Document Part Number: 739636-001

Product notice

This guide describes features that are common to most models. Some features may not be available on your computer.

Important Notice about Customer Self-Repair Parts

CAUTION: Your computer includes Customer Self-Repair parts and parts that should only be accessed by an authorized service provider. See Chapter 5, "Removal and replacement procedures for Customer Self-Repair parts," for details. Accessing parts described in Chapter 6, "Removal and replacement procedures for Authorized Service Provider only parts," can damage the computer or void your warranty.

Safety warning notice

MARNING! To reduce the possibility of heat-related injuries or of overheating the computer, do not place the computer directly on your lap or obstruct the computer air vents. Use the computer only on a hard, flat surface. Do not allow another hard surface, such as an adjoining optional printer, or a soft surface, such as pillows or rugs or clothing, to block airflow. Also, do not allow the AC adapter to contact the skin or a soft surface, such as pillows or rugs or clothing, during operation. The computer and the AC adapter comply with the user-accessible surface temperature limits defined by the International Standard for Safety of Information Technology Equipment (IEC 60950).

1 Product description

Category	Description	
Product Name	HP ProBook 470 G1 Notebook PC	
Processors	Intel® Core™ i7 processor, Quad Core, 3rd generation (6-MB L3 cache, 35W)	
	4702MQ, 2.20-GHz processor	
	Intel® Core i5 processors, Dual Core, 3rd generation (3-MB L3 cache, 37W)	
	4200M, 2.50-GHz processor	
	Intel Core i3 processors, Dual Core, 3rd generation (3-MB L3 cache, 37W)	
	4100M, 2.50-GHz processor	
	4000M, 2.40-GHz processor	
	Intel Pentium processor, Dual Core (2-MB L3 cache, 37W)	
	3550M, 2.30-GHz processor	
	Intel Celeron processor (2-MB L3 cache, 37W)	
	2950M, 2.00-GHz processor	
Chipset	Mobile Intel HM87 chipset	
Graphics	AMD Radeon™ HD 8750M, 1-GB or 2-GB (switchable discrete)	
	Supports HD decode, DX11, HDMI, PX5.5	
Panel	43.9-cm (17.3-inch) HD+, 1600x900, 200 nits, anti-glare, 16:9, includes camera, 1 WLAN antenna	
	43.9-cm (17.3-inch) HD+, 1600x900, 200 nits, anti-glare, 16:9, includes camera, 2 WLAN antennas	
Memory	Two customer-accessible memory module slots supporting up to 16 GB of RAM	
	Supports dual-channel memory	
	PC3L-12800, 1600-MHz, DDR3L SODIMMs	
	Supports the following configurations:	
	• 16384 MB (8192 × 2; dual channel)	
	• 12288 MB (8192 + 4096; dual channel)	
	• 8192 MB (8192 × 1)	
	• 8192 MB (4096 × 2; dual channel)	
	• 6144 MB (4096 + 2048; dual channel)	
	 4096 MB (2048 × 2; dual channel) 	
	• 4096 MB (4096 × 1)	
	• 2048 MB (2048 × 1)	
Hard drives	Supports 7-mm/9.5-mm, 2.5-in SATA hard drives with HP 3D DriveGuard	

Category	Description		
	Customer-accessible		
	Supports the following drives:		
	• 1-TB, 5400-rpm		
	• 750-GB, 5400-rpm		
	• 500-GB, 7200-rpm,		
	 500-GB, 5400-rpm, hybrid (8-GB SSD) MLC 		
	• 320-GB, 5400-rpm		
Fixed optical drives	Supports the following 9.5-mm SATA optical drives:		
	Blu-ray ROM DVD+/-RW SuperMulti DL		
	DVD+/-RW SuperMulti DL		
	• DVD-ROM		
	Supports no optical drive option		
Audio/Visual	Integrated webcam (720p HD)		
	Stereo speakers (2)		
	Integrated dual-array microphone (webcam models only)		
	Headphone and microphone jacks		
	IDT 92HD91		
	Skype-ready		
	HD audio with DTS Sound+		
Ethernet	Realtek RTL8151GH-CG 10/100/1000		
	S3/S4/S5 wake on LAN (AC mode and battery mode)		
	NIC power down technology		
	Ethernet cable not included		
Wireless	Integrated WLAN options by way of wireless module:		
	WLAN antennas built into display assembly		
	Supports "no WLAN" option		
	Supports the following WLAN formats:		
	 Mediatek MT7630E 802.11bgn 1x1 Wi-Fi + BT4.0 Combo Adapter 		
	 Atheros AR9485 802.11b/g/n 1x1 WiFi Adapter 		
	 Atheros AR9565 802.11bgn 1x1 WiFi + BT4.0 combo Adapter 		
	 Intel Dual Band Wireless-AC 3160 802.11 a/b/g/n/ac (1x1) WiFi with Bluetooth 4.0 combo 		
	Realtek RTL8188EE 802.11bgn Wi-Fi Adapter		
	 Intel Dual Band Wireless-N 7260AN 802.11 a/b/g/n 2x2 WiFi + BT4.0 		
	Wireless Personal Area Network (PAN) only supported by Bluetooth 4.0 combo card		
External media card	Digital Media Reader Slot		

Category	Description	
Ports	Audio-in (stereo microphone)	
	Audio-out (stereo headphone)	
	RJ-45 (Ethernet, includes link and activity lights)	
	USB 3.0 (2)	
	USB 2.0 (2)	
	VGA (Dsub 15-pin) supporting 1920 \times 1200 external resolution at 60-GHz (hot plug/unplug with auto-detect)	
	HDMI 1.4	
	Multi-pin AC port	
Keyboard/pointing devices	Full-sized keyboard with numeric keypad	
	Touchpad includes: on/off button on board; 2-way scroll with legend, taps enabled by default, 2-finger scrolling and zoom enabled by default	
Power requirements	90-W Smart AC adapter with localized cable plug support (3-wire plug [1 m or 1.8 m] with ground pin):	
	6-cell, 47-Wh, 2.2Ah, Li-ion battery (HP Fast Charge technology)	
	9-cell, 93-Wh, 2.8 Ah, Li-ion battery	
Security	Integrated fingerprint reader (optional)	
	Intel AT support	
	Security lock	
	No fingerprint reader option	
Operating system	Preinstalled:	
	Windows 7 Professional 64	
	Windows 7 Professional 64 – MSNA	
	Windows 7 Home Premium 64	
	Windows 7 Home Basic 64	
	Windows 8 Professional 64-bit Digital Product Key (DPK) with Windows 7 Professional 64	
	Windows 8 Professional 64-bit Digital Product Key (DPK) with Windows 7 Professional 64 – MSNA	
	Windows 8 China (CH) 64-bit	
	Windows 8 Emerging Markets (EM) 64-bit	
	Windows 8 Multi-language (ML) 64-bit	
	Windows 8 Professional 64-bit	
	Windows 8 Professional 64-bit – MSNA	
	Windows 8 Professional 64-bit – MSNA Win 8.1 China (CH) 64-bit	

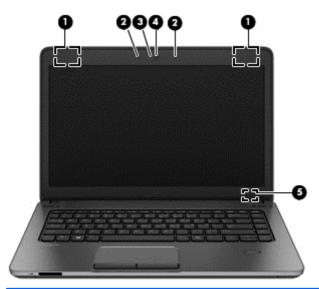

Category	Description
	Win 8.1 Multi-language (ML) 64-bit
	Win 8.1 Professional 64-bit
	Novell™: SuSE Linux™ – SLED 11, 64-bit, SP2
	FreeDOS 2.0
	Restore Media (DRDVD/SRDVD):
	DRDVD Windows 8.1
	DRDVD Windows 8
	DRDVD Windows 7
	SRDVD SuSE Linux Enterprise (SLED) SP2 64-bit
	Restore Media (OSDVD):
	Windows 7 Home Basic 64
	Windows 7 Home Premium 64
	Windows 7 Professional 32
	Windows 7 Professional 64
	Windows 8 Professional 64-bit
	Windows 8 64-bit
	Windows 8 Country Specific 64-Bit
	Windows 8 Emerging Market 64-Bit
	Web-only support:
	SuSE Linux Enterprise (SLED) SP2 64-bit
	Windows 7 Home Basic 32
	Windows 7 Home Premium 32
	Windows 7 Professional 32
	Windows 8.1 Professional 64
	Windows 8.1 Enterprise 64
	Windows 8.1 Multi-Language 64
	Windows 8.1 Emerging Market 64
	Windows 8.1 Chinese Market 64
	Certified:
	Microsoft WHQL
	SuSE Linux Enterprise (SLED) SP2 64-bit
Serviceability	End-user replaceable parts:
	AC adapter
	Battery (system)

Category	Description
	Hard drive
	Memory module
	Optical drive
	WLAN module
	Keyboard

2 External component identification

Display

NOTE: Refer to the illustration that most closely matches your computer.

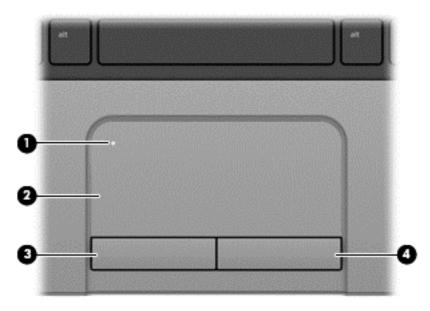

Component		Description
(1)	WLAN antennas (2)* (select models only)	Send and receive wireless signals to communicate with wireless local area networks (WLAN).
(2)	Internal microphones (2) (select models only)	Record sound.
(3)	Webcam light (select models only)	On: The webcam is in use.
(4)	Webcam (select models only)	Records video and captures still photographs.
		To use the webcam in Windows 8, from the Start screen, type \circ , and then select CyberLink YouCam from the list of applications.
		To use the webcam in Windows 7, select Start > All Programs > Communication and Chat > Cyberlink YouCam .
(5)	Internal display switch	Turns off the display or initiates Sleep if the display is closed while the power is on.
		NOTE: The display switch is not visible on the outside of the computer.

^{*}The antennas are not visible on the outside of the computer. For optimal transmission, keep the areas immediately around the antennas free from obstructions. To see wireless regulatory notices, see the section of the *Regulatory, Safety, and Environmental Notices* that applies to your country or region. To access the user guides in Windows 8, select the **HP Support Assistant** app on the Start screen, select **My computer**, and then select **User guides**. In Windows 7 these notices are located in Help and Support.

Top

TouchPad

Component		Description
(1)	TouchPad on/off button	Turns the TouchPad on and off.
(2)	TouchPad zone	Moves the pointer and selects or activates items on the screen.
(3)	Left TouchPad button	Functions like the left button on an external mouse.
(4)	Right TouchPad button	Functions like the right button on an external mouse.

Lights

NOTE: Your computer may look slightly different from the illustration in this section.

Component			Description	
(1)	ሀ	Power light	 On: The computer is on. Blinking: The computer is in the Sleep state (Windows) or Suspend state (Linux). NOTE: The elapsed time between blinks is longer than on previous models. Off: The computer is off or in Hibernation (Windows 7/ 	
(2)	∮ ⊚	Microphone mute light	Linux). Amber: Microphone is off.	
(3)		Num lock light	On: Num lock is on.	
(4)	(₍ I ₎₎	Wireless light	 White: An integrated wireless device, such as a wireless local area network (WLAN) device and/or a Bluetooth® device, is on. Amber: All wireless devices are off. 	
(5)	4 ⊗	Mute light	Amber: Computer sound is off.Off: Computer sound is on.	
(6)		Caps lock light	On: Caps lock is on.	

Buttons and fingerprint reader (select models only)

(2)

Speakers (2)

NOTE: Your computer may look slightly different from the illustration in this section.

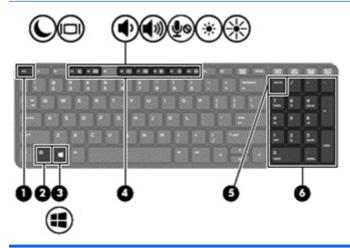

Component Description When the computer is off, press the button to turn on (1) Power button the computer. When the computer is on, press the button briefly to initiate Sleep. When the computer is in the Sleep state/Suspend, press the button briefly to exit Sleep/Suspend. When the computer is in Hibernation, press the button briefly to exit Hibernation. **CAUTION:** Pressing and holding down the power button will result in the loss of unsaved information. If the computer has stopped responding and shutdown procedures are ineffective, press and hold the power button for at least 5 seconds to turn off the computer. To learn more about your power settings, see your power options. In Windows 8, from the Start screen, type power, select Settings, and then select Power Options. In Windows 7, Select Start > Control Panel > System and Security > Power Options. In Linux, Select Computer > Control Center. In the left pane, click System, and then click Power Management in the right pane.

Produce sound.

Component			Description	
(3) ((1)) Wireless button		Wireless button	Turns the wireless feature on or off but does not establish a wireless connection.	
(4)	4 ⊘	Volume mute button	Mutes and restores speaker sound.	
(5)		Fingerprint reader (select models only)	Allows a fingerprint logon instead of a password logon.	

Keys

NOTE: Refer to the illustration that most closely matches your computer.

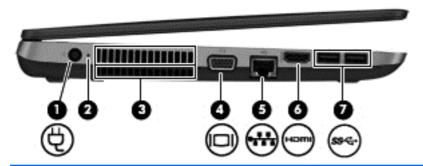

Componen	t	Description
(1)	esc key	Displays system information when pressed in combination with the fn key.
		NOTE: Not applicable to SLED.
(2)	fn key	Executes frequently used system functions when pressed in combination with a function key, the num lk key, or the esc key.
(3)	■ Windows 7/8: Windows button	Windows 8: Returns you to the Start screen from an open
•	SLED: Operating system logo key	app or the Windows desktop. NOTE: Pressing the Windows button again will return you to the previous screen.
		Windows 7: Displays the Windows Start menu.
		SLED: Displays the operating system menu.
(4)	Function keys	Execute frequently used system functions when pressed in combination with the fn key.
(5)	num lk key	Turns the embedded numeric keypad on and off when pressed in combination with the fn key.
		Alternates between the navigational and numeric functions on the integrated numeric keypad.
(6)	Integrated numeric keypad	When num lk has been enabled, it can be used like an external numeric keypad.

Front

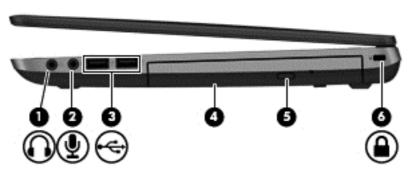

Component		Description	
(1)	Hard drive light	 Blinking white: The hard drive is being accessed. Amber: HP 3D DriveGuard has temporarily parked the hard drive. 	
(2)	Media Card Reader	Reads data from and writes data to memory sticks and digital memory cards such as Secure Digital (SD).	

Left

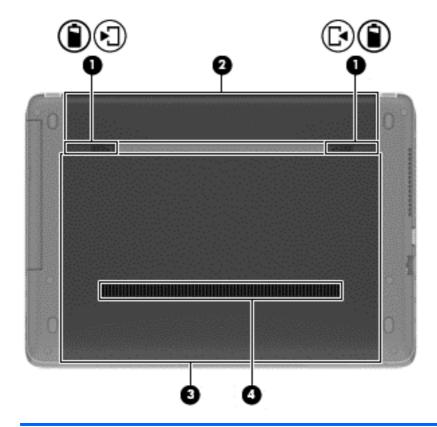

Component			Description	
(1)	Ą	Power connector	Connects an AC adapter.	
(2)		AC adapter/Battery light	White: The computer is connected to external power and the battery is charged from 90 to 99 percent.	
			 Amber: The computer is connected to external power and the battery is charged from 0 to 89 percent. 	
			 Blinking amber: A battery that is the only available power source has reached a low battery level. When the battery reaches a critical battery level, the battery light begins blinking rapidly. 	
			Off: The battery is fully charged.	
(3)		Vents (2)	Enables airflow to cool internal components.	
			NOTE: The computer fan starts up automatically to cool internal components and prevent overheating. It is normal for the internal fan to cycle on and off during routine operation.	
(4)		External monitor port	Connects an external VGA monitor or projector.	
(5)		RJ-45 (network) jack	Connects a network cable.	
	•	RJ-45 (network) lights (2)	Green (left): The network is connected.	
			Amber (right): The network is showing activity.	
(6)	HDMI	HDMI port	Connects an optional video or audio device, such as a high-definition television, or any compatible digital or audio component.	
(7)	ss⇔	USB 3.0 ports (2)	Connect optional USB 3.0 devices and provide enhanced USB power performance.	

Right

Component			Description	
(1)	$\mathbf{\Omega}$	Audio-out (headphone) jack	Produces sound when connected to optional powered stereo speakers, headphones, earbuds, a headset, or television audio.	
			WARNING! To reduce the risk of personal injury, adjust the volume before putting on headphones, earbuds, or a headset. For additional safety information, see the <i>Regulatory, Safety, and Environmental Notices</i> . To access the user guides in Windows 8, select the HP Support Assistant app on the Start screen, select My computer, and then select User guides.	
			NOTE: When a device is connected to the jack, the computer speakers are disabled.	
(2)	₾	Audio-in (microphone) jack	Connects an optional computer headset microphone, stereo array microphone, or monaural microphone.	
(3)	~	USB 2.0 ports (2)	Connect optional USB devices.	
(4)		Optical drive (select models only)	Reads and writes (select models only) to an optical disc.	
(5)		Optical drive eject button (select models only)	Releases the optical drive disc tray.	
(6)	0	Security cable slot	Attaches an optional security cable to the computer.	
			NOTE: The security cable is designed to act as a deterrent, but it may not prevent the computer from being mishandled or stolen.	

Bottom

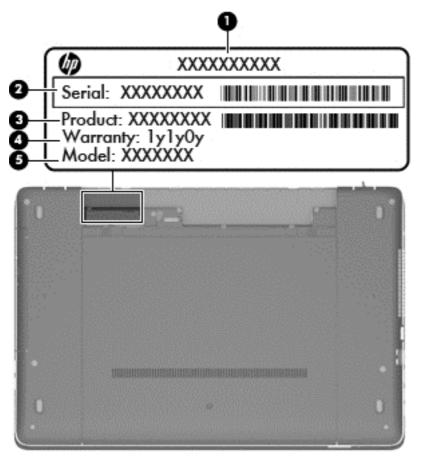

Component		Description	
(1)	Battery and service door release latches	 Releases the battery from the battery bay by sliding the release latches one time. 	
	_]•	 When the battery has been removed from the battery bay, releases the service door from the computer by sliding the release latches a second time. 	
(2)	Battery bay	Holds the battery.	
(3)	Service door	Provides access to the hard drive bay, the wireless LAN (WLAN) module slot, the WWAN module slot, and the memory module slots.	
		CAUTION: To prevent an unresponsive system, replace the wireless module only with a wireless module authorized for use in the computer by the governmental agency that regulates wireless devices in your country or region. If you replace the module and then receive a warning message, remove the module to restore computer functionality, and then contact support through HP Support Assistant. To access HP Support Assistant on the Start screen, select the HP Support Assistant app.	
(4)	Vent	Enable airflow to cool internal components.	

Component	Description
	NOTE: The computer fan starts up automatically to cool internal components and prevent overheating. It is normal for the internal fan to cycle on and off during routine operation.

Service tag and PCID label

Service tag

When ordering parts or requesting information, provide the computer serial number and model description provided on the service tag.

- Product name (1). This is the product name affixed to the front of the computer.
- Serial number (s/n) (2). This is an alphanumeric identifier that is unique to each product.
- Part number/Product number (p/n) (3). This number provides specific information about the product's hardware components. The part number helps a service technician to determine what components and parts are needed.
- Warranty period **(4)**. This number describes the duration (in years) of the warranty period for the computer.
- Model description (select models only) **(5)**. This is the alphanumeric identifier used to locate documents, drivers, and support for the computer.

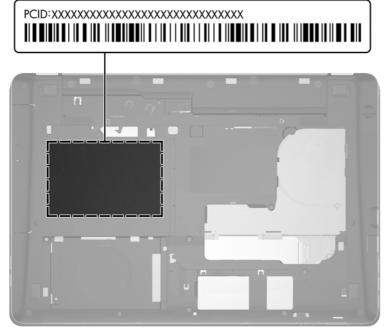

PCID label

The PCID label provides the information required to properly reset the notebook firmware (BIOS) back to factory shipped specifications when replacing the system board. The label may have a different number of characters depending on the operating system on the computer.

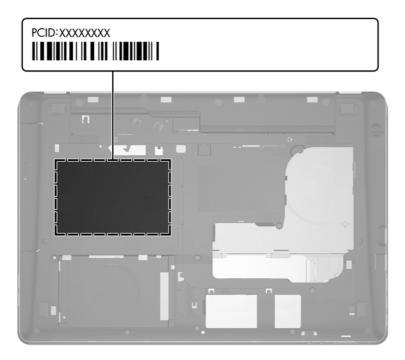

NOTE: Computer details may vary from images.

