## About this user's guide

This user's guide provides information for your basic understanding of the machine as well as detailed steps to explain machine usage.

- Read the safety information before using the machine.
- If you have a problem using the machine, refer to the troubleshooting chapter.
- All illustrations in this user's guide may differ from your machine depending on its options or model you purchased.
- The screenshots in this user's guide may differ from your machine depending on the machine's firmware/driver version.
- The procedures in this user's guide are mainly based on Windows 10.
- Document is synonymous with original.
- Paper is synonymous with media, or print media.

# Safety information

These warnings and precautions are included to prevent injury to you and others, and to prevent any potential damage to your machine. Be sure to read and understand all of these instructions before using the machine. After reading this section, keep it in a safe place for future reference.

## 2 Menu Overview

This chapter provides information about the overall menu structure.

- [Accessing the menus](#)
- [Menu overview](#)

## Accessing the menus

Some menus may not appear on the display depending on the options selected, the product model, or your country/region of residence. If so, it is not applicable to your machine.

1. Select the Copy  or Scan  button on the control panel depending on the feature to be used.
2. Select the Menu  button on the left to enter Menu mode.
3. Press the arrows until the needed menu item appears and press **OK**.
4. If the setting item has sub menus, repeat step 3.
5. Press **OK** to save the selection.
6. Select the Back  button to return to the previous menu item.
7. Press the Stop/Clear  button to return to the ready mode.

Menu features are also accessible remotely from the Embedded Web Server (EWS) on network-connected printers. For more information about the EWS, go to <http://support.hp.com>.

# Loading paper in the tray

## Introduction

The following topics describe how to prepare and load paper in Tray 2 and the Multi-purpose Tray 1.

- [Preparing paper](#)
- [Tray 2 / optional tray](#)
- [Multi-purpose Tray 1](#)

## Preparing paper

- Use only print media that meets the specifications required by the machine.
- If you use print media that does not meet the specifications outlined in this user guide, the following problems may occur:
  - Low printing quality, paper jams, excessive wear on the machine.
- The weight, material, surface condition, and moisture content of the print media may affect the performance and printing quality of the machine.
- Some print media may not produce the desired result even if it meets the specifications outlined in this user guide.

This may occur due to mishandling of the print media, unsuitable temperature or humidity, or other uncontrollable factors.

- Using print media that does not meet the specifications outlined in this user guide may result in machine malfunctions that require repairs.

Such repairs are not covered by the warranty agreement.
- Do not use inkjet photo print media with this machine. Doing so may damage the machine.
- Do not use creased, torn, or damp print media.

---

 **WARNING!** The use of inflammable media or foreign materials left in the printer may lead to overheating of the unit and, in rare cases may cause a fire.

---

## Tray 2 / optional tray

---

 **NOTE:** For models using an optional tray, CarePack installation is required and may vary depending on country/region of purchase or specific model.

---

1. Pull out the paper tray.

2. Squeeze and slide the paper width guide and paper length lever to locate them in the correct paper size slot marked at the bottom of the tray to adjust to the size.

3. Flex or fan the edge of the paper stack to separate the pages before loading papers.

4. After inserting paper into the tray, squeeze and slide the paper width guides and paper length guide.

- Do not push the paper width guide too far causing the media to warp.
- If you do not adjust the paper width guide, it may cause paper jams.

- Do not use a paper with a leading-edge curl, it may cause a paper jam or the paper can be wrinkled.

5. Insert the tray back into the machine.

6. When you print a document, set the paper type and size for Tray 2/optional tray.

**CAUTION:** To avoid paper jams, always press down the Tray 2/optional tray feed plate when reloading paper.

## Multi-purpose Tray 1

The multi-purpose tray can hold special sizes and types of print material, such as postcards and note cards.

1. Hold the handle of multi-purpose tray and pull it down to open and pull out the multi-purpose tray paper extension.

2. Load the paper.

3. Squeeze the multi-purpose tray paper width guides and adjust them to the width of the paper. Do not force them too much, or the paper will bent resulting in a paper jam or skew.

4. When you print a document, set the paper type and size for the multipurpose tray.

**CAUTION:** To avoid paper jams, always press down the Tray 1 feed plate when reloading paper.

## Printing on special media

The paper setting in the machine and driver should match to print without a paper mismatch error.

Or if your machine supports a display screen, you can set it using the Menu  button on the control panel.

Then, set the paper type from the **Printing preferences** window > **Paper** tab > **Paper Type**.

---

 **NOTE:**

- When using special media, we recommend you feed one sheet at a time.
  - Illustrations on this user's guide may differ from your machine depending on its options or models. Check your machine type.
- 

## Card stock/Custom-sized paper

In the software application, set the margins to at least 6.4 mm (0.25 inches) away from the edges of the material.

## Preprinted paper

When loading preprinted paper, the printed side should be facing up with an uncurled edge at the front. If you experience problems with paper feeding, turn the paper around. Note that print quality is not guaranteed.

- Must be printed with heat-resistant ink that will not melt, vaporize, or release hazardous emissions when subjected to the machine's fusing temperature for 0.1 second (about 170°C (338°F)).
- Preprinted paper ink must be non-flammable and should not adversely affect machine rollers.
- Before you load preprinted paper, verify that the ink on the paper is dry. During the fusing process, wet ink can come off preprinted paper, reducing print quality.

## Setting the paper size and type

The paper setting in the machine and driver should match to print without a paper mismatch error.

From the print driver or application, set the paper type from the **Print Options** window > **Properties** > **Paper** tab > **Type**.

---

**NOTE:** It may be necessary to press **OK** to navigate to lower-level menus for some models.

---

After loading paper in the paper tray, set the paper size and type using the control panel buttons.

1. Select Menu  > **System Setup** > **Paper Setup** > **Paper Size** or **Paper Type** on the control panel.
2. Select the tray and the option you want.
3. Press **OK** to save the selection.
4. Click the Back  button to the right of the Menu  button to return to the Paper Setup screen. Then select the paper type if desired.
5. Press the Stop/Clear  button to return to ready mode.

---

**NOTE:** If you want to use special-sized paper such as billing paper, select the **Paper** tab > **Size** > **Edit...** and set **Custom Paper Size Settings** in the **Printing Preferences**.

---

# Loading the original

## Introduction

The following topics describe how to prepare originals for copying and how to load originals on the scanner glass or in the document feeder.

- [Preparing originals](#)
- [Loading originals](#)

## Preparing originals

- Do not load documents that are smaller than 125 x 101.6mm (4.92 x 4 inches) or larger than 297 x 914 mm (11.6 x 36 inches).
- Do not load documents printed on the following types of paper to avoid paper jams, low printing quality, and machine malfunctions:
  - Carbon-paper or carbon-backed paper
  - Coated paper
  - Tracing paper or thin paper
  - Wrinkled or creased paper
  - Curled or rolled paper
  - Torn paper
- Remove all staples and paper clips from the document before loading it.
- Make sure that any glue, ink, or correction fluid on the document is completely dry before loading it.
- Do not load original documents that include different sizes or weights of paper.
- Do not load booklets, pamphlets, transparencies, or documents with other unusual characteristics.

## Loading originals

You can use the scanner glass or the document feeder to load an original for copying and scanning.

 **NOTE:** Illustrations on this user's guide may differ from your machine depending on its options or models. Check your machine type.

---

### On the scanner glass

Using the scanner glass, you can copy or scan originals. You can get the best scan quality, especially for colored or gray-scaled images. Make sure that no originals are in the document feeder. If an original is detected in the document feeder, the machine gives it priority over the original on the scanner glass.

1. Lift and open the scanner lid.

2. Place the original face down on the scanner glass. Align it with the registration guide at the top left corner of the glass.

3. Close the scanner lid.

**NOTE:**

- Leaving the scanner lid open while copying may affect copy quality and toner consumption.
- Dust on the scanner glass may cause black spots on the printout. Always keep it clean.
- If you are copying a page from a book or magazine, lift the scanner lid until its hinges are caught by the stopper and then close the lid. If the book or magazine is thicker than 30 mm, start copying with the scanner lid open.

**CAUTION:**

- Be careful not to break the scanner glass. You may get hurt.
- Do not look into the light from inside of the scanner while copying or scanning. It is harmful to the eyes.

## In the document feeder

Using the automatic document feeder (ADF), you can load up to 100 sheets of paper (80 g/m<sup>2</sup>, 21 lbs bond) for one job.

1. Flex or fan the edge of the paper stack to separate the pages before loading originals.

2. Load the original face up into the document feeder input tray. Make sure that the bottom of the original stack matches the paper size marked on the document input tray.

