

FB10000 Error Messages Troubleshooting

Error ID: 67028 - Safety – Press the Reset button to continue

This general safety error is triggered by multiple causes following which the Safety system stops the machine (ie. a major communication problem).

Error Message:

Possible Causes

- [General Safety error](#)

Recommended actions

Press the Reset button

1. Check the Reset (blue) button on the operator console.
2. If the Reset button is lit in constant blue, press it for 2 seconds. This will usually refresh the com area and make the error message disappear.
3. If the Reset button blinks blue, open the machine log and look for other error messages that may point to a specific safety error.
4. Contact Callme@hp for assistance and report about the error messages that appeared in the log.
