

# Maintenance and Service Guide

## **SUMMARY**

This guide provides information about spare parts, removal and replacement of parts, security, backing up, and more.

## Product notice

This guide describes features that are common to most models. Some features may not be available on your computer.

Not all features are available in all editions or versions of Windows. Systems may require upgraded and/or separately purchased hardware, drivers, software or BIOS update to take full advantage of Windows functionality. Windows 10 is automatically updated, which is always enabled. ISP fees may apply and additional requirements may apply over time for updates. Go to <http://www.microsoft.com> for details.

To access the latest user guides, go to <http://www.hp.com/support>, and follow the instructions to find your product. Then select **Manuals**.

## Software terms

By installing, copying, downloading, or otherwise using any software product preinstalled on this computer, you agree to be bound by the terms of the HP End User License Agreement (EULA). If you do not accept these license terms, your sole remedy is to return the entire unused product (hardware and software) within 14 days for a full refund subject to the refund policy of your seller.

For any further information or to request a full refund of the price of the computer, please contact your seller.

## Important notice about Customer Self-Repair parts

Your computer includes Customer Self-Repair parts and parts that should be accessed by only an authorized service provider.

---

**IMPORTANT:** See "Removal and replacement procedures for Customer Self-Repair parts" for details.

Accessing parts described in "Removal and replacement procedures for authorized service provider parts" can damage the computer or void your warranty.

---

## Safety warning notice

Reduce the possibility of heat-related injuries or of overheating the computer by following the practices described.

---

 **WARNING!** To reduce the possibility of heat-related injuries or of overheating the computer, do not place the computer directly on your lap or obstruct the computer air vents. Use the computer only on a hard, flat surface. Do not allow another hard surface, such as an adjoining optional printer, or a soft surface, such as pillows or rugs or clothing, to block airflow. Also, do not allow the AC adapter to come into contact with the skin or a soft surface, such as pillows or rugs or clothing, during operation. The computer and the AC adapter comply with the user-accessible surface temperature limits defined by applicable safety standards.

# 1 Product description

This table provides detailed product information.

**Table 1-1 Product components and their descriptions**

Category	Description
<b>Product Name</b>	HP EliteBook x360 830 G7 Notebook PC
<b>Processors</b>	<p><b>10th Generation Intel® Core™ processors</b></p> <p>Intel Core i7-10810U (1.1 GHz [turbo up to 4.9 GHz], 6 cores, 12 MB L3 cache, 15 W)</p> <p>Intel Core i7-10710U (1.8 GHz [turbo up to 4.7 GHz], 6 cores, 12 MB L3 cache, 15 W)</p> <p>Intel Core i7-10610U (1.8 GHz [turbo up to 4.9 GHz], 4 cores, 8 MB L3 cache, 15 W)</p> <p>Intel Core i7-10510U (1.8 GHz [turbo up to 4.9 GHz], 4 cores, 8 MB L3 cache, 15 W)</p> <p>Intel Core i5-10310U (1.7 GHz [turbo up to 4.4 GHz], 4 cores, 6 MB L3 cache, 15 W)</p> <p>Intel Core i5-10210U (1.6 GHz [turbo up to 4.2 GHz], 4 cores, 6 MB L3 cache, 15 W)</p>
<b>Graphics</b>	<p><b>Internal graphics</b></p> <p>Intel UHD Graphics Premium</p> <p>Supports HD Decode, DX12, and HDMI 1.4b, HDCP 2.3 via DisplayPort up to 4 K @ 60 Hz</p> <p>Supports maximum of two independent displays when on the HP USB-C Dock G5: Max. resolution = FHD @ 60 Hz (DisplayPort1) and FHD @ 60 Hz (DisplayPort2) or FHD @ 60 Hz (DisplayPort) and FHD @ 60 Hz (HDMI) or 2.5 K @ 60 Hz (one HDMI Port) or 2.5 K @ 60 Hz (one DisplayPort) and 2.5 K @ 60 Hz (Type-C output port using a Type C-to-DisplayPort adapter)</p> <p>Supports maximum of three independent displays when on the HP USB-C/A Universal Dock G2: Max. resolution = 2.5K @60Hz (DisplayPort1) and 2.5 K @ 60 Hz (DisplayPort2) and 2.5 K @ 60 Hz (HDMI) or 4 K @ 60 Hz (one HDMI port) or 4 K @ 60 Hz (one DisplayPort) and 4 K @ 60 Hz (Type-C output port using a Type C-to-DisplayPort adapter)</p> <p>Supports maximum of three independent displays when on the HP Thunderbolt Dock 120 W G2: Max. resolution = 2.5 K @ 60 Hz (DisplayPort1) and 2.5 K @ 60 Hz (DisplayPort2) and FHD (VGA) or 4 K @ 60 Hz (one DisplayPort) and 4 K @ 60 Hz (Type-C output port using a Type C-to-DisplayPort adapter)</p>
<b>Display</b>	<p><b>33.8 cm (13.3 in), LED, full high definition (FHD) (1920 × 1080), narrow bezel, UWVA, bent, camera shutter, touch screen</b></p> <p>250 nits, 45% CG, BrightView, eDP, HD camera</p> <p>250 nits, 45% CG, BrightView, eDP, HD camera, WWAN</p> <p>400 nits, sRGB 100%, BrightView, eDP + PSR, low power, ambient light sensor, HD + IR camera</p> <p>400 nits, sRGB 100%, BrightView, eDP + PSR, low power, ambient light sensor, HD + IR camera, WWAN</p> <p>400 nits, sRGB 100%, antiglare, eDP + PSR, low power, ambient light sensor, HD + IR camera</p> <p>400 nits, sRGB 100%, antiglare, eDP + PSR, low power, ambient light sensor, HD + IR camera, WWAN</p> <p>1000 nits, 72% CG, BrightView, eDP + PSR, Sure View Reflect, ambient light sensor, Sure View Reflect, HD camera</p>

**Table 1-1 Product components and their descriptions (continued)**

Category	Description
	1000 nits, 72% CG, BrightView, eDP + PSR, Sure View Reflect, ambient light sensor, Sure View Reflect, HD camera, WWAN
	1000 nits, 72% CG, antiglare, eDP + PSR, Sure View Reflect, ambient light sensor, Sure View Reflect, HD + IR camera
	1000 nits, 72% CG, antiglare, eDP + PSR, Sure View Reflect, ambient light sensor, Sure View Reflect, HD + IR camera, WWAN
<b>Memory</b>	One customer-accessible memory module slot supporting up to 32 GB of RAM
	DDR4-2666 single-channel support
	Supports the following configurations:
	<ul style="list-style-type: none"> <li>• 32 GB (32 × 1)</li> <li>• 16 GB (16 × 1)</li> <li>• 8 GB (8 × 1)</li> </ul>
<b>Operating system recovery</b>	32 GB eMMC (On-board embedded MultiMedia Controller)
<b>Primary storage</b>	<b>M.2 2280 solid-state drives (NGFF)</b>
	<ul style="list-style-type: none"> <li>• 1 TB, PCIe, Gen3 × 4, NVMe, SS, TLC</li> <li>• 512 GB, PCIe, Gen3 × 2 × 2, SS QLC + 32 GB Intel Optane™ memory</li> <li>• 512 GB, PCIe, Gen3 × 4, NVMe, SS, TLC</li> <li>• 512 GB, PCIe, Gen3 × 4, NVMe, SS, TLC (OPAL 2)</li> <li>• 512 GB, PCIe, NVMe, SS, value</li> <li>• 256 GB, PCIe, Gen3 × 2 × 2, SS QLC + 16 GB Intel Optane memory</li> <li>• 256 GB, PCIe, Gen3 × 4, NVMe, SS, TLC</li> <li>• 256 GB, PCIe, TLC (OPAL 2)</li> <li>• 256, PCIe, NVMe, SS, value</li> <li>• 128 GB, SATA-3, SS, TLC</li> </ul>
<b>Audio and video</b>	HP Bang & Olufsen Audio
	Stereo speakers (2), 11 mm × 34 mm × 4 mm with 3× magnet speaker drivers
	Microphone (multi-array including rear-facing camera)
	Camera, HD RGB 720p
	Camera, HD RGB 720p + IR (infrared)
	Camera privacy cover
	Supports WDR (Wide Dynamic Range)
<b>RJ-45 (network) jack</b>	No direct Ethernet support, available via accessories
	The following support S4/S5 wake on LAN (via out of band) and S0/S0ix/S4/S5 MPAT (via out of band): HP USB-C Mini Dock, HP USB-C/A Universal Dock G2, HP USB-C Dock G5, HP USB-C Dock G4 3, HP Thunderbolt Dock G2, and HP USB-C Mini Dock.

**Table 1-1 Product components and their descriptions (continued)**

Category	Description
<b>Wireless</b>	<b>Wireless Local Area Network (WLAN)</b> (select products only)
	Intel Wi-Fi 6 AX201 + Bluetooth® 5 (802.11ax 2 × 2) (non-vPro)
	Intel Wi-Fi 6 AX201 + Bluetooth 5 (802.11ax 2 × 2) (vPro)
	Compatible with Miracast® devices
	Two WLAN antennas configured at top of panel
	Supports HP Connection Optimizer (with data analytics)
	UEFI Wi-Fi (Wireless imaging/image recovery/BitLocker unlock)
	Intel BT audio offload
	Supports Static BIOS SAR for Intel modules
	Supports HP Extended Range Wireless LAN
	Supports HP LAN-Wireless Protection (WLAN/LAN/WWAN switching)
	<b>Near Field Communication (NFC)</b> (select products only)
	NXP NPC300 Near Field Communication Module
	NFC antenna
	<b>WWAN</b> (select products only)
	Intel XMM™ 7360 LTE-Advanced (Cat 9)
	Intel XMM 7560 LTE-Advanced Pro (Cat 16)
	Two WWAN antennas (worldwide 5 band, configured in computer base)
	Four WWAN antennas (worldwide, 2 at top of panel, 2 in computer base)
	WWAN cards are compatible with a programmable removable eSIM
Supports WWAN after market option	
<b>Ports</b>	HDMI v1.4
	Audio-out (headphone)/audio-in (microphone) combo jack
	(2) USB 3.1 Gen 1 Type C® with Thunderbolt™
	USB 3.1 Gen 1 port
	USB 3.1 Gen 1 charging port
	AC Smart Pin adapter plug, 4.5 mm
<b>Sensors</b>	Ambient light sensor (ALS)
	Magnetometer
	Gyroscope
	Accelerometer
	Hall sensor
<b>Keyboard/pointing devices</b>	<b>HP Premium Keyboard</b>

**Table 1-1 Product components and their descriptions (continued)**

<b>Category</b>	<b>Description</b>
	Backlit, spill resistant, HP Dura Keys
	Backlit, spill resistant, HP Dura Keys, privacy
	Not backlit, spill resistant, HP Dura Keys
	<b>Touchpad</b>
	Firmware PTP
	Microsoft® precision touchpad default gestures support
	No hybrid mode support
<b>Power requirements</b>	<b>Battery</b>
	3 cell, 53 Whr, lithium polymer, HP Long Life
	HP Fast Charge Technology
	<b>Smart AC adapters</b>
	65 W, right angle, 4.5 mm
	65 W, right angle, 4.5 mm, for use in Argentina
	65 W, right angle, 4.5 mm, EM
	65 W, straight, USB Type-C®
	65 W, slim, USB Type-C
	45 W, right angle, 4.5 mm
	45 W, right angle, 4.5 mm, for use in Argentina
	45 W, right angle, 4.5 mm, 2 prong
	<b>Power cord</b>
	3 wire, C5, 1.0 m, premium
	3 wire, C5, 1.0 m conventional
	2 wire, C7, 1.0 m, conventional
<b>Security</b>	Trusted Platform Module (TPM) 2.0, Infineon, soldered down
	Touch fingerprint sensor (select products only)
	Nano security lock
	Smart card reader (active) (select products only)
	Preboot authentication (password, smart card)
	SecureBIO capable
	Hardware enforced firmware protection: HP Hardware Root of Trust + Sure Start Gen6
<b>Operating system</b>	Windows® 10 Home 64
	Windows 10 Home 64 Advanced
	Windows 10 Home 64 Advanced Single Language

	Microsoft WHQL
	<b>Tested and documented</b>
	Windows 10 Enterprise 64 LTSC 1809 (available only by request)
	<b>Web-only support</b>
	Windows 10 Enterprise 64
<b>Serviceability</b>	<b>End user replaceable parts</b>
	AC adapter
	Memory module
	Solid-state drive
	WLAN module
	WWAN module

## 2 Components

Your computer features top-rated components. This chapter provides details about your components, where they are located, and how they work.

### Right side

Use the illustration and table to identify the components on the right side of the computer.

**Table 2-1** Right-side components and their descriptions

Component	Description
(1)	nano SIM card slot (select products only)  Supports a wireless subscriber identity module (nano SIM) card.  <b>IMPORTANT:</b> Inserting a SIM card of the wrong size could damage the SIM card or cause the SIM card to become stuck in the slot. To prevent damage to the SIM card or the connectors, use minimal force when inserting a SIM card.  <b>NOTE:</b> Before purchasing a SIM card, follow these instructions to determine the correct SIM card size for your computer: <ol style="list-style-type: none"><li>1. Go to <a href="http://www.hp.com/support">http://www.hp.com/support</a>, and then search for your computer by product name or number.</li><li>2. Select <b>Product Information</b>.</li><li>3. Refer to the listed options to determine which card to purchase.</li></ol>
(2) 	USB Type-C® power connector and Thunderbolt™ ports (2) with HP Sleep and Charge  Connect an AC adapter that has a USB Type-C connector, supplying power to the computer and, if needed, charging the computer battery.  - and -  Connect a USB device, provides high-speed data transfer, and charges small devices, even when the computer is off.  - and -  Connect a display device that has a USB Type-C connector, providing DisplayPort™ output.  <b>NOTE:</b> Your computer might also support a Thunderbolt docking station.  <b>NOTE:</b> Cables, adapters, or both (purchased separately) might be required.