Windows 8 models

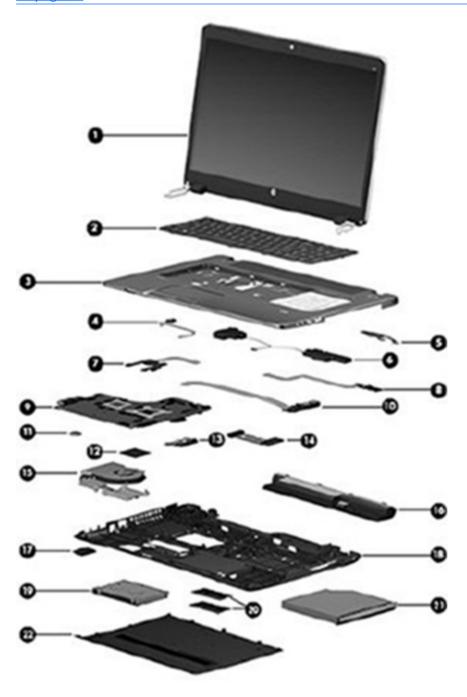

Non-Windows 8 models

3 Illustrated parts catalog

Computer major components

NOTE: Details about your computer, including model, serial number, product key, and length of warranty, are on the service tag at the bottom of your computer. See Service tag and PCID label on page 15 for details.

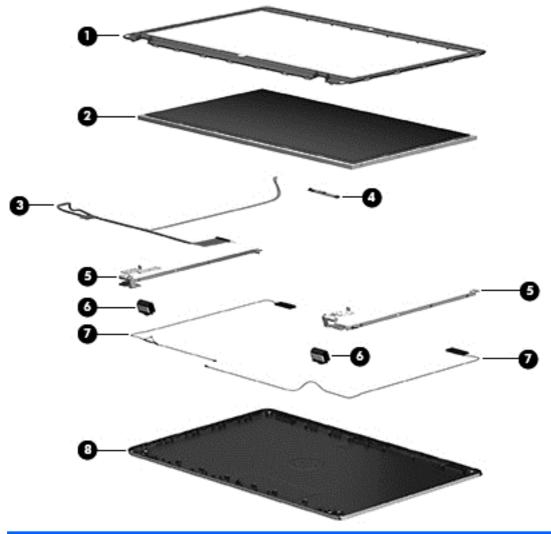

Item	Description	Spare part numbe			
(1)	Display panel, 43.9-cm (17.3-inch), HD+, anti-glare, with webcam	723643-001			
(2)	Keyboard (includes cable)				
	NOTE: For a detailed list of available keyboards, see <u>Sequential part number listing</u> on page 24.				
	For use in Windows 8 models	721953-xxx			
(3)	Top cover (includes touchpad assembly)				
	With a fingerprint reader (includes fingerprint reader assembly)	723644-001			
	Without a fingerprint reader (includes fingerprint reader plastic insert, bracket, and screws)	723645-001			
	With a fingerprint reader, RCTO (includes fingerprint reader assembly)	747995-001			
(4)	Power button board assembly	721531-001			
(5)	Function board	721943-001			
(6)	Speaker assembly	723674-001			
(7)	Card reader board	734088-001			
(8)	Fingerprint reader assembly (includes cable, bracket, holder, and screws)	723670-001			
(9)	System board (includes replacement thermal material)				
	For use in models without Windows 8:				
	1-GB discrete graphics memory	734083-001			
	1-GB discrete graphics memory, RCTO	746629-001			
	2-GB discrete graphics memory	734084-001			
	For use in Windows 8 models:				
	Windows 8 Standard and 1-GB discrete graphics memory	734083-501			
	Windows 8 Standard and 1-GB discrete graphics memory, RCTO	746629-501			
	Windows 8 Professional and 1-GB discrete graphics memory	734083-601			
	Windows 8 Professional and 1-GB discrete graphics memory, RCTO	746629-601			
	Windows 8 Standard and 2-GB discrete graphics memory	734084-501			
	Windows 8 Professional and 2-GB discrete graphics memory	734084-601			
(10)	USB/audio board	721542-001			
(11)	RTC battery	683601-001			
(12)	Processor (includes thermal material)				
	Intel Core i7 processor, Quad Core				
	4702MQ, 2.2-GHz processor with 6-MB L3 cache	723522-001			
	Intel Core i5 processors, Dual Core				
	4200M, 2.5-GHz processor with 3-MB L3 cache (includes thermal grease)	737328-001			
	Intel Core i3 processors, Dual Core				
	4100M, 2.5-GHz processor with 3-MB L3 cache (includes thermal grease)	737474-001			

Item	Description	Spare part number
	4000M, 2.4-GHz processor with 3-MB L3 cache (includes thermal grease)	737327-001
	Intel Pentium processor, Dual Core	
	3550M, 2.4-GHz, with 2-MB L3 cache	737329-001
	Intel Celeron processor	
	2950M, 2.1-GHz, with 2-MB L3 cache	737326-001
(13)	Hard drive extension board	725891-001
(14)	Optical drive extension board	723675-001
(15)	Fan/heat sink assembly (includes replacement thermal material)	721937-001
(16)	Battery, Li-ion	
	9-cell (93 WHr, 2.8 Ah)	708458-001
	6-cell (47 WHr, 2.2 Ah)	708457-001
(17)	WLAN module	
	Mediatek MT7630E 802.11bgn 1x1 Wi-Fi + BT4.0 Combo Adapter	710418-001
	Atheros AR9485 802.11b/g/n 1x1 WiFi Adapter	675794-001
	Atheros AR9565 802.11bgn 1x1 WiFi + BT4.0 combo Adapter	690019-001
	Intel Dual Band Wireless-AC 3160 802.11 a/b/g/n/ac (1x1) WiFi with Bluetooth 4.0 combo	710662-001
	Realtek RTL8188EE 802.11bgn Wi-Fi Adapter	709848-001
	Intel Dual Band Wireless-N 7260AN 802.11 a/b/g/n 2x2 WiFi + BT4.0	717381-001
(18)	Base enclosure	723669-001
(19)	Hard drive	
	1-TB, 5400-rpm	676521-001
	750-GB, 5400-rpm	634250-001
	500-GB, 7200-rpm	703267-001
	500-GB, 5400-rpm	683802-001
	500-GB, 5400-rpm, hybrid (8-GB SSD)	732000-001

Miscellaneous parts

Description	Spare part number
AC adapters	
90-W AC adapter	693712-001
90-W AC adapter for use in India and the People's Republic of China	693713-001
Power cords:	
For use in Australia	490371-011
For use in Denmark	490371-081
For use in Europe, the Middle East, and Africa	490371-021
For use in India	490371-D61
For use in Israel	490371-BB1
For use in Italy	490371-061
For use in the People's Republic of China	490371-AA1
For use in South Africa	490371-AR1
For use in South Korea	490371-AD1
For use in Switzerland	490371-111
For use in Taiwan	490371-AB1
For use in Thailand	490371-201
For use in the United Kingdom	490371-031
For use in the United States	490371-001
Rubber Kit (includes rubber base enclosure screw covers and mylar display bezel screw covers)	723672-001
Screw Kit	723673-001
HP USB optical travel mouse	434594-001
HP USB laser mouse	674318-001
Combination lock	591699-001
Case, slim top load	703888-001
Case, top load	679921-001

Sequential part number listing

CSR flag designations:

A = Mandatory

B = Optional

C = Service technician recommended

N = Non-user replaceable

Spare part number	CSR flag	Description
434594-001	Α	HP USB optical travel mouse

721953-131	Α	Keyboard for use in Portugal
721953-141	Α	Keyboard for use in Turkey
721953-151	Α	Keyboard for use in Greece
721953-171	Α	Keyboard for use in Saudi Arabia
721953-211	Α	Keyboard for use in Hungary
721953-251	Α	Keyboard for use in Russia
721953-261	Α	Keyboard for use in Bulgaria
721953-271	Α	Keyboard for use in Romania
721953-281	Α	Keyboard for use in Thailand
		

Spare part number	CSR flag	Description
721953-291	А	Keyboard for use in Japan
721953-A41	А	Keyboard for use in Belgium
721953-AB1	А	Keyboard for use in Taiwan
721953-AD1	А	Keyboard for use in South Korea
721953-B31	А	Keyboard for use in the Netherlands and Europe
721953-B71	А	Keyboard for use in Sweden and Finland
721953-BA1	А	Keyboard for use in Slovenia
721953-BB1	А	Keyboard for use in Israel
721953-BG1	А	Keyboard for use in Switzerland
721953-D61	А	Keyboard for use in India
721953-DD1	А	Keyboard for use in Iceland
721953-DH1	А	Keyboard for use in the Netherlands
721953-FL1	А	Keyboard for use in the Czech Republic and Slovakia
721953-FP1	А	Keyboard for use in northern Africa
723522-001	N	Intel Core i7 processor, 4702MQ, 2.2-GHz, 6-MB L3 cache (include thermal material)
723639-001	С	Display rear cover
723640-001	С	Display bezel for use in models with a webcam
723641-001	N	Antennas
723642-001	С	Display Hinge Kit (includes left and right hinges and hinge covers)
723643-001	В	43.9-cm (17.3-inch) display assembly, HD+ anti-glare, with webcam
723644-001	В	Top cover for use in models with a fingerprint reader (includes fingerprint reader board and touchpad assembly)
723645-001	В	Top cover for use in models without a fingerprint reader (includes touchpad assembly, fingerprint reader plastic insert, bracket, and screws)
723646-001	N	Cable Kit (see Cable Kit on page 21 for more Cable Kit spare part information)
723647-001	С	Plastics Kit (includes optical drive protective insert and Secure Digital card protective insert)
723648-001	Α	Service door
723669-001	С	Base enclosure
723670-001	В	Fingerprint reader assembly (includes cable, bracket, holder, and screws)
723671-001	Α	Blu-ray ROM DVD±RW SuperMulti DL Drive (includes bezel, bracket, and screws)
723672-001	Α	Rubber Kit (includes rubber base enclosure screw covers and mylar display bezel screw covers)
723673-001	В	Screw Kit
723674-001	В	Speaker assembly
723675-001	С	Optical drive connector

Spare part number	CSR flag	Description
725889-001	Α	DVD-ROM drive (includes bezel, bracket, and screws)
725890-001	Α	DVD±RW SuperMulti DL Drive (includes bezel, bracket, and screws)
725891-001	В	Hard drive connector
732000-001	Α	500-GB, 5400-rpm, hybrid (8-GB SSD) hard drive
734083-001	N	System board for use in models without Windows 8 with 1-GB discrete graphics (includes thermal material)
734083-501	N	System board for use in Windows 8 Standard models with 1-GB discrete graphics (includes thermal material)
734083-601	N	System board for use in Windows 8 Professional models with 1-GB discrete graphics (includes thermal material)
734084-001	N	System board for use in models without Windows 8 with 2-GB discrete graphics (includes thermal material)
734084-501	N	System board for use in Windows 8 Standard models with 2-GB discrete graphics (includes thermal material)
734084-601	N	System board for use in Windows 8 Professional models with 2-GB discrete graphics (includes thermal material)
734088-001	В	Card reader board
737326-001	N	Intel Celeron 2950M processor, 2.1-GHz processor, 3-MB L3 cache (includes thermal material)
737327-001	N	Intel Core i3 processor, 4000M, 2.4-GHz, 3-MB L3 cache (includes thermal material)
737328-001	N	Intel Core i5 processor, 4200M, 2.5-GHz, 3-MB L3 cache (includes thermal material)
737329-001	N	Intel Pentium 3550M processor, 2.4-GHz, 2-MB L3 cache (includes thermal material)
737474-001	N	Intel Core i3 processor, 4100M, 2.5-GHz, 3-MB L3 cache (includes thermal material)
746629-001	N	System board for use in models without Windows 8 with 1-GB discrete graphics, RCTO (includes thermal material)
746629-501	N	System board for use in Windows 8 Standard models with 1-GB discrete graphics, RCTO (includes thermal material)
746629-601	N	System board for use in Windows 8 Professional models with 1-GB discrete graphics, RCTO (includes thermal material)
747994-001	Α	Service door, RCTO
747995-001	В	Top cover for use in models with a fingerprint reader, RCTO (includes touchpad assembly, fingerprint reader plastic insert, bracket, and screws)

4 Removal and replacement procedures preliminary requirements

Tools required

You will need the following tools to complete the removal and replacement procedures:

- Flat-bladed screwdriver
- Phillips P0 and P1 screwdrivers
- Torx T8 screwdriver

Service considerations

The following sections include some of the considerations that you must keep in mind during disassembly and assembly procedures.

Plastic parts

Cables and connectors

A CAUTION: When servicing the computer, be sure that cables are placed in their proper locations during the reassembly process. Improper cable placement can damage the computer.

Cables must be handled with extreme care to avoid damage. Apply only the tension required to unseat or seat the cables during removal and insertion. Handle cables by the connector whenever possible. In all cases, avoid bending, twisting, or tearing cables. Be sure that cables are routed in such a way that they cannot be caught or snagged by parts being removed or replaced. Handle flex cables with extreme care; these cables tear easily.

Drive handling

↑ CAUTION: Drives are fragile components that must be handled with care. To prevent damage to the computer, damage to a drive, or loss of information, observe these precautions:

Before removing or inserting a hard drive, shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.

Before handling a drive, be sure that you are discharged of static electricity. While handling a drive, avoid touching the connector.

Before removing a diskette drive or optical drive, be sure that a diskette or disc is not in the drive and be sure that the optical drive tray is closed.

Handle drives on surfaces covered with at least one inch of shock-proof foam.

Avoid dropping drives from any height onto any surface.

After removing a hard drive, an optical drive, or a diskette drive, place it in a static-proof bag.

Avoid exposing a hard drive to products that have magnetic fields, such as monitors or speakers.

Avoid exposing a drive to temperature extremes or liquids.

If a drive must be mailed, place the drive in a bubble pack mailer or other suitable form of protective packaging and label the package "FRAGILE."

Grounding guidelines

Electrostatic discharge damage

Electronic components are sensitive to electrostatic discharge (ESD). Circuitry design and structure determine the degree of sensitivity. Networks built into many integrated circuits provide some protection, but in many cases, ESD contains enough power to alter device parameters or melt silicon junctions.

A discharge of static electricity from a finger or other conductor can destroy static-sensitive devices or microcircuitry. Even if the spark is neither felt nor heard, damage may have occurred.

An electronic device exposed to ESD may not be affected at all and can work perfectly throughout a normal cycle. Or the device may function normally for a while, and then degrade in the internal layers, reducing its life expectancy.

CAUTION: To prevent damage to the computer when you are removing or installing internal components, observe these precautions:

Keep components in their electrostatic-safe containers until you are ready to install them.

Use nonmagnetic tools.

Before touching an electronic component, discharge static electricity by using the guidelines described in this section.

Avoid touching pins, leads, and circuitry. Handle electronic components as little as possible.

If you remove a component, place it in an electrostatic-safe container.

The following table shows how humidity affects the electrostatic voltage levels generated by different activities.

CAUTION: A product can be degraded by as little as 700 V.

Typical electrostatic voltage levels			
	Relative humidity		
Event	10%	40%	55%
Walking across carpet	35,000 V	15,000 V	7,500 V
Walking across vinyl floor	12,000 V	5,000 V	3,000 V
Motions of bench worker	6,000 V	800 V	400 V
Removing DIPS from plastic tube	2,000 V	700 V	400 V
Removing DIPS from vinyl tray	11,500 V	4,000 V	2,000 V
Removing DIPS from Styrofoam	14,500 V	5,000 V	3,500 V
Removing bubble pack from PCB	26,500 V	20,000 V	7,000 V
Packing PCBs in foam-lined box	21,000 V	11,000 V	5,000 V

Packaging and transporting guidelines

Follow these grounding guidelines when packaging and transporting equipment:

- To avoid hand contact, transport products in static-safe tubes, bags, or boxes.
- Protect ESD-sensitive parts and assemblies with conductive or approved containers or packaging.
- Keep ESD-sensitive parts in their containers until the parts arrive at static-free workstations.
- Place items on a grounded surface before removing items from their containers.
- Always be properly grounded when touching a component or assembly.
- Store reusable ESD-sensitive parts from assemblies in protective packaging or nonconductive foam.
- Use transporters and conveyors made of antistatic belts and roller bushings. Be sure that mechanized equipment used for moving materials is wired to ground and that proper materials are selected to avoid static charging. When grounding is not possible, use an ionizer to dissipate electric charges.

Workstation guidelines

Follow these grounding workstation guidelines:

- Cover the workstation with approved static-shielding material.
- Use a wrist strap connected to a properly grounded work surface and use properly grounded tools and equipment.
- Use conductive field service tools, such as cutters, screwdrivers, and vacuums.
- When fixtures must directly contact dissipative surfaces, use fixtures made only of static-safe materials.
- Keep the work area free of nonconductive materials, such as ordinary plastic assembly aids and Styrofoam.
- Handle ESD-sensitive components, parts, and assemblies by the case or PCM laminate. Handle these items only at static-free workstations.
- Avoid contact with pins, leads, or circuitry.
- Turn off power and input signals before inserting or removing connectors or test equipment.

Equipment guidelines

Grounding equipment must include either a wrist strap or a foot strap at a grounded workstation.

- When seated, wear a wrist strap connected to a grounded system. Wrist straps are flexible straps with a minimum of one megohm ±10% resistance in the ground cords. To provide proper ground, wear a strap snugly against the skin at all times. On grounded mats with banana-plug connectors, use alligator clips to connect a wrist strap.
- When standing, use foot straps and a grounded floor mat. Foot straps (heel, toe, or boot straps)
 can be used at standing workstations and are compatible with most types of shoes or boots. On
 conductive floors or dissipative floor mats, use foot straps on both feet with a minimum of one
 megohm resistance between the operator and ground. To be effective, the conductive strips
 must be worn in contact with the skin.

The following grounding equipment is recommended to prevent electrostatic damage:

- Antistatic tapes
- Antistatic smocks, aprons, and sleeve protectors
- Conductive bins and other assembly or soldering aids
- Nonconductive foam
- Conductive tabletop workstations with ground cords of one megohm resistance
- Static-dissipative tables or floor mats with hard ties to the ground
- Field service kits
- Static awareness labels
- Material-handling packages
- Nonconductive plastic bags, tubes, or boxes
- Metal tote boxes
- Electrostatic voltage levels and protective materials

The following table lists the shielding protection provided by antistatic bags and floor mats.

Material	Use	Voltage protection level
Antistatic plastic	Bags	1,500 V
Carbon-loaded plastic	Floor mats	7,500 V
Metallized laminate	Floor mats	5,000 V

5 Removal and replacement procedures for Customer Self-Repair parts

CAUTION: The Customer Self-Repair program is not available in all locations. Installing a part not supported by the Customer Self-Repair program may void your warranty. Check your warranty to determine if Customer Self-Repair is supported in your location.

Component replacement procedures

NOTE: Please read and follow the procedures described here to access and replace Customer Self-Repair parts successfully.

NOTE: Details about your computer, including model, serial number, product key, and length of warranty, are on the service tag at the bottom of your computer. See Service tag and PCID label on page 15 for details.

This chapter provides removal and replacement procedures for Customer Self-Repair parts.

There are as many as 14 screws that must be removed, replaced, or loosened when servicing Customer Self-Repair parts. Make special note of each screw size and location during removal and replacement.

Battery

Description	Spare part number
9-cell, 93 WHr, 2.8 Ah Li-ion battery	708458-001
6-cell, 47 WHr, 2.2 Ah Li-ion battery	708457-001

Before removing the battery, follow these steps:

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- Disconnect all external devices connected to the computer.
- 3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.

To remove the battery:

- CAUTION: Removing a battery that is the sole power source for the computer can cause loss of information. To prevent loss of information, save your work and shut down the computer through Windows before removing the battery.
 - 1. Turn the computer upside down on a flat surface.
 - 2. Slide the battery release latches (1) to release the battery.
 - NOTE: You can slide the battery release latches simultaneously or you can slide them one at a time.
 - 3. Tilt the battery upward (2) and remove it from the computer.

Service door

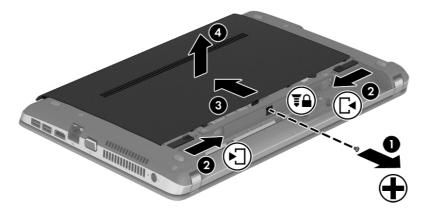

Remove the service door to access the memory module slot, hard drive, and other components.

Before removing the service door, follow these steps:

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- 2. Disconnect all external devices connected to the computer.
- 3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).

To remove the service door:

- 1. With the battery bay toward you, remove the optional security screw (1), (if the optional security screw is being used, see <u>Using the optional security screw on page 36</u>), and then slide the service door release latches (2) to release the service door.
- NOTE: If you do not want to use the optional security screw, you can store it inside the battery bay.
- 2. Slide the service door toward the front of the computer (3) and lift (4) to remove the service door.

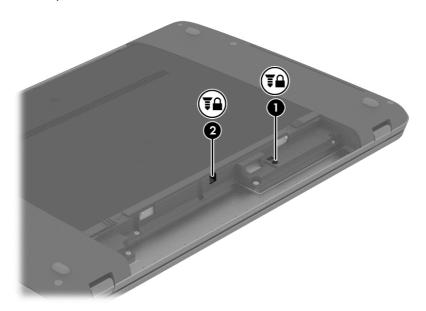

Using the optional security screw

Use the optional security screw to lock the service door to the bottom of the computer. When not in use the security screw can be stored inside the battery bay.

To use the security screw:

- 1. Remove the battery (see <u>Battery on page 34</u>).
- 2. Remove the security screw from inside the battery bay (1) and insert it (2) to lock the service door in place.

