

Maintenance and Service Guide X32C model

SUMMARY

This guide provides information about spare parts, removal and replacement of parts, diagnostic tests, problem troubleshooting, and more.

1 Getting started

Read this chapter to learn about safety information and where to find additional HP resources.

Important safety information

Carefully read the cautions and notes within this document to minimize the risk of personal injury to service personnel. The cautions and notes are not exhaustive. Proper service methods are important to the safe, reliable operation of equipment. Improper service methods can damage equipment.

The service procedures recommended and described in this service manual provide effective methods of performing service operations. Service engineers should have prior repair knowledge and experience as well as appropriate training for the product before performing service procedures.

- Be sure your working environment is dry and clean and meets all government safety requirements.
- Be sure that other persons are safe while you are servicing the product.
- Do not perform any action that can cause a hazard to the customer or make the product unsafe.
- Use proper safety devices to ensure your personal safety.
- Always use approved tools and test equipment for servicing.
- Never assume the product's power is disconnected from the main power supply. Check that it
 is disconnected before opening the product's cabinet.
- Modules containing electrical components are sensitive to electrostatic discharge (ESD).
 Follow ESD safety procedures while handling these parts.
- Some products contain more than one battery. Do not disassemble or expose a battery to high temperatures, such as throwing into fire, or the battery may explode.
- Refer to government requirements for battery recycling or disposal.

This information provides general service information for the monitor. Adherence to the procedures and precautions is essential for proper service.

IMPORTANT: Only trained service personnel who are familiar with this HP product should perform service or maintenance for it. Before performing any service or maintenance, personnel must read the important safety information.

IMPORTANT: You must disconnect the power cord from the power source before opening the monitor to prevent component damage.

Important service information and precautions

- Repair must be performed by professional service technicians in a repair center. End users should not perform these procedures.
- Please note during servicing that the primary side is the high voltage area.
- This monitor meets ROHS requirements. Be sure to use lead-free solder wire when soldering.
- If you must change a capacitor, be sure to match the polarity as printed on the PCB.
- If you must replace a capacitor, make sure the specification and part number match the BOM and location.
- If you must replace a capacitor, insert new parts carefully to avoid a short circuit caused by the

near pin.

- Do not get the board wet. Water and moisture can cause a short circuit that causes malfunctions.
- To avoid damage, be sure to use lead-free solder.
- When soldering, work quickly to avoid overheating the circuit board.
- Keep the soldering iron tip clean and well tinned when replacing parts.
- After repair, perform a close inspection of the circuit board to confirm it is in good condition.
- After repair, perform a function test to confirm the power supply is working properly.

ERP Lot5 requirement

- 1. A professional repairer must have the technical competence to repair electronic displays and comply with the applicable regulations for repairers of electrical equipment in the Member States where the repairer operates. Reference to an official registration system as professional repairer, where such a system exists in the Member States, shall be accepted as proof of compliance.
- 2. A professional repairer must have insurance that covers liabilities resulting from repairs, regardless of whether required by the Member State.

RoHS (2002/95/EC) requirements

Applied to all countries that require RoHS.

The RoHS (Restriction of Hazardous Substance in Electrical and Electronic Equipment Directive) is a legal requirement by the EU (European Union) for the global electronics industry sold in the EU and other countries. Any electrical and electronics products launched in the market after June 2006 should meet this RoHS requirement. Products launched in the market before June 2006 are not required to be compliant with RoHS parts. If the original parts are not RoHS complaint, the replacement parts can be non-ROHS complaint. If the original parts are RoHS compliant, the replacement parts MUST be RoHS complaint.

If product service or maintenance requires replacing parts, confirm the RoHS requirement before replacement.

General descriptions

This manual contains general information. There are two levels of service:

Level 1: Cosmetic/appearance/alignment service

Level 2: Circuit board or standard parts replacement

Firmware updates

Firmware updates for the monitor are available at <u>support.hp.com</u>. If no firmware is posted, the monitor does not need a firmware update.

Before returning the repaired product to the customer

Perform an AC leakage current check on exposed metallic parts to be sure the product is safe to operate without the potential of electrical shock. Do not use a line isolation transformer during this check.

Measurements that are not within specified limits present a possible shock hazard. You must check and repair the product before returning it to the customer.

