Maintenance and Service Guide

HP ENVY 17m Laptop PC

IMPORTANT! This document is intended for HP authorized service providers only.
Product notice

This guide describes features that are common to most models. Some features may not be available on your computer.

Not all features are available in all editions or versions of Windows. Systems may require upgraded and/or separately purchased hardware, drivers, software or BIOS update to take full advantage of Windows functionality. Windows 10 is automatically updated, which is always enabled. ISP fees may apply and additional requirements may apply over time for updates. Go to http://www.microsoft.com for details.

To access the latest user guides, go to http://www.hp.com/support, and follow the instructions to find your product. Then select User Guides.

Software terms

By installing, copying, downloading, or otherwise using any software product preinstalled on this computer, you agree to be bound by the terms of the HP End User License Agreement (EULA). If you do not accept these license terms, your sole remedy is to return the entire unused product (hardware and software) within 14 days for a full refund subject to the refund policy of your seller.

For any further information or to request a full refund of the price of the computer, please contact your seller.
Safety warning notice

⚠️ WARNING! To reduce the possibility of heat-related injuries or of overheating the device, do not place the device directly on your lap or obstruct the device air vents. Use the device only on a hard, flat surface. Do not allow another hard surface, such as an adjoining optional printer, or a soft surface, such as pillows or rugs or clothing, to block airflow. Also, do not allow the AC adapter to contact the skin or a soft surface, such as pillows or rugs or clothing, during operation. The device and the AC adapter comply with the user-accessible surface temperature limits defined by the International Standard for Safety of Information Technology Equipment (IEC 60950-1).

2 Getting to know your computer

Your computer features top-rated components. This chapter provides details about your components, where they are located, and how they work.

Right side

<table>
<thead>
<tr>
<th>Component</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) Camera privacy switch</td>
<td>Turns the camera off and on.</td>
</tr>
<tr>
<td>(2) Optical drive</td>
<td>Depending on your computer model, reads an optical disc or reads and writes to an optical disc.</td>
</tr>
<tr>
<td>(3) Optical drive eject button</td>
<td>Releases the optical drive disc tray.</td>
</tr>
<tr>
<td>(4) USB SuperSpeed port with HP Sleep and Charge</td>
<td>Connects a USB device, provides high-speed data transfer, and even when the computer is off, charges most products such as a cell phone, camera, activity tracker, or smartwatch.</td>
</tr>
</tbody>
</table>
| (5) AC adapter and battery light | - White: The AC adapter is connected and the battery is fully charged.  
- Blinking white: The AC adapter is disconnected and the battery has reached a low battery level.  
- Amber: The AC adapter is connected and the battery is charging.  
- Off: The battery is not charging. |
| (6) Power connector | Connects an AC adapter. |
## Left side

![Left side components](image)

### Table 2-2 Left-side components and their descriptions

<table>
<thead>
<tr>
<th>Component</th>
<th>Description</th>
</tr>
</thead>
</table>
| (1) RJ-45 (network) jack/status lights | Connects a network cable.  
  - White: The network is connected.  
  - Amber: Activity is occurring on the network. |
| (2) USB SuperSpeed ports (2) | Connect a USB device, such as a cell phone, camera, activity tracker, or smartwatch, and provide high-speed data transfer. |
| (3) HDMI port | Connects an optional video or audio device, such as a high-definition television, any compatible digital or audio component, or a high-speed High-Definition Multimedia Interface (HDMI) device. |
| (4) USB Type-C port with HP Sleep and Charge | Connects a USB device that has a Type-C connector, provides data transfer, and even when the computer is off, charges most products such as a cell phone, camera, activity tracker, or smartwatch.  
  – and –  
  Connects a display device that has a USB Type-C connector, providing DisplayPort output.  
  **NOTE:** Cables and/or adapters (purchased separately) may be required. |
| (5) Audio-out (headphone)/Audio-in (microphone) combo jack | Connects optional powered stereo speakers, headphones, earbuds, a headset, or a television audio cable. Also connects an optional headset microphone. This jack does not support optional standalone microphones.  
  **WARNING!** To reduce the risk of personal injury, adjust the volume before putting on headphones, earbuds, or a headset. For additional safety information, see the *Regulatory, Safety, and Environmental Notices*.  
  To access this guide:  
  ▲ Select the **Start** button, select **HP Help and Support**, and then select **HP Documentation**.  
  **NOTE:** When a device is connected to the jack, the computer speakers are disabled. |
### Table 2-2 Left-side components and their descriptions (continued)

<table>
<thead>
<tr>
<th>Component</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>6. Drive light</td>
<td>• Blinking white: The hard drive is being accessed.</td>
</tr>
</tbody>
</table>
| 7. Memory card reader | Reads optional memory cards that enable you to store, manage, share, or access information. To insert a card:  
1. Hold the card label-side up, with connectors facing the computer.  
2. Insert the card into the memory card reader, and then press in on the card until it is firmly seated.  
To remove a card:  
▲ Press in on the card, and then remove it from the memory card reader. |
Table 2-3 Display components and their descriptions

<table>
<thead>
<tr>
<th>Component</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) Internal microphones</td>
<td>Record sound.</td>
</tr>
<tr>
<td>(2) Camera</td>
<td>Allows you to video chat, record video, and record still images. Some cameras also allow a facial recognition logon to Windows, instead of a password logon.</td>
</tr>
<tr>
<td></td>
<td><strong>NOTE:</strong> Camera functions vary depending on the camera hardware and software installed on your product.</td>
</tr>
<tr>
<td>(3) Camera light</td>
<td>On: The camera is in use.</td>
</tr>
<tr>
<td>(4) WLAN antennas*</td>
<td>Send and receive wireless signals to communicate with wireless local area networks (WLANs).</td>
</tr>
</tbody>
</table>

*The antennas are not visible from the outside of the computer. For optimal transmission, keep the areas immediately around the antennas free from obstructions.

For wireless regulatory notices, see the section of the Regulatory, Safety, and Environmental Notices that applies to your country or region.

To access this guide:

▲ Select the Start button, select HP Help and Support, and then select HP Documentation.
Table 2-4  TouchPad components and their descriptions

<td>Textured area that allows you to perform additional gestures.</td>
</tr>
<tr>
<td>(3) Right control zone</td>
<td>Textured area that allows you to perform additional gestures.</td>
</tr>
</tbody>
</table>
## Lights

![Image of computer lights]

### Table 2-5 Lights and their descriptions

<table>
<thead>
<tr>
<th>Component</th>
<th>Description</th>
</tr>
</thead>
</table>
| (1) Power light | - On: The computer is on.  
                 | - Blinking: The computer is in the Sleep state, a power-saving state. The computer shuts off power to the display and other unneeded components.  
                 | - Off: The computer is off or in Hibernation. Hibernation is a power-saving state that uses the least amount of power.                        |
| (2) Caps lock light | On: Caps lock is on, which switches the key input to all capital letters.                                                               |
| (3) Mute light  | - On: Computer sound is off.  
                 | - Off: Computer sound is on.                                                                                                             |
**Button, speakers, and fingerprint reader**

