

# Car Camcorder f500g

You're ready for that "life happens" moment with the HP Car Camcorder f500g mounted in your vehicle. This premium full HD 1080p camcorder with an ultra-wide angle lens and large aperture allows you to record your trip in amazing detail even in low light. The built-in GPS does real time tracking of speed and heading using the 4-quadrant display. When you are ready to playback your video on the PC, the SuperCar application (included) enhances your experience with Google Map position tracking as well as speed, heading, and G-force sensor information.

## GPS Capability

The built-in GPS capability records and save locations; tracks your speed, compass headings, and speed camera locations as you mark them.

## Built-in, 3-Axis G-Force and motion sensor

No one expects a driving accident, but when it happens, the built-in G-force sensor detects the event and triggers the Emergency Video Recording mode. Emergency recordings are date and time-stamped and protected from loop recording overwrites.

## Loop Recording

The f500g records video clips of 3 or 5 minute lengths (customer selectable) to the installed microSDHC memory card. The standard loop recording technology prevents storage overload by erasing the oldest previously recorded file and replacing it with the new one.

## Small Size with a Big View

The small size of the f500g makes it perfect to install without obstructing your view. The small size f500g is equipped with a 140 degree ultra- wide angle lens to capture the critical elements with little edge to edge distortion. If you like to drive the city at night, you'll be amazed at how the f500g captures the vivid colors of the night lights with crystal clear resolution.

## Easy to Install and Use

Use the enclosed bracket for installation to many windshields in seconds. The car power adapter has a generous 3.5 meter (11.4 feet) cord that accommodates easy routing in almost any vehicle. Once installed, the f500g automatically begins recording when the vehicle starts and powers down when the vehicle is turned off. The camcorder also offers many easy to use options such as motion detection.

## Package Contents

- f500g camcorder
- Car power adapter
- Camera mounting bracket
- CDROM with Software /UM
- Quick start guide
- Warranty document.