3. Adjust the document feeder width guides to the paper size.

 **NOTE:** Dust on the document feeder glass may cause black lines on the printout. Always keep the glass clean.

## Print media specifications

The following table describes the attributes of the print media supported by the printer. Attributes include media type, size, dimensions, weight, and tray capacity for the specified media.

# Software installation instructions

The full software install is available for the following operating systems:

- Windows XP 32-bit and 64-bit
- Windows Vista 32-bit and 64-bit
- Windows 7 32-bit and 64-bit
- Windows 8 32-bit and 64-bit
- Windows 8.1 32-bit and 64-bit
- Windows 10 32-bit and 64-bit

Server operating system platforms support the installation of the HP LaserJet MFP M437, M439 print driver only using the **Add Printer Wizard**.

Other supported HP LaserJet MFP M437, M439 print drivers available for download on [hp.com](http://hp.com):

- HP UPD PCL6
- HP UPD PostScript driver

## Install the software

1. Download the HP LaserJet MFP M437, M439 full software solution from [www.hp.com/support/ljM437MFP](http://www.hp.com/support/ljM437MFP), [www.hp.com/support/ljM439MFP](http://www.hp.com/support/ljM439MFP).
2. Follow the on-screen instructions to install and configure the product software.

## Print setup on the control panel

The following information describes the printer setup functions available from the control panel. These functions control the appearance of the printed pages.

 **NOTE:** Some menus may not appear in the display depending on options or models. If so, it is not applicable to your machine.

To change the menu options:

Press Menu  > **Print Setup** on the control panel.

| <b>Duplex</b>           | You can set the machine to print on both sides of paper.<br><b>NOTE:</b> Depending on model, this may be manual or automatic duplexing.  |
| <b>Copies</b>           | You can enter the number of prints using the number keypad.  |
| <b>Resolution</b>       | Sets the resolution option. The higher the setting, the sharper printed characters and graphics.   |
| <b>Clear Text</b>       | Prints text darker than on a normal document.  |
| <b>Auto CR</b>          | Allows you to append the required carriage return to each line feed, which is useful for DOS users.  |
| <b>Skip Blank Pages</b> | The printer detects the printing data from computer whether a page is empty or not. You can set to print or skip the blank page.   |
| <b>Emulation</b>        | Set up font information to be used when sending PCL5 directly to the device.   |

# Overview of print jobs when using a Universal Print Driver (UPD) and Discrete Host Printer Driver

The below table provides a brief description of the print jobs when using an HP UPD and the discrete printer driver.

**Table 5-1 Selection of print jobs for normal and confidential printing**

| Universal Print Driver (UPD)  | Discrete printer driver   |
|---|---|
| <p>Normal print jobs tasks are performed in the following conditions:</p> <ul style="list-style-type: none"> <li>• When the user selects any of the following <b>Job Storage Mode</b> options in the HP UPD:               <ul style="list-style-type: none"> <li>• Proof and Hold</li> <li>• Quick Copy</li> <li>• Stored Job</li> </ul> </li> <li>• When the user selects the <b>Personal Job</b> option in the HP UPD without a password.</li> </ul> | <p>User can select normal or confidential print jobs These print modes are based on the RAM disk on the printer.</p> <p><b>NOTE:</b> This driver does not support the “Proof” print mode.</p> |
| <p>User can set up confidential jobs when using a <b>Personal Job</b> with a password (PIN).</p>  | <p>User can set print jobs as confidential.</p>   |

## Print secure documents from the control panel

**PIN printing (Confidential printing by RAM disk)** is a simple method of safeguarding print jobs at the printer until the end user enters the proper PIN to retrieve the private job. This method works with the **Job Storage** feature enabled in the printer driver and the private print jobs are stored in the RAM disk. Each print job is given a job name, user name, and a PIN number. An end user needs to have this information before being able to print the job to an output tray.

1. Make sure that the machine is connected to your computer and powered on.
2. On the HP UPD, select the **Personal Job** mode, and then enter a PIN and User name.
  - a. Select your printer from your Windows operating system, click the **Printing Preferences** menu, and then select the **Job Storage** tab.
  - b. Make sure to select **PIN to print** from the **Make Job Private/Secure** drop-down list to enter a PIN, and then select the User name.

The printer saves this job in the RAM disk.

---

 **NOTE:** If the RAM disk is full, the control panel will display the following message “**Memory Full.**”

The maximum number of confidential print jobs is 100. If the machine has 100 jobs stored in the printer, a new job will be stored after removing the oldest print job.

---

- c. Click the **Apply** button.
3. Select **Secured Job** menu on the control panel.

The control panel will display a list of secure print jobs.

---

 **NOTE:** If a user sends multiple confidential jobs, the user name is only listed one time on the printer.

---

4. Select the document to print.
5. Enter the PIN that you set for the printer driver.
6. Print or delete the document.

---

## Copy Setup

 **NOTE:** Some menus may not appear in the display depending on options or models. If so, it is not applicable to your machine.

To change the menu options:

Press Copy  > Menu  > **Copy Setup** on the control panel.

Or Menu  > **Copy Setup** on the control panel.

**Table 6-2** Copy Setup

| Item           | Description  |
|----------------|--|
| Change Default | The copy options can be set to those most frequently used.   |
| Auto Tray      | This is the option to set if the machine is to continue printing or not when any tray becomes empty. |

## Basic copying

1. Select Copy  > Menu  > **Copy Feature** on the control panel.  
Or select Menu  > **Copy Feature** on the control panel.
2. Place a single document face down on the document glass, or load the documents face up into the document feeder.
3. If you want to customize the copy settings including **Reduce/Enlarge, Darkness, Original Type** and more by using the control panel buttons.
4. Enter the number of copies using the arrow or number keypad, if necessary.
5. Press Start .

 **NOTE:** If you need to cancel the copying job during the operation, press the Stop/Clear  button and the copying will stop.

## Changing the settings for each copy

Your machine provides default settings for copying so that you can quickly and easily make a copy.

### NOTE:

- If you press the Stop/Clear  button twice while setting the copy options, all of the options you have set for the current copy job will be canceled and returned to their default status. Or, they will automatically return to their default status after the machine completes the copy in progress.
- Accessing menus may differ from model to model.
- It may be necessary to press **OK** to navigate to lower-level menus for some models.

## Darkness

If you have an original containing faint marking and dark images, you can adjust the brightness to make a copy that is easier to read.

1. Select Copy  > Menu  > **Copy Feature** > **Darkness** on the control panel.  
Or press Darkness  on the control panel.
2. Select the option you want and press **OK**.  
For example, the **+5** being the lightest, and the **-5** being the darkest.
3. Press the Stop/Clear  button to return to ready mode.

## Original Type

The original setting is used to improve the copy quality by selecting the document for the current copy job.

1. Select Copy  > Menu  > **Copy Feature** > **Original Type** on the control panel.  
Or select Menu  > **Copy Feature** > **Original Type** on the control panel.
2. Select the option you want and press **OK**.
  - **Text**: Use for originals containing mostly text.
  - **Text/Photo**: Use for originals with mixed text and photographs.

---

 **NOTE:** If texts in the printout is blurry, select **Text** to get the clear texts.

---

- **Photo**: Use when the originals are photographs.
  - **Map**: Use when the originals are map.
3. Press the Stop/Clear  button to return to ready mode.

## Reduced or enlarged copy

You can reduce or enlarge the size of a copied image from 25% to 400% from the document feeder or scanner glass.

---

### NOTE:

- This feature may not be available depending on model or optional goods.
  - If the machine set to Eco mode, reduce and enlarge features are not available.
- 

### To select from the predefined copy sizes

1. Select Copy  > Menu  > **Copy Feature** > **Reduce/Enlarge** on the control panel.  
Or select Menu  > **Copy Feature** > Reduce/Enlarge  button on the control panel.
2. Select the option you want and press **OK**.
3. Press the Stop/Clear  button to return to ready mode.

### To scale the copy by directly entering the scale rate

1. Select Copy  > Menu >  > **Copy Feature** > **Reduce/Enlarge** > **Custom** on the control panel.  
Or select Menu  > **Copy Feature** > **Reduce/Enlarge** > **Custom** on the control panel.
2. Enter the copy size you want using the numeric keypad.
3. Press **OK** to save the selection.
4. Press the Stop/Clear  button to return to ready mode.

---

 NOTE: When you make a reduced copy, black lines may appear at the bottom of your copy.

---

## ID card copying

Your machine can print 2-sided originals on one sheet.

The machine prints one side of the original on the upper half of the paper and the other side on the lower half without reducing the size of the original. This feature is helpful for copying a small-sized item such as business card.