Hard drive

Description	Spare part number
1-TB, 5400-rpm	676521-001
750-GB, 5400-rpm	634250-001
500-GB, 7200-rpm	703267-001
500-GB, 5400-rpm	683802-001
500-GB, 5400-rpm, hybrid (8-GB SSD)	732000-001
320-GB, 5400-rpm	634953-001

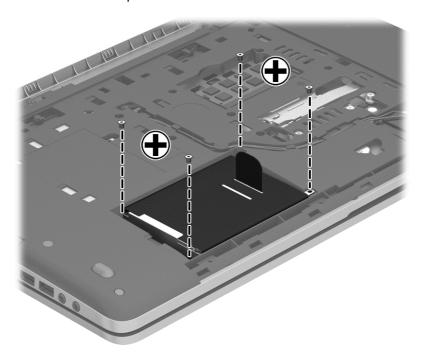

Before removing the hard drive, follow these steps:

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- Disconnect all external devices connected to the computer.
- 3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.

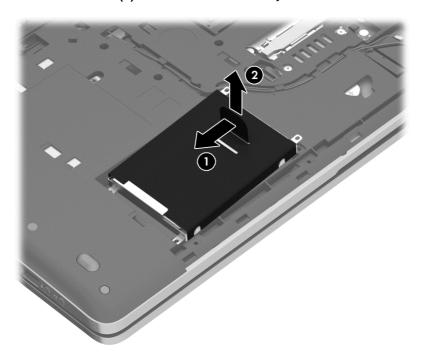

- 4. Remove the battery (see <u>Battery on page 34</u>).
- 5. Remove the service door (see Service door on page 35).

To remove a hard drive:

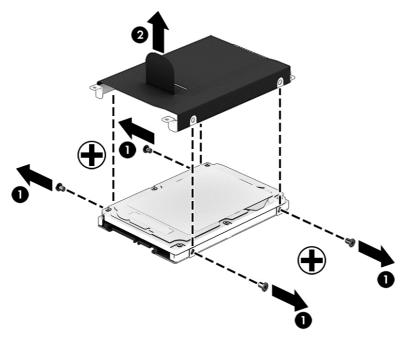

- 1. Turn the computer upside down on a flat surface.
- 2. Remove the 4 Phillips PM2.5×3.0 screws from the hard drive.

- 3. Pull the hard drive tab (1) toward the side of the computer to disconnect the hard drive.
- 4. Lift the hard drive (2) out of the hard drive bay.

5. To remove the hard drive from the hard drive cover, remove the 4 Phillips PM3.0×4.0 screws (1) that secure the cover to the drive, and then lift the cover straight up and off the hard drive (2).

Reverse this procedure to install a hard drive.

Optical drive

NOTE: All optical drive spare part kits include an optical drive bezel, bracket, and screws.

Description	Spare part number
Blu-ray ROM DVD±RW SuperMulti DL Drive	723671-001
DVD±RW SuperMulti DL Drive	725890-001
DVD-ROM drive	725889-001

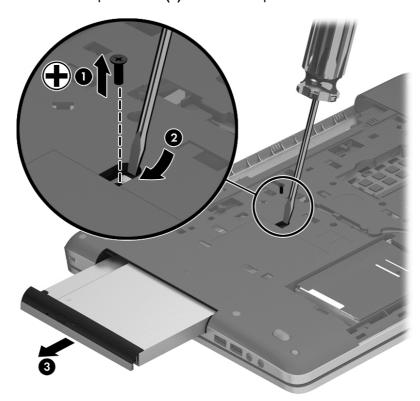

Before removing the optical drive, follow these steps:

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- 2. Disconnect all external devices connected to the computer.
- Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- 5. Remove the service door (see Service door on page 35).

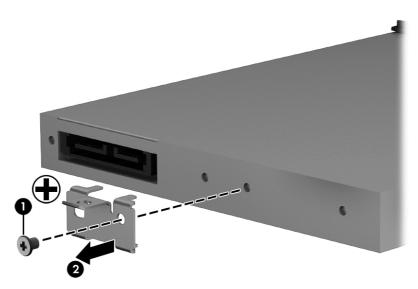

Remove the optical drive:

- 1. Position the computer upside-down.
- 2. Remove the Phillips PM2.5×6.0 screw (1) that secures the optical drive to the computer.
- 3. Push the optical drive tab (2) to release the optical drive from the computer.

4. Remove the optical drive (3) from the computer.

5. To remove the bracket from the optical drive, remove the Phillips PM2.0×3.0 screw (1) that secures the bracket to the drive, and then remove the bracket from the drive (2).

Reverse this procedure to install an optical drive.

Memory modules

NOTE: Primary and expansion memory is installed in a stacked configuration in the bottom of the computer.

If only one memory module is installed, it must be installed in the bottom socket.

Description	Spare part number
2-GB (PC3L-12800, 1600-MHz, DDR3L)	691739-001
4-GB (PC3L-12800, 1600-MHz, DDR3L)	691740–001
8-GB (PC3L-12800, 1600-MHz, DDR3L)	693374-001

Update BIOS before adding memory modules

Before adding new memory, make sure you update the computer to the latest BIOS.

CAUTION: Failure to update the computer to the latest BIOS prior to installing new memory may result in various system problems.

To update BIOS:

- 1. Navigate to www.hp.com.
- 2. Click Support & Drivers > click Drivers & Software.
- In the Enter a product name/number box, type the computer model information, and then click Search.
- Click the link for the computer model.
- 5. Select the operating system, and then click **Next**.
- 6. Under Step 2: Select a Download, click the BIOS link.
- Click the link for the most recent BIOS.
- 8. Click the **Download** button, and then follow the on-screen instructions.

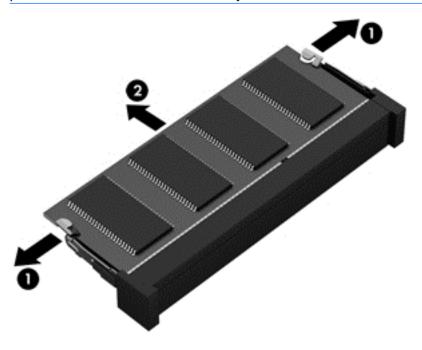

Before removing the memory module, follow these steps:

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- Disconnect all external devices connected to the computer.
- 3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- 5. Remove the service door (see Service door on page 35).

Remove the memory module:

- 1. Position the computer upside-down.
- 2. Spread the retaining tabs (1) on each side of the memory module slot to release the memory module. (The edge of the module opposite the slot rises away from the computer.)

- 3. Remove the memory module (2) by pulling the module away from the slot at an angle.
- NOTE: Memory modules are designed with a notch to prevent incorrect insertion into the memory module slot.
- NOTE: The computer uses two memory sockets. The top socket houses the expansion memory module and the bottom socket houses the primary memory module. The removal procedure is the same for both memory sockets.

Reverse this procedure to install a memory module.

WLAN/Bluetooth combo card

The computer uses a card that provides both WLAN and Bluetooth functionality.

Description	Spare part number
Mediatek MT7630E 802.11bgn 1x1 Wi-Fi + BT4.0 Combo Adapter	710418-001
Atheros AR9485 802.11b/g/n 1x1 WiFi Adapter	675794-001
Atheros AR9565 802.11bgn 1x1 WiFi + BT4.0 combo Adapter	690019-001
Intel Dual Band Wireless-AC 3160 802.11 a/b/g/n/ac (1x1) WiFi with Bluetooth 4.0 combo	710662-001
Realtek RTL8188EE 802.11bgn Wi-Fi Adapter	709848-001
Intel Dual Band Wireless-N 7260AN 802.11 a/b/g/n 2x2 WiFi + BT4.0	717381-001

Before removing the WLAN module, follow these steps:

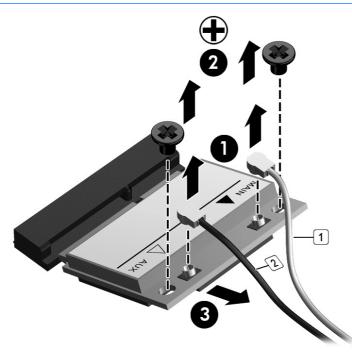

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- 2. Disconnect all external devices connected to the computer.
- Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- 5. Remove the service door (see Service door on page 35).

Remove the WLAN module:

- 1. Position the computer upside-down.
- 2. Disconnect the WLAN antenna cables (1) from the terminals on the WLAN module.
- NOTE: The WLAN antenna cable labeled "1" connects to the WLAN module "Main" terminal labeled "1". The WLAN antenna cable labeled "2" connects to the WLAN module "Aux" terminal labeled "2". If the computer is equipped with an 802.11a/b/g/n WLAN module, the yellow WLAN antenna cable connects to the middle terminal on the WLAN module.
- 3. Remove the two Phillips PM2.5×3.0 screws (2) that secure the WLAN module to the computer. (The edge of the module opposite the slot rises away from the computer.)

4. Remove the WLAN module (3) by pulling the module away from the slot at an angle.

NOTE: If the WLAN antennas are not connected to the terminals on the WLAN module, the protective sleeves must be installed on the antenna connectors, as shown in the following illustration.

Reverse this procedure to install the WLAN module.

Keyboard

NOTE: For a detailed list of available keyboards, see Sequential part number listing on page 24.

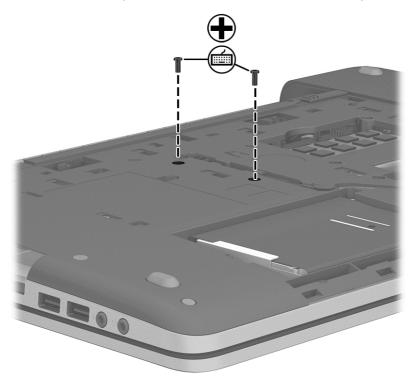

Description	Spare part number
Keyboard	721953-xxx

Before removing the keyboard, follow these steps:

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- 2. Disconnect all external devices connected to the computer.
- Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- 5. Remove the service door (see Service door on page 35).

Remove the keyboard:

- 1. Position the computer upside-down with the front toward you.
- 2. Remove the 2 Phillips PM2.5×6.0 screws that secure the keyboard to the computer.

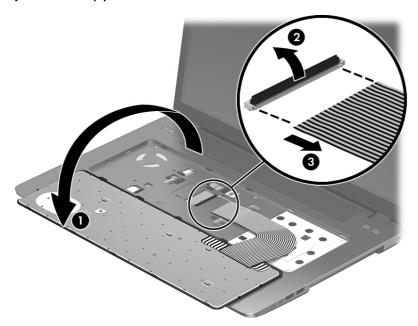

- 3. Position the computer upright and open as far as possible.
- 4. Slide the keyboard slightly downward toward the palm rest to disengage the top of the keyboard from the top cover (1).

5. Lift the top of the keyboard up at an angle (2).

6. Rotate the keyboard until it rests on the palm rest (1), and then disconnect the keyboard cable by lifting the keyboard connector latch (2), and then disconnecting the keyboard cable from the system board (3).

Remove the keyboard.

Reverse this procedure to install the keyboard.

6 Removal and replacement procedures for Authorized Service Provider parts

Component replacement procedures

NOTE: Details about your computer, including model, serial number, product key, and length of warranty, are on the service tag at the bottom of your computer. See Service tag and PCID label on page 15 for details.

This chapter provides removal and replacement procedures for Authorized Service Provider only parts.

There are as many as 61 screws that must be removed, replaced, or loosened when servicing Authorized Service Provider only parts. Make special note of each screw size and location during removal and replacement.

Top cover

NOTE: Top cover spare part kits include the touchpad assembly.

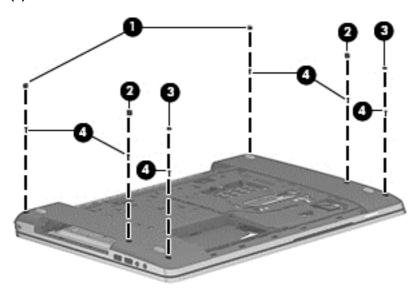

Description	Spare part number
Top cover with a fingerprint reader (includes fingerprint reader assembly)	723644-001
Top cover without a fingerprint reader (includes fingerprint reader plastic insert, bracket, and screws	723645-001
Top cover with a fingerprint reader, RCTO (includes fingerprint reader assembly)	747995-001

Before removing the top cover, follow these steps:

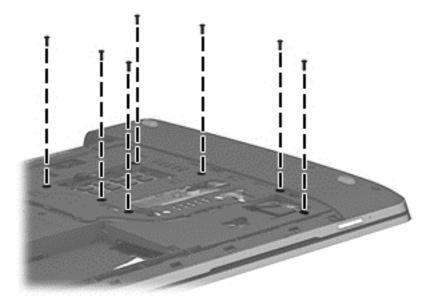

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- Disconnect all external devices connected to the computer.
- 3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- Remove the following components:
 - **a.** Service door (see Service door on page 35).
 - **b.** Keyboard (see <u>Keyboard on page 45</u>)
 - c. Optical drive (Optical drive on page 39)

Remove the top cover:

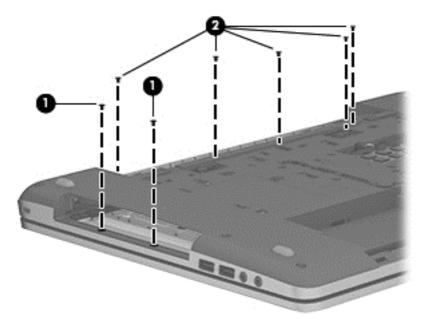

- 1. Position the computer upside-down with the front toward you.
- 2. Remove the following covers and screws that secure the top cover to the computer:
- NOTE: Rubber screw covers come in three different sizes and are available in the Rubber Kit, spare part number 723672-001.
 - (1) 2 rubber screw covers from the rear corners
 - (2) 2 rubber screw covers from each side
 - (3) 2 rubber screw covers from the front corners
 - (4) 6 Torx T8M2.5×6.0 screws from under each screw cover

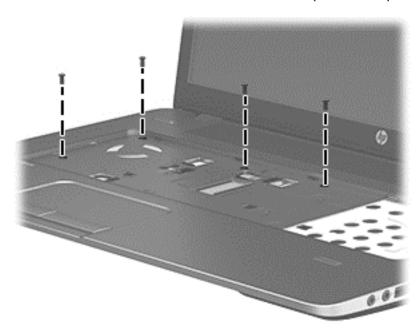

3. Remove the remaining 7 Torx T8M2.5×6.0 screws from the bottom of the computer.

- 4. Remove the following screws:
 - (1) 2 Phillips PM2.0×3.0 screws from the optical drive bay
 - (2) 5 Phillips PM2.5×3.0 screws from the battery bay

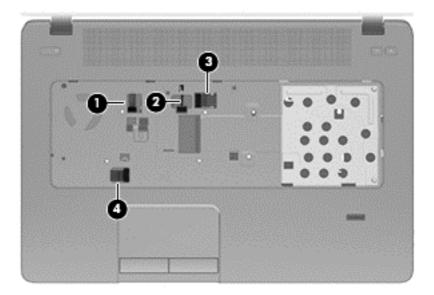

- 5. Position the computer upright and open it as far as possible.
- 6. Remove the 4 Torx T8M2.5×6.0 screws from the top of the computer.

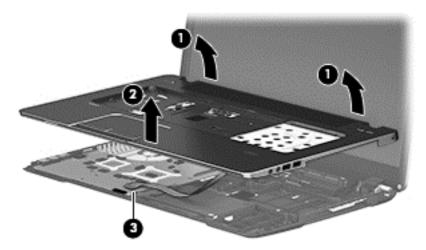

- 7. Disconnect the following cables from the system board:
 - (1): Power button board cable
 - (2): Speaker cable

- (3): Function board cable
- (4): Card reader cable

- 8. Pry the top cover off the computer to disengage it.
- NOTE: Begin by attempting to pry the top cover loose near the optical drive.
- 9. Lift the top of the top cover (1), and the lift the top cover up slightly (2) to gain access to the connected audio/USB cable and connector underneath.
- CAUTION: To avoid damage to the cable and connector, make sure not to disconnect the cable when you lift the top cover from the computer.
- 10. Disconnect the audio/USB board cable (3) from the system board, and then remove the top cover from the computer.

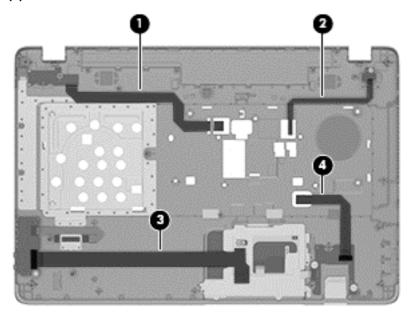

Reverse this procedure to install the top cover.

Use the following image to determine proper routing of top cover cables. All cables are included in the Cable Kit, spare part number 723646-001.

(1): Function board cable

- (2): Power button board cable
- (3): USB/audio board cable
- (4): Card reader cable

Reverse this procedure to install the top cover.

Fingerprint reader assembly

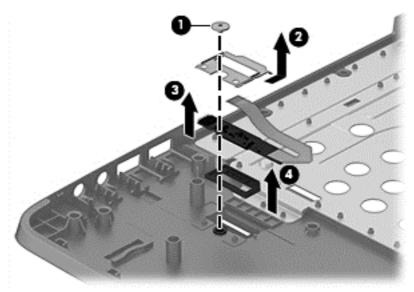

Description	Spare part number
Fingerprint reader assembly (includes cable, bracket, holder, and screws)	723670-001

Before removing the fingerprint reader assembly, follow these steps:

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- 2. Disconnect all external devices connected to the computer.
- 3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- 5. Remove the following components:
 - Service door (see <u>Service door on page 35</u>).
 - **b.** Keyboard (see Keyboard on page 45)
 - c. Optical drive (Optical drive on page 39)
 - d. Top cover (see Top cover on page 47)

Remove the fingerprint reader assembly:

- 1. Position the top cover upside-down.
- 2. Remove the Phillips PM2.0×2.0 broadhead screw (1) that secures the fingerprint reader board bracket to the top cover.
- 3. Slide the bracket toward the bottom of the top cover, and then lift it off the top cover (2).
- 4. Remove the fingerprint reader board and cable assembly from the top cover (3), and then lift the holder from the top cover (4).

Reverse this procedure to install the fingerprint reader assembly.

Power button board

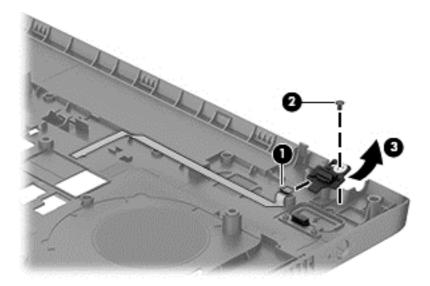

Description	Spare part number
Power button board assembly	721531-001

Before removing the power button board, follow these steps:

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- 2. Disconnect all external devices connected to the computer.
- 3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- 5. Remove the following components:
 - **a.** Service door (see <u>Service door on page 35</u>)
 - **b.** Keyboard (see Keyboard on page 45)
 - **c.** Optical drive (Optical drive on page 39)
 - **d.** Top cover (see <u>Top cover on page 47</u>)

Remove the power button board:

- 1. Position the top cover upside-down.
- 2. Disconnect the cable from the board (1).
- 3. Remove the Phillips PM2.0×3.0 screw (2) that secures the power button board to the top cover.
- 4. Lift the top side of the board up at an angle, and then lift board out from under the tab to remove it from the top cover (3).

Reverse this procedure to install the power button board.

When installing the power button board, insert the bottom of the board into the slot, and then rotate board down into place. If the cable is connected to the board, it blocks the view of the tab on the board and the slot it inserts into.

Function board

Description	Spare part number
Function board	721943-001

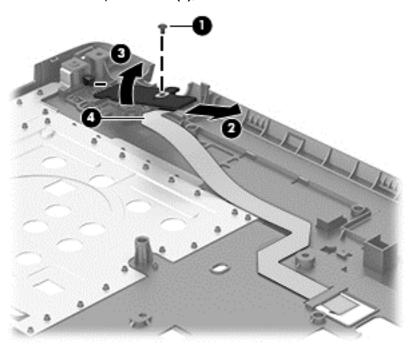

Before removing the function board, follow these steps:

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- 2. Disconnect all external devices connected to the computer.
- 3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- 5. Remove the following components:
 - **a.** Service door (see Service door on page 35)
 - **b.** Keyboard (see Keyboard on page 45)
 - **c.** Optical drive (Optical drive on page 39)
 - d. Top cover (see Top cover on page 47)

Remove the function board:

- 1. Position the top cover upside-down.
- 2. Remove the Phillips PM2.0×3.0 screw (1) that secures the function board to the top cover.
- 3. Lift cable side of the board slightly, and then pull the board toward the right (inside of cover) until the left side of the board comes out from under the holder (2).

4. Turn the board upside down (3), and then disconnect the cable from the board (4).

5. Remove the function board from the top cover.

Reverse this procedure to install the function board.

