

Pairing your mouse with a new receiver

Follow these instructions to pair your mouse with the new wireless receiver:

1. Insert the receiver into a USB Type-A port on your computer. 
The receiver automatically enters pairing mode for 60 seconds.
2. Turn on the mouse. Be sure the mouse is within one meter of the receiver.
3. Press the host select button **A**. The LED **B** blinks rapidly.
4. Press and hold the host select button for three seconds to enter pairing mode. The LED blinks slowly. When the mouse successfully connects with the receiver, the LED stays on for five seconds and then turns off.

Repeat these steps if the mouse fails to connect with the receiver.