---

 **NOTE:**

- The original must be placed on the scanner glass to use this feature.
  - If the machine set to Eco mode, this feature is not available.
- 

Depending on the model, the operating procedure may differ.

1. Press ID Copy  on the control panel.  
Or select (Menu) > **Copy Feature** > **Layout** > **ID Copy** on the control panel.
  2. Place the front side of an original facing down on the scanner glass where arrows indicate as shown. Then, close the scanner lid.
- 

 **NOTE:** To get a better image, close the scanner lid and lightly press the scanner lid.

---

3. **Place Front Side Press [Start]** appears on the display.
4. Press Start .

Your machine begins scanning the front side and shows **Place Rear Side Press [Start]**.

5. Turn the original over and place it on the scanner glass where arrows indicate as shown. Then, close the scanner lid.

6. Press the Start  button.

**Figure 6-1** Front and back of the ID card

---

 **NOTE:**

- If you do not press the Start  button, only the front side will be copied.
  - If the original is larger than the printable area, some portions may not be printed.
-

# Scanning from the machine

## Introduction

The following topics describe how to set up the Scan menu options from the control panel and then scan a document.

## Scan feature

 **NOTE:** Some menus may not appear in the display depending on options or models. If so, it is not applicable to your machine.

 **NOTE:** In order for the **Scan To** button to function, you must install the HP Scan Software on the PC.

To change the menu options:

Press Scan  > **Scan To PC** on the control panel.

# Scanning from a computer

## Introduction

The following topics describe several methods for scanning a document from the scanner to a computer.

 **NOTE:** The maximum resolution that can be achieved depends upon various factors, including computer speed, available disk space, memory, the size of the image being scanned, and bit depth settings. Thus, depending on your system and what you are scanning, you may not be able to scan at certain resolutions, especially using enhanced dpi.

- [Scan to PC](#)
- [Scanning from the HP Scan Software](#)
- [Scanning from image editing program](#)
- [Scanning using the WIA driver](#)
- [Scanning via WSD](#)

## Scan to PC

The HP LaserJet MFP M437, M439 full software installation includes the HP Scan Application. The HP Scan Application enables the **Scan To** button on the printer's control panel.

The HP Scan Application includes the **Scan to PC Setup** utility for configuring the scan settings used when scanning is done using the **Scan To** button on the printer's control panel.

### Configure scan settings using the Scan to PC Setup utility

1. Open the **Scan to PC Setup** utility:
  - a. Select the **Windows** icon in the left-bottom corner of the screen.
  - b. Select **All Programs**.
  - c. Select the **HP** or **HP LaserJet Printers** folder.
  - d. Select the **HP MFP Scan to PC Setup** application.
2. Select your printer from the list in the **Scan to PC Setup** utility, and then click the **Properties** button. The following settings are available:
  - **Profile Name**—This is the name that displays on the printer's control panel to identify and select the profile.
  - **Scan Settings**
    - Color Mode
    - Resolution
    - Original Size
    - Duplex
  - **Save Settings**

### Save Location

### File Format

### Action After Saving

3. Click the **OK** button to save the settings.

## Scan to PC

1. Place a single document face down on the document glass, or load the documents face up into the document feeder.
2. Touch [Scan to PC](#) on the control panel.

---

 **NOTE:** If you do not see [Scan To PC](#) on the control panel, use the down arrow to show more [Scan To](#) destination options.

 **NOTE:** If you see **Not Available** message, check the port.

Switch to advanced mode > [Scan To PC Settings](#).

---

3. Select your registered computer **ID**, and enter the **Password** if necessary.
4. Select the scan destination you want and press **OK**.

Default setting is **My Documents**.

5. Select the option you want and then touch **OK**.
6. Scanning begins.

---

 **NOTE:** Scanned images are saved in `C:\Users\users name\My Documents`. The saved folder may differ, depending on your operating system or the application you are using.

---

## Scanning from the HP Scan Software

The full software solution is available at [hp.com](http://hp.com), includes a TWAIN compliant scan application.

1. Open the HP Scan Application:
  - a. Click the **Start** button.
  - b. Click **All Programs**.
  - c. Click **HP** or **HP LaserJet Printers**.
  - d. Click **HP MFP Scan**.
2. Use the [Quick Scan](#), [Advanced Scan](#) or [Configuration](#) features to scan documents or to adjust scan settings.

## Scanning from image editing program

You can scan and import documents in the image editing software such as Adobe Photoshop, if the software is TWAIN-compliant. Follow the steps below to scan with TWAIN-compliant software:

1. Make sure that the machine is connected to your computer and powered on.
2. Place a single document face down on the document glass, or load the documents face up into the document feeder.
3. Open an application, such as Adobe Photoshop.
4. Click **File > Import**, and select the scanner device.
5. Set the scan options.
6. Scan and save your scanned image.

## Scanning using the WIA driver

Your machine supports the Windows Image Acquisition (WIA) driver for scanning images. WIA is one of the standard components provided by Microsoft Windows and works with digital cameras and scanners. Unlike the TWAIN driver, the WIA driver allows you to scan and easily adjust images without using additional software:

1. Make sure that the machine is connected to your computer and powered on.
2. Place a single document face down on the document glass, or load the documents face up into the document feeder.
3. Open a WIA-compliant application, for example Microsoft Paint, and then do the following:
  - a. Select **File**
  - b. Select **From Scanner or Camera**.
  - c. Select **M437/M439 Scan**.
4. From the **WIA Scan** screen select **Flatbed** or **Document Feeder** as the **Paper Source**.

---

 **NOTE:** When using the document feeder as the paper source the **File Type** and **Page Size** must be configured in the **Settings** menu.

---

5. Click the **Scan** button.

## Scanning via WSD

Scans the originals and saves the scanned data on a connected computer if the computer supports the WSD (Web Service for Device) feature. To use the WSD feature, you need to install the WSD printer driver on your computer. For Windows, you can install the WSD driver by **Control Panel > Devices and Printers > Add a printer**. Click **Add a network printer** from the wizard.

---

 **IMPORTANT:** To use the WSD feature the computer must have **Network Discovery** and **File and Print Sharing** enabled.

---

 **NOTE:**

- **Device Discovery** and **File and Print Sharing** must be enabled on the computer for WSD to work.
  - The machine that does not support the network interface, it will not be able to use this feature.
  - The WSD feature works only with Windows Vista® or later version that are the WSD-compliant computer.
  - The following installation steps are based on a Windows computer.
-

## Installing a WSD Printer Driver

1. Select **Start > Control Panel > Devices and Printers > Add a printer**.
2. Click **Add a network, wireless or Bluetooth printer** from the wizard.
3. In the printers list, select the one you want to use, and then click **Next**.

---

 **NOTE:**

- The IP address for WSD printer is `http://IP address/ws/` (example: `http:// 111.111.111.111/ws/`).
  - If no WSD printer is displayed in the list, click **The printer that I want isn't listed > Add a printer using a TCP/IP address or hostname** and select **Web Services Device** from **Device type**. Then enter the printer's IP address.
- 

4. Follow the instructions in the installation window.

## Scanning using the WSD feature

1. Make sure that the machine is connected to your computer and powered on.
2. Place a single document face down on the document glass, or load the documents face up into the document feeder.
3. Select Scan  > **Scan To WSD** on the control panel.

---

 **NOTE:** If you see **Not Available** message, check the port connection. Or check the printer driver for WSD is correctly installed.

---

4. Select your computer name from **Destination List**.
5. Select the option you want and press **OK**.
6. Scanning begins.

## Sending scanned images to different destinations

The following topics provide information to set up and send scanned images using email or an FTP/SMB server.

---

 **NOTE:** M437n does not support the scan to email or FTP/SMB server features. The machine will display the following message **Feature is not supported** when a user presses the Address book button.

---

- [Setting up an email account](#)
- [Scanning and sending an email](#)
- [Setting up an FTP/SMB server](#)
- [Scanning and sending to FTP/SMB server](#)

### Setting up an email account

1. Open a web browser and type in your printer's IP address in the browser window to access the Embedded Web Server (EWS). For instructions, see [Accessing settings using the Embedded Web Server \(EWS\) on page 75](#).
2. Set up the network parameters, SMTP and email settings in the network settings. For instructions, see [Set up an email account on page 76](#).

### Scanning and sending an email

---

 **NOTE:** To scan and send an image as an email attachment, make sure to configure the network settings in the EWS.

---

Make sure a network cable is connected to the machine.

---

1. Place a single document face down on the document glass, or load the documents face up into the document feeder.
2. Select Scan  > **Scan To Email** on the control panel.
3. Select the desired scan options and press **OK**.
4. Enter the sender's and recipient's email address.
5. Enter an email subject and press **OK**.
6. Press Start .
7. The machine begins scanning and then sends the email.