![Diagram of button, speakers, and fingerprint reader]

### Table 2-6 Button, speakers, and fingerprint reader and their descriptions

<table>
<thead>
<tr>
<th>Component</th>
<th>Description</th>
</tr>
</thead>
</table>
| (1) Power button        | - When the computer is off, press the button to turn on the computer.  
                          | - When the computer is on, press the button briefly to initiate Sleep.  
                          | - When the computer is in the Sleep state, press the button briefly to exit Sleep (select products only).  
                          | - When the computer is in Hibernation, press the button briefly to exit Hibernation.  
                          | **CAUTION:** Pressing and holding down the power button results in the loss of unsaved information.  
                          | If the computer has stopped responding and shutdown procedures are ineffective, press and hold the power button down for at least 5 seconds to turn off the computer.  
                          | To learn more about your power settings, see your power options:  
                          | ▲ Right-click the Power icon [ infancy ], and then select Power Options.  
| (2) Speakers            | Produce sound.                                                                                                                                 |
| (3) Fingerprint reader  | Allows a fingerprint logon to Windows, instead of a password logon.  
                          | ▲ To use the fingerprint reader, place your finger on the fingerprint reader until it reads your fingerprint.  
                          | **IMPORTANT:** To prevent fingerprint logon issues, make sure when you register your fingerprint that all sides of your finger are registered by the fingerprint reader.  |
## Special keys

![Special keys image]

### Table 2-7 Special keys and their descriptions

<table>
<thead>
<tr>
<th>Component</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) esc key</td>
<td>Displays system information when pressed in combination with the fn key.</td>
</tr>
<tr>
<td>(2) fn key</td>
<td>Executes specific functions when pressed in combination with another key.</td>
</tr>
<tr>
<td>(3) Windows key</td>
<td>Opens the Start menu.</td>
</tr>
<tr>
<td></td>
<td><strong>NOTE:</strong> Pressing the Windows key again will close the Start menu.</td>
</tr>
<tr>
<td>(4) Action keys</td>
<td>Execute frequently used system functions.</td>
</tr>
<tr>
<td></td>
<td><strong>NOTE:</strong> On select products, the f5 action key turns the keyboard backlight feature off or on.</td>
</tr>
<tr>
<td>(5) num lock key</td>
<td>Alternates between the navigational and numeric functions on the integrated numeric keypad.</td>
</tr>
<tr>
<td>(6) Integrated numeric keypad</td>
<td>A separate keypad to the right of the alphabet keyboard. When num lock is pressed, the keypad can be used like an external numeric keypad.</td>
</tr>
<tr>
<td></td>
<td><strong>NOTE:</strong> If the keypad function is active when the computer is turned off, that function is reinstated when the computer is turned back on.</td>
</tr>
</tbody>
</table>
### Table 2-8 Bottom components and their descriptions

<table>
<thead>
<tr>
<th>Component</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vent</td>
<td>Enables airflow to cool internal components. <strong>NOTE:</strong> The computer fan starts up automatically to cool internal components and prevent overheating. It is normal for the internal fan to cycle on and off during routine operation.</td>
</tr>
</tbody>
</table>
Labels

The labels affixed to the computer provide information you may need when you troubleshoot system problems or travel internationally with the computer. Labels may be in paper form or imprinted on the product.

**IMPORTANT:** Check the following locations for the labels described in this section: the bottom of the computer, inside the battery bay, under the service door, on the back of the display, or on the bottom of a tablet kickstand.

- Service label—Provides important information to identify your computer. When contacting support, you may be asked for the serial number, the product number, or the model number. Locate this information before you contact support.

4 Removal and replacement procedures
preliminary requirements

Tools required

You will need the following tools to complete the removal and replacement procedures:

- Non-marking, non-conductive pry tool
- Magnetic Phillips P1 screwdriver
- Suction cup
- Device to heat the display to loosen adhesive

Service considerations

The following sections include some of the considerations that you must keep in mind during disassembly and assembly procedures.

**NOTE:** As you remove each subassembly from the computer, place the subassembly (and all accompanying screws) away from the work area to prevent damage.

Plastic parts

**IMPORTANT:** Using excessive force during disassembly and reassembly can damage plastic parts.

Cables and connectors

**IMPORTANT:** When servicing the computer, be sure that cables are placed in their proper locations during the reassembly process. Improper cable placement can damage the computer.

Cables must be handled with extreme care to avoid damage. Apply only the tension required to unseat or seat the cables during removal and insertion. Handle cables by the connector whenever possible. In all cases, avoid bending, twisting, or tearing cables. Be sure that cables are routed in such a way that they cannot be caught or snagged by parts being removed or replaced. Handle flex cables with extreme care; these cables tear easily.
Drive handling

**IMPORTANT:** Drives are fragile components that must be handled with care. To prevent damage to the computer, damage to a drive, or loss of information, observe these precautions:

Before removing or inserting a hard drive, shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.

Before handling a drive, be sure that you are discharged of static electricity. While handling a drive, avoid touching the connector.

Before removing an optical drive, be sure that a disc is not in the drive and be sure that the optical drive tray is closed.

Handle drives on surfaces covered with at least one inch of shock-proof foam.

Avoid dropping drives from any height onto any surface.

After removing a hard drive or an optical drive, place it in a static-proof bag.

Avoid exposing an internal hard drive to products that have magnetic fields, such as monitors or speakers.

Avoid exposing a drive to temperature extremes or liquids.

If a drive must be mailed, place the drive in a bubble pack mailer or other suitable form of protective packaging and label the package “FRAGILE.”

Workstation guidelines

Follow these grounding workstation guidelines:

- Cover the workstation with approved static-shielding material.
- Use a wrist strap connected to a properly grounded work surface and use properly grounded tools and equipment.
- Use conductive field service tools, such as cutters, screw drivers, and vacuums.
- When fixtures must directly contact dissipative surfaces, use fixtures made only of static-safe materials.
- Keep the work area free of nonconductive materials, such as ordinary plastic assembly aids and Styrofoam.
- Handle ESD-sensitive components, parts, and assemblies by the case or PCM laminate. Handle these items only at static-free workstations.
- Avoid contact with pins, leads, or circuitry.
- Turn off power and input signals before inserting or removing connectors or test equipment.

Electrostatic discharge information

A sudden discharge of static electricity from your finger or other conductor can destroy static-sensitive devices or microcircuitry. Often the spark is neither felt nor heard, but damage occurs. An electronic device exposed to electrostatic discharge (ESD) may not appear to be affected at all and can work perfectly throughout a normal cycle. The device may function normally for a while, but it has been degraded in the internal layers, reducing its life expectancy.

Networks built into many integrated circuits provide some protection, but in many cases, the discharge contains enough power to alter device parameters or melt silicon junctions.
IMPORTANT: To prevent damage to the device when you are removing or installing internal components, observe these precautions:

- Keep components in their electrostatic-safe containers until you are ready to install them.
- Before touching an electronic component, discharge static electricity by using the guidelines described in this section.
- Avoid touching pins, leads, and circuitry. Handle electronic components as little as possible.
- If you remove a component, place it in an electrostatic-safe container.