Card reader board

Description	Spare part number
Card reader board	734088-001

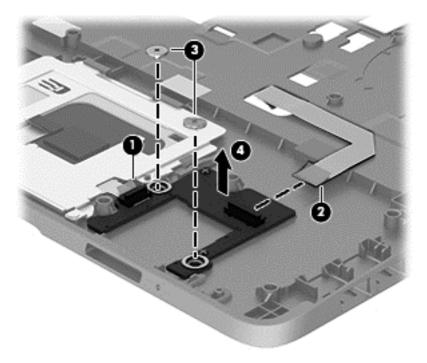

Before removing the card reader board, follow these steps:

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- 2. Disconnect all external devices connected to the computer.
- 3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- Remove the following components:
 - a. Service door (see Service door on page 35).
 - **b.** Keyboard (see Keyboard on page 45)
 - c. Optical drive (Optical drive on page 39)
 - **d.** Top cover (see <u>Top cover on page 47</u>)

Remove the card reader board:

NOTE: Before you remove the card reader, make sure nothing (memory card or plastic insert) in installed.

- 1. Position the top cover upside-down.
- 2. Disconnect the cable that routes to the touchpad buttons (1).
- 3. Disconnect the cable that routes to the system board (2).
- 4. Remove the two Phillips PM2.0×2.0 broadhead screws (3) that secure the card reader board to the computer.
- 5. Remove the card reader board from the top cover (4).

Reverse this procedure to install the card reader board.

Speaker assembly

Description	Spare part number
Speaker assembly	723674-001

OTE: You must remove the left speaker to remove to function board cable.

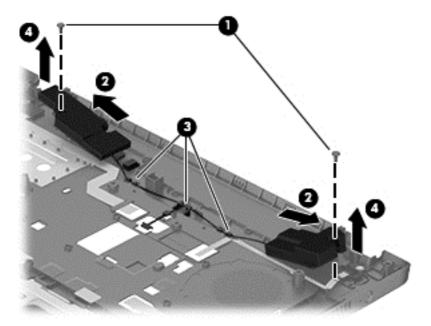

Before removing the speaker assembly, follow these steps:

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- Disconnect all external devices connected to the computer.
- Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- Remove the following components:
 - a. Service door (see Service door on page 35).
 - **b.** Keyboard (see <u>Keyboard on page 45</u>)
 - c. Optical drive (Optical drive on page 39)
 - d. Top cover (see Top cover on page 47)

Remove the speaker assembly:

- 1. Position the top cover upside-down.
- 2. Remove the 2 Phillips PM2.5×6.0 shoulder screws (1) that secure the speakers to the computer.
- 3. Lift the side of each speaker opposite of the screw, and then pull each speaker out from under the tab on the top cover (2).
- 4. Remove the speaker cables from the clips built into the top cover (3).

5. Remove the speakers from the computer (4).

Reverse this procedure to install the speaker assembly.

USB/audio board

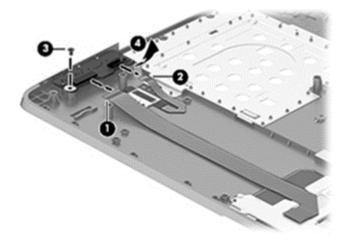

Description	Spare part number
USB/audio board	721542-001

Before removing the USB/audio board, follow these steps:

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- 2. Disconnect all external devices connected to the computer.
- 3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- 5. Remove the following components:
 - **a.** Service door (see <u>Service door on page 35</u>).
 - **b.** Keyboard (see Keyboard on page 45)
 - c. Optical drive (Optical drive on page 39)
 - **d.** Top cover (see Top cover on page 47)

Remove the USB/audio board:

- 1. Position the top cover upside-down.
- 2. Disconnect the cable that routes to the system board (1).
- 3. Disconnect the cable that routes to the fingerprint reader board (2).
- 4. Remove the Phillips PM2.5×4.0 screw (3) that secures the USB/audio board to the computer.
- 5. Rotate the top of the board upward, pull the board away from the connectors (to remove them from top cover holes), and then lift the board off the top cover (4).

Reverse this procedure to install the USB/audio board.

System board

NOTE: All system board spare part kits include replacement thermal material.

Description	Spare part number
System board for use in models without Windows 8:	
1-GB of discrete graphics memory	734083-001
1-GB of discrete graphics memory, RCTO	746629-001
2-GB of discrete graphics memory	734084-001
System boards for use in Windows 8 models:	
Windows 8 Standard models with 1-GB of discrete graphics memory	734083-501
Windows 8 Standard models with 1-GB of discrete graphics memory, RCTO	746629-501
Windows 8 Professional models with 1-GB of discrete graphics memory	734083-601
Windows 8 Professional models with 1-GB of discrete graphics memory, RCTO	746629-601
Windows 8 Standard models with 2-GB of discrete graphics memory	734084-501
Windows 8 Professional models with 2-GB of discrete graphics memory	734084-601

Before removing the system board, follow these steps:

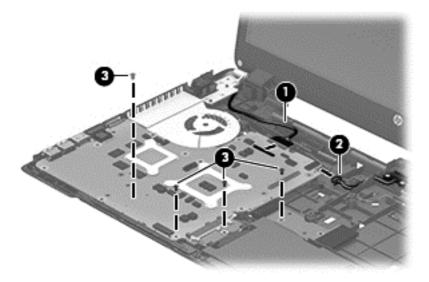

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- Disconnect all external devices connected to the computer.
- Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- 5. Remove the following components:
 - a. Service door (see Service door on page 35).
 - **b.** Hard drive (see <u>Hard drive on page 36</u>)
 - C. Optical drive (see Optical drive on page 39)
 - d. Keyboard (see Keyboard on page 45)
 - e. Top cover (see Top cover on page 47)

When replacing the system board, be sure to remove the following components from the defective system board and install on the replacement system board:

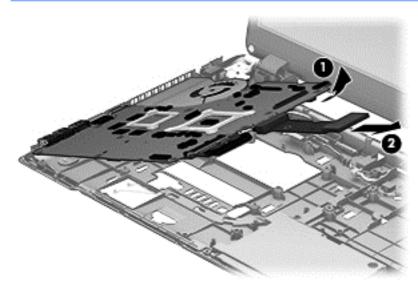

- Memory module (see Memory modules on page 41)
- WLAN/Bluetooth module (see <u>WLAN/Bluetooth combo card on page 43</u>)
- Processor (see <u>Processor on page 69</u>)
- Optical drive extension board (see <u>Optical drive extension board on page 65</u>)
- Hard drive extension board (see <u>Hard drive extension board on page 66</u>)

Remove the system board:

- 1. Position the computer upright with the front toward you.
- 2. Disconnect the display cable (1) from the system board.
- 3. Disconnect the battery connector cable from the system board (2).
- 4. Remove the 2 Phillips PM2.5×4.0 screws (3) that secure the system board to the computer.
- 5. Remove the Phillips PM2.5×4.0 screw (3) that secures the optical drive extension board to the computer and the Phillips PM2.5×4.0 screw (3) that secures the hard drive extension board to the computer.

- 6. Lift the right side of the system board up at an angle (1).
- 7. Pull the system board up and toward the right to remove it from the computer (2).
 - NOTE: The power cable connects to a connector on the bottom of the system board. When you remove the system board, the power cable will be removed from its routing path and remain connected to the system board.

Reverse this procedure to install the system board.

Power cable

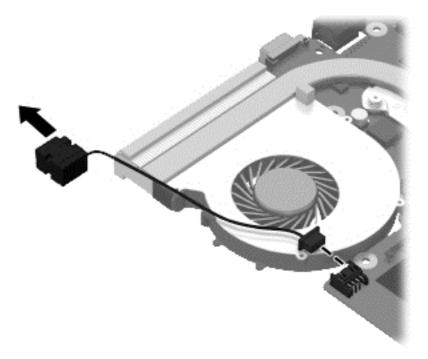

The power cable is included in the Cable Kit, spare part number 723646-001.

Before removing the power cable, follow these steps:

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- Disconnect all external devices connected to the computer.
- 3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- 5. Remove the following components:
 - Service door (see <u>Service door on page 35</u>).
 - b. Hard drive (see <u>Hard drive on page 36</u>)
 - c. Optical drive (see Optical drive on page 39)
 - d. WLAN/Bluetooth module (see WLAN/Bluetooth combo card on page 43)
 - e. Keyboard (see Keyboard on page 45)
 - f. Top cover (see Top cover on page 47)
 - **g.** System board (see System board on page 60)

Remove the power cable:

- 1. Position the system board upside-down.
- 2. Disconnect the cable from the bottom of the system board.

Reverse this procedure to install the power cable.

Battery cable

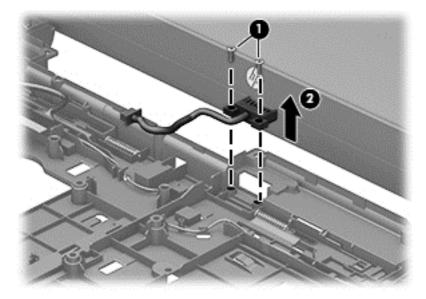

The battery cable is included in the Cable Kit, spare part number 723646-001.

Before removing the battery cable, follow these steps:

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- 2. Disconnect all external devices connected to the computer.
- 3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- 5. Remove the following components:
 - a. Service door (see Service door on page 35).
 - **b.** Hard drive (see <u>Hard drive on page 36</u>)
 - c. Optical drive (see Optical drive on page 39)
 - d. WLAN/Bluetooth module (see WLAN/Bluetooth combo card on page 43)
 - e. Keyboard (see Keyboard on page 45)
 - f. Top cover (see Top cover on page 47)
 - g. System board (see System board on page 60)

Remove the battery cable:

- 1. Position the computer upright and open as far as possible.
- 2. Remove the 2 Phillips PM2.5×4.0 screws that secure the battery cable to the computer (1).
- 3. Remove the battery cable from the computer (2).

Reverse this procedure to install the battery cable.

RTC battery

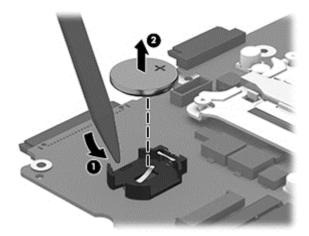

Description	Spare part number
RTC battery	683601-001

Before removing the RTC battery, follow these steps:

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- 2. Disconnect all external devices connected to the computer.
- 3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- 5. Remove the following components:
 - **a.** Service door (see <u>Service door on page 35</u>).
 - **b.** Hard drive (see <u>Hard drive on page 36</u>)
 - c. Optical drive (see Optical drive on page 39)
 - d. WLAN/Bluetooth module (see WLAN/Bluetooth combo card on page 43)
 - e. Keyboard (see Keyboard on page 45)
 - f. Top cover (see Top cover on page 47)
 - g. System board (see <u>System board on page 60</u>)

Remove the RTC battery:

- 1. Position the system board upside-down.
- 2. Use a thin screwdriver or similar tool to pry the battery out of the socket (1).
- 3. Remove the battery from the socket (2).

Reverse this procedure to install the RTC battery.

Optical drive extension board

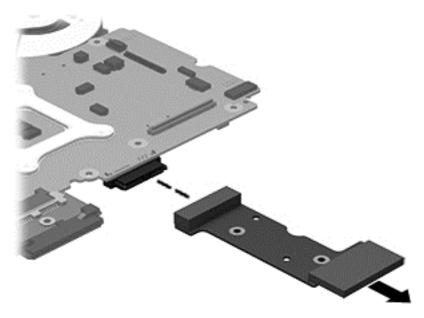

Description	Spare part number
Optical drive extension board	723675-001

Before removing the optical drive extension board, follow these steps:

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- 2. Disconnect all external devices connected to the computer.
- 3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- 5. Remove the following components:
 - a. Service door (see Service door on page 35).
 - **b.** Hard drive (see <u>Hard drive on page 36</u>)
 - c. Optical drive (see Optical drive on page 39)
 - d. WLAN/Bluetooth module (see WLAN/Bluetooth combo card on page 43)
 - e. Keyboard (see Keyboard on page 45)
 - **f.** Top cover (see <u>Top cover on page 47</u>)
 - g. System board (see <u>System board on page 60</u>)

Remove the optical drive extension board:

Pull the optical drive extension board straight away from the side of the system board.

Reverse this procedure to install the optical drive extension board.

Hard drive extension board

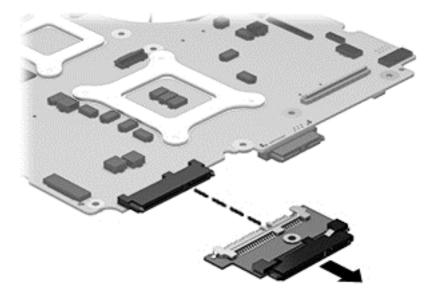

Description	Spare part number
Hard drive extension board	725891-001

Before removing the hard drive extension board, follow these steps:

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- 2. Disconnect all external devices connected to the computer.
- 3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- 5. Remove the following components:
 - **a.** Service door (see <u>Service door on page 35</u>).
 - **b.** Hard drive (see <u>Hard drive on page 36</u>)
 - c. Optical drive (see Optical drive on page 39)
 - d. WLAN/Bluetooth module (see WLAN/Bluetooth combo card on page 43)
 - **e.** Keyboard (see <u>Keyboard on page 45</u>)
 - f. Top cover (see Top cover on page 47)
 - g. System board (see System board on page 60)

Remove the hard drive extension board:

Pull the hard drive extension board straight away from the side of the system board.

Reverse this procedure to install the hard drive extension board.

Fan/heat sink assembly

All fan/heat sink assembly spare part kits include replacement thermal material.

Description	Spare part number
Fan/heat sink assembly	721937-001

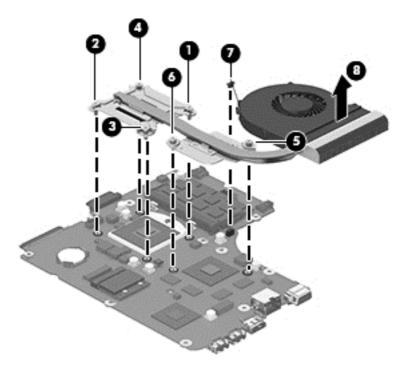

Before removing the fan/heat sink assembly, follow these steps:

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- 2. Disconnect all external devices connected to the computer.
- 3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- 5. Remove the following components:
 - a. Service door (see Service door on page 35).
 - **b.** Hard drive (see <u>Hard drive on page 36</u>)
 - c. Optical drive (see Optical drive on page 39)
 - d. WLAN/Bluetooth module (see WLAN/Bluetooth combo card on page 43)
 - e. Keyboard (see Keyboard on page 45)
 - **f.** Top cover (see Top cover on page 47)
 - g. System board (see System board on page 60)

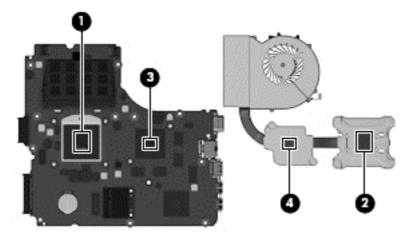

Remove the fan/heat sink assembly:

- 1. Position the system board upside-down.
- 2. To remove the fan/heat sink assembly, in the order indicated on the heat sink, loosen the 6 captive Phillips screws (1)-(6) that secure the heat sink to the system board.
- 3. Disconnect the fan cable from the system board (7).

4. Lift the fan/heat sink from the system board (8).

NOTE: Thoroughly clean thermal material from the surfaces of the system board components (1)(3) and the heat sink (2)(4) each time you remove the heat sink. All heat sink and processor spare part kits include thermal material.

Reverse this procedure to install the fan/heat sink assembly.

Processor

NOTE: All processor spare part kits include replacement thermal material.

Description	Spare part number
Intel Core i7 processor, Quad Core	
4702MQ, 2.2-GHz processor with 6-MB L3 cache	723522-001
Intel Core i5 processors, Dual Core	
4200M, 2.5-GHz processor with 3-MB L3 cache (includes thermal grease)	737328-001
Intel Core i3 processors, Dual Core	
4100M, 2.5-GHz processor with 3-MB L3 cache (includes thermal grease)	737474-001
4000M, 2.4-GHz processor with 3-MB L3 cache (includes thermal grease)	737327-001
Intel Pentium processor, Dual Core	
3550M, 2.4-GHz, with 2-MB L3 cache	737329-001
Intel Celeron processor	
2950M, 2.1-GHz, with 2-MB L3 cache	737326-001

Before removing the processor, follow these steps:

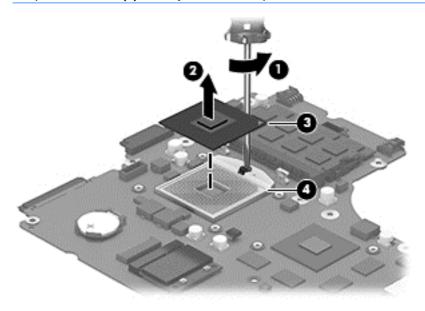

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- Disconnect all external devices connected to the computer.
- Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- 5. Remove the following components:
 - **a.** Service door (see Service door on page 35).
 - **b.** Hard drive (see <u>Hard drive on page 36</u>)
 - **c.** Optical drive (see Optical drive on page 39)
 - d. WLAN/Bluetooth module (see WLAN/Bluetooth combo card on page 43)
 - e. Keyboard (see Keyboard on page 45)
 - **f.** Top cover (see <u>Top cover on page 47</u>)
 - g. System board (see System board on page 60)
 - h. Fan/heat sink assembly (see Fan/heat sink assembly on page 67)

Remove the processor:

- Position the system board upside-down.
- 2. Use a flat-bladed screwdriver to turn the processor locking screw (1) one-half turn counterclockwise until you hear a click.

3. Lift the processor (2) straight up and remove it.

NOTE: The gold triangle (3) on the processor must be aligned with the triangle embossed on the processor slot (4) when you install the processor.

Reverse this procedure to install the processor.

Latch assembly

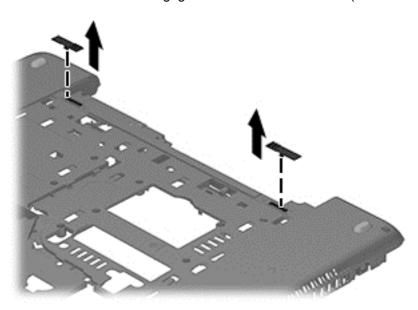

NOTE: The latch kit is not spared.

Before removing the latch assembly, follow these steps:

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- 2. Disconnect all external devices connected to the computer.
- 3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- 5. Remove the following components:
 - a. Service door (see Service door on page 35).
 - **b.** Hard drive (see <u>Hard drive on page 36</u>)
 - **c.** Optical drive (see Optical drive on page 39)
 - d. WLAN/Bluetooth module (see WLAN/Bluetooth combo card on page 43)
 - **e.** Keyboard (see Keyboard on page 45)
 - f. Top cover (see Top cover on page 47)
 - g. System board (see System board on page 60)
- NOTE: The latch mechanisms include a small spring. Note the location of the spring.

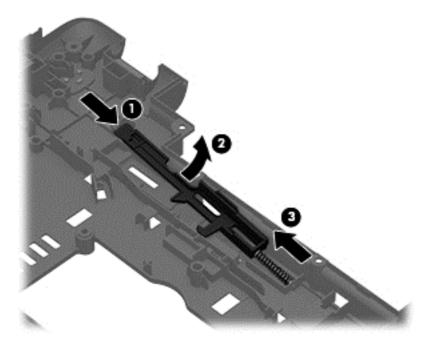

Remove the latch assembly:

- 1. Position the computer upside-down.
- Press on the tabs to disengage the latches from the lever (it clicks when disengaged).

3. Push the lever toward the spring to gain access to the left side of the lever, and then pull the left end of the lever upward (1).

4. Rotate the left side of the lever upward to remove the pin on the top cover (2) from the groove in the lever, and then lift the lever from the computer (3).

To install the latch assembly, reverse the removal procedure.

Display assembly

All display assemblies include WLAN antenna transceivers and cables.

For a list of individual display spare parts, see <u>Display components on page 20</u>.

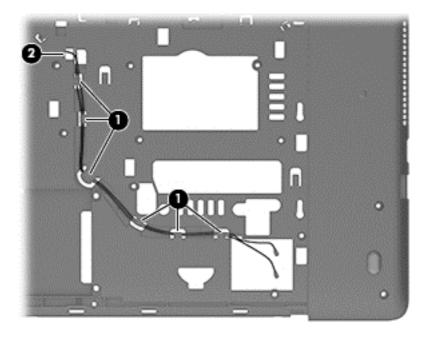

Description	Spare part number
Display assembly, 43.9-cm (17.3-inch), HD+, anti-glare, with webcam	723643-001

Before removing the display assembly, follow these steps:

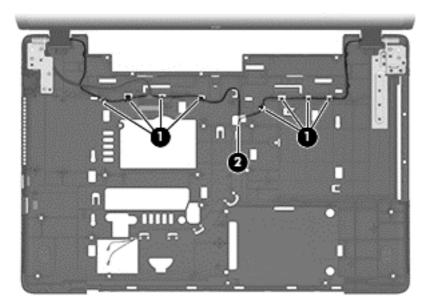

- 1. Shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
- 2. Disconnect all external devices connected to the computer.
- 3. Disconnect the power from the computer by first unplugging the power cord from the AC outlet, and then unplugging the AC adapter from the computer.
- 4. Remove the battery (see <u>Battery on page 34</u>).
- 5. Remove the following components:
 - a. Service door (see Service door on page 35).
 - b. WLAN/Bluetooth module (see WLAN/Bluetooth combo card on page 43)
 - c. Keyboard (see Keyboard on page 45)
 - **d.** Top cover (see <u>Top cover on page 47</u>)

Remove the display assembly:

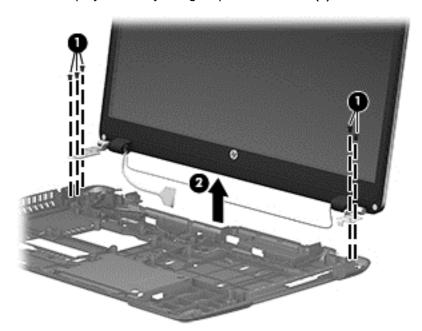

- 1. Position the computer upside down.
- 2. Remove the WLAN antennas from the routing path on the bottom of the computer (1).
- 3. Pull the antennas through the hole that leads to the other side of the top cover (2).