2 Monitor features

This chapter provides an overview of the monitor's features.

Features

The monitor includes the following features:

- 80,0 cm(31,5in) curved 1500mm radius with 1920x1080 resolution, ultra-wide backlit displajy,
 plus full-screen support for lower resolutions Antiglare panel with an LED backlight
- Wide viewing angle to allow viewing from a sitting or standing position, or when moving from side to side
- Tilt adjustment capability
- Height adjustment capability
- DisplayPort (DP) video input
- High-Definition Multimedia Interface(HDMI) video input (cable provided)
- Audio-out (headphone)jack
- Plug and Play capability, if supported by your operating system
- Securitycable slot provision on rear of monitor for optional security cable
- On-screen display (OSD) adjustments in several languages for easy setup and screen optimization
- High-bandwidth Digital Content Protection (HDCP) copy protection on all digital inputs
- VESA mounting bracket for attaching the monitor to a wall-mount device or swing arm
- Low blue light mode settings to create a more relaxing and less stimulating image
- Energy saver feature to meet requirements for reduced power consumption

NOTE: For safety and regulatory information, refer to the Product Notices provided in your documentation kit. To access the latest user guides or manuals for your product, go to http://www.hp.com/support and follow the instructions to find your product. Then select **Manuals**.

Front components

To identify the components on the front of the monitor, use this illustration and table.

Table 1-1: Front components and their descriptions

Control		Function	
1	Menu/OK	If the OSD menu is open, press to confirm selection.	
		If the OSD menu is closed, press to open the OSD menu.	
2	Next Active Input/Up/Increase button	If the OSD menu is close, switches the monitor's input source to the next active input. If the OSD menu is close, press to open the information menu at HDMI, or to	
		perform auto adjustment at VGA.* .	
3	Color Modes/Down/Decre ase button	If the OSD menu is close, opens the Color menu where you can adjust the monitor screen to a comfortable If the OSD menu is open, press to navigate forward through the OSD menu and	
		decrease adjustment levels.	
4	Brightness+ Input/Exit/Back button	If the OSD menu is close, opens the Brightness+ adjustment scale. If the OSD menu is closed, press to switch to the next video input port.*	
5	Power button	Turns the monitor on or off.	

Rear components

To identify the components on the rear of the monitor, use this illustration and table.

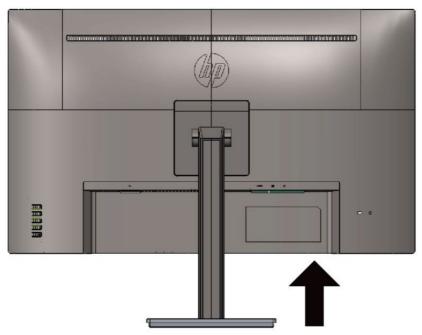

Table 1-2: Rear components and their descriptions

Control		Function	
1	Power connector	Connects the power cord	
2	HDMI port	Connects an HDMI cable from the monitor to a source device such as a computer.	
3	DisplayPort in connector	Connects the DisplayPort cable from the monitor to a source device such as a computer.	
4	Headphone jack	Connect the headphone to the monitor.	

Locating the serial number and product number

The SPEC label (1) and Barcode label (2) are located on the rear of the monitor. The serial number and product number are located on a Safety label. You may need these numbers when contacting HP about the monitor model.

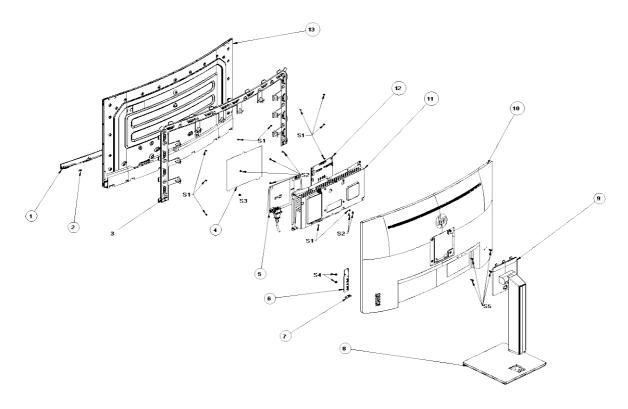

For worldwide models: label

3 Ilustrated parts catalog

To identify the monitor major components, use this illustration and table.