Generating static electricity

Note the following:
- Different activities generate different amounts of static electricity.
- Static electricity increases as humidity decreases.

<table>
<thead>
<tr>
<th>Event</th>
<th>Relative humidity</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>55%</td>
</tr>
<tr>
<td>Walking across carpet</td>
<td>7,500 V</td>
</tr>
<tr>
<td>Walking across vinyl floor</td>
<td>3,000 V</td>
</tr>
<tr>
<td>Motions of bench worker</td>
<td>400 V</td>
</tr>
<tr>
<td>Removing DIPs from plastic tube</td>
<td>400 V</td>
</tr>
<tr>
<td>Removing DIPs from vinyl tray</td>
<td>2,000 V</td>
</tr>
<tr>
<td>Removing DIPs from Styrofoam</td>
<td>3,500 V</td>
</tr>
<tr>
<td>Removing bubble pack from PCB</td>
<td>7,000 V</td>
</tr>
<tr>
<td>Packing PCBs in foam-lined box</td>
<td>5,000 V</td>
</tr>
</tbody>
</table>

Electronic components are then multi-packaged inside plastic tubes, trays, or Styrofoam.

NOTE: As little as 700 volts can degrade a product.

Preventing electrostatic damage to equipment

Many electronic components are sensitive to ESD. Circuitry design and structure determine the degree of sensitivity. The following packaging and grounding precautions are necessary to prevent static electricity damage to electronic components.

- To avoid hand contact, transport products in static-safe containers such as tubes, bags, or boxes.
- Protect all electrostatic parts and assemblies with conductive or approved containers or packaging.
- Keep electrostatic-sensitive parts in their containers until they arrive at static-free stations.
- Place items on a grounded surface before removing them from their container.
- Always be properly grounded when touching a sensitive component or assembly.
Avoid contact with pins, leads, or circuitry.

■ Place reusable electrostatic-sensitive parts from assemblies in protective packaging or conductive foam.

**Personal grounding methods and equipment**

Use the following equipment to prevent static electricity damage to electronic components:

■ **Wrist straps** are flexible straps with a maximum of one-megohm ± 10% resistance in the ground cords. To provide proper ground, a strap must be worn snug against bare skin. The ground cord must be connected and fit snugly into the banana plug connector on the grounding mat or workstation.

■ **Heel straps/Toe straps/Boot straps** can be used at standing workstations and are compatible with most types of shoes or boots. On conductive floors or dissipative floor mats, use them on both feet with a maximum of one-megohm ± 10% resistance between the operator and ground.

<table>
<thead>
<tr>
<th>Table 4-2 Static shielding protection levels</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Method</strong></td>
</tr>
<tr>
<td>Antistatic plastic</td>
</tr>
<tr>
<td>Carbon-loaded plastic</td>
</tr>
<tr>
<td>Metallized laminate</td>
</tr>
</tbody>
</table>

**Grounding the work area**

To prevent static damage at the work area, use the following precautions:

■ Cover the work surface with approved static-dissipative material. Provide a wrist strap connected to the work surface and properly grounded tools and equipment.

■ Use static-dissipative mats, foot straps, or air ionizers to give added protection.

■ Handle electrostatic sensitive components, parts, and assemblies by the case or PCB laminate. Handle them only at static-free work areas.

■ Turn off power and input signals before inserting and removing connectors or test equipment.

■ Use fixtures made of static-safe materials when fixtures must directly contact dissipative surfaces.

■ Keep work area free of nonconductive materials such as ordinary plastic assembly aids and Styrofoam.

■ Use field service tools, such as cutters, screwdrivers, and vacuums, that are conductive.

**Recommended materials and equipment**

Materials and equipment that are recommended for use in preventing static electricity include:

■ Antistatic tape

■ Antistatic smocks, aprons, or sleeve protectors

■ Conductive bins and other assembly or soldering aids

■ Conductive foam

■ Conductive tabletop workstations with ground cord of one-megohm +/- 10% resistance

■ Static-dissipative table or floor mats with hard tie to ground
Field service kits
Static awareness labels
Wrist straps and footwear straps providing one-megohm +/- 10% resistance
Material handling packages
Conductive plastic bags
Conductive plastic tubes
Conductive tote boxes
Opaque shielding bags
Transparent metallized shielding bags
Transparent shielding tubes

Packaging and transporting guidelines

Follow these grounding guidelines when packaging and transporting equipment:

- To avoid hand contact, transport products in static-safe tubes, bags, or boxes.
- Protect ESD-sensitive parts and assemblies with conductive or approved containers or packaging.
- Keep ESD-sensitive parts in their containers until the parts arrive at static-free workstations.
- Place items on a grounded surface before removing items from their containers.
- Always be properly grounded when touching a component or assembly.
- Store reusable ESD-sensitive parts from assemblies in protective packaging or nonconductive foam.
- Use transporters and conveyors made of antistatic belts and roller bushings. Be sure that mechanized equipment used for moving materials is wired to ground and that proper materials are selected to avoid static charging. When grounding is not possible, use an ionizer to dissipate electric charges.
5  Removal and replacement procedures for authorized service provider parts

**IMPORTANT:** Components described in this chapter should only be accessed by an authorized service provider. Accessing these parts can damage the computer or void the warranty.

**NOTE:** HP continually improves and changes product parts. For complete and current information on supported parts for your computer, go to [http://partsurfer.hp.com](http://partsurfer.hp.com), select your country or region, and then follow the on-screen instructions.

Component replacement procedures

There are as many as 52 screws that must be removed, replaced, and/or loosened when servicing the computer. Make special note of each screw size and location during removal and replacement.

Preparation for disassembly

See [Removal and replacement procedures preliminary requirements on page 21](#) for initial safety procedures.

1. Turn off the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect the power from the computer by unplugging the power cord from the computer.
3. Disconnect all external devices from the computer.
Bottom cover and rubber feet

<table>
<thead>
<tr>
<th>Description</th>

</tr>
</thead>
<tbody>
<tr>
<td>Bottom cover</td>
<td>L52805-001</td>
</tr>
<tr>
<td>Rubber Foot Kit</td>
<td>L52666-001</td>
</tr>
</tbody>
</table>

▲ Prepare the computer for disassembly (Preparation for disassembly on page 26).

Remove the bottom cover and rubber feet:

1. Insert a very thin paper clip or similar tool into the release hole in the optical drive bezel to release the drive tray.

   **IMPORTANT:** You must release the drive tray to gain access to the screw in the drive bay that secures the bottom cover. You cannot remove the optical drive in this step. You must remove the bottom cover before you can remove the optical drive from the computer.

2. Peel the two upper rubber feet off the bottom of the computer (1).
3. Remove the four Phillips M2.5 × 4.0 screws from under each foot (2).
4. Remove the Phillips broadhead M2.0 × 2.0 screw from the optical drive bay.
5. Remove the two Torx T8 2.5 × 14.0 screws from each side of the computer (4).
6. Remove the Torx T5 2.5 × 4.0 screw from the bottom edge of the computer (5).

