

Date Written: 10/20/2014

This document lists the supported devices for DSS 5 and the minimum FW level for each device model number

The table below lists the supported devices by DSS at the time this whitepaper was created.

Some device models are not supported for all firmware versions available for that model. The table indicates the oldest version of FW supported by DSS for each device model. MFPs that specify “No Minimum” in the list below support all firmware versions available for that device. Devices which have firmware older than the required minimum are prevented from being added to DSS 5.

A specific version of DSS will support most new FutureSmart devices as they ship without upgrading DSS. However, DSS will support only the features available in the device firmware that existed at the time DSS shipped. If new devices have new features in their firmware or if new firmware becomes available for existing devices that includes new features, it may be necessary to upgrade the DSS version to take advantage of the new feature.

Supported Products – DSS 5.0x.xx – November 1st, 2014		
Model #	Minimum Firmware Revision	Minimum Firmware Date
Pre-FutureSmart MFPs		
LJ 4345MFP	09.220.7	12/8/2010
LJ 4730MFP	46.300.3	11/24/2010
HP LJ 9040MFP	08.210.5	11/27/2010
HP LJ 9050MFP	08.210.5	11/27/2010
HP LJ 9500MFP	08.210.6	11/29/2010
