

Maintenance and Service Guide

P22v G4/V22 model

SUMMARY

This guide provides information about spare parts, removal and replacement of parts, diagnostic tests, problem troubleshooting, and more.

1 Getting started

Read this chapter to learn about safety information and where to find additional HP resources.

Important safety information

Carefully read the cautions and notes within this document to minimize the risk of personal injury to service personnel. The cautions and notes are not exhaustive. Proper service methods are important to the safe, reliable operation of equipment. Improper service methods can damage equipment.

The service procedures recommended and described in this service manual provide effective methods of performing service operations. Service engineers should have prior repair knowledge and experience as well as appropriate training for the product before performing service procedures.

- Be sure your working environment is dry and clean and meets all government safety requirements.
- Be sure that other persons are safe while you are servicing the product.
- Do not perform any action that can cause a hazard to the customer or make the product unsafe.
- Use proper safety devices to ensure your personal safety.
- Always use approved tools and test equipment for servicing.
- Never assume the product's power is disconnected from the main power supply. Check that it is disconnected before opening the product's cabinet.
- Modules containing electrical components are sensitive to electrostatic discharge (ESD). Follow ESD safety procedures while handling these parts.
- Some products contain more than one battery. Do not disassemble or expose a battery to high temperatures, such as throwing into fire, or the battery may explode.
- Refer to government requirements for battery recycling or disposal.

This information provides general service information for the monitor. Adherence to the procedures and precautions is essential for proper service.

IMPORTANT: Only trained service personnel who are familiar with this HP product should perform service or maintenance for it. Before performing any service or maintenance, personnel must read the important safety information.

IMPORTANT: You must disconnect the power cord from the power source before opening the monitor to prevent component damage.

Important service information and precautions

- Repair must be performed by professional service technicians in a repair center. End users should not perform these procedures.
- Please note during servicing that the primary side is the high voltage area.
- This monitor meets ROHS requirements. Be sure to use lead-free solder wire when soldering.
- If you must change a capacitor, be sure to match the polarity as printed on the PCB.
- If you must replace a capacitor, make sure the specification and part number match the BOM and location.
- If you must replace a capacitor, insert new parts carefully to avoid a short circuit caused by the near

pin.

- Do not get the board wet. Water and moisture can cause a short circuit that causes malfunctions.
- To avoid damage, be sure to use lead-free solder.
- When soldering, work quickly to avoid overheating the circuit board.
- Keep the soldering iron tip clean and well tinned when replacing parts.
- After repair, perform a close inspection of the circuit board to confirm it is in good condition.
- After repair, perform a function test to confirm the power supply is working properly.

ERP Lot5 requirement

1. A professional repairer must have the technical competence to repair electronic displays and comply with the applicable regulations for repairers of electrical equipment in the Member States where the repairer operates. Reference to an official registration system as professional repairer, where such a system exists in the Member States, shall be accepted as proof of compliance.

2. A professional repairer must have insurance that covers liabilities resulting from repairs, regardless of whether required by the Member State.

RoHS (2002/95/EC) requirements

Applied to all countries that require RoHS.

The RoHS (Restriction of Hazardous Substance in Electrical and Electronic Equipment Directive) is a legal requirement by the EU (European Union) for the global electronics industry sold in the EU and other countries. Any electrical and electronics products launched in the market after June 2006 should meet this RoHS requirement. Products launched in the market before June 2006 are not required to be compliant with RoHS parts. If the original parts are not RoHS compliant, the replacement parts can be non-ROHS compliant. If the original parts are RoHS compliant, the replacement parts **MUST** be RoHS compliant.

If product service or maintenance requires replacing parts, confirm the RoHS requirement before replacement.

General descriptions

This manual contains general information. There are two levels of service:

Level 1: Cosmetic/appearance/alignment service

Level 2: Circuit board or standard parts replacement

Firmware updates

Firmware updates for the monitor are available at support.hp.com. If no firmware is posted, the monitor does not need a firmware update.

Before returning the repaired product to the customer

Perform an AC leakage current check on exposed metallic parts to be sure the product is safe to operate without the potential of electrical shock. Do not use a line isolation transformer during this check.

Measurements that are not within specified limits present a possible shock hazard. You must check and repair the product before returning it to the customer.

2 Monitor features

This chapter provides an overview of the monitor's features.

Features

Depending on the model, your monitor might include the following features:

- The following models, which include full-screen support for lower resolutions; includes custom scaling for maximum image size while preserving original aspect ratio:
 - 54.6 cm (21.5 in) diagonal viewable screen area with 1920 × 1080 resolution
- In-plane switching (IPS) or twisted nematic (TN) panel
- Nonglare panel with an LED backlight
- Wide viewing angle on IPS models to allow viewing from a sitting or standing position, or moving from side to side (select products only)
- Tilt adjustment capability
- Removable stand for flexible monitor head mounting solutions
- High-Definition Multimedia Interface™ (HDMI) video input (select products only; cable included in select regions)
- VGA video input (cable included in select regions)
- Audio-in jack (P21 models only)
- Four on-screen display (OSD) buttons, three that you can reconfigure to quickly allow selection of the most commonly used operations
- Plug and Play capability if supported by your operating system
- VESA® mounting bracket for attaching the monitor head to a wall-mount device or swing arm (select products only)
- Security cable slot on the rear of the monitor for an optional security cable
- On-screen adjustments in several languages for easy setup and screen optimization
- Support for FreeSync™, an Adaptive-Sync technology, to reduce stuttering and tearing in games and videos by locking the monitor's refresh rate to the frame rate of a compatible graphics card (select products only).