- 4. Place the computer upright and open as far as possible.
- 5. Remove the WLAN antennas from the tabs and the routing path (1) on the top of the computer.
- 6. Note the location that the antennas route through the chassis (2).

- 7. Remove the five Torx T8M2.5×4.0 screws (1) from the display hinges (3 screws in the left hinge, 2 in the right hinge).
- 8. Lift the display assembly straight up and remove it (2).

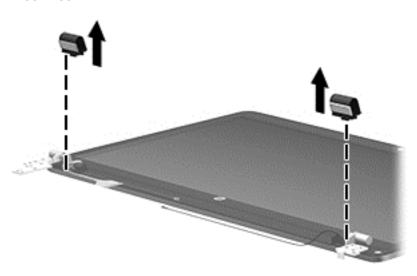

CAUTION: When installing the display assembly, be sure that the wireless antenna cables are routed and arranged properly.

Failure to properly route the antennas can result in degradation of the computer's wireless performance.

9. If you need to remove the hinge covers from the display hinges, squeeze and pull the covers straight up and off the display to remove them.

If you need to remove the hinge covers from the display hinges, pinch the top and bottom of the hinges and then pull the hinges straight up and off the display.

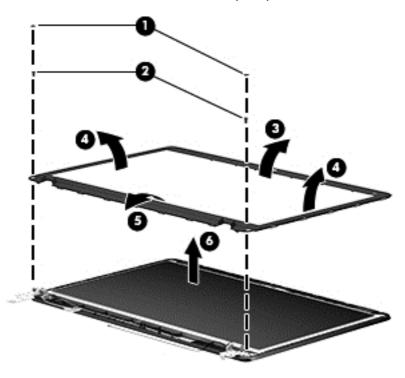

Display hinge covers are available in the Display Hinge Kit using spare part number 723642-001.

- 10. If you need to remove the display bezel, remove the 2 mylar screw covers (1) and the 2 Phillips PM2.5×4.0 screws (2) in the bottom corners of the display bezel.
- 11. Flex the top (3) of the bezel, the inside edges of the left and right sides (4), and then the bottom (5) of the bezel until it disengages from the display enclosure.
- NOTE: Make sure the hinges are not bent (see hinge position in following image) when you remove the bezel.

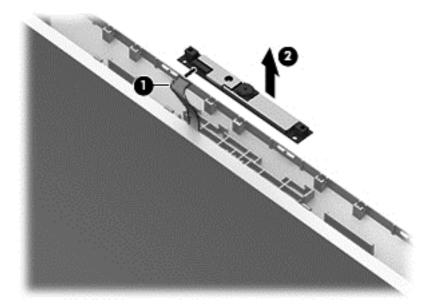

12. Remove the display bezel (6).

The display bezel is available using spare part number 723640-001. Display bezel mylar screw covers are available in the Rubber Kit, spare part number 723672-001.

13. If it is necessary to replace the webcam module, disconnect the cable from the module (1), and then gently pull the module away from the double-sided tape on the display enclosure (2).

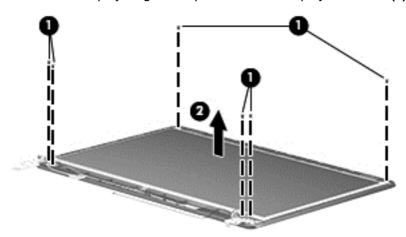

The webcam module is available using spare part number 721543-001.

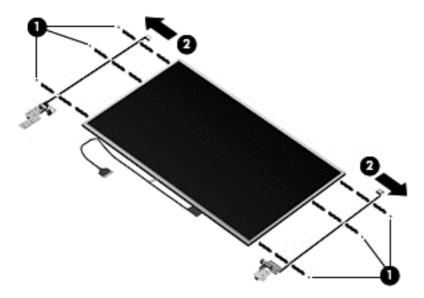

14. If it is necessary to replace the display hinges, remove the 6 Phillips PM2.5×3.0 screws (1) that secure the display hinges and panel to the display enclosure.

Display hinges are available in the Display Hinge Kit using spare part number 723642-001.

15. Remove the display hinges and panel from the display enclosure (2).

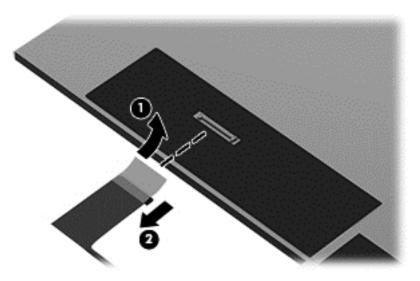

- 16. Position the display panel and hinge assembly upright.
- 17. Remove the 3 Phillips PM1.5×2.0 screws (1) that secure each display hinge to the display panel.
- 18. Remove the display hinges (2).

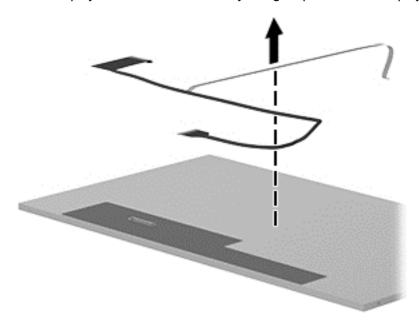

19. If it is necessary to remove the display/webcam cable assembly, disconnect the display panel cable from the rear of the display panel by lifting the tape (1) that covers the connector, and disconnecting the cable from the panel (2).

The display/webcam cable assembly is available in the Cable Kit, spare part number 723646-001.

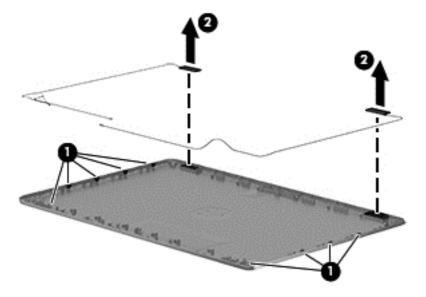

20. Lift the display/webcam cable assembly straight up and off the display panel.

21. If it is necessary to remove the antennas from the display enclosure, remove the antennas from clips on each side of the enclosure (1), gently lift the transceivers (2) to disengage them from the double-stick tape, and then lift the antennas from the display enclosure.

Antennas are available using spare part number 723641-001.

Reverse this procedure to reassemble and install the display assembly.

7 New Windows 8.1 features

This guide describes new Windows® features, which may update some of the information provided with your computer. These new features include the following:

- Start button and Start menu
- Easier shutdown process
- Enhanced search options
- Enhanced snap multi-tasking capability
- Optional setting to go to the desktop upon sign-in
- Backup and recovery information
- Additional operating specifications

Navigating the Start screen

The Start screen provides a central location where you can access information and email, browse the Web, stream videos, view photos, and access social media websites.

NOTE: Your computer's Start screen may look different than the following illustration.

	Action	Using a keyboard and mouse	Using touch gestures
(1)	Open an app	Click a Start screen app.	Tap a Start screen app.
(2)	Display the charms (Search, Share, Start, Devices, and Settings)	Point to the upper-right or lower-right corner of the Start screen.	Swipe from the right edge of the TouchPad or touch screen.
(3)	Find a list of all apps on your computer	Point to the lower-left area of the Start screen, and then click the arrow. To return to the Start screen, click the arrow again.	Swipe to the left on the TouchPad or the touch screen until the arrow appears, and then tap the arrow in the lower-left corner of the Start screen.
			To return to the Start screen, tap the arrow again.
(4)	Display the Start menu	Point to the lower-left area of the Start screen, and then right-click the Start button.	Tap the Desktop app, and then press and release the Start button in the lower-left corner.
(5)	Switch between open apps	Point to the upper-left corner of the Start screen to reveal a list of open apps, and then click an open app.	Swipe in and out from the left edge of the TouchPad or touch screen to reveal a list of open apps, and then tap an open app.

IMPORTANT: To quickly return to the Start screen, press the Windows key

or point to the lower-left corner of the Start screen, and then click or tap the **Start** button **!** .

Locating the Start button and the Start menu

The Start button is displayed in the lower-left corner of the Windows desktop. The Start menu offers quick access to frequently used options, including File Explorer, Control Panel, Desktop, Power Options, and Shut down. For more information, see the Windows Basics guide included with your computer.

Follow the instructions below to display the Start button and the Start menu.

Action	Using a keyboard and mouse	Using touch gestures
Locate the Start button and the Start menu	Point to the lower-left area of the Start screen, and then right-click the Start button to display the Start menu.	Tap the Desktop app, and then press and release the Start button in the lowerleft corner to display the Start menu.

Shutting down the computer

To shut down the computer from the Start menu, follow the instructions below.

Action	Using a keyboard and mouse	Using touch gestures
Shut down the computer	 Point to the lower-left area of the Start screen, and then right-click the Start button to display the Start menu. 	 Tap the Desktop app, and then press and release the Start button in the lower-left corner to display the Start menu.
	Select Shut down, and then select Shut down.	Tap Shut down, and then tap Shut down.
	– or –	– or –

Action	Usi	ng a keyboard and mouse	Usi	ng touch gestures
	1.	Point to the upper-right or lower-right corner of the screen to display the charms, and then click Settings . Click the Power icon, and then click	1.	Swipe from the right edge of the TouchPad or touch screen to display the charms, and then tap Settings .
		Shut down.	2.	Tap the Power icon, and then tap Shut down .

Displaying all apps

Action	Using a keyboard and mouse	Using touch gestures
See all the apps on your computer	Point to the lower-left area of the Start screen, and then click the arrow in the lower-left corner of the screen. To return to the Start screen, click the arrow in the lower-left corner of the screen.	Swipe to the left on the TouchPad or touch screen until the arrow appears, and then tap the arrow in the lower-left corner of the Start screen. To return to the Start screen, tap the arrow in the lower-left corner of the screen.

Closing apps

Action	Using a keyboard and mouse	Using touch gestures
Close an app	Point to the upper-left corner of the screen, and then move down the left side of the screen to display all open	 From the upper-left corner of the screen, swipe in and out to display all open apps.
	apps.Drag an app to the right, and then down to the bottom of the screen, hold it until the app rotates, and then release the app to close it.	2. Drag an app to the right, and then down to the bottom of the screen, hold it until the app rotates, and then release the app to close it.

Enhanced search feature

- To search from the Start screen, begin typing a keyword.
 Search results are displayed in a panel at the right side of the screen.
- 2. To expand your search, click or tap to select one of the following options:
 - Everywhere
 - Settings
 - Files
 - Web images
 - Web videos
 - NOTE: If you cannot find the topic easily, type **help**, and then search within **Help and Support**.

Enhanced snap feature

You can snap applications to the left or right side of the screen in order to view a Start screen app and a desktop app at the same time. Depending on the computer's screen resolution, you can snap up to four apps at the same time.

▲ Drag an app to the left or the right side of the screen.

Discovering and connecting to Miracast-compatible wireless displays (select models only)

To discover and connect to Miracast-compatible wireless displays without leaving your current apps, follow the steps below.

Action	Using a keyboard and mouse	Using touch gestures		
Discover and connect to Miracast- compatible wireless displays	Point to the upper-right or lower-right corner of the Start screen to display the charms, click Devices , click Project , and then follow the on-screen instructions.	Swipe from the right edge of the Start screen to display the charms, tap Devices , tap Project , and then follow the on-screen instructions.		

Opening to the Windows desktop instead of the Start screen

To change the default setting so that Windows will always open to the Windows desktop instead of the Start screen, follow the steps below.

Action	Usi	ng a keyboard and mouse	Using touch gestures		
Open to the Windows desktop 1. instead of the Start screen		From the Start screen, click the Desktop app.		From the Start screen, tap the Desktop app.	
	2.	Right-click the navigation bar at the bottom of the screen, and then select Properties .	2.	Tap and hold the navigation bar at the bottom of the screen, and then select Properties .	
	3.4.	Click the Navigation tab, and then select the check box labeled When I sign in or close all apps on a screen, go to the desktop instead of Start. Click OK .		Tap the Navigation tab, and then select the check box labeled When I sign in or close all apps on a screen, go to the desktop instead of Start.	
		Cilch On.	4.	Тар ОК .	

To revert to the original sign-in setting, follow the instructions above, but clear the check box labeled **Go to the desktop instead of Start when I sign in**, and then click or tap **OK**.

This PC

To explore files and folders on your computer and connected devices, from the Start screen, type this pc, and then select **This PC**. This feature was formerly called My Computer.

Backup, restore, and recovery updates

The following backup, restore, and recovery procedures replace the procedures provided in the *User Guide* for your computer.

Using Windows backup and restore

For information about the Windows backup and restore features, see the HP Support Assistant.

NOTE: The path to access the HP Support Assistant has changed.

- 1. From the Start screen, select the **HP Support Assistant** app.
- Type restore in the Search field, and then follow the information provided.

For additional backup information, type backup in the Search field.

Checking for recovery partitions

NOTE: If you need to check for the presence of the HP Recovery partition or Windows partition before performing system recovery tasks, the steps have changed.

To check for the presence of the HP Recovery partition or Windows partition, from the Start screen, type file and then select **File Explorer**.

Using HP Software Setup (select models only)

NOTE: If you need to use HP Software Setup to reinstall drivers or software that has been corrupted or deleted from the system, the steps for accessing HP Software Setup have changed.

To access HP Software Setup:

- From the Start screen, type HP Software Setup.
- NOTE: If the HP Software Setup app does not appear, your system does not support this feature. Refer to the *User Guide* for restore and recovery steps for your computer.
- Select HP Software Setup.
- 3. Follow the on-screen instructions to reinstall drivers or select software.

Using other backup, restore, and recovery tools

For additional information on backup, restore, and recovery, refer to the *User Guide* provided for your computer.

8 Computer Setup (BIOS), MultiBoot, and HP PC Hardware Diagnostics (UEFI) in Windows 8

Using Computer Setup

Computer Setup, or Basic Input/Output System (BIOS), controls communication between all the input and output devices on the system (such as disk drives, display, keyboard, mouse, and printer). Computer Setup includes settings for the types of devices installed, the startup sequence of the computer, and the amount of system and extended memory.

NOTE: Use extreme care when making changes in Computer Setup. Errors can prevent the computer from operating properly.

Starting Computer Setup

NOTE: An external keyboard or mouse connected to a USB port can be used with Computer Setup only if USB legacy support is enabled.

To start Computer Setup, follow these steps:

- Turn on or restart the computer, and then press esc while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen.
- Press f10 to enter Computer Setup.

Navigating and selecting in Computer Setup

To navigate and select in Computer Setup, follow these steps:

- Turn on or restart the computer, and then press esc while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen.
- NOTE: You can use either a pointing device (TouchPad, pointing stick, or USB mouse) or the keyboard to navigate and make selections in Computer Setup.
- Press f10 to enter Computer Setup.
 - To select a menu or a menu item, use the tab key and the keyboard arrow keys and then press enter, or use a pointing device to click the item.
 - To scroll up and down, click the up arrow or the down arrow in the upper-right corner of the screen, or use the up arrow key or the down arrow key on the keyboard.
 - To close open dialog boxes and return to the main Computer Setup screen, press esc, and then follow the on-screen instructions.

To exit Computer Setup menus, choose one of the following methods:

To exit Computer Setup menus without saving your changes:

Click the **Exit** icon in the lower-right corner of the screen, and then follow the on-screen instructions.

- or -

Use the tab key and the arrow keys to select **Main > Ignore Changes and Exit**, and then press enter.

To save your changes and exit Computer Setup menus:

Click the **Save** icon in the lower-right corner of the screen, and then follow the on-screen instructions.

- or -

Use the tab key and the arrow keys to select **Main > Save Changes and Exit**, and then press enter.

Your changes go into effect when the computer restarts.

Restoring factory settings in Computer Setup

NOTE: Restoring defaults will not change the hard drive mode.

To return all settings in Computer Setup to the values that were set at the factory, follow these steps:

- 1. Turn on or restart the computer, and then press esc while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen.
- 2. Press f10 to enter Computer Setup.
- 3. Use a pointing device or the arrow keys to select **Main > Restore Defaults**.
- 4. Follow the on-screen instructions.
- 5. To save your changes and exit, click the **Save** icon in the lower-right corner of the screen, and then follow the on-screen instructions.

- or -

Use the arrow keys to select **Main > Save Changes and Exit**, and then press enter.

Your changes go into effect when the computer restarts.

NOTE: Your password settings and security settings are not changed when you restore the factory settings.

Updating the BIOS

Updated versions of the BIOS may be available on the HP website.

Most BIOS updates on the HP website are packaged in compressed files called SoftPags.

Some download packages contain a file named Readme.txt, which contains information regarding installing and troubleshooting the file.

Determining the BIOS version

To determine whether available BIOS updates contain later BIOS versions than those currently installed on the computer, you need to know the version of the system BIOS currently installed.

BIOS version information (also known as *ROM date* and *System BIOS*) can be displayed by pressing fn+esc (if you are already in Windows) or by using Computer Setup.

- Start Computer Setup.
- Use a pointing device or the arrow keys to select Main > System Information.
- 3. To exit Computer Setup without saving your changes, click the **Exit** icon in the lower-right corner of the screen, and then follow the on-screen instructions.

- or -

Use the tab key and the arrow keys to select **Main > Ignore Changes and Exit**, and then press enter.

Downloading a BIOS update for Windows 8

CAUTION: To reduce the risk of damage to the computer or an unsuccessful installation, download and install a BIOS update only when the computer is connected to reliable external power using the AC adapter. Do not download or install a BIOS update while the computer is running on battery power, docked in an optional docking device, or connected to an optional power source. During the download and installation, follow these instructions:

Do not disconnect power on the computer by unplugging the power cord from the AC outlet.

Do not shut down the computer or initiate Sleep.

Do not insert, remove, connect, or disconnect any device, cable, or cord.

- 1. From the Start screen, type support, and then select the HP Support Assistant app.
- 2. Click **Updates and tune-ups**, and then click **Check for HP updates now**.
- Follow the on-screen instructions.
- 4. At the download area, follow these steps:
 - a. Identify the most recent BIOS update and compare it to the BIOS version currently installed on your computer. Make a note of the date, name, or other identifier. You may need this information to locate the update later, after it has been downloaded to your hard drive.
 - b. Follow the on-screen instructions to download your selection to the hard drive.
 - If the update is more recent than your BIOS, make a note of the path to the location on your hard drive where the BIOS update is downloaded. You will need to access this path when you are ready to install the update.
- NOTE: If you connect your computer to a network, consult the network administrator before installing any software updates, especially system BIOS updates.

BIOS installation procedures vary. Follow any instructions that are displayed on the screen after the download is complete. If no instructions are displayed, follow these steps:

- From the Start screen, type e, and then select **File Explorer**.
- 2. Click your hard drive designation. The hard drive designation is typically Local Disk (C:).
- Using the hard drive path you recorded earlier, open the folder on your hard drive that contains the update.
- Double-click the file that has an .exe extension (for example, *filename*.exe). The BIOS installation begins.
- Complete the installation by following the on-screen instructions.
- NOTE: After a message on the screen reports a successful installation, you can delete the downloaded file from your hard drive.

Using MultiBoot

About the boot device order

As the computer starts, the system attempts to boot from enabled devices. The MultiBoot utility, which is enabled at the factory, controls the order in which the system selects a boot device. Boot devices can include optical drives, diskette drives, a network interface card (NIC), hard drives, and USB devices. Boot devices contain bootable media or files that the computer needs to start and operate properly.

You can change the order in which the computer searches for a boot device by changing the boot order in Computer Setup. You can also press esc while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen, and then press f9. Pressing f9 displays a menu that shows the current boot devices and allows you to select a boot device. Or, you can use MultiBoot Express to set the computer to prompt you for a boot location each time the computer turns on or restarts.

Choosing Multi Boot preferences

You can use MultiBoot in the following ways:

- To set a new boot order that the computer uses each time it is turned on, by changing the boot order in Computer Setup.
- To dynamically choose the boot device, by pressing esc while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen, and then pressing for to enter the Boot Device Options menu.
- To use MultiBoot Express to set variable boot orders. This feature prompts you for a boot device each time the computer is turned on or restarted.

Setting a new boot order in Computer Setup

To start Computer Setup and set a boot device order that the computer uses each time it is turned on or restarted, follow these steps:

- 1. Turn on or restart the computer, and then press esc while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen.
- 2. Press f10 to enter Computer Setup.
- Use a pointing device or the arrow keys to select the Advanced > Boot Options > UEFI Boot
 Order for UEFI Hybrid or UEFI Native Boot Mode, or select Advanced > Boot Options > Legacy
 Boot Order for Legacy Boot Mode, and then press enter.
- 4. To move the device up in the boot order, use a pointing device to click the up arrow, or press the + key.
 - or –

To move the device down in the boot order, use a pointing device to click the down arrow, or press the - key.