7. Use a plastic tool (1) to separate the front of the bottom cover from the computer.

8. On the hinge side, lift up near both hinges to remove the bottom cover from the computer (2).
9. To avoid damaging the optical drive tray, push the tray back into the computer.

Reverse this procedure to install the bottom cover and rubber feet.
Battery

Table 5-2 Battery description and part number

<table>
<thead>
<tr>
<th>Description</th>
<th>Spare part number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Battery (3-cell, 52 Whr)</td>
<td>L09281-855</td>
</tr>
</tbody>
</table>

Before removing the battery, follow these steps:

1. Prepare the computer for disassembly (Preparation for disassembly on page 26).
2. Remove the bottom cover (see Bottom cover and rubber feet on page 27).

Remove the battery:

1. Remove the six Phillips M2.0 × 4.0 screws (1) that secure the battery to the computer.
2. Remove the battery from the computer (2).

Reverse this procedure to install the battery.
Optical drive and bezel

Table 5-3 Optical drive and optical drive bezel descriptions and part numbers

</thead>
<tbody>
<tr>
<td>Optical drive</td>
<td>L55616-001</td>
</tr>
<tr>
<td>Optical drive bezel</td>
<td>L52801-001</td>
</tr>
</tbody>
</table>

1. Prepare the computer for disassembly (Preparation for disassembly on page 26).
2. Remove the bottom cover (see Bottom cover and rubber feet on page 27).
3. Remove the battery (see Battery on page 30).

Remove the optical drive:
1. Remove the Phillips M2.0 × 3.0 screw (1) that secures the optical drive to the computer.
2. Pull the optical drive away from the connector and remove it from the computer (2).
3. If it is necessary to remove the bezel from the optical drive, press the release latch (1), rotate the left side of the bezel outward (2), and then remove the bezel from the drive (3).

Reverse this procedure to install the optical drive and bezel.
## WLAN module

<table>
<thead>
<tr>
<th>Description</th>
<th>Spare part number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Intel Wireless-AC 9560 802.11ac 2 x 2 Wi-Fi + Bluetooth 5</td>
<td>L22634-005</td>
</tr>
</tbody>
</table>

⚠️ **CAUTION:** To prevent an unresponsive system, replace the wireless module only with a wireless module authorized for use in the computer by the governmental agency that regulates wireless devices in your country or region. If you replace the module and then receive a warning message, remove the module to restore device functionality, and then contact technical support.

Before removing the WLAN module, follow these steps:

1. Prepare the computer for disassembly *(Preparation for disassembly on page 26).*
2. Remove the bottom cover (see *Bottom cover and rubber feet on page 27*).
3. Remove the battery (see *Battery on page 30*).

Remove the WLAN module:

1. Disconnect the WLAN antenna cables (1) from the terminals on the WLAN module.

   **NOTE:** Models have either one or two WLAN antennas. On models with two antennas, the #1/white WLAN antenna cable connects to the WLAN module #1/Main terminal. The #2/black WLAN antenna cable connects to the WLAN module #1/Aux terminal.

2. Remove the Phillips M2.0 × 2.5 screw (2) that secures the WLAN module to the bottom cover. (The WLAN module tilts up.)
3. Remove the WLAN module (3) by pulling the module away from the slot at an angle.

**NOTE:** If the WLAN antenna is not connected to the terminal on the WLAN module, a protective sleeve must be installed on the antenna connector, as shown in the following illustration.

Reverse this procedure to install the WLAN module.
Hard drive, drive rubber holder, and cable

<table>
<thead>
<tr>
<th>Description</th>
<th>Spare part number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hard drive, 1 TB, 7200 rpm (includes foil cover)</td>
<td>L23942-007</td>

<tr>
<td>Hard drive rubber holder</td>
<td>L52662-001</td>
</tr>
<tr>
<td>Hard drive connector/cable</td>
<td>L52656-001</td>
</tr>
</tbody>
</table>

Before removing the hard drive, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 26](#)).
2. Remove the bottom cover (see [Bottom cover and rubber feet on page 27](#)).
3. Remove the battery (see [Battery on page 30](#)).

Remove the hard drive:

1. Disconnect the hard drive cable from the system board ZIF connector (1).
2. Lift the hard drive assembly out of the computer (2).
3. If it is necessary to remove the rubber hard drive cover, pull the sides of the cover outward (1), and then remove the cover from the hard drive (2).

4. If it is necessary to remove the connector from the hard drive, lift the tape from the connector (1), disconnect the connector from the rear of the drive (2), and then pull the cable through the hole in the foil (3).

5. If it is necessary to install foil onto the hard drive:
   a. Insert the connector onto the rear of the drive (1).
   b. Insert the connector cable through the slot in the foil (2).
   c. Place the tape on top of the connector (3).
   d. Making sure the slots in the foil match up with screw holes in hard drive (4), install the foil onto the hard drive (5)
Reverse this procedure to reassemble and install the hard drive.

<tr>
<td>16 GB, PCIe (Optane Memory Module)</td>
<td>L52458-001</td>
</tr>
<tr>
<td>Solid-state drive module foil cover</td>
<td>L52664-001</td>
</tr>
</tbody>
</table>

Before removing the solid-state drive, follow these steps:

1. Prepare the computer for disassembly (Preparation for disassembly on page 26).
2. Remove the bottom cover (see Bottom cover and rubber feet on page 27).
3. Remove the battery (see Battery on page 30).

Remove the solid-state drive:

1. Lift the foil up on the connector side of the drive (1).
2. Remove the Phillips M2.0 × 2.5 screw (2), and then pull the solid-state drive module from the socket (3).

Reverse this procedure to install the solid-state drive.
Memory module

</tr>
</thead>
<tbody>
<tr>
<td>Memory module, 8 GB</td>
<td>937236-855</td>
</tr>
<tr>
<td>Memory module, 4 GB</td>
<td>L10598-855</td>
</tr>
</tbody>
</table>

Before removing the memory modules, follow these steps:

1. Prepare the computer for disassembly (Preparation for disassembly on page 26).
2. Remove the bottom cover (see Bottom cover and rubber feet on page 27).
3. Remove the battery (see Battery on page 30).

Remove the memory modules:

1. Squeeze the ends of the memory cover (1), and then lift the cover off the system board (2).

2. Spread the two retention clips outward (1) until the memory module tilts up at a 45-degree angle.
3. Grasp the edge of the memory module (2), and then gently pull the module out of the slot. Use the same procedure to remove both memory modules.

⚠️ CAUTION: To prevent damage to the memory module, hold the memory module by the edges only. Do not touch the components on the memory module.

To protect a memory module after removal, place it in an electrostatic-safe container.

Install the memory modules:

⚠️ IMPORTANT: To prevent damage to the memory module, hold the memory module by the edges only. Do not touch the components on the memory module. Do not bend the memory module.

1. Align the notched edge of the memory module with the tab in the memory module slot (1).
2. Press the module into the slot until seated (2).
3. Gently press down on the module edges until the side retention clips snap into place (3).