Item	Description	Qty
1	DECO_BASE L32WR-Dblc1hp-p12	1
2	LENS_POWER	1
3	MIDDLE_FRAME L32WR-Dblc1hp-p12	1
4	INSULATING SHEET 178*144	1
5	PWR PCB CEM1 SS 160*122*1.6mm HP N/A 60W	1
6	KEY PCB FR4 DS 104.5*25mm*1.6mm HP N/A N	1
7	LED PCB FR4 DS 26.1*12.5*1.2 VIEWSONIC N	1
8	BASE_ASS'Y NA NA	1
9	stand ass"y NA NA	1
10	REAR_COVER L32WR-Dblc1hp-p12	1
11	MAINFRAME	1
12	MAIN PCB FR4 4L 122*130*1.6mm HP N/A N/A	1
13	Panel TPM315WF1-1B058.L V22A Assign FQ	1
S1	SCREW M3 5	12
S2	SCREW D3 6	6
S3	SCREW 6mm	1
S5	SCREW 4 10	4

How to order parts

The HP authorized repair center can purchase the power board from HP.

Power board

Description	HP spare part number	Manufacturer part number
PSU HP X32C	M84746-001	PLPCKH362UQA3

Capacitors and connectors are available for purchase from the following EU distributors:

Farnell: <u>Farnell UK - Electronic Components Distributor</u>

RS Component: <u>Capacitors | RS Components (rs-online.com)</u>

• Tme Component: Transfer Multisort Elektronik

Capacitors by distributor

Component description	Location	Component distributor	Distributor part number
EC 680uF 20% 35V 12.5*20 3000 hr 2A PY1V	C905/C906	digikey	EGPA350ELL681MK20S
EC 470uF 20% 25V 10x12 5000 hr 1.6A ENB1	C9905	RS	EEUFR1E471

Connectors by manufacturer

Component description	Location identifier	Component distributor	Distributer part number
HDMI	CN501	RS	SD-47151-001 (Molex)
DP	CN551	Farnell	DP1RD20JQ3 (JAE)
AUDIO	CN601	RS	913-1021 (RS PRO)

NOTE: Rear cover and chassis need to be modified to hold connector. Connector may need modifications to meet functional, safety and regulatory requirements accordingly if it doesn't match exactly.

You can purchase cables from the HP part store at https://partsurfer.hp.com/Search.aspx.

Internal and External Power Supplies are available for purchase from the following EU distributor: EET_https://www.eetgroup.com/en-eu/

NOTE: HP continually improves and changes product parts. For complete and current information about supported parts for your product, go to https://partsurfer.hp.com/Search.aspx, select your country or region, and then follow the on-screen instructions.

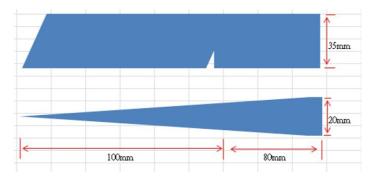

4 Removal and replacement procedures

Adherence to these procedures and precautions is essential for proper service.

Preparation for disassembly

Use this information to properly prepare to disassemble and reassemble the monitor.

- 1) Read the "Important safety information" and "Important service information and precautions" sections in the "Getting started" chapter of this guide.
- 2) Clean the room for disassembly.
- 3) Identify the disassembly area.
- 4) Check the position that the monitors are to be placed along with the number of monitors. Prepare the area for material flow according to the disassembly layout.
- 5) Be sure to have the following equipment and materials:
 - Press fixture
 - Working table
 - Screwdriver
 - Knife
 - Gloves
 - Cleaning cloth
 - ESD protection
 - Scraper bar in the following dimensions:

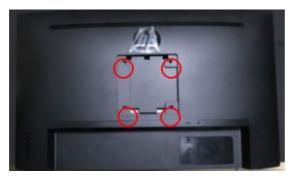

Rear Cover

Before removing the Rear Cover, follow these steps:

▲ Prepare the monitor for disassembly. See Preparation for disassembly on page 10.

Remove the Rear Cover:

1) Remove four screw from the rear case.

