Before continuing with this procedure, set up the product first by following the Installation Guide.

You have three options to set up the hotspot feature.

Option 1: Configure hotspot at software installation

After having installed the printer driver, select the option to Enable Hotspot & Direct Print, and then click Next.

	The driver installation was successful. Do you wish to enable Hotspot & Direct	Print?
•	Enable Hotspot & Direct Print. Enabling the HotSpot feature will turn your printer into a Wi-Fi hotspot that of wireless internet access to your laptops and smart phones. In addition, it will you to print wirelessly from those devices through direct printing.	fers secure also allow
	Don't enable Hotspot & Direct Print at this time. You will not be able to use wireless direct printing if you select this option.	

2 Select one of the **Security Mode** options, and then click **Next**. The options include:

- WPA/WPA2: maximum security (recommended)
- WEP: medium security
- **Disable:** no security (not recommended)

You also have the option to set up a custom SSID.

Hotspot Security Setup Client devices will need this Pass-phrase to join the	Hotspot network
Network Name (SSID): HP-Hotspot-EB-[LaserJet M1216 WPA/WPA2 Pass-phrase (8 to 63 characters):	Security Mode: WPA2 Disable WEP WPA WPA2 WPA2 WPA2
I Display Characters	

3 Connect the product to a computer with the USB cable, and then click **Next**.

🗇 Don't enable	e Hotspot & Direct Print at this time.	
You will not	be able to use wireless direct printing if you sele	act this option.

Option 3: Configure hotspot through the HP Embedded Web Server (EWS) (network connection required)

Important: Please make sure the product and computer are able to communicate with each other on the network. If this is not possible, configure hotspot using Option 1 or Option 2.

- Locate the product's IP address. To find the IP address, print a configuration page from the product:
 - Press the **Setup** 🔧 button.
 - Select the **Reports** menu.
 - Select Config Report.
 - Press OK. HP LaserJet Professional M1210 MFP Self Test / Configuration = HP LaserJet M1210 MFF = FSN004 = PSN004 = unknown = 20080917 = FartPar 1200 = Enabled = Ad Hoc = mrdDDemoPrin
 - In this example, the product IP address is 192.168.223.1. This is the number you will need for the next step.
- To open the EWS, type the IP address or host name of the product in the address field of a supported Web browser, and then press Enter.

p://192.108.223.1		• • ×
New Tab		🟠 🔻 🖪
	New Tab	New Tab

Set or change the printer admin password Use the HP Embedded Web Server to set a printer admin password or change an existing password.

Note: The admin password is different than the hotspot password. Use the admin password in the EWS to set up or change the product's configuration parameters.

- Open the EWS, and then click the Admin Password tab.
- Type the new password in the Password box and in the Confirm Password box.
- At the bottom of the window, click the Apply button to save the password.

NOTE: If a password has previously been set, you are prompted to type the current password before you can change it.

*These instructions are subject to change and can vary by product.

3 In the EWS, select the **Hotspot & Direct Print** tab. Select the **Enable** option, and then click **Apply**.

Note: If a printer admin password has been set in the EWS, type it here. If you do not know the password, contact the printer administrator. For more information about setting or changing the printer admin password, see Set or change the printer admin password at the end of this guide.