**Table 2-1 Right-side components and their descriptions (continued)**

Component	Description
(3)  HDMI port	Connects an optional video or audio device, such as a high-definition television, any compatible digital or audio component, or a high-speed High-Definition Multimedia Interface (HDMI) device.
(4) Battery light	<p>When AC power is connected:</p> <ul style="list-style-type: none"> <li>• White: The battery charge is greater than 90%.</li> <li>• Amber: The battery charge is from 0 to 90%.</li> <li>• Off: The battery is not charging.</li> </ul> <p>When AC power is disconnected (battery not charging):</p> <ul style="list-style-type: none"> <li>• Blinking amber: The battery has reached a low battery level. When the battery has reached a critical battery level, the battery light begins blinking rapidly.</li> <li>• Off: The battery is not charging.</li> </ul>
(5)  Power connector	Connects an AC adapter.

## Left side

Use the illustration and table to identify the components on the left side of the computer.

**Table 2-2 Left-side components and their descriptions**

Component	Description
(1) Security cable slot	Attaches an optional security cable to the computer. <b>NOTE:</b> The security cable is designed to act as a deterrent, but it might not prevent the computer from being mishandled or stolen.
(2)  USB SuperSpeed port with HP Sleep and Charge	Connects a USB device, provides high-speed data transfer, and charges small devices, even when the computer is off.
(3)  USB SuperSpeed port	Connects a USB device, provides high-speed data transfer, and (for select products) charges small devices when the computer is on or in Sleep mode.
(4)  Audio-out (headphone)/Audio-in (microphone) combo jack	Connects optional powered stereo speakers, headphones, earbuds, a headset, or a television audio cable. Also connects an optional headset microphone. This jack does not support optional standalone microphones.

**Table 2-2 Left-side components and their descriptions (continued)**

Component	Description
	<p><b>WARNING!</b> To reduce the risk of personal injury, adjust the volume before putting on headphones, earbuds, or a headset. For additional safety information, see the <i>Regulatory, Safety, and Environmental Notices</i>.</p> <p>To access this guide:</p> <ul style="list-style-type: none"> <li>▲ Type <i>HP Documentation</i> in the taskbar search box, and then select <b>HP Documentation</b>.</li> </ul> <p><b>NOTE:</b> When a device is connected to the jack, the computer speakers are disabled.</p>
(5) SC Smart card reader	Supports optional smart cards.

## Display

The computer display can include essential components such as speakers, antennas, cameras, and microphones.

**Table 2-3 Display components and their descriptions**

Component	Description
(1) WLAN antennas* (select products only)	Send and receive wireless signals to communicate with wireless local area networks (WLANs).
(2) Camera light(s)	On: One or more cameras are in use.
(3) Internal microphones	Record sound.

**Table 2-3 Display components and their descriptions (continued)**

Component	Description
(4) Camera (select products only)	Allows you to video chat, record video, and record still images. Some cameras also allow a facial recognition logon to Windows, instead of a password logon. <b>NOTE:</b> Camera functions vary depending on the camera hardware and software installed on your product.
(5) Camera privacy cover	By default, the camera lens is uncovered, but you can slide the camera privacy cover to block the camera's view. To use the camera, slide the camera privacy cover in the opposite direction to reveal the lens. <b>NOTE:</b> If you have both front-facing and rear-facing cameras, when one camera lens is revealed and ready to use, the other is concealed.
(6) Ambient light sensor (select products only)	Adjusts the brightness of the display, depending on the ambient light.

\*The antennas are not visible from the outside of the computer. For optimal transmission, keep the areas immediately around the antennas free from obstructions.

For wireless regulatory notices, see the section of the *Regulatory, Safety, and Environmental Notices* that applies to your country or region.

To access this guide:

- ▲ Type `HP Documentation` in the taskbar search box, and then select **HP Documentation**.

## Keyboard area

Keyboards can vary by language.

## Touchpad components

Use the illustration and table to identify the touchpad components.

To adjust touchpad settings and gestures, or to turn off the touchpad:

1. Type **touchpad settings** in the taskbar search box, and then press [enter](#).
2. Choose a setting.

To turn on the touchpad:

1. Type **touchpad settings** in the taskbar search box, and then press [enter](#).
2. Using an external mouse, click the **touchpad** button.

- or -

- ▲ Press the [Tab](#) key repeatedly until the pointer rests on the **touchpad** button. Then press the spacebar to select the button.

**Table 2-4 Touchpad components and their descriptions**

Component		Description
(1)	Touchpad zone	Reads your finger gestures to move the pointer or activate items on the screen.
(2)	Left control zone	Textured area that allows you to perform additional gestures.
(3)	Right control zone	Textured area that allows you to perform additional gestures.
(4)	Near Field Communications (NFC) tapping area and antenna (select products only)	Allows you to wirelessly share information when you tap it with an NFC-enabled device.

## Lights

Use the illustration and table to identify the lights on the computer.

**Table 2-5 Lights and their descriptions**

Component		Description
(1)	Caps lock light	On: Caps lock is on, which switches the key input to all capital letters.
(2)	 Privacy key light (select products only)	On: Privacy screen is on, which helps prevent side-angle viewing.
(3)	Fn lock light	On: The fn key is locked.
(4)	 Mute light	<ul style="list-style-type: none"><li>• On: Computer sound is off.</li><li>• Off: Computer sound is on.</li></ul>
(5)	 Microphone mute light	<ul style="list-style-type: none"><li>• On: The microphone is off.</li><li>• Off: The microphone is on.</li></ul>
(6)	 Power light	<ul style="list-style-type: none"><li>• On: The computer is on.</li><li>• Blinking (select products only): The computer is in the Sleep state, a power-saving state. The computer shuts off power to the display and other unnecessary components.</li><li>• Off: Depending on your computer model, the computer is off, in Hibernation, or in Sleep. Hibernation is the power-saving state that uses the least amount of power.</li></ul>

## Button, speakers, and fingerprint reader

Identify the computer button, speakers, and fingerprint reader.

Fingerprint readers can be located on the touchpad, on a side panel of the computer, or on the top cover below the keyboard.

 **IMPORTANT:** To verify that your computer supports fingerprint reader sign-in, type [Sign-in options](#) in the taskbar search box and follow the on-screen instructions. If **Fingerprint reader** is not listed as an option, then your notebook does not include a fingerprint reader.

**Table 2-6 Button, speakers, and fingerprint reader and their descriptions**

Component	Description
(1) Speakers (2)	Produce sound
(2)  Power button	<ul style="list-style-type: none"> <li>• When the computer is off, press the button briefly to turn on the computer.</li> <li>• When the computer is on, press the button briefly to initiate Sleep.</li> <li>• When the computer is in the Sleep state, press the button briefly to exit Sleep (select products only).</li> <li>• When the computer is in Hibernation, press the button briefly to exit Hibernation.</li> </ul> <p><b>IMPORTANT:</b> Pressing and holding down the power button results in the loss of unsaved information.</p> <p>If the computer has stopped responding and shutdown procedures are ineffective, press and hold the power button down for at least 4 seconds to turn off the computer.</p> <p>To learn more about your power settings, see your power options:</p> <ul style="list-style-type: none"> <li>▲ Right-click the <b>Power</b> icon, and then select <b>Power Options</b>.</li> </ul>
(3) Fingerprint reader (select products only)	<p>Allows a fingerprint logon to Windows, instead of a password logon.</p> <ul style="list-style-type: none"> <li>▲ Swipe down across the fingerprint reader.</li> </ul> <p><b>IMPORTANT:</b> To prevent fingerprint logon issues, be sure when you register your fingerprint that all sides of your finger are registered by the fingerprint reader.</p>

## Special keys

Use the illustration and table to identify the special keys.

**Table 2-7** Special keys and their descriptions

Component	Description
(1) <code>esc</code> key	Displays system information when pressed in combination with the <code>fn</code> key.
(2) <code>fn</code> key	Executes frequently used system functions when pressed in combination with another key. Such key combinations are called hot keys.
(3)  Windows key	Opens the Start menu. <b>NOTE:</b> Pressing the Windows key again will close the Start menu.
(4) Action keys	Execute frequently used system functions.
(5)  Programmable key	Executes frequently used tasks. Some tasks might not be available on all products.
(6)  Power button	<ul style="list-style-type: none"> <li>When the computer is off, press the button briefly to turn on the computer.</li> <li>When the computer is on, press the button briefly to initiate Sleep.</li> <li>When the computer is in the Sleep state, press the button briefly to exit Sleep (select products only).</li> <li>When the computer is in Hibernation, press the button briefly to exit Hibernation.</li> </ul> <p><b>IMPORTANT:</b> Pressing and holding down the power button results in the loss of unsaved information.</p> <p>If the computer has stopped responding and shutdown procedures are ineffective, press and hold the power button down for at least 4 seconds to turn off the computer.</p> <p>To learn more about your power settings, see your power options:</p>

**Table 2-7 Special keys and their descriptions (continued)**

Component	Description
	▲ Right-click the <b>Power</b> icon, and then select <b>Power Options</b> .

## Hot keys (select products only)

A hot key is the combination of the **fn** key and another key. Use the table to identify the hot keys.

To use a hot key:

- ▲ Press the **fn** key, and then press one of the keys listed in the following table.

**Table 2-8 Hot keys and their descriptions**

Key	Description
C	Turns on scroll lock.
E	Turns on the insert function.
R	Breaks the operation.
S	Sends a programming query.
W	Pauses the operation.

## Bottom

Use the illustration and table to identify the bottom component.

**Table 2-9 Bottom component and its description**

Component	Description
Vent	Enables airflow to cool internal components. <b>NOTE:</b> The computer fan starts up automatically to cool internal components and prevent overheating. It is normal for the internal fan to cycle on and off during routine operation.

# Labels

The labels affixed to the computer provide information that you might need when you troubleshoot system problems or travel internationally with the computer. Labels can be in paper form or imprinted on the product.

**IMPORTANT:** Check the following locations for the labels described in this section: the bottom of the computer, inside the battery bay, under the service door, on the back of the display, or on the bottom of a tablet kickstand.

- Service label—Provides important information to identify your computer. When contacting support, you might be asked for the serial number, the product number, or the model number. Locate this information before you contact support.

Your service label information order may vary by country and might not include the wording "Model" due to the country regulation.

**Table 2-10 Service label components**

Component
(1) HP product name
(2) Product ID
(3) Serial number
(4) Warranty period

- Regulatory label(s)—Provide(s) regulatory information about the computer.
- Wireless certification label(s)—Provide(s) information about optional wireless devices and the approval markings for the countries or regions in which the devices have been approved for use.

# 3 Illustrated parts catalog

Use this table to determine the spare parts that are available for the computer.

## Computer major components

To identify the computer major components, use this illustration and table.

 **NOTE:** HP continually improves and changes product parts. For complete and current information about supported parts for your computer, go to <http://partsurfer.hp.com>, select your country or region, and then follow the on-screen instructions.

**Table 3-1 Computer major component descriptions and part numbers**

Item	Component	Spare part number
<b>(1)</b>	<b>Display assembly</b>	
	<b>NOTE:</b> Only the full hinge-up display is available as a spare part. Spare parts for display subcomponents are not available.	
	Display assembly, 100 nits, antiglare, privacy, WWAN	M03872-001
	Display assembly, 1000 nits, antiglare, privacy, no WWAN	M03876-001
	Display assembly, 1000 nits, BrightView, privacy, WWAN	M03878-001
	Display assembly, 1000 nits, BrightView, privacy, no WWAN	M03879-001
	Display assembly, 400 nits, antiglare, WWAN	M03873-001
	Display assembly, 400 nits, antiglare, no WWAN	M03877-001
	Display assembly, 400 nits, BrightView, WWAN	M03880-001
	Display assembly, 400 nits, BrightView, no WWAN	M03881-001
	Display assembly, 250 nits, BrightView, no WWAN	M03874-001
	Display assembly, 250 nits, BrightView, WWAN	M03875-001
<b>(2)</b>	<b>Top cover/keyboard</b>	
	<b>NOTE:</b> For a detailed list of country codes, see <a href="#">Keyboard with top cover on page 59</a> .	
	Backlit	M03901-xx1
	Not backlit	M03903-xx1
	Backlit, for use in privacy models	M03902-xx1
<b>(3)</b>	<b>Touchpad</b>	M03891-001
<b>(4)</b>	<b>Power connector cable</b> (included in the Cable Kit)	M03867-001
<b>(5)</b>	<b>Fingerprint reader</b>	M03870-001
	<b>NOTE:</b> The fingerprint reader cable is available in the Cable Kit as spare part number M03867-001.	
<b>(6)</b>	<b>Battery</b> (3 cell, 53 Whr)	L78551-005
<b>(7)</b>	<b>NFC module</b>	M08706-001
	<b>NOTE:</b> The NFC module cable is available in the Cable Kit as spare part number M03867-001. The NFC module antenna is available as spare part number M03892-001.	
<b>(8)</b>	<b>WWAN antenna cables</b>	
	Aux2	M18481-001
	Aux3	M18482-001
<b>(9)</b>	<b>Solid-state drive cover</b> (included in Bracket Kit)	M03871-001
<b>(10)</b>	<b>Memory cover</b> (included in Bracket Kit)	M03871-001
<b>(11)</b>	<b>System board bracket</b> (available in Plastics Kit)	M03888-001
<b>(12)</b>	<b>System board bracket</b> (available in Bracket Kit)	M03871-001
<b>(13)</b>	<b>Fan</b>	M03868-001