### Setting up an FTP/SMB server

---

 **NOTE:** To scan and send an image to a server destination, make sure to configure the network settings in the EWS.

---

Make sure a network cable is connected to the machine.

1. Open a web browser and type in your printer's IP address in the browser window to access the Embedded Web Server (EWS). For instructions, see [Accessing settings using the Embedded Web Server \(EWS\) on page 75](#).
2. Set up the network parameters in the network settings. For instructions, see [Set up a server destination on page 76](#).

## Scanning and sending to FTP/SMB server

1. Make sure your machine is connected to a network.
2. Place a single document face down on the document glass, or load the documents face up into the document feeder.
3. Select Scan  > **Scan To FTP** or **Scan To SMB** on the control panel.
4. Select a server, the desired scan settings, and press **OK**.
5. Press Start .
6. The machine begins scanning and then sends the scanned image to the specified server.

## Paper setup

 **NOTE:** Some menus may not appear in the display depending on options or models. If so, it is not applicable to your machine.

To change the menu options:

Press Menu  > **System Setup** > **Paper Setup** on the control panel.

| Item                     | Description  |
|--------------------------|--|
| <b>Paper Size</b>        | Choose the paper size for each tray. It must match the size of paper that is in the tray.  |
| <b>Paper Type</b>        | Choose the type of the paper for each tray.  |
| <b>Paper Select</b>      | Select the default paper tray for Copy and Print.  |
| <b>Margin</b>            | Sets the default margins for all printing.   |
| <b>Tray Confirmation</b> | If tray confirmation is set, the confirmation message appears automatically when you load paper into an empty tray. The machine detects some paper sizes and types automatically. You can confirm or change the detected size/type from the confirmation window. |

## Report

 **NOTE:** Some menus may not appear in the display depending on options or models. If so, it is not applicable to your machine.

To change the menu options:

Press Menu  > **System Setup** > **Report** on the control panel.

| Item                         | Description   |
|------------------------------|---|
| <b>Configuration</b>         | Prints a report on the machine's overall configuration.                         |
| <b>Demo Page</b>             | Prints the demo page to check whether your machine is printing properly or not. |
| <b>Network Configuration</b> | Prints information on your machine's network connection and configuration.      |
| <b>Supplies Information</b>  | Prints supplies' information.   |
| <b>Usage Counter</b>         | Prints a usage page. The usage page contains the total number of pages printed. |
| <b>Account</b>               | Prints a report of a user using the machine.                                    |
| <b>PCL Font</b>              | Prints the PCL font list.   |
| <b>PS Font</b>               | Prints the PS font list.  |

# Maintenance

 **NOTE:** Some menus may not appear in the display depending on options or models. If so, it is not applicable to your machine.

To change the menu options:

Press Menu  > **System Setup** > **Maintenance** on the control panel.

| Item                      | Description   |
|---------------------------|---|
| <b>Supplies Life</b>      | Shows the supply life indicators.   |
| <b>Image Mar.</b>         | Allows you to adjust the color setting such as color registration, color density, etc.  |
| <b>Toner Low Alert</b>    | Turn on/off Toner Low Alert.  |
| <b>OPC Unit Low Alert</b> | Turn on/off OPC Unit Low Alert.   |
| <b>Serial Number</b>      | Shows the machine's serial number. When you call for service or register as a user on the website, you can find this.   |
| <b>Paper Stacking</b>     | If you use a machine in a humid area, or you are using the damp print media caused by a high humidity, the printouts on the output tray may be curled and may not be stacked properly. In this case, you can set the machine to use this function to let printouts stack firmly. But, using this function will make the print speed slow. |

# Network setup

 **NOTE:** Some menus may not appear in the display depending on options or models. If so, it is not applicable to your machine.

To change the menu options:

Press Menu  > **Network** on the control panel.

# Accessing settings using the Embedded Web Server (EWS)

Network-connected MFPs have an Embedded Web Server available to view and modify printer settings.

For more information about the EWS, go to <http://support.hp.com>.

## Access the EWS

Use the following steps to open the EWS:

1. Print a configuration page to obtain your printer's IP address or host name.
2. Open a Web browser, and in the address line, type the IP address or host name exactly as it displays on the configuration page. Press the **Enter** key on the computer keyboard. The EWS opens.

If the Web browser displays a **There is a problem with this website's security certificate** message when attempting to open the EWS, click **Continue to this website (not recommended)**.

---

 **NOTE:** Choosing **Continue to this website (not recommended)** will not harm the computer while navigating within the EWS for the HP printer.

---

## Modify settings in the EWS

The EWS displays printer settings in a “Read-only” view by default. Users must log in to the EWS to change any settings. Use the following steps to log into the EWS:

1. Click the **Sign In** button in the upper-right of the EWS page.
2. Type `admin` for both the **ID** and **Password**.

---

 **NOTE:** It is recommended that the administrator initially set up the **ID** and **Password** and users should enter the correct **ID** and **Password** to log into the EWS.

---

## Set up and manage accounts in the EWS

The **Job Accounting** feature is enabled in the EWS. You can manage accounts and allow users to log in by entering an ID and password.

---

 **NOTE:** **Scan to WSD** does not support the **Job Accounting** feature when this feature is enabled because Windows does not support the Job Accounting ID/ Password for these jobs.

---

The UPD driver jobs are cancelled in the machine when the **Standard Accounting** option is selected or the account mode is set to “On” in the machine.

---

Follow these steps to enable the **Job Accounting** option:

1. Access the EWS, and then click the **Sign In** button in the upper-right of the EWS page.
2. Type in the correct **ID** and **Password** to log into the EWS.
3. In the EWS, click the **Security** tab.
4. In the left navigation pane, select **Accounting** and then click the **Accounting Methods** option.

5. Select the **Standard Accounting** option.

There are two options for Job Accounting:

- **No Accounting:** When this option is selected, the Job Accounting feature is disabled.
- **Standard Accounting:** When this option is selected, the user can select either the “ID/ Password” mode or “ID only” mode.

6. Click the **Add button** to add a user Account ID.

---

**NOTE:** The Standard Accounting feature supports up to 200 users.

---

### Set up an email account

---

**NOTE:** Make sure the network is connected to the printer.

---

You can set up an Address Book in the EWS and manage 200 individual contacts and 200 groups in the address book.

Follow these steps to set up an email account:

1. Access the EWS, and then click the **Sign In** button in the upper-right of the EWS page.
2. Type in the correct **ID** and **Password** to log into the EWS.
3. Click the **Settings** tab, and then select **Network Settings > SMTP**.
4. Enter the IP address in dotted decimal notation or as a host name.
5. Enter the server port number, from 1 to 65535.
6. Select the check box next to **SMTP Requires Authentication** to require authentication.
7. Enter the SMTP server login name and password.
8. Click the **Apply** button.

### Set up a server destination

---

**NOTE:** Make sure the network is connected to the printer.

---

Follow these steps to set up an email account:

1. Access the EWS, and then click the **Sign In** button in the upper-right of the EWS page.
2. Type in the correct **ID** and **Password** to log into the EWS.
3. Click the **Address Book** tab, and then select **Individual > Add**.
4. Select the check box next to **Add FTP** or **Add SMB**.
5. Enter the IP address in dotted decimal notation or as a host name.
6. Enter the server port number, from 1 to 65535.
7. Select the check box next to **Anonymous**, to enable the server permit access of unauthorized people.
8. Enter the login name and password.

9. Enter the domain name if your server is joined to the certain domain, otherwise just enter your computer name which is registered to the SMB.
10. Enter the path for saving the scanned image.

**NOTE:** The folder to save the scanned image must be on the root.

The folder properties need to be setup as a share.

Your user name should have the rights to read and write the folder.

---

11. Click the **Apply** button.

## Ordering supplies and accessories

 **NOTE:** Available accessories may differ from country/region to country/region. Contact your sales representatives to obtain the list of available supplies and maintenance parts.

## Available consumables

When supplies reach the end of their life span, you can order the following supplies for your machine:

| Type            | Description   | Part number |
|-----------------|---|-------------|
| Toner cartridge | Standard-capacity replacement black toner cartridge | W1333A      |
|                 | High-capacity replacement black toner cartridge     | W1333X      |
| Imaging unit    | Replacement imaging drum                            | CF257A      |

 **NOTE:** Depending on the options, percentage of image area and job mode used, the toner cartridge's lifespan may differ.

 **WARNING!** When purchasing new toner cartridges or other supplies, these must be purchased in the same country/region as the machine you are using. Otherwise, new toner cartridges or other supplies will be incompatible with your machine due to different configurations of toner cartridges and other supplies according to the specific country/region conditions.

