|   |               | 2                 | Delete 🗹     | Prin        | t Delete            | Refresh |
|   |               |                   |              |             | 4                   |         |

#### **Direct Print Failover**

1. When connection is lost to the server the Systray icon will show with an error – Click the Systray popup message or Right Click the lock icon -> Manage my print jobs

- 2. Select any previous printers that you have submitted a job to.
  - a. You can only choose a printer if you have printed to it in the past from the workstation or if you have release a pull print jobs at the printer in the past.
  - b. Hostname / IP Address / Location (if set by administrator) will represent the device
- 3. Select print job to submit
- 4. Click print
  - a. Note that this is a direct print job and no authentication will be required at the device.