**Table 3-1 Computer major component descriptions and part numbers (continued)**

Item	Component	Spare part number
(14)	<b>Heat sink</b> (includes replacement thermal material)	M03869-001
(15)	<b>WLAN module</b>	
	Intel Wi-Fi 6 AX201 + Bluetooth 5 (802.11ax 2 × 2, vPro)	L57248-002
	Intel Wi-Fi 6 AX201 + Bluetooth 5 (802.11ax 2 × 2, non-vPro)	L57250-002
(16)	<b>WWAN module</b>	
	Intel XMM 7560 LTE-Advanced Pro (Cat16)	L40752-002
	Intel XMM 7360 LTE-Advanced (Cat 9)	L70670-002
(17)	<b>Solid-state drive</b>	
	1 TB, PCIe, TLC	L85348-002
	512 GB, PCIe, TLC	L85360-002
	512 GB, PCIe, TLC, self-encrypting drive (SED)	L85368-002
	512 GB, PCIe, value	L85364-002
	512 GB, PCIe + 32 GB Optane memory	L85366-002
	256 GB, PCIe, TLC	L85350-002
	256 GB, PCIe, TLC, self-encrypting drive (SED)	M07245-002
	256 GB, PCIe, value	L85354-002
	256 GB, PCIe + 16 GB Optane memory	L85356-002
	128 GB, SATA-3, TLC	L85346-002
(18)	<b>Memory module</b> (DDR4, PC-2666)	
	32 GB	L50384-002
	16 GB	937438-852
	8 GB	937236-852
(19)	<b>System board</b> (includes integrated processor)	
	<b>NOTE:</b> All system board spare part kits include replacement thermal material.	
	All system boards use the following part numbers:	
	xxxxxx-001: Non-Windows operating systems	
	xxxxxx-601: Windows operating system	
	Intel Core i7-10810 processor (OSR)	M03900-xx1
	Intel Core i7-10710 processor	M03899-xx1
	Intel Core i7-10610 processor	M03898-xx1
	Intel Core i7-10610 processor (OSR)	M03897-xx1
	Intel Core i7-10510 processor	M03894-xx1
	Intel Core i5-10310 processor	M03896-xx1
	Intel Core i5-10310 processor (OSR)	M03895-xx1

**Table 3-1 Computer major component descriptions and part numbers (continued)**

Item	Component	Spare part number
	Intel Core i5-10210 processor	M03893-xx1
(20)	<b>RTC battery</b>	L13694-001
(21)	<b>Speakers</b>	M03890-001
(22)	<b>Card reader board</b>	M03883-001
	<b>NOTE:</b> The card reader board cable is available in the Cable Kit as spare part number M08526-001.	
(23)	<b>Bottom cover</b>	
	For use on models with WWAN	M03865-001
	For use on models without WWAN	M03866-001

## Bracket Kit

To identify the Bracket Kit components, use this illustration and table.

**Table 3-2 Bracket Kit component descriptions and part numbers**

Item	Component	Spare part number
	<b>Bracket Kit, includes:</b>	M03871-001
(1)	Fingerprint reader bracket	
(2)	USB system board bracket	
(3)	Solid-state drive cover	
(4)	Memory cover	

## Plastics Kit

To identify the Plastics Kit components, use this illustration and table.

**Table 3-3 Plastics Kit component descriptions and part numbers**

Item	Component	Spare part number
	<b>Plastics Kit</b> , includes:	M03888-001
(1)	SIM card insert	
(2)	Fingerprint reader insert	
(3)	I/O system board bracket	
(4)	Smart card reader insert	

## Cable Kit

To identify the contents of the Cable Kit, use this table.

**Table 3-4 Cable Kit content descriptions and part number**

Component	Spare part number
<b>Cable Kit</b> , includes:	M03867-001
Touchpad cable	
Fingerprint reader board cable	
Smart card reader cable	
NFC module cable	
Power connector cable	

# Miscellaneous parts

To identify the miscellaneous parts, use this table.

**Table 3-5 Miscellaneous part descriptions and part numbers**

Component	Spare part number
<b>AC adapters</b>	
65 W, nPFC, SMART, 3 pin, 4.5 mm	710412-001
65 W, nPFC, SMART, 4.5 mm, EM	913691-850
65 W, nPFC, USB-C, straight, 1.8 m	L04650-850
65 W, nPFC, USB-C, RC, 1.8 m	L32392-001
65 W, nPFC, USB-C, 1.8 m	L67440-001
45 W, nPFC, SMART, RC, 4.5 mm, nonslim	741727-001
45 W, nPFC, SMART, RC, 4.5 mm, 2 pin	742436-001
<b>Screw Kit</b>	M03889-001
<b>Case</b>	
Top load case	679921-001
HP 14.1 inch business slim top load case	L05333-001
HP Business Top Load Case	718550-001
HP Prelude Pro 15.6 Backpack	M03617-001
<b>Dock</b>	
HP Thunderbolt Dock 120 W (with cable)	L15809-001
HP Thunderbolt Dock 230 W (with cable)	L15810-001
HP USB-C/A Universal Dock (with cable)	L64087-001
HP USB-C Mini Dock	935327-001
<b>Pen (with app launch button)</b>	L42306-001
<b>Stereo USB headset</b>	840340-001
<b>HDMI-to-VGA Adapter</b>	701943-001
<b>HDMI-to-DVI-D adapter</b>	691227-001
<b>USB-C-to-RJ-45 adapter</b>	855560-001
<b>USB-C-to-USB-A hub</b>	916838-001
<b>Lock</b>	
HP nano lock	918431-001
HP nano dual lock	918433-001
HP Sure Key Cable Lock	L65088-001
<b>Mouse</b>	
HP USB laser	674318-001

**Table 3-5 Miscellaneous part descriptions and part numbers (continued)**

<b>Component</b>	<b>Spare part number</b>
HP Comfort Grip Wireless Mouse	691922-001
HP Bluetooth Travel Mouse	L62043-001
HP USB Travel Mouse	757770-001
<b>Power cord (C7, conventional, 1.0 m)</b>	
Japan	L19375-001

---

## 4 Removal and replacement procedures preliminary requirements

Use this information to properly prepare to disassemble and reassemble the computer.

### Tools required

You need the following tools to complete the removal and replacement procedures:

- Nonconductive, nonmarking pry tool
- Magnetic Phillips P1 screwdriver
- Torx T5 screwdriver

### Service considerations

The following sections include some of the considerations that you must keep in mind during disassembly and assembly procedures.

---

 **NOTE:** As you remove each subassembly from the computer, place the subassembly (and all accompanying screws) away from the work area to prevent damage.

---

### Plastic parts

Using excessive force during disassembly and reassembly can damage plastic parts.

### Cables and connectors

Handle cables with extreme care to avoid damage.

---

 **IMPORTANT:** When servicing the computer, be sure that cables are placed in their proper locations during the reassembly process. Improper cable placement can damage the computer.

---

Apply only the tension required to unseat or seat the cables during removal and insertion. Handle cables by the connector whenever possible. In all cases, avoid bending, twisting, or tearing cables. Be sure that cables are routed so that they cannot be caught or snagged as you remove or replace parts. Handle flex cables with extreme care; these cables tear easily.

### Drive handling

Note the following guidelines when handling drives.

---

**IMPORTANT:** Drives are fragile components. Handle them with care. To prevent damage to the computer, damage to a drive, or loss of information, observe these precautions:

Before removing or inserting a hard drive, shut down the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.

Before handling a drive, be sure that you are discharged of static electricity. While handling a drive, avoid touching the connector.

Before removing an optical drive, be sure that a disc is not in the drive, and be sure that the optical drive tray is closed.

Handle drives on surfaces covered with at least 2.54 cm (1 inch) of shock-proof foam.

Avoid dropping drives from any height onto any surface.

After removing a hard drive or an optical drive, place it in a static-proof bag.

Avoid exposing an internal hard drive to products that have magnetic fields, such as monitors or speakers.

Avoid exposing a drive to temperature extremes or liquids.

If a drive must be mailed, place the drive in a bubble pack mailer or other suitable form of protective packaging, and label the package “FRAGILE.”

---

## Workstation guidelines

Follow these grounding workstation guidelines:

- Cover the workstation with approved static-shielding material.
- Use a wrist strap connected to a properly grounded work surface and use properly grounded tools and equipment.
- Use conductive field service tools, such as cutters, screw drivers, and vacuums.
- When fixtures must directly contact dissipative surfaces, use fixtures made only of static-safe materials.
- Keep the work area free of nonconductive materials, such as ordinary plastic assembly aids and polystyrene foam.
- Handle ESD-sensitive components, parts, and assemblies by the case or PCM laminate. Handle these items only at static-free workstations.
- Avoid contact with pins, leads, or circuitry.
- Turn off power and input signals before inserting or removing connectors or test equipment.

## Electrostatic discharge information

A sudden discharge of static electricity from your finger or other conductor can destroy static-sensitive devices or microcircuitry. Often the spark is neither felt nor heard, but damage occurs. An electronic device exposed to electrostatic discharge (ESD) might not appear to be affected at all and can work perfectly throughout a normal cycle. The device might function normally for a while, but it has been degraded in the internal layers, reducing its life expectancy.

Networks built into many integrated circuits provide some protection, but in many cases, the discharge contains enough power to alter device parameters or melt silicon junctions.

**IMPORTANT:** To prevent damage to the device when you remove or install internal components, observe these precautions:

Keep components in their electrostatic-safe containers until you are ready to install them.

Before touching an electronic component, discharge static electricity by using the guidelines described [Personal grounding methods and equipment on page 28](#).

Avoid touching pins, leads, and circuitry. Handle electronic components as little as possible.

If you remove a component, place it in an electrostatic-safe container.

## Generating static electricity

Follow these static electricity guidelines.

- Different activities generate different amounts of static electricity.
- Static electricity increases as humidity decreases.

**Table 4-1 Static electricity occurrence based on activity and humidity**

Event	Relative humidity		
	55%	40%	10%
Walking across carpet	7,500 V	15,000 V	35,000 V
Walking across vinyl floor	3,000 V	5,000 V	12,000 V
Motions of bench worker	400 V	800 V	6,000 V
Removing DIPs (dual in-line packages) from plastic tube	400 V	700 V	2,000 V
Removing DIPs from vinyl tray	2,000 V	4,000 V	11,500 V
Removing DIPs from polystyrene foam	3,500 V	5,000 V	14,500 V
Removing bubble pack from PCB (printed circuit board)	7,000 V	20,000 V	26,500 V
Packing PCBs in foam-lined box	5,000 V	11,000 V	21,000 V

Multiple electric components can be packaged together in plastic tubes, trays, or polystyrene foam.

**NOTE:** As little as 700 V can degrade a product.

## Preventing electrostatic damage to equipment

Many electronic components are sensitive to ESD. Circuitry design and structure determine the degree of sensitivity. The following packaging and grounding precautions are necessary to prevent static electricity damage to electronic components.

- To avoid hand contact, transport products in static-safe containers such as tubes, bags, or boxes.
- Protect all electrostatic parts and assemblies with conductive or approved containers or packaging.
- Keep electrostatic-sensitive parts in their containers until they arrive at static-free stations.
- Place items on a grounded surface before removing them from their container.
- Always be properly grounded when touching a sensitive component or assembly.

- Avoid contact with pins, leads, or circuitry.
- Place reusable electrostatic-sensitive parts from assemblies in protective packaging or conductive foam.

## Personal grounding methods and equipment

Using certain equipment can prevent static electricity damage to electronic components.

- **Wrist straps** are flexible straps with a maximum of  $1\text{ M}\Omega \pm 10\%$  resistance in the ground cords. To provide proper ground, a strap must be worn snug against bare skin. The ground cord must be connected and fit snugly into the banana plug connector on the grounding mat or workstation.
- **Heel straps/Toe straps/Boot straps** can be used at standing workstations and are compatible with most types of shoes or boots. On conductive floors or dissipative floor mats, use them on both feet with a maximum of  $1\text{ M}\Omega \pm 10\%$  resistance between the operator and ground.

**Table 4-2 Static shielding protection levels**

Static shielding protection levels	
Method	Voltage
Antistatic plastic	1,500
Carbon-loaded plastic	7,500
Metallized laminate	15,000

## Grounding the work area

To prevent static damage at the work area, follow these precautions.

- Cover the work surface with approved static-dissipative material. Provide a wrist strap connected to the work surface and properly grounded tools and equipment.
- Use static-dissipative mats, foot straps, or air ionizers to give added protection.
- Handle electrostatic sensitive components, parts, and assemblies by the case or PCB laminate. Handle them only at static-free work areas.
- Turn off power and input signals before inserting and removing connectors or test equipment.
- Use fixtures made of static-safe materials when fixtures must directly contact dissipative surfaces.
- Keep work area free of nonconductive materials such as ordinary plastic assembly aids and polystyrene foam.
- Use field service tools, such as cutters, screwdrivers, and vacuums, that are conductive.

## Recommended materials and equipment

HP recommends certain materials and equipment to prevent static electricity.

- Antistatic tape
- Antistatic smocks, aprons, or sleeve protectors
- Conductive bins and other assembly or soldering aids
- Conductive foam
- Conductive tabletop workstations with ground cord of  $1\text{ M}\Omega \pm 10\%$  resistance

- Static-dissipative table or floor mats with hard tie to ground
- Field service kits
- Static awareness labels
- Wrist straps and footwear straps providing  $1\text{ M}\Omega \pm 10\%$  resistance
- Material handling packages
- Conductive plastic bags
- Conductive plastic tubes
- Conductive tote boxes
- Opaque shielding bags
- Transparent metallized shielding bags
- Transparent shielding tubes

## Packaging and transporting guidelines

Follow these grounding guidelines when packaging and transporting equipment.