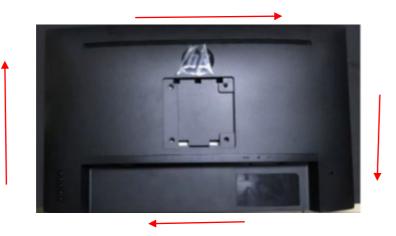

2) Use your fingers to split the left and right sides apart between the middle frame and rear case.

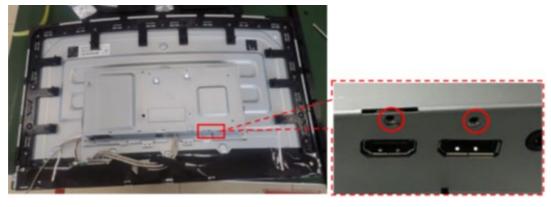

3) Insert the scraper bar tool into the gap between the middle frame and rear case, and then rotate. The hook opens. Repeat the steps.

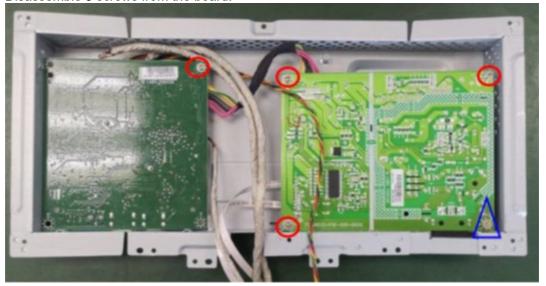

4) Remove the the tapes and the pins.

5) Remove 2 screws from the bracket.

6) Disassemble 5 screws from the board.

- 7) Disassemble all the boards from housing.
- 8) Disconnect all the wires from the board.

Power board

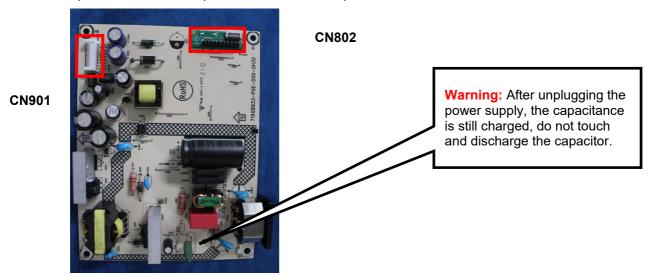

The power board part number is PLPCKH362UQA3.

Before removing the power board, follow these steps:

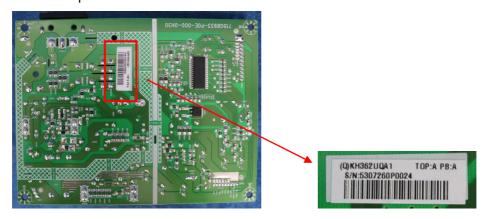

▲ Prepare the monitor for disassembly. See Preparation for disassembly on page 10.

Remove the power board:

1) The HP E24m G4 power board connector position is as follows:

2) Locate the part number location on the board

Connector repair

This procedure includes HDMI, DisplayPort, and AUDIO connectors.

The connectors are on the main board (board part number CBPCPA8H1Q2)

The connectors identifiers are as follows:

Connector	Location
HDMI	CN501
DP	CN551
AUDIO	CN601

Before repairing connectors, follow these steps:

▲ Prepare the monitor for disassembly. See Preparation for disassembly on page 10.

IMPORTANT:

- Repair Condition: Connector repair is only for out of warranty.
- Repairing must operate by professional repairers (Note) in repair center, not applicable for end user.
- Electrostatic protection is required when component replacement is required.
- The monitor meets ROHS, please use Lead-free solder wire for soldering.
- If Connector need to replace, must check specification and part number whether match the BOM and location.
- If connector need to replace, please insert new parts carefully because the near pin may cause short circuit by inappropriate operate.
- DO NOT allow any liquid on the board. Water and moisture may cause short-circuit to the electronic components and lead to malfunctions.
- The fusion point of Lead-Free solder is requested. Repairing with conventional lead wire may cause damage.
- Work quickly to avoid overheating the circuit board as soon as you confirm the steady soldering condition.
- Keep the soldering iron tip clean and well tinned and when replacing parts.
- A close inspection of the circuit board revealed look in good condition.
- After repaired, must connect source to each port to check Main board function is ordinary.