To replace the memory cover, insert the edges to the cover into the clips on the system board.
USB board

**NOTE:** The USB board spare part kit does not include the cable. The cable is available using spare part number L52658-001.

<table>
<thead>
<tr>
<th>Description</th>
<th>Spare part number</th>

</tbody>
</table>

Before removing the USB board, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 26](#)).
2. Remove the bottom cover (see [Bottom cover and rubber feet on page 27](#)).
3. Remove the battery (see [Battery on page 30](#)).

Remove the USB board:

1. Disconnect the cable from the ZIF connector on the board (1).
2. Remove the Phillips M2.0 × 4.0 screw (2) that secures the board to the computer.
3. Remove the board from the computer (3).

Reverse this procedure to install the USB board.
NOTE: The TouchPad spare part kit does not include the TouchPad cable. The TouchPad cable is available using spare part number L52655-001.

### Table 5-9 TouchPad description and part number

Before removing the TouchPad, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 26](#)).
2. Remove the bottom cover (see [Bottom cover and rubber feet on page 27](#)).
3. Remove the battery (see [Battery on page 30](#)).

Remove the TouchPad:

1. Disconnect the cable from the ZIF connector on the TouchPad (1).
2. Remove the four Phillips M2.0 × 2.5 screws (2) that secure the TouchPad bracket to the computer.
3. Remove the TouchPad bracket from the computer (3).
4. Remove the three broadhead Phillips M2.0 × 2.5 screws (4) that secure the TouchPad to the computer.
5. Remove the TouchPad from the computer (5).

Reverse this procedure to install the TouchPad.
**Privacy board**

**NOTE:**  The privacy board spare part kit does not include the cable. The privacy board cable is available using spare part number L53278-001.

<table>
<thead>
<tr>

Before removing the privacy board, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 26](#)).
2. Remove the bottom cover (see [Bottom cover and rubber feet on page 27](#)).
3. Remove the battery (see [Battery on page 30](#)).

Remove the privacy board:

1. Disconnect the cable from the ZIF connector on the board (1).
2. Remove the Phillips M2.0 × 3.5 screw (2) that secures the board to the computer.
3. Lift the board out of the computer (3).

Reverse this procedure to install the privacy board.
Fingerprint reader board

**NOTE:** The fingerprint reader board spare part kit does not include the cable. The board cable is available using spare part number L52657-001.

<table>
<thead>
<tr>

Before removing the fingerprint reader board, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 26](#)).
2. Remove the bottom cover (see [Bottom cover and rubber feet on page 27](#)).
3. Remove the battery (see [Battery on page 30](#)).
4. Remove the hard drive (see [Hard drive, drive rubber holder, and cable on page 35](#)).

Remove the fingerprint reader board:

1. Remove the Phillips M2.0 × 2.0 screw (1) that secures the fingerprint reader board bracket to the computer.
2. Slide the bracket toward the side of the computer, and then remove it (2).
3. Disconnect the cable from the ZIF connector on the fingerprint reader board (3).
4. Remove the fingerprint reader board from the computer (4).

Reverse this procedure to install the fingerprint reader board.
Before removing the fan, follow these steps:

1. Prepare the computer for disassembly (Preparation for disassembly on page 26).
2. Remove the bottom cover (see Bottom cover and rubber feet on page 27).
3. Remove the battery (see Battery on page 30).
4. Remove the heat sink (see Heat sink on page 47).

Remove the fan:

1. Disconnect the fan cable from the system board (1).
2. Remove the two Phillips M2.5 × 3.5 screws (2) that secure the fan to the computer.
3. Remove the fan from the computer (3).

Reverse this procedure to install the fan.
## Heat sink

**Table 5-13  Heat sink and thermal pad descriptions and part numbers**

Before removing the heat sink, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 26](#)).
2. Remove the bottom cover (see [Bottom cover and rubber feet on page 27](#)).
3. Remove the battery (see [Battery on page 30](#)).

Remove the heat sink:

1. Remove the six Phillips M2.0 × 4.0 screws (1) that secure the heat sink to the system board.
2. Remove the heat sink (2).
3. Clean and reapply thermal material to the surfaces of the system board components (1) (3) and the heat sink (2) (4) each time the heat sink is removed.

Reverse this procedure to install the heat sink.
**System board**

**Table 5-14 System board descriptions and part numbers**

<table>
<thead>
<tr>
<th>Description</th>

</tr>
<tr>
<td>System board including integrated Intel Core i5-8265U processor and 2 GB of discrete graphics memory</td>
<td>L52449-601</td>
</tr>
</tbody>
</table>

Before removing the system board, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 26](#)).
2. Remove the bottom cover (see [Bottom cover and rubber feet on page 27](#)).
3. Remove the battery (see [Battery on page 30](#)).
4. Remove the optical drive (see [Optical drive and bezel on page 31](#)).
5. Remove the solid-state drive (see [Solid-state drive and Optane Memory Module on page 38](#)).

Remove the system board:

1. Disconnect the following cables from the system board:
   - (1) Fan cable
   - (2) USB board cable (ZIF)
   - (3) Speaker cable
   - (4) Display cable (ZIF)
   - (5) WLAN module antennas
   - (6) Webcam cable (ZIF)
   - (7) Hard drive cable (ZIF)
   - (8) Backlight cable (ZIF)
   - (9) Keyboard cable (ZIF)
   - (10) Privacy cable (ZIF)
   - (11) TouchPad cable (ZIF)
   - (12) Fingerprint board cable (ZIF)
2. Remove the seven Phillips M2.0 × 3.5 screws that secure the system board to the computer.
3. Lift the left side of the system board (1), disconnect the power connector cable from the bottom of the board (2), and then pull the system board to the left to remove it from the computer (3).

Reverse this procedure to install the system board.

Use the following illustration to determine the correct locations for the protective tape on the system board.
Before removing the card reader board, follow these steps:

1. Prepare the computer for disassembly (Preparation for disassembly on page 26).
2. Remove the bottom cover (see Bottom cover and rubber feet on page 27).
3. Remove the battery (see Battery on page 30).
4. Remove the optical drive (see Optical drive and bezel on page 31).
5. Remove the solid-state drive (see Solid-state drive and Optane Memory Module on page 38).
6. Remove the system board (see Optical drive and bezel on page 31).

Remove the card reader board:

1. Remove the Phillips M2.0 × 3.5 screw (1) that secures the board to the computer.
2. Remove the card reader board from the computer (2).

Reverse this procedure to install the card reader board.
Speakers

Table 5-16 Speaker description and part number

<table>
<thead>
<tr>
<th>Description</th>
<th>Spare part number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Speakers (includes left and right speakers and cables)</td>
<td>L52667-001</td>

</tbody>
</table>

Before removing the speakers, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 26](#)).
2. Remove the bottom cover (see [Bottom cover and rubber feet on page 27](#)).
3. Remove the battery (see [Battery on page 30](#)).
4. Remove the optical drive (see [Optical drive and bezel on page 31](#)).
5. Remove the solid-state drive (see [Solid-state drive and Optane Memory Module on page 38](#)).
6. Remove the fan (see [Fan on page 46](#)).
7. Remove the system board (see [Optical drive and bezel on page 31](#)).