- To avoid hand contact, transport products in static-safe tubes, bags, or boxes.
- Protect ESD-sensitive parts and assemblies with conductive or approved containers or packaging.
- Keep ESD-sensitive parts in their containers until the parts arrive at static-free workstations.
- Place items on a grounded surface before removing items from their containers.
- Always be properly grounded when touching a component or assembly.
- Store reusable ESD-sensitive parts from assemblies in protective packaging or nonconductive foam.
- Use transporters and conveyors made of antistatic belts and roller bushings. Be sure that mechanized equipment used for moving materials is wired to ground and that proper materials are selected to avoid static charging. When grounding is not possible, use an ionizer to dissipate electric charges.

# 5 Removal and replacement procedures for Customer Self-Repair parts

This chapter provides removal and replacement procedures for Customer Self-Repair parts.

 **NOTE:** The Customer Self-Repair program is not available in all locations. Installing a part that is not supported by the Customer Self-Repair program can void your warranty. Check your warranty to determine whether Customer Self-Repair is supported in your location.

## Component replacement procedures

To remove and replace computer components, use these procedures.

 **NOTE:** Details about your computer, including model, serial number, product key, and length of warranty, are on the service tag at the bottom of your computer.

 **NOTE:** HP continually improves and changes product parts. For complete and current information about supported parts for your computer, go to <http://partsurfer.hp.com>, select your country or region, and then follow the on-screen instructions.

You must remove, replace, or loosen as many as 8 screws when you service Customer Self-Repair parts. Make special note of each screw size and location during removal and replacement.

## Preparation for disassembly

To prepare to disassemble the computer, use these steps.

See [Removal and replacement procedures preliminary requirements on page 25](#) for initial safety procedures.

1. Turn off the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect the power from the computer by unplugging the power cord from the computer.
3. Disconnect all external devices from the computer.

## Bottom cover

To remove the bottom cover, use this procedure and illustration.

**Table 5-1 Bottom cover description and part number**

Description	Spare part number
Bottom cover for use in models without WWAN	M03866-001
Bottom cover for use in models with WWAN	M03865-001

Before removing the bottom cover, prepare the computer for disassembly ([Preparation for disassembly on page 30](#)).

Remove the bottom cover:

1. Loosen the five captive Torx T5 screws that secure the bottom cover to the computer.

2. Starting near the hinges, use a nonmarking, nonconductive tool to release the edges of the bottom cover from the computer (1).
3. Remove the bottom cover from the computer (2).

To replace the bottom cover, reverse the removal procedures.

## Memory modules

To remove the memory module, use this procedure and illustration.

**Table 5-2** Memory module descriptions and part numbers

Description	Spare part number
32 GB, DDR4-2666	L50384-002
16 GB, DDR4-2666	937438-852
8 GB, DDR4-2666	937236-852
Memory module cover (included in Bracket Kit)	M03871-001

Before removing the memory, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 30](#)).
2. Remove the bottom cover ([Bottom cover on page 30](#)).
3. Disconnect the battery cable from the system board (see [Battery on page 41](#)).

If you are replacing a memory module, remove the existing memory module:

1. Use the tab **(1)** to lift the cover off the memory module **(2)**. The cover is held in place by clips on the system board.

2. Spread the two retention clips outward **(1)** until the memory module tilts up at a 45° angle, and then remove the module **(2)**.

 **IMPORTANT:** To prevent damage to the memory module, hold the memory module by the edges only. Do not touch the components on the memory module.

To protect a memory module after removal, place it in an electrostatic-safe container.

To install a memory module:

1. Align the notched edge of the module with the tab in the slot **(1)**, and then press the module into the slot at an angle until it is seated **(2)**.
2. Press down on the module until the side retention clips snap into place **(3)**.

3. Replace the cover by inserting the edges of the cover into the clips on the system board that surround the memory modules.

## WLAN module

To remove the WLAN module, use this procedure and illustration.

**Table 5-3 WLAN module descriptions and part numbers**

Description	Spare part number
Intel Wi-Fi 6 AX201 + Bluetooth 5 (802.11ax 2 × 2, vPro)	L57248-002
Intel Wi-Fi 6 AX201 + Bluetooth 5 (802.11ax 2 × 2, non-vPro)	L57250-002

**IMPORTANT:** To prevent an unresponsive system, replace the wireless module only with a wireless module authorized for use in the computer by the governmental agency that regulates wireless devices in your country or region. If you replace the module and then receive a warning message, remove the module to restore device functionality, and then contact technical support.

Before removing the WLAN module, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 30](#)).
2. Remove the bottom cover ([Bottom cover on page 30](#)).
3. Disconnect the battery cable from the system board (see [Battery on page 41](#)).

Remove the WLAN module:

1. Carefully disconnect the two antenna cables from the module **(1)**.
2. Remove the Phillips M2.0 × 2.5 screw **(2)**, and then remove the WLAN module **(3)**.

---

 **NOTE:** Models have either one or two WLAN antennas. On models with two antennas, the #1 white WLAN antenna cable connects to the WLAN module #1 Main terminal. The #2 black WLAN antenna cable connects to the WLAN module #1 Aux terminal.

---

3. If the WLAN antenna is not connected to the terminal on the WLAN module, install a protective sleeve on the antenna connector, as shown in the following illustration.

Reverse this procedure to install the WLAN module.

## WWAN module

To remove the WWAN module, use this procedure and illustration.

**Table 5-4 WWAN module descriptions and part numbers**

Description	Spare part number
Intel XMM 7560 LTE-Advanced Pro (Cat16)	L40752-002
Intel XMM 7360 LTE-Advanced (Cat 9)	L70670-002

**IMPORTANT:** To prevent an unresponsive system, replace the wireless module only with a wireless module authorized for use in the computer by the governmental agency that regulates wireless devices in your country or region. If you replace the module and then receive a warning message, remove the module to restore device functionality, and then contact technical support.

Before removing the WWAN module, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 30](#)).
2. Remove the bottom cover ([Bottom cover on page 30](#)).
3. Disconnect the battery cable from the system board (see [Battery on page 41](#)).

Remove the WWAN module:

1. Disconnect the WWAN antenna cables **(1)** from the terminals on the WWAN module.
2. Remove the Phillips M2.0 × 2.0 screw **(2)** that secures the WWAN module to the bottom cover. (The WWAN module tilts up.)

3. Remove the WWAN module (3) by pulling the module away from the slot at an angle.

 **NOTE:** When viewed with the antenna terminals at the top of the module, the white WWAN antenna cables connects to the terminal to the left of the black WWAN antenna cables.

4. If the WWAN antenna is not connected to the terminal on the WWAN module, a protective sleeve must be installed on the antenna connector, as shown in the following illustration.

Reverse this procedure to install the WWAN module.

## Solid-state drive

To remove the M.2 solid-state drive, use this procedure and illustration.

**Table 5-5 Solid-state drive descriptions and part numbers**

Description	Spare part number
1 TB, PCIe, TLC	L85348-002
512 GB, PCIe, TLC	L85360-002
512 GB, PCIe, TLC, self-encrypting drive (SED)	L85368-002
512 GB, PCIe, value	L85364-002
512 GB, PCIe + 32 GB Optane memory	L85366-002
256 GB, PCIe, TLC	L85350-002
256 GB, PCIe, TLC, self-encrypting drive (SED)	M07245-002
256 GB, PCIe, value	L85354-002
256 GB, PCIe + 16 GB Optane memory	L85356-002
128 GB, SATA-3, TLC	L85346-002
Solid-state drive cover (included in Bracket Kit)	M03871-001

Before removing the solid-state drive, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 30](#)).
2. Remove the bottom cover ([Bottom cover on page 30](#)).
3. Disconnect the battery cable from the system board (see [Battery on page 41](#)).

Remove the solid-state drive:

- ▲ Use the tab **(1)** to lift the cover off the solid-state drive **(2)**. The cover is held in place by clips on the system board.

1. Remove the Phillips M2.0 × 2.5 screw **(1)** that secures the drive to the computer.
2. Pull the drive away from the socket to remove it **(2)**.

3. Replace the cover by inserting the edges of the cover into the clips on the system board near the sides of the solid-state drive.

To install the solid-state drive, reverse the removal procedures.

 **NOTE:** Solid-state drives are designed with a notch to prevent incorrect insertion.

---

# 6 Removal and replacement procedures for authorized service provider parts

This chapter provides removal and replacement procedures for authorized service provider parts.

 **IMPORTANT:** Components described in this chapter should be accessed only by an authorized service provider. Accessing these parts can damage the computer or void the warranty.

 **NOTE:** Details about your computer, including model, serial number, product key, and length of warranty, are on the service tag at the bottom of your computer.

---

## Component replacement procedures

To remove and replace computer components, use these procedures.

 **NOTE:** HP continually improves and changes product parts. For complete and current information about supported parts for your computer, go to <http://partsurfer.hp.com>, select your country or region, and then follow the on-screen instructions.

---

You must remove, replace, or loosen as many as 37 screws when you service the parts described in this chapter. Make special note of each screw size and location during removal and replacement.

## Preparation for disassembly

To remove and replace computer components, use these procedures.

See [Removal and replacement procedures preliminary requirements on page 25](#) for initial safety procedures.

1. Turn off the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect the power from the computer by unplugging the power cord from the computer.
3. Disconnect all external devices from the computer.

## Battery

To remove the battery, use this procedure and illustration.

**Table 6-1 Battery description and part number**

Description	Spare part number
Battery, 3 cell, 53 Whr	L78551-005

---

---

 **WARNING!** To avoid personal injury and damage to the product:

- Do *not* puncture, twist, or crack the battery.
- Do *not* cause an external puncture or rupture to the battery. They can cause a short inside the battery, which can result in battery thermal runaway.
- Do *not* handle or touch the battery enclosure with sharp objects such as tweezers or pliers, which might puncture the battery.
- Do *not* compress or squeeze the battery case with tools or heavy objects stacked on top of the case. These actions can apply undue force on the battery.
- Do *not* touch the connectors with any metallic surface or object, such as metal tools, screws, or coins, which can cause shorting across the connectors.

---

Before removing the battery, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 30](#)).
2. Remove the bottom cover ([Bottom cover on page 30](#)).

---

 **WARNING!** To reduce potential safety issues, use only the user-replaceable battery provided with the computer, a replacement battery provided by HP, or a compatible battery purchased from HP.

 **IMPORTANT:** Removing a battery that is the sole power source for the computer can cause loss of information. To prevent loss of information, save your work or shut down the computer through Windows before you remove the battery.

---

Remove the battery:

1. Disconnect the battery cable from the system board **(1)**.
2. Remove the speaker cable from the clips along the bottom of the battery **(2)**.
3. On models with WWAN, peel both WWAN antennas off the battery **(3)**.
4. Remove the four Phillips M2.0 × 4.0 screws **(4)** that secure the battery to the computer.

- Remove the battery from the computer (5).

To insert the battery, reverse the removal procedures.

## Display assembly

To remove and disassemble the display assembly, use these procedures and illustrations.

**Table 6-2 Display assembly description and part number**

Description	Spare part number
Display assembly, 100 nits, antiglare, privacy, WWAN	M03872-001
Display assembly, 1000 nits, antiglare, privacy, no WWAN	M03876-001
Display assembly, 1000 nits, BrightView, privacy, WWAN	M03878-001
Display assembly, 1000 nits, BrightView, privacy, no WWAN	M03879-001
Display assembly, 400 nits, antiglare, WWAN	M03873-001
Display assembly, 400 nits, antiglare, no WWAN	M03877-001
Display assembly, 400 nits, BrightView, WWAN	M03880-001
Display assembly, 400 nits, BrightView, no WWAN	M03881-001

**Table 6-2 Display assembly description and part number (continued)**

Description	Spare part number
Display assembly, 250 nits, BrightView, no WWAN	M03874-001
Display assembly, 250 nits, BrightView, WWAN	M03875-001

 **NOTE:** Only the full hinge-up display is available as a spare part. Spare parts for display subcomponents are not available.

Before removing the display panel, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 30](#)).
2. Remove the bottom cover ([Bottom cover on page 30](#)).
3. Disconnect the battery cable from the system board (see [Battery on page 41](#)).

Remove the display assembly:

1. Disconnect the display cable from the system board **(1)** and the antenna cables from the WWAN module **(2)**.
2. Disconnect the left display cable from the system board **(3)** and the antenna cables from the WLAN module **(4)**, and then remove the cables from the clips along the side of the fan **(5)**.

3. Remove the six Phillips M2.5 × 5.0 screws **(1)** that secure the display assembly to the computer.
4. Rotate the display to open the hinges **(2)**.

5. Separate the display assembly from the computer (3).

Reverse this procedure to replace the display assembly.

## Power connector cable

To remove the power connector cable, use this procedure and illustration.

**Table 6-3 Power connector cable description and part number**

Description	Spare part number
Power connector cable (included in the Cable Kit)	M03867-001

Before removing the power connector cable, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 30](#)).
2. Remove the bottom cover ([Bottom cover on page 30](#)).
3. Disconnect the battery cable from the system board (see [Battery on page 41](#)).

Remove the power connector cable:

1. Disconnect the cable from the system board (1), and then remove the cable from the clip.
2. Remove the Phillips M2.0 x 4.0 screw (2) that secures the power connector cable to the computer.

3. Remove the power connector cable from the computer **(3)**.

Reverse this procedure to install the power connector cable.

## Fingerprint reader board

To remove the fingerprint reader board, use this procedure and illustration.