NOTE: Adaptive refresh rates vary by display.

- Energy saver feature to meet requirements for reduced power consumption

NOTE: For safety and regulatory information, refer to the Product Notices provided in your documentation kit. To access the latest user guides or manuals for your product, go to <http://www.hp.com/support> and follow the instructions to find your product. Then select **Manuals**.

Front components

To identify the components on the front of the monitor, use this illustration and table.

Table 1-1 Front components and their descriptions

Component	Description
(1) Menu button	Press to open the OSD menu and select a menu item from the OSD.
(2) OSD buttons (assignable)	When the OSD menu is open, press the buttons to navigate through the menu. The function light icons indicate the default button functions. For a description of these functions, see Using the function buttons on page 14 . You can reassign the function buttons to quickly select the most commonly used operations. See Reassigning the function buttons on page 14 .
(3) Power button	Turns the monitor on or off.
(4) Power light	White: The monitor is on. Amber: Monitor is in a reduced power state because of inactivity. See Using Auto-Sleep Mode on page 14 .

Rear and side components

To identify the components on the rear of the monitor, use this illustration and table.

Table 1-2 Rear and side components and their descriptions

Component	Description
(1) Power connector	Connects the power cord.
(2) Stand release button	Releases the stand from the monitor.
(3) HDMI port (select products only)	Connects the HDMI cable to a source device such as a computer or game console.
(4) VGA connector	Connects the VGA cable to the source device.
(5) Audio-in jack (select products only)	Connects the audio cable to the monitor.
(6) Security cable slot	Connects an optional security cable.

Locating the serial number and product number

The Barcode label **(1)** and Spec label **(2)** are located on the rear of the monitor. The serial number and product number are located on a Safety label. You may need these numbers when contacting HP about the monitor model.

For worldwide models:

3 Illustrated parts catalog

To identify the monitor major components, use this illustration and table.

Table 3-1: Monitor major components and their descriptions

Item	Description	Qty
1	#Front Cover_ABS 35%_Jack Black	1
2	#OSD key_ABS 35%_Jack Black	1
3	#Lens_PC_Clear	1
4	#OSD key BD	1
5	#21.5 LCM_Panda OC	1
6	#Grounding screw	1
7	#PCB screw	1
8	#Front Cover fixing screw	1
9	#Power BD	1
10	#IF BD	2
11	#Main chassis_SGCC	1
12	#VGA screw	1
13	#Wall mount bracket	1

14	#Rear Cover_ABS 35%_Jack Black	1
15	#Rear Cover fixing screw	1
16	#Wall mount screw	1
17	#Stand Assy	1
18	#Base Assy	1

How to order parts

The HP authorized repair center can purchase the power board from HP.

Power board

Description	HP spare part number	Manufacturer part number
PWR BD P22V G4&V22 PANDA C5 DIP	M84529-001	755.06802.0001
PWR BD P22V G4&V22 AUO C5 DIP	M84530-001	755.06802.0002
PWR BD P22V G4 &V22 INX-L31 C5 DIP	M91119-001	755.06802.0003

Capacitors and connectors are available for purchase from the following EU distributors:

- Su'scon: www.su-scon.com.tw
- CAPXON: www.capxongroup.com

Capacitors by distributor

Component description	Location	Component distributor	Distributor part number
CAP EL 100U 450V M RT7.5 18*35 SUSCON	PT501	SUSCON	SE450M101K35T014L13R
CAP EL 100U 450V M RT7.5 18*35.5 KL CAPXON		CAPXON	KL101M450K355ECRRV

Connectors by manufacturer

Component description	Location identifier	Component distributor	Distributor part number	Remark
VGA	CRT1	Kycon, Inc	https://www.digikey.com PN: 2092-K61X-E15S-N-ND	
HDMI	HDMI1	Switchcraft Inc.	https://www.digikey.com PN: 137-RAHHD19TR-ND	

NOTE: The connector may need to be modified to meet functionality, regulatory and safety requirements if it is not an exact match.

You can purchase cables from the HP part store at <https://partsurfer.hp.com/Search.aspx>.

NOTE: HP continually improves and changes product parts. For complete and current information about supported parts for your computer, go to <http://partsurfer.com>, select your country or region, and then follow the on-screen instructions.

4 Removal and replacement procedures

Adherence to these procedures and precautions is essential for proper service.

Preparation for disassembly

Use this information to properly prepare to disassemble and reassemble the monitor.