Remove the speakers:

1. Remove the display cable from the clips in the left speaker (1).
2. Remove the cable between the speakers from the clips in the computer (2).
3. Remove the speakers from the computer (3).

Reverse this procedure to install the speakers.
Display assembly

Table 5-17  Display assembly descriptions and part numbers

<table>

</tbody>
</table>

Before removing the display assembly, follow these steps:

1. Prepare the computer for disassembly (Preparation for disassembly on page 26).
2. Remove the bottom cover (see Bottom cover and rubber feet on page 27).
3. Remove the battery (see Battery on page 30).

Remove the display assembly:

1. Remove the WLAN antennas and webcam cable from the clips and channel in the right speaker and computer (1).
2. Remove the display cable from the routing channel in the left speaker (2).

3. Remove the three Phillips M2.5 × 6.0 screws (1) from each hinge.
4. Open the display to open the hinges (2).
5. Separate the display from the computer by pulling the display up and away from the chassis (3).

Reverse this procedure to install the display assembly.
Power connector

Table 5-18 Power connector description and part number

<table>
<thead>
<tr>
<th>Description</th>
<th>Spare part number</th>
</tr>

Before removing the power connector cable, follow these steps:

1. Prepare the computer for disassembly (Preparation for disassembly on page 26).
2. Remove the bottom cover (see Bottom cover and rubber feet on page 27).
3. Remove the battery (see Battery on page 30).
4. Remove the USB board (see USB board on page 42).
5. Remove the display (see Display assembly on page 54).

Remove the power connector cable:

1. Remove the cable from the clips in the computer (1).
2. Remove the power connector and cable from the computer (2).

Reverse this procedure to install the power connector cable.
Keyboard/top cover

The top cover with keyboard remains after removing all other spared parts from the computer.

In this section, the first table provides the main spare part number for the top cover/keyboards. The second table provides the country codes.

6 Using Setup Utility (BIOS)

Setup Utility, or Basic Input/Output System (BIOS), controls communication between all the input and output devices on the system (such as disk drives, display, keyboard, mouse, and printer). Setup Utility (BIOS) includes settings for the types of devices installed, the startup sequence of the computer, and the amount of system and extended memory.

**NOTE:** To start Setup Utility on convertible computers, your computer must be in notebook mode and you must use the keyboard attached to your notebook.

### Starting Setup Utility (BIOS)

**CAUTION:** Use extreme care when making changes in Setup Utility (BIOS). Errors can prevent the computer from operating properly.

- Turn on or restart the computer and quickly press f10.
- or –
- Turn on or restart the computer, quickly press esc, and then press f10 when the Start menu is displayed.

### Updating Setup Utility (BIOS)

Updated versions of Setup Utility (BIOS) may be available on the HP website.

Most BIOS updates on the HP website are packaged in compressed files called SoftPaqs.

Some download packages contain a file named Readme.txt, which contains information regarding installing and troubleshooting the file.

### Determining the BIOS version

To decide whether you need to update Setup Utility (BIOS), first determine the BIOS version on your computer.

To reveal the BIOS version information (also known as ROM date and System BIOS), use one of these options.

- **HP Support Assistant**
  1. Type support in the taskbar search box, and then select the HP Support Assistant app.
  - or –
  2. Select My notebook, and then select Specifications.

- **Setup Utility (BIOS)**
  2. Select Main, and then make note of the BIOS version.
  3. Select Exit, select one of the options, and then follow the on-screen instructions.

- In Windows, press CTRL+Alt+S.
To check for later BIOS versions, see Downloading a BIOS update on page 59.

**Downloading a BIOS update**

⚠️ **CAUTION:** To reduce the risk of damage to the computer or an unsuccessful installation, download and install a BIOS update only when the computer is connected to reliable external power using the AC adapter. Do not download or install a BIOS update while the computer is running on battery power, docked in an optional docking device, or connected to an optional power source. During the download and installation, follow these instructions:

- Do not disconnect power from the computer by unplugging the power cord from the AC outlet.
- Do not shut down the computer or initiate Sleep.
- Do not insert, remove, connect, or disconnect any device, cable, or cord.

⚠️ **NOTE:** If your computer is connected to a network, consult the network administrator before installing any software updates, especially system BIOS updates.

1. Type `support` in the taskbar search box, and then select the **HP Support Assistant** app.
   - or –
   Select the question mark icon in the taskbar.

2. Select **Updates**, and then select **Check for updates and messages**.

3. Follow the on-screen instructions.

4. At the download area, follow these steps:
   a. Identify the most recent BIOS update and compare it to the BIOS version currently installed on your computer. If the update is more recent than your BIOS version, make a note of the date, name, or other identifier. You may need this information to locate the update later, after it has been downloaded to your hard drive.
   b. Follow the on-screen instructions to download your selection to the hard drive.

   Make a note of the path to the location on your hard drive where the BIOS update is downloaded. You will need to access this path when you are ready to install the update.

   BIOS installation procedures vary. Follow any instructions that appear on the screen after the download is complete. If no instructions appear, follow these steps:

   1. Type `file` in the taskbar search box, and then select **File Explorer**.
   2. Select your hard drive designation. The hard drive designation is typically Local Disk (C:).
   3. Using the hard drive path you recorded earlier, open the folder that contains the update.
   4. Double-click the file that has an `.exe` extension (for example, `filename.exe`).

      The BIOS installation begins.

   5. Complete the installation by following the on-screen instructions.

   ⚠️ **NOTE:** After a message on the screen reports a successful installation, you can delete the downloaded file from your hard drive.
7 Using HP PC Hardware Diagnostics

Using HP PC Hardware Diagnostics Windows (select products only)

HP PC Hardware Diagnostics Windows is a Windows-based utility that allows you to run diagnostic tests to determine whether the computer hardware is functioning properly. The tool runs within the Windows operating system in order to diagnose hardware failures.

If HP PC Hardware Diagnostics Windows is not installed on your computer, first you must download and install it. To download HP PC Hardware Diagnostics Windows, see Downloading HP PC Hardware Diagnostics Windows on page 60.

After HP PC Hardware Diagnostics Windows is installed, follow these steps to access it from HP Help and Support or HP Support Assistant.

1. To access HP PC Hardware Diagnostics Windows from HP Help and Support:
   a. Select the Start button, and then select HP Help and Support.
   b. Right-click HP PC Hardware Diagnostics Windows, select More, and then select Run as administrator.

   — or —

   To access HP PC Hardware Diagnostics Windows from HP Support Assistant:
   a. Type support in the taskbar search box, and then select the HP Support Assistant app.

   — or —

   Select the question mark icon in the taskbar.
   b. Select Troubleshooting and fixes.
   c. Select Diagnostics, and then select HP PC Hardware Diagnostics Windows.