**Table 6-4 Fingerprint reader board description and part number**

Description	Spare part number
Fingerprint reader board	M03870-001
Fingerprint reader board cable (included in Cable Kit)	M03867-001
Fingerprint reader board bracket (included in Bracket Kit)	M03871-001

Before removing the fingerprint reader board, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 30](#)).
2. Remove the bottom cover ([Bottom cover on page 30](#)).
3. Remove the battery (see [Battery on page 41](#)).

Remove the fingerprint reader board:

1. Disconnect the cable from the ZIF connector on the fingerprint board **(1)**.
2. Remove the Phillips M2.0 x 2.0 screw **(2)** that secures the fingerprint reader bracket to the computer, and then remove the bracket **(3)**.

3. Remove the fingerprint reader board from the computer **(4)**.

Reverse this procedure to install the fingerprint reader board.

## RTC battery

To remove the RTC battery, use this procedure and illustration.

**Table 6-5** RTC battery description and part number

Description	Spare part number
RTC battery	L13694-001

Before removing the RTC battery, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 30](#)).
2. Remove the bottom cover ([Bottom cover on page 30](#)).
3. Remove the battery (see [Battery on page 41](#)).

Remove the RTC battery:

1. Disconnect the battery cable from the system board **(1)**.

2. Remove the battery from the computer **(2)**.

Reverse this procedure to install the RTC battery.

## Touchpad

To remove the touchpad, use this procedure and illustration.

**Table 6-6 Touchpad description and part number**

Description	Spare part number
Touchpad	M03891-001
Touchpad cable (included in Cable Kit)	M03867-001

Before removing the touchpad, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 30](#)).
2. Remove the bottom cover ([Bottom cover on page 30](#)).
3. Remove the battery (see [Battery on page 41](#)).

Remove the touchpad:

1. Disconnect the cable from the ZIF connector on the touchpad **(1)**.
2. Disconnect the cable from the reverse ZIF connector on the NFC module **(2)**.
3. Remove the six Phillips M1.6 × 1.8 screws **(3)** that secure the touchpad to the computer.

4. Remove the touchpad from the computer **(4)**.

Reverse this procedure to install the touchpad.

## NFC module

To remove the NFC module, use this procedure and illustration.

**Table 6-7** NFC module description and part number

Description	Spare part number
NFC module	M08706-001
NFC module cable (included in the Cable Kit)	M03867-001
NFC module antenna	M03892-001

Before removing the NFC module, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 30](#)).
2. Remove the bottom cover ([Bottom cover on page 30](#)).
3. Remove the battery (see [Battery on page 41](#)).

Remove the NFC module:

1. Disconnect the system board cable from the ZIF connector on the NFC module **(1)**.
2. Disconnect the touchpad cable from the reverse ZIF connector on the NFC module **(2)**.

3. Use a tool to release the module from the computer **(3)**. The module is secured with adhesive.

Reverse this procedure to install the NFC module.

## Fan

To remove the fan, use this procedure and illustration.

**Table 6-8 Fan description and part number**

Description	Spare part number
Fan assembly	M03868-001

Before removing the fan, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 30](#)).
2. Remove the bottom cover ([Bottom cover on page 30](#)).
3. Disconnect the battery cable from the system board (see [Battery on page 41](#)).

Remove the fan assembly:

1. Disconnect the antenna cables from the WLAN module **(1)**.
2. Remove the antenna cables from the clips on the side of the fan **(2)**.
3. Disconnect the fan cable from the system board **(3)**.

- Loosen the two Phillips captive screws **(4)** that secure the fan to the computer, and then remove the fan from the computer **(5)**.

Reverse this procedure to install the fan assembly.

## Heat sink

To remove the heat sink, use these procedures and illustrations.

**Table 6-9** Heat sink descriptions and part numbers

Description	Spare part number
Heat sink	M03869-001

Before removing the heat sink, follow these steps:

- Prepare the computer for disassembly ([Preparation for disassembly on page 30](#)).
- Remove the bottom cover ([Bottom cover on page 30](#)).
- Disconnect the battery cable from the system board (see [Battery on page 41](#)).

Remove the heat sink:

- In the order indicated on the heat sink, loosen the four captive Phillips screws **(1)** that secure the heat sink to the computer.

2. Remove the heat sink from the computer (2).

3. Thoroughly clean the thermal material from the surfaces of the heat sink and the system board components each time the heat sink is removed. Replacement thermal material is included with the heat sink and system board spare part kits. The following illustration shows the replacement thermal material locations.

Thermal paste is used on the system board component (1) and on the heat sink area (2) that services it.

Reverse this procedure to install the heat sink.

## WWAN antennas

To remove the WWAN antennas, use this procedure and illustration.

**Table 6-10 WWAN antennas description and part number**

Description	Spare part number
WWAN antennas (aux 2)	M18481-001
WWAN antennas (aux 3)	M18482-001

Before removing the speakers, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 30](#)).
2. Remove the bottom cover ([Bottom cover on page 30](#)).
3. Remove the battery (see [Battery on page 41](#)).

Remove the WWAN antennas:

1. Remove the left speaker holder **(1)**.
2. Peel the right and left antennas off the computer **(2)**.
3. Remove the cables from the routing under the speaker holder and through the channel in the speaker **(3)**.

Reverse this procedure to install the WWAN antennas.

## System board

To remove the system board, use these procedures and illustrations.

**Table 6-11 System board descriptions and part numbers**

Description	Spare part number
<b>System board</b> (includes processor):	
All system boards use the following part numbers:	
xxxxxx-001: Non-Windows operating system	
xxxxxx-601: Windows 10 operating system	
System board with integrated Intel Core i7-10810 processor (OSR)	M03900-xx1
System board with integrated Intel Core i7-10710 processor	M03899-xx1
System board with integrated Intel Core i7-10610 processor	M03898-xx1
System board with integrated Intel Core i7-10610 processor (OSR)	M03897-xx1
System board with integrated Intel Core i7-10510 processor	M03894-xx1
System board with integrated Intel Core i5-10310 processor	M03896-xx1
System board with integrated Intel Core i5-10310 processor (OSR)	M03895-xx1
System board with integrated Intel Core i5-10210 processor	M03893-xx1

Before removing the system board, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 30](#)).
2. Remove the bottom cover ([Bottom cover on page 30](#)).
3. Remove the battery (see [Battery on page 41](#)).
4. Remove the fan (see [Fan on page 50](#)).

When you replace the system board, be sure to remove the following components (as applicable) from the defective system board and install them on the replacement system board:

- Memory module (see [Memory modules on page 31](#)).
- WLAN module (see [WLAN module on page 34](#)).
- WWAN module (see [WWAN module on page 36](#)).
- Solid-state drive (see [Solid-state drive on page 38](#)).
- Heat sink (see [Heat sink on page 51](#)).

Remove the system board:

1. Disconnect the antenna cables from the WWAN module **(1)**.
2. Remove the cables from the clips in the plastic bracket **(2)**.
3. Remove the five Phillips M2.0 × 4.0 screws **(3)** that secure the bracket to the system board, and then remove the bracket **(4)**.

4. Remove the four Phillips M2.0 × 4.0 screws **(5)** that secure the metal bracket to the system board, and then remove the bracket **(6)**.

The plastic bracket is available in the Plastics Kit as spare part number M03888-001.

5. Disconnect the following cables from the system board:

- Power connector cable **(1)**
- Camera cable **(2)**
- Display cable **(3)**
- Antenna cables from the WLAN module **(4)**
- Speaker cable **(5)**
- Keyboard cable (ZIF) **(6)**
- Card reader cable (ZIF) **(7)**
- Touchpad cable (ZIF) **(8)**
- Keyboard backlight cable (ZIF) (select products only) **(9)**
- NFC module cable (ZIF) (select products only) **(10)**
- Fingerprint reader cable (ZIF) (select products only) **(11)**
- RTC battery cable **(12)**

6. Remove the SIM card insert from the computer (1).
7. Remove the three Phillips M2.0 × 2.0 screws (2) that secure the system board to the computer.

8. Lift the side of the system board upward **(1)**, and then pull the system board away from the connectors on the side of the computer to remove it **(2)**.

Reverse this procedure to install the system board.

## Speakers

To remove the speakers, use this procedure and illustration.

**Table 6-12 Speaker description and part number**

Description	Spare part number
Speaker Kit	M03890-001

Before removing the speakers, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 30](#)).
2. Remove the bottom cover ([Bottom cover on page 30](#)).
3. Remove the battery (see [Battery on page 41](#)).
4. Remove the system board (see [System board on page 53](#)).

Remove the speakers:

1. Remove the speaker cable from the tape that secures it to the computer chassis **(1)**.

2. Remove the speakers from the computer **(2)** .

Reverse this procedure to install the speakers.

## Card reader board

To remove the card reader board, use this procedure and illustration.

**Table 6-13** Card reader board description and part number

Description	Spare part number
Card reader board	M03883-001
Card reader board cable (included in Cable Kit)	M03867-001

Before removing the card reader board, follow these steps:

1. Prepare the computer for disassembly ([Preparation for disassembly on page 30](#)).
2. Remove the bottom cover ([Bottom cover on page 30](#)).
3. Remove the battery (see [Battery on page 41](#)).
4. Remove the left speaker (see [Speakers on page 57](#)).
5. Remove the system board (see [System board on page 53](#)).

Remove the card reader board:

1. Remove the three Phillips M2.0 × 2.0 screws **(1)** that secure the card reader to the computer.
2. Lift the top of the board up to about a 45° angle **(2)**.

3. Pull the card reader out from under the WWAN antenna holder to remove it from the computer (3).

Reverse this procedure to install the card reader board.

## Keyboard with top cover

The top cover with keyboard remains after removing all other spare parts from the computer. In this section, the first table provides the main spare part number for the top cover/keyboards. The second table provides the country codes.

**Table 6-14 Keyboard with top cover descriptions and part numbers**

Description	Spare part number
Keyboard with top cover, backlit	M03901-xx1
Keyboard with top cover, not backlit	M03903-xx1
Keyboard with top cover, backlit, for use in privacy models	M03902-xx1

**Table 6-15 Spare part country codes**

For use in country or region	Spare part number	For use in country or region	Spare part number	For use in country or region	Spare part number
Belgium	-A41	Hungary	-211	Saudi Arabia	-171
Brazil	-201	Iceland	-DD1	Slovenia	-BA1
Bulgaria	-261	India	-D61	South Korea	-AD1
Chile	-161	Israel	-BB1	Spain	-071
Czech Republic/Slovakia	-FL1	Italy	-061	Switzerland	-BG1
Denmark	-081	Japan	-291	Taiwan	-AB1

**Table 6-15 Spare part country codes (continued)**

<b>For use in country or region</b>	<b>Spare part number</b>	<b>For use in country or region</b>	<b>Spare part number</b>	<b>For use in country or region</b>	<b>Spare part number</b>
Denmark, Finland, and Norway	-DH1	The Netherlands	-B31	Thailand	-281

Greece	-151	Russia	-251	United States	-001

# 7 Computer Setup (BIOS), TPM, and HP Sure Start

HP provides several tools to help set up and protect your computer.

## Using Computer Setup

Computer Setup, or Basic Input/Output System (BIOS), controls communication between all the input and output devices on the system (such as hard drives, display, keyboard, mouse, and printer). Computer Setup includes settings for types of devices installed, the startup sequence of the computer, and amount of system and extended memory.

---

 **NOTE:** Use extreme care when making changes in Computer Setup. Errors can prevent the computer from operating properly.

---

To start Computer Setup, turn on or restart the computer, and when the HP logo appears, press **f10** to enter Computer Setup.

## Navigating and selecting in Computer Setup

You can navigate and select in Computer Setup using one or more methods.

- To select a menu or a menu item, use the **tab** key and the keyboard arrow keys and then press **enter**, or use a pointing device to select the item.
- To scroll up and down, select the up arrow or the down arrow in the upper-right corner of the screen, or use the up arrow key or the down arrow key on the keyboard.
- To close open dialog boxes and return to the main Computer Setup screen, press **esc**, and then follow the on-screen instructions.

To exit Computer Setup, choose one of the following methods:

- To exit Computer Setup menus without saving your changes, select **Main**, select **Ignore Changes and Exit**, and then select **Yes**.

---

 **NOTE:** If you are using arrow keys to highlight your choice, you must then press **enter**.

---

- To save your changes and exit Computer Setup menus, select **Main**, select **Save Changes and Exit**, and then select **Yes**.

---

 **NOTE:** If you are using arrow keys to highlight your choice, you must then press **enter**.

---

Your changes go into effect when the computer restarts.

## Restoring factory settings in Computer Setup

To return all settings in Computer Setup to the values that were set at the factory, follow these steps.

---

 **NOTE:** Restoring defaults will not change the hard drive mode.

---

1. Start Computer Setup. See [Using Computer Setup on page 61](#).
2. Select **Main**, select **Apply Factory Defaults and Exit**, and then select **Yes**.

---

 **NOTE:** If you are using arrow keys to highlight your choice, you must then press [enter](#).

 **NOTE:** On select products, the selections might display **Restore Defaults** instead of **Apply Factory Defaults and Exit**.

---

Your changes go into effect when the computer restarts.

---

 **NOTE:** Your password settings and security settings are not changed when you restore the factory settings.

---

## Updating the BIOS

Updated versions of the BIOS might be available on the HP website. Most BIOS updates on the HP website are packaged in compressed files called *SoftPaqs*.

Some download packages contain a file named *Readme.txt*, which contains information regarding installing and troubleshooting the file.

### Determining the BIOS version

To decide whether you need to update Computer Setup (BIOS), first determine the BIOS version on your computer.

