- If the ping does not work, try restarting the printer and recheck all of the connection steps.

### Wireless network connection (wireless models)

- Verify that the network cable is not connected. The printer cannot connect to a wireless network when a network cable is connected.
- Verify that the printer and wireless router are turned on and have power. Also make sure the wireless switch is turned on.
- Verify that the printer is within the range of the wireless network. For most networks, the printer must be within 30 m (100 ft) of the wireless access point (wireless router).
- Verify that the print driver is installed on the computer.
- Verify that the computer and printer connect to the same wireless network.
- For Mac, verify that the wireless router supports Bonjour.
- Restart the wireless router.

### Fax troubleshooting (fn, fp, and fw models only)

#### Verify the physical connection

- Verify that the phone cord is connected to the fax port on the back of the printer and to the wall jack.
- For an extension phone or other additional device, verify the phone cord is connected to the telephone port on the back of the printer and to the device.
- If outgoing phone calls fail because no dial tone is detected or the line is busy, connect to a different phone line.
- For Fax over IP service, reduce the **Fax Speed**, and turn off **Error Correction Mode** from the **Fax Settings** menu on the printer control panel.

#### Verify the printer fax settings

- To use a voice-mail service from the phone company or service provider, make sure that the printer **Rings to Answer** setting is set to be fewer rings than the telephone answering machine.
- If multiple phone numbers are assigned to the same physical phone line and the line is shared by multiple devices, make sure that the printer is set to the correct distinctive ring setting. Use a setting in which the printer answers faxes and ignores other ring types.
- Configuring the Fax Speed setting to **Medium (V.17)** or **Slow (V.29)** can also improve your ability to send a fax.
