only)
- Scheduling automatic backups (select models only)
- Creating system restore points
- Recovering individual files
- Restoring the computer to a previous state
- Recovering information using recovery tools

NOTE: For detailed instructions, perform a search for these topics in Help and Support.

In case of system instability, HP recommends that you print the recovery procedures and save them for later use.

NOTE: Windows includes the User Account Control feature to improve the security of your computer. You may be prompted for your permission or password for tasks such as installing software, running utilities, or changing Windows settings. See Help and Support for more information.

Creating recovery media with HP Recovery Disc Creator

HP Recovery Disc Creator is a software program that offers an alternative way to create recovery media. After you successfully set up the computer, you can create recovery media using HP Recovery Disc Creator. This recovery media performs a system recovery if the hard drive becomes corrupted. A system recovery reinstalls the original operating system and the software programs installed at the factory, and then configures the settings for the programs.

HP Recovery Disc Creator can create two kinds of recovery DVDs as follows:

- Windows DVD—Installs the operating system without additional drivers or applications.
 Choosing this selection creates a DVD that restores the original operating system and the software programs installed at the factory.
- Driver DVD—Installs specific drivers and applications only, in the same way that the HP Software Setup utility installs drivers and applications.

Creating recovery media

NOTE: Operating system recovery media can be created only once. Thereafter, the option to create that media will not be available.

- Select Start > All Programs > Productivity and Tools > HP Recovery Disc Creator.
- Select Driver DVD or Windows DVD.
- 3. From the drop-down menu, select the drive for burning the recovery media.
- 4. Click the **Burn** button to start the burning process.

Backing up your information

Recovery after a system failure is as good as your most recent backup. Immediately after software setup, you should create system repair discs (select models only) using HP Recovery Disc Creator using the installed optical drive (select models only) or an optional external optical drive and back up your system. As you add new software and data files, you should continue to back up your system on a regular basis to maintain a reasonably current backup. The system repair discs (select models only) are used to start up (boot) the computer and repair the operating system in case of system instability or failure. Your initial and subsequent backups allow you to restore your data and settings if a failure occurs.

You can back up your information to an optional external hard drive, a network drive, or discs.

Note the following when backing up:

- Store personal files in the Documents library, and back it up regularly.
- Back up templates that are stored in their associated programs.
- Save customized settings that appear in a window, toolbar, or menu bar by taking a screen shot
 of your settings. The screen shot can be a time-saver if you have to reset your preferences.
- When backing up to discs, use any of the following types of discs (purchased separately): CD-R, CD-RW, DVD+R, DVD+R DL, DVD-R, DVD-R DL, or DVD±RW. The discs you use will depend on the type of optical drive you are using.

- NOTE: DVDs and DVDs with double-layer (DL) support store more information than CDs, so using them for backup reduces the number of recovery discs required.
- When backing up to discs, number each disc before inserting it into the external drive.

To create a backup using Backup and Restore:

- NOTE: Be sure that the computer is connected to AC power before you start the backup process.
- NOTE: The backup process may take over an hour, depending on file size and the speed of the computer.
 - Select Start > All Programs > Maintenance > Backup and Restore.
 - 2. Follow the on-screen instructions to set up your backup, create a system image (select models only), or create a system repair disc (select models only).

Performing a system recovery

In case of system failure or instability, the computer provides the following tools to recover your files:

- Windows recovery tools: You can use Windows Backup and Restore to recover information you
 have previously backed up. You can also use Windows Startup Repair to fix problems that might
 prevent Windows from starting correctly.
- f11 recovery tools: You can use the f11 recovery tools to recover your original hard drive image.
 The image includes the Windows operating system and software programs installed at the factory.

NOTE: If you are unable to boot (start up) your computer and you cannot use the system repair discs you previously created (select models only), you must purchase a Windows 7 operating system DVD to reboot the computer and repair the operating system. For additional information, see <u>Using a Windows 7 operating system DVD</u> (purchased separately) on page 57.

Using the Windows recovery tools

To recover information you previously backed up:

- 1. Select Start > All Programs > Maintenance > Backup and Restore.
- 2. Follow the on-screen instructions to recover your system settings, your computer (select models only), or your files.

To recover your information using Startup Repair, follow these steps:

- CAUTION: Using Startup Repair completely erases hard drive contents and reformats the hard drive. All files you have created and any software installed on the computer are permanently removed. When reformatting is complete, the recovery process restores the operating system, as well as the drivers, software, and utilities from the backup used for recovery.
 - If possible, back up all personal files.
 - If possible, check for the presence of the Windows partition and the HP Recovery partition.
 - To check for the Windows partition, select **Start > Computer**.
 - To check for the HP Recovery partition, click **Start**, right-click **Computer**, click **Manage**, and then click **Disk Management**.
 - NOTE: If the HP Recovery partition has been deleted, the f11 restore option will not function. You must recover your operating system and programs using the Windows 7 operating system DVD and the *Driver Recovery* disc (both purchased separately) if the Windows partition and the HP Recovery partition are not listed. For additional information, see <u>Using a Windows 7 operating system DVD</u> (purchased separately) on page 57.
 - 3. If the Windows partition and the HP Recovery partition are listed, restart the computer, and then press f8 before the Windows operating system loads.
 - Select Startup Repair.
 - 5. Follow the on-screen instructions.
- NOTE: For additional information on recovering information using the Windows tools, perform a search for these topics in Help and Support.