- 5. To save your changes and exit Computer Setup, click the **Save** icon in the lower-left corner of the screen, and then follow the on-screen instructions.
 - or -

Use the arrow keys to select **Main > Save Changes and Exit**, and then press enter.

Dynamically choosing a boot device using the f9 prompt

To dynamically choose a boot device for the current startup sequence, follow these steps:

- Open the Select Boot Device menu by turning on or restarting the computer, and then pressing esc while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen.
- 2. Press f9.
- 3. Use a pointing device or the arrow keys to select a boot device, and then press enter.

Setting a MultiBoot Express prompt

To start Computer Setup and set the computer to display the MultiBoot startup location menu each time the computer is started or restarted, follow these steps:

- 1. Turn on or restart the computer, and then press esc while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen.
- 2. Press f10 to enter Computer Setup.
- 3. Use a pointing device or the arrow keys to select Advanced > Boot Options > Multiboot Express Popup Delay (Sec), and then press enter.
- 4. In the MultiBoot Express Popup Delay (Sec) field, enter the length of time in seconds that you want the computer to display the startup location menu before it defaults to the current MultiBoot setting. (When 0 is selected, the Express Boot startup location menu is not displayed.)
- To save your changes and exit Computer Setup, click the Save icon in the lower-left corner of the screen, and then follow the on-screen instructions.
 - or -

Use the arrow keys to select Main > Save Changes and Exit, and then press enter.

Your changes go into effect when the computer restarts.

Entering MultiBoot Express preferences

When the Express Boot menu is displayed during startup, you have the following choices:

- To specify a boot device from the Express Boot menu, select your preference within the allotted time, and then press enter.
- To prevent the computer from defaulting to the current MultiBoot setting, press any key before the allotted time expires. The computer will not start until you select a boot device and press enter.
- To allow the computer to start according to the current MultiBoot settings, wait for the allotted time to expire

Using HP PC Hardware Diagnostics (UEFI) (select models only)

HP PC Hardware Diagnostics is a Unified Extensible Firmware Interface (UEFI) that allows you to run diagnostic tests to determine whether the computer hardware is functioning properly. The tool runs outside the operating system so that it can isolate hardware failures from issues that are caused by the operating system or other software components.

To start HP PC Hardware Diagnostics UEFI:

- 1. Turn on or restart the computer, quickly press esc, and then press f2.
 - The BIOS searches three places for the HP PC Hardware Diagnostics (UEFI) tools in the following order:
 - a. Connected USB drive
 - NOTE: To download the HP PC Hardware Diagnostics (UEFI) tool to a USB drive, see Downloading HP PC Hardware Diagnostics (UEFI) to a USB device on page 91.
 - b. Hard drive
 - c. BIOS
- 2. Click the type of diagnostic test you want to run, and then follow the on-screen instructions.

Downloading HP PC Hardware Diagnostics (UEFI) to a USB device

- NOTE: The HP PC Hardware Diagnostics (UEFI) download instructions are provided in English only.
 - 1. Go to http://www.hp.com.
 - 2. Click **Support & Drivers**, and then click the **Drivers & Software** tab.
 - 3. Enter the product name in the text box, and then click **Search**.

- 4. Select your computer model, and then select your operating system.
- 5. In the Diagnostic section, click HP UEFI Support Environment.

– or –

Click **Download**, and then select **Run**.

9 Setup Utility (BIOS) and System Diagnostics in Windows 7

Using Setup Utility

Setup Utility, or Basic Input/Output System (BIOS), controls communication between all the input and output devices on the system (such as disk drives, display, keyboard, mouse, and printer). Setup Utility includes settings for the types of peripherals installed, the startup sequence of the computer, and the amount of system and extended memory.

NOTE: Use extreme care when making changes in Setup Utility. Errors can prevent the computer from operating properly.

Starting Setup Utility

NOTE: An external keyboard or mouse connected to a USB port can be used with Setup Utility only if USB legacy support is enabled.

To start Setup Utility, follow these steps:

- 1. Turn on or restart the computer, and then press esc while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen.
- Press f10 to enter Setup Utility.

Changing the language of Setup Utility

- Start Setup Utility.
- 2. Use the arrow keys to select **System Configuration > Language**, and then press enter.
- 3. Use the arrow keys to select a language, and then press enter.
- 4. When a confirmation prompt with your language selected is displayed, press enter.
- 5. To save your change and exit Setup Utility, use the arrow keys to select **Exit > Exit Saving** Changes, and then press enter.

Your change takes effect immediately.

Navigating and selecting in Setup Utility

To navigate and select in Setup Utility, follow these steps:

- Turn on or restart the computer, and then press esc while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen.
 - To select a menu or a menu item, use the tab key and the keyboard arrow keys and then press enter, or use a pointing device to click the item.
 - To scroll up and down, click the up arrow or the down arrow in the upper-right corner of the screen, or use the up arrow key or the down arrow key.
 - To close open dialog boxes and return to the main Setup Utility screen, press esc, and then follow the on-screen instructions.
- Press f10 to enter Setup Utility.

To exit Setup Utility menus, choose one of the following methods:

 To exit Setup Utility menus without saving your changes, press the esc key, and then follow the on-screen instructions.

- or -

Use the arrow keys to select **Exit > Exit Discarding Changes**, and then press enter.

 To save your changes and exit Setup Utility menus, press f10, and then follow the on-screen instructions.

– or –

Use the tab key and the arrow keys to select Exit > Exit Saving Changes, and then press enter.

Your changes go into effect when the computer restarts.

Displaying system information

- 1. Start Setup Utility.
- 2. Select the **Main** menu. System information such as the system time and date, and identification information about the computer is displayed.
- 3. To exit Setup Utility without changing any settings, use the arrow keys to select Exit > Exit Discarding Changes, and then press enter.

Restoring factory settings in Setup Utility

NOTE: Restoring defaults will not change the hard drive mode.

To return all settings in Setup Utility to the values that were set at the factory, follow these steps:

- 1. Turn on or restart the computer, and then press esc while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen.
- 2. Press f10 to enter Setup Utility.
- 3. Use the arrow keys to select Exit > Load Setup Defaults.
- 4. Follow the on-screen instructions.
- 5. To save your changes and exit, press f10, and then follow the on-screen instructions.
 - or -

Use the arrow keys to select **Exit > Exit Saving Changes**, and then press enter.

Your changes go into effect when the computer restarts.

NOTE: Your password settings and security settings are not changed when you restore the factory settings.

Exiting Setup Utility

- To exit Setup Utility and save your changes from the current session:
 - If the Setup Utility menus are not visible, press esc to return to the menu display. Then use the arrow keys to select **Exit > Exit Saving Changes**, and then press enter.
- To exit Setup Utility without saving your changes from the current session:
 - If the Setup Utility menus are not visible, press esc to return to the menu display. Then use the arrow keys to select **Exit > Exit Discarding Changes**, and then press enter.

Updating the BIOS

Updated versions of the BIOS may be available on the HP Web site.

Most BIOS updates on the HP Web site are packaged in compressed files called *SoftPags*.

Some download packages contain a file named Readme.txt, which contains information regarding installing and troubleshooting the file.

Determining the BIOS version

To determine whether available BIOS updates contain later BIOS versions than those currently installed on the computer, you need to know the version of the system BIOS currently installed.

BIOS version information (also known as *ROM date* and *System BIOS*) can be displayed by pressing fn+esc (if you are already in Windows) or by using Setup Utility.

- 1. Start Setup Utility (BIOS).
- 2. Use the arrow keys to select **Main**.
- To exit Setup Utility (BIOS) without saving your changes, use the tab key and the arrow keys to select Exit > Exit Discarding Changes, and then press enter.

Downloading a BIOS update

Do not disconnect power from the computer by unplugging the power cord from the AC outlet.

Do not shut down the computer or initiate Sleep or Hibernation.

Do not insert, remove, connect, or disconnect any device, cable, or cord.

- 1. Windows 7—Select Start > Help and Support > Maintain.
 - **Windows XP**—Select **Start > Help and Support**, and then select the software and drivers update.
- Follow the on-screen instructions to identify your computer and access the BIOS update you want to download.
- 3. At the download area, follow these steps:
 - **a.** Identify the BIOS update that is later than the BIOS version currently installed on your computer. Make a note of the date, name, or other identifier. You may need this information to locate the update later, after it has been downloaded to your hard drive.
 - b. Follow the on-screen instructions to download your selection to the hard drive. Make a note of the path to the location on your hard drive where the BIOS update is downloaded. You will need to access this path when you are ready to install the update.
 - NOTE: If you connect your computer to a network, consult the network administrator before installing any software updates, especially system BIOS updates.

BIOS installation procedures vary. Follow any instructions that are displayed on the screen after the download is complete. If no instructions are displayed, follow these steps:

- 1. Windows 7—Open Windows Explorer by selecting Start > Computer.
 - Windows XP—Open Windows Explorer by selecting Start > My Computer.
- 2. Double-click your hard drive designation. The hard drive designation is typically Local Disk (C:).
- 3. Using the hard drive path you recorded earlier, open the folder on your hard drive that contains the update.

- Double-click the file that has an .exe extension (for example, *filename.exe*).
 The BIOS installation begins.
- 5. Complete the installation by following the on-screen instructions.

NOTE: After a message on the screen reports a successful installation, you can delete the downloaded file from your hard drive.

Using System Diagnostics

System Diagnostics allows you to run diagnostic tests to determine if the computer hardware is functioning properly. The following diagnostic tests are available in System Diagnostics:

- Start-up test—This test analyzes the main computer components that are required to start the computer.
- Run-in test—This test repeats the start-up test and checks for intermittent problems that the start-up test does not detect.
- Hard disk test—This test analyzes the physical condition of the hard drive, and then checks all
 data in every sector of the hard drive. If the test detects a damaged sector, it attempts to move
 the data to a good sector.
- Memory test—This test analyzes the physical condition of the memory modules. If it reports an error, replace the memory modules immediately.
- Battery test—This test analyzes the condition of the battery. If the battery fails the test, contact HP support to report the issue and purchase a replacement battery.

You can also view system information and error logs in the System Diagnostics window.

To start System Diagnostics:

- 1. Turn on or restart the computer. While the "Press the ESC key for Startup Menu" message is displayed in the lower-left corner of the screen, press esc. When the Startup Menu is displayed, press f2.
- 2. Click the diagnostic test you want to run, and then follow the on-screen instructions.

10 Computer Setup (BIOS) and Advanced System Diagnostics in SUSE Linux

Computer Setup, or Basic Input/Output System (BIOS), controls communication between all the input and output devices on the system (such as disk drives, display, keyboard, mouse, and printer). Computer Setup includes settings for the types of peripherals installed, the startup sequence of the computer, and the amount of system and extended memory.

NOTE: Use extreme care when making changes in Computer Setup. Errors can prevent the computer from operating properly.

Starting Computer Setup

NOTE: An external keyboard or mouse connected to a USB port can be used with Computer Setup only if USB legacy support is enabled.

To start Computer Setup, follow these steps:

- 1. Turn on or restart the computer, and then press esc while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen.
- Press f10 to enter Computer Setup.

Using Computer Setup

Navigating and selecting in Computer Setup

To navigate and select in Computer Setup, follow these steps:

- Turn on or restart the computer, and then press esc while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen.
 - To select a menu or a menu item, use the tab key and the keyboard arrow keys and then press enter, or use a pointing device to click the item.
 - To scroll up and down, click the up arrow or the down arrow in the upper-right corner of the screen, or use the up arrow key or the down arrow key.
 - To close open dialog boxes and return to the main Computer Setup screen, press esc, and then follow the on-screen instructions.
- NOTE: You can use either a pointing device (TouchPad, pointing stick, or USB mouse) or the keyboard to navigate and make selections in Computer Setup.
- Press f10 to enter Computer Setup.

To exit Computer Setup menus, choose one of the following methods:

 To exit Computer Setup menus without saving your changes, click the Exit icon in the lower-left corner of the screen, and then follow the on-screen instructions.

- or -

Use the tab key and the arrow keys to select **File > Ignore Changes and Exit**, and then press enter.

- or -

 To save your changes and exit Computer Setup menus, click the Save icon in the lower-left corner of the screen, and then follow the on-screen instructions.

- or -

Use the tab key and the arrow keys to select File > Save Changes and Exit, and then press enter.

Your changes go into effect when the computer restarts.

Restoring factory settings in Computer Setup

NOTE: Restoring defaults will not change the hard drive mode.

To return all settings in Computer Setup to the values that were set at the factory, follow these steps:

- Turn on or restart the computer, and then press esc while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen.
- Press f10 to enter Computer Setup.
- 3. Use a pointing device or the arrow keys to select **File > Restore Defaults**.
- Follow the on-screen instructions.
- To save your changes and exit, click the Save icon in the lower-left corner of the screen, and then follow the on-screen instructions.

- or -

Use the arrow keys to select **File > Save Changes and Exit**, and then press enter.

Your changes go into effect when the computer restarts.

NOTE: Your password settings and security settings are not changed when you restore the factory settings.

Updating the BIOS

Updated versions of the BIOS may be available on the HP Web site.

Most BIOS updates on the HP Web site are packaged in compressed files called SoftPags.

Some download packages contain a file named Readme.txt, which contains information regarding installing and troubleshooting the file.

Determining the BIOS version

To determine whether available BIOS updates contain later BIOS versions than those currently installed on the computer, you need to know the version of the system BIOS currently installed.

BIOS version information (also known as ROM date and System BIOS) can be displayed as follows:

- Start Computer Setup.
- Use a pointing device or the arrow keys to select File > System Information.
- To exit Computer Setup without saving your changes, click the Exit icon in the lower-left corner of the screen, and then follow the on-screen instructions.

- or -

Use the tab key and the arrow keys to select File > Ignore Changes and Exit, and then press

NOTE: You can also determine the BIOS version by turning on or restarting the computer, pressing the esc key while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen, and then pressing the f1 key. Follow the on-screen instructions to exit this screen.

Downloading a BIOS update

A CAUTION: To reduce the risk of damage to the computer or an unsuccessful installation, download and install a BIOS update only when the computer is connected to reliable external power using the AC adapter. Do not download or install a BIOS update while the computer is running on battery power, docked in an optional docking device, or connected to an optional power source. During the download and installation, follow these instructions:

Do not disconnect power from the computer by unplugging the power cord from the AC outlet.

Do not shut down the computer or initiate Suspend or Hibernation.

Do not insert, remove, connect, or disconnect any device, cable, or cord.

- Open your web browser. For U.S. support, go to http://www.hp.com/go/contactHP. For worldwide support, go to http://welcome.hp.com/country/us/en/wwcontact_us.html.
- Follow the on-screen instructions to identify your computer and access the BIOS update you want to download.
- Click the option for software and driver downloads, type your computer model number in the product box, and then press enter. Follow the on-screen instructions to identify your computer and access the BIOS update you want to download.
- Click your specific product from the models listed.
- Click the appropriate operating system.
- 6. Go to the BIOS section and download the BIOS software package.
- Follow the installation instructions as provided with the downloaded BIOS software package. 7.

NOTE: After a message on the screen reports a successful installation, you can delete the downloaded file from your hard drive.

Using Advanced System Diagnostics

Advanced System Diagnostics allows you to run diagnostic tests to determine if the computer hardware is functioning properly. The following diagnostic tests are available in Advanced System Diagnostics:

- Start-up test—This test analyzes the main computer components that are required to start the computer.
- Run-in test—This test repeats the start-up test and checks for intermittent problems that the start-up test does not detect.
- Hard disk test—This test analyzes the physical condition of the hard drive, and then checks all data in every sector of the hard drive. If the test detects a damaged sector, it attempts to move the data to a good sector.
- Memory test—This test analyzes the physical condition of the memory modules. If it reports an error, replace the memory modules immediately.
- Battery test—This test analyzes the condition of the battery and calibrates the battery if necessary. If the battery fails the test, contact support to report the issue and purchase a replacement battery.
- System Tune-Up—This group of additional tests checks your computer to make sure that the main components are functioning correctly. System Tune-Up runs longer and more comprehensive tests on memory modules, hard drive SMART attributes, the hard drive surface, the battery (and battery calibration), video memory, and the WLAN module status.

You can view system information and error logs in the Advanced System Diagnostics window.

To start Advanced System Diagnostics:

- Turn on or restart the computer. While the "Press the ESC key for Startup Menu" message is displayed in the lower-left corner of the screen, press esc. When the Startup Menu is displayed, press f2.
- Click the diagnostic test you want to run, and then follow the on-screen instructions.

NOTE: If you need to stop a diagnostics test while it is running, press esc.

11 Backup and recovery in Windows 8

To protect your information, use Windows backup and restore utilities to back up individual files and folders, back up your entire hard drive, create system repair media (select models only) by using the installed optical drive (select models only) or an optional external optical drive, or create system restore points. In case of system failure, you can use the backup files to restore the contents of your computer.

From the Start screen, type restore, click **Settings**, and then select from the list of displayed options.

NOTE: For detailed instructions on various backup and restore options, perform a search for these topics in HP Support Assistant. To access HP Support Assistant on the Start screen, select the HP Support Assistant app.

In case of system instability, HP recommends that you print the recovery procedures and save them for later use.

NOTE: Windows includes the User Account Control feature to improve the security of your computer. You may be prompted for your permission or password for tasks such as installing software, running utilities, or changing Windows settings. Refer to HP Support Assistant. To access HP Support Assistant on the Start screen, select the HP Support Assistant app.

Backing up your information

Recovery after a system failure is as good as your most recent backup. You should create system repair media and your initial backup immediately after initial system setup. As you add new software and data files, you should continue to back up your system on a regular basis to maintain a reasonably current backup. The system repair media (select models only) are used to start up (boot) the computer and repair the operating system in case of system instability or failure. Your initial and subsequent backups allow you to restore your data and settings if a failure occurs.

On Start screen, type backup, click Settings, and then select Save backup copies of your files with File History.

You can back up your information to an optional external hard drive or a network drive.

Note the following when backing up:

- Store personal files in the Documents library, and back it up regularly.
- Back up templates that are stored in their associated programs.
- Save customized settings that appear in a window, toolbar, or menu bar by taking a screen shot of your settings. The screen shot can be a time-saver if you have to reset your preferences.

To create a backup using Backup and Restore:

NOTE: Be sure that the computer is connected to AC power before you start the backup process.

MOTE: The backup process may take over an hour, depending on file size and the speed of the computer.

- From the Start screen, type backup, click Settings, and then select from the list of displayed options.
- Follow the on-screen instructions to set up your backup, create a system image (select models only), or create system repair media (select models only).

Performing a system recovery

In case of system failure or instability, the computer provides the following tools to recover your files:

- Windows recovery tools: You can use Windows Backup and Restore to recover information you have previously backed up. You can also use Windows Automatic Repair to fix problems that might prevent Windows from starting correctly.
- f11 recovery tools: You can use the f11 recovery tools to recover your original hard drive image. The image includes the Windows operating system and software programs installed at the factory.

If you are unable to boot (start up) your computer and you cannot use the system repair media you previously created (select models only), you must purchase Windows 8 operating system media to reboot the computer and repair the operating system. For additional information, see

Using the Windows recovery tools

To recover information you previously backed up:

Access HP Support Assistant. To access HP Support Assistant on the Start screen, select the HP Support Assistant app.

To recover your information using Automatic Repair, follow these steps:

- A CAUTION: Some Automatic Repair options will completely erase and reformat the hard drive. All files you have created and any software installed on the computer are permanently removed. When reformatting is complete, the recovery process restores the operating system, as well as the drivers, software, and utilities from the backup used for recovery.
 - If possible, back up all personal files.
 - If possible, check for the presence of the HP Recovery partition and the Windows partition.

From the Start screen, type e, and then select File Explorer.

- or -

From the Start screen, type c, and then select **Computer**.

- NOTE: If the Windows partition and the HP Recovery partition are not listed, you must recover your operating system and programs using the Windows 8 operating system DVD and the Driver Recovery media (both purchased separately). For additional information, see Using Windows 8 operating system media (purchased separately) on page 104.
- If the Windows partition and the HP Recovery partition are listed, restart the computer. After Windows has loaded, press and hold the shift key while clicking Restart.
- Select Troubleshoot, then select Advanced Options, and then select Automatic Repair. 4.
- Follow the on-screen instructions.

NOTE: For additional information on recovering information using the Windows tools, perform a search for these topics in HP Support Assistant. To access HP Support Assistant on the Start screen, select the HP Support Assistant app.

Using f11 recovery tools

↑ CAUTION: Using f11 completely erases hard drive contents and reformats the hard drive. All files that you have created and any software that you have installed on the computer are permanently removed. The f11 recovery tool reinstalls the operating system and HP programs and drivers that were installed at the factory. Software not installed at the factory must be reinstalled.

To recover the original hard drive image using f11:

- If possible, back up all personal files.
- If possible, check for the presence of the HP Recovery partition: From the Start screen, type C, and then select Computer.
 - NOTE: If the HP Recovery partition is not listed, you must recover your operating system and programs using the Windows 8 operating system media and the Driver Recovery media (both purchased separately). For additional information, see Using Windows 8 operating system media (purchased separately) on page 104.
- If the HP Recovery partition is listed, restart the computer, and then press esc while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen.
- Press f11 while the "Press <F11> for recovery" message is displayed on the screen.
- Follow the on-screen instructions.