You can access BIOS version information (also known as *ROM date* and *System BIOS*) by pressing [fn+esc](#) (if you are already in Windows) or by using Computer Setup.

1. Start Computer Setup. See [Using Computer Setup on page 61](#).
2. Select **Main**, and then select **System Information**.
3. To exit Computer Setup menus without saving your changes, select **Main**, select **Ignore Changes and Exit**, and then select **Yes**.

---

 **NOTE:** If you are using arrow keys to highlight your choice, you must then press [enter](#).

---

To check for later BIOS versions, see [Preparing for a BIOS update on page 62](#).

### Preparing for a BIOS update

Be sure to follow all prerequisites before downloading and installing a BIOS update.

---

 **IMPORTANT:** To reduce the risk of damage to the computer or an unsuccessful installation, download and install a BIOS update only when the computer is connected to reliable external power using the AC adapter. Do not download or install a BIOS update while the computer is running on battery power, docked in an optional docking device, or connected to an optional power source. During the download and installation, follow these instructions:

Do not disconnect power on the computer by unplugging the power cord from the AC outlet.

Do not shut down the computer or initiate Sleep.

Do not insert, remove, connect, or disconnect any device, cable, or cord.

---

### Downloading a BIOS update

After you review the prerequisites, you can check for and download BIOS updates.

1. Type `support` in the taskbar search box, and then select the HP Support Assistant app.  
– or –  
Select the question mark icon in the taskbar.
2. Select **Updates**, and then select **Check for updates and messages**.
3. Follow the on-screen instructions.
4. At the download area, follow these steps:
  - a. Identify the most recent BIOS update and compare it to the BIOS version currently installed on your computer. Make a note of the date, name, or other identifier. You might need this information to locate the update later, after it has been downloaded to your hard drive.
  - b. Follow the on-screen instructions to download your selection to the hard drive.  
  
Make a note of the path to the location on your hard drive where the BIOS update is downloaded. You will need to access this path when you are ready to install the update.

---

 **NOTE:** If you connect your computer to a network, consult the network administrator before installing any software updates, especially system BIOS updates.

---

### Installing a BIOS update

BIOS installation procedures vary. Follow any instructions that are displayed on the screen after the download is complete. If no instructions are displayed, follow these steps.

1. Type `file` in the taskbar search box, and then select **File Explorer**.
2. Select your hard drive designation. The hard drive designation is typically Local Disk (C:).
3. Using the hard drive path you recorded earlier, open the folder that contains the update.
4. Double-click the file that has an `.exe` extension (for example, `filename.exe`).  
  
The BIOS installation begins.
5. Complete the installation by following the on-screen instructions.

---

 **NOTE:** After a message on the screen reports a successful installation, you can delete the downloaded file from your hard drive.

---

### Changing the boot order using the f9 prompt

To dynamically choose a boot device for the current startup sequence, follow these steps.

1. Access the Boot Device Options menu:
  - Turn on or restart the computer, and when the HP logo appears, press **f9** to enter the Boot Device Options menu.
2. Select a boot device, press `enter`, and then follow the on-screen instructions.

## TPM BIOS settings (select products only)

TPM provides additional security for your computer. You can modify the TPM settings in Computer Setup (BIOS).

---

**IMPORTANT:** Before enabling Trusted Platform Module (TPM) functionality on this system, you must ensure that your intended use of TPM complies with relevant local laws, regulations and policies, and approvals or licenses must be obtained if applicable. For any compliance issues arising from your operation or usage of TPM that violates the previously mentioned requirement, you shall bear all the liabilities wholly and solely. HP will not be responsible for any related liabilities.

**NOTE:** If you change the TPM setting to Hidden, TPM is not visible in the operating system.

---

To access TPM settings in Computer Setup:

1. Start Computer Setup. See [Using Computer Setup on page 61](#).
2. Select **Security**, select **TPM Embedded Security**, and then follow the on-screen instructions.

## Using HP Sure Start (select products only)

Select computer models are configured with HP Sure Start, a technology that monitors the computer's BIOS for attacks or corruption. If the BIOS becomes corrupted or is attacked, HP Sure Start automatically restores the BIOS to its previously safe state, without user intervention.

HP Sure Start is configured and already enabled so that most users can use the HP Sure Start default configuration. Advanced users can customize the default configuration.

To access the latest documentation on HP Sure Start, go to <http://www.hp.com/support>. Select **Find your product**, and then follow the on-screen instructions.

---

# 8 Backing up, restoring, and recovering

This chapter provides information about processes that are standard procedure for most products.

- **Backing up your personal information**—You can use Windows tools to back up your personal information (see [Using Windows tools on page 65](#)).
- **Creating a restore point**—You can use Windows tools to create a restore point (see [Using Windows tools on page 65](#)).
- **Creating recovery media** (select products only)—You can use the HP Cloud Recovery Download Tool (select products only) to create recovery media (see [Using the HP Cloud Recovery Download Tool to create recovery media \(select products only\) on page 65](#)).
- **Restoring and recovery**—Windows offers several options for restoring from backup, refreshing the computer, and resetting the computer to its original state (see [Using Windows tools on page 65](#)).

---

 **IMPORTANT:** If you will be performing recovery procedures on a tablet, the tablet battery must be at least 70% charged before you start the recovery process.

**IMPORTANT:** For a tablet with a detachable keyboard, connect the tablet to the keyboard base before beginning any recovery process.

---

## Backing up information and creating recovery media

These methods of creating recovery media and backups are available on select products only. Choose the appropriate method for your computer model.

### Using Windows tools

You can use Windows tools to back up personal information and create system restore points and recovery media.

---

 **IMPORTANT:** Windows is the only option that allows you to back up your personal information. Schedule regular backups to avoid information loss.

 **NOTE:** If computer storage is 32 GB or less, Microsoft System Restore is disabled by default.

---

For more information and steps, see the Get Help app.

---

 **NOTE:** You must be connected to the Internet to access the Get Help app.

---

1. Select the **Start** button, and then select the **Get Help** app.
2. Enter the task you want to perform.

### Using the HP Cloud Recovery Download Tool to create recovery media (select products only)

You can use the HP Cloud Recovery Download Tool to create HP Recovery media on a bootable USB flash drive.

For details:

- ▲ Go to <http://www.hp.com/support>, search for HP Cloud Recovery, and then select the result that matches the type of computer that you have.

---

**NOTE:** If you cannot create recovery media yourself, contact support to obtain recovery discs. Go to <http://www.hp.com/support>, select your country or region, and then follow the on-screen instructions.

---

## Restoring and recovery

You have several options for recovering your system. Choose the method that best matches your situation and level of expertise.

---

**NOTE:** Not all methods are available on all products.

---

### Restoring, resetting, and refreshing using Windows tools

Windows offers several options for restoring, resetting, and refreshing the computer.

For details, see [Using Windows tools on page 65](#).

### Recovering using HP Recovery media

You can use HP Recovery media to recover the original operating system and software programs that were installed at the factory. On select products, it can be created on a bootable USB flash drive using the HP Cloud Recovery Download Tool.

For details, see [Using the HP Cloud Recovery Download Tool to create recovery media \(select products only\) on page 65](#).

---

**NOTE:** If you cannot create recovery media yourself, contact support to obtain recovery discs. Go to <http://www.hp.com/support>, select your country or region, and then follow the on-screen instructions.

---

To recover your system:

- ▲ Insert the HP Recovery media, and then restart the computer.

### Changing the computer boot order

If your computer does not restart using the HP Recovery media, you can change the computer boot order. This is the order of devices listed in BIOS where the computer looks for startup information. You can change the selection to an optical drive or a USB flash drive, depending on the location of your HP Recovery media.

To change the boot order:

---

**IMPORTANT:** For a tablet with a detachable keyboard, connect the tablet to the keyboard base before beginning these steps.

---

1. Insert the HP Recovery media.
2. Access the system **Startup** menu.
  - For computers or tablets with keyboards attached, turn on or restart the computer or tablet, quickly press **esc**, and then press **f9** for boot options.
  - For tablets without keyboards, turn on or restart the tablet, quickly hold down the volume up button, and then select **f9**.

– or –

Turn on or restart the tablet, quickly hold down the volume down button, and then select **f9**.
3. Select the optical drive or USB flash drive from which you want to boot, and then follow the on-screen instructions.

## Using HP Sure Recover (select products only)

Select computer models are configured with HP Sure Recover, a PC OS recovery solution built into the hardware and firmware. HP Sure Recover can fully restore the HP OS image without installed recovery software.

Using HP Sure Recover, an administrator or user can restore the system and install:

- Latest version of the operating system
- Platform-specific device drivers
- Software applications, in the case of a custom image

To access the latest documentation for HP Sure Recover, go to <http://www.hp.com/support>. Select **Find your product**, and then follow the on-screen instructions.

---

## 9 Using HP PC Hardware Diagnostics

The HP PC Hardware Diagnostics utility allows you to run diagnostics tests to determine whether your computer hardware is running properly. The three versions are HP PC Hardware Diagnostics Windows, HP PC Hardware Diagnostics UEFI (Unified Extensible Firmware Interface), and (for select products only) a firmware feature called Remote HP PC Hardware Diagnostics UEFI.

### Using HP PC Hardware Diagnostics Windows (select products only)

HP PC Hardware Diagnostics Windows is a Windows-based utility that allows you to run diagnostic tests to determine whether the computer hardware is functioning properly. The tool runs within the Windows operating system to diagnose hardware failures.

If HP PC Hardware Diagnostics Windows is not installed on your computer, first you must download and install it. To download HP PC Hardware Diagnostics Windows, see [Downloading HP PC Hardware Diagnostics Windows on page 69](#).

### Using an HP PC Hardware Diagnostics Windows hardware failure ID code

When HP PC Hardware Diagnostics Windows detects a failure that requires hardware replacement, a 24-digit Failure ID code is generated.

- ▲ Depending on the instructions on the screen, choose one of these options:
  - If failure ID link is displayed, select the link and follow the on-screen instructions.
  - If instructions for calling support are displayed. Follow those instructions.

### Accessing HP PC Hardware Diagnostics Windows

After HP PC Hardware Diagnostics Windows is installed, you can access it from HP Help and Support or HP Support Assistant.

### Accessing HP PC Hardware Diagnostics Windows from HP Help and Support

After HP PC Hardware Diagnostics Windows is installed, follow these steps to access it from HP Help and Support.

To access HP PC Hardware Diagnostics Windows from HP Help and Support:

1. Select the **Start** button, and then select **HP Help and Support**.
2. Select **HP PC Hardware Diagnostics Windows**.
3. When the tool opens, select the type of diagnostic test that you want to run, and then follow the on-screen instructions.

**NOTE:** To stop a diagnostic test, select **Cancel**.

## Accessing HP PC Hardware Diagnostics Windows from Support Assistant

After HP PC Hardware Diagnostics Windows is installed, follow these steps to access it from HP Support Assistant.

To access HP PC Hardware Diagnostics Windows from HP Support Assistant:

1. Type `support` in the taskbar search box, and then select the **HP Support Assistant** app.  
– or –  
Select the question mark icon in the taskbar.
2. Select **Troubleshooting and fixes**.
3. Select **Diagnostics**, and then select **HP PC Hardware Diagnostics Windows**.
4. When the tool opens, select the type of diagnostic test that you want to run, and then follow the on-screen instructions.

---

**NOTE:** To stop a diagnostic test, select **Cancel**.

---

## Downloading HP PC Hardware Diagnostics Windows

The HP PC Hardware Diagnostics Windows downloading instructions are provided in English only. You must use a Windows computer to download this tool because only .exe files are provided.

### Downloading the latest HP PC Hardware Diagnostics Windows version from HP

To download HP PC Hardware Diagnostics Windows from HP, follow these steps.

1. Go to <http://www.hp.com/go/techcenter/pcdiags>. The HP PC Diagnostics home page is displayed.
2. Select **Download HP Diagnostics Windows**, and then select a location on your computer or a USB flash drive.

The tool downloads to the selected location.

### Downloading the HP PC Hardware Diagnostics Windows from the Microsoft Store

You can download the HP PC Hardware Diagnostics Windows from the Microsoft Store.

1. Select the Microsoft app on your desktop or enter `Microsoft Store` in the taskbar search box.
2. Enter `HP PC Hardware Diagnostics Windows` in the **Microsoft Store** search box.
3. Follow the on-screen directions.

The tool downloads to the selected location.

### Downloading HP Hardware Diagnostics Windows by product name or number (select products only)

You can download HP PC Hardware Diagnostics Windows by product name or number.

---

**NOTE:** For some products, you might have to download the software to a USB flash drive by using the product name or number.

---

1. Go to <http://www.hp.com/support>.
2. Select **Software and Drivers**, select your type of product, and then enter the product name or number in the search box that is displayed.
3. In the **Diagnostics** section, select **Download**, and then follow the on-screen instructions to select the specific Windows diagnostics version to be downloaded to your computer or USB flash drive.

The tool downloads to the selected location.

## Installing HP PC Hardware Diagnostics Windows

To install HP PC Hardware Diagnostics Windows, navigate to the folder on your computer or the USB flash drive where the .exe file downloaded, double-click the .exe file, and then follow the on-screen instructions.

## Using HP PC Hardware Diagnostics UEFI

HP PC Hardware Diagnostics UEFI (Unified Extensible Firmware Interface) allows you to run diagnostic tests to determine whether the computer hardware is functioning properly. The tool runs outside the operating system so that it can isolate hardware failures from issues that are caused by the operating system or other software components.

**NOTE:** For Windows 10 S computers, you must use a Windows computer and a USB flash drive to download and create the HP UEFI support environment because only .exe files are provided. For more information, see [Downloading HP PC Hardware Diagnostics UEFI to a USB flash drive on page 71](#).