 **CAUTION:** HP does not recommend using non-genuine HP toner cartridge such as refilled or remanufactured toner. HP cannot guarantee non-genuine HP toner cartridge's quality. Service or repair required as a result of using non-genuine HP toner cartridges will not be covered under the machine's warranty.

## Available accessories

You can purchase accessories to enhance your machine's performance and capacity. These accessories must be installed by a qualified HP authorized service provider, dealer, or the retailer where you bought the machine. Contact an HP authorized service or support provider to order an accessory.

 **NOTE:** Some features and optional goods may not be available depending on model or country/region.

| Accessory                  | Function  |
|----------------------------|---|
| Optional tray              | If you are experiencing frequent paper supply problems, you can attach an additional 250 <sup>3</sup> sheet tray. |
| Optional RADF <sup>b</sup> | Reverse Automatic Document Feeder.  |

<sup>a</sup> Plain paper 80 g/m<sup>2</sup> (20 lbs bond).

<sup>b</sup> For models where RADF is optional, CarePack installation is required and may vary depending on country/region of purchase or specific model.

## Available maintenance parts

To purchase maintenance parts, contact the source where you bought the machine. Replacing maintenance parts can be performed only by an authorized service provider, dealer, or the retailer where you bought the machine. The warranty does not cover the replacement of any maintenance parts once it has reached its "Average yield".

Maintenance parts are replaced at specific intervals to avoid print quality and paper feed problems resulting from worn parts, see table below. The purpose of which is to maintain your machine in top working condition. The maintenance parts below should be replaced when the life span of each item has been met.

| Parts                        | Average yield <sup>a</sup> |
|------------------------------|----------------------------|
| Transfer roller              | Approx. 100,000 pages      |
| Fuser unit                   | Approx. 100,000 pages      |
| MP Tray 1 pick up roller     | Approx. 100,000 pages      |
| Tray 2 pick up roller        | Approx. 100,000 pages      |
| MP Tray 1 Friction Pad       | Approx. 50,000 pages       |
| Tray 2 friction pad          | Approx. 50,000 pages       |
| Document feeder (ADF) Roller | Approx. 100,000 pages      |
| Document feeder (ADF) Rubber | Approx. 50,000 pages       |

<sup>a</sup> It will be affected by the operating system used, computing performance, application software, connecting method, media, media size, and job complexity.

## Storing the consumables

Consumables contain components that are sensitive to light, temperature, and humidity. HP suggests users follow these recommendations to ensure optimal performance, highest quality, and longest life from your new HP consumables.

Store the consumables in the same environment in which the printer will be used. This should be in controlled temperature and humidity conditions. The consumables should remain in their original and unopened package until installation.

If the consumables are removed from the printer, follow the instructions below to store the imaging unit properly.

- Store the cartridge inside the protective bag from the original package.
- Store lying flat (not standing on end) with the same side facing up as if it were installed in the machine.
- Do not store consumables in any of the following conditions:
  - Temperature greater than 40°C (104°F).
  - Humidity range less than 20% or greater than 80%.
  - An environment with extreme changes in humidity or temperature.
  - Direct sunlight or room light.
  - Dusty places.
  - A car for a long period of time.
  - An environment where corrosive gases are present.
  - An environment with salty air.

## Imaging unit handling instructions

- Opening the imaging unit package prior to use dramatically shortens its useful shelf and operating life. Do not store on the floor.
- If original packaging is not available, cover the top opening of the imaging unit with paper and store in a dark cabinet.
- Do not touch the surface of the photoconductive drum in the imaging unit.
- Do not expose the imaging unit to unnecessary vibrations or shock.
- Never manually rotate the drum, especially in the reverse direction; this can cause internal damage and toner spillage.

## Toner cartridge usage

HP cannot recommend the use of non-HP toner cartridges, either new or remanufactured.

**NOTE:** For HP printer products, the use of a non-HP toner cartridge or a refilled toner cartridge does not affect either the warranty to the customer or any HP support contract with the customer. However, if product failure or damage is attributable to the use of a non-HP toner cartridge or refilled toner cartridge, HP will charge its standard time and materials charges to service the product for the particular failure or damage.

## Estimated toner cartridge life

Print cartridge life is approximate, based on average A4 /Letter-size page count with ISO coverage. Declared cartridge yield value in accordance with ISO/IEC 19798. Actual yields vary considerably based on images printed and other factors. For more information, go to <http://www.hp.com/go/learnaboutsupplies>.

## Redistributing toner

When the toner cartridge is near the end of its life:

- White streaks or light printing occurs and/or density varies from side to side.
- The Status LED blinks red. The toner-related message saying that the toner is low may appear on the display.
- The computer's Printing Status program window appears on the computer telling you which cartridge is low on toner.

If this happens, you can temporarily improve print quality by redistributing the remaining toner in the cartridge. In some cases, white streaks or light printing will still occur even after you have redistributed the toner.

---

 **NOTE:** Illustrations on this user's guide may differ from your machine depending on its options or models. Check your machine type.

 **CAUTION:** If toner gets on your clothing, wipe it off with a dry cloth and wash clothing in cold water. Hot water sets toner into fabric.

---

1.

2.

3.

4.

5.

## Toner cartridge installation

1. Remove toner cartridge from shipping bag.

 **TIP:** Keep the orange plug in place. It is required for toner cartridge replacement.

2. Hold the toner cartridge as shown and rotate the toner cartridge end to end to redistribute toner in cartridge.

3. Pull the red or orange pull tab and remove it completely.

4. Align toner cartridge with the opening and push until toner cartridge locks into place. An audible click will indicate the cartridge is locked into place.

5. Close front door and right door.

## Imaging unit installation

**⚠ CAUTION:** Leave front and right door open until all installation steps are complete.

1. Remove imaging unit from shipping bag and place it on a clean flat surface.

2. Loosen shipping tape from the bottom and both sides.

3. Remove orange shipping locks from imaging unit.

4. Remove remaining shipping tape and pull protective sheet from imaging unit.

---

 **CAUTION:** Do not touch exposed drum roller surface.

---

---

 **NOTE:** Do not expose the imaging unit to light for more than a few minutes.

---

5. Remove orange plug on back of imaging unit.

---

**⚠ CAUTION:** Once the plug is removed, the imaging unit must remain level. Contents may spill out if the imaging unit is tipped.

---

6. With right and front doors **fully open**, carefully lift imaging unit into position, so the bottom of imaging unit aligns with the raised alignment rails inside printer cabinet as shown.

---

**⚠ CAUTION:** Do not touch exposed drum roller surface.

---

7. Install imaging unit and ensure it is fully seated.

---

 **NOTE:** If imaging unit binds or does not slide easily into cabinet, verify the right door is fully open, realign imaging unit, and install.

---

8. Connect the electrical cable as shown and route cable into holder as shown.

**⚠ CAUTION:** Make sure the connector is fully seated in the socket.

9. Install two screws as shown.

10. Ensure electrical connector is plugged in and fully seated. Ensure the two screws are securely installed.

## Monitoring the supplies life

If you experience frequent paper jams or printing problems, check the number of pages the machine has printed or scanned. Replace the corresponding parts, if necessary.

### NOTE:

- Some menus may not appear in the display depending on options or models. If so, it is not applicable to your machine.
- It may be necessary to press **OK** to navigate to lower-level menus for some models.

1. Select Menu  > **System Setup** > **Maintenance** > **Supplies Life** on the control panel.
2. Select the option you want and press **OK**.
3. Press the Stop/Clear  button to return to ready mode.

## Setting the toner low alert

If the amount of toner in the cartridge is low, a message or LED informing the user to change the toner cartridge appears. You can set the option for whether or not this message or LED appears.

**NOTE:** It may be necessary to press **OK** to navigate to lower-level menus for some models.

1. Select Menu  > **System Setup** > **Maintenance** > **Toner Low Alert** on the control panel.
2. Select the option you want.
3. Press **OK** to save the selection.

# Cleaning the machine

If printing quality problems occur or if you use your machine in a dusty environment, you need to clean your machine regularly to keep it in the best printing condition and use your machine longer.

---

## CAUTION:

- Cleaning the cabinet of the machine with cleaning materials containing large amounts of alcohol, solvents, or other strong substances can discolor or distort the cabinet.
  - If your machine or the surrounding area is contaminated with toner, we recommend you use a cloth or tissue dampened with water to clean it. If you use a vacuum cleaner, toner blows in the air and might be harmful to you.
- 

## Cleaning the outside

Clean the machine cabinet with a soft, lint-free cloth. Dampen the cloth slightly with water, but be careful not to let any water drip onto or into the machine.