2. When the tool opens, select the type of diagnostic test you want to run, and then follow the on-screen instructions.

   **NOTE:** If you need to stop a diagnostic test at any time, select Cancel.

When HP PC Hardware Diagnostics Windows detects a failure that requires hardware replacement, a 24-digit Failure ID code is generated. The screen displays one of the following options:

- A Failure ID link is displayed. Select the link and follow the on-screen instructions.
- A Quick Response (QR) code is displayed. With a mobile device, scan the code and then follow the on-screen instructions.
- Instructions for calling support are displayed. Follow those instructions.

**Downloading HP PC Hardware Diagnostics Windows**

- The HP PC Hardware Diagnostics Windows download instructions are provided in English only.
- You must use a Windows computer to download this tool because only .exe files are provided.
Downloading the latest HP PC Hardware Diagnostics Windows version

To download HP PC Hardware Diagnostics Windows, follow these steps:

2. Select Download HP Diagnostics Windows, and then select a location on your computer or a USB flash drive.

The tool is downloaded to the selected location.

Downloading HP Hardware Diagnostics Windows by product name or number (select products only)

NOTE: For some products, it may be necessary to download the software to a USB flash drive by using the product name or number.

To download HP PC Hardware Diagnostics Windows by product name or number, follow these steps:

2. Select Get software and drivers, select your type of product, and then enter the product name or number in the search box that is displayed.
3. In the Diagnostics section, select Download, and then follow the on-screen instructions to select the specific Windows diagnostics version to be downloaded to your computer or USB flash drive.

The tool is downloaded to the selected location.

Installing HP PC Hardware Diagnostics Windows

To install HP PC Hardware Diagnostics Windows, follow these steps:

▲ Navigate to the folder on your computer or the USB flash drive where the .exe file was downloaded, double-click the .exe file, and then follow the on-screen instructions.

Using HP PC Hardware Diagnostics UEFI

NOTE: For Windows 10 S computers, you must use a Windows computer and a USB flash drive to download and create the HP UEFI support environment because only .exe files are provided. For more information, see Downloading HP PC Hardware Diagnostics UEFI to a USB flash drive on page 62.

HP PC Hardware Diagnostics UEFI (Unified Extensible Firmware Interface) allows you to run diagnostic tests to determine whether the computer hardware is functioning properly. The tool runs outside the operating system so that it can isolate hardware failures from issues that are caused by the operating system or other software components.

If your PC will not boot into Windows, you can use HP PC Hardware Diagnostics UEFI to diagnose hardware issues.

When HP PC Hardware Diagnostics Windows detects a failure that requires hardware replacement, a 24-digit Failure ID code is generated. For assistance in solving the problem:

▲ Select Get Support, and then use a mobile device to scan the QR code that displays on the next screen. The HP Customer Support - Service Center page displays, with your Failure ID and product number automatically filled in. Follow the on-screen instructions.

– or –

Contact support, and provide the Failure ID code.
To start diagnostics on a convertible computer, your computer must be in notebook mode, and you must use the attached keyboard.

If you need to stop a diagnostic test, press \texttt{esc}.

**Starting HP PC Hardware Diagnostics UEFI**

To start HP PC Hardware Diagnostics UEFI, follow these steps:

1. Turn on or restart the computer, and quickly press \texttt{esc}.
2. Press \texttt{f2}.
   
   The BIOS searches three places for the diagnostic tools, in the following order:
   
   a. Connected USB flash drive
   
   \textbf{NOTE:} To download the HP PC Hardware Diagnostics UEFI tool to a USB flash drive, see \textbf{Downloading the latest HP PC Hardware Diagnostics UEFI version on page 62}.

   b. Hard drive

   c. BIOS

3. When the diagnostic tool opens, select a language, select the type of diagnostic test you want to run, and then follow the on-screen instructions.

**Downloading HP PC Hardware Diagnostics UEFI to a USB flash drive**

Downloading HP PC Hardware Diagnostics UEFI to a USB flash drive can be useful in the following situations:

- HP PC Hardware Diagnostics UEFI is not included in the preinstall image.
- HP PC Hardware Diagnostics UEFI is not included in the HP Tool partition.
- The hard drive is damaged.

\textbf{NOTE:} The HP PC Hardware Diagnostics UEFI download instructions are provided in English only, and you must use a Windows computer to download and create the HP UEFI support environment because only .exe files are provided.

**Downloading the latest HP PC Hardware Diagnostics UEFI version**

To download the latest HP PC Hardware Diagnostics UEFI version to a USB flash drive:

1. Go to \url{http://www.hp.com/go/techcenter/pcdiags}. The HP PC Diagnostics home page is displayed.
2. Select \textbf{Download HP Diagnostics UEFI}, and then select \textbf{Run}.

**Downloading HP PC Hardware Diagnostics UEFI by product name or number (select products only)**

\textbf{NOTE:} For some products, it may be necessary to download the software to a USB flash drive by using the product name or number.

To download HP PC Hardware Diagnostics UEFI by product name or number (select products only) to a USB flash drive:
2. Enter the product name or number, select your computer, and then select your operating system.
3. In the Diagnostics section, follow the on-screen instructions to select and download the specific UEFI Diagnostics version for your computer.

Using Remote HP PC Hardware Diagnostics UEFI settings (select products only)

Remote HP PC Hardware Diagnostics UEFI is a firmware (BIOS) feature that downloads HP PC Hardware Diagnostics UEFI to your computer. It can then execute the diagnostics on your computer, and it may upload results to a preconfigured server. For more information about Remote HP PC Hardware Diagnostics UEFI, go to http://www.hp.com/go/techcenter/pcdiags, and then select Find out more.

Downloading Remote HP PC Hardware Diagnostics UEFI

NOTE: HP Remote PC Hardware Diagnostics UEFI is also available as a Softpaq that can be downloaded to a server.

Downloading the latest Remote HP PC Hardware Diagnostics UEFI version

To download the latest Remote HP PC Hardware Diagnostics UEFI version, follow these steps:
2. Select Download Remote Diagnostics, and then select Run.

Downloading Remote HP PC Hardware Diagnostics UEFI by product name or number

NOTE: For some products, it may be necessary to download the software by using the product name or number.

To download HP Remote PC Hardware Diagnostics UEFI by product name or number, follow these steps:
2. Select Get software and drivers, select your type of product, enter the product name or number in the search box that is displayed, select your computer, and then select your operating system.
3. In the Diagnostics section, follow the on-screen instructions to select and download the Remote UEFI version for the product.

Customizing Remote HP PC Hardware Diagnostics UEFI settings

Using the Remote HP PC Hardware Diagnostics setting in Computer Setup (BIOS), you can perform the following customizations:

● Set a schedule for running diagnostics unattended. You can also start diagnostics immediately in interactive mode by selecting Execute Remote HP PC Hardware Diagnostics.
● Set the location for downloading the diagnostic tools. This feature provides access to the tools from the HP website or from a server that has been preconfigured for use. Your computer does not require the traditional local storage (such as a disk drive or USB flash drive) to run remote diagnostics.
• Set a location for storing the test results. You can also set the user name and password settings used for uploads.

• Display status information about the diagnostics run previously.