If your PC does not start in Windows, you can use HP PC Hardware Diagnostics UEFI to diagnose hardware issues.

## Using an HP PC Hardware Diagnostics UEFI hardware failure ID code

When HP PC Hardware Diagnostics UEFI detects a failure that requires hardware replacement, a 24-digit Failure ID code is generated.

For assistance in solving the problem:

- ▲ Select **Contact HP**, accept the HP privacy disclaimer, and then use a mobile device to scan the Failure ID code that appears on the next screen. The HP Customer Support - Service Center page appears with your Failure ID and product number automatically filled in. Follow the on-screen instructions.

– or –

Contact support, and provide the Failure ID code.

**NOTE:** To start diagnostics on a convertible computer, your computer must be in notebook mode, and you must use the attached keyboard.

**NOTE:** If you need to stop a diagnostic test, press **esc**.

## Starting HP PC Hardware Diagnostics UEFI

To start HP PC Hardware Diagnostics UEFI, follow this procedure.

1. Turn on or restart the computer, and quickly press **esc**.
2. Press **f2**.

The BIOS searches three places for the diagnostic tools, in the following order:

- a. Connected USB flash drive
- 
-  **NOTE:** To download the HP PC Hardware Diagnostics UEFI tool to a USB flash drive, see [Downloading the latest HP PC Hardware Diagnostics UEFI version on page 71](#).
- 
- b. Hard drive
  - c. BIOS
3. When the diagnostic tool opens, select a language, select the type of diagnostic test you want to run, and then follow the on-screen instructions.

## Downloading HP PC Hardware Diagnostics UEFI to a USB flash drive

Downloading HP PC Hardware Diagnostics UEFI to a USB flash drive can be useful in some situations.

- HP PC Hardware Diagnostics UEFI is not included in the preinstallation image.
- HP PC Hardware Diagnostics UEFI is not included in the HP Tool partition.
- The hard drive is damaged.

---

 **NOTE:** The HP PC Hardware Diagnostics UEFI downloading instructions are provided in English only, and you must use a Windows computer to download and create the HP UEFI support environment because only .exe files are provided.

---

## Downloading the latest HP PC Hardware Diagnostics UEFI version

To download the latest HP PC Hardware Diagnostics UEFI version to a USB flash drive, follow this procedure.

1. Go to <http://www.hp.com/go/techcenter/pcdiags>. The HP PC Diagnostics home page is displayed.
2. Select **Download HP Diagnostics UEFI**, and then select **Run**.

## Downloading HP PC Hardware Diagnostics UEFI by product name or number (select products only)

You can download HP PC Hardware Diagnostics UEFI by product name or number (select products only) to a USB flash drive.

---

 **NOTE:** For some products, you might have to download the software to a USB flash drive by using the product name or number.

---

1. Go to <http://www.hp.com/support>.
2. Enter the product name or number, select your computer, and then select your operating system.
3. In the **Diagnostics** section, follow the on-screen instructions to select and download the specific UEFI Diagnostics version for your computer.

## Using Remote HP PC Hardware Diagnostics UEFI settings (select products only)

Remote HP PC Hardware Diagnostics UEFI is a firmware (BIOS) feature that downloads HP PC Hardware Diagnostics UEFI to your computer. It can then execute the diagnostics on your computer, and it might upload results to a preconfigured server.

For more information about Remote HP PC Hardware Diagnostics UEFI, go to <http://www.hp.com/go/techcenter/pcdiags>, and then select **Find out more**.

## Downloading Remote HP PC Hardware Diagnostics UEFI

HP Remote PC Hardware Diagnostics UEFI is also available as a SoftPaq that you can download to a server.

### Downloading the latest Remote HP PC Hardware Diagnostics UEFI version

You can download the latest HP PC Hardware Diagnostics UEFI version to a USB flash drive.

1. Go to <http://www.hp.com/go/techcenter/pcdiags>. The HP PC Diagnostics home page is displayed.
2. Select **Download Remote Diagnostics**, and then select **Run**.

### Downloading Remote HP PC Hardware Diagnostics UEFI by product name or number

You can download HP Remote PC Hardware Diagnostics UEFI by product name or number.

**NOTE:** For some products, you might have to download the software by using the product name or number.

1. Go to <http://www.hp.com/support>.
2. Select **Software and Drivers**, select your type of product, enter the product name or number in the search box that is displayed, select your computer, and then select your operating system.
3. In the **Diagnostics** section, follow the on-screen instructions to select and download the **Remote UEFI** version for the product.

## Customizing Remote HP PC Hardware Diagnostics UEFI settings

Using the Remote HP PC Hardware Diagnostics setting in Computer Setup (BIOS), you can perform the following customizations:

- Set a schedule for running diagnostics unattended. You can also start diagnostics immediately in interactive mode by selecting **Execute Remote HP PC Hardware Diagnostics**.
- Set the location for downloading the diagnostic tools. This feature provides access to the tools from the HP website or from a server that has been preconfigured for use. Your computer does not require the traditional local storage (such as a hard drive or USB flash drive) to run remote diagnostics.
- Set a location for storing the test results. You can also set the user name and password that you use for uploads.
- Display status information about the diagnostics run previously.

To customize Remote HP PC Hardware Diagnostics UEFI settings, follow these steps:

1. Turn on or restart the computer, and when the HP logo appears, press **f10** to enter Computer Setup.
2. Select **Advanced**, and then select **Settings**.
3. Make your customization selections.
4. Select **Main**, and then **Save Changes and Exit** to save your settings.

Your changes take effect when the computer restarts.

# 10 Specifications

This chapter provides specifications for your computer.

## Computer specifications

This section provides specifications for your computer. When traveling with your computer, the computer dimensions and weights, as well as input power ratings and operating specifications, provide helpful information.

**Table 10-1 Computer specifications**

	Metric	U.S.
<b>Dimensions</b>		
Width	<b>307.6 mm</b>	12.11 in
Depth	<b>205.0 mm</b>	8.07 in
Height (400 nits/privacy, WLAN, BrightView)	<b>17.95 mm</b>	0.71 in
Height (250 nits, BrightView, WLAN; antiglare, 400 nits/privacy, WLAN; BrightView, WWAN)	<b>19.2 mm</b>	0.76 in
<b>Weight</b>	<b>1.31 kg</b>	2.89 lbs
<b>Input power</b>		
Operating voltage and current	19.5 V dc @ 2.31 A – 45 W 19.5 V dc @ 3.33 A – 65 W	
<b>Temperature</b>		
Operating	<b>5°C to 35°C</b>	41°F to 95°F
Nonoperating	<b>-20°C to 60°C</b>	-4°F to 140°F
<b>Relative humidity</b> (noncondensing)		
Operating	10% to 90%	
Nonoperating	5% to 95%	
<b>Maximum altitude</b> (unpressurized)		
Operating	<b>-15 m to 3,048 m</b>	-50 ft to 10,000 ft
Nonoperating	<b>-15 m to 12,192 m</b>	-50 ft to 40,000 ft
<b>NOTE:</b> Applicable product safety standards specify thermal limits for plastic surfaces. The device operates well within this range of temperatures.		

## 33.8 cm (13.3 in) display specifications

This section provides specifications for your display.

**Table 10-2 Display specifications**

	<b>Metric</b>	<b>U.S.</b>
Active diagonal size	<b>33.8 cm</b>	13.3 in
Resolution	1920 × 1080	
Surface treatment	Antiglare BrightView	
Brightness	250 nits (45% CG panels, touch and nontouch) 400 nits (sRGB 100% panels) 1000 nits (72% CG panels)	
Viewing angle	UWVA	
Backlight	LED	
Display panel interface	eDP	

## Solid-state drive specifications

This section provides specifications for your solid-state drives.

**Table 10-3 Solid-state drive specifications**

	<b>256 GB*</b>	<b>512 GB*</b>	<b>1 TB*</b>
<b>Dimensions</b>			
Height	1.0 mm	1.0 mm	1.0 mm
Length	50.8 mm	50.8 mm	50.8 mm
Width	28.9 mm	28.9 mm	28.9 mm
Weight	< 10 g	< 10 g	< 10 g
<b>Interface type</b>			
Ready time, maximum (to not busy)	1.0 ms	< 1.0 ms	1.0 ms
Access times, logical	0.1 ms	0.1 ms	0.1 ms
<b>Transfer rate</b>			
Sequential read	up to 2150 MB/s	up to 2150 MB/s	up to 2150 MB/s
Random read	Up to 300,000 IOPs	Up to 300,000 IOPs	Up to 300,000 IOPs
Sequential write	up to 1550 MB/s	up to 1550 MB/s	up to 1550 MB/s
Random write	Up to 100,000 IOPs	Up to 100,000 IOPs	Up to 100,000 IOPs
<b>Total logical sectors</b>	468,883,296	1,000,215,216	1,500,336,388
<b>Operating temperature</b>		<b>0°C to 70°C (32°F to 158°F)</b>	

\*1 GB = 1 billion bytes when referring to hard drive storage capacity. Actual accessible capacity is less. Actual drive specifications may differ slightly.

**NOTE:** Certain restrictions and exclusions apply. Contact support for details.

## Solid-state drive specifications (SATA-3)

This section provides specifications for your solid-state drive.

**Table 10-4 Solid-state drive specifications**

	<b>128 GB*</b>
<b>Dimensions</b>	
Height	1.35 mm
Weight	< 10 g
<b>Interface type</b>	SATA-3
Ready time, maximum (to not busy)	1.0 ms
Access times, logical	0.1 ms
<b>Transfer rate</b>	up to 540 MB/s
<b>Total logical sectors</b>	234,441,648
<b>Operating temperature</b>	<b>0°C to 70°C</b> (32°F to 158°F)
*1 GB = 1 billion bytes when referring to hard drive storage capacity. Actual accessible capacity is less. Actual drive specifications may differ slightly.	
<b>NOTE:</b> Certain restrictions and exclusions apply. Contact support for details.	

# 11 Statement of memory volatility

For general information regarding nonvolatile memory in HP Business computers, and to restore nonvolatile memory that can contain personal data after the system has been turned off and the hard drive has been removed, use these instructions.

HP Business computer products that use Intel®-based or AMD®-based system boards contain volatile DDR memory. The amount of nonvolatile memory present in the system depends upon the system configuration. Intel-based and AMD-based system boards contain nonvolatile memory subcomponents as originally shipped from HP, with the following assumptions:

- No subsequent modifications were made to the system.
- No applications, features, or functionality were added to or installed on the system.

Following system shutdown and removal of all power sources from an HP Business computer system, personal data can remain on volatile system memory (DIMMs) for a finite period of time and also remains in nonvolatile memory. Use the following steps to remove personal data from the computer, including the nonvolatile memory found in Intel-based and AMD-based system boards.

 **NOTE:** If your tablet has a keyboard base, connect to the keyboard base before beginning steps in this chapter.

## Current BIOS steps

Use these instructions to restore nonvolatile memory.

1. Follow these steps to restore the nonvolatile memory that can contain personal data. Restoring or reprogramming nonvolatile memory that does not store personal data is neither necessary nor recommended.

- a. Turn on or restart the computer, and then quickly press **esc**.

 **NOTE:** If the system has a BIOS administrator password, enter the password at the prompt.

- b. Select **Main**, select **Apply Factory Defaults and Exit**, and then select **Yes** to load defaults. The computer restarts.
- c. During the restart, press **esc** while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen.

 **NOTE:** If the system has a BIOS administrator password, enter the password at the prompt.

- d. Select the **Security** menu, select **Restore Security Settings to Factory Defaults**, and then select **Yes** to restore security level defaults. The computer reboots.
- e. During the reboot, press **esc** while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen.

 **NOTE:** If the system has a BIOS administrator password, enter the password at the prompt.

- f. If an asset or ownership tag is set, select the **Security** menu and scroll down to the **Utilities** menu. Select **System IDs**, and then select **Asset Tracking Number**. Clear the tag, and then make the selection to return to the prior menu.

- g. If a DriveLock password is set, select the **Security** menu, and scroll down to **Hard Drive Utilities** under the **Utilities** menu. Select **Hard Drive Utilities**, select **DriveLock**, and then clear the check box for **DriveLock password on restart**. Select **OK** to proceed.
- h. Select the **Main** menu, and then select **Reset BIOS Security to factory default**. Click **Yes** at the warning message. The computer reboots.
- i. During the reboot, press **esc** while the "Press the ESC key for Startup Menu" message is displayed at the bottom of the screen.

---

**NOTE:** If the system has a BIOS administrator password, enter the password at the prompt.

---

- j. Select the **Main** menu, select **Apply Factory Defaults and Exit**, select **Yes** to save changes and exit, and then select **Shutdown**.
  - k. Reboot the system. If the system has a Trusted Platform Module (TPM), fingerprint reader, or both, one or two prompts will appear—one to clear the TPM and the other to Reset Fingerprint Sensor. Press or tap **f1** to accept or **f2** to reject.
  - l. Remove all power and system batteries for at least 24 hours.
2. Complete one of the following:
- Remove and retain the storage drive.  
– or –
  - Clear the drive contents by using a third-party utility designed to erase data from an SSD.  
– or –
  - Clear the contents of the drive by using the following BIOS Setup Secure Erase command option steps:

If you clear data using Secure Erase, you cannot recover it.

- a. Turn on or restart the computer, and then quickly press **esc**.
- b. Select the **Security** menu and scroll down to the **esc** menu.
- c. Select **Hard Drive Utilities**.
- d. Under **Utilities**, select **Secure Erase**, select the hard drive storing the data you want to clear, and then follow the on-screen instructions to continue.