- 1) Read the “Important safety information” and “Important service information and precautions” sections in the “Getting started” chapter of this guide.
- 2) Clean the room for disassembly.
- 3) Identify the disassembly area.
- 4) Check the position that the monitors are to be placed along with the number of monitors. Prepare the area for material flow according to the disassembly layout.
- 5) Be sure to have the following equipment and materials:
 - Press fixture
 - Working table
 - Screwdriver
 - Knife
 - Gloves
 - Cleaning cloth
 - ESD protection
 - Scraper bar in the following dimensions:

RC

Before removing the RC, follow these steps:

- ▲ Prepare the monitor for disassembly. See Preparation for disassembly on page 10.
- 1) Remove Stand Base From Display Head.

2) Remove Rear Cover From Display Head.

3) Remove Acetate Tape And OSD key BD From Display Head.

4) Remove Bracket Assembly From Display Head.

5) Remove Panel Assembly away from front bezel.

6) Remove screws from Bracket Assembly and PCB board.

- 7) Remove Interface BD And Power BD From Bracket Assembly.

Power board

The power board part number is 755.06802.0001.

Before removing the power board, follow these steps:

- ▲ Prepare the monitor for disassembly. See Preparation for disassembly on page 10.

Remove the power board:

- 1) The HP P22v G4 & V22 power board no connector:

- 2) Locate the part number location on the board.

- 3) Pin solder with soldering iron and absorber.
NA
- 4) Lift the connector up and away from the PCB.
No

Connector repair

This procedure includes VGA and HDMI connectors.

The connectors are on the main board (board part number 7ZB.06801.0011).

The connector identifiers are as follows:

Connector	Location
VGA	CRT1
HDMI	HDMI1

Before repairing connectors, follow these steps:

- ▲ Prepare the monitor for disassembly. See [Preparation for disassembly](#) on page 10.

VGA connector CRT1

Repair the VGA connector:

- 1) Use a hot air gun to melt the solder on the pins. Pin solder with soldering iron and absorber. You can gently push down with the soldering iron once everything is molten to move VGA connector out of the through holes.

- 2) Lift the VGA connector from the PCB.
- 3) Place the new component on the PCB. Be sure that it matches the PCB footprint.
- 4) Solder the new component.

HDMI connector HDMI1

Repair the HDMI connector:

- 1) Use a soldering iron and a de-soldering pump to remove as much solder as possible from the pin.

- 2) Use a hot air gun to melt the solder on the pins.

- 3) Lift the HDMI connector from the PCB.
- 4) Place the new component on the PCB. Be sure that it matches the PCB footprint.
- 5) Solder the new component.

Function test

After repair, be sure to confirm that all functions are working.

Table 4-1 Function test

Test item	Operating description	Tool used
VGA test	Confirm whether image displays and sound plays correctly on the monitor.	Computer or DVD player, sound bar
HDMI Test	Confirm whether image displays correctly on the monitor	Computer or DVD player

Support and troubleshooting

The following table lists possible problems, the possible cause or each problem, and the recommended solutions.

Table 4-2 Solving common problems

Problem	Possible cause	Solution
Screen is blank or video is flashing.	Power cord is disconnected.	Connect the power cord.
	Monitor is turned off.	Power the power button. NOTE: If pressing the Power button has no effect, press and hold the power button for 10 seconds to disable the Power button lockout feature.
	Video cable is improperly connected.	Connect the video cable properly.
	System is in Sleep mode.	Press any key on the keyboard or move the mouse to exit Sleep mode.
	Video card is incompatible.	Open the OSD menu and select the Input menu. Set Auto-Switch Input to Off and manually select the input. or Replace the video card or connect the video cable to one of the computer's on-board video sources.
Image appears blurred, indistinct, or too dark.	Brightness is too low.	Open the OSD menu and select Brightness to adjust the brightness scale as needed.
Check Video Cable is displayed on screen.	Monitor video cable is disconnected.	Connect the appropriate video signal cable between the computer and monitor. Be sure that the computer power is off while you connect the video cable.
Input Signal Out of Range is displayed on screen.	Video resolution and/or refresh rate are set higher than what the monitor supports.	Change the settings to a supported setting.
The monitor does not enter into a low-power sleep state.	The monitor's power saving control is disabled.	Open the OSD menu and select Power , select Auto-Sleep Mode and set auto-sleep to On .
"OSD Lockout" is displayed.	The monitor's OSD lock function is enabled.	Press and hold the Menu button to disable the OSD lockout function.

"Power Button Lockout" is displayed.	The monitor's Power Button Lockout feature is enabled.	Press and hold the Power button for 10 seconds to disable the power button lock function.
FreeSync is enabled in monitor OSD, but refresh rate does not vary.	Variable refresh rate (VRR) might be disabled in the graphics card software.	Enable VRR in your graphics card software.
	The refresh rate might be set too low.	In Windows, set the refresh rate to its maximum setting.
	Content and/or hardware might not be VRR capable.	Verify the content being displayed is VRR capable. Be sure that a computer with an AMD Radeon graphics card or a AMD A-Series processor is connected to the monitor using a DisplayPort or HDMI cable.
The monitor is experiencing screen tearing.	FreeSync might not be enabled.	Open the OSD and enable FreeSync.