## Cleaning the inside

During the printing process, paper, toner, and dust particles can accumulate inside the machine. This buildup can cause print quality problems, such as toner specks or smearing. Cleaning the inside of the machine clears and reduces these problems.

---

## CAUTION:

- To prevent damage to the toner cartridge, do not expose it to light for more than a few minutes. Cover it with a piece of paper, if necessary.
- Do not touch the green area of the toner cartridge. Use the handle on the cartridge to avoid touching this area.
- Use a dry lint free cloth when cleaning the inside of the machine, be careful not to damage the transfer roller or any other inside parts. Do not use solvents such as benzene or thinner. Printing quality problems can occur and cause damage to the machine.

## NOTE:

- Use a dry lint-free cloth to clean the machine.
  - Turn the machine off and unplug the power cord. Wait for the machine to cool down.
  - Illustrations on this user's guide may differ from your machine depending on its options or models. Check your machine type.
-

### NOTE:

- Turn the machine off and unplug the power cord. Wait for the machine to cool down.
  - Illustrations on this user's guide may differ from your machine depending on its options or models. Check your machine type
- 

1. Slightly dampen a soft, lint-free cloth or paper towel with water.
2. Lift and open the scanner lid.
3. Wipe the surface of the scanner until it is clean and dry.

# Update the firmware

The following steps explain how to download and update the firmware on the printer.

## Step one: Download the firmware from HP.com

1. Go to [www.hp.com/support](http://www.hp.com/support), select **Software and Drivers**, type the printer name in the search field, click **Find**, and then select the model from the list of search results.
2. If it is not automatically detected, select or change the operating system.
3. Under the **Firmware** or **Firmware-system** section, locate the Firmware Update Utility file.
4. Click **Download** and save the file to a location such as your Desktop or Downloads folder.
5. Open the location where the firmware file was saved, right-click the .zip file, and then extract the files.

## Step two: Update the firmware

Follow the appropriate steps for either a USB cable connection or a wired network connection.

### Method one: Update the firmware for a USB-connected printer (Windows XP/Vista/7/8/8.1/10)

Use this method to update the firmware if the printer is connected to the computer via a USB cable.

---

**NOTE:** In order to use this method, you must have a driver or full software solution installed.

---

1. Make sure the printer is connected to the computer via a USB cable and can successfully copy or print.
2. Turn the printer off.
3. Press and hold the Stop/Clear  button on the device control panel.
4. Turn the printer on, keeping the Stop/Clear  button pressed in until the control panel displays the following message: **Download mode, press stop or cancel key.**
5. Press the Stop/Clear  button again to enter Emergency Mode. A **Wait Image** messages displays on the control panel.
6. On your computer, navigate to the folder containing the files downloaded from HP.com.
7. Select the \*.hd firmware file and drag and drop it onto the usblast2.exe file. The firmware update will start automatically on the printer.
8. Once completed, the firmware update will reboot the printer automatically.
9. Print a configuration page to verify the installed firmware version after the update process.

### Method two: Update the firmware for a network-connected printer

Use this method to update the firmware if the printer is connected to the computer via a wired network.

---

**NOTE:** In order to use this method, you must use a computer browser to open the Embedded Web Server (EWS).

---

1. Print a configuration page to obtain your printer's IP address or host name.

2. Open a Web browser, and in the address line, type the IP address or host name exactly as it displays on the configuration page. Press the **Enter** key on the computer keyboard. The EWS opens.

 <https://10.10.XX.XXX/>

If the Web browser displays a **There is a problem with this website's security certificate** message when attempting to open the EWS, click **Continue to this website (not recommended)**.

 **NOTE:** Choosing **Continue to this website (not recommended)** will not harm the computer while navigating within the EWS for the HP printer.

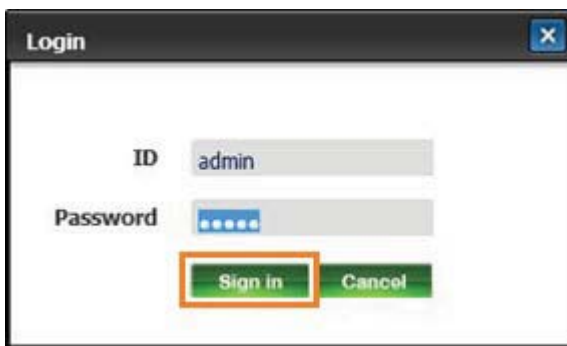

3. Select **Sign In** in the upper-right corner of the EWS page

Figure 9-1 EWS page

4. Enter your Username and Password.

 **NOTE:** If you have not yet created a password for the EWS, enter the default credentials of `admin` for both the **Username** and the **Password**.

5. Select the **Maintenance** tab.
6. Select the **Upgrade Wizard** button.

 **NOTE:** If you did not sign in to the EWS, this button will not be available.

7. Select **Browse** and browse to the location where you extracted the files.

8. Select the firmware file and click **Open**.
9. Select **Next** and then wait for the wizard to verify the firmware.
10. When prompted, check the firmware version, select **Next**, and then wait for the firmware to upload to the printer.

11. Wait for the firmware programming process to complete and for the printer to restart.

---

 **NOTE:** This process will take several minutes. Do not close the browser window or interrupt communication until the HP Embedded Web Server (EWS) displays the confirmation page.

---

12. Follow any remaining on-screen instructions to complete the installation.
13. Print a configuration page to verify the installed firmware version after the update process.

---

# 10 Useful Settings

This chapter explains how to browse the current status of your machine, and the method of setting for advanced machine setup.

- [Machine's initial set up](#)
- [Machine's basic settings](#)
- [Altitude adjustment](#)

## Machine's initial set up

After setting up the printer and connecting the printer to a power cable, follow these steps to set up a password:

1. Select your country from the list of countries.

---

**NOTE:** Depending on the country selected, the system will select the language.

---

2. Enter an eight-digit numerical pin code as a password, and then type the password again to confirm the password.

---

**NOTE:** If a password is not valid, “**Invalid input**” error message will display on the screen. Press the **OK** button.

---

## Machine's basic settings

To change the machine's default settings, follow these steps:

---

 **NOTE:** It may be necessary to press **OK** to navigate to lower-level menus for some models.

---

1. Select Menu  > **System Setup** > **Machine Setup** on the control panel.
2. Select the option you want, then press **OK**.

---

 **NOTE:** When you press the Power/Wake Up  button or start printing, the product will wake up from the power saving mode.

---

3. Select the option you want, then press **OK**.
4. Press **OK** to save the selection.
5. Press the Stop/Clear  button to return to ready mode.

The printer's settings are also available for viewing/modifying in the EWS.

# Altitude adjustment

Print quality is affected by atmospheric pressure, which is determined by the height of the machine above sea level. The following information will guide you on how to set your machine for the best print quality.

Before you set the altitude value, determine the altitude where you are.

|   |        |
|---|--------|
| 1 | High 4 |
| 2 | High 3 |
| 3 | High 2 |
| 4 | High 1 |
| 5 | Normal |

You can set the altitude in **System Setup** option on the machine's display.

## Paper feeding problems

The following table describes common paper feeding problems and suggested solutions for each one.

| Condition                             | Suggested solutions  |
|---------------------------------------|--|
| Paper sticks together.                | <ul style="list-style-type: none"><li>• Check the maximum paper capacity of the tray.</li><li>• Make sure that you are using the correct type of paper.</li><li>• Remove paper from the tray and flex the paper.</li><li>• Humid conditions may cause some paper to stick together.</li></ul>  |
| Multiple sheets of paper do not feed. | Different types of paper may be stacked in the tray. Load paper of only one type, size, and weight.  |
| Paper does not feed into the machine. | <ul style="list-style-type: none"><li>• Paper trays are not properly reset prior to loading paper.</li><li>• Remove any obstructions from inside the machine.</li><li>• Paper has not been loaded correctly. Remove paper from the tray and reload it correctly.</li><li>• There is too much paper in the tray. Remove excess paper from the tray.</li><li>• The paper is too thick. Use only paper that meets the specifications required by the machine.</li></ul>                             |
| The paper keeps jamming.              | <ul style="list-style-type: none"><li>• Paper trays are not properly reset prior to loading paper.</li><li>• There is too much paper in the tray. Remove excess paper from the tray. If you are printing on special materials, use the manual feeding in tray.</li><li>• An incorrect type of paper is being used. Use only paper that meets the specifications required by the machine.</li><li>• There may be debris inside the machine. Open the front cover and remove any debris.</li></ul> |

**IMPORTANT:** Pushing down on the lift plate is necessary when adding paper to an empty tray.

# Clearing jams

## Introduction

The following topics describe how to clear paper jams in several locations inside the printer and the scanner.