To customize Remote HP PC Hardware Diagnostics UEFI settings, follow these steps:

1. Turn on or restart the computer, and when the HP logo appears, press f10 to enter Computer Setup.

2. Select Advanced, and then select Settings.

3. Make your customization selections.

4. Select Main, and then Save Changes and Exit to save your settings.

Your changes take effect when the computer restarts.
8 Backing up, restoring, and recovering

This chapter provides information about the following processes, which are standard procedure for most products:

- **Back up your personal information**—You can use Windows tools to back up your personal information (see Using Windows tools on page 65).

- **Creating a restore point**—You can use Windows tools to create a restore point (see Using Windows tools on page 65).

- **Creating recovery media** (select products only)—You can use the HP Cloud Recovery Download Tool (select products only) to create recovery media (see Using the HP Cloud Recovery Download Tool to create recovery media (select products only) on page 65).

- **Restoring and recovery**—Windows offers several options for restoring from backup, refreshing the computer, and resetting the computer to its original state (see Using Windows tools on page 65).

**IMPORTANT:** If you will be performing recovery procedures on a tablet, the tablet battery must be at least 70% charged before you start the recovery process.

**IMPORTANT:** For a tablet with a detachable keyboard, connect the tablet to the keyboard base before beginning any recovery process.

## Backing up information and creating recovery media

### Using Windows tools

**IMPORTANT:** Windows is the only option that allows you to back up your personal information. Schedule regular backups to avoid information loss.

You can use Windows tools to back up personal information and create system restore points and recovery media.

**NOTE:** If computer storage is 32 GB or less, Microsoft System Restore is disabled by default.

For more information and steps, see the Get Help app.

1. Select the **Start** button, and then select the **Get Help** app.
2. Enter the task you want to perform.

**NOTE:** You must be connected to the Internet to access the Get Help app.

### Using the HP Cloud Recovery Download Tool to create recovery media (select products only)

You can use the HP Cloud Recovery Download Tool to create HP Recovery media on a bootable USB flash drive.

To download the tool:

▲ Go to the Microsoft Store and search for HP Cloud Recovery.

For details, go to [http://www.hp.com/support](http://www.hp.com/support), search for HP Cloud Recovery, and then select “HP PCs – Using the Cloud Recovery Tool (Windows 10, 7).”
Restoring and recovery

Restoring, resetting, and refreshing using Windows tools

Windows offers several options for restoring, resetting, and refreshing the computer. For details, see Using Windows tools on page 65.

Recovering using HP Recovery media

HP Recovery media is used to recover the original operating system and software programs that were installed at the factory. On select products, it can be created on a bootable USB flash drive using the HP Cloud Recovery Download Tool. For details, see Using the HP Cloud Recovery Download Tool to create recovery media (select products only) on page 65.

To recover your system:

▲ Insert the HP Recovery media, and then restart the computer.

Changing the computer boot order

If your computer does not restart using the HP Recovery media, you can change the computer boot order. This is the order of devices listed in BIOS where the computer looks for startup information. You can change the selection to an optical drive or a USB flash drive, depending on the location of your HP Recovery media.

To change the boot order:

IMPORTANT: For a tablet with a detachable keyboard, connect the tablet to the keyboard base before beginning these steps.

1. Insert the HP Recovery media.
2. Access the system Startup menu.
   For computers or tablets with keyboards attached:
   ▲ Turn on or restart the computer or tablet, quickly press esc, and then press f9 for boot options.
   For tablets without keyboards:
   ▲ Turn on or restart the tablet, quickly hold down the volume up button, and then select f9.
   – or –
   Turn on or restart the tablet, quickly hold down the volume down button, and then select f9.
3. Select the optical drive or USB flash drive from which you want to boot, and then follow the on-screen instructions.

**NOTE:** Applicable product safety standards specify thermal limits for plastic surfaces. The device operates well within this range of temperatures.
The wide-range input feature of the computer permits it to operate from any line voltage from 100 to 120 V ac, or from 220 to 240 V ac.

The 3-conductor power cord set included with the computer meets the requirements for use in the country or region where the equipment is purchased.

Power cord sets for use in other countries or regions must meet the requirements of the country and region where the computer is used.

Requirements for all countries

The following requirements are applicable to all countries and regions:

- The length of the power cord set must be at least **1.0 m** (3.3 ft) and no more than **2.0 m** (6.5 ft).
- All power cord sets must be approved by an acceptable accredited agency responsible for evaluation in the country or region where the power cord set will be used.
- The power cord sets must have a minimum current capacity of 10 A and a nominal voltage rating of 125 or 250 V ac, as required by the power system of each country or region.
- The appliance coupler must meet the mechanical configuration of an EN 60 320/IEC 320 Standard Sheet C13 connector for mating with the appliance inlet on the back of the computer.

</tr>
</thead>
<tbody>
<tr>
<td>2.</td>
<td>The flexible cord must be Type SVT/SJT or equivalent, No. 18 AWG, 3-conductor. The wall plug must be a two-pole grounding type with a NEMA 5-15P (15 A, 125 V ac) or NEMA 6-15P (15 A, 250 V ac) configuration. CSA or C-UL mark. UL file number must be on each element.</td>
<td></td>
</tr>
<tr>
<td>3.</td>
<td>The appliance coupler, flexible cord, and wall plug must bear a “T” mark and registration number in accordance with the Japanese Dentori Law. The flexible cord must be Type VCTF, 3-conductor, 0.75 mm² or 1.25 mm² conductor size. The wall plug must be a two-pole grounding type with a Japanese Industrial Standard C8303 (7 A, 125 V ac) configuration.</td>
<td></td>
</tr>
<tr>
<td>4.</td>
<td>The flexible cord must be Type RVV, 3-conductor, 0.75 mm² conductor size. Power cord set fittings (appliance coupler and wall plug) must bear the CCC certification mark.</td>
<td></td>
</tr>
<tr>
<td>5.</td>
<td>The flexible cord must be Type H05VV-F 3-conductor, 0.75 mm² conductor size. KTL logo and individual approval number must be on each element. Corset approval number and logo must be printed on a flag label.</td>
<td></td>
</tr>
<tr>
<td>6.</td>
<td>The flexible cord must be Type HVCTF 3-conductor, 1.25 mm² conductor size. Power cord set fittings (appliance coupler, cable, and wall plug) must bear the BSMI certification mark.</td>
<td></td>
</tr>
<tr>
<td>7.</td>
<td>For 127 V ac, the flexible cord must be Type SVT or SJT 3-conductor, 18 AWG, with plug NEMA 5-15P (15 A, 125 V ac), with UL and CSA or C-UL marks. For 240 V ac, the flexible cord must be Type H05VV-F 3-conductor, 0.75 mm² or 1.00 mm² conductor size, with plug BS 1363/A with BSI or ASTA marks.</td>
<td></td>
</tr>
</tbody>
</table>
When a non-rechargeable or rechargeable battery has reached the end of its useful life, do not dispose of the battery in general household waste. Follow the local laws and regulations in your area for battery disposal.

HP encourages customers to recycle used electronic hardware, HP original print cartridges, and rechargeable batteries. For more information about recycling programs, see the HP Web site at http://www.hp.com/recycle.