Using f11 recovery tools

CAUTION: Using f11 recovery tools completely erases hard drive contents and reformats the hard drive. All files you have created and any software installed on the computer are permanently removed. The f11 recovery tool reinstalls the operating system and HP programs and drivers that were installed at the factory. Software not installed at the factory must be reinstalled.

To recover the original hard drive image using f11:

- 1. If possible, back up all personal files.
- 2. If possible, check for the presence of the HP Recovery partition: click **Start**, right-click **Computer**, click **Manage**, and then click **Disk Management**.
 - NOTE: If the HP Recovery partition is not listed, you must recover your operating system and programs using the Windows 7 operating system DVD and the *Driver Recovery* disc (both purchased separately). For additional information, see Using a Windows 7 operating system DVD (purchased separately) on page 57.
- 3. If the HP Recovery partition is listed, restart the computer, and then press esc while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen.
- 4. Press f11 while the "Press <F11> for recovery" message is displayed on the screen.
- Follow the on-screen instructions.

Using a Windows 7 operating system DVD (purchased separately)

To order a Windows 7 operating system DVD, go to the HP website. For U.S. support, go to http://www.hp.com/go/contactHP. For worldwide support, go to http://welcome.hp.com/country/us/en/wwcontact_us.html. You can also order the DVD by calling support. For contact information, see the Worldwide Telephone Numbers booklet included with the computer.

To initiate recovery using a Windows 7 operating system DVD:

- If possible, back up all personal files.
- 2. Restart the computer, and then insert the Windows 7 operating system DVD into the optical drive before the Windows operating system loads.
- 3. When prompted, press any keyboard key.
- 4. Follow the on-screen instructions.
- 5. Click Next.
- 6. Select Repair your computer.
- 7. Follow the on-screen instructions.

After the repair is completed:

- 1. Eject the Windows 7 operating system DVD, and then insert the *Driver Recovery* disc.
- 2. Install the Hardware Enabling Drivers first, and then install Recommended Applications.

7 Support

Contacting support

If the information provided in this user guide, in the *HP Notebook Reference Guide*, or in Help and Support does not address your questions, you can contact support. For U.S. support, go to http://www.hp.com/go/contactHP. For worldwide support, go to http://welcome.hp.com/country/us/en/wwcontact_us.html.

Here you can:

Chat online with an HP technician.

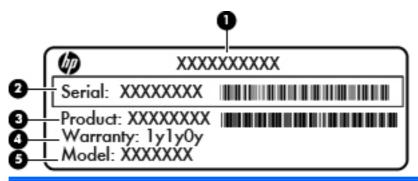

NOTE: When support chat is not available in a particular language, it is available in English.

- E-mail support.
- Find support telephone numbers.
- Locate an HP service center.

Labels

The labels affixed to the computer provide information you may need when you troubleshoot system problems or travel internationally with the computer:

• Service label—Provides important information, including the following:

Compo	pnent
(1)	Product name
(2)	Serial number (s/n)
(3)	Part number/Product number (p/n)
(4)	Warranty period
(5)	Model description (select models only)

Have this information available when you contact support. The service label is affixed inside the battery bay.

- Microsoft® Certificate of Authenticity—Contains the Windows Product Key. You may need the Product Key to update or troubleshoot the operating system. The Microsoft Certificate of Authenticity is affixed inside the battery bay.
- Regulatory label—Provides regulatory information about the computer. The regulatory label is affixed inside the battery bay.
- Wireless certification label or labels (select models only)—Provide information about optional
 wireless devices and the approval markings of some of the countries or regions in which the
 devices have been approved for use. If your computer model includes one or more wireless
 devices, one or more certification labels are included with your computer. You may need this
 information when traveling internationally. Wireless certification labels are affixed inside the
 battery bay.
- SIM (subscriber identity module) label (select models only)—Provides the ICCID (Integrated Circuit Card Identifier) of the SIM. This label is located inside the battery bay.
- HP Mobile Broadband Module service label (select models only)—Provides the serial number of the HP Mobile Broadband Module. This label is located inside the battery bay.

8 Specifications

Input power

The power information in this section may be helpful if you plan to travel internationally with the computer.

The computer operates on DC power, which can be supplied by an AC or a DC power source. The AC power source must be rated at 100–240 V, 50–60 Hz. Although the computer can be powered from a standalone DC power source, it should be powered only with an AC adapter or a DC power source supplied and approved by HP for use with this computer.

The computer can operate on DC power within the following specifications.

Input Power	Rating
Operating voltage and current	19.5 V dc @ 10.3 A - Slim 200W
	- or -
	19.5 V dc @ 11.8 A - Slim 230W

Operating environment

Factor	Metric	U.S.
Temperature		
Operating	5°C to 35°C	41°F to 95°F
Nonoperating	-20°C to 60°C	-4°F to 140°F
Relative humidity (noncondensing)		
Operating	10% to 90%	10% to 90%
Nonoperating	5% to 95%	5% to 95%
Maximum altitude (unpressurized)		
Operating	-15 m to 3,048 m	-50 ft to 10,000 ft
Nonoperating	-15 m to 12,192 m	-50 ft to 40,000 ft