 **NOTE:** To avoid tearing the paper, pull the jammed paper out slowly and gently.

Illustrations on this user's guide may differ from your printer depending on its model or optional goods.

- [Tray 2](#)
- [In Multi-purpose Tray 1](#)
- [Inside the printer](#)
- [In the exit area](#)
- [In the duplex unit area](#)
- [Clearing original document jams](#)

## Tray 2

1. Pull out the tray.

2. Remove the jammed paper by gently pulling it straight out.

3. Insert the tray back into the printer until it snaps into place.

## In Multi-purpose Tray 1

- ▲ Remove the jammed paper by gently pulling it straight out.

## Inside the printer

1. Open the side cover.

2. Open the jam guide and remove the jammed paper.

3. Open the fuser jam cover and remove the jammed paper.

4. Close the side cover.

## In the exit area

**⚠ CAUTION:** The fuser area is hot. Take care when removing paper from the printer.

1. Remove the jammed paper by gently pulling it straight out.

If you do not see the paper in this area, stop and go to next step:

2. Open the side cover.

3. Remove the jammed paper from the exit unit or fuser unit.

4. Close the side cover.

## In the duplex unit area

1. Open the side cover.

2. Remove the jammed paper from the transfer roller assembly.

3. Release the transfer roller assembly and remove the jammed paper.

4. Close the side cover.

## Clearing original document jams

 **NOTE:** To prevent document jams, use the scanner glass for thick, thin or mixed paper originals.

 **CAUTION:** To avoid tearing the document, remove the jammed document slowly and carefully.

### Original paper jam in front of scanner

1. Open the document feeder cover.

2. Gently remove the original carefully from the document feeder.

3. Close the document feeder cover.

## Original paper jam inside of scanner

1. Open the document feeder cover.

2. Gently remove the original carefully from the document feeder.

If you do not see the paper in this area, stop and go to next step:

3. Open the scanner lid.

4. Grasp the misfeed original, and remove the paper from the feed area by carefully pulling it.

5. Close the scanner lid.

6. Close the document feeder cover.

## Original paper jam in exit area of scanner

1. Open the Cover-Open and lift up the stacker.

2. Gently remove the original carefully from the document feeder.

3. Close the Cover-Open and pull down the stacker.

## Original paper jam in scanner duplex path

1. Open the document feeder cover.

2. Open the duplex jam cover. Pull the original document gently out of the document feeder.

3. Close the duplex jam cover and document feeder cover.

# Understanding the status LED

The color of the LED indicates the machine's current status.

**NOTE:**

- Some LEDs may not be available depending on model or country/region.
- To resolve the error, look at the error message and its instructions from the troubleshooting part.
- You also can resolve the error with the guideline from the computer's Printing Status window.
- If the problem persists, call a service representative.

| LED    | Status | Description  |  |   |
|--------|--------|--|--|---|
| Status | Off    | <ul style="list-style-type: none"> <li>• The machine is off-line.</li> <li>• The machine is in power save mode.</li> </ul> |  |   |
|        | Green  | Blinking   | When the backlight blinks, the machine is receiving or printing data.  |   |
|        |        | On   | <ul style="list-style-type: none"> <li>• The machine is on-line and can be used.</li> </ul>  |   |
|        | Red    | Blinking   | <ul style="list-style-type: none"> <li>• A minor error has occurred and the machine is waiting for the error to be cleared. Check the display message. When the problem is cleared, the machine resumes.</li> <li>• Small amount of toner is left in the cartridge. The estimated cartridge life<sup>a</sup> of toner is close. Prepare a new cartridge for replacement. You may temporarily increase the printing quality by redistributing the toner.<sup>b</sup></li> </ul> |   |
|        |        |  | On   | <ul style="list-style-type: none"> <li>• A toner cartridge has almost reached its estimated cartridge life<sup>a</sup>. It is recommended to replace the toner cartridge.</li> <li>• The cover is opened. Close the cover.</li> <li>• There is no paper in the tray. Load paper in the tray.</li> <li>• The machine has stopped due to a major error. Check the display message.</li> <li>• A paper jam has occurred.</li> <li>• An imaging unit has almost reached its estimated cartridge life<sup>c</sup>. It is recommended to replace the toner cartridge</li> </ul> |
|        |        | Power / Wake Up                         | White  | On  |
|        |        |  | Off  | The machine is in ready mode or machine's power is off.   |

<sup>a</sup> Print cartridge life is approximate, based on average A4 /Letter-size page count with ISO coverage. Declared cartridge yield value in accordance with ISO/IEC 19798. Actual yields vary considerably based on images printed and other factors. For more information, go to <http://www.hp.com/go/learnaboutsupplies>. Some amount of toner may remain in the cartridge even when the red LED is on and the printer stops printing.

<sup>b</sup> Some LEDs may not be available depending on model or country/region.

<sup>c</sup> When the imaging unit has reached its end of life, the machine will stop printing. In this case, you can choose to stop or continue printing from the Web Service (**Settings > Machine Settings > System > Setup > Supplies Management > Imaging Unit Stop**). Turning off this option and continuing to print may damage the device's system.

## Understanding display messages

Messages appear on the control panel display to indicate the machine's status or errors. Refer to the tables below to understand the messages and their meaning, and correct the problem, if necessary.

### NOTE:

- You can resolve the error with the guideline from the computer's Printing Status program window.
- If a message is not in the table, reboot the power and try the printing job again. If the problem persists, call a service representative.
- When you call for service, provide the service representative with the contents of display message.
- Some messages may not appear on the display depending on the model or optional goods.
- [error number] indicates the error number.
- [tray type] indicates the tray number.
- [media type] indicates the media type.
- [media size] indicates the media size.
- [unit type] indicates the unit type.

Consider having a replacement available to install when print quality is no longer acceptable. The cartridge does not need to be replaced now unless the print quality is no longer acceptable.

**! CAUTION:** For HP printer products, the use of a non-HP toner cartridge or a refilled toner cartridge does not affect either the warranty to the customer or any HP support contract with the customer. However, if product failure or damage is attributable to the use of a non-HP toner cartridge or refilled toner cartridge, HP will charge its standard time and materials charges to service the product for the particular failure or damage.

|   | If a system error occurs, contact your service representative.  |  |
|   | The connection cable between the computer and the machine is not connected properly.  | Disconnect the machine cable and reconnect it.   |
|   | The connection cable between the computer and the machine is defective.   | If possible, attach the cable to another computer that is working properly and print a job. You can also try using a different machine cable.  |
|   | The port setting is incorrect.  | Check the Windows printer settings to make sure that the print job is sent to the correct port. If the computer has more than one port, make sure that the machine is attached to the correct one.             |
|   | The machine may be configured incorrectly.  | Check the <b>Printing Preferences</b> to ensure that all of the print settings are correct.  |
|   | The printer driver may be incorrectly installed.  | Uninstall and reinstall the machine's driver.  |
|   | The machine is malfunctioning.  | Check the display message on the control panel to see if the machine is indicating a system error. Contact a service representative.   |
| <b>The machine selects print materials from the wrong paper source.</b> | The document size is so big that the hard disk space of the computer is insufficient to access the print job.   | Get more hard disk space and print the document again.   |
|   | The output tray is full.  | Once the paper is removed from the output tray, the machine resumes printing.  |
|   | The paper option that was selected in the <b>Printing Preferences</b> may be incorrect.   | For many software applications, the paper source selection is found under the Paper tab within the <b>Printing Preferences</b> . Select the correct paper source. See the printer driver help screen.          |
| <b>A print job is extremely slow.</b>                                   | The job may be very complex.  | Reduce the complexity of the page or try adjusting the print quality settings.   |
| <b>Half the page is blank.</b>  | The page orientation setting may be incorrect.  | Change the page orientation in your application.   |