Using Windows 8 operating system media (purchased separately)

To order a Windows 8 operating system DVD, go to http://www.hp.com/support, select your country or region, and follow the on-screen instructions. You can also order the DVD by calling support. For contact information, see the Worldwide Telephone Numbers booklet included with the computer.

↑ CAUTION: Using a Windows 8 operating system media completely erases hard drive contents and reformats the hard drive. All files that you have created and any software that you have installed on the computer are permanently removed. When reformatting is complete, the recovery process helps you restore the operating system, as well as drivers, software, and utilities.

To initiate recovery using a Windows 8 operating system DVD:

- 1. If possible, back up all personal files.
- Restart the computer, and then insert the Windows 8 operating system DVD into the optical drive before the Windows operating system loads.
- When prompted, press any keyboard key.
- Follow the on-screen instructions.

After the repair is completed:

- Eject the Windows 8 operating system media and then insert the *Driver Recovery* media.
- 2. Install the Hardware Enabling Drivers first, and then install Recommended Applications.

Using Windows Refresh for quick and easy recovery

When your computer is not working properly and you need to regain system stability, the Windows Refresh option allows you to start fresh and keep what is important to you.

- IMPORTANT: Refresh removes any traditional applications that were not originally installed on the system at the factory.
- NOTE: During Refresh, a list of removed traditional applications will be saved so that you have a quick way to see what you might need to reinstall. See HP Support Assistant for instructions on reinstalling traditional applications. To access HP Support Assistant on the Start screen, select the HP Support Assistant app.
- NOTE: You may be prompted for your permission or password when using Refresh. See HP Support Assistant for more information. To access HP Support Assistant on the Start screen, select the HP Support Assistant app.

To start Refresh:

- On the Start screen, point to the far-right upper or lower corner of the screen to display the charms.
- Click Settings. 2.
- Click Change PC settings in the bottom-right corner of the screen, and then select General from the PC settings screen.
- Scroll the right-side choices down to display Refresh your PC without affecting your files. 4.
- 5. Under Refresh your PC without affecting your files, select Get started, and follow the on-screen instructions.

Remove everything and reinstall Windows

Sometimes you want to perform detailed reformatting of your computer, or you want to remove personal information before you give away or recycle your computer. The process described in this section provides a speedy, simple way to return the computer to its original state. This option removes all personal data, apps, and settings from your computer, and reinstalls Windows.

IMPORTANT: This option does not provide backups of your information. Before using this option, back up any personal information you wish to retain.

You can initiate this option by using the f11 key or from the Start screen.

To use the f11 key:

- Press f11 while the computer boots.
 - or -

Press and hold f11 as you press the power button.

- 2. Choose your language.
- 3. Choose your keyboard layout.
- 4. Select **Troubleshoot** from the boot options menu.
- Select Reset your PC, and follow the on-screen instructions.

To use the Start screen:

- 1. On the Start screen, point to the far-right upper or lower corner of the screen to display the charms.
- Click Settings.
- 3. Click **Change PC settings** in the bottom-right corner of the screen, and then select **General** from the PC settings screen.
- 4. Scroll the right-side choices down to display Remove everything and reinstall Windows.
- Under Remove everything and reinstall Windows, select Get started, and follow the on-screen instructions.

Using HP Software Setup

HP Software Setup can be used to reinstall drivers or select software that has been corrupted or deleted from the system.

- 1. From the Start screen, type HP Software Setup, and select Apps.
- 2. Open HP Software Setup.
- 3. Follow the on-screen directions to reinstall drivers or select software.

12 Backup and recovery in Windows 7

To protect your information, use Windows Backup and Restore to back up individual files and folders, back up your entire hard drive (select models only), create system repair discs (select models only) with the installed optical drive (select models only) or an optional external optical drive, or create system restore points. In case of system failure, you can use the backup files to restore the contents of your computer.

Windows Backup and Restore provides the following options:

- Creating a system repair disc (select models only) by using the installed optical drive (select models only) or an optional external optical drive
- Backing up your information
- Creating a system image (select models only)
- Scheduling automatic backups (select models only)
- Creating system restore points
- Recovering individual files
- Restoring the computer to a previous state
- Recovering information using recovery tools

NOTE: For detailed instructions, perform a search for these topics in Help and Support. In case of system instability, HP recommends that you print the recovery procedures and save them for later use.

Windows includes the User Account Control feature to improve the security of your computer. You may be prompted for your permission or password for tasks such as installing software, running utilities, or changing Windows settings. See Help and Support for more nformation.

Creating recovery media with HP Recovery Disc Creator

HP Recovery Disc Creator is a software program that offers an alternative way to create recovery media. After you successfully set up the computer, you can create recovery media using HP Recovery Disc Creator. This recovery media performs a system recovery if the hard drive becomes corrupted. A system recovery reinstalls the original operating system and the software programs installed at the factory, and then configures the settings for the programs.

HP Recovery Disc Creator can create two kinds of recovery DVDs as follows:

- Windows DVD—Installs the operating system without additional drivers or applications. Choosing this selection creates a DVD that restores the original operating system and the software programs installed at the factory.
- Driver DVD—Installs specific drivers and applications only, in the same way that the HP Software Setup utility installs drivers and applications.

Creating recovery media

NOTE: Operating system recovery media can be created only once. Thereafter, the option to create that media will not be available.

- 1. Select Start > All Programs > Security and Protection > HP Recovery Disc Creator.
- 2. Select Driver DVD or Windows DVD.
- 3. From the drop-down menu, select the drive for burning the recovery media.
- Click the **Burn** button to start the burning process.

Backing up your information

Recovery after a system failure is as good as your most recent backup. Immediately after software setup, you should create system repair discs (select models only) using HP Recovery Disc Creator using the installed optical drive (select models only) or an optional external optical drive and back up your system. As you add new software and data files, you should continue to back up your system on a regular basis to maintain a reasonably current backup. The system repair discs (select models only) are used to start up (boot) the computer and repair the operating system in case of system instability or failure. Your initial and subsequent backups allow you to restore your data and settings if a failure occurs.

You can back up your information to an optional external hard drive, a network drive, or discs. Note the following when backing up:

- Store personal files in the Documents library, and back it up regularly.
- Back up templates that are stored in their associated programs.
- Save customized settings that appear in a window, toolbar, or menu bar by taking a screen shot of your settings. The screen shot can be a time-saver if you have to reset your preferences.
- When backing up to discs, use any of the following types of discs (purchased separately): CD-R, CD-RW, DVD+R, DVD+R DL, DVD-R, DVD-R DL, or DVD±RW. The discs you use will depend on the type of optical drive you are using.
- NOTE: DVDs and DVDs with double-layer (DL) support store more information than CDs, so using them for backup reduces the number of recovery discs required.
- When backing up to discs, number each disc before inserting it into the external drive.

To create a backup using Backup and Restore:

Be sure that the computer is connected to AC power before you start the backup process.

The backup process may take over an hour, depending on file size and the speed of the computer.

- 1. Select Start > All Programs > Maintenance > Backup and Restore.
- 2. Follow the on-screen instructions to set up your backup, create a system image (select models only), or create a system repair disc (select models only).

Performing a system recovery

In case of system failure or instability, the computer provides the following tools to recover your files:

- Windows recovery tools: You can use Windows Backup and Restore to recover information you have previously backed up. You can also use Windows Startup Repair to fix problems that might prevent Windows from starting correctly.
- f11 recovery tools: You can use the f11 recovery tools to recover your original hard drive image. The image includes the Windows operating system and software programs installed at the factory.
- NOTE: If you are unable to boot (start up) your computer and you cannot use the system repair discs you previously created (select models only), you must purchase a Windows 7 operating system DVD to reboot the computer and repair the operating system. For additional information, see Using a Windows 7 operating system DVD (purchased separately) on page 41.

Using the Windows recovery tools

To recover information you previously backed up:

- Select Start > All Programs > Maintenance > Backup and Restore.
- Follow the on-screen instructions to recover your system settings, your computer (select models only), or your files.

To recover your information using Startup Repair, follow these steps:

- A CAUTION: Using Startup Repair completely erases hard drive contents and reformats the hard drive. All files you have created and any software installed on the computer are permanently removed. When reformatting is complete, the recovery process restores the operating system, as well as the drivers, software, and utilities from the backup used for recovery.
 - 1. If possible, back up all personal files.
 - 2. If possible, check for the presence of the Windows partition and the HP Recovery partition.
 - To check for the Windows partition, select **Start > Computer**.
 - To check for the HP Recovery partition, click **Start**, right-click **Computer**, click **Manage**, and then click Disk Management.
 - NOTE: If the HP Recovery partition has been deleted, the f11 restore option will not function. You must recover your operating system and programs using the Windows 7 operating system DVD and the Driver Recovery disc (both purchased separately) if the Windows partition and the HP Recovery partition are not listed. For additional information, see Using a Windows 7 operating system DVD (purchased separately) on page 41.
 - If the Windows partition and the HP Recovery partition are listed, restart the computer, and then press f8 before the Windows operating system loads.
 - Select Startup Repair.
 - Follow the on-screen instructions.
 - NOTE: For additional information on recovering information using the Windows tools, perform a search for these topics in Help and Support.

Using f11 recovery tools

To recover the original hard drive image using f11:

- 1. If possible, back up all personal files.
- If possible, check for the presence of the Windows partition and the HP Recovery partition.
 Click Start, right-click Computer, click Manage, and then click Disk Management.
- NOTE: If the HP Recovery partition is not listed, you must recover your operating system and programs using the Windows 7 operating system DVD and the Driver Recovery disc (both purchased separately). For additional information, see Using a Windows 7 operating system DVD (purchased separately) on page 41.
- 3. If the HP Recovery partition is listed, restart the computer, and then press esc while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen.
- 4. Press f11 while the "Press <F11> for recovery" message is displayed on the screen.
- Follow the on-screen instructions.

Using a Windows 7 operating system DVD (purchased separately)

To order a Windows 7 operating system DVD, go to the HP website. For U.S. support, go to http://www.hp.com/go/contactHP. For worldwide support, go to http://welcome.hp.com/country/us/en/wwcontact_us.html. You can also order the DVD by calling support. For contact information, see the Worldwide Telephone Numbers booklet included with the computer.

CAUTION: Using a Windows 7 operating system DVD completely erases hard drive contents and reformats the hard drive. All files you have created and any software installed on the computer are permanently removed. When reformatting is complete, the recovery process helps you restore the operating system, as well as drivers, software, and utilities.

To initiate recovery using a Windows 7 operating system DVD:

- If possible, back up all personal files.
- 2. Restart the computer, and then insert the Windows 7 operating system DVD into the optical drive before the Windows operating system loads.
- 3. When prompted, press any keyboard key.
- Follow the on-screen instructions.
- Click Next.
- Select Repair your computer.
- Follow the on-screen instructions.

After the repair is completed:

- Eject the Windows 7 operating system DVD, and then insert the *Driver Recovery disc*.
- Install the Hardware Enabling Drivers first, and then install Recommended Applications.

13 Backup and Recovery in SUSE Linux

Recovery after a system failure is as good as your most recent backup. As you add new software and data files, you should continue to back up your system on a regular basis to maintain a reasonably current backup.

Backing up your information

You should back up your computer files on a regular schedule to maintain a current backup. You can manually back up your information to an optional external drive, a network drive, or discs. Back up your system at the following times:

- At regularly scheduled times
- Before the computer is repaired or restored
- Before you add or modify hardware or software

To back up your home directory files using Backup Manager Settings:

- Select Computer > More Applications > Tools > Backup Manager Settings, and click Backup my home directory.
- Click Storage Destination Location, and then select a location to back up your information.
- Click Schedule, and then select a time schedule to perform backups at a regularly scheduled time.

To immediately back up your information, click the Backup Now check box.

- NOTE: Before you back up your information, be sure you have designated a location to save the backup files.
- Click Save and Backup to start the backup and to save the backup settings.

To restore backup files:

- Select Computer > More Applications > Tools > Backup Manager Restore.
- 2. Click **Backup Source**, and then select the location of the backup files.
- 3. Click **Restore Destination**, and then select the destination to restore the files.
- Select the Optical Disk option.
- 5. Under **Restore Point**, click the time and date of the backup.
- NOTE: If multiple backups have been performed, click **Use the latest version** to restore the latest version.
- **6.** Click **Restore** to start restoring the files, or click **Cancel** to cancel the operation.

Performing a system recovery

Recovery allows you to repair or restore the computer to its original factory state. You can create an HP Factory Image Restore DVD, using an installed or an external DVD±RW optical drive. You can

also restore the computer to its factory condition from the HP dedicated recovery partition on the hard drive.

(CAUTION: Using Recovery completely erases hard drive contents and reformats the hard drive. All files you have created and any software installed on the computer are permanently removed. The recovery tool reinstalls the original operating system and HP programs and drivers that were installed at the factory. Software, drivers, and updates not installed by HP must be manually reinstalled. Personal files must be restored from a backup.

To restore the computer using the HP Factory Image Restore DVD, you must first create the recovery disc. To create the recovery disc:

NOTE: HP recommends that you create the HP Factory Image Restore DVD in the event of a system failure.

- Select Computer > More Applications.
- In the left pane, click Tools, and then click Create HP Factory Image Restore DVD in the right pane.
- Follow the on-screen instructions to create an image file to burn a recovery disc.

To restore the computer from the recovery disc, follow these steps:

- If possible, back up all personal files.
- 2. Insert the HP Factory Image Restore DVD into the optical drive and restart the computer.
- 3. As the computer is restarting, press f9 to open the Computer Setup boot option menu.
- 4. Press the down arrow to select Restore SLED HP-BNB preload image from the Linux boot menu, and then press enter.
- 5. Using the arrow keys, select Yes when prompted: Do you want to start the System-Restore?
- Follow the on-screen instructions.

NOTE: You can also restore the computer from the partition by restarting the computer, and then pressing the f11 key.

If you are unable to boot (start up) your computer from the hard drive partition with the primary operating system or from the recovery partition, and you did not create a system recovery disc, you must purchase a SUSE Linux Enterprise Desktop Operating System DVD to reinstall the operating system. For additional information, see the Worldwide Telephone Numbers booklet.

14 Specifications

Computer specifications

	Metric	U.S.
Dimensions		
Length	28.0 cm	11.0 in
Width	41.4 cm	16.3 in
Height (front to rear)	2.5 to 3.2 cm	1.0 to 1.2 in
Weight		
Equipped with optical drive, 1 DIMM, hard drive, WLAN module, webcam, 6 cell battery	3.00 kg	6.61 lbs
Equipped with no optical drive, 1 DIMM, hard drive, WLAN module, webcam, 6 cell battery	2.87 kg	6.33 lbs
Input power		
Operating voltage	19.0 V dc @ 4.74 A – 90	W or 18.5 V dc @ 3.5 A - 65 W
Operating current	4.74 A or 3.5 A	
Temperature		
Operating (not writing to optical disc)	0°C to 35°C	32°F to 95°F
Operating (writing to optical disc)	5°C to 35°C	41°F to 95°F
Nonoperating	-20°C to 60°C	-4°F to 140°F
Relative humidity		
Operating	10% to 90%	
Nonoperating	5% to 95%	
Maximum altitude (unpressurized)		
Operating (14.7 to 10.1 psia)	-15 m to 3,048 m	50 ft to 10,000 ft
Nonoperating (14.7 to 4.4 psia)	-15 m to 12,192 m	-50 ft to 40,000 ft
Shock		
Operating	125 g, 2 ms, half-sine	
Nonoperating	200 g, 2 ms, half-sine	
Random vibration		
Operating	0.75 g zero-to-peak, 10 H rate	Iz to 500 Hz, 0.25 oct/min sweep

	Metric	U.S.
Nonoperating	1.50 g zero-to-pe	eak, 10 Hz to 500 Hz, 0.5 oct/min sweep rate
NOTE: Applicable product safety standards specify thermal this range of temperatures.	limits for plastic su	rfaces. The computer operates well within

43.9-cm (17.3-in), HD+ display specifications

	Metric	U.S.	
Active diagonal size	43.9-cm	17.3-in	
Resolution	1600x900 (HD+)		
Active area	382.08x214.92		
PPI	106		
Surface treatment	Anti-glare or BrightView		
Contrast ratio	300:1 (typical) – Anti-glare		
	500:1 – BrightView		
Response time	16 ms		
Brightness	200 nits (typical)		
Viewing angle	SVA		
Backlight	LED		
Luminance uniformity @ 13 points	1.4 (typ), 1.6 (max)		
Lifetime (1/2 luminance)	12,000 hours		
Color coordinate (white)	(0.313, 0.329)		
Color tolerance (White)	+/- 0.02		
Color tolerance (W, R, G, B)	+/- 0.03		
Color gamut	60% NTSC @ CIE 1931		

Hard drive specifications

	750-GB*	500-GB*	320-GB*
Dimensions			
Height	9.5 mm	9.5 mm	9.5 mm
Width	70 mm	70 mm	70 mm
Weight	115 g	101 g	101 g
Interface type	SATA	SATA	SATA
Transfer rate	100 MB/sec	100 MB/sec	100 MB/sec
Security	ATA security	ATA security	ATA security
Seek times (typical read, including setting)			
Single track	1.5 ms	3 ms	3 ms
Average	11 ms	13 ms	13 ms
Maximum	14 ms	24 ms	24 ms
Logical blocks	1,465,149,168	1,048,576,000	625,141,400
Disc rotational speed	7200 rpm or 5400 rpm		
Operating temperature		5°C to 55°C (41°F to 131°	F)

^{*1} GB = 1 billion bytes when referring to hard drive storage capacity. Actual accessible capacity is less. Actual drive specifications may differ slightly.

NOTE: Certain restrictions and exclusions apply. Contact technical support for details.

DVD±RW SuperMulti DL Drive specifications

Applicable disc	Read:	Write:
	CD-DA, CD+(E)G, CD-MIDI, CD-TEXT, CD-	CD-R and CD-RW
	ROM, CD-ROM XA, MIXED MODE CD, CD-I, CD-I Bridge (Photo-CD, Video CD), Multisession CD (Photo-CD, CD-EXTRA, Portfolio, CD-R, CD-RW), CD-R, CD-RW, DVD-ROM (DVD-5, DVD-9, DVD-10, DVD-18), DVD-R, DVD-RW, DVD-RW, DVD-RAM	DVD+R, DVD+RW, DVD-R, DVD- RW, DVD-RAM
Center hole diameter	1.5 cm (0.59 in)	
Disc diameter		
Standard disc	12 cm (4.72 in)	
Mini disc	8 cm (3.15 in)	
Disc thickness	1.2 mm (0.047 in)	
Track pitch	0.74 μm	
Access time	CD	DVD
Random	< 175 ms	< 230 ms
Full stroke	< 285 ms	< 335 ms
Audio output level	Line-out, 0.7 Vrms	
Cache buffer	2 MB	
Data transfer rate		
24X CD-ROM	3,600 KB/sec	
8X DVD-ROM	10,800 KB/sec	
24X CD-R	3,600 KB/sec	
16X CD-RW	2,400 KB/sec	
8X DVD+R	10,800 KB/sec	
4X DVD+RW	5,400 KB/sec	
8X DVD-R	10,800 KB/sec	
4X DVD-RW	5,400 KB/sec	
2.4X DVD+R(9)	2,700 KB/sec	
5X DVD-RAM	6,750 KB/sec	
Transfer mode	Multiword DMA Mode	
Startup time	< 15 seconds	
Stop time	< 6 seconds	

Blu-ray ROM DVD±RW SuperMulti DL Drive

Applicable disc	Read:	Write:	
	CD-DA, CD+(E)G, CD-MIDI, CDTEXT, CD-ROM, CD-ROM XA, MIXED MODE CD, CD-I, CD-I Bridge (Photo-CD, Video CD), Multisession CD (Photo-CD, CD-EXTRA, Portfolio, CD-R, CD-RW), CD-R, CD-RW, DVDROM (DVD-5, DVD-9, DVD-10, DVD-18), DVD-R, DVD-RW, DVD+R, DVD+RW, DVD+RM, HD-ROM (Single Layer), HD-ROM (Dual Layer), HD DVD-R, HD DVD-R for Dual Layer, HD DVD-RW		RW DVD+R, DVD+R(9), D-R, DVD-R(9),DVD-RW,
Access time	CD	DVD	HD
Random	170 ms	170 ms	230 ms

Data transfer rate				
CD-R (24X)	3600 KB/s (150 KB/s at 1X CD rate)			
CD-RW (10X)	1500 KB/s (150 KB/s at 1X CD rate)			
CD-ROM (24X)	3,600 KB/sec			
DVD (8X)	3600 KB/s (150 KB/s at 1X CD rate)			
Multiword DMA mode 2	16.6 MB/s			
Startup time	< 10 seconds			
Stop time	< 3 seconds			

Specification information in Device Manager

Device Manager allows you to view and control the hardware attached to the computer, as well as provides hardware specification information.

You can also add hardware or modify device configurations using Device Manager.

NOTE: Windows 7 and Windows Vista include the User Account Control feature to improve the security of your computer. You may be prompted for your permission or password for tasks such as installing software, running utilities, or changing Windows settings. Refer to Windows Help and Support for more information.