Note: (The requirement of professional repairers' regulation by ERP lot5)

1) The professional repairer has the technical competence to repair electronic displays and complies

- with the applicable regulations for repairers of electrical equipment in the Member States where it operates. Reference to an official registration system as professional repairer, where such system exists in the Member States concerned, shall be accepted as proof of compliance with this point.
- 2) The professional repairer is covered by insurance covering liabilities resulting from its activity, regardless of whether this is required by the Member State.

Audio connector CN601

Repair the audio connector:

1) Use a hot air gun to melt the solder on the pins. Pin solder with soldering iron and absorber. You can gently push down with the soldering iron once everything is molten to move the CN601 out of the through holes.

- 2) Lift the CN601 connector from the circuit board.
- 3) Place the new component on the circuit board. Be sure that it matches the footprint.
- 4) Solder the new component.

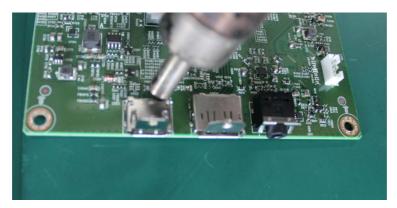

HDMI connector CN501

Repair the HDMI connector:

1) Use a soldering iron and a de-soldering pump to remove as much solder as possible from the pin.

2) Use a hot air gun to melt the solder on the pins.

- 3) Lift the CN501 connector from the circuit board.
- 4) Place the new component on the circuit board. Be sure that it matches the footprint.
- 5) Solder the new component.

DP connector CN551

Repair the DP connector:

1) Use a soldering iron and a de-soldering pump to remove as much solder as possible from the pin.

2) Use a hot air gun to melt the solder on the pins.

- 3) Lift the CN502 connector from the circuit board.
- 4) Place the new component on the circuit board. Be sure that it matches the footprint.
- 5) Solder the new component.

Function test

After repair, be sure to confirm that all functions are working.

Table 4-1: Function test

T 4 !4	On earth and a codutton	Tables
Test item	Operating description	Tool used
HDMI test	Confirm whether image displays and sound plays correctly on the monitor.	Computer or DVD player
DP test	Confirm whether image displays and sound plays correctly on the monitor.	Computer or DVD player
Audio test	Change volume and balance to confirm whether volume is smooth and loud enough.	Speaker

Support and troubleshooting

The following table lists possible problems, the possible cause or each problem, and the recommended solutions.

Table 4-2: Solving common problems

Problem Possible cause Solution	
---------------------------------	--

Screen is blank or video is flashing.	Power cord is disconnected.	Connect the power cord.
J	Monitor is off.	Power the power button. NOTE: If pressing the Power button has no effect, press and hold the power button for 10 seconds to disable the Power button lockout feature.
	Video cable is improperly connected.	Connect the video cable properly.
	System is in Auto-Sleep Mode.	Press any key on the keyboard or move the mouse to inactivate the screen blanking utility.
	Video card is incompatible.	Open the OSD menu and select the Input menu. Set Auto-Switch Input to Off and manually select the input or replace the video card or connect the video cable to one of the computer's on-board video sources.
Image appears blurred, indistinct, or too dark.	Brightness is too low.	Open the OSD menu and select Brightness to adjust the brightness scale as needed.
Check Video Cable is displayed on screen.	Monitor video cable is disconnected.	Connect the appropriate video signal cable between the computer and monitor. Be sure that the computer power is off while you connect the video cable.
Input Signal Out of Range is displayed on screen.	Video resolution and/or refresh rate are set higher than what the monitor supports.	Change the settings to a supported setting.
The monitor does not enter into a low-power sleep state.	The monitor's power saving control is disabled.	Open the OSD menu and select Power, select Auto-Sleep Mode, and then set auto-sleep to On.
"OSD Lockout" is displayed	The monitor's OSD lock function is enabled.	Press and hold the Menu button for 10 seconds to disable the OSD Lockout function.
Power Button is Locked is Displayed	The monitor's Power Button Lockout function is enabled.	Press and hold the Power button for 10 seconds to unlock the power button function.