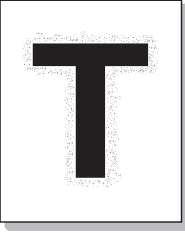

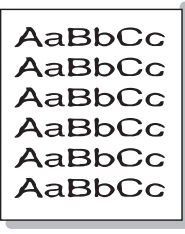

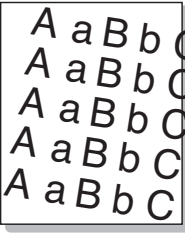

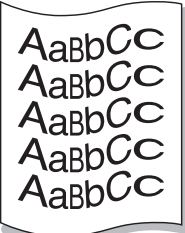

| Condition  | Possible cause  | Suggested solutions  |
|--|---|--|
|  | The paper size and the paper size settings do not match.            | Ensure that the paper size in the printer driver settings matches the paper in the tray. Or, ensure that the paper size in the printer driver settings matches the paper selection in the software application settings you use.                     |
| <b>The machine prints, but the text is wrong, garbled, or incomplete.</b>  | The machine cable is loose or defective.                            | Disconnect the machine cable and reconnect. Try a print job that you have already printed successfully. If possible, attach the cable and the machine to another computer that you know works and try a print job. Finally, try a new machine cable. |
|  | The wrong printer driver was selected.                              | Check the application's printer selection menu to ensure that your machine is selected.  |
|  | The software application is malfunctioning.                         | Try printing a job from another application.   |
|  | The operating system is malfunctioning.                             | Exit Windows and reboot the computer. Turn the machine off and back on again.  |
| <b>Pages print, but they are blank.</b>  | The toner cartridge is defective or out of toner.                   | Redistribute the toner, if necessary. If necessary, replace the toner cartridge.   |
|  | The file may have blank pages.                                      | Check the file to ensure that it does not contain blank pages.   |
|  | Some parts, such as the controller or the board, may be defective.  | Contact a service representative.  |
| <b>The machine does not print PDF files correctly. Some parts of graphics, text, or illustrations are missing.</b> | Incompatibility between the PDF file and the Acrobat products.      | Printing the PDF file as an image may enable the file to print. Turn on Print As Image from the Acrobat printing options.<br><br><b>NOTE:</b> It will take longer to print when you print a PDF file as an image.                                    |
| <b>The print quality of photos is not good. Images are not clear.</b>  | The resolution of the photo is very low.                            | Reduce the photo size. If you increase the photo size in the software application, the resolution will be reduced.   |
| <b>Before printing, the machine emits vapor near the output tray.</b>  | Using damp/wet paper can cause vapor [white smoke] during printing. | This is not a problem, just keep printing. If you are bothered by the smoke [vapor], then replace the paper with fresh paper from an unopened ream.  |
| <b>The machine does not print special-sized paper, such as billing paper.</b>                                      | Paper size and paper size setting do not match.                     | Set the correct paper size in the <b>Custom</b> in <b>Paper</b> tab in <b>Printing Preferences</b> .   |
| <b>The printed billing paper is curled.</b>  | The paper type setting does not match.                              | Change the printer option and try again. Go to <b>Printing Preferences</b> , click <b>Paper</b> tab, and set type to <b>Thin</b> .   |

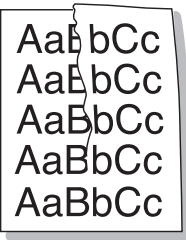

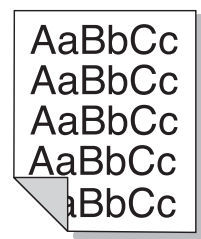

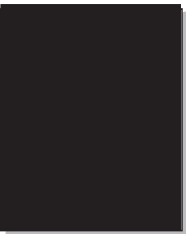

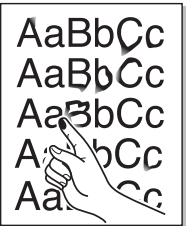

# Printing quality problems

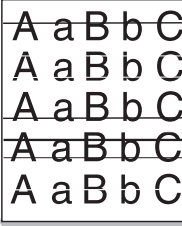

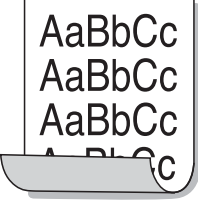

The following table describes common printing quality problems, shows examples of each one, and lists suggested solutions.

| Condition   | Example   | Suggested solutions   |
|---|---|---|
| Light or faded print  |    | <ul style="list-style-type: none"> <li>• If a vertical white streak or faded area appears on the page, the toner supply is low. Install a new toner cartridge.</li> <li>• The paper may not meet paper specifications; for example, the paper may be too moist or rough.</li> <li>• If the entire page is light, the print resolution setting is too low or the toner save mode is on. Adjust the print resolution and turn the toner save mode off. See the help screen of the printer driver.</li> <li>• A combination of faded or smeared defects may indicate that the toner cartridge needs cleaning. Clean the inside of your machine.</li> <li>• The surface of the LSU part inside the machine may be dirty. Clean the inside of your machine. ## Copying problems

The following table describes common copying problems and suggested solutions.

| Condition  | Suggested solutions   |
|--|---|
| Copies are too light or too dark.                | Adjust the darkness in copy feature to lighten or darken the backgrounds of copies.   |
| Smears, lines, marks, or spots appear on copies. | <ul style="list-style-type: none"><li>• If the defects are on the original, adjust darkness in copy feature to lighten the background of your copies.</li><li>• If there are no defects on the original, clean the scan unit.</li></ul>   |
| Copy image is skewed.                            | <ul style="list-style-type: none"><li>• Ensure that the original is aligned with the registration guide.</li><li>• The transfer roller may be dirty. Clean the inside of your machine.</li></ul>  |
| Blank copies print out.                          | Ensure that the original is face down on the scanner glass or face up in the document feeder.<br>If these steps do not correct the problem, contact a service representative.   |
| Image rubs off the copy easily.                  | <ul style="list-style-type: none"><li>• Replace the paper in the tray with paper from a new package.</li><li>• In high humidity areas, do not leave paper in the machine for extended periods of time.</li></ul>  |
| Frequent copy paper jams occur.                  | <ul style="list-style-type: none"><li>• Fan the paper, then turn it over in the tray. Replace the paper in the tray with a fresh supply. Check/adjust the paper guides, if necessary.</li><li>• Ensure that the paper is the proper type and weight.</li><li>• Check for copy paper or pieces of copy paper remaining in the machine after a paper jam has been cleared.</li><li>• Your originals may contain pictures, solids, or heavy lines. For example, your originals may be forms, newsletters, books, or other documents that use more toner.</li><li>• The scanner lid may be left open while copies are being made.</li><li>• Turn the machine off and back on.</li></ul> |

# Scanning problems

The following table describes common scanning problems and suggested solutions.

| Condition  | Suggested solutions  |
|--|--|
| The scanner does not work.   | <ul style="list-style-type: none"><li>• Make sure that you place the original to be scanned face down on the scanner glass, or face up in the document feeder.</li><li>• There may not be enough available memory to hold the document you want to scan. Try the Prescan function to see if that works. Try lowering the scan resolution rate.</li><li>• Check that the machine printer cable is connected properly.</li><li>• Make sure that the machine printer cable is not defective. Switch the printer cable with a known good cable. If necessary, replace the printer cable.</li><li>• Check that the scanner is configured correctly. Check scan setting in the application you want to use to make certain that the scanner job is being sent to the correct port (for example, USB001).</li></ul> |
| The unit scans very slowly.  | <ul style="list-style-type: none"><li>• Check if the machine is printing received data. If so, scan the document after the received data has been printed.</li><li>• Graphics are scanned more slowly than text.</li></ul>   |
| Message appears on your computer screen: <ul style="list-style-type: none"><li>• Device can't be set to the H/W mode you want.</li><li>• Port is being used by another program.</li><li>• Port is disabled.</li><li>• Scanner is busy receiving or printing data. When the current job is completed, try again.</li><li>• Invalid handle.</li><li>• Scanning has failed.</li></ul> | <ul style="list-style-type: none"><li>• There may be a copying or printing job in progress. Try your job again when that job is finished.</li><li>• The selected port is currently being used. Restart your computer and try again.</li><li>• The machine printer cable may be improperly connected or the power may be off.</li><li>• The scanner driver is not installed or the operating environment is not set up properly.</li><li>• Ensure that the machine is properly connected and the power is on, then restart your computer.</li><li>• The USB cable may be improperly connected or the power may be off.</li></ul>  |

## Operating system problems

| Condition   | Suggested solutions  |
|---|--|
| "File in Use" message appears during installation.  | Exit all software applications. Remove all software from the startup group, then restart Windows. Reinstall the printer driver.  |
| "General Protection Fault", "Exception OE", "Spool 32", or "Illegal Operation" messages appear. | Close all other applications, reboot Windows and try printing again.   |
| "Fail To Print", "A printer timeout error occurred" message appear.                             | These messages may appear during printing. Just keep waiting until the machine finishes printing. If the message appears in ready mode or after printing has completed, check the connection and/or whether an error has occurred.   |
| Machine information is not displayed when you click the device in the Devices and Printers.     | Check the <b>Printer properties</b> . Click the <b>Ports</b> tab.<br><b>(Control Panel &gt; Devices and Printers &gt; Right-click on your printer icon and select Printer properties)</b><br>If the port is set to File or LPT, uncheck them and select TCP/IP, USB, or WSD. |

**NOTE:** Refer to the Microsoft Windows User's Guide that came with your computer for further information on Windows error messages.