After you open Device Manager, drill-down to a device and double-click it to access its properties.

To access Device Manager in Windows 8:

- From the Start screen, type control, and then select Control Panel.
- Select **System and Security**, and then in the System area, click **Device Manager**.

A list display all the devices installed in your computer.

To access Device Manager in Windows 7:

- 1. Select Start > Computer > System properties.
- 2. In the left pane, click **Device Manager**.

15 Statement of Volatility

The purpose of this document is to provide general information regarding non-volatile memory in industry-standards based HP Business Notebook PC systems and provide general instructions for restoring nonvolatile memory that can contain personal data after the system has been powered off and the hard drive has been removed.

HP Business Notebook PC products that use Intel®-based or AMD®-based system boards contain volatile DDR memory. The amount of nonvolatile memory present in the system depends upon the system configuration. Intel-based and AMD-based system boards contain nonvolatile memory subcomponents as originally shipped from HP assuming that no subsequent modifications have been made to the system and assuming that no applications, features, or functionality have been added to or installed on the system.

Following system shutdown and removal of all power sources from an HP Business Notebook PC system, personal data can remain on volatile system memory (DIMMs) for a finite period of time and will also remain in nonvolatile memory. The steps below will remove personal data from the notebook PC, including the nonvolatile memory found in Intel-based and AMD-based system boards. Some of these steps are disclosed in the Maintenance & Service Guides available for HP PC products available on the product support pages at www.hp.com.

- Follow steps (a) through (I) below to restore the nonvolatile memory that can contain personal data. Restoring or reprogramming nonvolatile memory that does not store personal data is neither necessary nor recommended.
 - Enter BIOS (F10) Setup by powering on the system and pressing F10 when prompted near the bottom of the display, or press the ESC key to display the start up menu, then press F10 . If the system has a BIOS administrator password, enter the password at the prompt.
 - Select the File menu, then Restore Defaults. b.
 - Select the System Configuration menu, then Restore Security Defaults. C.
 - If an asset or ownership tag is set, select the Security menu and scroll down to the Utilities menu. Select System IDs, and then select the tag that has been set. Press the spacebar once to clear the tag, then press Enter to return to the prior menu.
 - If a DriveLock password is set, select the Security menu, select Hard Drive Tools, scroll down to **DriveLock**, then select **DriveLock password**. Select the desired hard drive. Click Disable protection, enter the existing master DriveLock password, then press Enter to confirm and return to the prior menu. Repeat this procedure if more than one hard drive has a DriveLock password.
 - If an Automatic DriveLock password is set, select the Security menu, select Hard Drive Tools, scroll down to Automatic DriveLock, then select the desired hard drive and disable protection. Repeat this procedure if more than one hard drive has an Automatic DriveLock password.
 - Select the File menu, then Reset BIOS Security to factory default. Click yes at the warning message.
 - h. Select the File menu, then Save Changes and Exit.

- i. Reboot the system. If the system has a Trusted Platform Module (TPM) and/or fingerprint sensor, one or two prompts will appear. One to clear the TPM and the other to Reset Fingerprint Sensor; press F1 to accept or F2 to reject.
 - If the HP notebook model includes Intel® Centrino with VPro™, reboot the PC and enter BIOS Setup by pressing F10 when prompted. Select **System Configuration**, then **AMT Options**. Then select **Unconfigure AMT** on next boot. Select **Save** then **Yes**. Select the **File** menu, and then select **Save Changes and Exit**. Reboot the system and confirm that you want to unconfigure AMT.
- j. If the optional Intel® Anti-Theft Technology (AT) was activated, contact the provider to deactivate it.
- **k.** If the optional Absolute® Software Computrace® management and tracking service was activated on the notebook PC, contact the provider to deactivate it.
- I. Remove all power and system batteries for at least 24 hours.
- 2. Remove and retain the storage drive or clear the contents of the drive.

a. Hard Disk Drive (HDD)

Clear the HDD contents by using the HP Disk Sanitizer® utility or a third party application that, ideally, is U.S. Department of Defense (DOD) 5220.22-M approved.

To run HP Disk Sanitizer, enter BIOS Setup by powering on the system and pressing F10 when prompted near the bottom of the display, or press ESC to display the start up menu, then press F10. Select the **Security** menu and scroll down to the **Utilities** menu. Select **Disk Sanitizer** and select the desired drive. For a higher level of protection, select **Optimum**.

NOTE: This process will take a long time, and the amount of time varies based on the hard drive capacity.

b. Solid State Drive (SSD)

Clear the SSD contents by using the BIOS Setup Secure Erase command option, or by using a third party utility designed to erase data from an SSD. To run Secure Erase, enter BIOS Setup by powering on the system and pressing F10 when prompted near the bottom of the display. Select the **Security** menu and scroll down to the **Utilities** menu. Select **Secure Erase** and select the desired hard drive.

HP Sure Start

Select Intel-based 2013 HP Business Notebook PCs offer HP Sure Start, which provides hardwarebased assurance of the following:

- HP-approved firmware is running on the HP Embedded Controller (EC) EC Options in BIOS found under "BIOS Integrity Checking"
- An HP-approved BIOS is running on the host processor

HP Sure Start verifies the integrity of critical, non-executable platform data residing in the main flash and provides selfhealing mechanisms to restore any code or critical platform data that has been lost or is corrupted within the flash.

In conjunction with BIOS support, code running on the EC verifies the integrity of the following:

- Subset of BIOS contents including the boot block portion and machine-unique data
- Entire descriptor region
- **Entire Network Controller Configuration**

The EC is responsible for power control/power cycle, thermal monitor/fan control, many LEDs, and PS2 keyboard and mouse.

Non-volatile memory usage

Non Volatile Memory Type	Amount (Size)	Does this memory store customer data?	Does this memory retain data when power is removed?	What is the purpose of this memory?	How is data input into this memory?	How is this memory write protected?
Real Time Clock (RTC) battery backed-up CMOS configuration memory (CMOS)	256 Bytes	No	Yes	Stores system date and time and limited keyboard controller data.	Using the F10 Setup utility or changing the Microsoft® Windows® date & time.	This memory is not write-protected. HP recommends password protecting the F10 Setup utility.
Controller (NIC) EEPROM	64 Kbytes (not customer accessible)	No	Yes	Store NIC configuration and NIC firmware.	Using a utility from the NIC vendor that can be run from DOS.	A utility is required to write data to this memory and is available from NIC vendor. Writing data to this ROM in an inappropriate manner will render the NIC nonfunctional.
Keyboard ROM	64 Kbytes (not customer accessible)	No	Yes	Stores firmware code (keyboard, mouse, & battery management)	Programmed at the factory. Code is updated when the system BIOS is updated.	A utility is required for writing data to this memory and is available on the HP website. Writing data to this ROM in an inappropriate manner can render the PC nonfunctional.
DIMM Serial Presence Detect (SPD) configuration data	256 Bytes per memory module, 128 Bytes programma bl e (not customer accessible)	No	Yes	Stores memory module information.	Programmed by the memory vendor.	Data cannot be written to this memory when the module is installed in a PC. The specific write protection method varies by memory vendor.
System BIOS	4 to 5 MBytes	Yes	Yes	Store system BIOS code and PC configuration data.	System BIOS code is programmed at the factory. Code is updated when the system BIOS is updated. Configuration data and settings are input using the F10 setup utility or a custom utility.	A utility is required for writing data to this memory and is available on the HP website. Writing data to this ROM in an inappropriate manner can render the PC nonfunctional.
Intel Management Engine Firmware	1.5 or 5MByte	Yes	Yes	Stores Management Engine Code, Settings,	Management Engine Code is programmed at the factory. Code is updated via Intel secure	The Intel chipset is configured to enforce HW protection to block all direct read/

(present only in models ending in a 'p' or 'w' or with Intel Centrino Pro technology)				Provisioning Data and iAMT third party data store.	firmware update utility. Unique Provisioning Data can be entered at the factory or by an administrator using the Management Engine (MEBx) setup utility. The third party data store contents can populated by a remote management console or local applications registered by an administrator to have access to the space.	write access to this area. An Intel utility is required for updating the firmware. Only firmware updates digitally signed by Intel can be applied using this utility.
Bluetooth flash	2Mbit	No	Yes	Stores Bluetooth configuration and firmware.	Programmed at the factory. Tools for writing data to this memory are not publicly available but can be obtained from the silicon vendor.	A utility is required for writing data to this memory and is made available through newer versions of the driver if the flash requires an upgrade.
802.11 WLAN EEPROM	4kb to 8kb	No	Yes	Stores configuration and calibration data.	Programmed at the factory. Tools for writing data to this memory are not made public.	A utility is required for writing data to this memory and is typically not made available to the public unless a firmware upgrade is necessary to address a unique issue.
Web camera	64K bit	No	Yes	Store Web Cam configuration and firmware.	Using a utility from the device manufacturer that can be run from Windows.	A utility is required for writing data to this memory and is typically not made available to the public unless a firmware upgrade is necessary to address a unique issue.
Fingerprint reader	512kByte Flash	Yes	Yes	Stores fingerprint templates.	By enrolling in HP ProtectTools Security Manager.	Only a digitally signed application can make the call to write to the flash.

Questions and answers

- How can the BIOS settings be restored (returned to factory settings)?
 - Turn on or restart the computer and press F10 when prompted near the bottom of the display.
 - b. Select File, then select Restore defaults.
 - Follow the on-screen instructions. C.
 - d. Select File, save changes and exit, then press Enter.
- What kind of configuration data is stored on the DIMM Serial Presence Detect (SPD) memory module? How would this data be written?

The DIMM SPD memory contains information about the memory module such as size, serial number, data width, speed/timing, voltage and thermal information. This information is written by the module manufacturer and stored on an EEPROM. This EEPROM cannot be written to when the memory module is installed in a PC. Third party tools do exist that can write to the EEPROM when the memory module is not installed in a PC. There are various third party tools available to read SPD memory.

Does the "Firmware Hub for System BIOS" contain the BIOS program? Is this chip writable, and if so how?

The Firmware Hub does contain the BIOS program and is writable. A utility is required to perform the write function.

In some PC systems, the Firmware Hub for System BIOS is a flash memory chip so that updates can be written by the customer. Is this true for these BIOS chips?

Yes, they are flash memory chips.

What is meant by "Restore the nonvolatile memory found in Intel-based system boards"?

This relates to clearing the Real Time Clock (RTC) CMOS memory that contains PC configuration data.

Does resetting the CMOS configuration memory return the PC back to factory defaults?

The process of resetting the CMOS will return certain system settings to factory default but will not reset many of the system data and configuration defaults to their factory settings. To return these system data and configuration defaults to factory settings, refer to question and answer 1 and follow the instructions for returning the BIOS settings to factory defaults.

16 Power cord set requirements

The wide-range input feature of the computer permits it to operate from any line voltage from 100 to 120 volts ac. or from 220 to 240 volts ac.

The 3-conductor power cord set included with the computer meets the requirements for use in the country or region where the equipment is purchased.

Power cord sets for use in other countries and regions must meet the requirements of the country or region where the computer is used.

Requirements for all countries and regions

The following requirements are applicable to all countries and regions:

- The length of the power cord set must be at least 1.5 m (5.0 ft) and no more than 2.0 m (6.5 ft).
- All power cord sets must be approved by an acceptable accredited agency responsible for evaluation in the country or region where the power cord set will be used.
- The power cord sets must have a minimum current capacity of 10 A and a nominal voltage rating of 125 or 250 V ac, as required by the power system of each country or region.
- The appliance coupler must meet the mechanical configuration of an EN 60 320/IEC 320 Standard Sheet C13 connector for mating with the appliance inlet on the back of the computer.

Requirements for specific countries and regions

Country/region	Accredited agency	Applicable note number
Argentina	IRAM	1
Australia	SAA	1
Austria	OVE	1
Belgium	CEBEC	1
Brazil	ABNT	1
Canada	CSA	2
Chile	IMQ	1
Denmark	DEMKO	1
Finland	FIMKO	1
France	UTE	1
Germany	VDE	1
India	ISI	1
Israel	SII	1
Italy	IMQ	1

Country/region	Accredited agency	Applicable note number
Japan	JIS	3
The Netherlands	KEMA	1
New Zealand	SANZ	1
Norway	NEMKO	1
The People's Republic of China	CCC	4
Saudi Arabia	SASO	7
Singapore	PSB	1
South Africa	SABS	1
South Korea	KTL	5
Sweden	SEMKO	1
Switzerland	SEV	1
Taiwan	BSMI	6
Thailand	TISI	1
The United Kingdom	ASTA	1
The United States	UL	2

- The flexible cord must be Type HO5VV-F, 3-conductor, 0.75mm2 conductor size. Power cord set fittings (appliance coupler and wall plug) must bear the certification mark of the agency responsible for evaluation in the country or region where it will be used.
- 2. The flexible cord must be Type SVT/SJT or equivalent, No. 18 AWG, 3-conductor. The wall plug must be a two-pole grounding type with a NEMA 5-15P (15 A, 125 V ac) or NEMA 6-15P (15 A, 250 V ac) configuration. CSA or C-UL mark. UL file number must be on each element.
- The appliance coupler, flexible cord, and wall plug must bear a "T" mark and registration number in accordance with the Japanese Dentori Law. The flexible cord must be Type VCTF, 3-conductor, 0.75mm2 or 1.25mm2 conductor size. The wall plug must be a two-pole grounding type with a Japanese Industrial Standard C8303 (7 A, 125 V ac) configuration.
- The flexible cord must be Type RVV, 3-conductor, 0.75mm2 conductor size. Power cord set fittings (appliance coupler and wall plug) must bear the CCC certification mark.
- The flexible cord must be Type H05VV-F 3X0.75mm2 conductor size. KTL logo and individual approval number must be on each element. Corset approval number and logo must be printed on a flag label.
- The flexible cord must be Type HVCTF 3X1.25mm2 conductor size. Power cord set fittings (appliance coupler, cable, and wall plug) must bear the BSMI certification mark.
- For 127 V ac, the flexible cord must be Type SVT or SJT 3 x 18 AWG, with plug NEMA 5-15P (15 A, 125 V ac), with UL and CSA or C-UL marks. For 240 V ac, the flexible cord must be Type H05VV-F 3X0.75/1.00mm2 conductor size, with plug BS 1363/A with BSI or ASTA marks.

17 Recycling

Battery

When a non-rechargeable or rechargeable battery has reached the end of its useful life, do not dispose of the battery in general household waste. Follow the local laws and regulations in your area for battery disposal.

HP encourages customers to recycle used electronic hardware, HP original print cartridges, and rechargeable batteries. For more information about recycling programs, see the HP Web site at http:// www.hp.com/recycle.

Display

- MARNING! The backlight contains mercury. Exercise caution when removing and handling the backlight to avoid damaging this component and causing exposure to the mercury.
- A CAUTION: The procedures in this chapter can result in damage to display components. The only components intended for recycling purposes are the LCD panel and the backlight. When you remove these components, handle them carefully.
- NOTE: Materials Disposal. This HP product contains mercury in the backlight in the display assembly that might require special handling at end-of-life. Disposal of mercury may be regulated because of environmental considerations. For disposal or recycling information, contact your local authorities, or see the Electronic Industries Alliance (EIA) Web site at http://www.eiae.org.

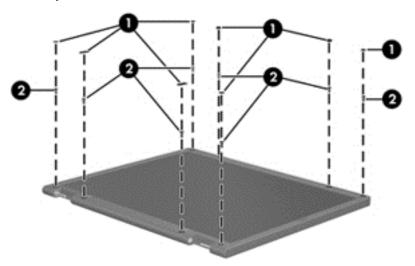

This section provides disassembly instructions for the display assembly. The display assembly must be disassembled to gain access to the backlight (1) and the liquid crystal display (LCD) panel (2).

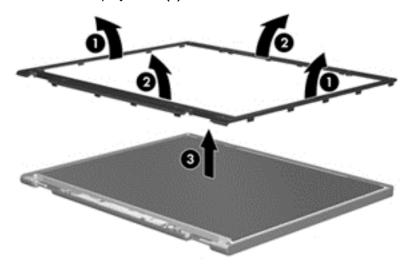

NOTE: The procedures provided in this chapter are general disassembly instructions. Specific details, such as screw sizes, quantities, and locations, and component shapes and sizes, can vary from one computer model to another.

Perform the following steps to disassemble the display assembly:

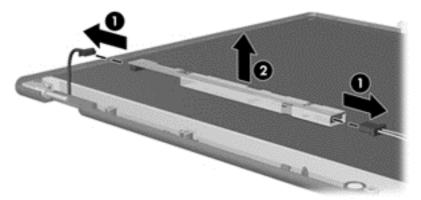

1. Remove all screw covers (1) and screws (2) that secure the display bezel to the display assembly.

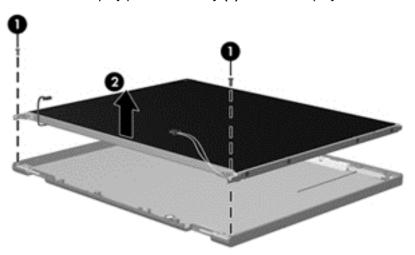

- 2. Lift up and out on the left and right inside edges (1) and the top and bottom inside edges (2) of the display bezel until the bezel disengages from the display assembly.
- 3. Remove the display bezel (3).

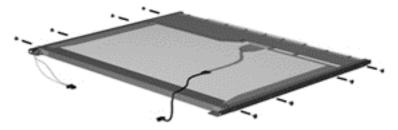

Disconnect all display panel cables (1) from the display inverter and remove the inverter (2).

- Remove all screws (1) that secure the display panel assembly to the display enclosure.
- 6. Remove the display panel assembly (2) from the display enclosure.

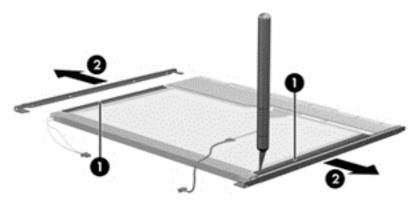

- 7. Position the display panel assembly upside-down.
- Remove all screws that secure the display panel frame to the display panel.

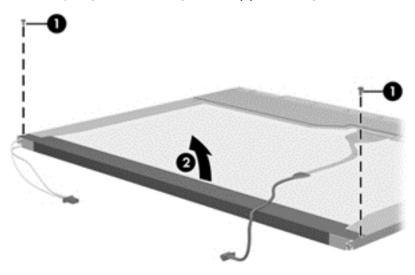

Use a sharp-edged tool to cut the tape (1) that secures the sides of the display panel to the display panel frame.

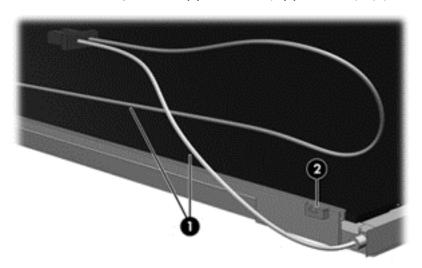

10. Remove the display panel frame (2) from the display panel.

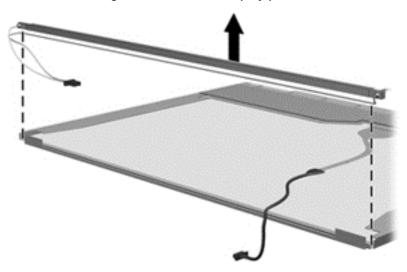

- 11. Remove the screws (1) that secure the backlight cover to the display panel.
- 12. Lift the top edge of the backlight cover (2) and swing it outward.

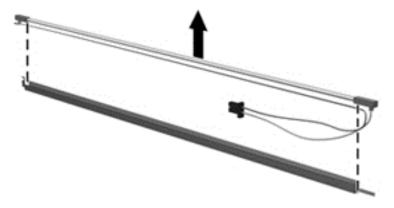

- 13. Remove the backlight cover.
- 14. Position the display panel right-side up.
- 15. Remove the backlight cables (1) from the clip (2) in the display panel.

- 16. Position the display panel upside-down.
- WARNING! The backlight contains mercury. Exercise caution when removing and handling the backlight to avoid damaging this component and causing exposure to the mercury.
- 17. Remove the backlight frame from the display panel.

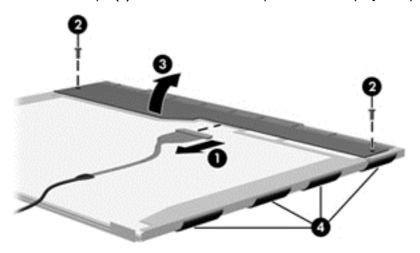

18. Remove the backlight from the backlight frame.

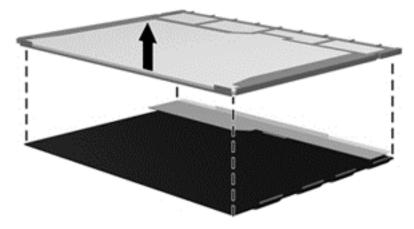

- 19. Disconnect the display panel cable (1) from the LCD panel.
- 20. Remove the screws (2) that secure the LCD panel to the display rear panel.
- 21. Release the LCD panel (3) from the display rear panel.

22. Release the tape (4) that secures the LCD panel to the display rear panel.

23. Remove the LCD panel.

24. Recycle the LCD panel and backlight.