– or –

Clear the contents of the drive using the following Disk Sanitizer commands steps:

- i. Turn on or restart the computer, and then quickly press **esc**.
- ii. Select the **Security** menu and scroll down to the **Utilities** menu.
- iii. Select **Hard Drive Utilities**.
- iv. Under **Utilities**, select **Disk Sanitizer**, select the hard drive with the data that you want to clear, and then follow the on-screen instructions to continue.

---

**NOTE:** The amount of time it takes for Disk Sanitizer to run can take several hours. Plug the computer into an AC outlet before starting.

---

# Nonvolatile memory usage

Use this table to troubleshooting nonvolatile memory usage.

**Table 11-1 Troubleshooting steps for nonvolatile memory usage**

Nonvolatile memory type	Amount (Size)	Does this memory store customer data?	Does this memory retain data when power is removed?	What is the purpose of this memory?	How is data entered into this memory?	How is this memory write-protected?
HP Sure Start flash (select models only)	8 MB	No	Yes	Provides protected backup of critical System BIOS code, EC firmware, and critical computer configuration data for select platforms that support HP Sure Start.  For more information, see <a href="#">Using HP Sure Start (select products only) on page 81</a> .	Data cannot be written to this device via the host processor. The content is managed solely by the HP Sure Start Embedded Controller.	This memory is protected by the HP Sure Start Embedded Controller.
Real Time Clock (RTC) battery backed-up CMOS configuration memory	256 bytes	No	Yes	Stores system date and time and noncritical data.	RTC battery backed-up CMOS is programmed using Computer Setup (BIOS), or by changing the Windows date & time.	This memory is not write-protected.
Controller (NIC) EEPROM	64 KB (not customer accessible)	No	Yes	Stores NIC configuration and NIC firmware.	NIC EEPROM is programmed using a utility from the NIC vendor that can be run from DOS.	A utility must be used to write data to this memory and is available from the NIC vendor. Writing data to this ROM in an inappropriate manner will render the NIC non-functional.
DIMM Serial Presence Detect (SPD) configuration data	256 bytes per memory module, 128 bytes programmable (not customer accessible)	No	Yes	Stores memory module information.	DIMM SPD is programmed by the memory vendor.	Data cannot be written to this memory when the module is installed in a computer. The specific write-protection method varies by memory vendor.
System BIOS	9 MB	Yes	Yes	Stores system BIOS code and computer configuration data.	System BIOS code is programmed at the factory. Code is updated when the system BIOS is updated. Configuration data and settings are entered using the Computer Setup (BIOS) or a custom utility.	<b>NOTE:</b> Writing data to this ROM in an inappropriate manner can render the computer non-functional.  A utility must be used for writing data to this memory and is available

**Table 11-1 Troubleshooting steps for nonvolatile memory usage (continued)**

Nonvolatile memory type	Amount (Size)	Does this memory store customer data?	Does this memory retain data when power is removed?	What is the purpose of this memory?	How is data entered into this memory?	How is this memory write-protected?
Intel Management Engine Firmware (present only in select Elite or Z models. For more information, go to <a href="http://www.hp.com/support">http://www.hp.com/support</a> . Select <b>Identify your product for manuals and specific product information</b> , and then follow the on-screen instructions.)	1.5 MB or 7 MB	Yes	Yes	Stores Management Engine Code, Settings, Provisioning Data and iAMT third-party data store.	Management Engine Code is programmed at the factory. Code is updated via Intel secure firmware update utility. Unique Provisioning Data can be entered at the factory or by an administrator using the Management Engine (MEBx) setup utility. The third-party data store contents can be populated by a remote management console or local applications that have been registered by an administrator to have access to the space.	on the HP website; go to <a href="http://www.hp.com/support">http://www.hp.com/support</a> . Select <b>Find your product</b> , and then follow the on-screen instructions.
Bluetooth flash (select products only)	2 megabits	No	Yes	Stores Bluetooth configuration and firmware.	Bluetooth flash is programmed at the factory. Tools for writing data to this memory are not publicly available but can be obtained from the silicon vendor.	A utility must be used for writing data to this memory and is made available through newer versions of the driver whenever the flash requires an upgrade.
802.11 WLAN EEPROM	4 kilobits to 8 kilobits	No	Yes	Stores configuration and calibration data.	802.11 WLAN EEPROM is programmed at the factory. Tools for writing data to this memory are not made public.	A utility must be used for writing data to this memory and is typically not made available to the public unless a firmware upgrade is necessary to address a unique issue.
Camera (select products only)	64 kilobits	No	Yes	Stores camera configuration and firmware.	Camera memory is programmed using a utility from the device manufacturer that can be run from Windows.	A utility must be used for writing data to this memory and is typically not made available to the public unless a firmware upgrade is necessary to address a unique issue.
Fingerprint reader (select products only)	512 KB flash	Yes	Yes	Stores fingerprint templates.	Fingerprint reader memory is programmed by user enrollment in HP ProtectTools Security Manager.	Only a digitally signed application can make the call to write to the flash.

# Questions and answers

Use this section to answer your questions about nonvolatile memory.

## 1. How can the BIOS settings be restored (returned to factory settings)?

**IMPORTANT:** The restore defaults feature does not securely erase any data on your hard drive. See question and answer 6 for steps to securely erase data.

The restore defaults feature does not reset the Custom Secure Boot keys. See question and answer 7 for information about resetting the keys.

- a. Turn on or restart the computer, and then quickly press `esc`.
- b. Select **Main**, and then select **Apply Factory Defaults and Exit**.
- c. Follow the on-screen instructions.
- d. Select **Main**, select **Save Changes and Exit**, and then follow the on-screen instructions.

## 2. What is a UEFI BIOS, and how is it different from a legacy BIOS?

The Unified Extensible Firmware Interface (UEFI) BIOS is an industry-standard software interface between the platform firmware and an operating system (OS). It replaces the older BIOS architecture but supports much of the legacy BIOS functionality.

Like the legacy BIOS, the UEFI BIOS provides an interface to display the system information and configuration settings and to change the configuration of your computer before an OS is loaded. BIOS provides a secure runtime environment that supports a Graphic User Interface (GUI). In this environment, you can use either a pointing device (touch screen, touchpad, pointing stick, or USB mouse) or the keyboard to navigate and make menu and configuration selections. The UEFI BIOS also contains basic system diagnostics.

The UEFI BIOS provides functionality beyond that of the legacy BIOS. In addition, the UEFI BIOS works to initialize the computer's hardware before loading and executing the OS; the runtime environment allows the loading and execution of software programs from storage devices to provide more functionality, such as advanced hardware diagnostics (with the ability to display more detailed system information) and advanced firmware management and recovery software.

HP has provided options in Computer Setup (BIOS) to allow you to run in legacy BIOS, if required by the operating system. Examples of this requirement would be if you upgrade or downgrade the OS.

## 3. Where is the UEFI BIOS located?

The UEFI BIOS is located on a flash memory chip. You must use a utility to write to the chip.

## 4. What kind of configuration data is stored on the DIMM Serial Presence Detect (SPD) memory module? How would this data be written?

The DIMM SPD memory contains information about the memory module, such as size, serial number, data width, speed and timing, voltage, and thermal information. This information is written by the module manufacturer and stored on an EEPROM. You cannot write to this EEPROM when the memory module is installed in a computer. Third-party tools do exist that can write to the EEPROM when the memory module is not installed in a computer. Various third-party tools are available to read SPD memory.

## 5. What is meant by “Restore the nonvolatile memory found in Intel-based system boards”?

This message relates to clearing the Real Time Clock (RTC) CMOS memory that contains computer configuration data.

## 6. How can the BIOS security be reset to factory defaults and erase the data?

---

 **IMPORTANT:** Resetting results in the loss of information.

These steps do not reset Custom Secure Boot Keys. See question and answer 7 for information about resetting the keys.

---

- a. Turn on or restart the computer, and then quickly press **esc**.
- b. Select **Main**, and then select **Reset Security to Factory Defaults**.
- c. Follow the on-screen instructions.
- d. Select **Main**, select **Save Changes and Exit**, and then follow the on-screen instructions.

#### 7. How can the Custom Secure Boot Keys be reset?

Secure Boot is a feature to ensure that only authenticated code can start on a platform. If you enabled Secure Boot and created Custom Secure Boot Keys, disabling Secure Boot does not clear the keys. You must also select to clear the Custom Secure Boot Keys. Use the same Secure Boot access procedure that you used to create the Custom Secure Boot Keys, but select to clear or delete all Secure Boot Keys.

- a. Turn on or restart the computer, and then quickly press **esc**.
- b. Select the **Security** menu, select **Secure Boot Configuration**, and then follow the on-screen instructions.
- c. At the **Secure Boot Configuration** window, select **Secure Boot**, select **Clear Secure Boot Keys**, and then follow the on-screen instructions to continue.

## Using HP Sure Start (select products only)

Select computer models are configured with HP Sure Start, a technology that continuously monitors your computer's BIOS for attacks or corruption.

If the BIOS becomes corrupted or is attacked, HP Sure Start restores the BIOS to its previously safe state, without user intervention. Those select computer models ship with HP Sure Start configured and enabled. HP Sure Start is configured and already enabled so that most users can use the HP Sure Start default configuration. Advanced users can customize the default configuration.

To access the latest documentation on HP Sure Start, go to <http://www.hp.com/support>.

## 12 Power cord set requirements

This chapter provides power cord requirements for countries and regions.

The wide-range input feature of the computer permits it to operate from any line voltage from 100 V ac to 120 V ac, or from 220 V ac to 240 V ac.

The 3-conductor power cord set included with the computer meets the requirements for use in the country or region where the equipment is purchased.

Power cord sets for use in other countries or regions must meet the requirements of the country and region where the computer is used.

### Requirements for all countries

These power cord requirements are applicable to all countries and regions.

- The length of the power cord set must be at least **1.0 m** (3.3 ft) and no more than **2.0 m** (6.5 ft).
- All power cord sets must be approved by an acceptable accredited agency responsible for evaluation in the country or region where the power cord set will be used.
- The power cord sets must have a minimum current capacity of 10 A and a nominal voltage rating of 125 V ac or 250 V ac, as required by the power system of each country or region.
- The appliance coupler must meet the mechanical configuration of an EN 60 320/IEC 320 Standard Sheet C13 connector for mating with the appliance inlet on the back of the computer.

### Requirements for specific countries and regions

To determine power cord requirements for specific countries and regions, use this table.

**Table 12-1 Power cord requirements for specific countries and regions**

Country/region	Accredited agency	Applicable note number
Argentina	IRAM	1
Australia	SAA	1
Austria	OVE	1
Belgium	CEBEC	1
Brazil	ABNT	1
Canada	CSA	2
Chile	IMQ	1
Denmark	DEMKO	1
Finland	FIMKO	1
France	UTE	1
Germany	VDE	1

**Table 12-1 Power cord requirements for specific countries and regions (continued)**

Country/region	Accredited agency	Applicable note number
India	BIS	1
Israel	SII	1
Italy	IMQ	1
Japan	JIS	3
The Netherlands	KEMA	1
New Zealand	SANZ	1
Norway	NEMKO	1
The People's Republic of China	CCC	4
Saudi Arabia	SASO	7
Singapore	PSB	1
South Africa	SABS	1
South Korea	KTL	5
Sweden	SEMKO	1
Switzerland	SEV	1
Taiwan	BSMI	6
Thailand	TISI	1
The United Kingdom	ASTA	1
The United States	UL	2

1. The flexible cord must be Type H05VV-F, 3-conductor, 0.75 mm<sup>2</sup> conductor size. Power cord set fittings (appliance coupler and wall plug) must bear the certification mark of the agency responsible for evaluation in the country or region where it will be used.
2. The flexible cord must be Type SVT/SJT or equivalent, No. 18 AWG, 3-conductor. The wall plug must be a two-pole grounding type with a NEMA 5-15P (15 A, 125 V ac) or NEMA 6-15P (15 A, 250 V ac) configuration. CSA or C-UL mark. UL file number must be on each element.
3. The appliance coupler, flexible cord, and wall plug must bear a T mark and registration number in accordance with the Japanese Dentori Law. The flexible cord must be Type VCTF, 3-conductor, 0.75 mm<sup>2</sup> or 1.25 mm<sup>2</sup> conductor size. The wall plug must be a two-pole grounding type with a Japanese Industrial Standard C8303 (7 A, 125 V ac) configuration.
4. The flexible cord must be Type RVV, 3-conductor, 0.75 mm<sup>2</sup> conductor size. Power cord set fittings (appliance coupler and wall plug) must bear the CCC certification mark.
5. The flexible cord must be Type H05VV-F 3-conductor, 0.75 mm<sup>2</sup> conductor size. KTL logo and individual approval number must be on each element. Approval number and logo must be printed on a flag label.
6. The flexible cord must be Type HVCTF 3-conductor, 1.25 mm<sup>2</sup> conductor size. Power cord set fittings (appliance coupler, cable, and wall plug) must bear the BSMI certification mark.
7. For 127 V ac, the flexible cord must be Type SVT or SJT 3-conductor, 18 AWG, with plug NEMA 5-15P (15 A, 125 V ac), with UL and CSA or C-UL marks. For 240 V ac, the flexible cord must be Type H05VV-F 3-conductor, 0.75 mm<sup>2</sup> or 1.00 mm<sup>2</sup> conductor size, with plug BS 1363/A with BSI or ASTA marks.

---

# 13 Recycling

When a nonrechargeable or rechargeable battery has reached the end of its useful life, do not dispose of the battery in general household waste. Follow the local laws and regulations in your area for battery disposal.

HP encourages customers to recycle used electronic hardware, HP original print cartridges, and rechargeable batteries. For more information about recycling programs, see the HP website at <http://www.hp.com/recycle>.
